Born into a wealthy family in Prince William County, Virginia, he joined the cavalry at the outbreak of the Revolution and rose to the rank of lieutenant-colonel, becoming a hero through victories at Paulus Hook, New Jersey, and in the South. He later was a member of the Virginia legislature (1785–88, 1789–91) and the Continental Congress (1785–88) and was governor of Virginia (1792–95). After commanding troops to suppress the Whiskey Rebellion (1794), he served in the US House of Representatives (1799–1801). He eulogized President GEORGE WASHINGTON with the famous description 'First in war, first in peace, and first in the hearts of his countrymen.' He was the father of Confederate General ROBERT E LEE.

Lee, James Paris 1831–1904
US inventor
Born in Hawick, Scotland, he emigrated with his parents to Canada, later moving to Hartford, Connecticut. The 'Lee–Enfield' and 'Lee–METFORD' rifles are based in part on his designs.

Lee (of Asheridge), Jennie Lee, Baroness 1904–88
Scottish Labour politician
Born in Lochgelly, Fife, the daughter of a miner, she graduated from Edinburgh University with degrees in education and law, and at the age of 24, as a Labour MP for North Lanark, became the youngest member of the House of Commons. An ardent socialist, she campaigned with great wit and intelligence. In 1934 she married ANEURIN BEVAN and, despite her feminist principles, consciously stepped to one side as he rose within the Labour Party. Appointed Great Britain's first Arts Minister in 1964, she doubled government funding for the arts and was instrumental in setting up the Open University. She published two autobiographies, *Tomorrow is a New Day* (1939) and *My Life with Nye* (1980). She retired from the Commons in 1970 and was made a life peer.

Lee, Robert E(dward) 1807–70
US soldier, one of the greatest of the Confederate generals in the American Civil War

Robert E Lee was born in Westmoreland County, Virginia, and educated at the US Military Academy at West Point. He received a commission in the Engineer Corps, fought in the Mexican War (1846–48), and later became Superintendent of West Point. He commanded the US troops that captured JOHN BROWN at Harpers Ferry. When the Southern states seceded from the Union, he resigned from the US army so he would be free to serve his native state of Virginia, and in 1861 he accepted the position of commander-in-chief of the Confederate Army of Virginia.

Lee's achievements are central to the history of the American Civil War (1861–65). He was in charge of the defences at Richmond, and halted Federal forces in the Seven Days Battles (1862). His forces were victorious in the second Battle of Bull Run (1862). At the Battle of Antietam (1862) his first northern invasion was stopped, but his troops repulsed the Union side in the Battle of Fredericksburg (1862) and were victorious at the Battle of Chancellorsville (1863). However, his second northern invasion ended in defeat at the Battle of Gettysburg (1863), and in the Wilderness Campaign (1864) Lee's forces were badly battered.

In February 1865 Lee became commander-in-chief of all of the Southern armies, but the Confederate cause was hopeless at that point and two months later he surrendered his army to General ULYSSES S GRANT at Appomattox Court House, Virginia. After the war, Lee became president of Washington College at Lexington.

📖 Gene Smith, *Lee and Grant* (1984); Clifford Dowdey, *Lee* (1965); D S Freeman, *R E Lee* (4 vols, 1935–36).

> 'It is well that war is so terrible. We should grow too fond of it.'
>
> – Attributed remark after the Battle of Fredericksburg, December 1862.

Lee, Laurie 1914–97
English poet and writer
He was born in Slad, Gloucestershire, and educated locally. He worked as a scriptwriter for documentary films in the 1940s and his travels in many parts of the world are the subject of much of his writing. He was a nature-poet of great simplicity, whose works include *The Sun My Monument* (1944), *The Bloom of Candles* (1947) and *My Many-Coated Man* (1955). *A Rose For Winter* (1955) describes his travels in Spain, and his autobiographical books, *Cider With Rosie* (1959), *As I Walked Out One Midsummer Morning* (1969) and *I Can't Stay Long* (1975) are widely acclaimed for their evocation of a rural childhood, and of life in the numerous countries he visited. *A Moment of War* (1991, reprinted in 1992 as *Red Sky at Sunset*) takes up from the end of *As I Walked Out*, and recounts his experiences in Spain during the civil war.

Lee, Nathaniel c.1649/53–92
English playwright and actor
Born possibly in London, he attended Westminster School, then went to Trinity College, Cambridge. When nervousness caused him to abandon an acting career, he turned to writing and produced about ten tragedies between 1674 and 1682. The early ones, such as *Nero* (1674), *Sophonisba* (1675) and *Gloriana* (1676), are written in heroic couplets. His finest, *The Rival Queens or, The Death of Alexander the Great* (1677), is written in blank verse, and is representative not only of Lee's gift for dramatic rhetoric, but also his grasp of character and political psychology. He collaborated with JOHN DRYDEN on *The Duke of Guise* (1682). His plays were both popular and wildly sensational, containing many killings and several scenes of madness. Lee himself was not altogether a stable personality and was known to be one of the dissolute circle surrounding the notorious Earl of ROCHESTER. His health subsequently broke down to the extent that he was confined in Bedlam from 1684 to 1689.

Lee, Peggy, *pseudonym of* **Norma Delores Egstron** 1920–2002
US singer-songwriter and actress
Born in Jamestown, North Dakota, of Norwegian and Swedish ancestry, she established her reputation in the 1940s singing in a sultry jazz and blues-influenced style. Her long career included a stint with Benny Goodman's swing band and such classic hits as 'Why Don't You Do Right?', 'Is That All There Is?' and 'Fever'. She also wrote the score for the Walt Disney cartoon *Lady and the Tramp* (1955) and won an Oscar nomination for her performance in *Pete Kelly's Blues* (1955).

Lee, Richard Henry 1732–94
American Revolutionary leader
Born in Westmoreland County, Virginia, he served in the Virginia House of Burgesses (1758–75), led the Patriot cause in Virginia with PATRICK HENRY and THOMAS JEFFERSON, and co-ordinated several colonies' efforts toward independence. He was a member of the Continental Congress (1774–79, 1784–89) and signed the Declaration of Independence, although he opposed the new Constitution. He was also a US senator (1789–92).

Lee, Robert 1804–68
Scottish theologian
Born in Tweedmouth, Northumberland, he was educated at Berwick and St Andrews. In 1846 he was appointed professor of biblical criticism at Edinburgh University and a Queen's chaplain. He began his reform of the Presbyterian church service in 1857, restoring the reading of prayers, kneeling at prayer and standing during the singing. In 1863 he introduced a harmonium, and in 1865 an organ, into his church. These 'innovations' provoked bitter attacks upon him. His works include a *Handbook of Devotion* (1845) and *Prayers for Public Worship* (1857).

Lee, Robert E *See panel above*

Lee, Sir Sidney 1859–1926
English scholar and critic
Born in London, he was educated at the City of London School and Balliol College, Oxford. He became assistant editor of the *Dictionary of National Biography* in 1883, editor in 1891, and professor of English at East London College in 1913. He wrote a standard *Life of Shakespeare* (1898) and other works on Shakespeare. He also wrote Lives of Queen VICTORIA (1902) and EDWARD VII (1925–27).

Lee, Sophia 1750–1824
English writer
She enjoyed greater success as a dramatist than her sister Harriet Lee (1757–1851), notably with her play *The Chapter of Accidents* (1780), the success of which enabled her to open a girls' school in Bath, and the verse tragedy *Almeyda, Queen of Grenada* (1796). Her historical novel *The Recess* (1783–85) was well received, and she also wrote a lengthy ballad, *The Hermit's Tale* (1787). Her epistolary novel *The Life of a Lover* (1804) has autobiographical elements. 📖 K Rogers, *Feminism in 18th century England* (1982); D Punter, *The Literature of Terror* (1980)

Lee, Spike, *originally* **Shelton Jackson Lee** 1957–
US film-maker
Born in Atlanta, Georgia, the son of a jazz musician and a school teacher, he grew up in Brooklyn, New York City. He developed an interest in Super-8 film-making while at Morehouse College (1975–79), then studied at New York University's Tisch School of the Arts, where he gained a student Academy Award for his graduation film *Joe's Bed-Stuy Barbershop: We Cut Heads* (1982). Struggling to support himself, he sank his energies into the low-budget independent feature *She's Gotta Have It* (1986) which established him internationally. Determined to explode Hollywood's racial clichés and to express the texture and variety of African-American life, he sparked controversy with *School Daze* (1988) and *Do The Right Thing* (1989), a blistering assault on racism. An engaging actor in his own productions, he has also directed music videos and assisted in the 1988 presidential campaign of JESSE JACKSON. Later films include *Mo' Better Blues* (1990), *Jungle Fever* (1991), *Malcolm X* (1992), *He Got Game* (1998), *Summer of Sam* (1999), *25th Hour* (2002) and *Inside Man* (2006). 📖 Kaleem Aftab, *Spike Lee: That's My Story and I'm Sticking to It* (2005)

Lee, Tsung-Dao 1926–
US physicist and Nobel Prize winner
He was born in Shanghai, China, and was educated at Jiangxi (Kiangsi) and at Zhejiang (Chekiang) University. He won a scholarship to Chicago in 1946, became a lecturer at the University of California, and from 1956 was Enrico Fermi Professor at Columbia University (University Professor since

1984), as well as a member of the Institute for Advanced Study (1960–63). In 1986 he became director of both the China Center of Advanced Science and Technology and the Beijing Institute of Modern Physics, and from 1997 he was director of the Riken-BNL Research Center (emeritus since 2004). With CHEN NING YANG he disproved the parity principle, till then considered a fundamental physical law, and they were awarded the Nobel Prize in physics in 1957. *Particle Physics* was published in 1981.

Lee, Vernon, *pseudonym of* **Violet Paget** 1856–1935
English aesthetic philosopher, critic and novelist
Born of English parents in Boulogne, France, she travelled widely in her youth and settled in Florence. Studies of Italian and Renaissance art were followed by her philosophical study, *The Beautiful* (1913), one of the best expositions of the empathy theory of art. She also wrote two novels and a dramatic trilogy, *Satan the Waster* (1920), giving full rein to her pacifism.

Lee, Yuan Tseh 1936–
US physical chemist and Nobel Prize winner
Born in Hsinchu, Taiwan, he later moved to the USA, where he studied chemistry under DUDLEY HERSCHBACH at the University of California, Berkeley. He remained at Berkeley as a postdoctoral Fellow until 1968. Between 1968 and 1974 he rose from assistant professor to full professor at the University of Chicago, and then returned to Berkeley as professor of chemistry. He shared the Nobel Prize in chemistry in 1986 with Herschbach and JOHN POLANYI. In 1986 he also received the Debye award of the American Chemical Society and the National Medal of Science. His main research area is chemical reaction dynamics, with Herschbach's successful development of the molecular beam technique owing much to Lee's experimental skill. From 1994 to 2006 he was president of Academia Sinica, Taiwan, contributing much to the scientific, educational, and political life of his native country.

Leech, John 1817–64
English caricaturist
Born in London of Irish descent, he was educated at Charterhouse with THACKERAY (with whom he had a lifelong friendship) and then studied medicine, but turned to art after publishing, at the age of 18, *Etchings and Sketchings, by A. Pen, Esq.* (1835). From 1841 he contributed hundreds of sketches of middle-class life and political cartoons to *Punch*, and also woodcuts to the *Illustrated London News* (1856) and *Once a Week* (1859–62). He illustrated several books, including DICKENS's *Christmas Carol* and the sporting novels of ROBERT SMITH SURTEES. He also drew several lithographed series, particularly *Portraits of the Children of the Mobility* (1841). He was buried close to Thackeray at Kensal Green in London.

Leeds, Thomas Osborne, 1st Earl of Danby and **Duke of** 1631–1712
English statesman
He became MP for York in 1665. After opposition to the Earl of CLARENDON, he was appointed Treasurer of the Navy (1668) and Privy Councillor (1673). He became Lord Treasurer in 1673, succeeding Thomas Clifford (1630–73) as King CHARLES II's Chief Minister until his fall during the Exclusion Crisis (1679). Under Charles, he increased the yield from taxes and thus the king's financial independence. He arranged for the marriage of Princess Mary (MARY II), daughter of James, Duke of York, to William of Orange (WILLIAM III) (1677), but was impeached on charges of secret financial dealings with LOUIS XIV of France on Charles's behalf, and imprisoned in the Tower (1684). During JAMES VII AND II's reign, he opposed the king's Catholic policies, and negotiated William of Orange's assumption of the Crown (1688). He was rewarded with the marquisate of Carmarthen and the presidency of the Council (1689–99) and created Duke of Leeds (1694) but further impeachment proceedings, for taking a bribe to secure a charter for the new East India Company (1695), ended his career as Chief Minister. In semi-retirement during Queen ANNE's reign, he supported the Tories, especially defending the Church of England.

Leeghwater, Jan Adrianszoon 1575–1650
Dutch hydraulic engineer and millwright
Born in De Rijp, near Amsterdam, he was largely self-educated in many fields including mechanics, building, linguistics and sculpture. In 1608 he contracted to drain the largest lake in the north of the Netherlands, 17,000 acres in extent and up to 3m (10ft) in depth. After four years' work he was successful, having made extensive use of multi-stage scoop-wheel water-lifting systems, and thereafter he was involved in many drainage projects in Holland, France, Germany, Denmark and Poland. He also devised a modified type of windmill sail which was able to cope better with sudden changes in wind direction.

Lee Kuan Yew 1923–
Singaporean statesman
Born in Singapore into a wealthy Chinese family, he studied law at Cambridge and qualified as a barrister in London before returning to Singapore in 1951 to practise. He founded the moderate, anti-communist People's Action Party (PAP) in 1954 and entered the Singapore Legislative Assembly in 1955. He became the country's first prime minister in 1959 and acquired a reputation for probity and industry and overseeing the implementation of a successful programme of economic development. He remained in power until November 1990, when his deputy GOH CHOK TONG took over. However, he continued to wield considerable influence as a senior minister in the Cabinet. When Goh stepped down in 2004, Lee's eldest son Lee Hsien Loong (1952–) became prime minister, and the elder Lee assumed the new advisory and consultative position of Minister Mentor.

Leese, Sir Oliver William Hargreaves 1894–1978
English soldier
He won the Distinguished Service Order in World War I, and in 1939 became deputy Chief of Staff of the British Expeditionary Force in France. In 1942 he was promoted to lieutenant-general and commanded an army corps from El Alamein to Sicily, where he succeeded MONTGOMERY to the command of the 8th Army during the Italian campaign. In November 1944 he commanded an army group in Burma. He was appointed Lieutenant of the Tower of London in 1954.

Leeson, Nick *See* BARING

Lee Teng-Hui 1923–
Taiwanese politician
Born in Tamsui, and educated at universities in the USA and Japan, he taught economics at the National Taiwan University before becoming Mayor of Taipei in 1979. A member of the ruling Guomindang (Kuomintang) Party and a protégé of CHIANG CHING-KUO, he became vice-president of Taiwan in 1984 and state president and Guomindang leader on Chiang's death in 1988. The country's first island-born leader, he was a reforming technocrat who significantly accelerated the pace of liberalization and 'Taiwanization'. In 1995 he was allowed to enter the USA, after the reversal of a policy keeping him from setting foot there, to attend a reunion at his alma mater, Cornell University in Ithaca, New York. His re-election in 1996 made him Taiwan's first democratically-elected president. He stood down at the 2000 elections, and then resigned as leader of the Guomindang party.

Leeuwenhoek, Antoni van 1632–1723
Dutch amateur scientist
Born in Delft, he was educated as a businessman, and became skilled in grinding and polishing lenses to inspect cloth fibres. With his microscopes, each made for a specific investigation, he discovered the existence of protozoa in water everywhere (1674) and bacteria in the tartar of teeth (1676). Independently, he discovered blood corpuscles (1674), blood capillaries (1683), striations in skeletal muscle (1682), the structure of nerves (1717) and plant microstructures, among endless other observations. He was elected FRS in 1680. 🕮 Clifford Dobell, *Antony van Leeuwenhoek and His 'Little Animals'* (2nd edn, 1958)

Le Fanu, (Joseph) Sheridan 1814–73
Irish novelist and journalist
Born in Dublin, he was a great-nephew of RICHARD SHERIDAN. Called to the Bar in 1839, he soon abandoned law for journalism. He became editor and proprietor (1869) of the *Dublin University Magazine*, and later bought three Dublin newspapers. His novels include *The House by the Churchyard* (1863) and *Uncle Silas* (1864), many of his short stories are collected in *In a Glass Darkly* (1872), and he wrote 14 other works, remarkable for their preoccupation with the supernatural. His *Poems* were edited by ALFRED PERCEVAL GRAVES (1896) and *Madam Crowl's Ghost* (1923) was edited by M R JAMES. 🕮 I Melada, *Sheridan Le Fanu* (1987)

Lefauchaux, Marie-Helene, *née* **Postel-Vinay** 1904–64
French Resistance fighter
Born in Paris, she is best remembered for the part she played, along with her husband Pierre Lefauchaux, in the French Resistance of World War II. A woman of great resourcefulness as well as courage, she succeeded in having her husband released from Buchenwald, and her service during the war

earned her the Croix de Guerre and Chevalier of the Legion of Honour. Before and after the war she became prominent in the municipal administration of Paris, then she became a professional diplomat for women's rights and showed a particular concern for students in French colonial Africa. She was a member of France's United Nations delegation (1946–59), and was president of the International Council of Women (1957–63). She died in a plane crash in the USA.

Lefebvre, Marcel 1905–91
French schismatic Roman Catholic prelate
Born in Tourcoing, he studied at the French Seminary in Rome and was ordained in 1929. In the 1930s he was a missionary in Gabon, and he later became Archbishop of Dakar, Senegal (1948–62). As a clerical traditionalist he opposed the liberalizing liturgical and spiritual reforms of the Second Vatican Council (1962–65), and in 1970 formed the 'Priestly Cofraternity of PIUS X' to oppose them. He was suspended 'a divinis' in 1976 by Pope PAUL VI for his refusal to stop the ordination of priests at his headquarters in Switzerland without papal permission. He defied the suspension and continued to ordain a further 216 priests before being formally excommunicated by Pope JOHN PAUL II in 1988, thus producing the first formal schism within the Roman Catholic Church since 1870.

Lefschetz, Solomon 1884–1972
US mathematician
Born in Moscow, Russia, he studied engineering in Paris before emigrating to the USA, where he worked as an engineer. He abandoned engineering for mathematics, taking his doctorate in 1911, and teaching at Kansas University (1913–25), where he soon made a reputation by his work in algebraic geometry when he developed a theory of complex algebraic varieties in n dimensions. This led him into the study of topology, and in 1925 he moved to Princeton where he remained until his retirement in 1953, when he became visiting professor at Brown University. Lefschetz became the leading topologist of his generation in the USA and an important theorem on the existence of fixed points of mappings bears his name. Interested in differential equations, he worked on their qualitative theory, and directed US mathematicians to the extensive Russian literature on the subject.

Le Gallienne, Eva 1899–1991
English actress on the US stage
Born in London, the daughter of RICHARD LE GALLIENNE, she was brought up in Paris. She made her debut in London in *Mona Vanna* (1914), before studying for a year under HERBERT BEERBOHM TREE and moving to New York. She was the founder (1926) and director of the Civic Repertory Theater of New York, acting in and directing most of the 37 plays produced there before it closed in 1935. She was then co-founder and director of the American Repertory Theater (1946–48). She acted until the early 1980s, and was renowned for her Chekhovian roles.

Le Gallienne, Richard 1866–1947
English writer
Born in Liverpool, of Guernsey ancestry, he became a journalist in London in 1891, but later lived in New York. He published many volumes of prose and verse from 1887, when his first collection, *My Ladies' Sonnets*, was published. He was an original member of the Rhymers Club with W B YEATS, OSCAR WILDE and others. His best books are *Quest of the Golden Girl* (1896), *The Romantic '90s* (1925) and *From a Paris Garret* (1936).

Legat, Nikolai Gustavovich 1869–1937
Russian dancer, teacher, ballet master and choreographer
Born in St Petersburg, he studied with his father at the Imperial Ballet School, graduating in 1888. He joined the Maryinsky Theatre, where he spent 20 years as a principal, dancing in major works including the first performance of LEV IVANOV's *The Nutcracker* (1892). He took over the directorship of the company in 1905, dropping choreography for teaching. His pupils there included TAMARA KARSAVINA, MICHEL FOKINE and NIJINSKY. In 1923 he moved to the USA to become Ballet Master of SERGEI DIAGHILEV's company, but finally settled in London where he opened his own school and taught ALEXANDRA DANILOVA, MARGOT FONTEYN, NINETTE DE VALOIS, ANTON DOLIN and SERGE LIFAR. His school continues to function at Mark Cross, Sussex.

Legendre, Adrien-Marie 1752–1833
French mathematician
Born in Paris, he studied at the Collège Mazarin, and became professor of mathematics at the École Militaire and a member of the French Academy of Sciences (1783). In 1787 he was appointed as one of the commissioners to relate the Paris and Greenwich meridians by triangulation and in 1813 he succeeded JOSEPH DE LAGRANGE at the Bureau des Longitudes. He proposed the method of least squares in 1806 (independently of CARL GAUSS). His classic work *Essai sur la théorie des nombres* (1798, 'Essay on the Theory of Numbers') includes his discovery of the law of quadratic reciprocity, and his *Traité des fonctions elliptiques* (1825, 'Treatise on Elliptical Functions') became the definitive account of elliptic integrals prior to the work of NIELS HENRIK ABEL and CARL JACOBI. His *Éléments de géométrie* (1794), translated into English by THOMAS CARLYLE, reintroduced rigour to the teaching of elementary geometry in France.

Léger, Fernand 1881–1955
French painter
Born in Argentan, he was a major force in the Cubist movement. Between 1903 and 1907 he studied at various Paris studios and initially painted in a diffuse Neo-Impressionist manner. He then discovered PAUL CÉZANNE and began 'constructing' his pictures with volumetric shapes. His pictures differ from those of the fellow members of the avant-garde in being more 'tubist' than Cubist. By 1912, in pictures like *La Femme en Bleu* ('Woman in Blue'), Léger was nearing pure abstraction, but after World War I he returned to primarily figurative work in which the working man is combined with machinery in monumental patterns made up of heavy black outlines and primary colour infill. He also designed theatre sets, taught at Yale University and executed murals for the United Nations building in New York (1952). He collaborated on the first 'art-film', *Le Ballet mécanique*, in 1923. There is a museum dedicated to his work at Biot on the Côte d'Azur in the south of France.

Legge, James 1815–97
Scottish missionary and sinologist
Born in Huntly, Aberdeenshire, he graduated from Aberdeen University in 1835. He ran the Anglo-Chinese missionary college in Malacca, and then spent 30 years in Hong Kong. In 1876 he became the first professor of Chinese at Oxford. His greatest work was a weighty edition of *Chinese Classics* (28 vols, 1861–86)

Legge, Walter 1906–79
British music impresario
He was born in London and became recording manager with HMV in 1927, and later with Columbia. He was largely responsible for engaging a number of musicians who went on to become internationally famous, notably HERBERT VON KARAJAN, DIETRICH FISCHER-DIESKAU and ELISABETH SCHWARZKOPF, whom he married in 1953. He founded the Philharmonia Orchestra in 1945, managing it until 1964 when he tried without success to disband it. He was a lifelong devotee of the music of HUGO WOLF, and undertook the extensive recording of his songs.

Leggett, Sir Anthony James 1938–
English physicist
Born in London, he received his PhD in physics from Oxford in 1964. He has made outstanding contributions to the theory of superconductors and superfluids, and has long championed efforts to scrutinize the foundations of physics at the boundary between the classical and quantum worlds. Noted for his theoretical work explaining the origin of superfluidity in 3He, a rare isotope of helium, he shared the 2003 Nobel Prize in physics with VITALI GINZBURG and ALEXEI ABRIKOSOV. He was knighted in 2004.

Le Gray, Gustave *See* GRAY, GUSTAVE LE

Legros, Alphonse 1837–1911
British painter
Born in Dijon, France, he adopted England as his home. On the advice of JAMES MCNEILL WHISTLER, he went to London in 1863 and by 1875 was in charge of the etching class at the Royal College. Appointed Slade Professor to the University College in 1875–76, he exercised a strong traditional influence. He produced over 750 etchings and was noted for his revival of original portraiture which had been in decline for many years. His landscape and figure studies particularly mark him as an influential figure in the British etching movement.

Le Guin, Ursula K(roeber), *née* **Kroeber** 1929–
US science-fiction writer
She was born in Berkeley, California, the daughter of the anthropologist ALFRED LOUIS KROEBER, and educated at Radcliffe College and Columbia University. Much of her work focuses on subjective views of a universe incorporating numerous habitable worlds, some spawned by beings from the 'Hain'. The Hain trilogy consists of *Rocannon's World* (1966), *Planet of Exile* (1966) and *City of Illusions* (1967), and other novels include *The Left Hand of Darkness* (1969), *The World for World is Forest* (1976) and *Dancing at the Edge of the World* (1989). In a

prodigious work for children, known as the 'Earthsea' trilogy – *A Wizard of Earthsea* (1968), *The Tombs of Atuan* (1971) and *The Farthest Shore* (1972) – she depicts a magical but threatening world, in which every village has its small-time sorcerer and the forces of evil are uncomfortably close. She continued this trilogy with *Tehanu* (1990), *Tales from Earthsea* (2001) and *The Other Wind* (2001). A prolific writer, she has demonstrated that it is possible to work in genre and be taken seriously. She had also produced a guide to writing, *Steering The Craft* (1998). 🕮 E C Cogell, *Understanding Ursula K. Le Guin* (1990)

Lehár, Franz 1870–1948
Hungarian composer
Born in Komárom, he became a military band conductor in Vienna. He wrote a violin concerto but is best known for his operettas which include his most popular *The Merry Widow* (1905, *Die lustige Witwe*), *The Count of Luxembourg* (1909, *Der Graf von Luxemburg*), *Frederica* (1928, *Friederike*) and *The Land of Smiles* (1929, *Das Land des Lächelns*).

Lehmann, Beatrix 1903–79
English actress
She was born in Bourne End, Buckinghamshire, the daughter of journalist Rudolph Chambers Lehmann (1856–1929) and sister of JOHN and ROSAMOND LEHMANN. She first appeared on the stage in 1924 at the Lyric, Hammersmith, and subsequently appeared in many successful plays, including *Family Reunion*, PETER USTINOV's *No Sign of the Dove* and *Waltz of the Toreadors*. In 1946 she became director-producer of the Arts Council Midland Theatre Company. She also appeared in films and wrote two novels and several short stories.

Lehmann, Inge 1888–1993
Danish geophysicist
Born in Copenhagen, she went to Copenhagen University in 1907 to read mathematics. She spent a year at Cambridge (1910–11), pursued a career in insurance and then resumed her studies in 1918. From 1928 she was chief of the seismological department of the newly founded Danish Geodetic Institute, taking responsibility for the seismological stations in Greenland. Involved in the interpretation of seismic events, she discovered that the presence of a distinct inner core of the Earth was required to explain the observed data. In collaboration with BENO GUTENBERG she found a low-velocity layer at a depth of 200km (125 miles) which fitted well with the seismic data, and became generally accepted.

Lehmann, John Frederick 1907–87
English writer and publisher
He was born in Bourne End, Buckinghamshire, the son of journalist Rudolph Chambers Lehmann (1856–1929), and educated at Trinity College, Cambridge. He founded the periodical in book format, *New Writing* (1936–41), was managing director of the Hogarth Press with LEONARD and VIRGINIA WOOLF (1938–46), and ran his own firm, John Lehmann Ltd, with his sister, ROSAMOND LEHMANN, as co-director from 1946 to 1953. In 1954 he inaugurated *The London Magazine*, which he edited until 1961. His first publications were volumes of poetry, including *A Garden Revisited* (1931) and *Forty Poems* (1942). He also wrote a novel, *Evil was Abroad* (1938), and studies of *Edith Sitwell* (1952), *Virginia Woolf and her World* (1975) and *Rupert Brooke* (1980). He wrote his autobiography in three volumes, *The Whispering Gallery* (1955), *I am my Brother* (1960) and *The Ample Proposition* (1966).

Lehmann, Lotte 1888–1976
US soprano
Born in Perleberg, Germany, she studied in Berlin, made her debut in Hamburg (1910), and sang at the Vienna Staatsoper (1914–38). She also appeared frequently at Covent Garden, London (1924–38), and at the New York Metropolitan Opera (1934–45). She was noted for her performances of SCHUMANN's songs and her roles in RICHARD STRAUSS's operas, including the Marschallin in *Der Rosenkavalier*, and for the premières of his *Die Frau ohne Schatten* (1919, *The Woman without a Shadow*) and *Intermezzo* (1924). She took US nationality, and retired to teach in Santa Barbara, California, in 1951.

Lehmann, Rosamond Nina 1901–90
English novelist
She was born in High Wycombe, Buckinghamshire, the daughter of journalist Rudolph Chambers Lehmann (1856–1929) and sister of BEATRIX and JOHN LEHMANN. She was educated at Girton College, Cambridge, which provided the background for her first novel, *Dusty Answer* (1927). Among her other titles are *A Note in Music* (1930), *An Invitation to the Waltz* (1932) and its sequel *The Weather in the Streets* (1936), *The Echoing Grove* (1953) and *A Sea-Grape Tree* (1970), her last novel. They show a fine sensitive insight into character and her women especially are brilliantly drawn. She also wrote a play, *No More Music* (1939) and a volume of short stories, *The Gypsy's Baby* (1946). Following the death of her daughter, she developed an interest in spiritualism, and she later became president of the College of Psychic Studies. In 1967 she published the autobiographical *The Swan in the Evening*. 🕮 G Tindall, *Rosamond Lehmann: An Appreciation* (1985)

Lehn, Jean-Marie 1939–
French chemist and Nobel Prize winner
Born in Rosheim, Bas-Rhin, he studied at the University of Strasbourg, where he worked on terpene chemistry, then collaborated with ROBERT WOODWARD at Harvard on vitamin B_{12} synthesis. He later joined the University of Strasbourg, becoming professor in 1970 and then professor at the Collège de France from 1979. Studying the mechanism of transport of metal ions across cell membranes, he built on CHARLES PEDERSEN's work to show that metal ions can exist in a non-polar environment if contained within the cavity of a large organic molecule. Such structures are known as cryptates, and similar compounds play an important role in the transport of metal ions across biological membranes. His research has initiated a new branch of organic chemistry – supramolecular chemistry – and earned him, along with Pedersen and DONALD CRAM, the Nobel Prize in chemistry in 1987. He was created Commander of the Legion of Honour (1996) and also Officer of the National Order of Merit (1993).

Leibl, Wilhelm 1844–1900
German artist
Born in Cologne, he studied in Paris, being much influenced by GUSTAVE COURBET's realism, and later worked in Munich. Most of his paintings are genre scenes of Bavaria and the lower Alps, although he also painted a number of portraits.

Leibniz or **Leibnitz, Gottfried Wilhelm** *See panel p938*

Leibovitz, Annie (Anna-Lou) 1949–
US photographer
Born in Waterbury, Connecticut, she trained at the San Francisco Art Institute and established her reputation as a celebrity photographer working for *Rolling Stone* magazine in the 1970s. She worked for *Vanity Fair* from 1983 and founded the Annie Leibovitz Studio in New York in the early 1990s. Her most famous celebrity portraits include a wide variety of politicians, musicians and athletes, among them MICK JAGGER, LOUIS ARMSTRONG, ELLA FITZGERALD, JESSYE NORMAN, MIKHAIL BARYSHNIKOV, ARNOLD SCHWARZENEGGER and the last portrait ever taken of JOHN LENNON. Her publications include *Photographs 1970–90* (1992), *Women* (2000, with her long-term companion SUSAN SONTAG) and *A Photographer's Life: 1990–2005* (2006).

Leicester, Robert Dudley, Earl of c.1533–1588
English nobleman
He was the grandson of the notorious EDMUND DUDLEY beheaded by HENRY VIII, and the son of John Dudley, Earl of WARWICK, who was executed for his support of Lady JANE GREY. Robert Dudley himself was sentenced to death, but, pardoned (1554), became a favourite of Queen ELIZABETH I, who made him Master of the Horse, Knight of the Garter, a Privy Councillor, High Steward of the University of Cambridge, Baron Dudley and finally (1564) Earl of Leicester. It was rumoured that he had poisoned Amy Robsart (1560), whom he had married in 1550, in order to be free to marry the queen. He was unpopular at court, and Elizabeth suggested him as a husband for MARY, QUEEN OF SCOTS (1563). He made a secret marriage to the Dowager Lady Sheffield, but he remained popular with Elizabeth, who was magnificently entertained by him at his castle of Kenilworth (1575). She was only temporarily offended when he bigamously married (1578) the widow of Walter Devereux, Earl of ESSEX. He supported the Puritans in their opposition to Catholicism. Sent in 1585 to command the expedition to the Low Countries in which Sir PHILIP SIDNEY, his nephew, died at Zutphen, he was recalled for incompetence in 1587, and his arrogance and touchiness were counterproductive, but he was nonetheless appointed as leader of the forces assembled at Tilbury to defend England against the Spanish Armada (1588). He died suddenly at Cornbury, in Oxfordshire, probably of malaria, but some alleged he had taken poison originally intended for his wife. 🕮 E Rosenberg, *Leicester, Patron of Letters* (1958)

Leicester (of Holkham), Thomas William Coke, Earl of 1752–1842
English agriculturist
One of the first agriculturists of England, by his efforts north-west Norfolk was converted from a rye-growing into a wheat-growing

Leibniz, Gottfried Wilhelm 1646–1716
German philosopher and mathematician

Leibniz was born in Leipzig, the son of a professor of moral philosophy. In 1667 he obtained a position at the court of the Elector of Mainz on the strength of an essay on legal education. There he codified laws, drafted schemes for the unification of the churches, and studied the work of RENÉ DESCARTES, ISAAC NEWTON, BLAISE PASCAL, ROBERT BOYLE and others.

In London he came into contact with mathematicians of Newton's circle, causing a dispute later as to whether he or Newton was the inventor of the infinitesimal calculus; both had published systems in the 1680s. The Royal Society formally declared for Newton in 1711, but the matter was never fully settled. In 1676 Leibniz visited SPINOZA in The Hague on his way to take up a new, and his last, post as librarian to the Duke of Brunswick at Hanover. Here he continued to elaborate his mathematical and philosophical theories, without publishing them, and maintained a huge learned correspondence.

He also travelled in Austria and Italy in the years 1687–90 to gather materials for a large-scale history of the House of Brunswick, and went in 1700 to persuade FREDERICK I of Prussia to found the Prussian Academy of Sciences in Berlin, of which he became the first president. He was disliked by George of Hanover and was left behind in 1714 when the Elector moved the court to London to become King of Great Britain (as GEORGE I). Leibniz died in Hanover two years later, without real recognition and with almost all his work unpublished. Remarkable for his encyclopedic knowledge and diverse accomplishments outside the fields of philosophy and mathematics, he was perhaps the last universal genius, spanning the whole of contemporary knowledge.

His best-known doctrine is that the world is composed of an infinity of simple, indivisible, immaterial, mutually isolated 'monads' which form a hierarchy, the highest of which is God; the monads do not interact causally but constitute a synchronized harmony with material phenomena. Leibniz is recognized as one of the great rationalist philosophers but he had perhaps his greatest influence (for example, on BERTRAND RUSSELL) as a mathematician and a pioneer of modern symbolic logic.

🕮 Leibniz made original contributions to optics, mechanics, statistics, logic and probability theory; he conceived the idea of calculating machines, and of a universal language; he wrote on history, law and political theory; and his philosophy was the foundation of 18th-century rationalism. His *Essais de théodicée sur la Bonté de Dieu, la liberté de l'homme et l'origine du mal* (the *Theodicy*, 1710), was a relatively popular work in theology, expressing his optimism and faith in enlightenment and reason, which VOLTAIRE satirized brilliantly in *Candide* ('all is for the best in this best of all possible worlds'). The metaphysics and more technical philosophy are to be found in his response to JOHN LOCKE, the *New Essays on Human Understanding* (completed in 1704 but not published until 1765), the *Discours de Métaphysique* (1846), the correspondence with ANTOINE ARNAULD and with SAMUEL CLARKE, and numerous short papers.

🕮 Stuart Brown, *Leibniz* (1984); Nicholas Rescher, *Leibniz: An Introduction to his Philosophy* (1979); C D Broad and C Lewy, *Leibniz: An Introduction* (1975).

> *C'est Dieu qui est la dernière raison des choses, et la connaissance de Dieu n'est pas moins la principe des sciences, que son essence et sa volonté sont les principes des êtres.*
>
> 'It is God who is the ultimate reason of things, and the knowledge of God is no less the beginning of science than his essence and will are the beginning of beings.'
>
> – From 'Letter on a General Principle Useful in Explaining the Laws of Nature' (1687) in *Leibniz: Philosophical Papers and Letters* (Eng trans by L E Loemker, 1969).

district, and more stock and better breeds of sheep, cattle and pigs were kept on the farms. He represented Norfolk as a Whig MP for periods during 1776–1833, and in 1837 was created Earl of Leicester of Holkham. He was a descendant of Sir EDWARD COKE.

Leichhardt, (Friedrich Wilhelm) Ludwig 1813–c.1848
Australian naturalist and explorer
Born in Trebatsch, Prussia, he studied at the universities of Berlin and Göttingen but obtained no formal qualifications. He became interested in natural history, and after arriving in Sydney mounted an expedition which set out from Brisbane north-west for Port Essington, a settlement on the coast of Arnhem Land. They reached it 15 hard months later, and the party's arrival back in Sydney in March 1846, when they had been presumed lost, caused great excitement. In December of the same year he set out to attempt an east–west crossing of the northern part of the continent, but was forced to turn back. On his return to Sydney he learned he had been awarded gold medals by the Geographical Societies of Paris and London. In February 1848 he set off on another transcontinental journey but nothing was heard of him or the expedition after April 1848.

Leif the Lucky, *properly* **Leifur heppni Eiríksson** fl.1000
Icelandic explorer
He was the son of ERIK THE RED. Just before the year 1000 he set sail from Greenland to explore lands to the west, reaching Baffin Land, Labrador, and an area he called 'Vínland' (Wineland) because of the wild grapes he found growing there. The location of Vínland has defied precise identification, but incontrovertible remains of a Norse settlement have been found on Newfoundland. Other Icelandic settlers, led by THORFINN, tried to establish a colony in 'Vínland', but withdrew in the face of hostility from the native Indians. Two Icelandic sagas, *Eiríks saga rauða* ('Saga of Eric') and *Grænlendinga saga* ('Tale of the Greenlanders'), tell the story of the Norse discovery and attempted colonization of North America, 500 years before CHRISTOPHER COLUMBUS discovered the New World.

Leigh, Janet, *originally* **Jeanette Helen Morrison** 1927–2004
US actress
Born in Merced, California, she was studying music and psychology at the College of the Pacific when she came to the attention of NORMA SHEARER, who secured a screen test for her at MGM. A succession of fresh-faced ingénue roles followed, notably in *Little Women* (1949) and *Angels in the Outfield* (1951). Later, darker roles followed in *Touch of Evil* (1958) and *The Manchurian Candidate* (1962), and she was nominated for an Academy Award for *Psycho* (1960). Her third husband (1951–62) was TONY CURTIS, with whom she made five films; JAMIE LEE CURTIS is their daughter. 🕮 *There Really Was a Hollywood* (1984)

Leigh, Mike 1943–
English film and theatre director
Born in Salford, Greater Manchester, he trained as an actor at RADA in London and subsequently studied at the London Film School. Associate director of the Midlands Arts Centre For Young People (1965–66) and an assistant director with the Royal Shakespeare Company from 1966, he began to develop his own style of reflecting the bittersweet ironies of everyday lives through pieces improvised in collaboration with hand-picked actors. He made his film debut with *Bleak Moments* (1971) and created acutely observed social comedies for television including *Nuts in May* (1976) and *Abigail's Party* (1977). His stage work includes *Goose Pimples* (1981), *Smelling a Rat* (1988) and *Two Thousand Years* (2005). His films include *High Hopes* (1988), *Life is Sweet* (1990), *Naked* (1993) and *Secrets and Lies* (1996), which gained the Palme D'Or at the Cannes Film Festival, five Academy Award nominations and three BAFTA awards. More recent work includes *Career Girls* (1997), *Topsy-Turvy* (1999, Academy Award nomination) and *Vera Drake* (2004, Academy Award nomination, BAFTA award). He was awarded an OBE in 1993.

Leigh, Vivien, *originally* **Vivian Mary Hartley** 1913–67
British actress
She was born in Darjeeling, India, and after training at RADA, her first contract was with ALEXANDER KORDA, playing in *Fire Over England* (1936) with LAURENCE OLIVIER, whom she later married (1940–60). In Hollywood she played her best-known part, Scarlett O'Hara in *Gone With the Wind* (1939), which won her an Academy Award. Other major film roles were in *Anna Karenina* (1948) and *A Streetcar Named Desire* (1951), which gained her another Academy Award. 🕮 Hugo Vickers, *Vivien Leigh: A Biography* (1989)

Leigh-Mallory, Sir Trafford 1892–1944
English air force officer
Born in Cheshire, he was educated at Haileybury and Magdalen College, Oxford. He served with the Royal Flying Corps in World War I, and in World War II he commanded Groups in Fighter Command in the Battle of Britain. He was commander-in-chief of Fighter Command (1942–44) and of Allied Expeditionary Air Forces for the Normandy landings (1944). Appointed commander-in-chief of Allied Air Forces in South East Asia, he was killed in an air crash during the journey there.

Leigh-Pemberton, Robin (Robert) *See* KINGSDOWN, ROBIN (ROBERT) LEIGH-PEMBERTON, BARON

Leighton, Clare Veronica Hope 1901–89
US artist
Born in London, England, into a literary family, she trained at the Brighton School of Art and the Slade School of Art, London, prior to learning engraving at the Central School of Arts and Crafts in London. She wrote several books on engraving, then moved to the USA in 1939, becoming a US citizen in 1945. She continued to paint but became famous for her wood engravings which use large areas of dark, defined by finely engraved lines often depicting labourers, farm workers or the fishermen of Cape Cod. She held many titles, including vice-president of both the National Institute of Arts and Letters and the Society of American Graphic Art. Boston Public Library lists some 789 engravings by her as well as work in other media such as stained glass and mosaic.

Leighton (of Stretton), Frederic Leighton, Baron 1830–96
English painter
Born in Scarborough, Yorkshire, he studied and travelled extensively in Europe and had immediate success with *Cimabue's Madonna carried in Procession through Florence* (1855) – a picture purchased by Queen VICTORIA. Also from his early period is his masterpiece *Songs without Words* (1860–61, Tate Britain, London). Among his later works were *Paolo and Francesca* (1861), *The Daphnephoria* (1876) and *The Bath of Psyche* (1890). An aesthete and idealist, he was also a distinguished sculptor, and in 1877 his *Athlete struggling with a Python* was purchased out of the CHANTREY Bequest. Several of his paintings, for example *Wedded* (1882), became mass bestsellers in photogravure reproduction. His *Addresses* were published in 1896. A president of the Royal Academy, London, and the consummate Academic artist, his final words are said to have been 'Give my love to the Academy'.

Leighton, Kenneth 1929–88
English composer and pianist
Born in Wakefield, Yorkshire, he studied at Oxford, and then took composition lessons with Goffredo Petrassi in Rome. He in turn taught composition at Edinburgh University from 1956, and from 1970 was Reid Professor of Music there. His compositions showed vigorous and individual grasp of traditional forms and contrapuntal disciplines. A skilful and rewarding composer of choral music, he also wrote extensively for the piano (including three concertos) as well as three symphonies, other concertos, an opera *Columba* (1981) and organ and chamber music.

Leighton, Margaret 1922–76
English actress
Born near Birmingham, she was the leading lady in many stage plays and films, and became one of the best-known actresses of her era. She trained for the stage as a teenager, joined the Old Vic under LAURENCE OLIVIER and RALPH RICHARDSON in the 1940s, and made her Broadway debut in 1946. Her major plays include TERENCE RATTIGAN's *Separate Tables* (1956) and TENNESSEE WILLIAMS's *The Night of the Iguana* (1961). She was nominated for an Academy Award for the film *The Go-Between* (1971).

Leighton, Robert 1611–84
Scottish prelate
Born probably in London, he studied at Edinburgh and spent some years in France. He became a minister in 1641, signed the Covenant two years later and in 1653 was appointed Principal of Edinburgh University. Soon after the Restoration he was induced by CHARLES II to become one of the new bishops, and chose Dunblane. His aim was to preserve what was best in episcopacy and presbyterianism as a basis for comprehensive union, but he succeeded only in being misunderstood by both sides. The continued persecution of the Covenanters drove him to resign his see (1665), but Charles persuaded him to return. In 1669 he became Archbishop of Glasgow. His conferences at Edinburgh (1670–71) with leading Presbyterians were failures and, disillusioned, he retired in 1674.

Leino, Eino, *pseudonym of* **Armas Eino Leopold Lönnbohm** 1878–1926
Finnish poet and novelist
He published his first poetry collection, *Maaliskuun lauluja* (1896, 'Spring Songs'), aged 18. He developed the metre of the *Kalevala*, or national epic, into a distinctive, sombrely lyrical style of his own, best exemplified in the two volumes of *Helkavirsiä* (1903, 1916, 'Whitsongs'), the second of which is shadowed by his reaction to World War I. He also wrote novels, and translated works of DANTE, RACINE, CORNEILLE, GOETHE and SCHILLER. 🕮 P Saarikoski, *Eino 'Leino'* (1974)

Leinsdorf, Erich 1912–93
US conductor
He was born in Vienna, Austria, and was assistant to BRUNO WALTER in Vienna and to TOSCANINI in Salzburg. He performed opera (notably Wagner) in New York and conducted several US orchestras, including the Cleveland Orchestra (1943–44), the Rochester Philharmonic Orchestra (1947–56) and the Boston Symphony Orchestra (1962–69). He was guest conductor of many other orchestras.

Leiris, Michel 1901–90
French anthropologist, writer and poet
He was born in Paris. After an early involvement with the Surrealist movement (1925–29), he joined the trans-African Dakar–Djibouti expedition of 1931–33. He took up anthropology as a profession and travelled in Africa and the Caribbean. His writings, many of them autobiographical, like *L'Âge d'homme* (1939, Eng trans *Manhood*, 1966) and *La Règle du jeu* (4 vols, 1948–76, 'The Rules of the Game'), are marked by a consuming interest in poetry, and he combined anthropology with a distinguished career as a literary and art critic. His major works include *L'Afrique fantôme* (1934, 'Phantoms of Africa') and *Afrique Noire: La création plastique* (1967, with Jacqueline Delange, Eng trans *African Art*, 1968). 🕮 M Nadeau, *Michel Leiris et la quadrature du cercle* (1963)

Leishman, Sir William Boog 1865–1926
Scottish bacteriologist
Born in Glasgow, he obtained his MD from the University of Glasgow in 1886, and later became professor of pathology at the Army Medical College in Millbank (1903–13) and director-general of the Army Medical Service (1923). In 1900 he discovered the protozoan parasite (*Leishmania*) responsible for the disease known variously as kala-azar and dumdum fever. He went on to develop the widely used 'Leishman's stain' for the detection of parasites in the blood. He also made major contributions to the development of various vaccines, particularly those used against typhoid, and it was as a result of his work that mass vaccination was introduced in 1914 for the British army. He was knighted in 1909, and elected FRS in 1910.

Leith, Emmett Norman 1927–2005
US optical scientist and electrical engineer
Born in Detroit and educated at Wayne State University, he joined the University of Michigan in 1953 and was professor of electrical engineering there from 1968 until his death. In 1961 he suggested with his colleague Juris Upatnieks (1936–) that applications of holography could be achieved by using an inclined reference beam, which led to separation of the twin images produced in DENNIS GABOR's optical arrangement. This, coupled with Leith's production of the first laser hologram, quickly led to important applications. In 1979 he received the National Medal of Science, and in 1985 he was awarded the Ives Medal of the Optical Society of America.

LeJeune, Eddie 1951–2001
Cajun accordion player and singer
He was born in Lacassine, Louisiana. His father was the great Cajun accordionist Iry LeJeune (1928–55), who was killed in a road accident, leaving an all too scant recorded legacy. Eddie was brought up by his mother and grandmother, fully immersed in the Cajun musical tradition. He was a virtuoso accordionist, and remained faithful to the authentic acoustic tradition and emotional honesty of that music. He led his own trio, and also worked extensively with another key Cajun musician of the modern era, the singer and guitarist D L Menard (1932–).

Leland, Charles Godfrey, *pseudonym* **Hans Breitmann** 1825–1903
US writer
Born in Philadelphia, he graduated at Princeton in 1845, and afterwards studied at Heidelberg, Munich and Paris. He was

admitted to the Philadelphia Bar in 1851, but turned to journalism. From 1869 he resided chiefly in England and Italy, and investigated the gypsies, on which he published four valuable works (1873–91). He is best known for his poems in 'Pennsylvania Dutch', the famous *Hans Breitmann Ballads* (1871, continued in 1895). Other similar volumes gained him great popularity during his lifetime. He also translated the works of HEINRICH HEINE. 🕮 *Memoirs* (1893)

Leland, John c.1506–1552
English antiquary
Born in London, he was educated at St Paul's School under WILLIAM LILYE, then at Christ's College, Cambridge, and All Souls College, Oxford. After a stay in Paris he became chaplain to HENRY VIII, who in 1533 made him 'king's antiquary', with power to search for records of antiquity in the cathedrals, colleges, abbeys and priories of England. His church preferments were the rectories of Peuplingues, near Calais, and Haseley in Oxfordshire, a canonry of King's College (now Christ Church), Oxford, and a prebend of Salisbury. Most of his papers are in the Bodleian and British Museums. Besides his *Commentarii de Scriptoribus Britannicis*, his chief works are *The Itinerary* and *De Rebus Britannicis Collectanea*.

Leland, John 1691–1766
English Presbyterian minister
Born in Wigan, Manchester, he was educated at Dublin, where from 1716 he was a minister. He wrote against MATTHEW TINDAL (1733) and Thomas Morgan (1739–40). His chief work is an attack on deists in *A View of the Principal Deistical Writers* (1754–56).

Leloir, Luis Frederico 1906–87
Argentine biochemist and Nobel Prize winner
Born in Paris, France, and educated in Buenos Aires and at Cambridge, he worked mainly in Argentina where he set up his own Research Institute in 1947. He discovered a number of glucose enzymes and studied their reactions. In the 1950s Leloir linked these reactions to the formation of the energy storage material glycogen in the body. For this work, of medical significance and complementing that of CARL CORI, he was awarded the Nobel Prize in chemistry in 1970, becoming the first Argentine to be so honoured.

Lely, Sir Peter, *originally* **Pieter van der Faes** 1618–80
British painter
Born probably in Soest, Westphalia, he worked in Haarlem before he settled in London in 1641 as a portrait painter. He was patronized by CHARLES I and OLIVER CROMWELL, and in 1661 was appointed court painter to CHARLES II, for whom he changed his style of painting. His *Windsor Beauties* series is collected at Hampton Court. The 13 Greenwich portraits of *Admirals* are among his best works. These, depicting the English admirals who fought in the Second Dutch War, are outstanding for their depth and sincerity of characterization. They present a marked contrast to his very popular and often highly sensuous court portraits which sometimes have a hasty, superficial appearance.

Lemaître, Antoine Louis Prosper, *stage name* **Frédérick** 1800–76
French actor
He was born in Le Havre, and his first success was in *Richard Darlington*, a play based on Sir WALTER SCOTT's *The Surgeon's Daughter*. This was followed by a succession of triumphs including *Hamlet*, *Kean, ou Désordre et Génie* ('Kean or Disorder and Genius'), *Ruy Blas* and the greatest of all, VICTOR HUGO's *L'Auberge des Adrets*, and its sequel, *Robert Macaire*, much of which he wrote himself. He was admired by contemporary writers; ALEXANDRE DUMAS called him the French KEAN, GUSTAVE FLAUBERT called his Macaire the greatest symbol of the age and VICTOR HUGO wrote *Ruy Blas* for him. He visited London four times and was a favourite with Queen VICTORIA although she was offended by his performance of *Ruy Blas* in 1852. He suffered ill health in his later years and died in poverty.

Lemaître, Georges Henri 1894–1966
Belgian astrophysicist and cosmologist
He was born in Charleroi, and studied engineering at the University of Louvain. After voluntary service in World War I, he turned to mathematical and physical sciences and obtained his doctorate in 1920. Three years later he was ordained as a Catholic priest and obtained a travelling scholarship from the Belgian government, which took him to Cambridge, Harvard and Massachusetts Institute of Technology (MIT). In Cambridge he came under the strong influence of Sir ARTHUR EDDINGTON. In 1927 he published his first major paper on the model of an expanding universe and its relation to the observed red shifts in the spectra of galaxies. In the 1930s he developed his ideas on cosmology, and from 1945 onwards he put forward the notion of the 'primeval atom' which is unstable and explodes, starting what is now called the Big Bang, the beginning of the expanding universe. Lemaître received many honours from all over the world. He was the first recipient of the Eddington Medal of the Royal Astronomical Society (1953) and in 1960 became the president of the Pontifical Academy of Sciences.

Lemaître, (François Élie) Jules 1853–1914
French playwright and critic
He was born in Vennecy, Loiret, and was educated at the École Normale Supérieure. His articles, written first for the *Journal des débats*, were issued in book form as *Impressions de théâtre* (1888–98, 'Impressions of a Theatre-goer'), and those written for *Revue bleue* on modern French literature became *Les Contemporains* (1886–99, 'Our Contemporaries'). A masterly critic with a lucid style, he also wrote *Rousseau* (1907), *Racine* (1908), *Fénelon* (1910) and *Chateaubriand* (1912).

Lémery, Nicolas 1645–1715
French chemist and pharmacist
Born in Rouen, he studied as an apothecary there but because he was a Protestant could not join the Guild of Apothecaries. In 1764 he bought the office of Apothecary to the King, thereafter establishing a lucrative pharmaceutical business specializing in patent medicines. He also gave popular lectures on chemistry which were attended by fashionable society as well as by pharmaceutical apprentices. Religious persecution drove him out of Paris in 1683. Having qualified as a doctor at Caen and converted to Roman Catholicism in 1685, after Protestants lost all their legal rights with the Edict of Nantes, he reopened his shop. He published two books on pharmacy and a monograph on antimony, and was admitted to the Academy of Sciences in 1699. Although he discovered little that was new, his influence as a teacher was considerable. His book *Cours de chymie* (1675, 'Chemistry Course Book') had run to 31 editions by 1756 and was translated into most European languages. It gave a lucid account of chemical methods and of the pharmaceutical compounds known at the time.

Le Mesurier, John, *originally* **John Elton Halliley** 1912–83
English actor
Born in Bedford, he started working life as a solicitor's articled clerk before training as an actor and touring in shows until World War II. After the war, he found success in British comedy films such as *Private's Progress* (1955), *Brothers in Law* (1956), *I'm All Right, Jack* (1959), *The Pure Hell of St Trinian's* (1960), *The Punch and Judy Man* (1960) and *The Pink Panther* (1963). He was also a regular on television with Tony Hancock in *Hancock's Half Hour* (1956–61) and followed that with the sitcom *George and the Dragon* (1966–68), before finding fame as Sergeant Wilson in the long-running *Dad's Army* (1968–77). 🕮 *A Jobbing Actor* (1984, posthumous)

Lemieux, Mario 1965–
Canadian ice hockey player
Born in Montreal, he became one of the NHL's most prolific points scorers, earning six Art Ross trophies as the league's top scorer and three Hart Memorial trophies as its most valuable player. He helped the Pittsburgh Penguins, whom he later owned, to back-to-back Stanley Cup victories in 1991 and 1992. Poor health led to his early retirement, but he recovered sufficiently to make a return to ice hockey, winning a gold medal with Canada at the 2002 Olympics.

Lemmon, Jack (John Uhler) 1925–2001
US film and stage actor
Born in Boston, he graduated from Harvard and served in the navy in World War II. An appearance on the Broadway stage (1953) brought him to the attention of Hollywood, where he appeared in *It Should Happen to You* (1954), and he soon became established as one of the screen's most skilled comedy performers. *Some Like It Hot* (1959) began a successful seven-film collaboration with director BILLY WILDER. Other acclaimed performances include *Days of Wine and Roses* (1962) and *The China Syndrome* (1979). His long association with WALTHER MATTHAU began in 1966 with *The Fortune Cookie* and included *The Odd Couple* (1968) and many others. He periodically returned to the stage and directed one film, *Kotch* (1971). Nominated eight times for an Academy Award, he won Best Supporting Actor for *Mister Roberts* (1955) and Best Actor for *Save the Tiger* (1973). Later films include *Glengarry Glen Ross* (1992), *Short Cuts* (1993), *The Grass Harp* (1995) and *Hamlet* (1996).

Lemnitzer, Lyman Louis 1899–1988
US general
Born in Honesdale, Pennsylvania, he was educated at West Point and commissioned into the artillery in 1920. After graduating from Staff College in 1936, he held a number of senior staff appointments in the US army and by the end of World War II was Deputy Chief of Staff to the Allied forces in Italy. He joined the Joint Chiefs of Staff in 1946 and was appointed its chairman in 1960. Although he had operational command of US forces in Korea and the Pacific, he was best known as a military planner and in 1963 became the Supreme Allied Commander of NATO Forces in Europe. He retired from the army in 1969.

Lemon, Mark 1809–70
English author and journalist
Born in London, he wrote a farce in 1835, followed by several melodramas, operettas, novels (the best of which is, perhaps, *Falkner Lyle*, 1866), children's stories, a *Jest Book* (1864) and essays. In 1841 he helped to establish *Punch*, becoming first joint editor (with HENRY MAYHEW), then sole editor from 1843. 🕮 A A Adrian, *Mark Lemon: First Editor of Punch* (1966)

LeMond, Greg(ory James) 1961–
US cyclist
Born in Lakewood, California, he began cycling in 1975 and dropped out of high school to race professionally. In 1986 he became the first American to win the Tour de France, winning it again in 1989 and 1990. His 1989 victory captivated the sporting world. After 23 days and 2,253km (1,400 miles), LeMond rode the race's fastest ever time-trial to beat French favourite Laurent Fignon (1960–) by just eight seconds. His win was all the more miraculous as he had been accidentally shot in a hunting trip in 1987 and had not fully recovered his strength. He retired in 1994 after contracting a rare muscular wasting disease.

Lemonnier, Antoine Louis Camille 1844–1913
Belgian writer
Born in Ixelles, near Brussels, he took up art criticism in 1863. By his novels (written in French) *Un Mâle* (1881, Eng trans *A Male*, 1917), *Happe-Chair* (1888) and other works, full of strong Flemish realism and mysticism, he won fame as one of Belgium's leading prose writers. His books on art include *Gustave Courbet* (1878), *Alfred Stevens et son œuvre* (1906, 'Alfred Stevens and his Work') and *L'École Belge de la peinture* (1906, 'The Belgian School of Painting'). 🕮 B M Woodridge, in *Le roman belge contemporain* (1930)

Lemonnier, Pierre Charles 1715–99
French astronomer
Born in Paris, he became professor at the Collège Royale in 1746. He greatly advanced astronomical measurement in France and made twelve observations of Uranus before it was recognized as a planet.

Le Moyne, François 1688–1737
French painter
Born in Paris, he specialized in mythological subjects, especially for the Salon d'Hercule at Versailles. FRANÇOIS BOUCHER was his pupil.

Le Nain, Antoine c.1588–1648, **Louis** c.1593–1648 and **Mathieu** c.1607–1677
French painters and brothers
Born in Laon, all three were resident in Paris by 1630. Mathieu became painter to the city in 1633, and they all became founder members of the Académie Française. They each painted scenes of peasant life but, as they tended to sign their work without initials, any individual attribution has to be made on purely stylistic grounds.

Lenard, Philipp Eduard Anton 1862–1947
German physicist and Nobel Prize winner
Born in Pozsony, Hungary (Bratislava, Slovakia), and educated at the University of Heidelberg, he was a researcher at the universities of Bonn and Breslau before returning to Heidelberg as professor (1896–98). He then moved on to Kiel University (1898–1907) before returning to the University of Heidelberg until his retirement in 1931. His observations of the photoelectric effect were explained by ALBERT EINSTEIN in 1905, and his studies of the magnetic deflection of cathode rays and their electrostatic properties led him to suggest that atoms contain units of both positive and negative charge. For these studies he was awarded the Nobel Prize in physics in 1905. He was also awarded the Royal Society Rumford Medal (1904) and the Franklin Medal from the Franklin Institute (1905).

Lenau, Nikolaus, *in full* **Nikolaus Niembsch von Strehlenau** 1802–50
German poet
Born in Czatad, Hungary, he studied law and medicine at Vienna. He suffered from severe depression, became insane in 1844, and died in an asylum near Vienna. His poetic power is best shown in his short lyrics, collections of which appeared in 1832, 1838 and 1844. His longer pieces include *Faust* (1836), *Savonarola* (1837) and *Die Albigenser* (1842, 'The Albigensians'). 🕮 E Castle, *Nikolaus Lenau* (1902)

Lenbach, Franz 1836–1904
German portrait painter
Born in Schrobenhausen, Bavaria, he worked mostly in Munich. For some time he copied the great masters, including TITIAN, RUBENS and VELÁZQUEZ, before becoming one of the greatest 19th-century German portrait painters. His portraits of BISMARCK are particularly famous.

Lenclos, Anne, *known as* **Ninon de Lenclos** 1620–1705
French courtesan, poet and feminist
Born of a good family in Paris, she started her long career at the age of 16, founding a salon which favoured Jansenists. Among her lovers were two marquises, two marshals, the great CONDÉ, and the Dukes of LA ROCHEFOUCAULD and Sévigné. Her behaviour cost her a spell in a convent in 1656 at the behest of ANNE OF AUSTRIA, but her popularity ensured a swift release, and afterwards she wrote *La Coquette vengée* (1659, 'The Coquette Avenged') in her own defence. She was celebrated almost as much for her manners as for her beauty, and respectable women sent their children to her to acquire taste, style and politeness. She had two sons, one of whom, not realising who she was, fell in love with her. Informed of their relationship, he killed himself. 🕮 Edgar H Cohen, *Mademoiselle Libertine* (1970)

Lenclos, Ninon de *See* LENCLOS, ANNE,

Lendl, Ivan 1960–
US tennis player
He was born in Ostrava, Czechoslovakia (now Czech Republic). He won the singles title at the US Open (1985–87), French Open (1984, 1986–87), and Australian Open (1989), and was the Masters champion (1986–87) and the World Championship Tennis champion (1982, 1985). He was runner-up at Wimbledon in 1986–87. He became the first official world champion in 1987. His powerful service and clinically efficient execution of shots made him a formidable clay-court player. Lendl became a US citizen in 1992 and retired from tennis in 1994.

L'Enfant, Pierre Charles 1754–1825
US architect
Born in Paris, France, the son of one of the royal painters, he studied art at the Royal Academy of Painting and Sculpture, then went to America in 1776 to serve as a soldier and engineer in the Continental Army. At the invitation of GEORGE WASHINGTON, he designed (1791) a grand plan for the city of Washington, DC, with wide radiating boulevards, formal parks and monumental public buildings. An autocrat in aesthetic matters, he disregarded all other authority, even that of the president, in directing the construction of the capital, and he promptly overspent the budget. In 1792 he was dismissed as chief engineer, and building was halted. He continued to work as an architect in private practice, but his volatile temperament and extravagant spending led to the interruption of several projects, and at his death in 1825 he was penniless and living on a friend's estate. The country later caught up with L'Enfant's grand ambitions, and after 1901, when a Senate-appointed commission approved the revival of his Washington plan, much of the city was developed according to his designs.

Leng, Virginia, *née* **Holgate** 1955–
British three-day eventer
Born in Malta, she was the European junior champion in 1973. She then won the team gold at the senior championship in 1981, 1985 and 1987, and individual titles in 1985, 1987 and 1989. She won the world championship team gold in 1982 and 1986, and the individual title in 1986 on Priceless. She has also won at Badminton (1985, 1989, 1993) and at Burghley (1983–86, 1989). She competed in two Olympic Games (1984 and 1988), winning two individual bronze medals and two team silvers. She has co-authored such books as *Training the Event Horse* (1990) and in 1995 published *Winning*, her first novel.

L'Engle, Madeleine 1918–
US novelist
Born in New York City, she was educated at Smith College, Northampton, and at the New School for Social Research in New

Lenin, Vladimir Ilyich, *originally surnamed* **Ulyanov** 1870–1924
Russian revolutionary

Lenin was born into a middle-class family in Simbirsk. He was educated at Kazan University and in 1892 began to practise law in Samara (Kuibyshev). In 1894, after five years' intensive study of KARL MARX, he moved to St Petersburg, which was renamed Leningrad after his death in 1924, until reverting to being called St Petersburg in 1991. Lenin organized the illegal 'Union for the Liberation of the Working Class', was arrested for his opinions, and spent several years in exile, first in Siberia and then in the west. In 1900 in Switzerland, he edited the political newspaper *Iskra* ('The Spark') and developed, with GEORGI PLEKHANOV, an underground Social Democratic Party, to assume leadership of the working classes in a revolution against Tsarism. His evolving ideas were set out in *What is to be done?* (1902), in which he advocated a professional core of party activists to spearhead the revolution. This suggestion was adopted by the party's majority, Bolshevik wing at the congress in London in 1903, but was opposed by the 'bourgeois reformism' Mensheviks (minority wing).

Lenin returned to Russia in 1905, and blamed the failure of the rising of that year on lack of support for his own programme. He determined that when the time came 'Soviets' (councils of workers, soldiers and peasants) should be the instruments of total revolution. Lenin left Russia in 1907 and spent the next decade strengthening the Bolsheviks against the Mensheviks, interpreting the works of Marx and FRIEDRICH ENGELS and organizing underground work in Russia. In April 1917, a few days after the deposition of Tsar NICHOLAS II, Lenin, with German connivance, made a fateful journey in a sealed train from Switzerland to Petrograd (the name of St Petersburg from 1914 to 1924). He told his followers to prepare for the overthrow of the shaky provisional government and the remaking of Russia on a Soviet basis.

In the October Revolution the provisional government collapsed and the dominating Bolshevik 'rump' in the second Congress of Soviets declared that supreme power rested in them. Lenin inaugurated the 'dictatorship of the proletariat' with the formal dissolution of the Constituent Assembly. For three years he grappled with war and anarchy. In 1922 he began his 'new economic policy' of limited free enterprise to give Russia respite before entering the era of giant state planning. His health having been in progressive decline since an assassination attempt in 1918, he died on 21 January 1924, and his body was embalmed for veneration in a crystal casket in a mausoleum in Red Square, Moscow.

Lenin was a charismatic figure. Shrewd, dynamic, implacable, pedantic, opportunist, and ice-cold in his economic reasoning, he lived only for the furtherance of Marxism.

📖 Ronald Clark, *Lenin* (1988); Christopher Hill, *Lenin and the Russian Revolution* (1978); Adam Ulam, *Lenin and the Bolsheviks* (1965).

York. A prolific writer for children as well as adults, she imbues her work with explicitly Christian ideas and morals. Her most popular titles include *A Wrinkle in Time* (1962, Newbery Medal) and *The Young Unicorns* (1968), part of a popular series about the Austin family. Both of these combine elements of fantasy with tough ethical concerns. In 2001 she published *Madeleine L'Engle Herself: Reflections on a Writing Life*.

Lenglen, Suzanne 1899–1938
French tennis player
Born in Compiègne, she was trained by her father, and became famous in 1914 by winning the women's world hard-court singles championship at Paris at the age of 15. She was the woman champion of France (1919–23, 1925–26), and her Wimbledon championships were the women's singles and doubles (1919–23, 1925), and the mixed doubles (1920, 1922, 1925). She won the singles and doubles gold medals at the 1920 Olympic Games. She became a professional in 1926, toured the USA, and retired in 1927 to found the Lenglen School of Tennis in Paris. She published *Lawn Tennis, the Game of Nations* (1925) and a novel, *The Love-Game* (1925). 📖 Alan Little, *Suzanne Lenglen, Tennis Idol of the Twenties* (1988)

Lenin, Vladimir Ilyich *See panel above*

Lenk, Timur *See* TIMUR

Lennard-Jones, Sir John Edward, *originally* **Jones** 1894–1954
English physicist and theoretical chemist
Born in Leigh, Lancashire, he graduated in mathematics at Manchester University in 1915, and then became a pilot in the Royal Flying Corps. After World War I he held posts at Manchester and at Cambridge before becoming reader in theoretical physics at Bristol in 1925, and professor in 1927. In 1932 he was appointed Plummer Professor of Theoretical Chemistry at Cambridge. From 1939 to 1946 he was engaged in war work, notably as director-general of Scientific Research (Defence) in the Ministry of Supply. He was appointed Principal of the University College of North Staffordshire in 1953. He was elected Fellow of the Royal Society in 1933, and received its Davy medal in 1953. From 1948 to 1950 he was president of the Faraday Society. At Cambridge he devised a mathematical expression for intermolecular forces which bears his name, and which is still widely used in statistical mechanics. During a year in Göttingen in 1929, he began his part in the development of the molecular orbital theory introduced by ROBERT MULLIKEN, of which he became a leading exponent.

Lennon, John Winston 1940–80
English songwriter, vocalist and rhythm guitarist
Born in Liverpool, he first found fame as a member of The BEATLES, and pursued a solo career after the group disbanded in 1970. His marriage to Japanese conceptual artist YOKO ONO sharpened his social conscience and refocused the surreal wit that was part of his Lancashire Catholic inheritance. Their work together produced songs of mild protest such as 'Give Peace a Chance' (1969), 'Cold Turkey' (1969) and 'Working Class Hero' (1970), a rare balance of the personal and political. His most successful albums were *Imagine* (1971) and *Mind Games* (1973). He was shot dead in New York.

Lennox, Annie 1954–
Scottish pop singer
Born in Aberdeen, she was working as a waitress in Hampstead, London, when she met musician and composer Dave Stewart (1952–) in 1977. They formed The Tourists, and recorded three albums before disbanding in 1980. The pair then formed Eurythmics, and continued the group even after their personal relationship ended in 1981. The combination of his intricate pop hooks and her strong, soulful vocals made them one of the most successful pop bands of the decade, but both decided to pursue solo careers. In 1992 she launched her lavish solo album *Diva*; its successor, *Medusa* (1995), was a collection of cleverly arranged cover versions of songs originally sung by men. The long break before her third solo album, 2003's *Bare*, saw her withdraw into family life and briefly reform Eurythmics with Stewart for 1999's *Peace*. Her contribution to the *Lord Of The Rings* soundtrack, the song 'Into the West', won an Academy Award in 2004. 📖 Lucy Ellis and Bryony Sutherland, *Annie Lennox: The Biography* (2001)

Lennox, Charlotte, *née* **Ramsay** c.1729–1804
British novelist and playwright
She was born in New York City. Sent to England, where her father was posted, when she was 15, she found herself unprovided for when her father died, and supported herself as an actress and writer. Her first novel, *The Life of Harriot Stuart* (1750), is a romantic adventure yarn, but her next and most famous work, *The Female Quixote* (1752), is a satirical romp through the life of Arabella, a young lady besotted with French romantic novels. She also wrote *Shakespeare Illustrated* (1753–54), an examination of the playwright's sources, translated many French works, and was much admired by Dr JOHNSON, who cites her under Talent in his Dictionary.

Leno, Dan, *originally* **George Galvin** 1860–1904
English comedian
He began his career at the age of four, singing and dancing in public houses, and by 18 had become a champion clog-dancer. Ten years later he joined the Augustus Harris management at Drury Lane, where he appeared for many years in the annual pantomime. Leno was a slight man and his foil was the bulky Herbert Campbell (1844–1904). When Campbell had a fatal accident in 1904, Leno pined and died six months later. He will be remembered for his realistic 'dames' with their blend of Cockney humour and sentiment.

Lenoir, Jean Joseph Étienne 1822–1900
French inventor and engineer
Born in Luxembourg City, he invented the first practical internal-combustion gas engine (c.1859) which was fuelled by coal gas and air, and later built the first car to use it (1860). He also constructed a boat driven by his engine (1886).

Lenormand, Henri-René 1882–1951
French dramatist
Born in Paris, he studied at the university there. He was the author of *Les Possédés* (1909, 'The Possessed'), *Le Mangeur de rêves* (1922, 'The Eater of Dreams'), a modern equivalent of *Œdipus Rex*, *L'Homme et ses fantômes* (1924, 'Man and his Phantoms') and several other plays in which SIGMUND FREUD's theory of subconscious motivation is adapted to dramatic purposes. He discusses the aesthetics of his dramatic style in *Confessions d'un auteur dramatique* (1949, 'Confessions of a Playwright'). 🕮 P Blanchart, *Le théâtre de Lenormand* (1947)

Lenormant, François 1837–83
French archaeologist
He was born in Paris. At the age of 20 he won the prize in numismatics of the Académie des Inscriptions, and at 23 he was digging at Eleusis, near Athens. He continued his explorations, between working in Paris as sub-librarian at the Institute (1862–72) and professor of archaeology at the Bibliothèque Nationale (1874–83), until his health broke down from overwork and a wound received during the siege of the city (1870–71). His chief work was *Les Origines de l'histoire d'après la Bible* (1880–84, 'The Origins of History According to the Bible').

Le Nôtre or **Lenôtre, André** 1613–1700
French landscape architect
Born in Paris, he studied the laws of perspective and optics under the painter François Vouet and the principles of architecture under FRANÇOIS MANSARD. He was the creator of French landscape gardening, and designed many celebrated European gardens, including those at Versailles and Fontainebleau, and St James's Park and Kensington Gardens in London.

Lenya, Lotte, *originally* **Karoline Wilhelmine Blamauer** 1898–1981
Austrian actress and cabaret singer
Born in Hitzing, Vienna, she studied dancing in Zurich (1914–20) and moved to Berlin (1920), where she took up acting and married KURT WEILL (1926). Her international reputation was made by her roles in his works, notably as Jenny in *Die Dreigroschenoper* (1928, *The Threepenny Opera*). In 1933 the couple fled to Paris and then settled in the USA (1935), where her stage appearances included *The Firebrand of Florence* (1945), *Brecht on Brecht* (1962) and *Mother Courage* (1972). Her rare film roles included *The Threepenny Opera* (1931) and *From Russia With Love* (1963). After Weill's death she became the public custodian of his legacy and supreme interpreter of his work. 🕮 D Spoto, *Lenya: A Life* (1989)

Lenz, Heinrich Friedrich Emil 1804–65
German physicist
Born in Dorpat, Russia, he first studied theology, but became professor of physics at St Petersburg (1836) and a member of the Russian Academy of Sciences. He was the first to state Lenz's law governing induced current, and is credited with discovering the dependence of electrical resistance on temperature (JOULE's law).

Lenz, Jakob Michael Reinhold 1751–92
German writer
Born in Livonia, he was one of the young authors who surrounded GOETHE in Strasbourg. He first wrote two plays which were well received, *Der Hofmeister* (1774, 'The Steward') and *Die Soldaten* (1776, 'The Soldiers'). Like all the Sturm und Drang poets he was a fervent admirer of SHAKESPEARE, and this was expressed in his *Anmerkungen übers Theater* (1774, 'Remarks on the Theatre'). He was a gifted writer of lyrics, some of them being at first attributed to Goethe, and also wrote several novels, but of lesser quality. He suffered a mental breakdown while still young, and died in poverty.

Leo I, St, *known as* **the Great** c.390–461 AD
Italian pope
Born possibly in Tuscany, he was one of only two popes (the other being GREGORY I) to take the title 'the Great'. Pope from AD 440 to 461, he was one of the most eminent of the Latin Fathers. He summoned the Council of Chalcedon (AD 451), which accepted his doctrine of the Incarnation as defined in his 'Dogmatical Letter'. He made treaties with ATTILA the Hun (AD 452) and with the Vandals (AD 455) in defence of Rome, and consolidated the primacy of the Roman see.

Leo III, *called* **the Isaurian** c.680–741
Byzantine emperor
Born in northern Syria, near Isauria, he raised the Byzantine Empire from a very low condition, after seizing the crown from Theodosius III (717). He reorganized the army and financial system, produced a new legal code, and repelled a formidable attack by the Saracens (718). In 726 he prohibited the use of images (ie pictures or mosaics; statues were hardly known as yet in churches) in public worship. In Italy, however, the Iconoclasts ('Image-Breakers') caused resistance by the people, and the subsequent controversy split the empire for over a century. In 728 Ravenna was lost, and the eastern provinces became the prey of the Saracens, over whom, however, Leo won a great victory at Phrygia.

Leo III c.750–816
Byzantine pope
He saw during his pontificate (795–816) the formal establishment of the Empire of the West. In the 8th century the popes, through the practical withdrawal of the Eastern emperors, had exercised a temporal supremacy in Rome, under the protectorate of the Frankish sovereigns. Leo was obliged to flee to Spoleto in 799, from where he went to Paderborn to confer with CHARLEMAGNE. On his return to Rome he was received with honour. In 800 Charlemagne, having come to Rome, was crowned emperor by Leo, and the temporal sovereignty of the pope over the Roman city and state was formally established, under the suzerainty of the emperor.

Leo X, *originally* **Giovanni de' Medici** 1475–1521
Italian pope
He was born in Florence. The second son of LORENZO DE' MEDICI, the Magnificent, and the brother of PIERO DE' MEDICI, he was created a cardinal at 13. Elected pope in 1513, he is best remembered as a patron of learning and the arts. He founded a Greek college in Rome and established a Greek press. His project for the rebuilding of St Peter's made it necessary to preach an indulgence in order to raise funds to do so and this provoked MARTIN LUTHER's 95 theses. Leo's failure to respond either promptly or effectively helped to increase the Reformation's early momentum. With his election as pope, the rule of Florence passed first to his younger brother, Giuliano, and then to his nephew, Lorenzo, Duke of Urbino. The real power of the family, however, remained with the pope and his cousin, Giulio, grandson of COSIMO DE' MEDICI, who succeeded to the papacy in 1523 as CLEMENT VII. 🕮 William Roscoe, *The Life and Pontificate of Leo the Tenth* (2 vols, 1853)

Leo XIII, *originally* **Vincenzo Gioacchino Pecci** 1810–1903
Italian pope
He was born in Carpineto, the son of Count Ludovico Pecci. After taking a degree in law he was appointed by GREGORY XVI a domestic prelate in 1837, sent to Belgium as nuncio in 1843, nominated Archbishop of Perugia in 1846, and in 1853 created a cardinal by PIUS IX. Elected to the papacy on the death of Pius IX in 1878, he restored the hierarchy in Scotland, resolved the difficulty with Germany, and in 1888 denounced the Irish Plan of Campaign. He held some enlightened views, but regarded himself as the despoiled sovereign of Rome, and persistently declined to recognize the law of guarantees. In 1883 he opened the archives of the Vatican for historical investigations, and he made himself known as a poet, chiefly in the Latin tongue. He affirmed that the only solution to the socialistic problem was the influence of the papacy, and in 1894 he constrained the French clergy and the monarchists to accept the republic. In 1896 he issued an encyclical pronouncing Anglican orders invalid.

Leo Africanus, *properly* **Alhassan ibn Mohammed Alwazzan** c.1494–c.1552
Arab traveller and geographer
He was born in the kingdom of Granada, and from c.1512 travelled in northern Africa and Asia Minor. Falling into the

hands of Venetian corsairs, he was sent to Pope LEO X in Rome, where he lived for 20 years, and accepted Christianity. He later returned to Africa and (perhaps) his old faith, and died in Tunis. He wrote *Descrittione dell'Africa* (1550, Eng trans *A Geographical Historie of Africa*, 1660), an account of his African travels in Italian and for a long time the chief source of information about the Sudan.

Leochares fl. c.350–330 BC
Greek sculptor
With his master SCOPAS, he decorated the Mausoleum of Halicarnassus. The marble *Demeter* in the British Museum (c.350 BC) has been attributed to him. He also executed the official likenesses of PHILIP II of Macedon and ALEXANDER THE GREAT.

Leonard, Elmore John 1925–
US thriller writer
He was born in New Orleans, served in the US navy during World War II and afterwards studied English literature at Detroit University. Throughout the 1950s he worked in advertising as a copywriter, but since 1967 he has concentrated on screenplays and novels, remarkable for their relentless pace and vivid dialogue. He is regarded as one of the foremost crime writers in the USA, and his numerous books include *Unknown Man No. 89* (1977), *Gold Coast* (1980), *Stick* (1983), *La Brava* (1983), *Touch* (1987), *Pronto* (1993), *Cuba Libre* (1998) and *A Coyote's in the House* (2004). In later years he has reached a new audience through high-profile cinematic adaptations of his novels *Get Shorty* (1990, filmed 1995), *Rum Punch* (1992, filmed as *Jackie Brown* 1997 by QUENTIN TARANTINO) and *Out of Sight* (1996, filmed 1998). 🕮 D Geherin, *Elmore Leonard* (1989)

Leonard, Graham Douglas 1921–
English prelate
Born in London, he was appointed Bishop of Willesden in 1964, Bishop of Truro in 1973 and became Bishop of London in 1981. He is known more for his traditional Anglo-Catholic theological position than for his longstanding concern for the Church's role in education or his chairmanship of the Church of England Board for Social Responsibility (1976–83). He opposed the 1970s Anglican–Methodist unity scheme (see *Growing into Union*, 1970), and as Bishop of London became the focus of theological opposition to the ordination of women to the priesthood. His offer of pastoral support to a congregation in Tulsa, Oklahoma, in 1986 caused controversy over the role of bishops outside their own dioceses. He retired as Bishop of London in 1991 and was received into the Roman Catholic Church in 1994. His books include *Is Christianity Credible?* (1981), *The Price of Peace* (1983) and *Tradition and Unity* (1991).

Leonard, Sugar Ray 1956–
US boxer
Born in South Carolina, he won an Olympic gold in Montreal in 1976, starting a professional career in which he fought twelve world title fights at various weights and won world titles in each weight. In 35 fights between 1977 and 1987, he was beaten only once, by Roberto Duran, who took the welterweight title from him on points in 1980. Leonard became the undisputed world welterweight champion in 1981 when he beat TOMMY HEARNS and earned a record fee of more than $10 million. He declared his retirement five times during his career, finally leaving boxing in 1997.

Leonard, Tom 1944–
Scottish poet
He was born in Glasgow and educated at Glasgow University. He is a dedicated experimenter with poetic form, attempting everything from strict metres and forms to linguistic 'found objects', complex word association to snippets of conversation heard in bus queues. His first published collection was the slim *Six Glasgow Poems* (1969). Other volumes include *A Priest Came On at Merkland Street* (1970), and *Poems* (1973), for which he provided a parallel text translation of his phoneticized dialect into standard English. The best of his early work was collected as *Intimate Voices: Writing 1965–83* (1984). *Access to the Silence: Poetry 1984–2003* appeared in 2004.

Leonardo da Vinci *See panel p945*

Leonardo of Pisa *See* FIBONACCI, LEONARDO

Leoncavallo, Ruggiero 1858–1919
Italian composer
Born in Naples, he studied at the Naples Conservatorio and, while touring Europe as a pianist, is thought to have been encouraged in his career by RICHARD WAGNER. He produced *I Pagliacci* (1892, 'Clowns'), traditionally staged with PIETRO MASCAGNI's *Cavalleria Rusticana* (1890, 'Rustic Chivalry'). He followed this with other less successful operas, including a *La Bohème* (1897, 'Bohemian life') which failed where PUCCINI's (1896), on the same theme, was a success.

Leone, Sergio 1922–89
Italian film director
Born in Rome to silent film director Vincenze Leone, he studied law before becoming an assistant to various directors in the mid-1940s. After working on several 'swords-and-sandals' historical adventures, he made his own contribution to the genre with his directorial debut, *The Colossus of Rhodes* (1961). It was as the director of spaghetti Westerns, however, that he made his name, defining this violent, cynical sub-genre by its blackly comic tone, morally ambiguous heroes, ENNIO MORRICONE scores and intense close-ups in a widescreen frame. His 'Dollars' trilogy, beginning with *A Fistful of Dollars* (*Per un pugno di dollari*, 1964), made an international star of CLINT EASTWOOD. His US gangster epic, *Once Upon a Time in America* (1984), was equally ambitious and operatic. 🕮 Christopher Frayling, *Sergio Leone: Something to Do with Death* (2000)

Leoni, Leone 1509–90
Italian goldsmith, medallist and sculptor
Born in Arezzo, he worked in Milan, Genoa, Brussels and Madrid, and was the rival of BENVENUTO CELLINI in talent, vice and violence. His fine medals often depicted well-known artists, such as TITIAN and MICHELANGELO, and his sculpture which was mostly in bronze included busts of CHARLES V and PHILIP II OF SPAIN, both of whom he served for some time.

Leonidas d.c.480 BC
King of Sparta
He succeeded his half-brother, CLEOMENES I (491 BC). When the Persian king XERXES I approached with a large army, Leonidas opposed him at the narrow pass of Thermopylae (480 BC) with his 300 Spartans and 700 Thespians, and there all of them died heroically.

Leonov, Aleksei Arkhipovich 1934–
Russian astronaut
Born in Listvyanka, he was the first man to walk in space. In 1955 he went to the Chuguyev Air Force Flying School in the Ukraine, graduating with honours in 1957, thereafter serving with air force units. He specialized in parachute training and joined the astronaut corps in 1959. On 18 March 1965 he carried out the first 'extra-vehicular activity' (EVA) from the spacecraft *Voskhod 2* in orbit round the Earth, 'walking' in space for ten minutes. In 1975 he took part in the joint US–USSR Apollo–Soyuz space mission.

Leontief, Wassily 1906–99
US economist and Nobel Prize winner
Born in St Petersburg, Russia, and educated at Leningrad (now St Petersburg) and Berlin universities, he went to the USA in 1930. He taught at Harvard from 1931 to 1975 (professor from 1946), and from 1975 to 1985 was director of the Institute of Economic Analysis at New York University. His most important work was an analysis of US industry, *The Structure of the American Economy, 1919–29* (1941). He was awarded the 1973 Nobel Prize in economics for developing the input-output method of economic analysis, used in more than 50 industrialized countries for planning and forecasting. In 1985 he was made Commandeur, L'Ordre des Arts et des Lettres.

Leopardi, Giacomo 1798–1837
Italian poet
Born in Recanati, by the age of 16 he had read all the Latin and Greek classics, could write French, Spanish, English and Hebrew, and had written a commentary on PLOTINUS. He devoted himself to literature and, although an invalid, travelled widely, and lived successively in Bologna, Florence, Milan and Pisa. In 1833 he accompanied his friend Ranieri to Naples and settled there. His works, which show his pessimistic views on life, include lyrics, collected under the title *I Canti* (1831, Eng trans *The Poems*, 1893), dialogues and essays classed as *Operette Morali* (1827, translated in a bilingual edition under original title, 1983), *Pensieri* (7 vols, 1898–1900, 'Thoughts') and letters. 🕮 H H Whitfield, *Giacomo Leopardi* (1954)

Leonardo da Vinci 1452–1519

Italian painter, sculptor, architect and engineer

Leonardo was born in Vinci, between Pisa and Florence, the illegitimate son of a Florentine notary and Caterina, a young peasant woman. He showed unusual gifts at an early age, and in around 1470 he was sent to study in the studio of ANDREA DEL VERROCCHIO, where BOTTICELLI and PERUGINO were also pupils. To this period belong the *Baptism of Christ* and the unfinished *Adoration of the Magi*, now in the Uffizi Gallery in Florence. In 1482 he settled in Milan in the service of Duke LUDOVICO SFORZA. His famous *Last Supper* (1498), commissioned jointly by Ludovico and the monks of Santa Maria delle Grazie, was painted on a wall of the refectory of the convent of Santa Maria delle Grazie. Because of dampness, and the method of tempera painting (neither oil nor fresco) upon plaster, it soon showed signs of deterioration; yet it is still regarded as a masterpiece. Among other paintings in Milan were portraits of two mistresses of the duke, one of them perhaps *La Belle Ferronnière* of the Louvre. He also devised a system of hydraulic irrigation of the plains of Lombardy and directed the court pageants.

After the fall of Duke Ludovico in 1500 Leonardo retired to Florence, and entered the service of CESARE BORGIA, then Duke of Romagna, as architect and engineer. In 1503 he returned to Florence, and began work on a *Madonna and Child with St Anne*, of which only the cartoon now in the Royal Academy, London, was completed. Both he and MICHELANGELO received commissions to decorate the Sala del Consiglio in the Palazzo della Signoria with historical compositions. Leonardo dealt with *The Battle of Anghiari*, a Florentine victory over Milan, and finished his cartoon; but he employed a method of painting on the plaster which proved a failure, and abandoned the work in 1506.

About 1504 he completed his most celebrated easel picture, *Mona Lisa*. Another work portrayed the celebrated beauty Ginevra Benci; and Pacioli's *De divina Proportione* (1509) contained 60 geometrical figures from Leonardo's hand. In 1506 he was employed by LOUIS XII of France. FRANCIS I bestowed on him in 1516 a yearly allowance, and assigned to his use the Château Cloux, near Amboise, where he lived until his death.

Among his later works are *The Virgin of the Rocks*, now in the National Gallery, London, a figure of *St John the Baptist*, and *Saint Anne*. There is no surviving sculpture which can positively be attributed to him, but he may well have designed or been closely associated with three works: the three figures over the north door of the Baptistery at Florence, a bronze statuette of horse and rider in the Budapest Museum, and the wax bust of Flora.

In his art Leonardo was hardly at all influenced by the antique; his practice was founded on the most patient and searching study of nature and in particular of light and shade. He occupies a supreme place as an artist, but so few of his works have survived that he may be most fully studied in his drawings, of which there are rich collections in Milan, Paris, Florence and Vienna, as well as in England in the British Museum and at Windsor Castle.

His celebrated *Trattato della Pittura* was published in 1651; but a more complete manuscript, discovered by Manzi in the Vatican, was published in 1817. Voluminous manuscripts by him in Milan (*Codice Atlantico*), Paris, Windsor and elsewhere have been reproduced in facsimile.

Leonardo was the outstanding all-round genius of the Renaissance. He had a wide knowledge and understanding far beyond his times of most of the sciences, including biology, anatomy, physiology, hydrodynamics, mechanics and aeronautics, and his notebooks, written in mirror writing, contain original remarks on all of these.

📖 Robert Payne, *Leonardo* (1978); Kenneth Clark, *Leonardo da Vinci* (1959).

'The span of a man's outspread arms is equal to his height.'

– Quoted in Irma A Richter (ed), *Selections from the Notebooks of Leonardo da Vinci* (1977).

'Perspective is the bridle and rudder of painting.'

– Ibid.

Leopold I 1790–1865

King of Belgium

Born in Coburg, he was the son of Francis, Duke of Saxe-Coburg, and uncle of Queen VICTORIA. A general in the Russian army, he served at Lützen, Bautzen and Leipzig (1813). He married (1816) Princess CHARLOTTE of Great Britain (d.1817). He declined the Crown of Greece (1830) and in 1831 he was elected King of the Belgians. He married Marie-Louise, daughter of LOUIS PHILIPPE, in 1832. He conducted himself with prudence and moderation, with constant regard to the principles of the Belgian constitution, and by his policy did much to prevent Belgium becoming too involved in the revolutions which were raging in other European countries in 1848. 📖 Joanna Richardson, *My Dearest Uncle: A Life of Leopold I, King of the Belgians* (1961)

Leopold II 1835–1909

King of Belgium

The son of LEOPOLD I, he was born in Brussels. Energetic and well-travelled, his chief interest was the expansion of Belgium abroad. In 1885 he became king of the independent state of the Congo, but the exposure of the mistreatment and killing of millions of Congolese people under his rule – particularly those working as forced labour in the rubber industry – led to it being annexed to Belgium (1908). At home he strengthened his country by military reforms (especially the introduction of conscription) and established a system of fortifications. He was not popular as a king, but under him Belgium flourished, developing commercially and industrially, especially during the later part of his reign. He was succeeded by his nephew, ALBERT I. 📖 Neal Ascherson, *The King Incorporated: Leopold II in the Age of Trusts* (1964)

Leopold III 1901–83

King of Belgium

Born in Brussels, he was the son of King ALBERT I and became king in 1934. On his own authority he ordered the capitulation of his army to the Nazis (1940), and remained a prisoner in his own palace at Laeken and in Austria. After the war he remained in Switzerland (1945–50), pending solution of the 'royal question', but although 58.1 per cent of voters favoured his return in a plebiscite (1950), continued unrest persuaded him to abdicate in favour of his son BAUDOUIN I in 1951. 📖 James Page, *Leopold III: The Belgian Royal Question* (1961)

Leopold I 1640–1705

Holy Roman Emperor

Born in Vienna, he was the second son of Emperor FERDINAND III and the Infanta Maria Anna of Spain (daughter of PHILIP III). He became King of Hungary (1655) and Bohemia (1656), and was elected emperor (1658) in succession to his father. For most of his reign he was at war either with the Ottoman Turks over Hungary, or with the France of LOUIS XIV. The first war with Turkey (1661–64) ended in victory at St Gotthard. The second war (1682–99) involved the siege of Vienna (1683), relieved by JOHN III SOBIESKI of Poland, and ended with the Treaty of Karlowitz, giving Leopold control of virtually all of Hungary. In 1686 he had combined with England and the Dutch Stadtholder William of Orange (later WILLIAM III of Great Britain) to resist French expansionism in Europe, culminating in the War of the Spanish Succession (1701–14) which attempted to prevent the succession of the BOURBON House in Spain. A pious lover of the arts, and originally destined for the Church, Leopold strove to extend Habsburg power, the imperial Crown being declared hereditary in the family at the Diet of Pressburg (1687), and to repress Protestantism. Under him the Baroque flourished, and Vienna became renowned as a cultural centre. In 1703 his refusal to respect the traditional rights of the Hungarian nobles led to an uprising under FRANCIS II RÁKÓCZI. By his third wife, Eleanora of Neuburg, he had two sons who both succeeded him as emperor, JOSEPH I and Charles VI. 📖 John P Spielman, *Leopold I of Austria* (1977)

Leopold II 1747–92

Holy Roman Emperor

Born in Vienna, the third son of FRANCIS I and MARIA THERESA, he succeeded his father as Grand Duke of Tuscany (1765), and his brother, JOSEPH II, as emperor (1790). He was enlightened in his views and continued the policy of emancipating peasants and giving toleration to non-Catholics. He pacified the Netherlands and Hungary, and after the downfall of his sister, MARIE ANTOINETTE, he formed an alliance with Prussia against France, but died before war broke out.

Leopold V 1157–94
European nobleman and crusader
He was Duke of Austria from 1177 and of Styria from 1192, and captor of King RICHARD I of England. A crusader, he became a bitter enemy of Richard on the Third Crusade (1189–92), and took him prisoner in his dominions as he made his way home to England (1192).

Lepage, Jules Bastien *See* BASTIEN-LEPAGE, JULES

Le Parc, Julio 1928–
Argentine artist
Born in Mendoza, he trained in Buenos Aires, then moved to Paris in 1958, embarking on a career which placed him at the forefront of experimental art. He was associated, for a time, with VIKTOR VASARELY, and helped found the Groupe de Recherche d'Art Visuel (GRAV) in 1960. Increasingly interested in the artistic exploitation of movement and light, he constructed coloured mobiles using transparent prisms and cubes, for example *Continual Mobile, Continual Light* (1963). Considerable controversy was aroused when he was awarded the Painting prize at the 1966 Venice Biennale. After 1968 his art became for a time overtly political, involving the representation of personifications of capitalists, imperialists and the military, but his main importance is as a leading proponent of the Op and Kinetic art movements of the 1960s.

Le Pen, Jean-Marie 1928–
French politician
The son of a Breton fisherman, he graduated in law at Paris before serving in the 1950s as a paratrooper in Indo-China and Algeria, where he lost an eye during a violent street battle. In 1956 he won a National Assembly seat as a right-wing Poujadist. During the 1960s he was connected with the extremist Organisation de l'Armée Secrète (OAS), before forming the National Front in 1972. This party, with its extreme right-wing policies, emerged as a new 'fifth force' in French politics, winning 10 per cent of the national vote in the 1986 Assembly elections. A controversial figure and noted demagogue, he was barred from public office for two years in 1998 due to his riotous behaviour during the 1997 general election campaign. This was reduced to a year on appeal, and Le Pen was eventually allowed to retain his seat in the European Parliament, which he had held from 1984 until 2003. He ran unsuccessfully for president in 2002.

Lepidus, Marcus Aemilius d.13 BC
Roman politician
He declared for JULIUS CAESAR against POMPEY during the civil war (49–31 BC), and became Caesar's deputy at Rome (46 BC). He supported MARK ANTONY, and became one of the triumvirate with him and Octavian (Emperor AUGUSTUS), with Africa for his province (40–39 BC). Outmanoeuvred by Octavian in the power struggle of the 30s BC, he retired from active politics, but remained head of state religion (Pontifex Maximus) until his death.

Le Play, (Pierre Guillaume) Frédéric 1806–82
French political economist and engineer
Born in Honfleur, he lived in Paris, where he was professor in the École des Mines. He was one of the first to realize the importance of sociology and its effect on economics, and stressed the need for co-operation between employer and employee without intervention from government. His works included *Les Ouvriers européens* (1855, 'European Workers') and *Réforme sociale en France* (1864 'Social Reform in France').

Lepsius, Karl Richard 1810–84
German Egyptologist
He was born in Naumburg. His first work on palaeography as an instrument of philology (1834) won the Volney prize of the French Institute, and in 1836 at Rome he studied Egyptology, Nubian, Etruscan and Oscan. From 1842 to 1845 he headed an antiquarian expedition sent to Egypt by FREDERICK WILLIAM IV of Prussia, and in 1846 he was appointed professor in Berlin. His *Denkmäler aus Aegypten und Aethiopien* (12 vols, 1849–60, 'Egyptian and Ethiopian Monuments') remains an important work, and his *Chronologie der Aegypter* (1849, 'Egyptian Chronology') laid the foundation for a scientific treatment of early Egyptian history. Other works include his letters from Egypt, Ethiopia and Sinai (1852), the *Todtenbuch* (1867) – the Egyptian Book of the Dead – and writings on Chinese, Arabic and Assyrian philology. He was director of the Egyptian section of the Royal Museum and of the Royal Library at Berlin (1873).

Lerdo de Tejada, Sebastián 1827–89
Mexican statesman
Born in Jalapa, Mexico, he served in the Supreme Court (1855–57) and in various administrative positions and supported BENITO JUÁREZ during the French invasion. After the French withdrew he became Chief Justice (1867–72) of the Supreme Court. Following Juárez as president of Mexico (1872–76), he instituted reform laws in the constitution (1874), then was overthrown and forced into exile by PORFIRIO DÍAZ.

Lerma, Don Francisco Gómez de Sandoval y Rojas, Duke of 1553–1625
Spanish politician
The Minister and confidant of PHILIP III of Spain, he played an important role in government policy during the period 1598–1618. A peaceful foreign policy was being pursued at this time. Treaties were signed with the French (1598), English (1604) and Dutch (1609, the Twelve Years' Truce), and there was a rapprochement with France (the marriage, in 1615, of Philip to Elizabeth of France). In domestic affairs, he was notable in having influenced the transfer of the court from Madrid to Valladolid (1601–06) and the decree expelling the Moriscos (1609). Created cardinal in 1618, he was dislodged by a palace coup the same year and forced to give up some of his accumulated wealth.

Lermontov, Mikhail Yuriyevich 1814–41
Russian poet
Born of Scottish parents in Moscow, he attended Moscow University and then the military cavalry school of St Petersburg, where he received a commission in the guards. A poem written in 1837 on the death of ALEXANDER PUSHKIN caused his arrest and he was sent to the Caucasus. Reinstated, he was again banished following a duel with the son of the French ambassador. Another duel was the cause of his death in 1841. He wrote from an early age, but much of his work was not published until his last years and his fame was posthumous. The scenery of the Caucasus inspired his poetry, but he is best known for his novel *Geroy nasego vremeni* (1839, Eng trans *A Hero of Our Times*, 1854). He also wrote the romantic verse play *Maskarad* (1842, 'Masquerade'). 🕮 J Garrard, *Mikhail Lermontov* (1982)

Lerner, Alan Jay 1918–86
US librettist, lyricist and playwright
Born in New York City, he worked with FREDERICK LOEWE, whom he met in 1942, and they collaborated to produce several successful Broadway musicals, including *Brigadoon* (1947), *Paint Your Wagon* (1951) and *My Fair Lady* (1956), and the film *Gigi* (1958). Lerner also wrote the script for the film *An American in Paris* (1951) and (with composer Burton Lane (1912–97) produced the musical *On a Clear Day You Can See Forever* (1965, filmed 1970).

Lerroux, Alejandro 1864–1949
Spanish politician and journalist
An innovative and charismatic populist leader in Barcelona, known as the 'Emperor of the Parallel' (a working-class thoroughfare), he founded the first modern party in Spain, the Radical Republican Party (1908). He afterwards became increasingly conservative, even offering in 1923 to become the civilian figurehead of MIGUEL PRIMO DE RIVERA's dictatorship. During the Second Republic, he led the Radicals as the principal source of opposition to the progressive Republican–Socialist coalition of 1931–33. He was crucial to the formation of the alliance with the non-Republican Right, which ruled Spain from 1933 to 1935 and which polarized the regime to an unprecedented degree. During this period he headed five administrations before falling from power because of a bribery scandal. Despite backing the Nationalists during the Spanish civil war, he was prevented from returning to Spain from his exile in Portugal until 1947, because of his earlier involvement with freemasonry.

Lesage or **Le Sage, Alain René** 1668–1747
French novelist and dramatist
He was born in Sarzeau, Brittany, and in 1692 went to Paris to study law, but an early marriage drove him to seek his fortune in literature. The Abbé de Lionne, who had a good Spanish library, allowed Lesage free access to it, with a pension of 600 livres, and in 1700 he published two plays in imitation of ROJAS and LOPE DE VEGA. In 1707 *Don César Ursin*, from PEDRO CALDERÓN DE LA BARCA, was played with success at court, and the following year the Théâtre Français showed interest in the play which later became his famous *Turcaret*. As a novelist his reputation rests on *Gil Blas* (4 vols, 1715–35). Later works include *Bachelier de*

Salamanque (1736–38, 'The Bachelor of Salamanque') and a volume of letters, *La Valise trouvée* (1740, 'A Suitcase Discovered'). The death of his son (1743), a promising actor, and his own increasing infirmities, made him abandon Paris and literary life, and he retreated to Boulogne, where he lived until his death. Some critics deny originality to one who borrowed ideas, incidents and tales from others as Lesage did, but he was a great raconteur and the first to perceive the capabilities of the picaresque novel. 🕮 E Lintilhac, *Alain Le Sage* (1893)

Lesage, Jean 1912–80
Canadian politician
He became the Liberal premier of Quebec in 1960, carried into power on a wave of nationalist fervour, although the Liberals won only 50 out of the 95 seats. He then introduced the Quiet Revolution against corruption, the Catholic Church's involvement in lay issues such as education, welfare and health, and against the economic domination of the USA and of anglophone Canadians in Quebec. His demands for a more active governmental role in the province, because of its special situation within the Confederation, began to cause unease among other Canadian provinces, especially when he asked for an increased share of tax revenue. In 1966 his government was defeated by the Union Nationale. He remained leader of the Provincial Party until his retirement in 1970.

Lescot, Pierre c.1510–1578
French Renaissance architect
Born in Paris, he was one of the greatest architects of his time. Among his works are the screen of St Germain l'Auxerrois, the Fontaine des Innocents and the Hôtel de Ligneris, all in Paris. His masterpiece was the Louvre, one wing of which he completely rebuilt.

Lese, Benozzo di *See* GOZZOLI, BENOZZO

Leslie, Alexander, 1st Earl of Leven c.1580–1661
Scottish general
The illegitimate son of the captain of Blair Atholl Castle, he became a field marshal of Sweden under GUSTAV II ADOLF. Recalled to Scotland in 1638, he commanded the Covenanting army against CHARLES I. In 1641 he was made Earl of Leven and Lord Balgony, but from 1644 he led the Covenanting army into England on behalf of the Parliamentarians. He fought at Marston Moor (1644) and the storming of Newcastle. He accepted the surrender of Charles I at Newark in 1646 and handed him over to parliament in 1647. He joined the Royalists in 1649, fought CROMWELL in Scotland in 1650–51, and was captured and imprisoned, but released on parole in 1654.

Leslie, Charles Robert 1794–1859
British genre painter
Born in London of US parentage, he was educated in Philadelphia from 1800, but in 1811 returned to England and studied at the Royal Academy. His paintings were mostly scenes from famous plays and novels. He was professor of drawings at West Point, New York (1833), and from 1848 to 1852 professor of painting at the Royal Academy. His lectures were published in the *Handbook for Young Painters* (1855). He wrote a Life of JOHN CONSTABLE (1843), and began one of Sir JOSHUA REYNOLDS, completed by TOM TAYLOR, who also edited his *Autobiographical Recollections* (1860).

Leslie, Frank, *originally* **Henry Carter** 1821–80
English illustrator and journalist
Born in Ipswich, Suffolk, he entered a London mercantile house at 17, and the success of his sketches led him to join the staff of the *Illustrated London News*. In 1848 he went to the USA, assumed the name of Frank Leslie, and in 1854 founded the *Gazette of Fashion* and the *New York Journal. Frank Leslie's Illustrated Newspaper* began in 1855, the *Chimney Corner* in 1865; he also started the *Boys' and Girls' Weekly*, the *Lady's Journal* and other publications.

Leslie, Sir John 1766–1832
Scottish natural philosopher and physicist
Born in Largo, Fife, he studied at St Andrews and Edinburgh, and travelled as a tutor in the USA and on the Continent, meanwhile engaging in experimental research. He invented a differential thermometer, a hygrometer and a photometer, and wrote *An Experimental Inquiry into Heat* (1804). In 1805 he was appointed to the chair of mathematics at Edinburgh. In 1810 he succeeded in creating artificial ice by freezing water under an air pump. Transferred to the chair of natural philosophy (1819), he also invented the pyroscope, the atmometer and the aethrioscope.

Leslie, Sir Shane (John Randolph) 1885–1971
Irish writer
He was born in Glaslough, County Monaghan, into a conservative Irish Protestant landed family, and educated at Paris University and King's College, Cambridge. In 1907 he visited Russia, where he met LEO TOLSTOY. The following year he converted to Roman Catholicism, and in 1910 he unsuccessfully contested Londonderry in the Irish Nationalist interest. He produced a brilliant analysis of the pre-war generation in *The End of a Chapter* (1916), followed by *The Celt and the World*, intended to attract the anglophobe Irish-Americans to the Allied cause: it influenced the young F SCOTT FITZGERALD but was otherwise forgotten and was never published in Great Britain. He also wrote several impressive novels based on his boyhood and youth, poetry and some good short stories on supernatural themes, and investigated the relations of GEORGE IV and MRS FITZHERBERT (from whom he was descended).

L'Esperance, Elise, *née* **Strang** 1878–1959
US physician and founder of women's cancer clinics
Born in Yorktown, New York, she studied at the Women's Medical College in New York, established by ELIZABETH BLACKWELL, receiving her MD in 1900. She worked in paediatrics for some years, then in 1910 she moved to the department of pathology at Cornell University, remaining there until 1932, and becoming the first woman assistant professor there in 1920. Her research on cancer stimulated her to found the Kate Depew Strang clinics in memory of her mother. Important work carried out at the Strang clinics included the development by Dr GEORGE PAPANICOLAOU of the 'Pap' smear to detect cervical cancer. L'Esperance was active in many women's organizations, medical and non-medical, and was widely honoured for her work.

Lespinasse, Julie Jeanne Eléonoré de 1732–76
French salon hostess
She was born in Lyons, an illegitimate daughter of the Countess d'Albon. At first a teacher, in 1754 she became companion to the ailing salon hostess, Marquise du Deffand (1697–1780), and while living with her formed a deep platonic relationship with the philosopher JEAN LE ROND D'ALEMBERT. From 1764 she broke with the Marquise and created a brilliant salon of her own for the literary figures of her day. She also formed liaisons with the Marquis de More and the Comte de Guibert, to whom she wrote ardent love letters that have since been published.

Lesseps, Ferdinand, Vicomte de 1805–94
French diplomat and entrepreneur
Born in Versailles, he was a cousin of the Empress EUGÉNIE, wife of NAPOLEON III. From 1825 he held diplomatic posts in Lisbon, Tunis, Cairo and other cities. In 1854 he began his campaign for the construction of a Suez Canal, and in 1856 obtained a concession from the viceroy. The works were begun in 1860 and completed in 1869. In 1881 work began on his over-ambitious scheme for a sea-level Panama Canal, but had to be abandoned in 1888. In 1892–93 the management was charged with breach of trust, and sentenced to five years' imprisonment for embezzlement, but the sentence was reversed. He wrote *Histoire du canal de Suez* (1875–79) and *Souvenirs de quarante ans* (1887, 'Forty Years of Memories'). 🕮 Charles R L Beatty, *De Lesseps of Suez: The Man and His Time* (1956)

Lessing, Doris May, *née* **Tayler** 1919–
Rhodesian writer
She was born in Kermanshah, Persia (Iran), her family moving to Southern Rhodesia (Zimbabwe) in 1924. From 1937 to 1949 she became involved in politics and helped to start a non-racist left-wing party. She went to London in 1949, and her experiences of working-class life there are described in *In Pursuit of the English* (1960). She joined the Communist Party briefly, leaving it in 1956, in which year Rhodesia declared her a 'prohibited immigrant'. Her first published novel was *The Grass is Singing* (1950), a study of the sterility of white civilization in Africa. In 1952 *Martha Quest* appeared, the first novel in her sequence *The Children of Violence* (completed with *A Proper Marriage*, 1954, *A Ripple from the Storm*, 1958, *Landlocked*, 1965, and *The Four-Gated City*, 1969). Partly autobiographical, the sequence tells the life story of Martha, discussing contemporary social and psychological problems, particularly the unattainable ideal of a city where there is no violence. Other works include the much-praised *The Golden Notebook* (1962) and *Briefing for a Descent into Hell* (1971), both fictional studies of mental breakdown. She has attempted science fiction, but her commitment to exploring political and social undercurrents in contemporary society has never wavered, as can be seen in *The Good Terrorist* (1985). She has published two volumes of

autobiography: *Under My Skin* (1994) and *Walking in the Shade* (1997). Recent novels include *Love, Again* (1996), *Mara and Dann* (1999), *The Story of General Dann and Mara's Daughter, Griot and the Snow Dog* (2005) and *The Cleft* (2007). She was created Companion of Honour in 2000. 🕮 Carole Klein, *Doris Lessing* (2000)

Lessing, Gotthold Ephraim 1729–81
German writer
Born in Kamenz, Saxony, he studied theology at Leipzig (1746), then went on to Berlin, where his chief means of support was the *Vossische Zeitung*, to which he contributed criticisms. In 1751 he went to Wittenberg, took his Master's degree, and produced a series of *Vindications* of unjustly maligned or forgotten writers, such as Cardan and Lemnius. He returned to Berlin, and in 1755 produced his classic tragedy *Miss Sara Sampson* (1755). It was based on English rather than French models, and in his contributions to a new critical Berlin journal, *Briefe, die neueste Literatur betreffend* (1758, 'Letters Concerning the Latest Literature'), he protested against the dictatorship of French taste, combated the inflated pedantry of the Gottsched school and extolled SHAKESPEARE. His famous critical treatise defining the limits of poetry and the plastic arts, *Laokoon; oder, Über die Grenzen der Malerei und Poesie* (1766, Eng trans *Laocoon; or, The Limits of Poetry and Painting*, 1853), was written while he was secretary to the governor of Breslau (Wrocław, Poland). It was followed in 1767 by his major dramatic work, the comedy *Minna von Barnhelm* (Eng trans *The Disbanded Officer*, 1786). In 1769 he was appointed Wolfenbüttel librarian by the Duke of Brunswick, and between 1774 and 1778 he published the *Wolfenbüttelsche Fragmente eines Ungenannten* ('Anonymous Fragments from Wolfenbüttel'), a rationalist attack on orthodox Christianity from the pen of the theologian Hermann Reimarus (1694–1768) which, universally attributed to Lessing, provoked a storm of refutations. The best of Lessing's counter-attacks were *Anti-Goeze* (1778) and the fine dramatic poem, *Nathan der Weise* (1779, Eng trans *Nathan the Wise*, 1868), a noble plea for toleration. 🕮 H B Garland, *Lessing, Founder of Modern German Criticism* (1937)

L'Estrange, Sir Roger 1616–1704
English journalist and pamphleteer
Born in Hunstanton, Norfolk, he narrowly escaped hanging as a Royalist spy for a plot to seize Lynn, in Norfolk, in 1644, and was imprisoned in Newgate, but escaped after four years. Pardoned by CROMWELL in 1653, he lived quietly until the Restoration (1660) when he was made licenser of the press. He produced pamphlets contributing to the debates of his day, and his papers *The Public Intelligencer* (1663–66) and *The Observator* (1681–87) are of journalistic value. He also translated AESOP's Fables, SENECA's *Morals*, CICERO's *Offices*, the *Colloquies* of ERASMUS, QUEVEDO's *Visions* and JOSEPHUS.

Le Sueur, Eustache 1617–55
French painter
He was a pupil of SIMON VOUET, whose style he imitated until, about 1645, he came under the influence of NICOLAS POUSSIN's classical style. His most important early work was the decoration of two rooms in the Hôtel Lambert in Paris, while paintings of the life of St Bruno for the Charterhouse of Paris exemplify his late manner. The Louvre possesses 36 religious and 13 mythological pictures by him. He was one of the founders and first professors of the French Royal Academy of Painting (1648).

Le Sueur, Hubert c.1580–c.1670
French sculptor
He was born in Paris, and moved to England about 1628. His best-known work is the equestrian statue of CHARLES I at Trafalgar Square (formerly Charing Cross) in London (1633). He worked in the Italianate style and in 1631 was sent to Rome to make copies of classical sculpture. He also popularized the portrait bust. His bronze bust of Charles I is in the National Portrait Gallery, London, and he is also known for his monument to the Duke of BUCKINGHAM in Westminster Abbey (1628).

Lethaby, William Richard 1857–1931
English architect, designer and teacher
Born in Barnstaple, Devon, he trained as an architect, then worked (1877–87) in the London practice of NORMAN SHAW. He was a founder of the Art Workers' Guild (1884) and the Arts and Crafts Exhibition Society (c.1886). He was associated with ERNEST GIMSON in Kenton & Co during the period when he designed his most important building, Avon Tyrrell, near Salisbury, with Gimson plaster ceilings and Kenton furniture. In 1891 he became active in the Society for the Protection of Ancient Buildings, in which PHILIP WEBB was a major influence. The Central School of Arts and Crafts, London, was founded in 1896 with Lethaby and the sculptor, GEORGE FRAMPTON, as joint principals. Lethaby was sole principal from 1900 to 1912 and he also taught at the Royal College of Art, London. The emphasis he placed upon workshop practice at the Central School set a precedent for design education, including that at the Bauhaus in Germany.

Lethington, Lord *See* MAITLAND, SIR RICHARD

Lettow-Vorbeck, General Paul Emil von 1870–1964
Prussian officer
He commanded the German forces in East Africa during World War I. Early on in the war, he expanded and reorganized his troops and raided the Uganda railway. He failed to hold the Kilimanjaro area, where most German settlers were located, and fell back to the Tanganyika Central Railway. In 1916 the railway was captured by forces led by General JAN SMUTS, and Lettow-Vorbeck moved south to the Rufiji. He subsequently invaded Portuguese East Africa and Northern Rhodesia and surrendered after the Armistice at Abercorn (now Mbala, Zambia) on 25 November 1918.

Letts, Thomas 1803–73
English bookbinder
He was born in Stockwell, London. After his father's death in 1803 he began to manufacture diaries, and by 1839 was producing 28 different types.

Leucippus 5th century BC
Greek philosopher
Born in Miletus, Asia Minor (or in Elea, Lucania), he was the originator of the atomistic cosmology which DEMOCRITUS later developed and which is most fully expounded in LUCRETIUS's great poem *De Rerum Natura*. Leucippus is thought to have written two books, *The Great World System* and *On the Mind*, but his theories and writings are not reliably separable from those of Democritus.

Leuckart, Karl Georg Friedrich Rudolf 1822–98
German zoologist
Born in Helmstedt, he studied at the University of Göttingen, and became professor of zoology at the universities of Giessen (1850) and Leipzig (1869). A pioneer of parasitology, he described the complex life cycles of many parasites such as tapeworms and liver flukes, and was able to demonstrate that the disease trichiniasis in man was due to infection by a roundworm. He also showed that the radiata did not form a natural group and that the radial symmetry found both in the coelenterates and echinoderms (starfish) did not imply a close evolutionary relationship. Between 1863 and 1876 he wrote his great parasitological treatise *Parasites of Man* (translated 1886).

Leutze, Emanuel 1816–68
US painter
Born in Gmünd, Würtemberg, Germany, but brought up in the USA, he studied in Europe from 1841 to 1859, then settled in New York City in 1859. His paintings were mainly scenes from American history, the best known of which is *Washington crossing the Delaware*.

Le Vau or **Levau, Louis** 1612–70
French architect
He was born in Paris, and headed a large studio of artists and craftsmen, producing outstanding Baroque designs for the aristocracy. Among his early works, the Hôtel Lambert, Paris, stands out particularly for the ingenious use of site. His masterful design of Vaux-le-Vicomte (1657–61), with formal landscape by ANDRÉ LENÔTRE, constituted an influential milestone in French architecture, leading to his Baroque masterpiece of Versailles (from 1661, again with Lenôtre), designed on a palatial scale for court and government. Further works include the Collège des Quatre Nations, Paris (1661), where the Greek Cross plan of the church followed precedents in Rome.

Leven, 1st Earl of *See* LESLIE, ALEXANDER

Levene, Phoebus Aaron Theodor, *originally* **Fishel Aaronovich Lenin** 1869–1940
US biochemist
Born in Sasar, Russia, he qualified in medicine in St Petersburg in 1891 and emigrated to New York in 1892. His interest soon moved to chemistry, and in 1905 he became a founder member of the Rockefeller Institute in New York, applying chemistry to biological problems, and spent his career there. The most important of his many biochemical studies is his pioneer

research on the nucleic acids. His work established the nature of the sugar component which defines the two types of nucleic acid (RNA, ribonucleic acid; and DNA, deoxyribonucleic acid) before 1930, although it was not until 1953 that newer methods allowed JAMES DEWEY WATSON and FRANCIS CRICK to deduce the complete structure of the nucleic acids. Levene also published extensively on the chemistry of the sugar phosphates and the optical isomerism of organic substances.

Lever, Charles James 1806–72
Irish novelist
Born in Dublin, of English parentage, he graduated from Trinity College, Dublin, in 1827, and then went to Göttingen to study medicine. His most popular work, *Charles O'Malley* (1841), is a description of his own college life in Dublin. About 1829 he spent some time in the backwoods of Canada and North America, and he later related his experiences in *Arthur O'Leary* (1844) and *Con Cregan* (1849). He practised medicine in various Irish country towns, and in 1840 in Brussels, then returned to Dublin, where he published *Jack Hinton* (1843), and was editor of the *Dublin University Magazine* (1842–45). From 1845 he was again in Europe, where he wrote such novels as *Roland Cashel* (1850), and, completely changing his style, *The Daltons* (1852) and the *Fortunes of Glencore* (1857). He was appointed British vice-consul in Spezia in 1858, and continued to write, producing *Luttrel of Arran* (1865), and some racy essays in *Blackwood's* by 'Cornelius O'Dowd'. In 1867 he was promoted to the consulship in Trieste. He wrote brilliant, rollicking sketches of a phase of Irish life which was passing away, but no doubt his caricatures created a false idea of Irish society and character. 🕮 E Donney, *Charles Lever: His Life in His Letters* (1906)

Leverhulme, William Hesketh Lever, 1st Viscount 1851–1925
English soapmaker and philanthropist
Born in Bolton, Greater Manchester, he worked in his father's grocery business. He then opened new shops and in 1886 with his brother, James, started the manufacture of soap from vegetable oils instead of tallow, and founded the model industrial new town of Port Sunlight. Among his many benefactions, he endowed at Liverpool University a school of tropical medicine and gave Lancaster House to the nation. After World War I he attempted to develop the economy of the Western Isles of Scotland by purchasing the Islands of Lewis and Harris and planning a huge fishing and fish-producing industry there, but withdrew in 1923 after local opposition from the crofters of Lewis. 🕮 W P Jolly, *Lord Leverhulme: A Biography* (1976)

Leverrier or **Le Verrier, Urbain Jean Joseph** 1811–77
French astronomer
Born in St Lô, Normandy, he became teacher of astronomy at the Polytechnique in 1836. His *Tables de Mercure* and several memoirs gained him admission to the Academy in 1846. From disturbances in the motions of planets he inferred the existence of an undiscovered planet and calculated the point in the heavens where, a few days afterwards, Neptune was actually discovered by JOHANN GOTTFRIED GALLE at Berlin (1846). Elected in 1849 to the Legislative Assembly, he became counter-revolutionary. In 1852 Louis Napoleon (NAPOLEON III) made him a senator and in 1854 he succeeded FRANÇOIS ARAGO as director of the observatory of Paris.

Leverson, Ada 1865–1936
English novelist and journalist
She was born in London. After being educated privately, she became a member of the circle which included MAX BEERBOHM and OSCAR WILDE, whom she bravely supported during his trial in 1895. Wilde referred to her as 'The Sphinx'. Having published literary parodies in *Punch*, she contributed stories for *The Yellow Book* and, as 'Elaine', wrote over a hundred columns for *The Referee*. Her six novels, written between 1907 and 1916, include *Love's Shadow* (1908), *Tenterhooks* (1912) and *Love at Second Sight* (1916). Domestic stories of difficult marriages (not unlike her own to the gambler Ernest Leverson), they were republished in one volume as *The Little Ottleys* in 1962. 🕮 J Speedie, *Wonderful Sphinx: The Biography of Ada Leverson* (1993)

Levertov, Denise 1923–97
US poet
Born in Essex, England, of a Welsh mother and a Russian-Jewish father who became an Anglican clergyman, she was educated privately, and emigrated to the USA in 1948. She was appointed poetry editor of *The Nation* in 1961. *The Double Image* (1946) was her first collection of verse and others appeared regularly. She was outspoken on many issues (including Vietnam and feminism), and her poetry was similarly questioning. Her attachment to the 'Black Mountain' poets like CHARLES OLSON and WILLIAM CARLOS WILLIAMS is palpable but her voice is distinctive. *With Eyes at the Back of Our Heads* (1959), *Relearning the Alphabet* (1970), *Footprints* (1972) and *Evening Train* (1992) are particularly notable. Her *New and Selected Essays* were published in 1992. 🕮 L Wagner, *Denise Levertov* (1967)

Lévesque, René 1922–88
Canadian statesman
Born in New Carlisle, Quebec, he became a journalist and television commentator and was elected to the Quebec National Assembly in 1960. In 1967 he helped to found the separatist group called Mouvement Souveraineté-Association, which became the Parti Québecois. As president of the party, then premier of Quebec (1976), he advocated establishment of a French country which would be independent from English-speaking Canada and, under his 'sovereignty-association' plan, would have its own laws, taxes and foreign relations programme while maintaining economic unity with the rest of Canada. Although the people of Quebec rejected Lévesque's plan in a popular referendum vote in 1980, he was re-elected premier the following year. He resigned in 1985 owing to failing health.

Levi, Primo 1919–87
Italian writer and chemist
He was born of Jewish parents in Turin. He enrolled at Turin University to study chemistry for, as he wrote in *Il sistemo periodico* (1984, Eng trans *The Periodic Table*, 1984), he believed that 'the nobility of Man ... lay in making himself the conqueror of matter'. During World War II he fled into the mountains and tried to help set up a small guerrilla force, but this 'deluge of outcasts' was accidentally discovered and in December 1943 Levi was arrested, turned over to the SS, and despatched to Auschwitz. He was one of the few to survive, partly, after it was discovered he was Jewish, because he contracted scarlet fever when the Germans evacuated the camp as the Russians approached. Those ten months in Auschwitz haunted him for the rest of his life and may have prompted his suicide. His first book, *Se questo è un uomo* (Eng trans *If This Is a Man*, 1959), was completed soon after his return to Turin and was published in 1947. A graphic account of life in a concentration camp, it is written with a chemist's detached sensibility, making it all the more powerful. He continued to combine his career as a chemist with that of a writer. His best-known book is *Il sistemo periodico*, a volume of memoirs and autobiographical reflections. He was one of the 20th century's most incisive commentators, and his other titles include *La chiave a stella* (1978, Eng trans *The Wrench*, 1987), *Se non ora, quando?* (1982, Eng trans *If Not Now, When?*, 1985) and *Altrui mestiere* (1985, Eng trans *Other People's Trades*, 1985). 🕮 Mirna Cicioni, *Primo Levi: Bridges of Knowledge* (1995)

Levi-Civita, Tullio 1873–1941
Italian mathematician
Born in Padua, he studied and became professor there in 1897. From about 1900 he worked on the absolute differential calculus (or tensor calculus) which became the essential mathematical tool in ALBERT EINSTEIN's general relativity theory. From 1918 to 1938 he was professor in Rome, but was forced to retire by Fascist laws against Jews.

Levi-Montalcini, Rita 1909–
Italian neuroscientist and Nobel Prize winner
She was born and educated in Turin, where she studied medicine, but from 1939 onwards she was prevented, as a Jew, from holding an academic position, and had to continue her studies on nerve growth from a home laboratory. In 1947 she was invited by Viktor Hamburger to Washington University in St Louis, where she was professor from 1958 until her retirement in 1977. Primarily studying chemical factors that control the growth and development of cells, she isolated a substance now called nerve growth factor that promoted the development of sympathetic nerves. Her work on the factor provided powerful new insights into processes of some neurological diseases and possible repair therapies, into tissue regeneration, and into cancer mechanisms. In 1986 she shared the Nobel Prize in physiology or medicine with STANLEY COHEN. Her autobiography *In Praise of Imperfection* was published in 1988. She is a life member of the Italian Senate and a United Nations ambassador for food and agriculture. Her twin sister was the artist Paola Levi Montalcini (1909–2000).

Levin, (Henry) Bernard 1928–2004
English journalist and writer
Born in London and raised by his grandparents following his parents' separation, he won a scholarship to Christ's Hospital and later studied at the London School of Economics. He began his career in 1953 at the right-wing *Truth* magazine, moving in 1954 to *The Spectator*, where he launched a highly critical political column under the name 'Taper'. In 1963 he moved into television, appearing on the satirical show *That Was The Week That Was*, where he became famous for his abrasive interview technique. He later wrote for numerous publications, including *The Observer* and the *International Herald Tribune*. During the 1960s he was the theatre critic for the *Daily Express*, then for the *Daily Mail*. He is perhaps best known for his witty and erudite column in *The Times* (1971–97). His books include *The Way We Live Now* (1984), *All Things Considered* (1988), *A Walk Up Fifth Avenue* (1989), *If You Want My Opinion* (1992), *I Should Say So* (1995) and *Enough Said* (1998). He was flamboyant, eccentric and highly opinionated, but was considered to be one of the most intelligent and incisive columnists of his era.

Levine, James 1943–
US pianist and conductor
Born in Cincinnati, Ohio, he was a child prodigy. He made his piano debut with the Cincinnati Symphony Orchestra aged ten, and studied at the Juilliard School of Music in New York. Finding that he preferred the sociability of conducting to the isolation of solo performance, he became apprentice conductor to GEORGE SZELL at the Cleveland Symphony Orchestra in 1964 and was soon appointed assistant conductor. In 1971 he made his debut at the Metropolitan Opera in New York, conducting PUCCINI 's *Tosca*, and a year later was named the Met's principal conductor. He became artistic director in 1986. He then joined the Boston Symphony Orchestra (2001), becoming music director in 2004. He specializes in Italian opera, as well as championing modernist composers, and his conducting style is brilliant but self-effacing – an attempt to draw out the essential qualities of the music rather than to impose his signature on it.

Levison, Mary 1923–
Scottish Presbyterian reformer and minister
Born in Oxford, she studied philosophy at Oxford, and theology at Edinburgh, Heidelberg and Basel, beginning work as a deaconess of the Church of Scotland in 1954. She was assistant chaplain to Edinburgh University before she petitioned the General Assembly in 1963 to be ordained, setting in motion a process of debate which culminated in the Assembly's historic decision of 1968 to permit the ordination of women. Although not herself the first woman minister of the Church of Scotland, Levison had made such a possibility a reality, and earned wide respect for the integrity and intelligence with which she had made her case. She was finally ordained to serve as the assistant minister at St Andrew's and St George's Parish Church in Edinburgh in 1978, and served as the first female chaplain to the Queen (1991–93). She published *Wrestling with the Church* in 1992.

Lévi-Strauss, Claude 1908–
French social anthropologist and philosopher
Born in Brussels, Belgium, he was a graduate in law and philosophy, and became interested in anthropology while lecturing (1934–39) at São Paulo University, Brazil. He subsequently worked in the New School for Social Research in New York before becoming director of studies at the École Pratique des Hautes Études in Paris (1950–74). Since the publication of *Les Structures élémentaires de la parenté* (1949, Eng trans *The Elementary Structures of Kinship*, 1969), he has exerted a considerable influence on contemporary anthropology, establishing a new approach to analysing various collective phenomena such as kinship, ritual and myth. In his extensive four-volume study *Mythologiques* (1964–72, 'Mythologics') he reveals the systematic ordering behind codes of expression in different cultures, and argues that myths are not 'justifications' but are instead attempts to overcome 'contradictions'. *Anthropologie structurale* (vol 1, 1958, Eng trans *Structural Anthropology*, 1963) shows the influence of the structural linguistics of FERDINAND DE SAUSSURE, Roman Jakobson (1896–1982) and others on Lévi-Strauss's work, and confirms his outstanding contribution to the philosophy of structuralism. Later publications include *Le Regard éloigné* (1983, Eng trans *The View from Afar*, 1985), *La Potière jalouse* (1985, Eng trans *The Jealous Potter*, 1988) and *Regarder, écouter, lire* (1993, 'Look, Listen, Read'). In 2003 he received the Meister Eckhart Prize for philosophy. 🕮 R A Champagne, *Claude Lévi-Strauss* (1987)

Levitt, Helen 1913–
US photographer
Born in Brooklyn, New York, she worked for a portrait photographer in the Bronx in 1931, then studied at the Art Students League in New York (1956–57). She was strongly influenced by HENRI CARTIER-BRESSON. She began street photography in 1936, and in 1938 she assisted WALKER EVANS with his exhibition 'American Photographs' at the Museum of Modern Art, New York. She remains best known for her photographs of New York street life in the 1930s and 1940s, which have been widely published in such journals as *Time*, the *New York Post* and *Harper's Bazaar*. She has also worked in film, as assistant film cutter with director LUIS BUÑUEL, and with JAMES AGEE and painter and art historian Janice Loeb, she made the films *In the Street* (1945–46) and *The Quiet One* (1946–47). She later returned to still photography.

Levy, Andrea 1956–
English novelist
Born in London to Jamaican parents, she focuses in her novels on the experience of being black and British. Conventional in structure, her work is notable for its complexity of character and subtle analysis of race issues in Britain. Her first novel, *Every Light in the House Burnin'* (1994), is a semi-autobiographical story of a Jamaican family living in London. Other novels include *Never Far from Nowhere* (1996) and *Fruit of the Lemon* (1999). *Small Island* (2004) describes two couples, one Jamaican and one English, living in London just after World War II; it won the Orange Prize, the Whitbread Novel Award and the Commonwealth Writer's Prize.

Lévy-Bruhl, Lucien 1857–1939
French philosopher and anthropologist
Born in Paris, he studied at the École Normale Supérieure in Paris and was appointed to a chair in the history of modern philosophy at the Sorbonne in 1904. His early work was in moral philosophy, and he published *La Morale et la science des mœurs* in 1903 (Eng trans *Ethics and Moral Science*, 1905). He went on to develop a theory of 'primitive' mentality in *La mentalité primitive* (1922, Eng trans *Primitive Mentality*, 1923) and several later books. He believed that the mentality of 'primitive' people was essentially mystical and prelogical, differing in kind from the rational and logical thought of the modern West. This view drew him into a sharp exchange with ÉMILE DURKHEIM, and has few adherents today.

Lewald, Fanny 1811–89
German novelist
She was born in Königsberg, Prussia (now Kaliningrad, Russia). Jewish by birth, she became a Lutheran convert in 1828 to marry a young theologian, who died just before the wedding. She was an enthusiastic champion of women's rights, which were aired in her early novels, *Clementine* (1842), *Jenny* (1843) and *Eine Lebensfrage* (1845, 'A Question About Life'). In 1845 she met Adolf Stahr (1805–76), a Berlin critic, with whom she lived until he was free to marry in 1855. Her later works were family sagas, like *Von Geschlecht zu Geschlecht* (1863–65, 'From Generation to Generation') and *Die Familie Darner* (3 vols, 1887, 'The Darner Family'). She wrote records of travel in Italy (1847) and Great Britain (1852), and published an autobiography, *Meine Lebensgeschichte* (1861–63, 'The Story of my Life').

Lewes, G(eorge) H(enry) 1817–78
English writer
Born in London, and educated at Greenwich and in Jersey and Brittany, he went to Germany in 1838, and spent nearly two years there, studying the life, language and literature of the country. On his return to London he started writing for the *Penny Encyclopaedia* and *Morning Chronicler*, and was subsequently a contributor to numerous journals, reviews and magazines, and editor of the *Leader* (1851–54), and of the *Fortnightly* (1865–66), which he himself founded. He was unhappily married, with a family, when in 1854 he began his lifelong affair with GEORGE ELIOT. His other works include two novels, *Ranthorpe* (1847) and *Rose, Blanche and Violet* (1848), and ten plays, but he is best known for his writings on biography, the theatre, and later the sciences, and in particular his *Life and Works of Goethe* (1855). 🕮 A R Kaminsky, *George Henry Lewes as Literary Critic* (1968)

Lewis, Alun 1915–44
Welsh soldier-poet and short-story writer
He was born in Cwmaman, near Aberdare, educated at the University College of Wales, Aberystwyth, and at Manchester University, and became a lieutenant in the army. His first work,

a volume of short stories about army life, was *The Last Inspection* (1942), followed by a volume of poetry, *Raiders' Dawn*, in the same year. He died of gunshot wounds at Chittagong during the Burma campaign. Another volume of verse, ironically entitled *Ha! Ha!Among the Trumpets*, was published posthumously in 1945, followed by a collection of short stories and letters, *In the Green Tree* (1948). 🕮 A John, *Alun Lewis* (1970)

Lewis, Sir (William) Arthur 1915–91
British economist and Nobel Prize winner
Born in St Lucia, the West Indies, he was professor of economics at Manchester University from 1948 to 1958, during which time he published three works that established his reputation: *Economic Survey 1918–1939*, *The Principles of Economic Planning* and *Overhead Costs* (all 1949). He then became first president of the University of the West Indies (1959–63). From 1963 until his retirement in 1983 he held a chair in economics at Princeton. In 1979 he was awarded the Nobel Prize in economics, with THEODORE SCHULTZ, for work on economic development in the Third World.

Lewis, Carl (Frederick Carlton) 1961–
US track and field athlete
Born in Birmingham, Alabama, he was a brilliant all-round athlete at Houston University (1979–82). He won four gold medals at the 1984 Los Angeles Olympics (100m, 200m, 4 × 100m relay and long jump), emulating the achievement of JESSE OWENS at the 1936 Berlin Olympics. At the 1988 Seoul Olympics he won a gold medal in the long jump and was awarded the 100m gold medal after BEN JOHNSON was stripped of the title. In 1992 at the Barcelona Olympics he acquired two more golds in the long jump and the 4 × 100m relay, and in the 1996 Atlanta Olympics he earned the ninth and final gold medal of his career in the long jump, only the fourth Olympian to win as many.

Lewis, C Day *See* DAY-LEWIS, CECIL

Lewis, C(live) S(taples) 1898–1963
British novelist, literary scholar and religious writer
Born in Belfast, he won a scholarship to Oxford in 1916, but served in World War I before entering University College in 1918. His first book of poems, *Spirits in Bondage*, was published in that year. In 1925 he was made a Fellow of Magdalen College, where he headed an informal group of writers known as 'The Inklings', which included J R R TOLKIEN and Charles Williams. He became a distinguished teacher, and was appointed to the newly created chair of Medieval and Renaissance English at Cambridge in 1954. Having lost his faith at school, he returned to Christianity in the period 1929–31 and won a wide popular audience during World War II for his broadcast talks (collected as *Mere Christianity*, 1952) and his books on religious subjects, notably *The Screwtape Letters* (1940). His most important adult novels are the science-fiction trilogy *Out of the Silent Planet* (1938), *Perelandra* (1939) and *That Hideous Strength* (1945). His series of seven books for children, *The Chronicles of Narnia*, which began with *The Lion, The Witch and The Wardrobe* (1950) and ended with *The Last Battle* (1956, Carnegie Medal), is similarly suffused with Christian allegory and ethics, and is among the most important writings of the 20th century for children. 🕮 A N Wilson, *C. S. Lewis: A Biography* (1990); C S Lewis, *Surprised By Joy* (1955)

Lewis, Daniel Day- *See* DAY-LEWIS, DANIEL

Lewis, Denise 1972–
English athlete
Born in West Bromwich, West Midlands, she specialized in the heptathlon and came fifth in the European junior championships in 1991. She went on to win gold medals in the Commonwealth Games (1994) and the European Cup (1995), bronze in the 1996 Olympic Games, silver in the World championships (1997), golds in the European and Commonwealth championships (1998), another silver in the world championships (1999) and gold at the Olympic Games in 2000. She set new Commonwealth records in the heptathlon in 1997 and 2000. She was awarded an MBE in 1999.

Lewis, Edward B 1918–2004
US biologist and Nobel Prize winner
Born in Wilkes-Barre, Pennsylvania, he was educated at Minnesota University and at the California Institute of Technology, where he subsequently spent the rest of his career, becoming a professor there in 1956 and a professor emeritus in 1988. In 1995 he shared the Nobel Prize in physiology or medicine with ERIC WIESCHAUS and CHRISTIANE NÜSSLEIN-VOLHARD for discoveries concerning the colinearity principle of genetic control of early embryonic development. He also conducted important investigations into the leukemic effects of above-ground radiation. He was made an FRS in 1989, received the National Medal of Science in 1990 and won the Lasker Award for Basic Medical Research in 1991. 🕮 Howard Lipshitz, *Genes, Development and Cancer: the Life and Work of Edward B Lewis* (2004)

Lewis, Gilbert Newton 1875–1946
US physical chemist
Born in Weymouth, Massachusetts, he was educated at Nebraska University and Harvard and then studied in Germany for two years before taking a post as government chemist in the Philippines. From 1905 to 1912 he taught at the Massachusetts Institute of Technology (MIT), then moved to California University (1912–45). He was a pioneer in taking ideas from physics and applying them to chemistry; his ideas focused on the arrangement of electrons around atomic nuclei. He assumed that all but the lightest elements (H and He) had a pair of electrons surrounding the nucleus, with further electrons (in number to balance the nuclear charge) in groups, a group of eight being especially stable (the noble gases). Bonding between atoms of the lighter elements occurred in such a way that atoms gained or lost outer electrons to create octets, either by transfer (electrovalence) or by sharing (covalence). Noting that nearly all chemical compounds contain an even number of electrons, he concluded that the electron pair is especially important, and a shared electron pair can be equated with a covalent bond. He also defined a *base* as a substance which has a pair of electrons which can be used to complete the stable shell of another atom; and an *acid* as a substance able to accept a pair from another atom, to form a stable group of electrons.

Lewis, Gwyneth 1959–
Welsh poet
Born in Cardiff, she was educated at Cambridge and Oxford universities. She has published six books of poetry in Welsh and English. Her first collection in English, *Parables & Faxes* (1995), won the Aldeburgh Poetry Festival Prize and was short-listed for the Forward Prize, as was her second, *Zero Gravity* (1998), inspired by her astronaut cousin's voyage to repair the Hubble Space Telescope. *Y Llofrudd Iaith* (2000, Eng trans *The Language Murderer*) won the Welsh Arts Council Book of the Year Prize and *Keeping Mum* (2003) was short-listed for the same prize in 2004. She has also published non-fiction and written an opera libretto. She was appointed Wales's first National Poet in 2005.

Lewis, Hywel David 1910–92
Welsh philosopher of religion
Born in Llandudno, Gwynedd, he became professor of philosophy at University College, Bangor, in 1947. As professor of the history and philosophy of religion at King's College London (1955–77), he championed the subject against 'fashions' that might have eliminated it. He was president of Mind and other learned societies, founder editor of *Religious Studies* (1965–84), and author of many works, including *Our Experience of God* (1959), *The Self and Immortality* (1973), *Persons and Life after Death* (1978) and a trilogy based on his Gifford Lectures: *The Elusive Mind* (1969), *The Elusive Self* (1982) and *Freedom and Alienation* (1985). He also published several books in Welsh, including a volume of poems.

Lewis, Ida 1842–1911
US lighthouse keeper
She was born in Newport, Rhode Island, the daughter of a sea captain who was the lighthouse keeper on Lime Rock in Newport Harbour. She took over her father's duties when he suffered a stroke and she manned the lighthouse for 50 years, performing many rescues which began in 1858 when she saved four men whose boat had capsized. Lewis won public recognition in 1869 and SUSAN B ANTHONY reported her exploits in her suffrage journal *The Revolution*. She was awarded a gold medal by Congress and a pension by the Carnegie Hero Fund.

Lewis, Jerry, *originally* **Joseph Levitch** 1926 –
US entertainer
He was born in Newark, New Jersey, into a showbusiness family, and worked on a nightclub act before forming a partnership with singer and straight man DEAN MARTIN. They made their film debut in *My Friend Irma* (1949) and became the USA's favourite double-act of the 1950s. A solo performer from 1956, Lewis wrote, produced and often directed a series of anarchic comedies that indulged his love of visual humour and crude

slapstick. The most successful of these include *The Bellboy* (1960) and *The Nutty Professor* (1963). A top cabaret performer and tireless fundraiser for muscular dystrophy, he gave a strong dramatic performance in *The King of Comedy* (1982). He continues to make occasional film appearances and starred in a record-breaking tour of the musical *Damn Yankees* (1995–96).

Lewis, Jerry Lee 1935–
US rock and country singer and pianist
He was born in Ferriday, Louisiana. His powerful, energized style and driven personality quickly established him as one of the great originals of rock and roll, and brought him the nickname The Killer. After working as a session musician at Sun Studios in Memphis he was invited to record by the label's founder, Sam Phillips (1923–2003). His 1957 recordings 'Whole Lotta Shakin' and 'Great Balls of Fire' became classics of rock and roll, copied by successive generations of musicians. In 1958 he had further success with 'Breathless' and 'High School Confidential' (the title track to a film in which he appeared). After he married his 14-year-old (some sources say 13-year-old) cousin Myra in 1958 he was effectively boycotted by television and the pop radio stations. In the late 1960s he returned to country music, where he had begun, and was a huge success, but his personal behaviour continued to be erratic, and he had problems compounded by personal tragedies, including the deaths of his son, Jerry Lee Jnr, and two of his wives. Undaunted, he has continued to tour intermittently and record. His 2006 album of duets, *Last Man Standing*, featured performances from the great and good of both rock and country, a testament to his status and influence on all who followed. His cousin is the disgraced US television evangelist, Jimmy Lee Swaggart; another cousin, Mickey Gilley, is a country singer. 🕮 Nick Tosches, *Hellfire* (1998)

Lewis, John L(lewellyn) 1880–1969
US labour leader
Born in Lucas County, Iowa, the son of a Welsh coalminer, he entered the mines at the age of 15 and rose in union ranks to become president of the Union of United Mine Workers (UMW, 1920–60). When its membership fell to 150,000 in 1933, during the Great Depression, he feared a communist takeover and led a vigorous recruitment drive which succeeded in increasing the membership to 500,000. When, in 1935, he was unsuccessful in his attempts to change the American Federation of Labor's traditional exclusion of unskilled industrial workers, Lewis founded the Committee for Industrial Organizations, which became the Congress of Industrial Organizations (CIO) after its expulsion from the AFL in 1938. He took the coal miners out on several strikes during World War II, and his fiery personality and stubborn drive led to clashes with Presidents FRANKLIN D ROOSEVELT and HARRY S TRUMAN. As the coal industry declined in the 1950s he adopted a more conciliatory style of negotiation.

Lewis, John Robert 1924–
English marine ecologist
Born in Wallasey, Merseyside, he was educated at the University College of Wales, Aberystwyth, and was appointed to the staff of the zoology department of Leeds University in 1954. In 1965 he took charge of the University of Leeds Wellcome Marine Laboratory, being appointed director in 1972. His major contributions to marine biology included the publication in 1964 of *Ecology of Rocky Shores*, a descriptive and analytical text which is still considered an essential text in marine ecology worldwide. The book stresses the importance of adaptations to physical factors in determining species' abundance, and distribution and community structure. Lewis also successfully developed and chaired COST 47, a European Community-funded long-term international monitoring project.

Lewis, Juliette 1973–
US actress
Born in Los Angeles, she began her acting career at the age of twelve. She was noticed as a major talent with *Cape Fear* (1991), for which she received an Academy Award nomination for Best Supporting Actress, and went on to star in films such as *Husbands and Wives* (1992), *What's Eating Gilbert Grape* (1993), *Natural Born Killers* (1994), *Strange Days* (1995) and *The Way of the Gun* (2000). Although she continues to act, she has spent much time since 2003 recording and touring with her rock band, Juliette and the Licks.

Lewis, Lennox 1965–
British boxer
Born in London, he won a gold medal at the 1988 Olympics for Canada, his home country since boyhood. Having turned professional in 1989, he went back to Great Britain and became the European heavyweight champion in 1990. In 1991, he took the British heavyweight title from Gary Mason, and in 1992 was established as the number-one challenger for the world title. In December 1992, he was awarded the World Boxing Council (WBC) title by default (thus becoming Britain's first world heavyweight champion of the century), when RIDDICK BOWE, the then champion, refused to fight him and was stripped of the title. He retained his title three times before a defeat in 1994. He regained the title in 1997 and in 1999 became the undisputed world heavyweight champion, although he was later stripped of his World Boxing Association (WBA) title. He defended his WBC and International Boxing Federation (IBF) titles successfully in 2000, lost both briefly to Hasim Rahman in early 2001, but regained them both later that year. He then beat MIKE TYSON and Vitali Klitschko in 2003 before retiring from the ring in 2004. He was awarded the MBE in 1998.

Lewis, M(atthew) G(regory), *nicknamed* **Monk Lewis** 1775–1818
English novelist
Born in London, he was educated at Westminster School and Christ Church, Oxford, and in Germany, where he met GOETHE. In 1794 he was an attaché to The Hague and it was there he wrote *Ambrosio, or the Monk* (1796), a Gothic novel now generally known as *The Monk*, which was influenced by his formative reading of tales of witchcraft and the supernatural, and ANN RADCLIFFE's *Mysteries of Udolpho*, and which inspired his nickname. Many others in a similar vein followed, including a musical drama, *The Castle Spectre* (1798). He published several volumes of verse, but his best-known poem, 'Alonzo the Brave and the Fair Imogine', appeared in *The Monk*. Concerned about the treatment of the slaves on the estates he had inherited in the West Indies, he went there in 1817, but died of yellow fever on the way home. His *Journal of a West Indian Proprietor* was published in 1834. 🕮 L F Peck, *A Life of Monk Lewis* (1961)

Lewis, Meriwether 1774–1809
US explorer
Born near Charlottesville, Virginia, he joined the army and in 1792 led an unsuccessful expedition up the Missouri River. In 1801 he became personal secretary to President THOMAS JEFFERSON, and was invited with his long-time friend WILLIAM CLARK to lead an expedition (1804–06) to explore the vast unknown lands to the west of the Mississippi. It was to become the first overland journey across North America to the Pacific coast, and one of the longest transcontinental journeys ever undertaken. Considered a triumph for the young nation, the Lewis and Clark expedition strengthened US claims to the Oregon Territory and spurred settlement of the West. Lewis was appointed governor of the Louisiana Territory in 1806, but only three years later while travelling to Washington he died in a shooting incident in a cabin in Tennessee. 🕮 John Logan Allen, *Lewis and Clark and the Image of the American Northwest* (1991); Richard H Dillon, *Meriwether Lewis: A Biography* (1965);

Lewis, Richard, *known as* **Dic Penderyn** c.1807–1831
Welsh folk hero
Born near Aberavon, Glamorganshire, he was accused of wounding a soldier during the Merthyr Tydfil riots of 1831, found guilty and publicly executed at Cardiff on 31 August 1831. Many were convinced of his innocence and he became a folk hero in South Wales.

Lewis, Saunders 1893–1985
Welsh dramatist, poet and nationalist
Born in Cheshire, he studied English and French at Liverpool University, became a lecturer in Welsh at University College, Swansea, in 1922, and in 1924 published a study of English influences on classical Welsh 18th-century poetry, *A School of Welsh Augustans*. He was co-founder of the Welsh Nationalist Party (later Plaid Cymru) in 1925, and became its president in 1926. He became a Roman Catholic in 1932. Imprisoned in 1936 for a token act of arson against building materials for construction of an RAF bombing school at Penyberth, he was dismissed from Swansea and made his living by journalism, teaching and farming until his appointment as lecturer (later senior lecturer) in Welsh at University College, Cardiff, in 1952. He published many essays, 19 plays in Welsh and English, poems, novels, and historical and literary criticism, chiefly in Welsh. He retired from public life in 1957, but continued publishing plays, his last being *Excelsior* (1980). 🕮 P Davies, *Saunders Lewis* (1950)

Lewis, (Harry) Sinclair 1885–1951
US novelist and Nobel Prize winner
He was born in Sauk Center, Minnesota, the son of a doctor. Educated at Yale University, he became a journalist and wrote

several minor works before *Main Street* (1920), the first of a series of bestselling novels satirizing the arid materialism and intolerance of US small-town life. *Babbitt* (1922) still lends its title as a synonym for middle-class US philistinism. Other titles of this period are *Martin Arrowsmith* (1925), *Elmer Gantry* (1927) and *Dodsworth* (1929). From then on he tended to exonerate the ideologies and self-sufficiency he had previously pilloried, but the shift of attitude did nothing to diminish his popularity. His later novels include *Cass Timberlane* (1945) and *Kingsblood Royal* (1947). He refused the Pulitzer Prize for *Arrowsmith*, but accepted the Nobel Prize in literature in 1930, becoming its first US laureate. 🕮 M Schorer, *Sinclair Lewis: An American Life* (1961)

Lewis, Sir Thomas 1881–1945
Welsh cardiologist and clinical scientist
Born in Cardiff, he received his preclinical training at University College, Cardiff. In 1902 he went to University College Hospital, in London, where he remained as student, teacher and consultant until his death. ERNEST HENRY STARLING stimulated his interest in cardiac physiology and the physician Sir JAMES MACKENZIE awakened his curiosity about diseases of the heart. He was the first to master completely the use of the electrocardiogram, and he and his students established the basic parameters which still govern the interpretation of electrocardiograms. Using animal experiments he was able to correlate the various electrical waves recorded by an electrocardiograph with the sequence of events during a contraction of the heart. This enabled him to use the instrument as a diagnostic aid when the heart had disturbances of its rhythm, damage to its valves or changes due to high blood pressure, and other conditions. During his later years he turned his attention to the physiology of cutaneous blood vessels and the mechanisms of pain. He fought for full-time clinical research posts to investigate what he called 'clinical science', and in 1933 changed the name of the journal he had founded in 1909, from *Heart* to *Clinical Science* (1933). His textbooks of cardiology went through multiple editions and translations. He was knighted in 1921.

Lewis, (Percy) Wyndham 1882–1957
English novelist, painter and critic
He was born on a yacht off Amehurst, Nova Scotia, his father being American and his mother English, and he was educated at the Slade School of Art, London. With EZRA POUND he instituted the Vorticist movement and founded *Blast* (1914–15), the magazine which expounded their theories. From 1916 to 1918 he served on the Western Front, as a bombardier, then as a war artist. In the early 1930s, his right-wing sympathies were out of vogue. He emigrated to Canada at the beginning of World War II, returning to London in 1945. In 1951 he went blind. His novels, *Tarr* (1918), *The Childermass* (1928) and *The Apes of God* (1930) are powerful, vivid satires. Other important novels are *The Revenge for Love* (1937) and *Self Condemned* (1954), which is partly autobiographical. *The Human Age* (1955), a trilogy which was conceived with *The Childermass* and continued with *Monstre Gai* and *Malign Fiesta* (both 1955), was modelled in part on DANTE and MILTON. He also wrote political and critical essays, short stories, and the autobiographies *Blasting and Bombardiering* (1937) and *Rude Assignment* (1950). As a writer he has been ranked by some critics alongside JAMES JOYCE, and as a painter, he was one of the foremost experimentalists of his time in British art, and a highly skilled portraitist, painting, among others, Ezra Pound, EDITH SITWELL and T S ELIOT. 🕮 J Meyers, *The Enemy: A Biography* (1980)

LeWitt, Sol 1928–2007
US artist
Born in Hartford, Connecticut, he graduated from Syracuse University in 1949 and worked for an architect before emerging as an abstract artist in the early 1960s. Given to abstract 'philosophy' in the 1970s, he made Minimalist sculptures (or 'structures'), but he was already declaring that the concept was more important than the work, the planning more important than the execution. His exhibited wall-drawings were therefore afterwards obliterated, but he gave many of them a second life in lithographs and etchings, characterized by geometric shapes and bands of colour. He was regarded as an originator of Minimalism and Conceptual Art.

Lewontin, Richard Charles 1929–
US geneticist
Born in New York City, he studied at Columbia University, and subsequently held positions at the universities of Rochester, Chicago and Harvard, where he was appointed professor of zoology in 1973. He has contributed substantially to the theoretical and experimental dimensions of population genetics. The central theme to his research is how to explain the distribution of variation within and among natural populations. His empirical work has involved detailed studies of the genetics of natural populations of the fruit fly species, and has been dominated by what he has termed 'the struggle to measure variation'. He synthesized much of this work in his influential 1974 book, *The Genetic Basis of Evolutionary Change*. The widespread application of his 1966 gel electrophoresis technique resulted in the discovery of large amounts of variation, and indirectly led to the neutral theory of molecular evolution – that at the molecular level, most evolutionary changes result from mutations with no selective advantages. He has continued to apply technological developments to population genetic problems, carrying out the first study of nucleotide sequence polymorphism in 1983. He has also published widely on human genetics. He was one of the major figures in the development of population genetics in the second half of the 20th century. He is a frequent critic of received scientific wisdom, particularly in the contexts of politics, agribusiness and neo-Darwinism. His publications include *It Ain't Necessarily So: the Dream of the Human Genome and Other Illusions* (2001) and *The Dialectical Biologist* (2006).

Leyster, Judith 1609–60
Dutch painter
Born in Haarlem, she was an exceptionally talented child. She married an artist, Jan Molenaer, in 1636. Probably the best-known 17th-century female painter, she produced lively paintings of revellers including *The Jolly Toper*, which was attributed to FRANS HALS until her own monogram was revealed during cleaning. Her self portrait (c.1635) hangs in the National Gallery of Art in Washington, and many of her genre scenes of everyday Dutch life hang in the leading museums of Europe.

Lezama Lima, José 1910–76
Cuban novelist and poet
Brought up against a militaristic background, he was one of Cuba's leading intellectuals in the 1930s, first known as a poet and prose poet. His acknowledged masterpiece is his novel *Paradiso* (1966, Eng trans 1974), which is now required reading for all students of the Latin-American novel in its middle phase. His stature in Cuba was so great that he was left alone, though isolated, when confronted with evidence of his negative sentiments about FIDEL CASTRO's Cuba. 🕮 R S Minc (ed), *Latin-American Fiction Today* (1980)

Lhévinne, Josef 1874–1944
US pianist
Born in Oryel, Russia, he studied at the Moscow Conservatory and at the age of 15 played BEETHOVEN's Emperor Concerto with ANTON RUBINSTEIN conducting. After playing and teaching in Russia he made his US debut in 1906, and after a period in Berlin (1907–19) emigrated to the USA, where he taught music. He often played two-piano recitals with his pianist wife Rosina (1880–1976).

Lhote, André 1885–1962
French artist, teacher and writer on art
Born in Bordeaux, he associated with the Cubists and in his painting he combined classic precision of composition and a free, sensitive use of colour. His greatest influence, however, was exerted through his writings, such as *Treatise on Landscape* (1939) and *Treatise on the Figure* (1950), and through his teaching in Paris, where he established the Académie Montparnasse in 1922.

Li, Choh Hao 1913–87
US biochemist
Born in Canton, China, he studied at Nanjing University and from 1935 at the University of California at Berkeley, where he became professor of biochemistry in 1950. His main work was on the pituitary hormones, isolating adrenocorticotrophic hormone (ACTH) and by 1956 establishing its molecular structure. Ten years later he had similar success with the growth hormone, somatotropin, which he synthesized in 1970.

Li, Florence Tim Oi 1906–92
Hong Kong Christian and the first Anglican woman priest
She was ordained priest in 1944 to minister to the Anglican congregation in Macao, where she already served as deacon, during the Japanese occupation of South China. This extraordinary wartime measure by the Anglican Bishop of Hong Kong, R O Hall, was disowned by the Archbishop of Canterbury, Geoffrey Fisher, in 1945. Hall refused to suspend Li, so to save him from having to resign, she voluntarily gave up her priestly

ministry. Li was appointed a teacher at Canton Theological Seminary. Later, since Hong Kong had made its own decision (1971) to ordain women priests, she was able to celebrate the fortieth anniversary of her ordination in Westminster Abbey in 1984.

Liadov or **Lyadov, Anatoli Konstantinovich** 1855–1914
Russian composer
He was born in St Petersburg, and trained under RIMSKY-KORSAKOV. His works include music for the piano and the vivid nationalist symphonic poems *Baba-Yaga*, *Kikimora* and *The Enchanted Lake*. He also made collections of Russian folk songs, conducted, and was a professor at St Petersburg.

Liao Zhongkai (Liao Chung-k'ai) 1878–1925
Chinese politician
Born into a Chinese family in the USA, he studied in Japan before becoming the leading financial expert of the Guomindang (Kuomintang) after 1912. Associated with its left wing, he supported the United Front with the communists in 1923, advocating a planned economy along socialist lines. In 1924 he played an important role in setting up both the workers and peasant departments under Guomindang auspices as part of its new strategy of mass mobilization. As the leading Guomindang representative at the Whampoa Military Academy, he also laid the basis for the political commissar system that was to be used throughout the National Revolutionary Army. He aroused opposition from right-wing members of the Guomindang who opposed the United Front, and who may have been involved in his assassination.

Libau or **Libavius, Andreas** c.1560–1616
German alchemist
Born in Halle, Saxony, he studied at Jena University, taught history and poetry there, and then in the 1590s moved to Rothenburg ober der Tauber, where he began to teach and write (voluminously) on alchemy. His main work was *Alchemia* (1597), a richly illustrated book which has a claim to be the first chemical textbook; it gives accounts of a range of chemical methods and substances, and vigorously attacks the ideas of PARACELSUS. However, his philosophical, diffuse and mystical style limited its influence; his *Alchemia* was not translated out of Latin, was more quoted than used, and is more appreciated now as a step from alchemy towards chemistry than it was in his own time.

Libavius, Andreas *See* LIBAU, ANDREAS

Libby, Willard Frank 1908–80
US chemist and Nobel Prize winner
Born in Grand Valley, Colorado, he studied and lectured at the University of California at Berkeley, where he became associate professor in 1945. He carried out atom-bomb research (1941–45) on the separation of the isotopes of uranium at Columbia, and from 1945 to 1954 was professor of chemistry at Chicago. From 1954 to 1959 he served on the US Atomic Energy Commission. He was awarded the 1960 Nobel Prize in chemistry for his part in the invention of the carbon-14 method of determining the age of an object. He was professor of chemistry at UCLA from 1959 to 1976.

Liberace, *properly* **Wladziu Valentino Liberace** 1919–87
US entertainer
Born in West Allis, a suburb of Milwaukee, Wisconsin, he was playing piano by ear at the age of four. He appeared as a soloist with the Chicago Symphony Orchestra at 14 and earned a living in nightclubs and at student dances using the stage name Walter Busterkeys. He gradually developed an enduringly successful act of popular piano classics, which he performed with lavish showmanship. He made his film debut in *East of Java* (1949) but his one starring role in *Yours Sincerely* (1955) was not well received. *The Liberace Show* (1952–57), his television series, won him an Emmy as Best Male Personality. Liberace broke all box-office records at the Radio City Music Hall in New York during 1985. His books include *Liberace Cooks! Recipes From His Seven Dining Rooms* (1970) and *The Things I Love* (1976).

Libeskind, Daniel 1946–
US architect
Born in Łódź, Poland, he moved to Israel in 1957 and then to the USA in 1959, becoming a US citizen in 1965. He studied music in Israel and New York, then architecture at the Cooper Union for the Advancement of Science and Art in New York and Essex University, UK. A contemporary deconstructivist, he won the competition to design Berlin's Jewish Museum in 1989, leading to further high-profile commissions including the Imperial War Museum North in Greater Manchester (2002), which won an RIBA Award in 2004. His controversial 'Spiral' extension for the Victoria and Albert Museum (1996) was never built, as it failed to attract lottery funding. In 2002, he won the competition to create the master plan for the rebuilt World Trade Center site in New York City. 🕮 Daniel Libeskind, *Breaking Ground: Adventures in Life and Architecture* (2004)

Li Bo (Li Po), *also known as* **Li Tai Bo (Li T'ai-po)** 701–762
Chinese poet
Born in Sichuan (Szechwan) Province, he led a dissipated life at the emperor's court and later became one of a wandering band calling themselves 'The Eight Immortals of the Wine Cup'. Regarded as the greatest poet of China, he wrote colourful verse of wine, women and nature. It is believed that he was drowned while attempting to grasp the Moon's reflection. *Li Tai Bo Juanji* ('The Complete Works') were published in three volumes in 1977. Collections of Li Bo's translated work were published in 1922 and 1973. 🕮 A Waley, *The Poetry and Career of Li Po* (1950)

Lichfield, (Thomas) Patrick John Anson, 5th Earl of 1939–2005
English photographer
Educated at Harrow and Sandhurst, he served in the Grenadier Guards from 1959 to 1962, when he decided to become a professional photographer. After working as an assistant for many years he opened his own studio and from 1981 achieved success in travel and publicity photography as well as with his many royal portraits. His publications include *The Most Beautiful Women* (1981), *Elizabeth R: A Photographic Celebration of 40 Years* (1991) and his autobiography, *Not the Whole Truth* (1986).

Lichtenstein, Roy 1923–97
US painter
Born in New York City, he studied painting at the Art Students' League in New York, and at Ohio State University, Columbus (1940–43). He served in the US army from 1943 to 1946 before returning to Ohio, where he taught (1946–51). In the mid-1950s he worked in an Abstract Expressionist style, but by 1961, influenced by CLAES OLDENBURG, he was painting enlarged versions of popular magazine advertisements and violent cartoon strips. He duplicated the dot patterns of crude newspaper reproductions in brightly coloured, enlarged form. Regarded as one of the major figures of the Pop Art movement, his works include *Whaam!* (1963, Tate, London), *As I Opened Fire* (1964, Stedelijk, Amsterdam) and *Little Big Painting* (1965, Whitney Museum of American Art, New York). He was also a sculptor, elevating banal objects to monumental works of art, as with his *Dinnerware Objects* of the 1960s and bronze *Sculptures* of the 1970s.

Lick, James 1796–1876
US financier and philanthropist
Born in Fredericksburg, Virginia, he became a piano-maker. He went to California (c.1848), made a fortune in real-estate investment and founded the Lick Observatory on Mount Hamilton.

Li Dazhao (Li Ta-chao) 1888–1927
Chinese revolutionary
He was one of the founders of the Chinese Communist Party, and his interpretation of Marxism as applied to China had a profound influence on MAO ZEDONG. Appointed head librarian of Beijing (Peking) University in 1918 and professor of history in 1920, he had the young Mao as a library assistant, and founded one of the first of the communist study circles which in 1921 were to form the Communist Party. In 1927, when the Manchurian military leader, Zhang Zuolin (Chang Tso-lin), then occupying Beijing, raided the Soviet Embassy, Li was captured and executed.

Liddell, Eric Henry, *known as* **the Flying Scotsman** 1902–45
Scottish athlete and missionary
Born in Tientsin, China, of Scottish missionary parents, he was educated at Eltham College, London, and at Edinburgh University. At the 1924 Olympics in Paris he would have been favourite to win the 100m had he not refused to take part on religious grounds because the heats were to be run on a Sunday – the gold medal was eventually won by Harold Abrahams (1899–1978). Instead, he won the bronze medal in the 200m, and then caused a sensation by winning the gold medal in the 400m (at which he was comparatively inexperienced) in a then world record time of 47.6 seconds. In 1925, having completed his degree in science and a degree in divinity, he went to China to work as a Scottish Congregational Church missionary.

During World War II he was interned by the Japanese at Weihsien camp, and there, not long before the war ended, he died of a brain tumour. The story of his athletic triumphs was told in the film *Chariots of Fire* (1981).

Liddell, Helen 1950–
Scottish Labour politician
Born in Monklands, Lanarkshire, she studied economics at Strathclyde University and worked as an economics correspondent and business executive before entering parliament as MP for Monklands East (1994–97) and Airdrie and Shotts (1997–2005). A former General Secretary of the Labour Party in Scotland (1977–88), she became an opposition spokeswoman on Scotland (1995–97), Economic Secretary to the Treasury (1997–98), Minister of State in the Scottish Office (1998–99), Minister of Transport (1999), Minister for Energy and Competitiveness in Europe (1999–2001) and Secretary of State for Scotland (2001–03). She took up the position of High Commissioner to Australia in 2005.

Liddell, Henry George 1811–98
English classical scholar
Educated at Charterhouse and Christ Church, Oxford, he was ordained in 1838 and appointed professor of moral philosophy at Oxford. Then headmaster of Westminster School (1846–55), he returned to Christ Church as dean, was Vice-Chancellor of the university (1870–74), and resigned the deanship in 1891. He is renowned for the *Greek–English Lexicon* (1843), based on the dictionary of German scholar Franz Passow (1786–1883), with Robert Scott (1811–87), Master of Balliol College (1854–70). Liddell also wrote a *History of Rome* (1855). His daughter, Alice, was the little girl for whom LEWIS CARROLL, his colleague at Christ Church, wrote *Alice in Wonderland*.

Liddell Hart, Sir Basil Henry 1895–1970
English military journalist and historian
Born in Paris, he was educated at St Paul's and Cambridge, and served in World War I, retiring from the army in 1927. He was responsible for various tactical developments during the war, and wrote the post-war official manual of Infantry Training (1920). He was military correspondent to *The Daily Telegraph* (1925–35) and *The Times* (1935–39). In 1937 he relinquished his position as personal adviser to the Minister of War to publicize the need for immediate development of air power and mechanized warfare. He wrote more than 30 books on warfare, as well as biographies of FERDINAND FOCH, T E LAWRENCE and others. He was knighted in 1966.

Liddon, Henry Parry 1829–90
English theologian
Born in North Stoneham, Hampshire, he graduated from Oxford in 1850. Ordained in 1852, he was Vice-Principal of Cuddesdon Theological College from 1854 to 1859. In 1864 he became a prebendary of Salisbury, in 1870 a canon of St Paul's, and Ireland Professor of Exegesis at Oxford (until 1882). An able and eloquent exponent of liberal High Church principles, he was a strong opponent of the Church Discipline Act of 1874, and as warmly supported WILLIAM GLADSTONE's crusade against the Bulgarian atrocities of 1876. His *Analysis of the Epistle to the Romans* was published in 1893.

Lidman, Sara 1923–2004
Swedish writer
She was born in Missenträsk, in the far north of the country, and that area was the setting for her early novels such as *Tjärdalen* (1953, 'The Tar Still') and *Hjortronlandet* (1955, 'Cloudberry Land'). She began writing after her studies at the University of Uppsala were ended owing to illness. The support for the underdog visible in these novels became more overt as her politics developed in the 1960s after visits to South Africa, Kenya and Vietnam. In the highly acclaimed series of novels beginning with *Din tjänare hör* (1977, 'Thy Servant Heareth'), she returned to her roots, taking as her theme the building of the railways of the north. She experimented with documentary forms of writing and also wrote plays. Later books include *Lifsens rot* (1996, 'The Root of Life') and the collection of essays *Kropp och skäl* (2003, 'Body and Reason').

Lie, Jonas Lauritz Idemil 1833–1908
Norwegian novelist and poet
He was born in Eker, near Drammen, and trained as a lawyer, but abandoned law for literature. Like Sir WALTER SCOTT, he saw writing first and foremost as a means of paying off debt. His novels, which present realistic portayals of fisher-life in Norway, include *Den fremsynte* (1870, 'The Visionary'), *Lodsen og hans Hustru* (1874, 'Lodsen and his Wife'), *Livsslaven* (1883, 'One of Life's Slaves') and *Kommandørens Døtre* (1886, 'The Commander's Daughters'). He also wrote fairytales like *Trold* (1891–92, 'Trolls'), and some poetry and plays. He was enormously popular and influential in Scandinavia. 🕮 A Garborg, *Jonas Lie* (1925)

Lie, Marius Sophus 1842–99
Norwegian mathematician
Born in Nordfjordeide, he studied at Oslo University, then supported himself by giving private lessons. After visiting FELIX KLEIN in Berlin, a chair of mathematics was created for him in Oslo. In 1886 he succeeded Klein at Leipzig University, but returned to Oslo in 1898. His study of contact transformations arising from partial differential equations led him to develop an extensive theory of continuous groups of transformations, now known as Lie groups. This theory became a central part of 20th-century mathematics and has important applications in quantum theory.

Lie, Trygve Halvdan 1896–1968
Norwegian politician
He was born in Oslo. He was a Labour member of the Norwegian parliament and held several posts, including Minister of Justice and Minister of Supply and Shipping, before fleeing with the government to Great Britain (1940), where he acted as its foreign minister until 1945. He was elected first Secretary-General of the UN in 1946, but resigned in 1952 over Soviet opposition to his policy of intervention in the Korean War. He was Minister of Industry (1963–1964) and of Commerce and Shipping from 1964. He wrote *In the Cause of Peace* (1954).

Lieber, Francis 1800–72
US political scientist
Born in Berlin, he went to the USA in 1827 for political reasons and became a naturalized US citizen. He was professor of history and political economy at South Carolina College, Columbia, and Columbia Law School. His *Code for the Government of the Armies of the US* was widely accepted. He also created *Encyclopaedia Americana* (13 vols, 1829–33).

Liebermann, Felix 1851–1925
German legal historian
Born in Berlin, he worked for many years to settle the texts of the Anglo-Saxon legal codes and to elucidate them. His major work, *Die Gesetze der Angelsachsen* (3 vols, 1903–16, 'The Laws of the Anglo-Saxons'), is indispensable for early English legal history.

Liebermann, Max 1847–1935
German painter and etcher
Born in Berlin, he studied at Weimar and in Paris, where he first won fame. In Germany from 1878 he painted open-air studies and scenes of humble life which were often sentimental. Later, however, his work became more colourful and romantic, and, influenced by the French Impressionists, he became the leading painter of that school in his own country.

Liebig, Justus von 1803–73
German chemist
Born in Darmstadt, he studied in Bonn, receiving his doctorate for work at Erlangen (1822). This was followed by two years' study in Paris where he learned techniques of analysis from JOSEPH LOUIS GAY-LUSSAC. In 1824 he was appointed Extraordinary Professor at the University of Giessen, where he set up an institute for training chemists based on his experiences in France. During this period he studied the phenomenon of isomerism and he and FRIEDRICH WÖHLER became close friends. He developed improved procedures for the elemental analyses of organic compounds. In his book *Die organische Chemie in Anwendung auf Agricultur und Physiologie* (1840, Eng trans *Organic Chemistry in its Applications to Agriculture and Physiology*, 1840), he described the process we now know as photosynthesis and considered the value of fertilizers. His book attracted great interest and led to a number of improvements in agricultural practice, including the use of ammonium salts as fertilizers. In 1852 he left Giessen for Munich, where he remained until his retirement.

Liebknecht, Karl 1871–1919
German barrister, politician and revolutionary
The son of Wilhelm Liebknecht (1826–1900), he was a member of the Reichstag from 1912 to 1916. In World War I he was imprisoned as an independent, anti-militarist, social democrat. He was a founder-member with ROSA LUXEMBURG of the German Communist Party (KPD) in 1918 and led an unsuccessful revolt in Berlin, the 'Spartacus Rising', in January 1919, during which he and Rosa Luxemburg were killed by army officers.

Liebling, A(bbott) J(oseph) 1904–63
US journalist
Born in New York City to an Austrian father and a Californian mother, he trained at the Pulitzer School of Journalism in New York. After a brief spell with the *New York Times*, he attended the Sorbonne in Paris (1926–27). In 1935 he joined *The New Yorker*, where he wrote in a tart, ironical style on subjects including society, sports and food; however, his greatest achievement was his vivid, first-hand reportage from Europe and North Africa during World War II. He continued at *The New Yorker*, which eventually became a platform for his withering critique of trends in journalism. A devoted gourmand, he became seriously overweight and died of pneumonia. 🕮 Raymond Sokolov, *The Wayward Reporter: The Life of A J Liebling* (1980)

Liebrecht, Felix 1812–90
German writer
Born in Namslau, Silesia, he was professor of German at Liège (1849–67), and made himself known by articles on the origin and diffusion of folk tales, and by translations enriched with annotations. Among these are *Basile's Pentamerone* (1846), *Barlaam und Josaphat* (1847) and Dunlop's *Geschichte der Prosadichtungen* (1851, 'History of Prose Writing').

Lieven, Princess Dorothea, *née* **von Benkendorf** 1784–1857
Russian princess and salon hostess
She married Prince Lieven (1774–1857), the Russian Ambassador in Great Britain, and from 1837 lived mostly in Paris where her salon was much visited by diplomats. Her life is detailed in her *Correspondence with Earl Grey* (1891), *Letters from London* (1902) and *Unpublished Diary* (1925). 🕮 Parry, *The Correspondence of Lord Aberdeen and Princess Lieven* (1939)

Lievensz or **Lievens, Jan** 1607–74
Dutch historical painter and etcher
Born in Leyden, he was a friend of REMBRANDT and shared a studio with him there. He visited England and lived in Antwerp before returning to Holland, where his paintings of allegorical subjects and his portraits became very successful.

Lifar, Serge 1905–86
French dancer and choreographer
Born in Kiev, Ukraine, he became a student and friend of SERGEI DIAGHILEV, whose Ballets Russes he joined in 1923. Following his first important appearance in *La Boutique fantasque*, he danced with ANNA PAVLOVA, TAMARA KARSAVINA and Spessirtzeva, and was critically acclaimed for his roles in, among others, BRONISLAVA NIJINSKA's *Les Facheux* (1924), LÉONIDE MASSINE's *Ode* (1928), and GEORGE BALANCHINE's *Apollon* (1925) and *The Prodigal Son* (1929). He scored his first triumph as a choreographer in Paris with *Créatures de Promethée* in 1929, the year he became artistic director of the Paris Opera. 🕮 *Ma Vie from Kiev to Kiev: An Autobiography* (1970)

Ligachev, Yegor Kuzmich 1920–
Russian politician
He was born in Novosibirsk. After graduating as an engineer in 1943, he worked in the Urals region before joining the Communist Party in 1944. As party chief (1957) of the new 'science city' of Akademgorodok, he gained a reputation as an austere opponent of corruption. He was brought to Moscow by NIKITA KHRUSHCHEV in 1961 but, after the latter was ousted in 1964, he was sent to Tomsk, where he was regional party boss for 18 years. However, he became a full member of the Central Committee in 1976, and in 1983 he was promoted to the Secretariat by YURI ANDROPOV, becoming Ideology Secretary in 1984. With the accession to power of MIKHAIL GORBACHEV in 1985, he was brought into the politburo. He initially served as Gorbachev's deputy, but they became estranged over the issue of reform and, in 1988, he was demoted to the position of Agriculture Secretary. As Gorbachev became more radical, Ligachev became more conservative, and in 1990 he left the the Central Committee as well as the politburo. Since 1991 he has been elected to three terms of office in the Duma as a Communist. He is the eldest member of the chamber.

Ligeti, György Sándor 1923–2006
Austrian composer
Born in Dicsöszentmárton, Hungary, he studied and later taught at the Budapest Academy of Music (from 1950). He researched Hungarian folk music and wrote some folk-song arrangements, but his work was curtailed first by Nazi and then by Stalinist oppression, and it was not until he fled Hungary in 1956 that he found the freedom to develop his unique style. After working for a time at the electronics studio in Cologne, he settled in Vienna, developing an experimental approach to composition. His first large orchestral work, *Apparitions* (1958–59), made his name widely known. *Atmosphères* followed in 1961, demonstrating his technique of chromatic complexes, and in *Aventures* (1962) and *Nouvelles Aventures* (1962–65) he used his own invented language of speech sounds. Other works include the choral *Requiem* (1963–65) and *Lux Aeterna* (1966), the orchestral *Lontano* (1967), the Double Concerto for flute, oboe and orchestra (1972), the 'music theatre', *Le Grand Macabre* (1978), *The San Francisco Polyphony* (1996) and music for harpsichord, organ and wind and string ensembles. He held academic posts in Stockholm, California and Hamburg, and was a member of several Academies of Arts. He became an Austrian citizen in 1967. His work is notable for its fantastical elements as well as for its humour.

Light, William 1784–1839
English soldier and surveyor
Born in Kuala Kedah, Malaysia, where his father was the first British superintendent of the protectorate of Penang, he was educated privately in England. He joined the navy and later served as a dragoon in the Peninsular Wars, where his skills were employed in preparing battle maps. In 1824 he married and, with the aid of his wife's wealth, bought a yacht and travelled round the Mediterranean where he made sketches, some of which were later published. In 1834 he took command of the paddle-steamer *Nile* on its voyage to join the new navy of his friend the Pasha of Egypt. At this time he first met JOHN HINDMARSH who later took over the vessel and who also beat Light to the vacant governorship of South Australia. Light was, however, appointed as surveyor-general to the new colony, and laid out the plan for Adelaide. The city was planned with squares and wide streets, the whole surrounded by the first 'green belt' of open spaces and parkland; an early and enduring example of town planning.

Liguori, St Alfonso Maria de 1696–1787
Italian prelate
Born in Naples, he studied law before taking orders in 1726. He founded the order of Liguorians or Redemptorists with twelve companions in 1732. Bishop of Sant' Agata de' Goti from 1762, he resigned in 1775, and returned to his order. He was canonized in 1839, and declared a Doctor of the Church in 1871. His voluminous writings embrace divinity, casuistry, exegesis, history, canon law, hagiography, asceticism and poetry.

Li Hongzhang (Li Hung-chang) 1823–1901
Chinese statesman, soldier and scholar
Born in Hefei (Hofei), Anhui (Anhwei) Province, he joined the Imperial Army as secretary in 1853, was appointed a provincial judge, and in 1862 governor of Jiangsu (Kiangsu), out of which, in conjunction with 'Chinese Gordon' (CHARLES GEORGE GORDON), he drove the rebels in 1863. Made a hereditary noble of the third class, he was appointed Governor-General of the Jiang provinces in 1864, and of Zhili (Chihli) in 1870, when he was also appointed Senior Grand Secretary. An advocate of 'Self Strengthening', he founded the Chinese navy and promoted a native mercantile marine. On the outbreak of the war with Japan (1894), Li, in supreme command in Korea, was thwarted by the incompetence, dishonesty and cowardice of inferior officers. The Chinese were swept out of Korea, and Li, whose policy was that of peace, was deprived of his honours and summoned to Peking (Beijing). The disastrous course of events soon compelled the emperor to restore him to honour. Through his efforts the war was brought to a termination in 1895, China ceding Formosa (Taiwan) and paying a war indemnity of £35 million.

Li Hongzhi 1952–
Chinese cult leader
Born in Gongzhuling, Jilin province, he was educated at local schools and worked as a clerk in the grain business before developing the combination of yoga-style exercises and philosophical ideas drawn from Buddhism and Taoism that he called the Falun Gong. The Falun Gong grew into a controversial spiritual movement with tens of millions of followers in China, though condemned as an 'evil cult' by the Chinese government, who imprisoned many of its members. Living in exile in New York, Li Hongzhi assumed the trappings of a religious leader, claiming supernatural powers and presenting himself as a reincarnation of Buddha.

Li Hsien-nien *See* LI XIANNIAN

Li Hung-chang *See* LI HONGZHANG

Lilburn, Douglas Gordon 1915–2001
New Zealand composer
Born in Wanganui, he studied under RALPH VAUGHAN WILLIAMS at the Royal College of Music, London, and in 1936 his tone-poem *Forest* won the £25 first prize in a competition offered by PERCY GRAINGER. In 1949 Lilburn was appointed lecturer at Victoria University, Wellington. In 1950 he turned to electronic music, and in 1970 became professor of music and director of electronic music studies. In his works for voice he collaborated with such leading New Zealand writers as Allen Curnow (1911–2001), Robin Hyde (1906–39) and Denis Glover (1912–80). In 1967 he pioneered a series of autograph scores by New Zealand composers and was active in setting up the Archive of New Zealand Music.

Lilburne, John c.1614–1657
English revolutionary
He was born in Greenwich, London. Imprisoned by the Star Chamber in 1638 for importing Puritan literature, he rose in the Parliamentary army, but resigned from it in 1645 over the Covenant. He became an indefatigable agitator for the Levellers during the English Civil Wars, regarded CROMWELL's republic as too aristocratic, and demanded greater liberty of conscience and numerous reforms. He was repeatedly imprisoned for his treasonable pamphlets. 🕮 Pauline Gregg, *Free-born John* (1961)

Liliencron, Detlev von 1844–1909
German poet and novelist
Born in Kiel, he fought in the Prussian army in 1866 and 1870. He went to the USA but returned to Holstein in 1882, where for a time he held a civil service post. He is best known for his lyrics, which are lively and musical. His first volume, *Adjutantenritte* ('The Adjutant's Rides'), appeared in 1883, and others included *Der Heidegänger* (1890, 'The Moors Walker'), *Neue Gedichte* (1893, 'New Poems') and *Gute Nacht* (1909, 'Good Night'). He also wrote novels and a humorous epic poem, *Poggfred* (1896). A selection of translations of his poems was published in 1914 as *Selected Poems*. 🕮 O J Bierbaum, *Detlev von Liliencron* (1892)

Lilienthal, Otto 1849–96
German aeronautical inventor, pioneer of gliders
Born in Anklam, he was educated at the trade school at Potsdam and the Berlin Trade Academy. He studied bird-flight in order to build heavier-than-air flying machines resembling the birdman designs of LEONARDO DA VINCI. He made hundreds of short flights in his gliders, but crashed to his death near Berlin.

Liliuokalani, *also* **Lydia Kamakameha Paki** 1838–1917
Last monarch of the Hawaiian Islands
Born in Honolulu, she attended the Royal School conducted by US missionaries and married John Owen Dominis, the son of a Boston sea captain, in 1862, despite her earlier engagement to a Hawaiian prince. She became queen in 1891 on the death of her brother, King David Kalakaua, and attempted to restore the power of the monarchy which had been weakened by the 1887 US-sponsored constitution. In 1893 she proclaimed a new constitution by royal edict and was promptly deposed by wealthy sugar planters (who were mainly from the USA). She wrote songs, including the well-known 'Aloha Oe', and a memoir, *Hawaii's Story by Hawaii's Queen*, published in 1898, the year of Hawaii's annexation by the USA.

Lillee, Dennis Keith 1949–
Australian cricketer
Born in Perth, Western Australia, and hostile in both bowling style and temperament, he epitomized the move towards the more combative approach to international cricket. An automatic choice for his country when fit, he took 355 wickets in 70 Tests. His attempts to introduce a metal bat (illegal) into Test matches led to well-publicized clashes with the Australian cricketing authorities. He retired in 1984 and works as a coach for young fast bowlers.

Lillehei, Clarence Walton 1918–99
US thoracic and cardiovascular surgeon
Born in Minneapolis, Minnesota, he received his training in medicine, physiology and surgery at Minnesota University. Most of his professional career was spent in the department of surgery there, although he spent seven years (1967–74) at Cornell University Medical Center in New York City. His pioneering work on open-heart surgery was begun in the early 1950s, before the development of the pump oxygenator made such procedures more reliable. He remained an international figure in cardiac surgery throughout the 1960s and 1970s.

Lilley, Peter 1943–
English Conservative politician
He was born in Kent and educated at Dulwich College and Clare College, Cambridge. After graduating he worked as an economic consultant in industry and was elected Conservative MP for St Albans in 1983. A right-winger, he came to prominence in 1990 when he was appointed secretary of state for trade and industry. In 1992–97 he was secretary of state for social security and introduced controversial proposals for ending the 'dependency culture' of state aid for the unemployed. At the 1997 general election he became MP for Hitchin and Harpenden, and following the Conservatives' defeat and JOHN MAJOR's resignation, he came fourth in the leadership contest. He was shadow chancellor (1997–98) and then deputy leader of the Conservatives from 1998 to 1999.

Lillie, Beatrice Gladys, *by marriage* **Lady Peel** 1894–1989
Canadian comic actress
She was born in Toronto and educated in Ontario. Her stage career began in London in 1914 at the Chatham Music Hall. She had begun as a serious singer of drawing-room ballads but turned to comedy, encouraged by André Charlot, and from 1914 she was renowned in music hall and the new vogue of 'intimate revue'. She entertained the troops on leave in World War I, worked with NOËL COWARD in London, and made her debut in the USA in 1932. She entered cabaret in London at the Café Royal (1938). During World War II she entertained the troops and was decorated by General CHARLES DE GAULLE. During the 1950s she developed her own television series in the USA. She also appeared in films, such as *Thoroughly Modern Millie* (1967), but was at her best with a live audience.

Lillo, George 1693–1739
English dramatist and jeweller
He was born in London, of mixed Dutch and English Dissenting parentage, and wrote seven plays, including *The London Merchant, or the History of George Barnwell* (1731) and *Fatal Curiosity* (1736), both tragedies. His *Arden of Feversham*, which was published posthumously in 1759, is a weak version of the earlier anonymous play of that title (1592). Among the first to put middle-class characters on the English stage, he had a considerable influence on European drama. 🕮 T Drucker, *The Plays* (1979)

Lilly, William 1602–81
English astrologer
He was born in Diseworth, Leicestershire, and in 1620 he went to London, where for seven years he served an ancient citizen, whose widow he married. On her death in 1633 he inherited £1,000. He took up astrology, and soon acquired considerable fame and fortune. In 1634 he obtained permission to search for hidden treasure in the cloisters of Westminster, but was driven from his midnight work by a storm which he ascribed to demons. From 1644 till his death he annually issued his *Merlinus Anglicus, Junior*, containing prophecies. In the Civil War he attached himself to the Parliamentary Party as soon as it promised to be successful, and was rewarded with a pension. After the Restoration he was imprisoned for a time, and was reapprehended on suspicion of knowing something about the Great Fire of London in 1666. He wrote nearly 20 works on astrology.

Lily, John *See* LYLY, JOHN

Lilye or **Lily, William** c.1466–1522
English grammarian
He was born in Odiham, Hampshire, and after studies at Magdalen College, Oxford, he visited Jerusalem, Rhodes and Italy, learning Greek from refugees from Constantinople (Istanbul). After he had taught for a while in London, Dean JOHN COLET appointed him the first headmaster of his new school of St Paul's (1512) – perhaps the first man to teach Greek in London. He had a hand in Colet's *Brevissima Institutio*, which, as corrected by ERASMUS, and redacted by Lilye himself, was known as the *Eton Latin Grammar*. Besides this he wrote Latin poems (1518) and a volume of Latin verse against a rival schoolmaster (1521).

Limann, Hilla 1934–98
Ghanaian diplomat and politician
He was educated in Ghana and then at the London School of Economics and the Sorbonne, Paris, where he gained a doctorate. He was a teacher before joining the Ghanaian diplomatic service as Head of Chancery at Lome (1968–71). He attended many international gatherings while being his country's counsellor at its permanent mission to the UN in Geneva (1971–75) and senior officer in the Ministry of Foreign Affairs (1975–79). In 1979 he was chosen to lead the People's

National Party and elected president. He was removed from office as a result of a military coup led by JERRY RAWLINGS (1981).

Limbaugh, Rush Hudson, III 1951–
US talk show host
Born in Cape Girardeau, Missouri, he went to Southeast Missouri State University, but dropped out after one year. He started his professional radio career as a music DJ on stations based in Pittsburgh and Kansas City, before eventually moving to New York City in 1988, where he began to present *The Rush Limbaugh Show*, a nationally syndicated weekday talk show, for the station WABC-AM. With more listeners than any other US radio talk show, Limbaugh is unapologetic about his sometimes controversial right-wing opinions and is known for baiting liberals and Democrats and supporting Republican policies. From 1992 to 1996 he also fronted a half-hour television talk show.

Limburg or **Limbourg, Pol** and **Jehanequin** and **Hermann de** fl.early 15th century
Flemish miniaturists
They were three brothers, who were taken prisoner as youths in Brussels in wartime, on their way home from Paris. They were released by the Duke of Burgundy and attached to his household as painters. In 1411 they became court painters to the Duke of Berri and produced 39 illustrations for his celebrated manuscript, *Très Riches Heures du Duc de Berri*, one of the greatest masterpieces of the international Gothic style. Other works have been attributed to Pol de Limburg, including *Heures d'Ailly*, two pages of the Turin-Milan Hours and several in a book of TERENCE.

Limón, José 1908–72
US dancer, choreographer and teacher
Born in Culiacan, Mexico, he went to New York, where he decided to become a dancer. Studies with DORIS HUMPHREY and CHARLES WEIDMAN led to his joining their company as a dancer (1930–40). He formed his own group in 1946, appointing his mentor, Doris Humphrey, as artistic director. In 1950 the José Limón Company was the first US modern dance group to tour Europe. Throughout the 1950s and 1960s it was one of the USA's most impressive modern dance companies, and toured the world. His choreography includes *La Malinche* (1949), *The Moor's Pavanne* (1949, one of his most well-known works), *The Traitor* (1954), *There is a Time* (1956), *Missa Brevis* (1958), the all-male *The Unsung* (1970) and *Carlotta* (1972). His company survived after his death and is still based in New York.

Limousin or **Limosin, Léonard** c.1505–1577
French painter in enamel
Born in Limoges, he was court painter from 1530 to FRANCIS I, who appointed him head of the royal factory at Limoges.

Lin, Maya Ying 1959–
US architect and artist
Born in Athens, Ohio, into a family of artists and intellectuals who had immigrated from China, she studied architecture at Yale. While still a student she entered and won the design competition for the Vietnam Veterans Memorial in Washington, DC. Her design consisted of two black granite walls inscribed with the names of the dead, built into the earth and joining in a shallow V. Dedicated in 1982, it was initially denounced by veterans' groups who called it a 'wall of shame', but it subsequently became, as she conceived it, a place of pilgrimage where mourners are reflected in the polished stone. Her design for the Civil Rights Memorial (1989) in Montgomery, Alabama, is almost as powerful, and uses flowing water to illustrate MARTIN LUTHER KING's biblical invocation: 'Justice rolls down like waters and righteousness like a mighty stream.' In 2003, Lin served on the selection committee of the World Trade Center Memorial Competition.

Linacre, Thomas c.1460–1524
English humanist and physician
Born in Canterbury, he studied at Oxford, was elected Fellow of All Souls in 1484, and went to Italy, where he learned Greek, and took his MD at Padua. ERASMUS and Sir THOMAS MORE were both taught Greek by him. Around 1500 HENRY VII made him tutor to Prince ARTHUR. As king's physician to Henry VII and HENRY VIII he practised in London. In 1518 he founded the Royal College of Physicians, of which he became the first president. Late in life he took holy orders. Linacre was one of the earliest champions of the 'New Learning'. He translated several of GALEN's works into Latin, and wrote grammatical treatises. 🕮 Francis Maddison, Margaret Pelling and Charles Webster (eds), *Essays on the Life and Work of Thomas Linacre* (1977)

Lin Biao (Lin Piao) 1908–71
Chinese soldier and politician
Born in Wuhan, Hubei (Hupeh) Province, he was the son of a factory owner. In 1926 he joined the Communists to fight the Guomindang (Kuomintang), becoming Commander of the Northeast People's Liberation Army in 1945. He became Defence Minister in 1959 and emerged from the Cultural Revolution of 1966 as second-in-command to MAO ZEDONG, being appointed a party Vice-Chairman and formally designated as Mao's heir and successor at the congress of 1969. However, in 1971, Lin formulated 'Project 571', designed to assassinate Chairman Mao and seize power in a military coup. This plot was uncovered and Lin was killed in 1971 in a plane crash over Outer Mongolia while attempting to flee to the Soviet Union.

Lincoln, Abraham *See panel p959*

Lincoln, Benjamin 1733–1810
American Revolutionary general
Born in Hingham, Massachusetts, he became major-general in the Continental Army, reinforcing WASHINGTON in 1776 after the defeat on Long Island. In 1777 he received command of the southern department. In 1780, besieged by HENRY CLINTON in Charleston, he was compelled to capitulate. After his release in an exchange of prisoners, he took part in the Siege of Yorktown (1781) and was Secretary of War (1781–83). He later commanded the soldiers suppressing DANIEL SHAYS's Rebellion in Massachusetts (1787).

Lincoln, Mary Todd 1818–82
US First Lady, wife of President Abraham Lincoln
Born in Lexington, Kentucky, she was courted by LINCOLN while living with her sister in Springfield, Illinois, and though their engagement was once broken, she married him in 1842. She was a sensitive, vivacious woman with a streak of neurosis, and although tales of the Lincolns' incompatibility as a married couple may be apocryphal, it is certain that the deaths of three of their four sons, especially twelve-year-old Willie in 1862, brought them much unhappiness. During their years in the White House she was attacked for her extravagance and unfairly accused of disloyalty to the Union because of her Kentucky origins and brothers fighting on the Confederate side, and her husband's assassination, which occurred as she sat next to him in Ford's Theatre (1865), unhinged her completely. For much of the remainder of her life she was plagued by the paranoiac conviction that she was in dire poverty and at the same time by the compulsion to shop constantly. She was committed to a mental institution (1875) by her surviving son, Robert Todd Lincoln, but was declared sane the following year.

Lind, James 1716–94
Scottish physician
Born in Edinburgh, he served in the navy as a surgeon's mate, then after qualifying in medicine at Edinburgh, became physician at the Royal Naval Hospital at Haslar. In 1747 he conducted a classic therapeutic trial, dividing twelve patients suffering from scurvy into six groups of two, treating each group with a different remedy. The two sailors given two oranges and a lemon each day responded most dramatically. His work on the cure and prevention of scurvy helped induce the Admiralty in 1795 at last to issue the order that the navy should be supplied with lemon juice, and during the Napoleonic Wars the British navy suffered far less scurvy than the French. He also stressed cleanliness in the prevention of fevers, and wrote major treatises on scurvy, fevers and the diseases encountered by Europeans in tropical climates.

Lind, Jenny, *originally* **Johanna Maria Lind** 1820–87
Swedish soprano
Born in Stockholm, she went to the court theatre school of singing at the age of nine. After lessons in Paris, she made her debut in Stockholm (1838) and attained international popularity. Known as the 'Swedish nightingale', she founded and endowed musical scholarships and charities in Sweden and in England, where she lived from 1856, and became professor of singing at the Royal College of Music (1883–86).

Lindau, Paul 1839–1919
German writer
Born in Magdeburg, he founded the journals *Die Gegenwart* (1872, 'The Present') and *Nord und Süd* (1877, 'North and South'), and wrote books of travel and works of criticism. However, he is better known as a writer of plays and novels. The most successful of the former is perhaps *Maria und Magdalena* (1872, Eng trans 1874). The novels include *Herr und Frau Bewer* (1882) and *Berlin* (1886–87).

Lincoln, Abraham 1809–65
16th president of the USA

Abraham Lincoln was born in a log cabin near Hodgenville, Kentucky, the son of a restless pioneer. The family eventually settled in south-west Indiana in 1816. Two years later Abraham's mother died and his father remarried shortly afterwards. His stepmother encouraged education, although there was little schooling in the backwoods country. In 1830 the Lincolns moved on to Illinois and Abraham went to work as a clerk in a store at New Salem. He already had political ambitions, and saw the need to study law and grammar. He won election to the legislature in 1834, and began the practice of law in 1836. At Springfield, in 1842, he married MARY TODD.

In 1846 he sat in congress; but professional work was distracting him from politics when in 1854 STEPHEN A DOUGLAS repealed the Missouri Compromise of 1820, and reopened the question of slavery in the territories. The bill roused intense feeling throughout the North, and Douglas defended his position in a speech at Springfield in October. Lincoln delivered in reply a speech which first fully revealed his power as a debater. He was then elected to the legislature. When the Republican Party was organized in 1856 to oppose the extension of slavery, Lincoln was its most prominent leader in Illinois, and the delegates of his state presented him for the vice-presidency.

In 1858 he stood as candidate for the Illinois seat against Douglas. Lincoln lost, but his views attracted the attention of the whole country. In May 1860 the Republican convention on the third ballot nominated him for the presidency. The Democratic Party was divided between Douglas and JOHN CABELL BRECKINRIDGE. After an exciting campaign Lincoln won a comfortable majority. At his inaugural address on 4 March, he declared the Union perpetual, argued the futility of secession, and expressed his determination that the laws should be faithfully executed in all the states. South Carolina had left the Union, and the six gulf states had formed the Confederate States of America. Not even Lincoln's oratorical skills and conciliatory efforts could prevent the impending conflict and on 12 April 1861, the Civil War began with the Confederate attack on Fort Sumter in Charleston harbour. Lincoln defined the issue of the war in terms of national integrity, not anti-slavery, a theme he restated in the Gettysburg Address of 1863. Nonetheless, the same year he proclaimed freedom for all slaves in areas of rebellion, and he continued the theme in his re-election campaign of 1864.

In the Republican Convention in June, Lincoln was unanimously nominated for a second term, and in November was re-elected. In his second inaugural address, in March 1865, he set forth the profound moral significance of the war. On Good Friday, 14 April, at Ford's Theatre, Washington, he was shot by JOHN WILKES BOOTH, an actor, and he died the next morning.

Lincoln was fair and direct in speech and action, steadfast in principle, sympathetic and charitable, a man of strict morality, abstemious and familiar with the Bible, though not a professed member of any church.

🕮 Lincoln's *Collected Works* are to be found in several editions. These include his eloquent speeches: the *Emancipation Proclamation* of 1862, the *Gettysburg Address* of 1863 when first were heard these words, 'government of the people, by the people, for the people', and the *Inaugural Address* of 1865.

🕮 Dwight G Anderson, *Abraham Lincoln: The Quest for Immortality* (1982); Lord Longford, *Abraham Lincoln* (1974); Albert J Beveridge, *Abraham Lincoln, 1809–1958* (2 vols, 1928).

> 'With malice toward none, with charity for all, with firmness in the right, as God gives us to see the right, let us strive on to finish the work we are in, to bind up the nation's wounds, to care for him who shall have borne the battle, and for his widow and his orphan, to do all which may achieve and cherish a just and lasting peace among ourselves, and with all nations.'
>
> – From his second inaugural address, 4 March 1865, a month before the end of the Civil War.

Lindbergh, Charles Augustus 1902–74
US aviator

Born in Detroit, he worked as an airmail pilot on the St Louis–Chicago run. In May 1927 he made the first non-stop solo transatlantic flight from New York to Paris in a Ryan monoplane named *Spirit of St Louis* in 33½ hours, for which he was awarded the Congressional Medal of Honour. During World War II he advocated US neutrality. His autobiography, *The Spirit of St Louis* (1953), won the Pulitzer Prize in 1954. His wife, Anne Morrow Lindbergh (1906–2001), wrote *North to the Orient* (1935), *Listen, the Wind* (1938), *Gift from the Sea* (1955), *Earth Shine* (1970) and others. 🕮 Brendan Gill, *Lindbergh Alone* (1977)

Lindblad, Bertil 1895–1965
Swedish astronomer

Born in Örebro, he studied at the University of Uppsala, where he started his work on the problem of distinguishing giant and dwarf stars of the same spectral type. From 1920 to 1922 he worked on two-dimensional stellar classification, leading to valuable results on the space density of common stars, and in 1925 he proposed the idea that our galaxy rotates around a distant centre. He then embarked on the study of external spiral galaxies. He was appointed director of the Observatory of the Swedish Academy in Stockholm in 1927 and established a magnificent new observatory in Saltsjöbaden (1931). His many honours included three honorary doctorates and gold medals from the Royal Astronomical Society (1948) and the Astronomical Society of the Pacific (1954). He was a highly esteemed president of the International Astronomical Union between 1948 and 1952.

Lindemann, Frederick Alexander *See* CHERWELL, 1ST VISCOUNT

Linden, Johannes van der 1756–1835
Dutch judge and jurist

He practised in Amsterdam, where he became a judge, and is remembered in South Africa for his *Rechtsgeleerd Practicaal en Koopmans-Handboek* (1806). Sometimes called *The Institutes of the Law of Holland*, in 1852 it was made the official law book of the South African Republic. He also wrote a supplement to Books 1–11 of Johannes Voet's *Commentarius*, and prepared a code of civil law for the Netherlands in which he attempted to codify Roman-Dutch law, but which was not adopted.

Linderstrøm-Lang, Kaj Ulrik 1896–1959
Danish biochemist

Born in Copenhagen, he trained at the city technical college before joining the Carlsberg Laboratory as assistant to SØREN SØRENSEN, whom he succeeded as professor and head of the chemistry department. He first titrated the dissociable protons from proteins using the hydrogen electrode to measure pH, and in 1927 used organic solvents to lower the dissociation constant (pK) of an ionizing group. His work on digestive enzymes led him into a major study of protein structure. He found that the rate at which the protons of a polypeptide exchanged with the medium reflected the protein's inherent structural instability, and he subsequently classified globular protein structure into three divisions (1951): primary (amino acid-based bridges), secondary (based on hydrogen bonding) and tertiary (folding to form the active protein) which has become the basis of all modern teaching on this subject. In 1935 Linderstrøm-Lang was elected to the Danish Royal Society as its youngest member. He became a Foreign Member of the Royal Society in 1956.

Lindgren, Astrid 1907–2002
Swedish children's novelist

She was born in Vimmerby, and established her reputation with *Pippi Långstrump* (1945, Eng trans *Pippi Longstocking*, 1954). She wrote around 80 more books, including *Mästerdetektiven Blomkvist* (1946, Eng trans *Bill Bergson Master Detective*, 1951), but none has eclipsed its popularity. *Samuel August från Seudstorp och Hanna: Hult* (1975) portrays her parents. 🕮 V Edström, *Astrid Lindgren* (1987)

Lindley, John 1799–1865
English botanist and horticulturist

Born in Catton, near Norwich, Norfolk, he was the son of George Lindley, a nursery gardener and author of *Guide to Orchard and Kitchen Garden* (1831). He was appointed assistant secretary to the Horticultural Society of London in 1827, and was professor

of botany at University College London (1829–60). In 1828 he prepared a report on the royal gardens at Kew which saved them from destruction and led to the creation of the Royal Botanic Gardens. The most important of his many publications were those on orchids, and *The Vegetable Kingdom* (1846).

Lindrum, Walter 1898–1960
Australian billiards player
Born in Kalgoorlie, Western Australia, he set the world break record of 4,137 while playing JOE DAVIS in 1932, at Thurston's Hall, London. He competed in only two world championships (1933–34) and won both. He retired from competitive play in 1950.

Lindsay, Sir David *See* LYNDSAY, DAVID

Lindsay, Jack 1900–90
Australian poet, novelist, historian and translator
Born in Melbourne, the eldest son of artist and writer NORMAN LINDSAY and brother of PHILIP LINDSAY, he published his first book of verse, *Fauns and Ladies*, in 1923. He co-founded the Fanfrolico Press for which he translated many classics with his father contributing illustrations. He went to live in England in 1926 where the Press prospered. During World War II he published more verse, *Second Front* (1944), and war novels such as *We Shall Return* (1942). He achieved international respect as a historian and produced impressive critical studies of artists such as J M W TURNER and PAUL CÉZANNE in the 1960s. Well-known for historical novels such as *Light in Italy* (1941), he also wrote novels of contemporary life, like *Rising Tide* (1953), further verse including *Peace is Our Aim* (1950), and three volumes of autobiography, *Life Rarely Tells* (1958), *The Roaring Twenties* (1960) and *Fanfrolico and After* (1962). *Blood Vote*, his World War I novel set in Brisbane, was written in 1937, mislaid by the author, rediscovered and eventually published in 1987.

Lindsay, (John) Maurice 1918–
Scottish poet, critic and editor
Born in Glasgow, he was educated at Glasgow Academy and trained as a musician at the Scottish National Academy of Music. He worked as drama and music critic for the *Bulletin*, Glasgow (1946–60), worked with Border Television (1961–67) and was director of the Scottish Civic Trust (1967–83). His major works are his critical treatments of ROBERT BURNS and his *History of Scottish Literature* (1977). His own poetry was first published in *The Advancing Day* (1940) and the best of his work is brought together in *Collected Poems* (1979). Later publications include *Thank You for Having Me: A Personal Memoir* (1983), *Glasgow 1837* (1989) and *The Edinburgh Book of Twentieth-Century Scottish Poetry* (2005), which he co-edited. He was awarded a CBE in 1979.

Lindsay, Norman Alfred William 1879–1969
Australian artist and writer
Born in Creswick, Victoria, into a celebrated family of Australian artists, his diverse (and now dated) novels mostly portray aspects of a Rabelaisian Melbourne peopled by drunken but lovable artists and disapproving clergy. They include *A Curate in Bohemia* (1913), the rollicking *A Cautious Amorist* (1932), *Age of Consent* (1938) and *The Cousin from Fiji* (1945). His children's book *The Magic Pudding* (1918) stars the hero Bunyip Bluegum, a perennial favourite with adults too. Some of his novels were banned and his art too was highly controversial. An eloquent champion of the pleasures of the flesh and of artistic freedom, he joined battle with middle-class Australia through his writings, book illustrations, fine pen drawings and paintings. His sons were the writers JACK and PHILIP LINDSAY.

Lindsay, Philip 1906–58
Australian historian, biographer, novelist and film writer
The son of NORMAN LINDSAY and brother of JACK LINDSAY, he published an early collection of verse then followed Jack to England to pursue a journalistic career. He began a series of picaresque novels with a tale of the buccaneer Captain Henry Morgan in *Panama is Burning* (1932). His books, which mainly deal with various periods of British history, include *Gentleman Harry Retires* (1936), *Pudding Lane* (1940), *The Devil and King John* (1942) and his last, *Rusty Sword* (1946). A respected medievalist, he also wrote the lives of English kings HENRY V (1934) and RICHARD III (1939), and of Australian batsman DON BRADMAN (1951).
📖 *I'd Live the Same Life Over* (1940)

Lindsay, Robert, *originally* **Robert Lindsay Stevenson** 1949–
English actor
Born in Ilkeston, Derbyshire, he trained at RADA and took over the role of Jesus in the London musical *Godspell* (1972). He became well known as Wolfie Smith, central character of the television sitcom *Citizen Smith* (1977–80); also on television, he appeared in *King Lear* (1984), *G.B.H.* (1991) and *Jake's Progress* (1995). His stage roles include Bill Snibson in *Me and My Girl* (West End and Broadway, 1985–87, Tony award), HENRY II in *Becket* (1991–92) and title roles in *Cyrano de Bergerac* (1992–93) and the Royal Shakespeare Company's 1988 production of *Richard III*. He starred as Fagin in a London production of the musical *Oliver!* (1997, Olivier award), later reprising the role for a television adaptation of *Oliver Twist* (1999). Other television roles include Captain Pelew in *Hornblower* (1998–2003), Ben Harper in the sitcom *My Family* (2000–) and Tony Blair in *A Very Social Secretary* (2005) and *The Trial of Tony Blair* (2007). His film appearances include *Fierce Creatures* (1996) and *Divorcing Jack* (1998).

Lindsay, (Nicholas) Vachel 1879–1931
US poet
Born in Springfield, Illinois, into an evangelical family, he studied painting in Chicago and New York, and from 1906 travelled the USA like a troubadour, reciting his poems in exchange for hospitality. He won fame during the World War I era and began to attract large audiences to his readings. Highly rhythmic and influenced by ragtime, band music and the cadences of evangelical preaching, his best work appears in *General William Booth Enters Into Heaven* (1913) and *The Congo* (1914). His later volumes of verse were less successful, and, suffering from depression, he returned to Springfield and committed suicide. 📖 E Ruggles, *The West-Going Heart* (1959)

Lindwall, Ray(mond Russell) 1921–96
Australian cricketer
He was born in Sydney. A classic fast bowler, with KEITH MILLER he formed an invincible Australian opening attack in the five years after World War II. He took 228 wickets in 61 Tests, and also scored more than 1,500 runs including two Test centuries.

Lineker, Gary Winston 1960–
English footballer and commentator
Born in Leicester, he turned professional with Leicester City in 1978. He made his debut for England in 1984, moved to Everton the following year, and then, another year on, to Barcelona. In 1989 he came back to the UK when he signed for Tottenham Hotspur, and then made the last move of his playing career with his transfer to Grampus Eight of Nagoya, Japan, in 1993. He was the top scorer in the 1986 World Cup, and by the time of his retiral from international football in 1992 had scored 48 goals for England, one short of BOBBY CHARLTON's record of 49. In 1992 he was voted Footballer of the Year by the Football Writers Association. Since retiring from football he has had a career as a BBC sports presenter.

Ling, Per Henrik 1776–1839
Swedish author and fencing master
Born in Ljunga, Småland, he produced many now-forgotten romantic works on Norse themes but his gymnastic system, developed in Lund from 1804, achieved worldwide popularity as the 'Swedish System'. He founded the Gymnastic Institute in Stockholm in 1813 and became a member of the Swedish Academy in 1835.

Lingen, Ralph Robert Wheeler Lingen, Baron 1819–1905
English civil servant
Born in Birmingham and educated at Trinity College, Oxford, he became a Fellow of Balliol College, Oxford, (1841) and honorary Fellow of Trinity College, Oxford (1886). He studied law at Lincoln's Inn and was called to the Bar in 1847. He was Secretary to the Education Office (1849–69) and Permanent Secretary of the Treasury (1869–85). The controlling executive force during the creation of the elementary education system, he was always a vigilant guardian of the public purse. He issued the code implementing 'payment by results' as proposed by the Newcastle Commission on Elementary Education (1858–61) and was held by contemporaries to be responsible for the revised Code of 1862. The Revised Code was considered by many to have had deleterious, restricting effects on education in Great Britain far into the 20th century.

Linh, Nguyen Van *See* NGUYEN VAN LINH

Lini, Walter Hadye 1942–99
Vanuatuan politician and priest
Born on Pentecost Island, he trained for the Anglican priesthood in the Solomon Islands and New Zealand, and then joined the New Hebrides National Party, later renamed the Vanuaaku Pati (VP), campaigning for the return of land to the Aboriginal population. He became Chief Minister in 1979 and, on

independence in 1980, prime minister of the new republic of Vanuatu. On the bases of a controversial non-aligned foreign policy and a 'Melanesian socialist' domestic programme, he was re-elected in 1983 and 1987, and survived an unconstitutional challenge to his leadership, engineered by the now imprisoned President Sokomanu, in 1988. The Vanuaaku Pati split in 1991 and were defeated in elections that year, when a coalition government was formed. From 1995 to 1997, Lini was deputy prime minister, a post he briefly held again in 1998. He published *Beyond Pandemonium* in 1980.

Linklater, Eric 1899–1974
Scottish novelist
He was born in Penarth, Wales, the son of a shipmaster. His paternal ancestors were Orcadian and he spent much of his childhood on the islands, returning there in later life. He was educated at the grammar school and university in Aberdeen, and served in World War I as a private in the Black Watch. In the mid-1920s he worked as a journalist on the *Times of India*, returning to Aberdeen as assistant to the professor of English (1927–28). A Commonwealth fellowship took him to the USA from 1928 to 1930, after which he had a varied career as a broadcaster and a prolific writer of novels, popular histories, books for children (*The Wind on the Moon* was awarded the Carnegie Medal in 1944), plays and memoirs. *Juan in America* (1931), a picaresque classic, is his most enduring novel. His other novels include *White Maa's Saga* (1929), *Magnus Merriman* (1934), *Juan in China* (1937), *Private Angelo* (1946), *The Ultimate Viking* (1955) and *The Voyage of the Challenger* (1972). *The Man on My Back* (1941), *A Year of Space* (1953) and *Fanfare for a Tin Hat* (1970) are autobiographical. 🕮 M Parnall, *Eric Linklater: A Critical Biography* (1984)

Linley, Thomas 1732–95
English composer
Born in Wells, Somerset, he taught singing and conducted concerts at Bath early in his career. In 1775 RICHARD BRINSLEY SHERIDAN induced him to set his comic opera *The Duenna* to music. In 1776 they and a successful physician, James Ford, bought DAVID GARRICK's share of Drury Lane Theatre, London. During the next 15 years Linley was its musical director, composing songs, operas, cantatas and madrigals. Of his sons, Thomas (1756–78), a friend of MOZART, possessed great musical talent, and William (1767–1835) composed glees and songs. His daughter, Elizabeth Ann (1754–92), a singer, married SHERIDAN.

Linna, Väinö 1920–92
Finnish novelist
Born in Urjala, he worked in a factory at Tampere before starting to write. His best-known works are *Tuntematen sotilas* (1954, Eng trans *The Unknown Soldier*, 1957), a controversial novel about the Russo-Finnish War, and his trilogy *Tä ällä Pohjantähden alla* (1959–62, 'Here Under the North Star'), about Finnish independence in 1918. He gave up fiction writing in the early 1960s. 🕮 N Stormbom, *Väinö Linna* (1963)

Linnaeus, Carolus, *originally* **Carl von Linné** 1707–78
Swedish naturalist and physician
Born in Råshult, he studied botany at Uppsala University, where he was appointed lecturer in 1730. He explored Swedish Lapland (1732), publishing the results in *Flora Lapponica* (1737), then travelled in Sweden and went to Holland to study medicine (1735). In Holland he published his system of botanical nomenclature in *Systema Naturae* (1735), followed by *Fundamenta Botanica* (1736), *Genera Plantarum* (1737) and *Critica Botanica* (1737), in which he used his so-called 'sexual system' of classification based on the number of flower parts, for long the dominant system. His major contribution was the introduction of binomial nomenclature of generic and specific names for animals and plants, which permitted the hierarchical organization later known as systematics. He returned to Sweden in 1738 and practised as a physician in Stockholm, and in 1741 became professor of medicine and botany at Uppsala. His other important publications included *Flora Suecica* and *Fauna Suecica* (1745), *Philosophia Botanica* (1750) and *Species Plantarum* (1753). His manuscripts and collections are kept at the Linnaean Society in London, established in his honour in 1788. The founder of modern scientific nomenclature for plants and animals, in his time he had a uniquely influential position in natural history. 🕮 Wilfred Blunt, *The Compleat Naturalist: A Life of Linnaeus* (1971)

Linney, Romulus 1930–
US playwright
Born in Philadelphia and raised in the South, he was educated at Oberlin College and trained at the Yale School of Drama. He has taught at numerous institutions, including the universities of Pennsylvania, Princeton and Columbia. A dramatist whose works are too various to be easily classified, he has written a series of historical plays such as *The Sorrows of Frederick* (1966), *Childe Byron* (1977) and *'2'* (1990), which paint real and immediate portraits of FREDERICK WILLIAM II of Prussia, Lord BYRON and HERMANN GOERING respectively. Other plays, notably *Holy Ghosts* (1977) and *Heathen Valley* (1988), focus on life in the South. He has also written novels and numerous short stories. He has won two Obie awards, the first in 1980 for his play *Tennessee* and the second in 1992 for sustained excellence in playwriting.

Linowitz, Sol Myron 1913–2005
US lawyer, diplomat and businessman
He was born in Trenton, New Jersey. After graduating from Cornell University Law School, he worked in the Office of Price Administration in Washington (1942–44) and in the Office of the General Council Navy Dept (1942–46). He then joined the Xerox Corporation and became its chairman (1958–66). In the 1970s he served as US ambassador to the OAS (Organization of American States), and was a co-negotiator of the Panama Canal Treaties of 1977. He was personal ambassador for President JIMMY CARTER during the Middle East negotiations (1979–81). His autobiography, *The Making of a Public Man – a Memoir*, was published in 1985. In 1998 he was awarded the Presidential Medal of Freedom.

Lin Piao *See* LIN BIAO

Linton, Ralph 1893–1953
US cultural anthropologist
He was born in Philadelphia, and studied at Pennsylvania, Columbia and Harvard. His early work was in North American archaeology, but his fieldwork in Polynesia (1920–22) turned his interest towards contemporary peoples. On his return he joined the Museum of Natural History in Chicago, and became professor of sociology at Wisconsin (1928–37), Columbia (1937–46) and Yale (1946–53). During his years at Wisconsin, he developed wide interests in the study of human behaviour, culture and social organization. He pioneered the use of the terms 'status' and 'role' in social science, and exercised an important influence on the development of the culture-and-personality school of anthropology. His major work was *The Study of Man* (1936). He also wrote *The Tanala, A Hill Tribe of Madagascar* (1933), *The Cultural Background of Personality* (1945) and *The Tree of Culture* (1955).

Lin Tse-hsü *See* LIN ZEXU

Lin Yutang (Lin Yü-t'ang) 1895–1976
Chinese author and philologist
Born in Zhangzhou, Fujian (Fukien), he studied at Shanghai, Harvard and Leipzig. He became professor of English at Beijing (Peking) (1923–26) and Secretary of the Ministry of Foreign Affairs (1927). He lived mainly in the USA from 1936, and was Chancellor of Singapore University (1954–55). He is best known for his numerous novels and essays on, and anthologies of, Chinese wisdom and culture, and as co-author of the official romanization plan for the Chinese alphabet. 🕮 *My Country and My People* (1935)

Lin Zexu (Lin Tse-hsü) 1785–1850
Chinese politician
He was appointed Imperial Commissioner to deal with the problem of the increase in illegal imports of opium. At Guangzhou (Canton) he held members of the British community hostage in their warehouses until they surrendered their stocks of opium, thus precipitating a British punitive expedition. When China suffered defeat, he was exiled to Chinese Turkestan, but later recalled. He was regarded in China as the first great patriot to resist the incursions of foreign powers into China.

Lionheart, Richard the *See* RICHARD I

Liotard, Jean Etienne 1702–89
Swiss painter
Born in Geneva, he studied in Paris before travelling widely in Europe. From 1738 he spent four years in Constantinople, where he grew a long beard and adopted local dress and manners, becoming known as 'the Turkish painter'. Although he occasionally produced works in other media such as oils, it was for his detailed, lifelike pastel portraits that he was renowned. He painted many members of the European royal families, executed numerous self-portraits, and wrote a *Treatise on the Art of Painting* (1781).

Liouville, Joseph 1809–82
French mathematician
Born in St Omer, he was educated at the École Polytechnique and the École des Ponts et Chaussées, where he trained as an engineer. He taught at the École Polytechnique (1831–51), and then at the Collège de France and the University of Paris. In 1836 he founded the *Journal de Mathématiques*, still one of the leading French mathematical journals. His work in analysis continued the study of algebraic function theory begun by NIELS ABEL and CARL JACOBI, and he studied the theory of differential equations, mathematical physics and celestial mechanics. In algebra he helped to publicize the work of ÉVARISTE GALOIS, and in number theory he introduced new methods of investigating transcendental numbers.

Lipatti, Dinu 1917–50
Romanian pianist and composer
Born in Bucharest of a musical family, he studied in Paris with ALFRED CORTOT, PAUL DUKAS and NADIA BOULANGER. After World War II he established an international reputation as a skilled player of sensitive phrasing and clear, delicate tone quality, particularly known for his interpretation of J S BACH and FRÉDÉRIC CHOPIN. His career was cut short by a rare form of cancer called lymphogranulomatosis.

Lipchitz, Jacques 1891–1973
French sculptor
He was born in Druskieniki, Lithuania, of Polish Jewish parents, and studied engineering before moving to Paris (1909), where he started producing Cubist sculpture in 1914. He became a naturalized French citizen in 1925. In the 1920s he experimented with abstract forms he called 'transparent sculptures', such as *Reclining Nude with Guitar* (1928, New York). Later he developed a more dynamic style which he applied with telling effect to bronze figure and animal compositions, in works like *Mother and Child* (1930, Cleveland Museum of Art, Cleveland, Ohio) and *Benediction* (1942, private collection, New York). From 1941 he lived in the USA. He worked on the *Hagar* theme (Art Gallery of Toronto) from 1948 and on the *Spirit of Enterprise* (Philadelphia, bronze sketch in Tate Modern, London) during the 1950s.

Li Peng (Li P'eng) 1928–
Chinese politician
Born in Chengdu, Sichuan (Szechwan) Province, the son of the radical communist writer Li Shouxun (Li Shou-hsün) who was executed by the Guomindang (Kuomintang) in 1930, he was adopted by ZHOU ENLAI on his mother's death in 1939. He trained as a hydro-electric engineer and was appointed minister with responsibility for the power industry in 1981. He became a vice-premier in 1983, was elevated to the politburo in 1985 and made prime minister in 1987, serving until 1998. As a cautious, orthodox reformer, he sought to retain firm control of the economy and favoured improved relations with the Soviet Union. In 1989, he imposed martial law to counter widespread student agitation triggered by the failure of the leadership to honour promises made by party chief ZHAO ZIYANG to implement a measure of liberalizing reform. His refusal to make any concessions prompted the peaceful student occupation of Tiananmen Square, and Li Peng's action in using army units to bring the demonstration violently to an end, with the loss of around 3,000 lives, earned him international condemnation. In 1998 he became the chairman of the National People's Congress, a position he held until 2003, after which he retired from politics.

Lipman, Maureen Diane 1946–
English actress and writer
Born in Hull, East Yorkshire, she first appeared in London's West End in *Candida* (1976), won a Laurence Olivier award for her role as Miss Skillen in *See How They Run* (1984) and enjoyed success as Joyce Grenfell in her one-woman show *Re: Joyce* (1988–91, 1993–94), amongst many other stage roles. Her films include *Up the Junction* (1967), *Educating Rita* (1983), *National Lampoon's European Vacation* (1985), *Carry On Columbus* (1992) and *The Pianist* (2002). On television, she appeared in her writer husband JACK ROSENTHAL's plays *The Evacuees* (1975), *The Knowledge* (1979) and *Eskimo Day* (1996), and her other television work includes the comedy series *Agony* (1979–81), *All at No 20* (1986–87), *About Face* (1989–90) and *Agony Again* (series, 1995). She won a BAFTA advertising award for her memorable Beattie in the British Telecom commercials. Her books include *How Was it for You?* (1985), *You Got an 'Ology?* (1989), *When's It Coming Out?* (1992) and *Lip Reading* (1999). She was awarded the CBE in 1999.

Lipmann, Fritz Albert 1899–1986
US biochemist and Nobel Prize winner
Born in Königsberg, Prussia (now Kaliningrad, Russia), he studied medicine at Berlin University, and worked in biochemistry at the Carlsberg Institute, Copenhagen (1932–39), before emigrating to the USA. He joined the research staff at the Massachusetts General Hospital (1941–57) and became professor at Harvard Medical School (1949–57), and at Rockefeller University, New York, from 1957. He studied the role of phosphorus compounds in providing the energy for respiration, and identified the relationship with electron transfer potential. He demonstrated in 1950 the formation of citric acid from oxaloacetate and acetate (the first step in the HANS KREBS cycle) and found that a previously unidentified thiol cofactor is required – coenzyme A. He then isolated and partially elucidated the molecular structure of coenzyme A, for which he shared the 1953 Nobel Prize in physiology or medicine with Hans Krebs.

Li Po *See* LI BO

Lippershey, Hans c.1570–c.1619
Dutch optician
Born in Wesel (now in Germany), Lippershey was one of several spectacle-makers credited with the discovery that the combination of two separated long-focus and short-focus convex lenses can make distant objects appear nearer, and applied for a patent on this type of telescope in 1608. He also showed that if this combination is reversed it becomes a microscope.

Lippi, Filippino c.1458–1504
Italian painter
Born in Prato, Florence, he was the son of FRA FILIPPO LIPPI, and was apprenticed to BOTTICELLI, who almost certainly was a pupil of his father. In c.1484 he completed the frescoes in the Brancacci Chapel in the Carmine, Florence, left unfinished by MASACCIO. Other celebrated series of frescoes were painted by him between 1487 and 1502, one in the Strozzi Chapel in S Maria Novella and one in the Caraffa Chapel, S Maria sopra Minerva, in Rome. Easel pictures painted by him are *The Virgin and Saints* (c.1485, National Gallery, London), *The Adoration of the Magi* (1495, Uffizi, Florence) and *The Vision of St Bernard* (1481–86, Badia, Florence). 🕮 Katherine B Nielson, *Filippino Lippi* (1938)

Lippi, Fra Filippo, *called* **Lippo** c.1406–1469
Italian religious painter
He was born in Florence. An orphan, he was sent to the monastery of S Maria del Carmine in Florence where he became a Carmelite monk. In 1424 he became a pupil of MASACCIO, who was painting the frescoes in the Brancacci Chapel there. The style of his master can be seen in his early work, eg the frescoes *The Relaxation of the Carmelite Rule* (c.1432). Of his stay in Padua (c.1434) no artistic record has survived. The *Tarquinia Madonna* (1437), his first dated painting, shows Flemish influence. His greatest work, on the choir walls of Prato Cathedral, was begun in 1452. Between 1452 and 1464 he abducted a nun and was released from his monastic vows by Pope PIUS II in order to marry her. She was the model for many of his Madonnas and the mother of his son, FILIPPINO LIPPI. His later works are deeply religious and include the series of *Nativities*. He was working in the cathedral at Spoleto when he died. He was immortalized in ROBERT BROWNING's poem 'Fra Lippo Lippi' in *Men and Women* (1855). 🕮 C Strutt, *Fra Filippo Lippi* (1901)

Lippincott, Joshua Ballinger 1813–86
US publisher
He was born in Juliustown, New Jersey, had a bookseller's business in Philadelphia (1834–36), and then founded his well-known publishing firm. He founded *Lippincott's Magazine* in 1868.

Lippmann, Gabriel Jonas 1845–1921
French physicist and Nobel Prize winner
Born in Hollerich, Luxembourg, he was appointed professor of mathematical physics at the Faculty of Sciences in Paris in 1883, professor of experimental physics at the Sorbonne in 1886, and director of the Laboratory of Physical Research. His research in electro-capillarity in the laboratory of GUSTAV KIRCHHOFF led to his invention of a very sensitive mercury capillary electrometer. His many contributions to instrument design include an astatic galvanometer, the coelostat with which a region of the sky can be photographed for an extended period without apparent movement, and a new form of seismograph. For his technique of colour photography based on the interference phenomenon, subsequently also used by Lord RAYLEIGH, he was awarded the 1908 Nobel Prize in physics. He was elected FRS the same year.

Lister, Joseph Lister, 1st Baron 1827–1912
English surgeon, the 'father of antiseptic surgery'

Lister was born in Upton, Essex, the son of the microscopist Joseph Jackson Lister. After graduating from London University in arts (1847) and medicine (1852), he became house surgeon at Edinburgh Royal Infirmary. After holding chairs in Glasgow, Edinburgh and London, he was elected president of the Royal Society (1895–1900). In addition to important observations on the coagulation of the blood and the microscopical investigation of inflammation, his great work was the introduction of his antiseptic system (1867), which revolutionized modern surgery.

His system was a development of the work of LOUIS PASTEUR. Lister began soaking his instruments and surgical gauzes in carbolic acid, a well-known disinfectant. His early antiseptic work was primarily concerned with the treatment by surgery of compound fractures and tuberculous joints; both conditions would previously have been dealt with by amputation.

The procedures Lister developed made it possible for surgeons to open the abdominal, thoracic and cranial cavities without fatal infections resulting. He worked later in his life on the causes of wound infection and was an ardent advocate of the value of experimental science for medical and surgical practice. He was the first medical man to be elevated to the peerage.

📖 Martin Goldman, *Lister Ward* (1987); Richard B Fisher, *Joseph Lister, 1827–1912* (1977); Rickman John Godlee, *Lord Lister* (1917).

Lippmann, Walter 1889–1974
US journalist
Born in New York, he was educated at Harvard, and was on the editorial staff of the *New York World* until 1931, then became a special writer for the New York *Herald Tribune*. His daily columns became internationally famous and he won many awards, including the Pulitzer Prize for international reporting (1962). Among his best-known books are *The Cold War* (1947) and *Western Unity and the Common Market* (1962). 📖 Larry Adams, *Walter Lippmann* (1977)

Lippo *See* LIPPI, FRA FILIPPO

Lipscomb, William Nunn 1919–
US inorganic chemist and Nobel Prize winner
Born in Cleveland, Ohio, he studied at Kentucky and the California Institute of Technology (Caltech), and was appointed professor of chemistry at Harvard in 1959. He deduced the molecular structures of a curious group of boron compounds by X-ray crystal diffraction analysis in the 1950s and then went on to develop novel theories for chemical bonding in these compounds. His ingenious experimental and theoretical methods were later applied by him and others to a variety of related chemical problems. He received the 1976 Nobel Prize in chemistry.

Lipton, Sir Thomas Johnstone 1850–1931
Scottish businessman and philanthropist
Born in Glasgow of Irish parents, he began work as an errand-boy at the age of nine, and in 1865 went to the USA, where he worked successively on a tobacco plantation, in the rice fields and in a grocer's shop. Returning to Glasgow, he opened his first grocer's shop (1870, in Finnieston), which was rapidly followed by many others. They prospered and made him a millionaire at the age of 30. He bought tea plantations and rubber estates, factories and packing houses, and made generous donations to various charities.

Li Shih-chen *See* LI SHIZEN

Li Shizen (Li Shih-chen) 1518–93
Chinese pharmaceutical naturalist and biologist
A talented physician, he was appointed to the Imperial Medical Academy. He decided to produce, single-handed and without imperial authority, an encyclopedia of pharmaceutical natural history. The work took 30 years and involved much travelling to collect and study specimens. He compiled the *Ben Cao Gang Mu* ('Great Pharmacopoeia'), completed in 1578 and published in 1596. It gives an exhaustive description of 1,000 plants and 1,000 animals, and includes more than 11,000 prescriptions. It is much more than a pharmacopoeia, however, as it treats mineralogy, metallurgy, physiology, botany and zoology as sciences in their own right. By categorizing diseases, it also forms a system of medicine. He recorded many instances of the sophistication of Chinese medicine, for example the use of mercury–silver amalgam for tooth fillings, not introduced to Europe until the 19th century. He adopted a system of priority in naming plants and animals, assigning the first name as the standard term, and treating later names as synonyms.

Li Si (Li Ssu) c.280–208 BC
Chinese adviser to the state of Qin (Ch'in)
As chief counsellor to the first Emperor SHI HUANGDI from 221 to 210 BC, he was the principal architect of the harsh system of centralized control imposed throughout the empire. Laws, weights and measures, and the written script were all standardized. He was also associated with the notorious 'burning of the books and burial of the scholars' in 213 BC, when Confucian texts were destroyed and many scholars were executed. As a result of factional rivalries at court, Li Si himself was executed two years after the death of Shi Huangdi.

Lisle, Alicia, *née* **Beckenshaw** c.1614–1685
English Parliamentarian
The widow of one of CROMWELL's lords, she was beheaded at Winchester by order of Judge JEFFREYS for sheltering two of the Duke of MONMOUTH's rebels after the Battle of Sedgemoor. At CHARLES I's execution she said that her 'blood leaped within her to see the tyrant fall'.

Lisle, Claude Joseph Rouget de *See* ROUGET DE LISLE, CLAUDE JOSEPH

L'Isle, 1st Viscount de *See* DE L'ISLE, WILLIAM PHILIP SIDNEY, 1ST VISCOUNT

Lissajous, Jules Antoine 1822–80
French physicist
He was professor at the Collège St Louis, Paris, and in 1857 invented the vibration microscope which showed visually the *Lissajous figures* obtained as the resultant of two simple harmonic motions at right angles to one another. His researches extended to acoustics and optics. His system of optical telegraphy was used during the Siege of Paris (1871).

Lissauer, Ernst 1882–1937
German poet and dramatist
He was born in Berlin, and much of his writing had a strong nationalist flavour. The poem cycle *1813* (1913) is a eulogy on the Prussian people in their fight to remove NAPOLEON I from their land, as is the successful drama *Yorck* (1921) about the Prussian general. The poem *Hassgesang gegen England* (1914, 'Hate-Song against England') achieved popularity in wartime Germany with its well-known refrain 'Gott strafe England' ('God Punish England'). Other works include a play about GOETHE, *Eckermann* (1921); poems on ANTON BRUCKNER, *Gloria Anton Bruckners* (1921); a critical work, *Von der Sendung des Dichters* (1922, 'The Vocation of a Poet'); and some volumes of verse.

Lissitzky, El(iezer Markovich) 1890–1941
Russian painter and designer
Born in Smolensk, he trained in engineering and architecture. In 1919 MARC CHAGALL appointed him professor of architecture and graphic art at the Art School in Vitebsk, where he came under the influence of his colleague KASIMIR MALEVICH, then at the forefront of the avant-garde. Lissitzky produced a remarkable series of abstract works, called collectively *Proun*, in which he combined flat rectilinear forms with dramatic architectonic elements. During the 1920s he lived and travelled in Germany and Switzerland, transmitting Russian ideas to the West through exhibitions, writings, and contact with leading painters, architects and teachers, most importantly LÁSZLÓ MOHOLY-NAGY.

Li Ssu *See* LI SI

Lister, Joseph, Lord *See panel above*

Lister (of Masham), Samuel Cunliffe Lister, 1st Baron 1815–1906
English inventor
Born in Bradford, he worked for a Liverpool firm of merchants, then in 1837 he and his brother were put in charge of a worsted mill built by their father at Manningham. Samuel applied himself to the improvement of textile machinery, inventing in 1845 a wool-comber. He subsequently bought up all his

competitors and made a fortune, at the same time bringing prosperity to Bradford and the wool trade of Australia and New Zealand. Later he spent a quarter of a million pounds developing a machine to spin waste silk and was nearly bankrupt by the time it was commercially successful, making him a second fortune. Among his 150 other inventions were a swivel shuttle, a velvet loom, and in 1848, anticipating the patent of GEORGE WESTINGHOUSE by 21 years, a compressed air brake for railways. A determined business man, he was also a generous benefactor, presenting Bradford with, among other gifts, Lister Park.

Liston, Sonny, *originally* **Charles Liston** 1932–70
US boxer
Born in St Francis County, Arkansas, he took up boxing in prison while serving a sentence for robbery. He turned professional in 1953 and beat Floyd Patterson in 1962 to win the world heavyweight championship, but lost his crown in 1964 to the young Cassius Clay. A year later Clay, by then known as MUHAMMAD ALI, defeated Liston again and memorably taunted the prostrate ex-champion, a pose captured in one of boxing's most famous photographs. Liston continued to box for most of his life. 🕮 Nick Tosches, *The Devil and Sonny Liston* (2000)

Liszt, Franz 1811–86
Hungarian composer and pianist
Born in Raiding, he first played in public aged nine, then studied and played in Vienna and Paris, touring widely in Europe as a virtuoso pianist. In the late 1830s he lived with the Comtesse D'AGOULT, by whom he had three children (Cosima married RICHARD WAGNER), and in 1847 met Princess Carolyne zu Sayn-Wittgenstein with whom he lived until his death. In 1848 he went to Weimar, where he directed opera and concerts, composed and taught, making it the musical centre of Germany. He later received minor orders in the Catholic Church (1865) and was known as Abbé. His works include twelve symphonic poems, masses, two symphonies and a large number of piano pieces. All his original compositions have a very distinct, sometimes a very strange, individuality. In his twelve Weimar symphonic poems he created a new form of orchestral music. As a teacher of a new generation of pianists and the mentor of many young composers he was generous. The vocal and piano works of his last years were experimental and prophetic of 20th-century developments. His literary works on music include monographs on his friends FRÉDÉRIC CHOPIN and Robert Franz (1815–92), and the music of the gypsies.

Li Ta-chao *See* LI DAZHAO

Lithgow, Sir James 1883–1952
Scottish shipbuilder
Born in Port Glasgow, Strathclyde, he was educated locally, then at Glasgow Academy and in Paris. Both he and his brother Henry chose to enter the family engineering firm in Port Glasgow. They became partners in 1907 and a year later, on their father's death, assumed full joint ownership and control. There followed a remarkable collaboration between the brothers which led to the creation of the greatest industrial and financial power ever seen in Scotland. By 1920 they had forged a diversified and integrated empire with interests in coal, iron and steel, marine engineering and shipowning, as well as shipbuilding. Their shipyards on the lower Clyde remained, however, the fulcrum. Lithgow was also central to the rationalization of the shipbuilding industry in the late 1920s and 1930s, and played an influential role in the steel industry. During a term as president of the Federation of British Industries (1930–32) he formed the Scottish National Economic Development Council (1931–39), acting as chairman. He was continuously involved on the national and international scene, and may be regarded as one of Scotland's greatest industrialists.

Little, Alastair 1950–
British chef
He was educated at Cambridge and in 1985 became chef/proprietor of the London restaurant Alistair Little, winner of *The Times* Restaurant of the Year 1993. Formerly a judge on BBC television's *Masterchef*, he has now stepped back from television work. His book *Keep It Simple* (1993) won the 1994 Glenfiddich award for Best Food Book.

Little, Clarence Cook 1888–1971
US pioneer of mammalian and cancer genetics
Born in Brookline, Massachusetts, he was educated at an agricultural college of Harvard University, where he established the first inbred strain of laboratory mice. Later he worked at Cold Spring Harbor (1918–22), where he began inbreeding several other strains of mice. He was appointed president of the University of Maine (1922–25) and of the University of Michigan (1925–29), then established Roscoe B Jackson Memorial Laboratory on Mount Desert Island, Maine, where he served as director from 1929 to 1956. The use of inbred mouse strains was an essential preliminary to much biomedical discovery. Without the work of Little our understanding of cancer, transplantation, drug action and multigenic conditions would have been much delayed.

Little Richard, *originally* **Richard Wayne Penniman** 1932–
US rock-and-roll singer and pianist
He was born in Macon, Georgia. His early recordings epitomized the hedonistic, sexually potent facets of rock and roll, and his wild piano style and manic songs were a model for many later performers, as were his outrageous, sexually ambiguous clothes and make-up. Raised as a Seventh-day Adventist, he sang in church choirs throughout his childhood, and screams and yells derived from gospel music were to become an important part of his recorded sound. He left home at 14, and started singing professionally with itinerant medicine shows, becoming well known on the southern vaudeville circuit. 'Tutti Frutti' (1955), a salacious drinking song with its lyrics cleaned up by writer Dorothy La Bostrie, was his breakthrough hit. In the late 1950s he turned to religion, and most of his recordings from 1958 to 1964 were of gospel songs. In the mid-1960s he recorded with a succession of labels and 'Whole Lot Of Shaking Goin' On' and 'Lawdy Miss Clawdy' are among the better songs from this period. Since the 1970s he has been a fixture on the rock and roll revival circuit, often parodying himself in films, cartoons and children's rock recordings. Still an ordained Pentecostal minister, he has performed wedding ceremonies for numerous celebrities. He survived a serious car accident in 1985, and continues to perform live and sing. 🕮 C White, *The Life and Times of Little Richard* (3rd ed, 2003)

Littleton or **Lyttleton, Sir Thomas** c.1415–1481
English judge and jurist
He was born in Bromsgrove, Worcestershire. He was appointed Recorder of Coventry (1450), King's Sergeant (1455) and Judge of Common Pleas (1466), and in 1475 was made a Knight of the Bath. His reputation rests on his treatise on *Tenures*, written in law French, first printed in London (c.1481), translated into English about 1500 and the first book giving an authoritative account of landholding. This was the text on which Sir EDWARD COKE commented in his *Coke upon Littleton* (1628).

Littlewood, Joan Maud 1914–2002
English theatre director
After training at RADA, she co-founded Theatre Union with EWAN MACCOLL. An experimental company in Manchester (1935), it became the Theatre Workshop (1945), and opened at the Theatre Royal in Stratford East, London, with *Twelfth Night* (1953). The group quickly won acclaim and was invited to represent Great Britain at the Théâtre des Nations in Paris (1955, 1956), and played at the Moscow Art Theatre. Littlewood also directed the first British production of Brecht's *Mother Courage* in Barnstaple (1955), in which she played the title role. The ideology of Theatre Workshop company was aggressively left-wing, and their artistic policy revolved around a fresh, political approach to established plays and the staging of new, working-class plays, notably BRENDAN BEHAN's *The Quare Fellow* (1956), SHELAGH DELANEY's *A Taste of Honey* (1958), and *Fings Ain't Wot They Used T'Be* (1959). In 1963 she devised and directed her masterpiece, the musical *Oh! What a Lovely War* (filmed 1969). She was made Commandeur, L'Ordre des Arts et des Lettres, in 1986 and received the Arts Council of Great Britain Woman of Achievement in the Arts award in 1993. She is considered a pioneer of polemical theatre. 🕮 *Joan's Book* (1994)

Littlewood, John Edensor 1885–1977
English mathematician
Born in Rochester, Kent, he was educated at Trinity College, Cambridge, and after lecturing in Manchester (1907–10) he returned to Cambridge as a Fellow of Trinity and remained there for the rest of his life. At this time he started to collaborate with GODFREY HARDY, and a stream of joint papers on summability theory, Tauberian theorems, FOURIER series, analytic number theory and the RIEMANN zeta function followed over the next 35 years. Littlewood was elected to the Rouse Ball chair of mathematics at Cambridge in 1928. He retired in 1950, but was still publishing mathematical papers at the age of 85. His reminiscences, *A Mathematician's Miscellany*, were published in 1953.

Littré, Maximilien Paul Émile 1801–81
French lexicographer and philosopher
Born in Paris, he became a doctor but abandoned medicine for philology, and his translation of HIPPOCRATES procured his

election in 1839 to the Academy of Inscriptions. An ardent democrat, he fought on the barricades in 1830, was one of the principal editors of the *National* down to 1851, and became an enthusiastic supporter of AUGUSTE COMTE, after whose death in 1857 he became the leader of the positivist school. *La Poésie homérique et l'ancienne poésie française* (1847) was an attempt to render Book I of the *Iliad* in the style of the trouvères. In 1854 he became editor of the *Journal des savants*. His splendid *Dictionnaire de la langue française* (1863–72, 'Dictionary of the French Language') did not prevent the Academy from rejecting its author (1863), whom Bishop Félix Dupanloup (1802–78) denounced as holding impious doctrines. In 1871 LÉON GAMBETTA appointed him professor of history and geography at the École Polytechnique. He was chosen representative of the Seine department in the National Assembly, and in December 1871 the Academy at last admitted him.

Litvinov, Maksim Maksimovich 1876–1951
Soviet politician and diplomat
Born a Polish Jew in Bielostok, Russian Poland, he joined the Social Democratic Party in 1898 but in 1903 joined in revolutionary activities with LENIN. He was exiled to Siberia, but escaped. At the Revolution he was appointed Bolshevik ambassador in London (1917–18). He became deputy People's Commissar for Foreign Affairs in 1921 and Commissar (1930–39), achieving US recognition of Soviet Russia in 1934. He was dismissed in 1939 before the German–Soviet non-aggression pact, but reinstated after the German invasion of Russia. As ambassador to the USA (1941–43) and Vice-Minister of Foreign Affairs (1943–46), he strongly advocated co-operation between the USSR and the West, and world disarmament.

Liu Shaoqi (Liu Shao-ch'i) 1898–?1969
Chinese political leader
Born in Yinshan, Hunan Province, into a land-owning family, he went to school with the future leader, MAO ZEDONG. Educated at Changsha and Shanghai (where he learned Russian), he went to Moscow to study (1921–22), joined the Chinese Communist Party, and returned to China to become a party labour organizer in Shanghai. He was elected to the politburo in 1934, became its foremost expert on the theory and practice of organization and party structure, and wrote *How to Be a Good Communist* (1939, originally a series of lectures). In 1943 he became Secretary-General of the Party, Vice-Chairman (1949), and Chairman of the People's Republic of China in 1958, second only to Mao Zedong. He advocated a freer market economy and financial incentives, but during the Cultural Revolution (1966–69) he was denounced as a bourgeois renegade, stripped of all positions in 1967 and banished to Henan (Honan) Province, while LIN BIAO emerged as Mao's heir-apparent. He reportedly died in detention. He was posthumously rehabilitated in 1980.

Liutprand of Cremona, *also spelt* **Luitprand** c.922–972
Italian prelate and historian
Born in Pavia, he passed from the service of BERENGAR II, King of Italy, to that of the Emperor OTTO I. Otto made him Bishop of Cremona, and sent him on an embassy to Constantinople (Istanbul). His *Antapodosis* ('Revenge') discusses history from 886 to 950. *De Rebus Gestis Ottonis* covers 960–64, and *Relatio de Legatione Constantinopolitana* ('Story of a Mission to Constantinople') is a satire on the Greek court.

Lively, Penelope Margaret 1933–
English novelist and children's author
She was born in Cairo, and read history at Oxford. A preoccupation with the relation of the present and the past, and a vivid sense of time and place, form the central thread of much of her writing, notably in her children's books *The Ghost of Thomas Kempe* (1973, Carnegie Medal) and *A Stitch in Time* (1976, Whitbread Children's Book Award). Novels written for adults include *The Road to Lichfield* (1977), *Judgement Day* (1980), *Moon Tiger* (1987, Booker Prize), about the reminiscences of an intellectual old lady, *Cleopatra's Sister* (1993), set in a fictitious country on the North African coast, and *Spiderweb* (1998). Many short stories are collected in *Pack of Cards* (1986). She has also written *Oleander, Jacaranda* (1994), an autobiography of her early years in Egypt, *A House Unlocked* (2001), a reflection on her family's house in Somerset, the novel *The Photograph* (2003) and the experimental memoir *Making It Up* (2005). She was awarded the OBE in 1989 and the CBE in 2002.

Livermore, Mary Ashton, *née* **Rice** 1820–1905
US reformer
She was born in Boston. A teacher by training, she married the Rev Daniel P Livermore in 1845, and became active in the women's suffrage movement. She was founder editor of *The Agitator* (1869), which was later merged into the *Woman's Journal*.

Liverpool, Robert Banks Jenkinson, 2nd Earl of 1770–1828
English politician
Born in London, he was the son of the 1st Earl (1727–1808). Educated at Charterhouse and Christ Church, Oxford, he entered parliament in 1790 as member for Rye. A Tory with Liberal ideas on trade and finance, he became a member of the India Board in 1793, and in 1801 as foreign secretary negotiated the unpopular Treaty of Amiens. In 1803 he was created Lord Hawkesbury, and on WILLIAM PITT's return to power he went to the Home Office (1804–06). In 1807 he again took the Home Office, and the next year succeeded his father as Earl of Liverpool. In PERCEVAL's ministry of 1809 he was Secretary for War and the Colonies. In 1812 he formed an administration, regarded as reactionary, which lasted for nearly 15 years. He was a Free Trader, and ultimately sought to liberalize the tariff. He united the old and the new Tories at a critical period.

Livia, Drusilla, *later called* **Julia Augusta** 58 BC–AD 29
Roman empress
She was the third wife of Emperor AUGUSTUS, whom she married in 38 BC after divorcing her first husband Tiberius Claudius Nero. From her first marriage she had two children, TIBERIUS the future emperor (who succeeded Augustus), and Nero Claudius DRUSUS, but none from her marriage with Augustus. She was believed to have influence over Augustus, cunningly promoting the interests of her sons at the expense of Augustus's kinsmen, by fair or foul means. She was adopted into the Julian family by Augustus at his death in AD 14, and changed her name to Julia Augusta. Relations with her son Tiberius after his accession became strained, as she sought to exert influence, and when she died he did not execute her will or allow her to be deified. She was deified (AD 42) by her grandson CLAUDIUS I. 🕮 Hugo Willrich, *Livia* (1911)

Livingston
US political dynasty
The family was descended from the 5th Lord Livingston, guardian of MARY, QUEEN OF SCOTS, and from his grandson, John Livingstone (1603–72), a minister of Ancrum who was banished for refusing the Oath of Allegiance to CHARLES II, and who from 1663 was pastor of the Scots kirk at Rotterdam. His son Robert (1654–1728) went to America in 1673, settled at Albany, and received land. Of his grandsons, Philip (1716–78) signed the Declaration of Independence, and William (1723–90) became the first governor of New Jersey (1776–90) and had a son who became a justice of the Supreme Court. Robert R Livingston (1746–1813), great-grandson of the first Robert, was born in New York, and admitted to the Bar in 1773. Sent to Congress in 1775, he was one of the five charged with drawing up the Declaration of Independence, and until 1801 was the Chancellor of New York state. As minister plenipotentiary at Paris he negotiated the cession of Louisiana. He enabled ROBERT FULTON to construct his first steamer, and introduced to the USA the use of sulphate of lime as a manure, and the merino sheep. Edward Livingston (1764–1836), also a great-grandson of the first Robert, was born at Clermont, New York, and called to the Bar in 1785. He sat in Congress from 1795 until 1801, when he became US district attorney for New York, and Mayor of New York, but in 1803, owing to a subordinate's misappropriations, he found himself in debt to the federal government. He handed over his property to his creditors, and in 1804 settled in New Orleans, where he obtained lucrative practice at the Bar. During the second war with Great Britain he was aide-de-camp to General JACKSON, and from 1822 to 1829 he represented New Orleans in Congress. In 1823–24 he systematized the civil code of Louisiana. His criminal code was completed, but not directly adopted. In 1829 Livingston was elected to the Senate, and in 1831 appointed Secretary of State. In 1833 he went to France as plenipotentiary.

Livingstone, David 1813–73
Scottish missionary and traveller
He was born in Blantyre, Lanarkshire, and between the ages of ten and 24 he worked in a cotton factory there. A pamphlet by German missionary Karl Gutzlaff (1803–51) kindled his desire to become a missionary. After studying medicine in London he was attracted to Africa by ROBERT MOFFAT, whose daughter Mary he married in 1844. He was ordained under the London Missionary Society in 1840, and for several years worked in Bechuanaland (now Botswana). Repulsed by the Boers in an effort to plant native missionaries in the Transvaal, he travelled northwards, discovered Lake Ngami, and determined to open

trade routes east and west. The journey (1852–56) was accomplished with a handful of followers, amid great difficulties, but a vast amount of valuable information was gathered respecting the country, its products and the native tribes. He discovered the Victoria Falls of the Zambezi. He was welcomed home with extraordinary enthusiasm, and published his *Missionary Travels* (1857). In 1858 he was appointed chief of a government expedition for exploring the Zambezi and explored the Zambezi, Shiré and Rovuma, discovered Lakes Shirwa and Nyasa, and concluded that Lake Nyasa and its neighbourhood was the best field for commercial and missionary operations, though he was hampered by the Portuguese authorities, and by the discovery that the slave trade was extending in the district. The expedition was recalled in 1863. At his own cost he journeyed 100 miles westwards from Lake Nyasa, then navigated his little steamer to Bombay and returned to England in 1864. His second book, *The Zambesi and its Tributaries* (1865), was designed to expose the Portuguese slave traders, and to find means of establishing a settlement for missions and commerce near the head of the Rovuma. The Royal Geographical Society asked him to return to Africa and settle a disputed question regarding the watershed of central Africa and the sources of the Nile. In 1866 he started from Zanzibar, pressed westwards amid innumerable hardships, and in 1867–68 discovered Lakes Mweru and Bangweulu. Obliged to return for rest to Ujiji, he struck westwards again as far as the River Lualaba, thinking it might be the Nile; however, it afterwards proved to be the Congo. On his return after severe illness to Ujiji, Livingstone was found there by HENRY MORTON STANLEY, sent to look for him by the *New York Herald*. Determined to solve the problem, he returned to Bangweulu, but died in Old Chitambo (now in Zambia). His faithful followers embalmed his body, and carried it to the coast. It was taken to England, and buried in Westminster Abbey. 🕮 George Seaver, *David Livingstone: His Life and Letters* (1957)

Livingstone, Ken(neth) Robert 1945–
English politician
He was born in Lambeth, London, and educated at Tulse Hill Comprehensive School and Phillipa Fawcett College of Education. He worked as a technician at the Chester Beatty Cancer Research Institute from 1962 until devoting himself to a political career. After joining the Labour Party in 1969, he worked as a London regional executive (1974–86) and served as a Lambeth and Camden local councillor (1971–78). In 1973, he was elected to the Greater London Council (GLC), becoming leader in 1981 and serving until its abolition in 1986. He transformed the GLC from being a significant but largely administrative element in the capital's political infrastructure into an instrument of left-wing policies and a key weapon in the party's barracking of national Conservative policies. In 1987, Livingstone won election to parliament as MP for Brent East. In the 2000 London mayoral election, he stood as an independent – an act that led to his expulsion from the Labour party – and went on to win. He was readmitted to the party in time to be re-elected in 2004.

Livius Andronicus fl.3rd century BC
Roman writer
He was probably a Greek by birth, from Tarentum. He was taken prisoner at the Roman capture of the city and sold as a slave in Rome in 272 BC, but later freed by his master. He translated the *Odyssey* into Latin Saturnian verse, and wrote tragedies, comedies and hymns based on Greek models. Only fragments are extant. He is regarded as the father of Roman dramatic and epic poetry. 🕮 S Mariotti, *Livio Andronico e la traduzione artistica* (1952)

Livy, *properly* **Titus Livius** 59 BC–AD 17
Roman historian
Born in Patavium (Padua), he settled in Rome in about 29 BC and was admitted to the court of AUGUSTUS, but took no part in politics. His history of Rome from her foundation to the death of Nero Claudius DRUSUS (9 BC) comprised 142 books, of which 35 have survived and of these three are imperfect. Livy can be placed in the forefront of Latin writers, and his work was a major influence on subsequent historical writing. 🕮 P G Walsh, *Livy, His Historical Methods* (1961)

Li Xiannian (Li Hsien-nien) 1905–92
Chinese politician
Born into a poor peasant family in Hubei (Hupeh) Province, he worked as a carpenter before serving with the Nationalist Guomindang (Kuomintang) forces in 1926–27. After joining the Communist Party (CCP) in 1927 he established the Oyuwan Soviet (people's republic) in Hubei, participated in the Long March (1934–36) and was a military commander in the war against Japan and in the civil war. He was inducted into the CCP politburo and secretariat in 1956 and 1958, but fell out of favour during the 1966–69 Cultural Revolution. He was rehabilitated, as Finance Minister, by ZHOU ENLAI in 1973, and later served as state president under DENG XIAOPING (1983–88). He was also a member of the Communist Party Political Bureau Standing Committee (1982–87) and chairman of the People's Political Consultative Conference, a post he held until the time of his death.

Llewellyn, Richard, *pseudonym of* **Richard Doyle Vivian Llewellyn Lloyd** 1907–83
Welsh writer
He was born in St David's, Pembrokeshire. After service with the regular army and a short spell as a film director, he established himself as a bestselling novelist with *How Green was my Valley* (1939), a novel about a Welsh mining village. Later works include *None but the Lonely Heart* (1943), *The Flame of Hercules* (1957), *Up into the Singing Mountain* (1963), *Green, Green My Valley Now* (1975) and *I Stand On A Quiet Shore* (1982).

Lliboutry, Louis Antonin François 1922–
French Earth scientist and glaciologist
Born in Madrid, Spain, he studied mathematics and physics at the École Normale Supérieure in Paris, then worked on piezomagnetism at Grenoble, and became associate professor at the University of Chile, Santiago (1951–56). He mapped all the unknown glaciers of the Chilean Andes before returning to Grenoble, where he studied field glacier dynamics and mass balances, with particular interest in the critical physical conditions necessary for the formation of glaciers and ice sheets. In plate tectonics he derived a predictive theorem for plate velocities relative to the mantle. He campaigned for the establishment of the Laboratory of Glaciology and Environmental Geophysics, of which he became head (1964–83). His publications include the transdisciplinary *Géophysique et Géologie* (1999, Eng trans 2000).

Llorente, Juan Antonio 1756–1823
Spanish priest and historian
Born in Rincón del Soto, he became secretary to the Inquisition in 1789 and was made canon of Toledo in 1806. In 1809, when the Inquisition was suppressed, JOSEPH BONAPARTE placed all its archives in his hands and he went to Paris, where the *Histoire critique de l'inquisition d'Espagne* (1817–18) appeared. Its value was recognized at once, but it provoked bitter feeling, and Llorente was ordered to quit France.

Llosa, Mario Vargas *See* VARGAS LLOSA, MARIO

Lloyd, Christopher, *also called* **Christo** 1921–2006
English gardener and writer
Born at Great Dixter, Sussex, a manor house with gardens designed by SIR EDWIN LUTYENS, he was educated at Rugby, Cambridge and Wye College before returning to his birthplace and opening its gardens to the public. A bold gardener and authoritative writer, his columns in *Country Life* and *The Guardian*, and books such as *The Well-Tempered Garden* (1970) and *Foliage Plants* (1973), made him one of Britain's best-known writers on plants and garden design. He was awarded the OBE in 2000.

Lloyd, Clive Hubert 1944–
West Indian cricketer
Born in Georgetown, Guyana, he was educated on a scholarship to Chatham High School, Georgetown. He worked as a hospital clerk until his first West Indies Test cap in 1966, then went to England to play for Haslingden in the Lancashire League before joining Lancashire (1968–86). A magnificent batsman and fielder, he played in 110 Test matches (captain 1974–85), scoring 7,515 runs and making 19 centuries. He captained the West Indies in 74 Test matches (a record), losing only 12 and including a run of 26 matches without defeat. He also captained the West Indies sides which won the World Cup in 1975 and 1979. He later became a British citizen, and was awarded the CBE in 1992. He managed the national team in the late 1990s and is currently an ICC match referee.

Lloyd, Edward d.c.1730
English coffee-house keeper
From 1688 until 1726 he owned a coffee house in Lombard St, London, after which is named 'Lloyd's', the London society of underwriters. His coffee house became a haunt of merchants and ship-owners, and for them Lloyd started his *Lloyd's News*, later to become *Lloyd's List*.

Lloyd, George Walter Selwyn 1913–98
English composer and conductor
He was born in St Ives, Cornwall, and his 3rd Symphony and two operas (*Iernin*, 1935, and *The Serf*, 1938) received London performances before he served during World War II in the Royal Marines Band. He was shell-shocked in 1942. Another opera, *John Socman*, followed (1951), but owing to illness he retired to Devon as a market gardener, and for a time composed only intermittently. With improved health he produced a large body of concertos and symphonies (No 12, 1990) in a colourful if conventional style. His publications include *English Heritage* (1990) and *Floating Cloud* (1993).

Lloyd, Harold Clayton 1893–1971
US film comedian
Born in Burchard, Nebraska, he was stagestruck from an early age and worked extensively as an extra from 1913. Gradually, he created his own character of the shy, sincere, bespectacled boy-next-door, developing a reputation for highly demanding stunts in works like *High and Dizzy* (1920) and, most famously, *Safety Last* (1923). He enjoyed a run of hits such as *Why Worry?* (1923) and *Speedy* (1928), but was less successful in the sound era and retired after *Mad Wednesday* in 1947. He published an autobiography, *An American Comedy*, in 1928 and received an honorary Academy Award in 1952. 🕮 Adam Reilly, *Harold Lloyd: The King of Daredevil Comedy* (1977)

Lloyd, Henry Demarest 1847–1903
US journalist and reformer
Born in New York City, he was a graduate of Columbia University. He became a school lecturer in economics, studied law and was called to the Bar in 1869. From 1872 he worked on the Chicago *Tribune* as a reporter and on the editorial staff. He was reviled for pointing to the injustice of the trials of the Haymarket anarchists, four of whom were hanged for supposedly throwing a bomb on 4 May 1886. He became dedicated to exposure of capitalist abuses and his masterpiece, *Wealth Against Commonwealth* (1894), was a searing indictment of how JOHN D ROCKEFELLER built up Standard Oil. A strong advocate of co-operative methods, he visited New Zealand, reporting on it in *A Country without Strikes* (1900), and supported the Populist Party, denouncing its fusion with the Democrats and the 'free silver' movement under WILLIAM JENNINGS BRYAN.

Lloyd, Marie, *originally* **Matilda Alice Victoria Wood** 1870–1922
English music-hall entertainer
Born in London, she made her debut as Bella Delmare at the Royal Eagle Music Hall, London (later The Grecian), in 1885. After choosing a new stage name, she had her first success with the song 'The Boy I Love Sits Up in the Gallery'. She went on to become one of the most popular music-hall performers of all time, specializing in witty portrayals of working-class Londoners. She appeared in music halls throughout the country, and in the USA, South Africa and Australia, performing until a few days before her death. Among her most famous songs were 'Oh, Mr Porter', 'My Old Man Said Follow the Van' and 'I'm One of the Ruins that Cromwell Knocked About a Bit'. 🕮 Richard Anthony Baker, *Marie Lloyd: Queen of the Music Halls* (1991)

Lloyd, Selwyn Brooke *See* SELWYN-LLOYD, BARON

Lloyd-George (of Dwyfor), David Lloyd George, 1st Earl 1863–1945
Welsh Liberal statesman
He was born in Manchester of Welsh parentage. At the age of two when his father died, his family were taken to Llanystumdwy, near Criccieth, Wales, the home of his uncle Richard Lloyd who recognized the latent brilliance in the young Lloyd George, and took responsibility for his education. Lloyd George thus acquired his religion, his industry, his vivid oratory, his radical views and his Welsh nationalism. He became a solicitor and in 1890 was elected as an advanced Liberal for Caernarvon Boroughs. From 1905 to 1908 he was president of the Board of Trade and was responsible for the passing of three important Acts – the Merchant Shipping Act and the Census Production Act (1906), and the Patents Act (1907). As Chancellor of the Exchequer from 1908 to 1915, he reached the heights as a social reformer with his Old Age Pensions Act (1908), the National Insurance Act (1911), and the momentous 'people's budget' of 1909–10, whose rejection by the Lords led to constitutional crisis and the Parliament Act of 1911 which removed the Lords' power of veto. Although a pacifist, he strongly believed in the national rights of a smaller country and saw the parallel between the Welsh and the Boers. His condemnation of the Boer War had been loud and the threat of the invasion of Belgium by Germany in 1914 dispelled all pacifist tendencies. In 1915 he was appointed Minister of Munitions, and in 1916 became War Secretary and superseded H H ASQUITH as coalition prime minister (1916–22). By his forceful policy he was, as HITLER later said of him, 'the man who won the war'. He was one of the 'big three' at the peace negotiations, which he handled brilliantly although he was inclined to pay too much attention to the demands of the small countries. This later, as with Greece, led Great Britain into difficulties. At home there was a split in the Liberal Party which never completely healed. In 1921 he negotiated with Sinn Féin and conceded the Irish Free State. This was very unpopular with the Conservatives in the government and led to his downfall and the downfall of the Liberals as a party at the 1922 election. Following the 1931 general election he resigned as leader of the party and led a group of Independent Liberal MPs. He retained his seat until the year of his death, in which year he was made an earl. He wrote his *War Memoirs* (1933–36) and *The Truth about the Peace Treaties* (1938). 🕮 Thomas Jones, *Lloyd George* (1951)

Lloyd-George, Gwilym, 1st Viscount Tenby 1894–1967
Welsh politician
Born in Criccieth, he was the second son of DAVID LLOYD-GEORGE. He entered parliament as Liberal MP for Pembrokeshire (1922, 1929–50). He was Parliamentary Secretary to the Board of Trade (1939–41) and Minister of Fuel and Power (1942–45). In 1951 he was returned as Liberal-Conservative member for Newcastle North and was Minister of Food until 1954. He was Minister for Welsh Affairs until 1957, when he was created Viscount Tenby of Bulford.

Lloyd-George, Lady Megan 1902–66
Welsh politician
Born in Criccieth, the younger daughter of DAVID LLOYD GEORGE, she was elected Liberal MP for Anglesey in 1929 and was Independent Liberal between 1931 and 1945. Defeated in the election of 1951, she joined the Labour Party in 1955 and was MP for Carmarthen from 1957.

Lloyd-Jones, David Martyn 1899–1981
Welsh preacher and writer
Born in Newcastle Emlyn, he trained in medicine at London but in 1926 gave up a promising career in Harley Street to enter the Christian ministry. After eleven years in Aberavon he became colleague and successor to G Campbell Morgan at Westminster Chapel, London, and for 30 years made it virtually the heart of English Nonconformity, with his expository preaching based on Reformed theology. His published works include *Truth Unchanged, Unchanging* (1951), *From Fear to Faith* (1953), *Conversions: Psychological and Spiritual* (1959) and *Studies in the Sermon on the Mount* (2 vols, 1959–60).

Lloyd-Webber, Andrew Lloyd Webber, Baron 1948–
English popular composer
Born in London, he was educated at Westminster School and Magdalen College, Oxford, and at the Royal College of Music, London. He met TIM RICE in 1965, and together they wrote a 'pop oratorio', *Joseph and the Amazing Technicolor Dreamcoat* (1968), which was extended and staged in 1973 and revived in 1991. Their next two collaborations, the rock operas *Jesus Christ Superstar* (1970) and *Evita* (1976), achieved massive international success both on stage and in film. Parting company with Rice, Lloyd Webber's *Cats* (1981), using verses by T S ELIOT, and *The Phantom of the Opera* (1986), based on the 1911 novel by Gaston Leroux (1868–1927), established him as the most successful popular composer of his day – in 2006 the latter broke the Broadway box office records set by the former. Sometimes derided by critics as shallow, derivative and mock-operatic, his more recent musicals, such as 2004's *The Woman In White*, have maintained his reputation with the London public but failed to make the same impact on Broadway. His production company The Really Useful Group owns some 13 of London's West End theatres. He is an avid art collector, and works from his collection were shown at London's Royal Academy in 2003. He was knighted in 1992 and made a life peer in 1997. His brother Julian (1951–) is a cellist, and his father, Dr William Lloyd Webber (1914–82) was a notable organist, a choirmaster and director of the London College of Music from 1964 till his death. 🕮 Michael Walsh, *Andrew Lloyd Webber* (1989)

Llywelyn Ap Iorwerth, *called* **the Great** 1173–1240
Prince of Gwynedd
He seized power from his uncle David (1194), and soon had most of northern Wales under his control. In 1205 he married Joan (d.1237), the illegitimate daughter of King JOHN of England. Welsh poetry and culture flourished under him, and there was

harmony between him and the Church. He successfully maintained his independence against King John and HENRY III, and extended his kingdom over most of Wales, before retiring to the Cistercian monastery at Aberconway (Aberconwy), where he died and was buried. He was probably the ablest of all the medieval Welsh princes.

Loach, Ken(neth) 1936–
English film-maker
Born in Nuneaton, Warwickshire, he studied law at Oxford University and acted before becoming a television director. He directed *Z Cars* (1962) before making his name in the Wednesday Play series, with productions such as *Cathy Come Home* (1966). His first feature film, *Poor Cow* (1967), was followed by the popular *Kes* (1969) and *Family Life* (1971). Although he has often struggled to secure funding and distribution in the UK, he has continued to explore left-wing political issues in such television work as *Days of Hope* (1975) and *The Price of Coal* (1977). Subsequent films, all in his social-realist style, have included *Hidden Agenda* (1990), *Raining Stones* (1993), *Land and Freedom* (1995), *Carla's Song* (1997), *My Name is Joe* (1998), *Bread and Roses* (2000), *Sweet Sixteen* (2002) and *The Wind That Shakes the Barley* (2006), which won the Palme D'Or at the Cannes Film Festival. He was awarded the prestigious BAFTA Fellowship in 2006. 🕮 Anthony Hayward, *Which Side Are You On?* (2005)

Lobachevski, Nikolai Ivanovich 1792–1856
Russian mathematician
Born in Nizhny Novgorod, he became professor at the University of Kazan in 1814, where he spent the rest of his life. From the 1820s he developed a theory of non-Euclidean geometry in which EUCLID's parallel postulate (that there is only one straight line which passes through a given point and is parallel to another given line) did not hold. A similar theory was discovered almost simultaneously and independently by JÁNOS BOLYAI. Despite publication in various languages, his theory was too novel and its presentation too obscure to find acceptance in his lifetime. He also wrote on algebra and the theory of functions. 🕮 F Veniamin, *N Lobachevsky and His Contributions to Science* (1957)

L'Obel or **Obel** or **Lobel, Matthias de** 1538–1616
Flemish naturalist
Born in Lille, he became botanist and physician to King JAMES VI AND I of Scotland and England, and gave his name to the *Lobelia*.

Lobo, Francisco Rodrigues c.1580–1622
Portuguese writer
He was born in Leiria, and wrote *Primavera* (1601, 'Spring') and other remarkable prose pastorals and verse. He was drowned in the River Tagus. His lyrics are of great beauty and his work holds a valuable place in Portuguese literature. 🕮 R Jorge, *Francisco Lobo* (1920)

Lochhead, Liz 1947–
Scottish poet and dramatist
Born in Motherwell, Lanarkshire, she studied at Glasgow School of Art and worked as an art teacher before becoming a full-time writer in 1979. A frank and witty poet, she has published several collections, including *Dreaming Frankenstein* (1984), *True Confessions and New Clichés* (1985) and *The Colour of Black and White: Poems 1984–2003* (2003). Her works for the stage include *Mary Queen of Scots Got Her Head Chopped Off* (1987), a version of BRAM STOKER's *Dracula* (1985), which restored the serious intent of the original, and an acclaimed reworking of EURIPIDES' *Medea* (2000). She translated MOLIÈRE's *Tartuffe* (1985) into demotic Glaswegian, and rewrote his *Le Misanthrope* as *Misery Guts* (2002). She wrote the text for the epic music theatre production *Jock Tamson's Bairns* in Glasgow in 1990, and has also written for radio and television.

Lochner, Stefan c.1400–1451
German painter
Born in Meersburg on Lake Constance, he was the principal master of the Cologne school, marking the transition from the Gothic style to naturalism. He may have studied in the Netherlands under ROBERT CAMPIN, and settled in Cologne c.1430. The influence of Netherlandish art, particularly JAN VAN EYCK, shows in his work, eg the *Madonna with the Violet* (c.1443, Cologne). His best-known work is the triptych in Cologne Cathedral.

Locke, Alain Leroy 1886–1954
US educationalist and critic
Born in Philadelphia, he graduated from Harvard and became the first black Rhodes scholar at Oxford (1907–10). Professor of philosophy at Howard University from 1917, he published numerous works that explored black culture in the USA and its African antecedents, notably *The New Negro* (1925), *The Negro in America* (1933) and *The Negro in Art* (1941). He was a leading figure in the Harlem Renaissance.

Locke, Bessie 1865–1952
US pioneer of kindergarten education
Born in West Cambridge (Arlington), Massachusetts, she herself attended a private kindergarten (then a recent importation from Germany), and went on to Brooklyn public schools and Columbia University, but took no degree. She is said to have been deflected from business to education by her observation of a friend's kindergarten in a slum area of New York City. She founded the National Association for the Promotion of Kindergarten Education (National Kindergarten Association) in 1909, and was head of the kindergarten division of the US Bureau of Education (1913–19), working to improve kindergarten teacher training. From 1917 she published home education articles for parents which became very influential. She helped to open over 3,000 kindergartens, serving over 1.5 million children.

Locke, Bobby, *properly* **Arthur D'Arcy Locke** 1917–87
South African golfer
He was born in Germiston. A slow, methodical player, he won four British Open championships (1949, 1950, 1952, 1957), and between 1947 and 1950 won eleven events on the US tour circuit.

Locke, John 1632–1704
English empiricist philosopher
He was born in Wrington, Somerset, and educated at Westminster School and Christ Church, Oxford. He reacted against the prevailing scholasticism at Oxford and involved himself instead in experimental studies of medicine and science, making the acquaintance of ROBERT BOYLE, JOHN WILKINS and others. In 1667 he joined the household of Anthony Ashley Cooper, later 3rd Earl of SHAFTESBURY, as his personal physician and became his adviser in scientific and political matters generally. Through Ashley he made contact with the leading intellectual figures in London and was elected FRS (1668). When Ashley became Earl of Shaftesbury and Chancellor (1672), Locke became secretary to the Council of Trade and Plantations, but retired to France (1675–79), partly for health reasons and perhaps partly from political prudence. In Paris he became acquainted with the circle of PIERRE GASSENDI and ANTOINE ARNAULD. After Shaftesbury's fall and death in 1683, Locke felt threatened and fled to the Netherlands, where he joined the English supporters of William of Orange (the future WILLIAM III) and remained until after the Glorious Revolution of 1688. His *Two Treatises of Government* published, anonymously, in 1690, constitute his reply to the patriarchal Divine Right theory of Sir ROBERT FILMER and also to the absolutism of THOMAS HOBBES. The *Treatises* present a social contract theory which embodies a defence of natural rights and a justification for constitutional law, the liberty of the individual and the rule of the majority. If the ruling body offends against natural law it must be deposed, and this sanctioning of rebellion had a powerful influence on the American and French revolutions. Locke returned to England in 1689, declined an ambassadorship and became Commissioner of Appeals until 1704. His health declined and he spent his remaining years at Oates, Essex, at the home of Sir Francis and Lady Masham (the daughter of RALPH CUDWORTH). Locke's major philosophical work was the *Essay concerning Human Understanding*, published in 1690 though developed over 20 years. The *Essay* is a systematic enquiry into the nature and scope of human reason, very much reflecting the scientific temper of the times in seeking to establish that 'all knowledge is founded on and ultimately derives from sense ... or sensation'. The work is regarded as the first and probably the most important statement of an empiricist theory of knowledge in the British tradition which led from Locke to GEORGE BERKELEY and DAVID HUME. His other main works were *A Letter concerning Toleration* (1689), *Some Thoughts concerning Education* (1693) and *The Reasonableness of Christianity* (1695), and they are all characterized by the same tolerance, moderation and common sense. 🕮 Richard I Aaron, *John Locke* (3rd edn, 1951)

Locke, Joseph 1805–60
English civil engineer
Born in Attercliffe, near Sheffield, he left school at the age of 13 and eventually became articled to GEORGE STEPHENSON in 1823 and began to learn the art of railway civil engineering. After almost ten years with Stephenson he broke away and built a large number of important railways in England, Scotland, France and elsewhere on the Continent of Europe. His lines were noted for

their straightness and avoidance of expensive tunnelling, but in adopting such a system he was forced in some places to adopt gradients that were too steep for economical running.

Locke, Matthew c.1621–1677
English composer
Born in Exeter, he collaborated with JAMES SHIRLEY on the masque *Cupid and Death* (1653), winning a reputation as a theatre composer. After writing the music for CHARLES II's coronation procession, he was made Composer-in-Ordinary to the King. He was a champion of the 'modern' French style of composition, and his works include much incidental music for plays (though that for *Macbeth*, long attributed to him, is of doubtful authenticity), Latin church music, songs and chamber works.

Locke, William John 1863–1930
English novelist
Born in Demerara, British Guiana (Guyana), and educated in Trinidad and at Cambridge, he taught (1890–97) at Clifton and Glenalmond, but disliked teaching, and became the secretary of the Royal Institute of British Architects in London (until 1907). In 1895 he published the first of a long series of novels and plays which, with their charmingly written sentimental themes, enjoyed a huge success in Great Britain and the USA. *The Morals of Marcus Ordeyne* (1905) and *The Beloved Vagabond* (1906) assured his reputation. His other popular romances include *The Joyous Adventures of Aristide Pujol* (1912) and *The Wonderful Year* (1916). His plays, some of which were dramatized versions of his novels, were produced with success on the London stage.

Lockhart, John Gibson 1794–1854
Scottish biographer, novelist and critic
Born in Cambusnethan, Lanarkshire, the son of a Church of Scotland minister, he spent his boyhood in Glasgow, and aged 13 won a Snell exhibition to Balliol College, Oxford. In 1813 he graduated with a first in classics. Then, after a visit to the Continent to see GOETHE in Weimar, he studied law at Edinburgh, and in 1816 was called to the Bar. From 1817 he turned increasingly to writing, and with JOHN WILSON ('Christopher North') became the chief mainstay of *Blackwood's Magazine*. There he exhibited the criticism and caustic wit that made him the terror of his Whig opponents. In 1819 he published *Peter's Letters to His Kinsfolk* (3 vols), a clever skit on Edinburgh intellectual society. He married Sophia, eldest daughter of Sir WALTER SCOTT, in 1820, and went on to write four novels – *Valerius* (1821), *Adam Blair* (1822), *Reginald Dalton* (1823) and *Matthew Wald* (1824). His other works include biographies of ROBERT BURNS (1828) and NAPOLEON I (1829), and his masterpiece *The Life of Sir Walter Scott* (7 vols, 1837–38). In 1825 he moved to London to become editor until 1853 of the *Quarterly Review*. He also became auditor of the Duchy of Cornwall (1843). His closing years were clouded by illness and deep depression. He visited Italy for the sake of his health, but, like Scott, came back to Abbotsford in Scotland to die. 🕮 A Lang, *Life and Letters of John Gibson Lockhart* (1896)

Lockwood, Belva Ann, *née* **Bennett** 1830–1917
US lawyer and reformer
Born in Royalton, Niagara County, New York, and educated at Genesee College, she graduated from the National University Law School in Washington (1873) and was admitted to the Bar. In 1868 she married Ezekiel Lockwood, her second husband (her first died in 1853). A skilled and vigorous supporter of women's rights, she became the first woman to practise before the Supreme Court, and helped to promote various reforms, such as the Equal Pay Act for female civil servants (1872). In 1884 and 1888, as a member of the National Equal Rights Party, she was nominated for the presidency. Holding strong pacifist views, she was a member of the nominating committee for the Nobel Peace Prize.

Lockwood, Margaret 1911–90
English actress
Born in Karachi, India, she studied at the Italia Conti School, then made her stage debut as a fairy in *A Midsummer Night's Dream* (1928). She subsequently studied at RADA before making her film debut in *Lorna Doone* (1934). Gaining a long-term contract with British Lion, she made a spirited young heroine in films like *Midshipman Easy* (1935) and *The Beloved Vagabond* (1936) before achieving stardom in *The Lady Vanishes* (1938) and *Bank Holiday* (1938). She was briefly in Hollywood before World War II, then returned to Great Britain and starred in costume melodramas like *The Man in Grey* (1943) and *The Wicked Lady* (1945). By 1946 she was judged to be Great Britain's favourite female star, but subsequent role choices failed to sustain her stardom and she played her last leading role in *Cast a Dark Shadow* (1955). She returned to the cinema for a final appearance as the wicked stepmother in *The Slipper and the Rose* (1976) and spent her last years as a publicity-shy recluse.

Lockyer, Sir (Joseph) Norman 1836–1920
English astronomer
Born in Rugby, Warwickshire, he became a clerk at the British War Office to which he remained technically attached (1857–75), devoting as much time as he could spare to science. In 1868 he designed a spectroscope for observing solar prominences outside of a total eclipse and succeeded in doing this independently of PIERRE JULES CÉSAR JANSSEN, who had used the same principle a few months earlier. In the same year he postulated the existence of an unknown element which he named helium (the 'Sun element'), an element not found on Earth until 1895 by WILLIAM RAMSAY. He also discovered and named the solar chromosphere. In 1875 he became a member of the staff of the Science Museum in South Kensington, London. His research gave rise to unconventional ideas such as his theory of dissociation, whereby atoms were believed to be capable of further subdivision, and his meteoritic hypothesis which postulated the formation of stars out of meteoric material. Among other activities, he took part in eclipse expeditions and made surveys of ancient temples for the purpose of dating them by astronomical methods. The founder (1869) and first editor of the scientific periodical *Nature*, he was knighted in 1897. His solar physics observatory at South Kensington was transferred to Cambridge University in 1911, but he remained active in a private observatory which he set up in Sidmouth, Devon, until his death. 🕮 A J Meadows, *Science and Controversy: A Biography of Sir Norman Lockyer* (1972)

Lodge, David John 1935–
English novelist and literary critic
Born in Dulwich, Greater London, he was educated at University College London, and at the University of Birmingham, where he was professor of modern English literature (1976–87, now emeritus). His critical and theoretical writing (most of which is concerned with contemporary fiction) has been influential, notably *Language of Fiction* (1966), *The Novelist at the Crossroads* (1971), *Working with Structuralism* (1981), *The Art of Fiction* (1992) and *Consciousness and the Novel* (2002). Several of his novels have an academic setting, including the best-known of them, *Changing Places* (1975) and its sequel, *Small World* (1984). He moved away from the academic into the industrial world with *Nice Work* (1988, adapted for television 1989). Later works include *Paradise News* (1991), *Therapy* (1995), the novella *Home Truths* (1999), *Thinks* (2001) and *Author, Author* (2004), based on the life of HENRY JAMES. He was made a CBE in 1998.

Lodge, Edmund 1756–1839
English writer
A biographer and author of several works on heraldry, he is best known by his *Portraits of Illustrious Personages* (1821–34) and *The Genealogy of the Existing British Peerage* (1832, enlarged 1859).

Lodge, Henry Cabot 1850–1924
US politician, historian and biographer
Born in Boston into a socially prominent family, he earned a PhD in political science from Harvard, and while serving the US House of Representatives (1887–93) as a Republican he also pursued a scholarly career, publishing historical studies and biographies of US statesmen. He was a US senator from 1893 until his death and is best remembered for leading Senate opposition to the League of Nations. 🕮 John A Garraty, *Henry Cabot Lodge: A Biography* (1953)

Lodge, Henry Cabot, Jnr 1902–85
US politician and statesman
Born in Nahant, Massachusetts, the grandson of HENRY CABOT LODGE, he began a political career in the Massachusetts legislature (1932–36) and served as US Republican senator (1937–44, 1947–53). As manager of General DWIGHT D EISENHOWER's presidential campaign, he lost his senate seat to the Democratic challenger, JOHN F KENNEDY, but was appointed US ambassador to the United Nations (1953–60). Unsuccessful in a run for US vice-president (with RICHARD NIXON) in 1960, he was chosen by President Kennedy to be ambassador to South Vietnam (1963), and he returned to this post under President LYNDON B JOHNSON (1965–67). Ambassador to West Germany (1968), he resigned to become chief US negotiator (1969) at

the Vietnam peace talks in Paris, then served as special envoy to the Vatican (1970–77).

Lodge, Sir Oliver Joseph 1851–1940
English physicist
Born in Penkhull, Staffordshire, he studied at the Royal College of Science and at University College London, and in 1881 became professor of physics at Liverpool University. In 1900 he was appointed first Principal of the new university at Birmingham. He discredited the ether theory in 1893, thus preparing the way for the theory of relativity. Specially distinguished in electricity, he was a pioneer of wireless telegraphy. His scientific writings include *Signalling across Space without Wires* (1897), *Talks about Wireless* (1925) and *Advancing Science* (1931). He gave much time to psychical research and on this subject wrote *Raymond* (1916) and *My Philosophy* (1933). *Past Years: An Autobiography* appeared in 1931. He was elected Fellow of the Royal Society in 1887, awarded the Society's Rumford Medal (1898) and knighted in 1902.

Lodge, Thomas c.1558–1625
English dramatist, romance writer and poet
Born in West Ham, London, he went to Trinity College, Oxford, and then to Lincoln's Inn (1578). He published a *Defence of Poetry* anonymously in 1580, and an attack on abuses by moneylenders, *An Alarum against Usurers*, in 1584, along with his first romance, *The Delectable Historie of Forbonius and Priscilla*. This was followed by *Scillaes Metamorphosis* in 1589. About 1588 he took part in a buccaneering expedition to the Canaries, and wrote another romance, *Rosalynde* (1590), his best-known work, which supplied SHAKESPEARE with many of the chief incidents in *As You Like It*. He went on a second freebooting expedition to South America in 1591. *The Wounds of the Civil War* and *A Looking-glass for London and England* (with ROBERT GREENE) appeared in 1594. He became a Catholic, and is believed to have taken a medical degree at Avignon (1600) and to have written a *Treatise of the Plague* (1603). Among his remaining writings are a collection of poems, *Phillis* (1593), *A Fig for Momus* (1595), and translations of JOSEPHUS (1602) and SENECA (1614). 🕮 W D Roe, *Thomas Lodge* (1967)

Loeb, Jacques 1859–1924
US biologist
Born in Mayen, Germany, he was educated in philosophy at Berlin University, and in medicine at Strassburg University, and in 1886 was appointed to an assistantship at Würzburg University. He began to publish on animal behaviour in 1888, showing that certain caterpillars move towards light even when their food is in the opposite direction. He emigrated to the USA in 1891, and held various university appointments before becoming head of the general physiology division at the Rockefeller Institute for Medical Research (1910–24). He conducted pioneering work on artificial parthenogenesis, and he became a champion of materialism in philosophy and of mechanistic explanations in science, and a socialist in politics. His writings include *Dynamics of Living Matter* (1906) and *Artificial Parthenogenesis and Fertilisation* (1913).

Loeb, James 1867–1933
US banker
Born in New York City, he founded the Institute of Musical Art in New York (1905) and a mental clinic in Munich. A classical scholar himself, in 1910 he provided funds for the publication of the famous Loeb Classical Library of Latin and Greek texts with English translations.

Loesser, Frank Henry 1910–69
US songwriter and composer
Born in New York City, he studied for a short time at the City College of New York. He published his first lyric in 1931, and in 1937 went to Hollywood as a contract writer. With a succession of collaborators he turned out several hit songs including 'See What the Boys in the Backroom Will Have', 'Two Sleepy People' (with HOAGY CARMICHAEL) and 'Baby, It's Cold Outside'. He branched out into writing his own music with *Where's Charley*, a musical version of *Charley's Aunt* (1948), but he is best known for writing the music and lyrics for *Guys and Dolls* (1950). His other musicals include *The Most Happy Fella* (1956) and *How to Succeed in Business Without Really Trying* (1961), for which he shared the Pulitzer Prize for drama in 1962.

Loewe, Frederick 1904–88
US composer
Born in Berlin, he went to the USA in 1924, and worked as a composer on a number of Broadway musicals. Those he wrote in collaboration with ALAN JAY LERNER were particularly successful, including *Brigadoon* (1947), *My Fair Lady* (1956) and the film score for *Gigi* (1958).

Loewe, (Johann) Karl Gottfried, *also* **Karl Löwe** 1796–1869
German composer
Born near Halle, he studied music and theology there, and in 1822 became a music teacher at Stettin. In 1847 he sang and played before the court of Queen VICTORIA in London. He composed operas (of which only one, *The Three Wishes*, was performed), oratorios, symphonies, concertos, duets and other works for piano, but his ballads, including the *Erlkönig* (1818, 'The Erl-King'), are his most impressive achievements. He published his autobiography in 1870.

Loewi, Otto 1873–1961
German pharmacologist and Nobel Prize winner
Born in Frankfurt am Main and educated at Strassburg and Munich, he was appointed professor of pharmacology at Graz (1909–38). Forced to leave Nazi Germany in 1938, he became research professor at New York University College of Medicine in 1940. From 1901 he worked for a time alongside HENRY DALE, in the laboratories of E H STARLING at University College London, on nerve impulses and their chemical transmission. He subsequently identified several possible transmitter substances and distinguished acetylcholine. He shared with Dale the 1936 Nobel Prize in physiology or medicine for investigations on the chemical transmission of nerve impulses. He was elected a Foreign Member of the Royal Society in 1954.

Loewy, Raymond Fernand 1893–1987
US industrial designer
Born in Paris, France, he emigrated to the USA in 1919. After a period of varied work as a commercial artist, he was commissioned to redesign the casing for the Gestetner duplicator, after which he designed products and graphics for major industrial corporations worldwide. Clients included Shell, BP, Coca Cola, Studebaker, BMW, Sud Aviation, and the National Aeronautics and Space Administration (NASA). Loewy was the archetypal US entrepreneurial designer, and was associated with the 'stylist' school of design, and with the 'streamlined' style in particular. He was the author of *Never Leave Well Enough Alone* (1951).

Löffler, Friedrich August Johann 1852–1915
German bacteriologist
Born in Frankfurt an der Oder, he began his career as a military surgeon, became professor at Greifswald (1888) and from 1913 was director of the Koch Institute for Infectious Diseases in Berlin. He first cultured the diphtheria bacillus (1884), discovered by Edwin Klebs and called the 'Klebs–Löffler bacillus', discovered the causal organism of glanders and swine erysipelas (1886), isolated an organism causing food poisoning, and prepared a vaccine against foot-and-mouth disease (1899). He also presented the first evidence for the occurrence of the pathogens which we now call filterable viruses. In 1887 he wrote an unfinished history of bacteriology.

Lofting, Hugh John 1886–1947
English children's novelist
He was born in Maidenhead, Berkshire. The 'Dr Dolittle' books (1920–53), for which he is famous (despite criticisms that they are racist and chauvinistic), had their origins in the trench warfare of World War I, of which he had first-hand experience. The idea of the doctor who learns animal languages came to him from his reflections on the part that horses were playing in the war. There were a dozen Dolittle books, which he also illustrated, and though he tired of his eponymous hero – on one occasion attempting to abandon him on the Moon – his popularity with readers kept him alive. From 1912 Lofting was resident mainly in the USA.

Logan, George 1866–1939
Scottish furniture designer
Born in Beith, Ayrshire, he served a traditional cabinetmaker's apprenticeship before working for an established firm of Glasgow cabinetmakers, where he worked with ERNEST ARCHIBALD TAYLOR and John Ednie (1876–1934). Gaining critical acclaim at home and abroad, he exhibited at the International Exhibition, Turin, and was greatly influenced by the work of JESSIE KING, Herbert Macnair (1868–1955) and CHARLES RENNIE MACKINTOSH. He exhibited his watercolours regularly at the Royal Glasgow Institute.

Logan, James, *also called* **Tah-gah-jute** c.1725–1780
Native American leader
Born in Shamokin (now Sunbury), Pennsylvania, he was a prominent member of the Mingo, of the Ohio and Scioto rivers.

He was friendly toward whites until his family was slaughtered at the Yellow Creek massacre, an event that resulted in Lord Dunmore's War (1774). He refused to participate in a peace treaty meeting, sending instead an eloquent speech expressing anger at his undeserved loss, and he spent the rest of his life seeking revenge by killing white settlers.

Logan, John Alexander 1826–86
US soldier and legislator
Born in Illinois, he served in the Mexican War, was called to the Bar in 1852, and was elected to Congress as a Democrat in 1858. He raised an Illinois regiment in the Civil War (1861–65), and retired at its close as major-general. Returned to Congress as a Republican in 1866, he was repeatedly chosen as a US senator.

Logan, Sir William Edmund 1798–1875
Canadian geologist
Born in Montreal, he was educated at Edinburgh University and spent ten years in a London counting house before becoming bookkeeper in Swansea to a copper smelting company (1828). There he made a map of the coal basin which was incorporated into the geological survey. In 1842 he was appointed first director of the Geological Survey of Canada, a post which he retained until 1869. He undertook studies of the coalfields of Nova Scotia and New Brunswick, and carried out important work on the copper-bearing rocks of the Lake Superior region. His discovery in 1841 of the animal tracks at Horton Bluff, Nova Scotia, provided the first demonstration of the existence of land animals in the Upper Palaeozoic. He was knighted in 1856.

Logue, Christopher 1926–
English poet
Born in Portsmouth, Hampshire, he was educated at Prior Park College, Bath, and later became associated with the British Poetry Revival of the 1960s and 1970s. Politically opinionated and critical of imperialism and war, he has produced an eclectic body of work including poetry, plays, songs, children's verse, screenplays and erotica (the latter under the pseudonym Count Palmiro Vicarion). His collection *Songs* (1960) and his ongoing retelling of Homer's *Iliad* are considered landmarks of post-war British poetry. The Homeric project includes *War Music* (1997), *Kings* (1991), *The Husbands* (1995) and *Cold Calls* (2005), which won the 2005 Whitbread Poetry Award. 🕮*Prince Charming: A Memoir* (1999)

Loisy, Alfred Firmin 1857–1940
French theologian
Born in Ambrières, Haute-Marne, he was ordained priest in 1879 and in 1881 became professor of holy scripture at the Institut Catholique, where by his lectures and writings he incurred the disfavour of the Church and was dismissed. In 1900 he was appointed lecturer at the Sorbonne, but resigned after his works on biblical criticism were condemned by Pope PIUS X in 1903 as too advanced. These books, proving him to be the founder of the Modernist movement, were *L'Évangile et l'Église* (1902, Eng trans *The Gospel and the Church*), *Quatrième Évangile* (1903, Eng trans *The Fourth Gospel*) and *Autour d'un petit livre* (1903, 'Around a Small Book'). For subsequent works of the same kind he was excommunicated in 1908. He was professor of history of religion in the Collège de France from 1909 to 1932.

Lollobrigida, Gina 1927–
Italian actress
Born in Subiaco, the daughter of a carpenter, she studied to become a commercial artist and made a living as a model before entering the film industry in 1946. Her curvaceous figure and ability to attract publicity made her a popular sex symbol in the glamour-starved Europe of the immediate post-war years. An actress of limited range, she enjoyed a prolific career in such Italian films as *Pane, Amore E Fantasia* (1953, *Bread, Love and Dreams*) and *La Donna Piò Bella Del Mondo* (1955, *Beautiful but Dangerous*). Despite being loosely under contract to HOWARD HUGHES from 1949, she did not appear in US films for many years but found some English-language success with *Beat the Devil* (1954), *Trapeze* (1956) and *Never So Few* (1959). A less frequent performer from the 1970s onwards, she appeared in the television series *Falcon Crest* (1984). She directed the documentary *Portrait of Fidel Castro* (1975) and has enjoyed some success as a photographer.

Lomax, Alan 1915–2002
US folklorist and musicologist
Born in Austin, Texas, he was educated at the University of Texas and at Columbia University. He began working with his father, JOHN AVERY LOMAX, in 1933; following John's death, Alan continued their work, making a series of important recordings with JELLY ROLL MORTON (1938) and MUDDY WATERS (1942). He later extended his research beyond the USA, notably to the Caribbean, and compiled an 18-volume anthology of world folk music for Columbia Records during the 1950s. His publications include *Folk Songs of North America* (1960) and *The Land Where the Blues Began* (1993), and he produced the acclaimed documentary *American Patchwork* in the late 1980s. He was awarded the National Medal of Arts in 1984.

Lomax, John Avery 1867–1948
US folklorist and musicologist
Born in Goodman, Mississippi, he was brought up in Texas and studied at Harvard, but turned to field research into cowboy songs. He worked in teaching and banking for 15 years, then returned to field work, this time in black folk songs, blues, spirituals and work chants. Among his many publications are *Cowboy Songs and Other Frontier Ballads* (1910), *Plantation Songs of the Negro* (1916) and *Songs of the Cattle Trail and Cow Camp* (1919). He and his son ALAN LOMAX toured the South with basic recording equipment in the early 1930s, amassing a collection of some 10,000 invaluable recordings for the Library of Congress (where John was curator of American Folksong), and discovering the singer LEADBELLY along the way. Together they published *American Ballads and Folk Songs* (1934) and *Negro Folk Songs as Sung by Lead Belly* (1936).

Lomazzo, Giovanni Paolo 1538–1600
Italian painter and writer on art
Born in Milan, he became a well-regarded Mannerist painter, although few of his works survive. At the age of 33 he went blind and thenceforth devoted himself to writing. His comprehensive *Trattato dell'Arte della Pittura, Scoltura et Architettura* (1584, 'Treatise on the Art of Painting, Sculpture and Architecture', Eng trans 1598), divided into seven books on subjects such as proportion, colour, perspective and history, was very influential. It also contains abstruse metaphysical concepts.

Lombard, Carole, *originally* **Jane Alice Peters** 1908–42
US actress
Born in Fort Wayne, Indiana, she moved to California, where she was spotted by director Allan Dwan and cast as a tomboy in the film *A Perfect Crime* (1921). After completing her studies she returned to films (1925) where her blonde beauty made her a decorative addition to many MACK SENNETT comedies. She signed to a long-term contract with Paramount in 1930, saw her roles gradually improve and revealed her comic flair in *Twentieth Century* (1934). Glamorous, sophisticated and effervescent, she was the perfect heroine of screwball comedies like *My Man Godfrey* (1936), *Nothing Sacred* (1937) and *To Be or Not to Be* (1942), while her dramatic potential was glimpsed in *They Knew What They Wanted* (1940). Married to CLARK GABLE (1939), she was one of Hollywood's most popular stars at the time of her death in an air crash.

Lombard, Peter c.1100–1160
Italian theologian
Born near Novara, Lombardy, he studied at Bologna, Rheims, and (under ABELARD) at Paris. After holding a chair of theology there, he became Bishop of Paris in 1159. He was generally styled *Magister Sententiarum* or the 'Master of Sentences', from his collection of sentences from AUGUSTINE OF HIPPO and other Fathers on points of Christian doctrine, with objections and replies. The theological doctors of Paris in 1300 denounced some of his teachings as heretical, but his work was the standard textbook of Catholic theology down to the Reformation.

Lombardi, Vince(nt Thomas) 1913–70
US football coach
Born in Brooklyn, New York City, he was a noted defensive guard in his playing days with Fordham University, although he was better known as a coach. He started in professional leagues by coaching offence for the New York Giants (1954–59), despite having been a defender, but his best work was done with the Green Bay Packers from Wisconsin (1959–69). With this comparatively small-town team he lifted five league titles and took them successfully to two Super Bowls (1967–68).

Lombardo, Pietro c.1433–1515
Italian sculptor and architect
Born in Corona, Milan, he worked in Padua, and probably Florence, then settled with his family in Venice c.1467 and became the head of the major sculpture workshop of the day. With the assistance of his sons, Tullio (c.1455–1532) and Antonio (c.1458–1516), he was responsible for both the architecture and sculptural decoration of S Maria dei Miracoli (1481–89), one of the finest Renaissance buildings in Venice.

Among the many monuments he designed was the tomb of DANTE in Ravenna.

Lombos, Philip Alexius László de *See* LÁSZLÓ, SIR PHILIP

Lombroso, Cesare 1836–1909
Italian physician and criminologist
He was born in Verona. After acting as an army surgeon, he became professor of mental diseases at Pavia (1862), and director of an asylum at Pesaro, then professor of forensic medicine (1876), of psychiatry (1896) and of criminal anthropology (1906) at Turin. His theory postulated the existence of a criminal type distinguishable from the normal man. His great work is *L'uomo delinquente* (1875, 'The Criminal Man').

Lomonosov, Mikhail Vasilevich 1711–65
Russian scientist and writer
Born in Kholmogory, near Archangel, he ran away to Moscow in search of an education and later studied at St Petersburg, at Marburg in Germany under the philosopher CHRISTIAN VON WOLFF, and finally at Freiburg, where he turned to metallurgy and glass-making. He became professor of chemistry at the St Petersburg Academy of Sciences in 1745 and set up Russia's first chemical laboratory there. His experiments led to the establishment of a glassworks making coloured glass for mosaics. He also made important contributions to Russian literature. Because he advocated popular education and freedom for the serfs, he always had to fight against prejudice, sometimes amounting to persecution. Although he came to be revered by many people in his own day, his papers were confiscated by CATHERINE II, THE GREAT after his death.

Lomu, Jonah 1975–
New Zealand rugby union player
Born in Mangere, he became the youngest-ever capped All Black. He made his international debut for New Zealand against France in 1994. He scored four tries against England in the semi-finals of the 1995 Rugby World Cup, becoming a household name worldwide. Diagnosed with a serious kidney disorder in 1996, he fought his way back to fitness and won a gold medal in the rugby sevens at the 1998 Commonwealth Games. A powerfully built athlete who has run 100m in 10.7 seconds, he is a genuine superstar in international rugby union. His health problems have continued to trouble him, however, and in 2004 he received a kidney transplant.

London, Fritz Wolfgang 1900–54
US physicist
He was born in Breslau, Germany (Wrocław, Poland), brother of HEINZ LONDON and son of a professor of mathematics in Bonn. He studied classics at the universities of Frankfurt and Munich and did research in philosophy leading to a doctorate at Bonn. Later he was attracted to theoretical physics and worked with ARNOLD SOMMERFELD at Munich and ERWIN SCHRÖDINGER at Zurich University in 1927, and published on the quantum theory of the chemical bond with Walter Heitler. In 1930 he calculated the non-polar component of forces between molecules, now called VAN DER WAALS or London forces. He and his brother fled from Germany in 1933 to Oxford where they joined Sir FRANCIS SIMON's group at the Clarendon Laboratory. Together they published major papers on conductivity giving the London equations (1935). Fritz moved to Duke University in the USA (1939–54) and continued to work on superconductivity and on superfluidity. 🕮 Kostas Gavroglu, *Fritz London: A Scientific Biography* (1995)

London, Heinz 1907–70
British physicist
He was born in Bonn, Germany, the younger brother of FRITZ LONDON, and was educated at the universities of Bonn, Berlin, Munich and Breslau, where he worked for his PhD with Sir FRANCIS SIMON. He fled Germany in 1933 with Fritz, and they joined Simon's group at the Clarendon Laboratory, Oxford, working together on conductivity. Heinz introduced a theory for the confinement of currents in a superconductor to a surface layer, and with his brother he published the London equations describing the electromagnetic behaviour of superconductors (1935). Briefly interned as an enemy alien in 1940, he was released to work with Simon and others on the development of the British atomic bomb. After two years at Birmingham University he transferred to the Atomic Energy Research Establishment at Harwell (1946), where he worked on isotope separation.

London, Jack, *pseudonym of* **John Griffith Chaney** 1876–1916
US writer
Born in San Francisco with the double handicap of illegitimacy and poverty, he was successively sailor, tramp and goldminer before he began his career as a writer. He used his knowledge of the Klondike in his highly successful novels *The Call of the Wild* (1903), *The Sea-Wolf* (1904) and *White Fang* (1905), all of them reflecting his preoccupation with the struggle for survival. Among his later works are novels inspired by his socialist political beliefs, notably *The Iron Heel* (1907) and *Martin Eden* (1909), and his autobiographical tale of alcoholism, *John Barleycorn* (1913). With his creative powers failing and his health undermined by illness, accidents and heavy drinking, he died at the age of 40. 🕮 Alex Kershaw, *Jack London: A Life* (1997)

Lonergan, Bernard Joseph Francis 1904–85
Canadian Jesuit theologian and philosopher
He was born in Buckingham, Quebec, and joined the Society of Jesus in 1922. As professor of systematic theology at the Gregorian University, Rome (1954–1965), his main concern was to discover precisely how theology develops, following an analysis of the way human understanding in general proceeds. The findings of his massive and seminal studies in *Insight: A Study of Human Understanding* (1957) and *Method in Theology* (1972) are summarized in *Philosophy of God, and Theology* (1973) and *Understanding and Being* (1980). His other interests in theology and the history of ideas were explored in occasional papers, assembled in three collections (1967, 1974, 1985).

Long, Crawford Williamson 1815–78
US physician
Born in Danielsville, Georgia, he practised in nearby Jefferson. In 1842, while operating on a neck tumour, he was the first to use diethyl ether as an anaesthetic, but did not reveal his discovery until 1849, after WILLIAM MORTON had demonstrated it publicly in 1846.

Long, Earl K(emp) 1895–1960
US politician
Born near Winnfield, Louisiana, the brother of HUEY LONG, he continued his brother's method of corrupt administration coupled with sound social legislation, as lieutenant-governor (1936–38) and governor (1939–40, 1948–52, 1956–60) of Louisiana. Suffering from paranoid schizophrenia, he was at his wife's request placed in a mental hospital in 1959 and forcibly detained there with police help, until, using his powers as governor, he dismissed the mental hospital's superintendent and appointed politically favourable medical officers.

Long, George Washington de *See* DE LONG, GEORGE WASHINGTON

Long, Huey Pierce, *known as* **the Kingfish** 1893–1935
US politician
Born near Winnfield, Louisiana, he was the brother of EARL K LONG. He was admitted to the Bar in 1915 and headed the state's Public Service Commission. Styling himself as an advocate for the poor and rural folk of Louisiana, he became governor (1928–31) and proceeded to build one of the most effective political machines in the history of US politics. His programme of extensive public spending not only reformed and developed Louisiana's public services, but also reduced the impact of the Depression upon the state. In 1931 he became a Democratic US senator. Notorious for corruption and demagoguery, he secured the support of the poor by his intensive 'Share the Wealth' social services and public works programmes, but also squandered public funds on extravagant personal projects, including the construction of a marble and bronze statehouse at Baton Rouge. At first a supporter of the New Deal and President FRANKLIN D ROOSEVELT, he became a critic of the president and planned to stand against him in 1936, but was assassinated in the state capitol at Baton Rouge.

Long, Richard 1945–
English land artist
Born in Bristol, he trained at St Martin's School of Art, London. He takes country walks which he considers works of art in themselves, sometimes marking a place with a simple 'sculpture', such as a circle of stones or a shallow trench. Afterwards he exhibits these or, more often, photographs, maps and texts to document his actions, as with *A Hundred Mile Walk* (1971–72). He has made works on every continent except Antarctica. He won the 1989 Turner prize and was made an RA in 2001.

Longchamp, William de d.1197
English prelate
He was a low-born favourite of RICHARD I, who in 1189–90 made him Chancellor, Bishop of Ely and joint Justiciar of England. In 1191 he was made papal legate, but because of his arrogant behaviour, was forced to withdraw to Normandy. He regained Richard's favour by raising his ransom, and was made Chancellor again.

Longfellow, Henry Wadsworth 1807–82
US poet
Born in Portland, Maine, he graduated at Bowdoin College in Brunswick, Maine, where one of his classmates was NATHANIEL HAWTHORNE. He spent three years in Europe (1826–29) before becoming professor of foreign languages at Bowdoin (1829–35). After another visit to Europe, when he met THOMAS CARLYLE, he became professor of modern languages and literature at Harvard (1836–54). He visited Europe again in 1842 and 1868. *Voices of the Night* (1839), his first book of verse, made a favourable impression, as did *Ballads* (1841), which included 'The Wreck of the Hesperus' and 'The Village Blacksmith'. His most popular works are *Evangeline* (1847), a tale (in hexameters) of the French exiles of Acadia, and *The Song of Hiawatha* (1855), which is based on the legends of Native Americans, using a metre borrowed from the Finnish epic, the *Kalevala*. His gift of simple, romantic storytelling in verse brought him enduring popularity as a poet. 🕮 N Arvin, *Longfellow, His Life and Works* (1963)

Longford, Francis Aungier Pakenham, 7th Earl of 1905–2001
English politician
Educated at Eton and New College, Oxford, he worked as a lecturer before joining Conservative Party headquarters as a research assistant in 1930, then returned to lecturing at Christ Church, Oxford. After being forced to resign his 1940 army commission because of ill health, he was personal assistant to Sir WILLIAM BEVERIDGE (1941–44), and between 1947 and 1965 held office in Labour Governments as Chancellor of the Duchy of Lancaster, Minister of Civil Aviation, First Lord of the Admiralty, Lord Privy Seal and Secretary of State for the Colonies. In 1964 he became leader of the House of Lords, and was Lord Privy Seal again from 1966 to 1968. His distinguished public and ministerial service over nearly three decades was eclipsed by the famous campaigns against sexual liberalism (which won him the sobriquet 'Lord Porn') and for prison reform that the earl (a Catholic convert) conducted from the 1960s. He was widely criticized for his attempts to secure the release of the convicted multiple murderess MYRA HINDLEY, who was sentenced to life imprisonment in 1966. He wrote numerous works on the prison system, politics and religion, and his notable biographies include works on ABRAHAM LINCOLN (1974), JOHN F KENNEDY (1976) and RICHARD NIXON (1980). He also published four volumes of autobiography namely, *Born to Believe* (1953), *Five Lives* (1964), *The Grain of Wheat* (1974) and *Avowed Intent* (1994).

Longhi, Pietro, *originally* **Pietro Falca** 1702–85
Italian painter
Born in Venice, he was a pupil of Antonio Balestra (1666–1740), and excelled in small-scale satiric pictures of Venetian life. Most of his work is in Venetian public collections, but the National Gallery, London, has three, of which the best known is *Rhinoceros in an Arena* (1751). His son Alessandro (1733–1813) was also a painter, and some of his portraits are now attributed to his father.

Longimanus *See* ARTAXERXES I

Longinus probably 1st century AD
Greek literary critic
Nothing certain is known of his life, but he is author of *On the Sublime* (about two-thirds of which survives), which analyses the qualities of great literature and has been enormously influential, particularly among Romantic critics.

Longman, Evelyn Beatrice 1874–1954
US sculptor
Born near Winchester, Ohio, she attended evening classes at the Chicago Art Institute and Mount Oliver College in Michigan, before returning to Chicago where she graduated with honours in 1900. She became DANIEL FRENCH's only female assistant before opening her own studio and gaining a series of monumental commissions, such as *Victory* for the St Louis exposition and her most famous sculpture, *Genius of Electricity*, originally installed on top of a Manhattan building. She also executed many portrait commissions in a decorative classical style. Considered to be the most successful woman sculptor of her time, she collected many awards, including the honour of being the first woman elected to the National Academy of Design.

Longman, Thomas 1699–1755
English publisher and founder of the Longman firm
He was born in Bristol, the son of a merchant. He bought a bookselling business in Paternoster Row, London, in 1724, and shared in publishing Robert Ainsworth's *Latin Dictionary*, EPHRAIM CHAMBERS's *Cyclopaedia* and Dr JOHNSON's *Dictionary*.

Longo, Jeannie 1958–
French cyclist
She was born in Annecy. Her numerous wins include the Women's Tour de France three times, the Colorado equivalent four times and the world title 13 times. Her numerous French Women's Champion wins include eleven consecutive titles between 1979 and 1989 and she has set world records indoors and out, including setting the world hour record in November 2000 and then breaking it herself the next month. She won a silver medal in the road race at the Barcelona Olympics in 1992, then won the gold medal in the road race and the silver medal against the clock at the Atlanta Olympics in 1996. She won the bronze medal in the road race at the Sydney Olympics in 2000. Widely considered the best female road cyclist of all time, she is married to her coach Patrice Ciprelli, who was a former Alpine skiing internationalist.

Longstreet, James 1821–1904
US soldier
He was born in Edgefield District, South Carolina. He fought in the Mexican War (1846–48), but resigned from the US army at the outbreak of the Civil War (1861–65) to join the Confederate army as a brigadier-general. He fought in both battles of Bull Run (1861–62) and at Gettysburg (1863), and surrendered with ROBERT E LEE at Appomattox Courthouse (April 1865).

Longuet-Higgins, H(ugh) C(hristopher) 1923–2004
English theoretical chemist
Born in Lenham, Kent, he studied chemistry at Balliol College, Oxford, where he was a Research Fellow from 1946 to 1948. From 1949 to 1952 he was lecturer and then Reader in Theoretical Chemistry at the University of Manchester, before briefly holding the chair of theoretical physics at King's College London, and then in 1954 becoming Plummer Professor of Theoretical Chemistry at Cambridge. From 1968 to 1974 he was Royal Society Research Professor in the department of artificial intelligence at the University of Edinburgh and from 1974 to his retirement in 1988 he held a similar position at the University of Sussex. He made fundamental contributions to the molecular orbital theory of organic and inorganic chemistry and used symmetry arguments to predict the course of various electrocyclic reactions. Following his move to Edinburgh in 1968, he embarked on a second phase of research in which he has worked on problems of the mind, including language acquisition, music perception and speech analysis. He was elected FRS in 1958 and FRSA in 1970. He was made a foreign associate of the US National Academy of Sciences in 1968, and gave the Gifford Lectures in 1972.

Longus c.3rd century AD
Greek writer
He was a native probably of Lesbos and was the author of the pastoral romance *Daphnis and Chloë*. 🕮 B P Reardon, *Les courants littéraires grecs* (1971)

Lönnbohm, Armas Eino Leopold *See* LEINO, EINO

Lönnrot, Elias 1802–84
Finnish philologist and folklorist
Born in Sammatti, Nyland, he studied medicine, and was district medical officer for 20 years in Kajana. As a result of his folklore researches, he was appointed professor of Finnish at Helsingfors (Helsinki) (1853–62). His major achievement was the collection of oral popular lays, which he organized into a long epic poem of ancient life in the far north, the *Kalevala* (the shorter *Old Kalevala* in 1835, the longer version in 1849). Having standardized the national epic, he compiled a great Finnish–Swedish dictionary (1866–80), which helped establish a literary Finnish language. 🕮 W Wilson, *Folklore and Nationalism in Modern Finland* (1976)

Lonsdale, Frederick, *originally* **Frederick Leonard** 1881–1954
British playwright
Born in Jersey, he was known for his witty and sophisticated society comedies, among them *The Last of Mrs Cheyney* (1925), *On Approval* (1926) and *Canaries Sometimes Sing* (1929). He collaborated on operettas, including *Maid of the Mountains* (1916). 🕮 F Donaldson, *Frederick Lonsdale* (1957)

Lonsdale, Hugh Cecil Lowther, 5th Earl of 1857–1944
English sportsman
A landowner in Cumberland, he was a noted huntsman, steeplechaser, yachtsman and boxer. As president of the National Sporting Club he founded and presented the 'Lonsdale belts' for boxing.

Lonsdale, Dame Kathleen, *née* **Yardley** 1903–71
Irish crystallographer
Born in Newbridge, County Kildare, she went to Bedford College, London, to study mathematics, but changed to physics at the end of her first year. On graduating in 1922 she was invited by WILLIAM BRAGG to join his crystallography research team, first at University College London (UCL) and then at the Royal Institution, where she remained until 1946, apart from a short period when she worked at Leeds (1929–31). In 1945, when the Royal Society agreed to admit women Fellows, she was one of the first two women to be elected FRS; she was awarded the society's Davy Medal in 1957. She became Reader in Crystallography in the chemistry department of UCL (1946) and was promoted to professor of chemistry in 1949. She was appointed DBE in 1956, and retired in 1968. Of her many contributions to crystallography, the most celebrated was her X-ray analysis of hexamethylbenzene and hexachlorobenzene in 1929, which showed that the carbon atoms in the benzene ring are coplanar and hexagonally arranged. She also made important contributions to space-group theory and to the study of anisotropy and disorder in crystals. She became a Quaker in 1935 and later worked tirelessly for various causes including peace, penal reform and the social responsibility of science.

Lonsdale, William 1794–1871
English geologist
Born in Bath, he served in the army, but left in 1815 and took up geology. He became assistant secretary and curator of the Geological Society of London (1829–42), and spent a good deal of time studying the fossil corals in the vicinity of Bath. He also made a study of the fossils in north and south Devon in 1837, placing them between the Silurian and Carboniferous. This subsequently led to the establishment of the Devonian system by RODERICK MURCHISON and ADAM SEDGWICK (1839). Lonsdale employed the evolutionary concepts that CHARLES DARWIN was to champion subsequently.

Loon, Hendrik Willem Van *See* VAN LOON, HENDRIK WILLEM

Loos, Adolf 1870–1933
Austrian architect and writer on design
Born in Brno, Moravia (now in Czech Republic), he studied architecture in Dresden, spent three years in the USA, then settled in Vienna in 1896. One of the major architects of the modern movement, he is particularly important for articulating in his own short-lived journal *Das Andere* (1903), and in other articles, the view that ornament is 'wasteful', 'decadent' and against modern 'civilized' design. His buildings and other designs such as furniture, glass and metalwork reflect this view, but possess an elegance and visual interest which is derived from their functional form.

Loos, Anita 1893–1981
US writer
Born in Sisson (now Mount Shasta), California, she began writing screenplays for D W GRIFFITH in 1912. Her comic novel about Hollywood, *Gentlemen Prefer Blondes* (1925), with its naive, gold-digging heroine Lorelei Lee, was enormously popular and was made into both a movie and a musical, though readers failed to recognize it as a satire. A prolific and successful screenwriter, Loos also adapted COLETTE's *Gigi* for the stage (1952) and wrote two gossipy Hollywood memoirs, *A Girl Like I* (1966) and *Kiss Hollywood Goodbye* (1974). 🕮 G Carey, *Anita Loos, A Biography* (1988)

Lopes, Francisco Higino Craveiro 1894–1964
Portuguese statesman
Born in Lisbon of a distinguished military family, he was educated at the Military School there and fought in the expeditionary force in Mozambique in World War I. As a full colonel in 1942 he entered negotiations for co-operation with the Allies and was responsible for the modernization of the Portuguese air force. He entered parliament in 1944, was promoted to general in 1949, and was president of Portugal from 1951 to 1958.

López, Francisco Solano 1827–70
Paraguayan statesman
Born in Asunción, a great-nephew of FRANCIA, he succeeded his father as president of Paraguay in 1862. In 1864 he provoked war with Brazil and was faced with an alliance of Brazil, Uruguay and Argentina. The war lasted for five years, during which Paraguay was completely devastated and López himself, having fled, was shot by a soldier.

Lopez, Jennifer Lynn 1969–
US film actress and singer
Born in the Bronx district of New York City to Puerto Rican parents, she took singing and dancing lessons from the age of five. After being cast as a Fly Girl dancer in TV sketch show *In Living Color* (1990–94), she settled in Los Angeles. She was nominated for a Golden Globe award for her performance in *Selena* (1997), and her subsequent films, including *Maid in Manhattan* (2002) and *Gigli* (2003), have seen her become the highest-paid Latina actress in the world. Sometimes known by the nickname 'J-Lo', she has had a successful pop career and has launched several fashion lines and perfumes.

Lopez, Nancy 1957–
US golfer
Born in Torrance, California, she competed as an amateur in high school and college, winning the national championships of the Association for Intercollegiate Athletics for Women in 1976. Two years later she joined the professional tour and by 1997 had taken 48 LPGA (Ladies Professional Golf Association) victories. Her powerful play, impeccable putting and impressive poise in pressurized situations are considered to be among the reasons that women's professional golf has attracted large purses and corporate sponsorship. She was selected by the Associated Press as Female Athlete of the Year (1978, 1985), and she has been the LPGA Player of the year four times – in 1978, 1979, 1985 and 1988.

López Portillo y Pacheco, José 1920–2004
Mexican politician
Born into a socially prominent family in Mexico City, he practised law until 1959, when he entered government service. He rose to become Finance Minister (1971–75), then succeeded LUIS ECHEVERRÍA as president of Mexico (1976–82). He sought to stimulate economic growth through tax concessions, foreign investment and the exploitation of oil resources, but his administration was plagued by corruption and a mounting foreign debt. He went into self-imposed exile in Europe in 1982, and returned to Mexico in 2001.

Lopéz Rodó, Laureano 1920–2000
Spanish politician, academic and lawyer
As Secretary-General of the Presidency and Commissar of the Plan of Development, he formed part of the Opus Dei group, a Catholic lay organization which became powerful under the FRANCO regime. The group undertook the economic modernization of Spain from the late 1950s onwards. An intimate ally of Admiral CARRERO BLANCO, he became one of Franco's closest associates and the most influential technocrat to serve in his government, being the dominant minister in the Cabinet from 1965 to 1973. He was also Minister of Foreign Affairs (1973–74) and ambassador to Austria (1974–77). He played an important role in persuading Franco to accept the candidacy of JUAN CARLOS I as heir to the throne. After Franco's death, he joined the Alianza Popular on its foundation in 1976, being elected as a deputy for Barcelona in 1977. He left the party in 1979.

López Velarde, Ramón 1888–1921
Mexican poet and impressionistic prose writer
Born in Zacatecas, he wrote supposedly patriotic poems to his country, and although full of love, they are also full of a subtle irony which, however, for the most part has not been perceived by critics. He was one of the greatest love poets of his age in any language, and perhaps the most ironic of all. His posthumous prose sketches, which can be found in his complete poems, *Poesías completas* (1957), are remarkable. His influence upon Latin-American poetry as a whole, as well as on Mexican, has been unobtrusive but absolute, and he contributed greatly towards bringing poetry out of the *modernista* phase in which it was beginning to stultify. 🕮 A W Phillips, *Ramón López Velarde* (1962, in Spanish)

Lopukhov, Fyodor Vasilevich 1886–1973
Russian dancer, choreographer and teacher
Born in St Petersburg, he studied at the Imperial Ballet Academy there before joining the Maryinsky Theatre, where he established himself as a character dancer. He started choreographing in 1916, becoming one of the leading ballet experimentalists of his generation. He set the foundation of neoclassical and modern dance in Russia, introducing acrobatics into the academic vocabulary, and developing an interest in plotless, abstract ballets as a reaction against the literary, realist traditions of the 19th century. His most influential ballet was *Dance Symphony* (1923). He was artistic director of the Kirov (1923–30, and in the mid-1940s and 1950s), and of the Maly Theatre and Bolshoi Ballet companies (both in the mid-1930s).

Lorca, Federico García *See* GARCÍA LORCA, FEDERICO

Lorde, Audre Geraldine, *also known as* **Gamba Adisa** and **Rey Domini** 1934–92
US poet and activist
Born in Harlem, New York City, to West Indian parents, she was educated at Hunter College and Columbia University. As a 'black lesbian, mother, warrior, poet' (her own description), she challenged sexual and racial stereotypes. Politically, she combined an interracial socialism with African-American cultural nationalism, and was concerned about the oppressive conditions of contemporary US society. She was active in both feminist and gay rights movements. Her poetry includes *From a Land Where Other People Live* (1973), which introduced the use of African mythology for feminist purposes, *Between Ourselves* (1976) and *Our Dead Behind Us* (1986). She also wrote several prose works, including *The Cancer Journals* (1980), an account of her 14-year struggle with breast cancer, from which she died.

Loren, Sophia, *originally* **Sofia Villani Scicolone** 1934–
Italian film actress
Born in Rome, and brought up in poverty near Naples, she was a teenage beauty queen and model, before entering films as an extra in 1950. As the protégée of the producer Carlo Ponti (1912–2007), later her husband, she gained the lead in *The Pride and the Passion* (1957) and other US productions. An international career followed and she won an Academy Award for *La Ciociara* (1960, *Two Women*). Very beautiful, with a talent for earthy drama and vivacious comedy, she has attempted a wide range of characterizations with varying degrees of success. Among her many films are *The Millionairess* (1961), *Matrimonia all' Italiana* (1964, *Marriage Italian Style*), *C'Era una Volta* (1967, *Cinderella Italian Style*) and *Una Giornata Speciale* (1977, *A Special Day*). She published *Sophia Loren: Living and Loving* (1979, with A E Hotchner) which was filmed for television as *Sophia: Her Own Story* (1981) with the actress playing both herself and her mother. Her career continued with television films like *Aurora* (1984) and *Courage* (1986). She received a Special Academy Award in 1991. Later films include *Prêt-à-Porter* (1994) and *Grumpier Old Men* (1995).

Lorente de No, Rafael 1902–90
US neurophysiologist
He was born in Zaragoza, Spain, and studied medicine at the University of Madrid. After a period as a research assistant in the Cajal Institute in Madrid (1921–29) he was appointed head of the department of otolaryngology in Santander (1929–31) before travelling to the USA. From 1936 he worked at the Rockefeller Institute in New York (associate, 1936–38; associate member, 1938–41; member and professor, 1941–74). His research covered a wide range of neurophysiological and neuroanatomical problems, including the coordination of eye movements, the functional anatomy of neuron networks, and the neurophysiology of synaptic transmission.

Lorentz, Hendrik Antoon 1853–1928
Dutch physicist and Nobel Prize winner
Born in Arnhem, he studied at the University of Leyden and at the age of 25 was offered at Leyden (1878) the first chair of theoretical physics which had been created for JOHANNES VAN DER WAALS. He remained there until 1912 when he was appointed director of Teyler's Institute in Haarlem. His major contribution to theoretical physics was his electron theory. His derivation in 1904 of a mathematical transformation, the 'FITZGERALD–Lorentz contraction', explained the apparent absence of relative motion between the Earth and the (supposed) ether, and prepared the way for ALBERT EINSTEIN's theories of relativity. In 1902 he was awarded, with PIETER ZEEMAN, the Nobel Prize in physics. He served as president of the League of Nations' International Committee of Intellectual Co-operation, was made a Foreign Member of the Royal Society in 1905, and was awarded its Copley Medal in 1912. 🕮 G L De Haas-Lorentz (ed), *H A Lorentz: Impressions of His Life and Work* (1957)

Lorenz, Edward Norton 1917–
US mathematician and meteorologist
Born in West Hartford, Connecticut, he was educated at Dartmouth College and Harvard University. He became an assistant meteorologist at the Massachusetts Institute of Technology (MIT) in 1946, and was appointed professor in 1962. He introduced a simplified model of the general circulation of the atmosphere, demonstrating that the equations possessed one or two steady-state solutions, one or two stable but periodic solutions, and also aperiodic (irregular) solutions. He concluded that the real atmosphere could probably jump from one major mode to another. It contains periodic motions (eg the annual cycle), but there are also irregular motions introduced by atmospheric conditions. He went on to demonstrate how weather systems produced from slightly different initial conditions diverge with time, and proved the limit of predictability of useful forecasts to be about 10–14 days. This work laid the foundations of chaos theory, and his explanations of it to a lay audience introduced the expression 'butterfly effect'. He was awarded the Symons gold medal of the Royal Meteorological Society in 1973, the Kyoto Prize in 1991 and the Buys Ballot Medal in 2004.

Lorenz, Konrad Zacharias 1903–89
Austrian zoologist, ethologist and Nobel Prize winner
Born in Vienna, he studied there and founded, with NIKOLAAS TINBERGEN in the late 1930s, the science of ethology (the study of animal behaviour under natural conditions). Rather than studying animal learning in laboratories, Lorenz and his colleagues favoured the investigation of instinctive behaviour by animals in the wild. They mainly studied the behaviour of birds, fish and some insects whose behaviours contain a relatively high proportion of stereotyped elements or 'fixed action patterns', and made comparisons between species. His studies have led to a deeper understanding of behaviour patterns. In 1935 he published his observations on imprinting in young birds (the discovery for which he is chiefly known), by which hatchlings 'learn' to recognize substitute parents at the earliest stages in life. In his book *On Aggression* (1963) he argued that while aggressive behaviour in man is inborn it may be modified or channelled into other forms of activity, whereas in other animals it is purely survival-motivated. His books *King Solomon's Ring* (1949), *Man Meets Dog* (1950) and *Evolution and Modification of Behaviour* (1961) also enjoyed wide popularity. He shared the 1973 Nobel Prize in physiology or medicine with Nikolaas Tinbergen and KARL VON FRISCH. 🕮 Alec Nisbett, *Konrad Lorenz* (1976)

Lorenz, Ludwig Valentin 1829–91
Danish physicist
Born in Elsinore, he trained as a civil engineer at the Technical University of Denmark in Copenhagen, going on to became professor at the Danish Military Academy in 1866. He investigated many areas of optics, heat and the electrical conductivity of metals. In his search for a phenomenological description of the way light passes through matter, he advanced a mathematical description for light waves (1863), showing that under certain conditions double refraction will occur. His work on relating refraction and specific densities of media (1869) was combined with that of HENDRIK LORENTZ to produce the Lorentz–Lorenz formula. From observations of the scattering of sunlight he made the first fairly accurate estimate of AMEDEO AVOGADRO's number (1890), and without knowledge of JAMES CLERK MAXWELL's results, he published his own theory of electromagnetism.

Lorenzetti, Ambrogio c.1290–1348
Italian painter
Born in Siena, he worked in Cortona and Florence. He is best known for his allegorical frescoes in the Palazzo Pubblico at Siena, symbolizing the effects of good and bad government. An *Annunciation* (1344) is also at Siena. He was the younger brother of PIETRO LORENZETTI.

Lorenzetti, Pietro, *also called* **Pietro Laurati** c.1280–c.1348
Italian painter
He was born in Siena. He was probably a pupil of DUCCIO DI BUONINSEGNA, and was one of the liveliest of the early Sienese painters. He also worked at Arezzo (the polyptych in S Maria della Pieve) and Assisi, where he painted dramatic frescoes of the *Passion* in the Lower Church of S Francis. A *Madonna* (1340) is in the Uffizi Gallery, Florence. He was the elder brother of AMBROGIO LORENZETTI.

Lorenzo, Monaco, *originally* **Piero di Giovanni** c.1370–c.1425
Italian painter
Born in Siena, he became a monk of the Camaldolese order in 1391 and lived and worked in Florence. (Lorenzo Monaco means 'Laurence the Monk.') He began as a painter of miniatures in the monastery of S Maria degli Angeli, but later executed many notable altarpieces, especially the *Coronation of the Virgin*. His pictures are represented in both the Uffizi and Louvre galleries.

Lorenzo, Piero di *See* PIERO DI COSIMO

Lorimer, Sir Robert Stodart 1864–1929
Scottish architect
He was born in Edinburgh, the son of jurist James Lorimer (1818–90), and educated at The Edinburgh Academy and Edinburgh University. He left without a degree and was articled to an architect's office first in Edinburgh and then in London. He set up on his own in Edinburgh in 1892, working on Scottish country houses like Hill of Tarvit in Fife (1904) and creating a distinctive Scottish form of the Arts and Crafts tradition of his English contemporary EDWIN LUTYENS. He built or totally remodelled some 50 country houses in Great Britain, such as Rowallan in Ayrshire (1902), Ardkinglas in Argyll (1906) and the classical Marchmont in Berwickshire (1914). His most notable public works were the Thistle Chapel in St Giles, Edinburgh (1909–11), and the Scottish National War Memorial in Edinburgh Castle (1923–28). He also restored many castles, mansions and churches, including Balmanno House in Perthshire, Dunrobin Castle in Sutherland, Paisley Abbey and Dunblane Cathedral. His elder brother, John Henry Lorimer (1856–1936), was a noted artist, and produced the celebrated painting *Ordination of Elders in a Scottish Kirk*.

Lorimer, William Laughton 1885–1967
Scottish classicist
Born in Strathmartine, near Dundee, and belonging to a long tradition of Free Church of Scotland ministers, he was educated at Dundee High School, Fettes College, Edinburgh, and Trinity College, Oxford. He became assistant lecturer and subsequently lecturer in Greek (1910–29), reader in humanity (1929–53) and professor of Greek (1953–55) at University College, Dundee. He was chairman of the Executive Council and a member of the editorial committee of the *Scottish National Dictionary*. He is best known for his translation of the New Testament from Greek into Scots, necessarily recreating much of Scots prose in the process. His work dominated the last years of his teaching life and all of his retirement, involving the study of 180 translations in more than 20 languages, as well as the study of all known linguistic sources, and all significant commentaries. His manuscripts were revised after his death by his son, R L C Lorimer, and published in 1983 and 1985.

Lorjou, Bernard 1908–86
French artist
Born in Blois, he was without formal training. He was the founder of L'Homme Témoin group of Social Realist painters in 1949 and among a number of large satirical paintings is his *Atomic Age* (1951). He later developed a violently expressive style with bold black outlines against a light background.

Lorrain, Claude *See* CLAUDE

Lorre, Peter, *originally* **Laszlo Löwenstein** 1904–64
Hungarian actor
Born in Rosenberg, he studied in Vienna, where he acted in repertory theatre and gave one-man performances and readings. His early theatre appearances include *Pionier in Inoplastadt* (1928) in Berlin. He also appeared as the pathetic child murderer in FRITZ LANG's classic *M* (1931), and thereby set the seal on much of his subsequent career. A diffident, sad-eyed figure with a whispering, wheedling voice, he was generally typecast as smilingly sinister villains and outcasts. He moved to Hollywood (1934), where his many successes included *Casablanca* (1942) and *The Beast With Five Fingers* (1946). A rare excursion to the right side of the law saw him cast as JOHN P MARQUAND's Japanese detective Mr Moto in eight films, and he also formed an unholy alliance with Sydney Greenstreet (1879–1954) that was seen to particular advantage in *The Maltese Falcon* (1941) and *The Mask of Dimitrios* (1944). He wrote and directed one film in Europe, *Der Verlorene* (1951, *The Lost One*).

Lorris, Guillaume de fl.13th century
French poet
He wrote, before 1260, the first part (c.4,000 lines) of the *Roman de la Rose* (completed c.1280, Eng trans *The Romaunt of the Rose* by CHAUCER, c.1370), which was later continued by JEAN DE MEUNG. Nothing certain is known of his life.

Lortzing, Gustav Albert 1801–51
German composer
Born in Berlin, the son of an actor, he took to the stage as a young boy, and learned about the main orchestral instruments. In 1824 he produced his first operetta, *Ali Pascha von Janina* ('Ali Pasha of Ioannina'). He became first tenor with the Leipzig Theatre (1833–43), and conducted and composed operas such as *Zar und Zimmermann* (1837, 'Tsar and Carpenter') for which he also wrote the libretti.

Losey, Joseph (Walton) 1909–84
US film director
He was born in La Crosse, Wisconsin, studied English literature at Harvard and wrote arts reviews and directed for the New York stage before making his film debut with the marionette short *Pete Roleum and His Cousins* (1939). His short film *A Gun in His Hand* (1945) received an Academy Award nomination. He directed *Galileo* (1947) in Los Angeles and New York before turning to film full time with *The Boy with Green Hair* (1945) and *The Prowler* (1951). Falling foul of the MCCARTHY witchhunts, he moved to the UK in 1951 and gained lasting acclaim for his collaborations with HAROLD PINTER on such films as *The Servant* (1963) and *Accident* (1967). *The Go-Between* (1971) won the Palme D'Or at the Cannes Film Festival. His later films include *Don Giovanni* (1979) and *Steaming* (1984), which was completed shortly before his death.

Lo Spagnoletto *See* RIBERA, JUSEPE DE

Loti, Pierre *See* VIAUD, LOUIS MARIE JULIEN

Lotto, Lorenzo c.1480–1556
Italian religious painter
Born in Venice, he was a brilliant portrait painter whose subjects are vivid and full of character. He worked in Treviso, Bergamo, Venice and Rome, finally becoming a lay brother in the Loreto monastery.

Lotze, Rudolf Hermann 1817–81
German philosopher
Born in Bautzen, Saxony, he studied philosophy and medicine at Leipzig and became professor of philosophy at Leipzig (1842–44), Göttingen (1844–80) and Berlin (1880–81). He first became known as a physiologist, opposing the then popular doctrine of 'vitalism'. He also helped to found the science of physiological psychology, but he is best known for his religious philosophy, called 'Theistic Idealism', which is most fully expounded in *Mikrokosmos* (3 vols, 1856–58).

Lou, Miss *See* BENNETT, LOUISE SIMONE

Loudon, John Claudius 1783–1843
Scottish horticultural writer, dendrologist and designer
Born in Cambuslang, Strathclyde, he worked in England and travelled in Europe, and founded and edited *The Gardener's Magazine* (1826–43). He also compiled an *Encyclopaedia of Gardening* (1822), in which he illustrated a wrought-iron sash bar he had invented in 1816, which could be bent in any direction but still maintain its strength. This paved the way for spectacular edifices like the Palm House in Kew Gardens and the Crystal Palace. In Porchester Terrace, London, he designed the prototype semi-detached house. He founded and edited the *Architectural Magazine* (1834), and published an influential *Encyclopaedia of Cottage, Farm and Villa Architecture and Furniture* (1833). His major work was *Arboretum et Fruticetum Britannicum* (8 vols, 1838), devoted to trees and shrubs.

Louganis, Greg 1960–
US diver
Born in El Cajon, California, of Samoan and Swedish ancestry, he took a BA in drama at the University of California. He won the gold medal in both the springboard and platform diving competitions at the 1984 Los Angeles Olympics, and won the world championship at both events in 1986. At the Seoul Olympics in 1988 he won gold medals in the same two categories despite receiving a head injury during the competition. In 1995 he revealed that he was infected with the HIV virus, and in the same year he published an autobiography, *Breaking the Surface*, which became a bestseller.

Loughlin, Dame Anne 1894–1979
English trade unionist
Born in Leeds, she became involved in union affairs after working in a clothing factory, and was a full-time organizer by the time of the Hebden Bridge strike by 6,000 clothing workers in 1916. In 1920 she was appointed women's officer of the Tailors and Garment Workers Union, and worked tirelessly to improve working conditions and to increase union strength. In 1948 she became general secretary of the National Union of Tailors and Garment Workers. She served on many government committees, as well as the Royal Commission on Equal Pay. In 1943 she became the first trade unionist to be created DBE, and also the first woman president of the Trades Union Congress.

Louis I, *known as* **Louis the Pious** 778–840
King of Aquitaine, King of the Franks and Emperor of the Western or Carolingian Empire
He was born near Poitiers, and was the sole surviving son of CHARLEMAGNE. He was King of Aquitaine from 781 to 814, and Carolingian Emperor from 814 until his death. In 817 he attempted to secure his succession by dividing his territories between his three sons, Lothair (d.855), Pepin (d.838) and Louis 'the German' (d.876), with Lothair to be the emperor. In 829 a further share was given to a fourth son, Charles the Bald (CHARLES I of France). Louis I collaborated with St Benedict of Aniane to reform the Church, was a distinguished patron of scholarship, and defended the north-west from the raids of the Norsemen. It is greatly debated how far the proliferation of hereditary countships and of the institutions of vassalage, often thought to result from these raids, caused a general decline in imperial authority. After his death the empire disintegrated as his sons fought for supremacy.

Louis II, *known as* **Louis the Stammerer** 846–79
King of the Franks
He was the second son of CHARLES I, the Bald. King of Maine (856) and Aquitaine (867), he was often in revolt against his father, whom he succeeded with great difficulty as King of the Franks (877).

Louis III 863–82
King of France
He was the eldest son of LOUIS II, on whose death (879) he was proclaimed joint king with his brother CARLOMAN. He took Francia and Neustria as his territories. He defeated the pagan Norsemen at Saucourt (881), and was succeeded by Carloman.

Louis IV, d'Outremer 921–54
King of France
He was the son of CHARLES III, the Simple, himself the posthumous son of LOUIS II. His early life was spent in exile in England but he was recalled on the death of King Raoul by Hugh the Great (father of HUGO CAPET) from whose political domination he successfully escaped. Nevertheless, during his reign (936–954) many territorial princes in France consolidated their power to his cost. He was succeeded by his son, Lothair IV, and his grandson, LOUIS V.

Louis V, le Fainéant 967–87
King of France
The son of Lothair IV, he was associated with Lothair's kingship (978). He ruled France from 986, but died heirless and was thus the last Carolingian ruler of France. The throne passed to HUGO CAPET, the first of the Capetian line.

Louis VI, *known as* **Louis the Fat** 1081–1137
King of France
He succeeded his father PHILIP I in 1108. For most of his reign he campaigned incessantly against the turbulent and unruly nobility of the Île-de-France and eventually re-established his royal authority. Despite an inclination to gluttony and a corpulence which left him unable to mount a horse after the age of 46, he was one of the most active of the House of CAPET, and greatly increased the power and prestige of the monarchy.

Louis VII c.1120–1180
King of France
The second son of LOUIS VI, he was originally educated for a Church career, but became heir on the death of his brother Philip (1131). In 1137 he became king, married ELEANOR OF AQUITAINE, and continued the consolidation of royal authority begun by his father. He participated in the Second Crusade (1147), and had his marriage annulled (1152), whereupon Eleanor married Henry Plantagenet, Count of Anjou, who became King of England in 1154 as HENRY II. Against such a vast mass of power on both sides of the Channel, Louis enlisted papal support and instigated discord within Henry's family.

Louis VIII, *known as* **Louis the Lion** 1187–1226
King of France
Born in Paris, the son of PHILIP II and Isabella of Hainault, he participated during his father's reign in attacks on the English (1214, 1216) and led two brief crusades against the heretics of the County of Toulouse (1215, 1219). He ruled France from 1223, acquired the de Montfort claim to the County of Toulouse (1224) and resumed the Albigensian Crusade in the south (1226). Despite his dubious death in the autumn of that year (variously attributed to poisoning, dysentery and sexual starvation) this royal crusade led to the submission of Count Raymond VII to his widow, Blanche of Castile (1229), and the eventual absorption of all Languedoc into the royal domain.

Louis IX, *also called* **St Louis** 1214–70
King of France
In 1226 he succeeded his father, LOUIS VIII; his mother, the pious Blanche of Castile, was his regent until 1234. Making Blanche regent again, he joined the Seventh Crusade (1248–54), but was defeated and captured, and ransomed for 1 million marks in 1250. He remained in Palestine, fortifying Christian strongholds, until his mother's death (1252). His long and peaceful reign strengthened the Capetian dynasty. He founded the Abbey of Royamount (1228), built the Sainte-Chapelle in Paris to hold the crown of thorns relic he acquired from Constantinople (Istanbul), determined by the Pragmatic Sanction the relations between the French Church and the Pope, countenanced the Sorbonne, set up in the provinces royal courts of justice or parliaments, and authorized a new code of laws. By the Treaty of Paris (1259) he made peace with England, recognizing HENRY III as Duke of Aquitaine in exchange for French suzerainty elsewhere. In 1270 he embarked on a new crusade, but died of plague in Tunis. He was canonized by Pope BONIFACE VIII in 1297, and his feast day is 25 August. 🕮 William C Jordan, *Louis IX* (1979)

Louis X, *known as* **Louis the Quarrelsome** 1289–1316
King of Navarre and of France
The son of PHILIP IV, the Fair, he was King of Navarre (1305–16) and King of France (1314–16). During his brief reign, which was marked by unrest among his barons, he was guided in his policy by CHARLES OF VALOIS.

Louis XI 1423–83
King of France
The son of CHARLES VII and Mary of Anjou, he was born in Bourges, and as Dauphin of France he married Margaret of Scotland (daughter of King JAMES I) in 1436. He made two unsuccessful attempts to depose his father, but eventually succeeded to the throne on his father's death (1461). Though able and intelligent, his craftiness and treachery earned him the title 'spider-king'. He survived a coalition against him (1465) and broke the power of the nobility, led by CHARLES, THE BOLD of Burgundy, who was killed in 1477. By 1483 Louis had succeeded in uniting most of France under one Crown (with the exception of Brittany), and laid the foundations for absolute monarchy in France. He actively encouraged trade and industry, cherished the arts and sciences, and founded three universities, but he spent his latter years in great misery, suffering superstitious terrors and excessive fear of death.

Louis XII, *known as* **the Father of the People** 1462–1515
King of France
Born in Blois, the son of Charles, Duc d'ORLÉANS, he succeeded his cousin CHARLES VIII (the Affable) in 1498, and married his widow ANNE OF BRITTANY (he had previously been married to a daughter of LOUIS XI). His military ambitions failed when his forces were driven from Italy (1512) and he was also defeated at the Battle of the Spurs by HENRY VIII (1513). To guarantee peace, Louis married Mary Tudor, sister of Henry VIII, in 1514. Popular at home, he was responsible for continuing the trend towards centralized absolution, and was concerned with providing justice and avoiding oppressive taxation. 🕮 Frederic J Baumgartner, *Louis XII* (1994)

Louis XIII 1601–43
King of France
The eldest son of HENRY IV of France and his second wife MARIE DE MÉDICIS, he was born at Fontainebleau, and was only nine years old when his father was assassinated. In 1615 his mother, as regent, arranged his marriage to ANNE OF AUSTRIA (daughter of PHILIP III of Spain). Their eldest son, not born until 1638, succeeded him as LOUIS XIV. In 1617 he overthrew the regency of his mother, exiling her to the provinces, and assumed power. A devout Catholic, he attempted with moderate success to subdue the French Huguenots, and supported Emperor FERDINAND II in his struggle with the German Protestants. Conscientious, deeply religious and reserved, he had a strong sense of his royal position. In 1624 he appointed as his Chief Minister Cardinal RICHELIEU, who became the dominating influence of his reign. Richelieu subdued Huguenot resistance with the capture of La Rochelle (1628), while he supported the Protestants in Germany to prevent Habsburg domination of Europe. In 1629 Louis led a campaign in Italy to prevent Spanish expansion there. Although Richelieu was largely responsible for the centralization of administration and systematic patronage of the arts, the king was no cipher, and defended his minister against various plots, especially on the Day of Dupes (1630). On the death of Richelieu (1642) he turned to Cardinal MAZARIN, who became his widow's favourite during her regency for Louis XIV. 🕮 E W Marvick, *Louis XIII* (1987)

Louis XIV, *known as* **Le Roi Soleil ('The Sun King')** 1638–1715
King of France from 1643

Louis was born in St Germain-en-Laye, the son of LOUIS XIII and ANNE OF AUSTRIA, and came to the throne at the age of five. During his minority (1643–51), the government was carried on by his mother and her Chief Minister and lover, Cardinal JULES MAZARIN, and Mazarin continued to exercise control until his death in 1661. After that Louis was his own Chief Minister, working with unremitting energy and making all the important decisions himself (*L'état, c'est moi*: '*I* am the state'). Pious and conservative, he was able to present himself within France and throughout Europe as the model of royal absolutism. In 1660 Louis married the Infanta Maria Theresa of Spain (1638–83), daughter of PHILIP IV.

Louis' reign is characterized by aggressive foreign policies, especially against the Dutch and Spanish, and by artistic and architectural splendour at home. The maintenance of high tax levels enabled him to build great palaces, especially Versailles (1676–1708). He built up a navy and remodelled the French army into the most formidable fighting force in Europe. After the death of his father-in-law in 1665, Louis laid claim to part of the Spanish Netherlands and launched the War of Dutch Devolution (1667–68) under the command of TURENNE and CONDÉ, which provoked a triple alliance between Great Britain, Holland and Sweden and ended with the Treaty of Aix-La-Chapelle.

In the Second Dutch War (1672–78), Louis had Britain as an ally, having bribed CHARLES II with the secret Treaty of Dover (1670); his assault was only halted when William of Orange (later WILLIAM III of Britain) opened the sluices and inundated the country, but France did well out of the Peace of Nijmegen that ended the war in 1678. In the 1680s he secured Strasburg and Luxembourg. His wife, Maria Theresa, died in 1683, and in 1685 Louis privately married one of his mistresses, the Marquise de MAINTENON, under whose Catholic influence he passed the Revocation of the Edict of Nantes (1685) which led to a bloody persecution of Protestants and mass emigration of French Huguenots to Holland and England.

In 1689 the opponents of French expansionism formed the Grand Alliance, which was strengthened by the addition of William III in England. The French were victorious at Mons (1691), Steenkirk (1692) and Neerwinden (1693), and defeated an Anglo-Dutch fleet off Cape St Vincent (1693); but the allies maintained a stubborn resistance, and by the Treaty of Ryswick (1697) Louis had to yield most of his territorial gains.

In 1700 CHARLES II of Spain died; in his will he bequeathed his throne to Louis's grandson, Philip of Anjou (PHILIP V of Spain). The prospect of a union of the Crowns of Spain and France so alarmed the other European powers that it gave rise to the War of the Spanish Succession (1701–14), which proved disastrous for France with crushing defeats at Blenheim (1704) and Ramillies (1706). Peace was only finally achieved with the Treaty of Utrecht (1713), two years before Louis's death, leaving France practically bankrupt.

📖 John B Wolf, *Louis XIV* (1968); Nancy Mitford, *The Sun King* (1966); Jacques Roujon, *Louis XIV* (1943).

> The reign of Louis, 'The Sun King', had been the longest in European history, a reign of incomparable brilliance; it was the Augustan Age of French literature and art, the age of CORNEILLE, MOLIÈRE, RACINE, LULLY, POUSSIN and CLAUDE. His only son, Louis, died in 1711, and the Dauphin (his grandson, Louis of Burgundy) had died in 1712; so Louis XIV was succeeded by his great-grandson, the five-year-old LOUIS XV.
>
> 'How could God do this to me after all I have done for him?'
>
> – Louis's reaction to hearing the news of the French defeat at Blenheim, August 1704. Quoted in L Norton, *Saint-Simon at Versailles* (1958).

Louis XIV *See panel above*

Louis XV, *known as* **le Bien-Aimé ('the Well-Beloved')** 1710–74
King of France
Born in Versailles, he succeeded his great-grandfather, LOUIS XIV, in 1715, aged only five. His regent, Philippe, Duc d'ORLÉANS, a tolerant and liberal man, created much scandal by his private life and on his death in 1723 he was replaced briefly by the Duc de BOURBON. Louis came of age in 1723, married Maria, the daughter of STANISŁAS I LESZCZYŃSKI, the deposed King of Poland, in 1725, and in 1726 replaced Bourbon by his former tutor, the Cardinal de FLEURY. Fleury governed France well until his death in 1744 at the age of 90 but in 1740 France became embroiled, against his wishes, in the War of the Austrian Succession, in which Louis took part, falling seriously ill while at Metz in 1744. A popular king, the evident relief of his subjects at his recovery led to his being nicknamed '*le Bien-Aimé*'. Faced with his responsibilities as head of state, Louis was well intentioned but lacked Louis XIV's interest in politics or administration. He concentrated on preserving the royal autocracy to which he had succeeded and defending it from orthodox Catholics but was unable to effect any real reform of the system he had inherited. The heavy losses incurred under his command at Fontenoy left him with a marked distaste for warfare. In addition, he allowed his personal life to interfere with state matters as one particular mistress, Madame de POMPADOUR, who became 'reigning mistress' in 1745, used her position to exert considerable influence over government policy. However, fiscal reform advocated by the comptroller-general Machault was blocked and local bureaucracies increased in power, notably the *Intendants* who were the king's principal representatives in the provinces. Peace in Europe had been temporarily achieved in 1748 but in 1756 renewed hostilities in Europe involved France in the Seven Years War. A series of military disasters abroad led to the replacement of the Foreign Minister, Bernis, by the Duc de CHOISEUL, a liberal and a friend and ally of Madame de Pompadour, who achieved peace with the *Pacte de famille* (1761), a permanent alliance with Spain, and rebuilt the weakened French navy. Choiseul regarded the Treaty of Paris (1763), which established British hegemony in India and North America, as little more than a truce in the continuing struggle between France and Great Britain, but Louis favoured a general European peace and worked behind Choiseul's back to promote diplomatic initiatives with this aim. Abroad Choiseul was able to incorporate the Duchy of Lorraine into France (1766) and conquer Corsica, a former Genoese colony (1770). At home, he was largely responsible, in alliance with the Parlements, for the suppression of the French Jesuits, despite the misgivings of Louis. Madame de Pompadour died in 1764, the Dauphin the following year and the queen in 1768. Louis found a new mistress and companion in Madame du BARRY. The new Dauphin, Louis's grandson, the future LOUIS XVI, was married in 1770 to MARIE ANTOINETTE, the youngest daughter of the Habsburg Empress MARIA THERESA, cementing the alliance between France and the Empire. In the same year, Choiseul, at Madame du Barry's insistence, was dismissed. To the growing displeasure of the Parlements all future projects for reform were abandoned. Louis and his new Chancellor, Maupeou, attempted to curb the Parlements' power, replacing the hereditary magistracy with a new body of royal nominees. However, the old system was reinstated after Louis's death. His last years were ones of peace abroad and deceptive calm at home, but the prestige of the royal government had never been lower and the France Louis left to his grandson remained in the grip of the same antiquated autocracy he had inherited, weakened but unreformed. 📖 G P Gooch, *Louis XV: The Monarchy In Decline* (1956)

Louis XVI 1754–93
King of France
He was born at Versailles, the third son of the Dauphin Louis and Maria Josepha of Saxony. He became Dauphin by the death of his father and his elder brothers, and succeeded his grandfather LOUIS XV in 1774. He was married in 1770 to MARIE ANTOINETTE, youngest daughter of the Habsburg Empress MARIA THERESA, to strengthen the Franco-Austrian alliance. When he ascended the throne the treasury was empty, the state was in debt to 4,000 million livres, and taxation levels were excessive. Reforms proposed by CHRÉTIEN MALESHERBES and ANNE ROBERT TURGOT were accepted by the king, but rejected by the court, aristocracy, parliaments and Church. Louis managed to make some reforms and to relieve some of the fiscal problems and was for a time extremely popular. In 1777 JACQUES NECKER was made director-general, and succeeded in bringing the finances to a more tolerable condition, but through France's outlay in the American Revolution he was obliged to propose the

taxation of the privileged classes, which led to his resignation. He was replaced by CHARLES CALONNE (1783) who renewed for a while the splendour of the court, and advised the calling together of an Assembly of Notables. His successor, Brienne, obtained some new taxes, but the parliament of Paris refused to register the edict. The convening of the Estates General was universally demanded. Louis registered the edicts and banished the councillors of parliament, but had to recall them. In May 1788 he dissolved all the parliaments and established a *Cour plénière*. In August he ordered that the Treasury should cease all cash payments except to the army. The Estates General, in abeyance since 1614, met in May 1789 at Versailles. The *tiers-état* (third estate) formed themselves into a National Assembly, thereby commencing the Revolution, and called themselves the Constituent Assembly. The resistance of Louis to the demands of the deputies for political independence and equal rights led to their declaration of inviolability. Louis deployed troops, dissolved the Ministry and banished Necker. With revolutionary outbreaks in Paris on 12 July 1789, the National Guard of Paris was called out. On 14 July the people stormed the Bastille and the unrest spread to the provinces. On 4 August feudal and manorial rights, which declared the equality of human rights, were abrogated by the Assembly. The royal princes and all the nobles who could escape sought safety in flight. The royal family remained at Versailles and tried to conciliate the people by the feigned assumption of republican sentiments, but on 5 October the palace was attacked, compelling them to return to Paris, where the Assembly also moved. For two years Louis alternately made concessions to the republicans, and devised schemes for escape. The Constituent Assembly was succeeded in 1791 by the Legislative Assembly and in April 1792 Louis was compelled by the Girondins to a war (ultimately unsuccessful) with Austria. After the advance of the Prussians under the Duke of Brunswick into Champagne the Assembly dissolved itself, the National Convention took its place, and the Republic was proclaimed. In December the king was brought to trial, and called upon to answer for repeated acts of treason against the Republic. On 20 January 1793 sentence of death was passed, and next day he was guillotined in the Place de la Révolution, ending 1,025 years of monarchy. 🕮 S K Padover, *Life and Death of Louis XVI* (1939)

Louis XVII 1785–95
Titular King of France
Born Louis Charles at Versailles, the second son of LOUIS XVI, he became Dauphin on the death of his brother (1789). He became king (but only in name) in prison on the execution of his father (1793). He died, probably of tuberculosis, but rumour suggested by poison. Many persons subsequently claimed to be the Dauphin.

Louis XVIII, *in full* **Louis Stanislas Xavier, Comte de Provence** 1755–1824
King of France
Born at Versailles, he was the younger brother of LOUIS XVI. He fled from Paris to Belgium (1791), and eventually took refuge in England (1807). He declared himself king in 1795, following the death of his nephew, the Dauphin LOUIS XVII, and became the focal point for the Royalist cause. On NAPOLEON I's downfall (1814) he re-entered Paris, and promised a Constitutional Charter. His restoration to the throne was interrupted by Napoleon's return from Elba until after Waterloo (1815). His reign was marked by the introduction of parliamentary government with a limited franchise, but after 1820 the hard-line ultras, who favoured no concessions to Revolution principles, increased their control.

Louis (Lajos) I, *known as* **Louis the Great** 1326–82
King of Hungary and of Poland
He succeeded his father, CHARLES ROBERT (as King of Hungary in 1342), and campaigned unsuccessfully (1344–56) against Queen Giovanna of Naples, who was implicated in the murder of her husband Andrew, Louis's brother. He conquered Dalmatia, including the port of Dubrovnik, from Venice (1358), and also became King of Poland (1370) on the death of his uncle Casimir III. A notable patron of the arts, Louis founded the first Hungarian university at Pécs in 1367.

Louis IV, *known as* **Louis the Bavarian** c.1283–1347
Holy Roman Emperor
The son of Louis, Duke of Upper Bavaria, he was born in Munich, and was elected King of Germany (1314), in opposition to Frederick II, Duke of Austria, whom he eventually defeated at Mühldorf (1322). Pope JOHN XXII, however, refused to recognize his title, referring to him only as Louis the Bavarian, a name which stuck. In 1328 he received the imperial crown from the people of Rome, but was forced to leave Italy the next year. Thereafter Louis remained mostly in Germany, maintaining his position against internal opposition with the financial support of the cities. He waged a war of propaganda against the papacy with the help of MARSILIUS OF PADUA, William of OCCAM and the Spiritual Franciscans; he invaded Italy (1327–30), captured Rome and set up an antipope, Nicholas V (1328–30), in opposition to Pope John. In 1338, at the Diet of Rhens, the electoral princes precipitated a Church/State division by declaring that the emperor did not require papal confirmation of his election. His energetic policy of family aggrandizement, however, cost him his alliance with the House of Luxembourg, who raised up a rival emperor, CHARLES IV, a year before Louis met his death while hunting.

Louis Philippe, *known as* **the Citizen King** 1773–1850
King of the French
Born in Paris, he was the eldest son of the Duc d'ORLÉANS, and was brought up by Madame de GENLIS. He joined the National Guard, and, like his father, renounced his titles and assumed the surname 'Égalité'. He fought in the wars of the republic, but deserted to the Austrians. For a time he lived in exile, mainly in Twickenham, London (1800–09). In 1809 he married Marie Amélie, daughter of FERDINAND I of the Two Sicilies, and on the Restoration he recovered his estates. After the Revolution of 1830 he was appointed lieutenant-general, and then elected king. The country prospered under the rule of the 'citizen king', which saw victory of the upper bourgeoisie over the aristocracy, but their political corruption united all extremists in a cry for electoral reform. Louis Philippe took a middle course between the extreme right-wing Legitimists and socialists and republicans. Numerous rebellions and assassination attempts led him to more repressive actions like muzzling newspapers and tampering with trial by jury. Agricultural and industrial depression (1846) caused widespread discontent, and when the Paris mob rose (February 1848), he was forced to abdicate, and escaped to England as 'Mr Smith'. He died in Claremont, Surrey.

Louis the Bavarian *See* LOUIS IV

Louis, Joe, *professional name of* **Joseph Louis Barrow** 1914–81
US boxer
Born in Lexington, Alabama, he won the US amateur light-heavyweight title in 1934 and turned professional. In 1936 he was defeated for the first time, by the German champion Max Schmeling (1905–2005), with a knock-out in the twelfth round (but he took merciless revenge with a first round knock-out in a return bout). He won the world championship by beating James J Braddock in 1937, and held it for a record twelve years, defending his title 25 times. He retired in 1949, but later made unsuccessful comebacks against Ezzard Charles in 1950 and ROCKY MARCIANO in 1951. A boxer of legendary swiftness, power and grace, he won 68 of his 71 professional fights. 🕮 Gerald Astor, *And a Credit to His Race: The Hard Life and Times of Joseph Louis Barrow, a.k.a. Joe Louis* (1974)

Louis, Morris, *originally* **Morris Bernstein** 1912–62
US painter
Born in Baltimore, he was influenced in the early 1950s by JACKSON POLLOCK and the New York Action Painters, but more decisive was the impact of HELEN FRANKENTHALER, whose *Mountains and Sea* (1952) inspired him to throw acrylic paint on to unprimed canvases to create brilliant patches of abstract colour, forms without depth.

Louis, Pierre *See* LOUS, PIERRE

Louis, Pierre-Charles-Alexandre 1787–1872
French clinician and pathologist
Born in Ai, Champagne, he trained in medicine in Paris and practised for seven years in Russia, where his powerlessness in the face of a diphtheria epidemic convinced him that his medical knowledge was woefully inadequate. He returned to Paris and immersed himself in a hospital for seven years, collecting thousands of case histories and performing hundreds of autopsies. This resulted ultimately in his important publications on tuberculosis and typhoid fever, and in his introduction of the 'numerical method' for evaluating the effects of therapy. Louis's numerical method was a forerunner of the modern drug trial.

Louisa 1776–1810
Queen of Prussia
She was born in Hanover, where her father, Duke Karl of Mecklenburg-Strelitz, was commandant. Married to the Crown Prince of Prussia (afterwards FREDERICK WILLIAM III) in 1793, she was the mother of FREDERICK WILLIAM IV and WILHELM I. She endeared

herself to her people by her spirit and energy during the period of national calamity that followed the Battle of Jena (1806), and especially by her patriotic and self-denying efforts to obtain concessions at Tilsit (1807) from NAPOLEON I, though he had shamelessly slandered her.

Loutherbourg, Philippe Jacques de 1740–1812
British painter, stage designer and illustrator
Born in Germany, he was educated at Strasbourg. His work, exhibited at the Paris Salon, attracted the attention of DIDEROT. In 1771 he moved to London and was hired by DAVID GARRICK as artistic adviser for his Drury Lane theatre, and he became a British subject. He devised many innovatory stage design techniques, including dramatic transparent backdrops, which influenced contemporary English landscape painting. In 1781 he invented his celebrated *Eidophusikon*, a moving panorama complete with lighting and sound effects which fascinated many artists, including THOMAS GAINSBOROUGH. He illustrated, among other works, an edition of SHAKESPEARE. One of the most versatile artists of the Romantic period, he later retired to Hammersmith and took up faith healing.

L'Ouverture *See* TOUSSAINT LOUVERTURE

Louvois, François Michel le Tellier, Marquis de 1641–91
French statesman
Born in Paris, he was an energetic war minister under LOUIS XIV from the War of Devolution (1668). His work reforming and strengthening the army bore fruit in the Dutch War, which ended with the Peace of Nijmegen (1678). He took a leading part in the capture of Strasbourg (1681) and in the persecution of Protestants. Recognized as a brilliant administrator, he was the king's most influential minister in the years 1683–91.

Lous, Pierre, *pseudonym of* **Pierre Louis** 1870–1925
French poet and novelist
He was born in Ghent, Belgium. In 1891 he founded a review in Paris called *Le Conque* to which HENRI RÉGNIER, ANDRÉ GIDE and PAUL VALÉRY were contributors. It also featured his first poems, before they appeared in *Astarté* (1891). His lyrics, based on the Greek form and popular in their time for their eroticism, are masterpieces of style. Other volumes are *Poésies de Méléagre de Gédara* (1893), *Scènes de la vie des courtisanes de Lucien* (1894, 'Scenes from Lucien's Life of Courtesans') and *Les Chansons de Bilitis* (1894), poems about Sapphic love which he claimed to have translated from the Greek. In 1896 his novel *Aphrodite* was published with great success, and a psychological novel, *La Femme et le pantin*, appeared in 1898 (Eng trans, *Woman and Puppet*, 1908).

Lovat, Simon Fraser, 11th Lord c.1667–1747
Scottish chief
Born in Tomich, Ross-shire, he graduated from Aberdeen in 1695. In 1696 his father, on the death of his great-nephew, Lord Lovat, assumed that title, and the next year Simon, after failing to abduct the late lord's nine-year-old daughter and heiress, forcibly married her mother, a lady of the Atholl family – a crime for which he was found guilty of high treason and outlawed. He succeeded his father as 11th Lord Lovat (1699), fled to France (1702), but returned to Scotland (1703) as a Jacobite agent and became involved in the abortive Queensberry plot, and again escaped to France, where he was a captive for ten years. In 1715 he supported the government and obtained a full pardon, with possession of the Lovat title and estates. In the 1745 Jacobite Rebellion he sent his son and clan to fight for the Young Pretender (CHARLES EDWARD STUART), while he protested his loyalty to the government. After Culloden he fled, but was captured, taken to London for trial, and beheaded.

Love, Augustus Edward Hough 1863–1940
English geophysicist
Born in Weston-super-Mare, he studied at Cambridge from 1882, and in 1899 became Sedleian Professor of Natural Philosophy at Oxford. His research interests included fluids and solids, theoretical geophysics, the theory of electric waves and ballistics. His *Treatise on the Mathematical Theory of Elasticity* (2 vols, 1892–93) was a standard textbook for nearly 50 years. He introduced the concept of 'Love waves' (Rayleigh waves transmitted over the surface of an elastic solid) and also related the periods and group velocities of surface waves, which led to the first evidence for the different crustal thicknesses of continents and oceans.

Love, Nat, *known as* **Deadwood Dick** 1854–1921
US cowboy
Born into slavery in Davidson County, Tennessee, he left home at 15 and became a cowboy near Dodge City, Kansas, working in cattle drives until 1889 and winning a reputation for his horsemanship and knowledge of cattle brands. He later became a railway porter (1890) and wrote stories about many legendary Western characters in his autobiography, *The Life and Adventures of Nat Love, Better Known in the Cattle Country as Deadwood Dick* (1907).

Lovecraft, H(oward) P(hillips) 1890–1937
US science-fiction writer and poet
He was born in Providence, Rhode Island, where he lived all his life, was educated at local schools, and as a young man supported himself by ghost-writing and text revising. From 1923 he was a regular contributor to *Weird Tales*, and his cult following can be traced to the 60 or so stories first published in that magazine. He created what has come to be known as the 'Cthulhu Mythos', which holds that the Earth was originally inhabited by fish-like beings called the 'Old Ones' who worshipped the gelatinous Cthulhu. Among his various collections are *The Shadow over Innsmouth* (1936), *The Outsider and Others* (1939), *Dreams and Fancies* (1962) and *Dagon and Other Macabre Tales* (1965); the posthumous volumes were edited by August Derleth. His novellas include *The Case of Charles Dexter Ward* (1928) and *At the Mountains of Madness* (1931). 🕮 A Derleth, *H P Lovecraft: A Memoir* (1945)

Lovejoy, Arthur Oncken 1873–1963
US philosopher and historian of ideas
Born in Berlin, Germany, he studied in the USA at Berkeley and Harvard and in France at the Sorbonne, Paris. After holding various teaching positions in the USA he became professor of philosophy at Johns Hopkins University (1910–38). He was co-founder (1938) and first editor of the *Journal of the History of Ideas* and effectively invented the discipline under that title. His method of detailed 'philosophical semantics' investigating the history of key terms and concepts is best exemplified in *The Great Chain of Being: a Study of the History of an Idea* (1936) and *Essays in the History of Ideas* (1948).

Lovelace, (Augusta) Ada, Countess of, *née* **Byron** 1815–52
English writer and mathematician
The daughter of Lord BYRON, she taught herself geometry, and was educated in astronomy and mathematics. Acquainted with many leading figures of the Victorian era, she owes much of her recent fame to her friendship with CHARLES BABBAGE, the computer pioneer. She translated and annotated an article on his Analytical Engine written by an Italian mathematician, L F Menabrea, adding many explanatory notes of her own. The 'Sketch of the Analytical Engine' (1843) is an important source on Babbage's work. The high-level universal computer programming language, ADA, was named in her honour, and is said to realize several of her insights into the working of a computer system. 🕮 Doris Langley Moore, *Ada, Countess of Lovelace: Byron's Legitimate Daughter* (1977)

Lovelace, Richard 1618–57
English Cavalier poet
Born in Woolwich, near London, or perhaps in Holland, he was educated at Charterhouse and Gloucester Hall, Oxford. He entered the court and went on the Scottish expedition in 1639. In 1642 he was imprisoned for presenting to the House of Commons a petition from the royalists of Kent 'for the restoring the king to his rights', and was released on bail. He spent his estate in the king's cause, assisted the French in 1646 to capture Dunkirk from the Spaniards, and was sent to jail on returning to England (1648). There he revised his poems, including 'To Althea, from Prison', and in 1649 published the collection *Lucasta*. He was freed at the end of 1649. In 1659 his brother published a second collection of his poems, *Lucasta: Posthume Poems*. 🕮 C S Ker, *Richard Lovelace* (1949)

Lovell, Sir (Alfred Charles) Bernard 1913–
English astronomer
Born in Oldham Common, Gloucestershire, he graduated from Bristol University then became a physics lecturer at Manchester University. During World War II he worked for the Air Ministry Research Establishment, where he developed airborne radar for blind bombing and submarine defence. In 1951 he became professor of radio astronomy at Manchester University and director of Jodrell Bank Experimental Station (now the Nuffield Radio Astronomy Laboratories). He gave the radio Reith Lectures in 1958. Lovell was a pioneer in the use of radar to detect meteors and day-time meteor showers. In 1950 he discovered that the rapid oscillations in the detected intensity (or 'scintillations') of signals from galactic radio

sources were produced by the Earth's ionosphere, and were not intrinsic to the sources. He was the energetic instigator of the funding, construction and use of the radio telescope at Jodrell Bank, Cheshire. Plans to use the telescope to track Sputnik 1 and 2 attracted the funding which solved financial problems associated with its construction, and it was completed in 1957. From 1958 Lovell collaborated with FRED WHIPPLE in the study of flare stars. He has written several books on radio astronomy and on its relevance to life and civilization today. Elected FRS in 1955, he was knighted in 1961and received the Royal Astronomical Society's Gold Medal on his retirement from Jodrell Bank in 1981. *Astronomer by Chance*, his autobiography, was published in 1990. 🕮 Dudley Saward, *Bernard Lovell: A Biography* (1984)

Lovelock, James Ephraim 1919–
English chemist
Born in Letchworth, Hertfordshire, he was educated at the universities of Manchester and London before he joined the National Institute for Medical Research in London (1941–61). He then held various posts in the USA, and since 1964 has pursued a career as an independent scientist. Since 1994 he has been Visiting Fellow at Green College, Oxford. He invented the 'electron capture detector' (1958), a high-sensitivity device which was used in the first, and most subsequent, measurements of the accumulation of CFCs (or chlorofluorocarbons) in the atmosphere. In 1972 he put forward his controversial 'Gaia' hypothesis, which proposes that the Earth's climate is constantly regulated by plants and animals, to maintain a life-sustaining balance of organic substances in the atmosphere. Gaia is now regarded as an evolving system comprising the atmosphere, oceans, surface rocks and the biota, which behaves as a superorganism. Addressing global warming, his unexpected support in 2004 for nuclear power surprised the environmentalist supporters of Gaia. Lovelock's theories are expounded in the popular books *Gaia* (1979), *The Practical Science of Planetary Medicine* (1991) and *The Revenge of Gaia – Earth's Climate Crisis and the Fate of Humanity* (2006). In 2000 he published his autobiography, *Homage to Gaia: The Life of an Independent Scientist*. He was awarded the CBE in 1990 and made a Companion of Honour in 2003.

Lover, Samuel 1797–1868
Irish writer, artist and songwriter
He was born in Dublin, and he established himself there in 1818 as a marine painter and miniaturist. One of the founders of the *Dublin University Magazine*, he published *Legends and Stories of Ireland* in 1831 with his own illustrations. In 1835 he moved to London, where he wrote two popular novels, *Rory O'More* (1836) and *Handy Andy* (1842). He helped DICKENS found *Bentley's Miscellany* and in 1844 started an entertainment, called 'Irish Evenings', which was hugely popular in both England and the USA (1846–48) with songs like 'The Low-Backed Car' and 'Molly Bawn'. 🕮 W B Samuel, *The Life of Samuel Lover* (1874)

Lovett, Lyle 1956–
US country music singer, guitarist and songwriter
Born in Klein, Texas, he began performing while a student, and was encouraged by NANCI GRIFFITH. He became a leading figure in the 'new country' movement of the late 1980s with the release of his eponymous debut album in 1986, and consolidated his reputation as a huge but idiosyncratic talent with the blues-inflected *Pontiac* (1987), followed by the jazzier *And His Large Band* (1989), *Joshua Judges Ruth* (1992) and *I Love Everybody* (1994). While clearly rooted in country, his original musical conception is not limited by generic boundaries. He married the actress JULIA ROBERTS in 1993; their subsequent break-up is reflected in *The Road To Ensenada* (1996), his last album of original songs before 2003's *My Baby Don't Tolerate*. He has also appeared as an actor in various films, notably ROBERT ALTMAN's *Short Cuts* (1993) and *Cookie's Fortune* (1999).

Lovino, Bernardino *See* LUINI, BERNARDINO

Low, Bet 1924–
Scottish artist
Born in Gourock, Strathclyde, she trained at Glasgow School of Art and at Hospitalfield. She married fellow artist Tom MacDonald, and exhibited with him at the Blythswood Gallery, Glasgow (1969). In 1963 she became a co-founder of the New Charing Cross gallery. Her subtle use of colour and form in her watercolours enables her to capture the spirit of a place. She was later elected to the Royal Scottish Water Colour Society and to the Royal Glasgow Institute of Artists, and became an Associate of the Royal Scottish Academy.

Low, Sir David Alexander Cecil 1891–1963
British political cartoonist
Born in Dunedin, New Zealand, he worked for several newspapers in New Zealand and for the *Bulletin of Sydney*, then joined the *Star* in London (1919). In 1927 he started to work for the *Evening Standard*, for which he drew some of his most successful cartoons. His art ridiculed all political parties, and some of his creations will never die, notably Colonel Blimp, who has been incorporated into the English language. From 1950 he worked for the *Daily Herald*, and from 1953 with *The (Manchester) Guardian*. He produced volumes of collected cartoons, including *Lloyd George and Co* (1922), *Low and I* (1923), *A Cartoon History of the War* (1941), *Low's Company* (1952), *Low's Autobiography* (1956) and many more.

Lowe, Arthur 1914–82
English actor
Born in Hayfield, Derbyshire, he became an actor while serving in the armed forces during World War II, appearing with the army entertainments division. His many stage appearances included *Larger Than Life* (1950), *Pal Joey* (1954) and *The Pajama Game* (1955), but it was television that brought him his greatest popularity, notably as the irascible Mr Swindley in *Coronation Street* (1960–65), and as the pompous patriot Captain Mainwaring in *Dad's Army* (1968–77). His later stage work included *Inadmissible Evidence* (1964), *The Tempest* (1974) and *Bingo* (1974). He appeared in films from 1948 in supporting roles, and he took more substantial film roles in *The Ruling Class* (1972) and *O Lucky Man* (1973).

Löwe, Karl *See* LOEWE, (JOHANN) KARL GOTTFRIED

Lowell, Abbott Lawrence 1856–1943
US political scientist
Born in Boston into distinguished Massachusetts industrial and cultural dynasties, he was the brother of PERCIVAL LOWELL and AMY LOWELL. He graduated from Harvard in 1877, qualified in law in 1880, and practised law in Boston from 1880 to 1897, after which he lectured in law at Harvard and was made professor of government there in 1900. He was president of Harvard from 1909 to 1933. His publications include *Essays on Government* (1889), *Government and Parties in Continental Europe* (1897), *The Influence of Party Upon Legislation in England and America* (1902), *The Government of England* (1908), *Public Opinion and Popular Government* (1913), *Public Opinion in War and Peace* (1923), *Conflicts of Principle* (1932), *At War with Academic Traditions* (1934) and *What a College President Has Learned* (1938).

Lowell, Amy 1874–1925
US Imagist poet
Born in Brookline, Massachusetts, she was the sister of ABBOTT LOWELL and PERCIVAL LOWELL. She travelled extensively with her parents in Europe, and bought the parental home, 'Sevenals', in 1903. She wrote volumes of *vers libre* which she named 'unrhymed cadence', starting with the conventional *A Dome of Many-Coloured Glass* (1912) and *Sword Blades and Poppy Seeds* (1914). She also wrote 'polyphonic prose'. Her other works include *Six French Poets* (1915), *Tendencies in Modern American Poetry* (1917) and a biography of KEATS (1925). She was posthumously awarded the Pulitzer Prize in 1926 for *What's O'Clock* (1925). 🕮 F C Flint, *Amy Lowell* (1969)

Lowell, Francis Cabot 1775–1817
US industrialist
Born in Newburyport, Massachusetts, he built a cotton-spinning and weaving mill in Waltham, Massachusetts, during the War of 1812, taking advantage of the interruption in English imports and the consequent demand for domestic goods. Based on his observations of textile mills in England, he constructed, with the help of mechanical designer Paul Moody, a cotton factory which was the first in the world to process raw cotton and manufacture it into finished cloth under a single roof. Its establishment and Lowell's successful bid to win tariff protection in 1816 were fundamental in the creation of an industrial economy in New England. Lowell, Massachusetts, is named after him.

Lowell, James Russell 1819–91
US poet, essayist and diplomat
Born in Cambridge, Massachusetts, Lowell graduated from Harvard in 1838. In 1843 he helped to edit *The Pioneer*, with NATHANIEL HAWTHORNE, EDGAR ALLAN POE and JOHN WHITTIER as contributors, and in 1845 he published his *Conversations on the Old Poets*. At the outbreak of war with Mexico (1846), he wrote a satiric poem in the Yankee dialect, out of which grew the *Biglow Papers* (1848). Many serious poems, written about 1848, formed a volume, and *A Fable for Critics* (1848) is a series

of witty sketches of US authors. He visited Europe (1851–52), and in 1855 he was appointed professor of modern languages and literature at Harvard, later returning to Europe to finish his studies. He edited the *Atlantic Monthly* from 1857, and with CHARLES ELIOT NORTON the *North American Review* (1863–67). His prose writings include *Among my Books* (1870) and *My Study Windows* (1871). The second series of *Biglow Papers* appeared during the Civil War, in 1867. An ardent abolitionist, he gave himself unreservedly to the cause of freedom. He was appointed US Minister to Spain in 1877, and was transferred in 1880 to Great Britain, where he remained until 1885. 🕮 H E Scudder, *James Russell Lowell* (2 vols, 1901)

Lowell, Percival 1855–1916
US astronomer
Born into a prominent Boston family, the brother of ABBOTT and AMY LOWELL, he was educated at Harvard and established the Flagstaff (Lowell) Observatory in Arizona (1894). He is best known for his observations of Mars, which resulted in a series of maps showing linear features crossing the surface. In 1907 he led an expedition to the Chilean Andes which produced the first high-quality photographs of Mars. He popularized his ideas in a series of books which include *Mars and its Canals* (1906) and *Mars as the Abode of Life* (1910). He is known for his prediction of the brightness and position of a planet that was supposedly responsible for the orbital perturbation of Neptune and Uranus. This he called planet X. In 1930, 14 years after his death, Pluto was found (discovered by CLYDE WILLIAM TOMBAUGH).

Lowell, Robert Traill Spence, Jnr 1917–77
US poet
Born in Boston, the great-great-nephew of JAMES RUSSELL LOWELL, he attended St Mark's School and Harvard, but left to go to Kenyon College to study poetry, criticism and classics under JOHN CROWE RANSOM, then attended Louisiana State University. During World War II he was a conscientious objector and was imprisoned for six months (1944). In 1940 he married the writer JEAN STAFFORD and became a Roman Catholic. His first collection, *Land of Unlikeness* (1944), contained biographical poems, and his widely acclaimed second volume, *Lord Weary's Castle* (1946), won him the Pulitzer Prize in 1947. *Life Studies* (1959), *For the Union Dead* (1964) and *Near the Ocean* (1967) were also 'confessional'. During the Vietnam years, he wrote *Notebook* (1968), and in *The Dolphin* (1973) he made public personal letters and anxieties. 🕮 I Hamilton, *Robert Lowell: A Biography* (1985)

Lower, Richard 1631–91
English physician and physiologist
Born in Tremeer, near Bodmin, he studied at Oxford, where he came under the influence of THOMAS WILLIS and several others soon to achieve prominence in the Royal Society of London. Gaining his MD in 1665, Lower followed Willis to London, setting up in medical practice and joining the Royal Society. He carried out early experiments on blood transfusion between dogs, and his *Tractatus de Corde* (1669, 'Treatise on the Heart') provides a fine account of contemporary knowledge in pulmonary and cardiovascular anatomy and physiology. Following WILLIAM HARVEY, Lower recognized that the heart acts as a muscular pump. He went on to investigate the colour change between dark venous blood and red arterial blood, and with ROBERT HOOKE deduced that the red colour resulted from the mixing of dark blood with inspired air in the lungs. Lower thus established that the function of respiration lay in adding something to the blood. After the 1670s, he concentrated on his medical practice.

Lowie, Robert Harry 1883–1957
US cultural anthropologist
Born in Vienna, Austria, he went to the USA in 1893 and grew up in New York City. He studied anthropology at Columbia University under FRANZ BOAS. From 1907 to 1917 he was on the staff of the American Museum of Natural History in New York City, following which he worked at the University of California, Berkeley (1917–50). He made several ethnographic studies of Native American societies, especially the Crow, publishing his *Social Life of the Crow Indians* in 1912 and *The Crow Indians* in 1935. His most influential general works were *Primitive Society* (1920), *Primitive Religion* (1924), *The History of Ethnological Theory* (1937) and *Social Organization* (1948), in which his theoretical position reflected that of the Boasian school of culture-history.

Lowry, L(aurence) S(tephen) 1887–1976
English painter
Born in Manchester, he worked as a clerk until 1952, but trained at Manchester College of Art in the evenings (1905–15). From 1915 to 1925 he attended Salford School of Art, and from 1918 the life class at Manchester Academy of Fine Arts. He produced numerous pictures of the Lancashire industrial scene, mainly in brilliant whites and greys, often filled with uncommunicative matchstick antlike men and women, in a deliberately naive style. He lived at home nursing his mother until her death in 1939. Their claustrophobic relationship is the subject of a ballet. His work is represented in many major collections with the largest public collection of his work at The Lowry in Salford Quays.

Lowry, (Clarence) Malcolm 1909–57
English novelist
Born in New Brighton, Merseyside, he left public school to become a deck hand on a ship bound for China, but returned to take a degree at St Catherine's College, Cambridge. He wrote about the voyage in his first novel, *Ultramarine* (1933), but completed only one more book, *Under the Volcano* (1947), for which he is best known. In later life a wanderer and alcoholic, he lived in Mexico, then in British Columbia, returning to England where he died 'by misadventure', choking in his sleep. Posthumous publications include stories, poems, letters and three novels: *Lunar Caustic* (1963), *Dark as the Grave Wherein my Friend is Laid* (1968) and *October Ferry to Gabriola* (1970). 🕮 G Bowker, *Pursued by Furies* (1993); D Day, *Malcolm Lowry* (1974)

Lowry, (Thomas) Martin 1874–1936
English chemist
Born in Bradford, West Yorkshire, he studied chemistry under HENRY ARMSTRONG at the City and Guilds Institute, South Kensington, and in 1912 moved to Guy's Hospital Medical School, where from 1913 he was head of the chemistry department. In 1920 he became the first to hold a chair of physical chemistry at Cambridge. His earliest researches were on the changes in optical rotation (mutarotation) which occur when camphor derivatives are treated with acids or bases, leading ultimately to his redefinition of the terms acid and base (1923). He also worked extensively on optical rotatory dispersion, foreshadowing its importance many years later as a structural tool in organic chemistry. He was elected FRS in 1914, and from 1928 to 1930 was president of the Faraday Society.

Lowth, Robert 1710–87
English prelate and scholar
Born in Winchester, Hampshire, he became professor of poetry at Oxford in 1741, Bishop of St Davids and of Oxford in 1766, and of London in 1777. He published *De Sacra Poesi Hebraeorum* (1753), a *Life of William of Wykeham* (1758) and a new translation of Isaiah. He was one of the first to treat the Bible poetry as literature in its own right.

Lowther, Hugh Cecil *See* LONSDALE, 5TH EARL OF

Loy, Myrna, *originally* **Katerina Myrna Adele Williams** 1905–93
US film actress and comedienne
Born in Radersburg, Montana, of Welsh ancestry, she moved with her family to Los Angeles in 1919 and was performing in a movie house chorus when she was spotted by RUDOLPH VALENTINO. She made her debut in *Pretty Ladies* (1925) and then appeared in scores of silent features. After her role as the sadistic daughter in *The Mask of Fu Manchu* (1932), she moved to comedy and made her first of 13 appearances opposite William Powell (1892–1984) in *The Thin Man* (1934), where they played husband-and-wife detectives. She was successful also in *Test Pilot* (1938), *The Rains Came* (1939) and *The Best Years of Our Lives* (1946). She latterly became a character actress and made a belated Broadway debut in 1974, ending her acting career opposite HENRY FONDA in the television film *Summer Solstice* (1981). Her autobiography, *Being and Becoming*, was published in 1987.

Loyola, St Ignatius *See* IGNATIUS LOYOLA, ST

Loyson, Charles *See* HYACINTHE, PÈRE

Lü d.180 BC
Empress of China
The wife of Liu Bang (Liu Pang) or Gaozu (Kao tsu) who was the founder of the Han dynasty, she was virtual regent for 15 years after his death in 195 BC, first for her son Hui Ti and then, after his death (188 BC), for two other infants. By the time of her death, she had firmly established the authority of the ruling Liu family, although Chinese historiography condemns her for her resort to nepotism and employment of eunuchs at court.

Lubbers, Ruud (Rudolphus) Franz Marie 1939–
Dutch politician
After graduating from Erasmus University, Rotterdam, he joined the family engineering business of Lubbers Hollandia. He made rapid progress after entering politics, becoming Minister of Economic Affairs (1973) and, at the age of 43, prime minister (1982–94), leading a Christian Democratic Appeal (CDA) coalition. From 2000 until 2005, he was the United Nations High Commissioner for Refugees.

Lubbock, Sir John, 1st Baron Avebury 1834–1913
English politician and biologist
Born in London, he was the son of the astronomer Sir J W Lubbock (1803–65). From Eton he went into his father's banking house at the age of 14, becoming a partner in 1856. He served on several educational and currency commissions, and in 1870 was returned for Maidstone as a Liberal MP, and then in 1880 for London University – as a Liberal-Unionist from 1886 to 1900. He succeeded in passing more than a dozen important measures, including the Bank Holidays Act (1871), the Bills of Exchange Act, the Ancient Monuments Act (1882) and the Shop Hours Act (1889). He was Vice-Chancellor of London University (1872–80), president of the British Association (1881), vice-president of the Royal Society, president of the London Chamber of Commerce, chairman of the London County Council (1890–92) and much else. Scientifically, he is best known for his researches on primitive man and on the habits of bees and ants; he published *Prehistoric Times* (1865, revised 1913), *Origin of Civilisation* (1870) and many books on natural history. He was a neighbour of CHARLES DARWIN, and a friend and counsellor over many years. He was a member of the 'X' Club (together with T H HUXLEY, JOSEPH DALTON HOOKER and others) which conspired to replace the ecclesiastical establishment with a scientific one.

Lubbock, Percy 1879–1965
English critic and biographer
Born in London and educated at Eton and King's College, Cambridge, he was librarian of Magdalene College, Cambridge, from 1906 to 1908. Among his writings are *The Craft of Fiction* (1921), *Earlham* (1922), a book of personal childhood memories, and studies of SAMUEL PEPYS (1909) and EDITH WHARTON (1947). He was the grandson of Sir JOHN LUBBOCK.

Lubetkin, Berthold 1901–90
English architect
Born in Tiflis (now Tbilisi), Georgia, Lubetkin studied under ALEKSANDR RODCHENKO, and VLADIMIR TATLIN in Moscow, and then at Atelier Perret in Paris, where he was influenced by LE CORBUSIER. In 1931 he emigrated to England, and set up his own firm, Tecton, with six students from the Architectural Association, London. His major works include the Penguin Pool at London Zoo (1933) and Highpoint I Hampstead (1935), a block of high-rise flats which was praised by Le Corbusier as a redevelopment of his own *urbanisme* and utopian ideals, creating a new quality for high-rise housing. His Finsbury Health Centre (1938), a social experiment, is still in use as intended today. Influential in the development and practice of high-quality modernism, he largely retired from architecture in 1951.

Lubitsch, Ernst 1892–1947
German film director
Born in Berlin, he was a teenage actor in MAX REINHARDT's theatre company, then starred as 'Meyer' in a popular slapstick series before beginning his directorial career with *Fräulein Seifenschaum* (1914). A specialist in comedies, and costume epics like *Madame Dubarry* (1919), he was invited to Hollywood by MARY PICKFORD, whom he directed in *Rosita* (1923). He stayed to become an acknowledged master of sophisticated light comedies graced with 'the Lubitsch touch': a mixture of wit, urbanity and visual elegance. His many films include *Forbidden Paradise* (1924), *The Love Parade* (1929), *Trouble in Paradise* (1932), *Ninotchka* (1939, with GRETA GARBO) and *Heaven Can Wait* (1943). He became a US citizen in 1936, and received a Special Academy Award in 1947. 🕮 Herman G Weinberg, *The Lubitsch Touch: A Critical Study* (1968)

Luca Della Robbia *See* DELLA ROBBIA, LUCA

Lucan, *in full* **Marcus Annaeus Lucanus** AD 39–65
Roman poet
Born in Corduba (Córdoba), Spain, he was the nephew of the philosopher SENECA, the Younger. He studied in Rome and in Athens, and became proficient in rhetoric and philosophy. He was recalled to Rome by the Emperor NERO, who made him quaestor and augur. In AD 60 he won the poetry competition in the first Neronia games. In AD 62 he published the first three books of his epic *Bellum Civile* (*Pharsalia*) on the civil war between POMPEY and JULIUS CAESAR. Nero, perhaps jealous of Lucan's literary successes, forbade him to write poetry or plead in the courts, and in AD 65 Lucan joined the conspiracy of Piso against Nero, but was betrayed and compelled to commit suicide. He was a precociously fluent writer in Silver Latin, but *Pharsalia* is all that has survived of his work. 🕮 M P O Morford, *Lucan the Poet* (1967)

Lucan, George Charles Bingham, 3rd Earl of 1800–88
English field marshal
He was born in London. He accompanied the Russians as a volunteer against the Turks in 1828 and succeeded as 3rd Earl of Lucan in 1839. As commander of cavalry in the Crimean War (1854–56) he passed on the disastrous and ambiguous order from Lord RAGLAN which resulted in the Charge of the Light Brigade at Balaclava (1854). He later fought at Inkermann and was promoted field marshal in 1887.

Lucan, Richard John Bingham, 7th Earl of, *known as* **Lord Lucan** 1934–
English alleged murderer
He disappeared on the evening of 7 November 1974. On that night, his estranged wife Veronica Lucan ran into a pub close to her London home with blood on her face, claiming that she had just escaped from a murderer. Shortly after, police found the body of the Lucan family's nanny, Sandra Rivett, in a mailbag in the basement of Lady Lucan's house. Lady Lucan told police that she had gone downstairs to find the nanny when a man, whom she identified as her husband, attacked her. When challenged, he claimed that he had mistaken the nanny for her and had killed her. The police failed to trace Lucan, who had large gambling debts and who had fought for and lost custody of his children. In June 1975 the coroner's jury charged Lord Lucan with the murder. Speculation about Lucan's whereabouts and about events that night continues to this day.

Lucaris or **Lukaris, Cyril** or **Cyrillus** 1572–1638
Greek Orthodox prelate and theologian
Born in Crete, he studied in Venice, Padua and Geneva, where he was influenced by CALVINISM. He rose by 1621 to be patriarch of Constantinople (Istanbul), and opened negotiations with the Calvinists of England and Holland with a view to union and the reform of the Greek Church. He corresponded with GUSTAV II ADOLF of Sweden, and Archbishops Abbot and LAUD, and he presented the Alexandrian Codex to CHARLES I. The Jesuits five times engineered his deposition, and are supposed by the Greeks to have instigated his murder by the Turks. The *Eastern Confession of the Orthodox Church*, of strong Calvinistic tendency, issued in 1629, may not have been written by him after all.

Lucas, Colin Anderson 1906–1984
English architect
Born in London, he studied at Cambridge. In 1930 he designed a house at Bourne End, Buckinghamshire, which was the first English example of the domestic use of monolithic reinforced concrete. Subsequent designs (1933–39), often in partnership with Amyas Connell and Basil Ward, played an important part in the development in England of the ideas of the European modern movement in architecture. He was a founder member of the MARS group of architects.

Lucas, Edward Verrall 1868–1938
English essayist and biographer
Born in Eltham, Kent, he became a bookseller's assistant, a reporter, contributor to and assistant editor of *Punch*, and finally a publisher. He compiled anthologies, and was the author of novels (the best of which is probably *Over Bemerton's*, 1908), books of travel and about 30 volumes of light essays. An authority on CHARLES LAMB, he wrote a Life of him in 1905. 🕮 *Reading, Writing and Remembering* (1932)

Lucas, F(rank) L(awrence) 1894–1967
English critic and poet
Born in Hipperholme, Yorkshire, he became a Fellow and Reader in English at King's College, Cambridge. He wrote many works of criticism, including *Seneca and Elizabethan Tragedy* (1922) and *Eight Victorian Poets* (1930), volumes of poetry, such as *Time and Memory* (1929) and *Ariadne* (1932), and plays including *Land's End* (1938). He also wrote novels and popular translations of Greek drama and poetry.

Lucas, George Walton 1944–
US film-maker
Born in Modesto, California, he studied film at the University of Southern California, where his science-fiction short film *Electronic Labyrinth: THX-1138 4EB* (1967) won first prize at the National Student Film Festival. A protégé of FRANCIS FORD

COPPOLA, he expanded the short for his feature-length debut *THX-1138* (1971). He received Best Director Academy Award nominations for both *American Graffiti* (1973) and *Star Wars* (1977); the latter became one of the most commercially successful films ever made. Lucas subsequently produced but did not direct a succession of big-budget adventure films including the *Star Wars* sequels *The Empire Strikes Back* (1980) and *Return of the Jedi* (1983), and the *Indiana Jones* series. He has also extended the boundaries of cinematic special effects through his company Industrial Light and Magic (ILM) and developed the THX Sound System. He received the Irving Thalberg award at the 1992 Academy Awards. In 1999 he returned to direction with the first of a trilogy of *Star Wars* prequels, *The Phantom Menace*, followed by *Attack of the Clones* (2002) and *Revenge of the Sith* (2005).

Lucas, Robert E(merson), Jnr 1937–
US economist and Nobel Prize winner
Born in Yakima, Washington, he was educated at the University of Chicago and became a professor there in 1975. He was awarded the 1995 Nobel Prize in economics for his work on macroeconomic research, a field in which he has been the dominant voice since 1970. His publications include the influential paper 'Expectations and the Neutrality of Money' (1972).

Lucas Van Leyden, *also known as* **Lucas Jacobsz** or **Hugensz** 1494–1533
Dutch painter and engraver
Born in Leyden, he practised almost every branch of painting, and his most notable works include the triptych of *The Last Judgement* (1526) and *Blind Man of Jericho Healed by Christ* (1531). As an engraver he is believed to have been the first to etch on copper, rather than iron. He was much influenced by ALBRECHT DÜRER. 🕮 Rik Vos, *Lucas Van Leyden* (1978)

Luce, Henry R(obinson) 1898–1967
US magazine publisher and editor
He was born in Shando Province, China, to a missionary family and was educated at a boarding school in Chefoo, north China, before going to the USA to study at Yale. He founded *Time* (1923), *Fortune* (1930) and *Life* (1936) magazines. He also inaugurated the radio programme 'March of Time' in the 1930s, which became a film feature. He married Clare Boothe Luce (1903–87) in 1935. 🕮 James L Baughman, *Henry R Luce and the Rise of the American News Media* (1987)

Lucian c.117–c.180 AD
Greek satirist, rhetorician and writer
Born in Samosata, Syria, he practised as an advocate in Antioch, and wrote and recited show speeches for a living, travelling through Asia Minor, Greece, Italy and Gaul. Having made his name and fortune, he settled in Athens, and there produced a new form of literature, the humorous dialogue. The old faiths, philosophy and literature were all changing, and Lucian found many targets for his satire. The absurdity of retaining the old deities without the old belief is brought out in such works as the *Deorum Dialogi* ('Dialogues of the Gods'), *Mortuorum Dialogi* ('Dialogues of the Dead') and *Charon*. Whether philosophy was more disgraced by the shallowness or the vices of those who now professed it, is discussed in his *Symposium*, *Halieus*, *Biōn Prasis*, *Drapetae* and others. *Vera Historia* ('True History') parodies the fantastic adventure tales of the 'new' literature. His style, which is notable for the purity of his Attic Greek, is straightforward and elegant. A *Selected Works* was published in 1965, edited by B P Reardon. 🕮 J Bompaire, *Lucian écrivain* (1958)

Luciani, Sebastiano *See* SEBASTIANO DEL PIOMBO

Luciano, Lucky, *properly* **Charles Luciano** 1897–1962
US gangster
Born in Sicily, Italy, he emigrated with his family to the USA in 1907. Luciano, who earned his nickname by avoiding imprisonment and prosecution for many years, was a Mafia 'godfather' who operated successfully and profitably in the 1920s and 1930s. His business included narcotics-peddling, extortion, prostitution and networks of vice dens. When three prostitutes finally agreed to give evidence against him, he was arrested (1936) and found guilty of compelling women to become prostitutes. Even from prison, he retained control of his Family, setting up the Crime Syndicate of Mafia Families. In 1946 he was released and then deported to Italy as an undesirable alien. He was refused entry to various European cities and eventually found refuge in Italy. He was only posthumously allowed to return to the USA, where he was buried at St John's Cemetery in New York.

Lucie-Smith, (John) Edward (McKenzie) 1933–
British writer and critic
Born in Kingston, Jamaica, he emigrated to England with his mother and was educated at Merton College, Oxford. Before concentrating exclusively on poetry, he served in the RAF, worked in advertising and was a journalist and broadcaster. In 1956 he was invited by poet Philip Hobsbaum to join 'the Group', an influential avant-garde poetry salon, which he later chaired. His first collection, *A Tropical Childhood* (1961), established his reputation as a poet, and was followed by numerous volumes. In the 1970s he turned towards art history, producing a vast body of biographies, chronicles and exhibition catalogues. These include *The Invented Eye* (1975), *Visual Arts in the 20th Century* (1996) and *Women and Art: Contested Territory* (1999), with JUDY CHICAGO. 🕮*The Burnt Child: An Autobiography* (1975)

Lucilius, Gaius c.180–c.102 BC
Roman satirist
Born in Suessa Aurunca, Campania, he wrote 30 books of *Satires*, of which only fragments remain. These *saturae* (or medleys), written in hexameters, are on a mixture of miscellaneous subjects, everyday life, politics, literature and travel. Their occasionally mocking and critical tone gave the word 'satire' its modern meaning. 🕮 G C Fiske, *Lucilius and Horace* (1920)

Lucretia 6th century BC
Roman matron
She was the wife of Lucius Tarquinius Collatinus. According to legend she was raped by Sextus Tarquinius (son of TARQUINIUS, Superbus), then summoned her husband and friends, and, making them take an oath to drive out the Tarquins, plunged a knife into her heart. The tale has formed the basis of several works, for example SHAKESPEARE's *Rape of Lucrece* (1594) and the opera *The Rape of Lucretia* by BENJAMIN BRITTEN. The Tarquins were later expelled by LUCIUS JUNIUS BRUTUS. 🕮 Ian Donaldson, *The Rapes of Lucretia: A Myth and its Transformations* (1982)

Lucretius, *in full* **Titus Lucretius Carus** c.99–55 BC
Roman poet and philosopher
Little is known of his life, though he is said to have gone mad and committed suicide after drinking a love potion given to him by his wife Lucilia. His great work is the didactic poem *De rerum natura* ('On the Nature of Things'), in six volumes of hexameters, in which he sets out the theories of DEMOCRITUS and EPICURUS on the origin of the universe, and attempts to eradicate superstition and religious belief, which he savagely denounces as the source of man's wickedness and misery. Freedom from fear and a calm and tranquil mind were his goals, the way to them being through a materialistic philosophy. His poem abounds in strikingly picturesque phrases, episodes of exquisite pathos and vivid description, rarely equalled in Latin poetry.

Lucullus, Lucius Licinius c.110–57 BC
Roman soldier
His origins were humble, but after service with SULLA he commanded the fleet in the First Mithridatic War (88 BC). As consul he defeated MITHRIDATES in the Third Mithridatic War (74 BC), and introduced reforms into Asia Minor. He twice defeated Tigranes of Armenia (69 BC and 68 BC), but his legions became mutinous, and he was superseded by POMPEY (66 BC). He attempted to check Pompey's power, and was one of the first triumvirate, but soon withdrew from politics. He had become very wealthy and spent the rest of his life in such luxury that the term 'Lucullan' has been used as an epithet for extravagant food. He was a notable patron of writers and artists.

Lucy, Sir Thomas 1532–1600
English country gentleman
A Warwickshire squire, MP and Justice of the Peace, he is said to have prosecuted SHAKESPEARE for stealing deer from Charlecote Park, and to have been the inspiration for Justice Shallow (*Henry IV, Part 2*; *Merry Wives of Windsor*).

Ludd, Ned fl.1779
English farm labourer
He worked in Leicestershire. About 1782 he destroyed some stocking frames, and it is from him that the 'Luddite' rioters (1812–18) took their name.

Ludendorff, Erich 1865–1937
German soldier
He was born near Posen. In 1914 he was appointed Chief of Staff in East Prussia, and masterminded the annihilation of the Russians at Tannenberg (August 1914). When, in 1916, PAUL VON HINDENBURG superseded ERICH VON FALKENHAYN, Ludendorff sent August von Mackensen (1849–1945) to the Dobruja to defeat

the Romanians. On the Western Front in 1918 he planned the major offensive that nearly won the war for Germany. In 1923 he was a leader in the HITLER putsch at Munich, but he was acquitted of treason. He was a Nazi member of the Reichstag from 1924 to 1928, but as a candidate for the presidency of the Reich in 1925 he polled few votes. Strongly opposed to Jews, Jesuits and freemasons, he later became a pacifist.

Luding, Christa, *née* **Rothenberger** 1959–
German speedskater and cyclist
Born in Weisswasser, Saxony, she competed at her first winter Olympics in 1980. She failed to medal, but went on to win gold for East Germany in the 500m at the Sarajevo games four years later. She took up cycling to keep herself fit during the off-season, and won a sprint-cycling silver medal at the summer Olympics in Seoul in 1988. Later that year she entered the record books by becoming the first athlete to win medals at both the summer and winter Olympics in the same year, with a gold medal in the 1000m speedskating at Calgary. She finished her Olympic career in 1992, this time for the newly united Germany, with a speedskating bronze at Albertville.

Ludlow, Edmund c.1617–1692
English Parliamentarian
He was born in Maiden Bradley, Wiltshire, and during the Civil War served under Sir WILLIAM WALLER and THOMAS FAIRFAX. Elected to the Council of State, he was sent to Ireland as Lieutenant-General of Horse in 1651, but refused to recognize CROMWELL's protectorate. He urged the restoration of the Rump Parliament, commanded again for a while in Ireland, was nominated by JOHN LAMBERT to the Committee of Safety, and strove in vain to reunite the Republican Party. After the Restoration he made his way to Vevey in Switzerland. In 1689 he came back, but returned to Vevey when the House of Commons demanded his arrest.

Ludmilla, St d.921
Bohemian religious and patron saint of Bohemia
Born near Melník, Bohemia, the wife of Bohemia's first Christian duke, she was murdered by her heathen daughter-in-law, Drahomira.

Ludovicus *See* VIVES, JUAN LUIS

Ludwig I 1786–1868
King of Bavaria
Born in Strasbourg, the eldest son of Maximilian I, he was king from 1825 to 1848. By his lavish expenditure on pictures, public buildings and favourites, and by taxes and reactionary policy, he provoked active discontent in 1830 and 1848, and abdicated in favour of his son, Maximilian II.

Ludwig II, *also known as* **Mad King Ludwig** 1845–86
King of Bavaria
The son of Maximilian II, he was born at Nymphenburg Palace. He succeeded in 1864, and devoted himself to patronage of RICHARD WAGNER and his music. In 1870 he threw Bavaria on the side of Prussia, and offered the Imperial Crown to WILHELM I, though he took no part in the war, and lived the life of a morbid recluse. He was almost constantly at odds with his ministers and family, mainly on account of his vast outlays on superfluous palaces, like the fairytale Neuschwanstein, and was declared insane (1886). A few days later he was found drowned, with his physician, in the Starnberger Lake, near his castle of Berg. It is not known whether his death was suicide, murder or accidental.

Ludwig, Emil, *originally* **Emil Cohn** 1881–1948
Swiss writer
Born in Breslau, Germany (Wrocław, Poland), he wrote some novels and plays, but made his name as a biographer of the intuitive school. His accounts of GOETHE, NAPOLEON I, WILHELM II, BISMARCK, JESUS CHRIST, ABRAHAM LINCOLN and others assemble carefully researched sources in a manner more appropriate to fiction narrative. He lived in Switzerland, and became a Swiss citizen in 1932, but settled in the USA in 1940.

Ludwig, Karl Friedrich Wilhelm 1816–95
German physiologist
Born in Witzenhausen, he became a medical student in Marburg in 1834. In 1840 he returned to Marburg and was teaching there by 1846, later teaching in Zurich, Vienna and Leipzig, where in 1865 he helped establish the famous Institute of Physiology. Ludwig's work proved fundamental to modern physiology. He devised many medical instruments, notably the kymograph (1846), which he used to study circulation and respiration, and the mercurial blood-pump (1859), which allowed examination of blood gases and respiratory exchange. His research focused on the operation of the heart and kidneys, on the lymphatic system and on salivary secretion. He also studied the circulation of the blood, and investigated the relations of blood pressure to heart activity.

Lugard, Frederick John Dealtry Lugard, Baron 1858–1945
British soldier and colonial administrator
He was born in Madras, India. He was commissioned as an army officer (1878), and served in the Sudan in 1885 against MUHAMMED AHMED, the Mahdi, and in Burma after the fall of King Thibaw (1886), and commanded an expedition against slavers in Nyasaland (1888). His work made Uganda a British protectorate in 1894. He was appointed commissioner in the Nigerian hinterland by JOSEPH CHAMBERLAIN (1897) and High Commissioner for the North (1900–07). He was governor of Hong Kong from 1907, helping to establish its University in 1911. He returned to Nigeria as governor of the Northern and Southern protectorates, becoming Governor-General (1914–19) on their amalgamation. His principle was one of use of existing tribal institutions as the infrastructure for British rule.

Lugosi, Bela, *originally* **Bela Ferenc Denzso Blasko** 1882–1956
US actor
Born in Lugos, Hungary (now in Romania), he studied in Budapest, and appeared on stage (from 1902) and on film (from 1917), before moving to the USA in 1921. He enjoyed his greatest success on Broadway as *Dracula* (1927), a role he repeated on film (1931). Heavily accented, he made a memorably menacing, aristocratic vampire but soon found himself typecast. His films include *Murders in the Rue Morgue* (1932), *Son of Frankenstein* (1939) and *Abbott and Costello Meet Frankenstein* (1948). After becoming a drug addict and successfully undergoing treatment, he appeared in low-quality films and died during the production of *Plan 9 from Outer Space* (1956), frequently voted the worst film ever made.

Lu Hsün *See* LU XUN

Luhrmann, Baz, *originally* **Mark Anthony Luhrmann** 1962–
Australian film director
He was born in Sydney and studied at the National Institute of Dramatic Arts there, making his acting debut in *The Winter of Our Dreams* (1982). In 1986 he wrote and directed the stage play *Strictly Ballroom*, about the Australian ballroom dance community, and he turned it into a hit film in 1992. Other films, which characteristically marry a lush theatrical style to a music video aesthetic, include *Romeo and Juliet* (1996) and the musical *Moulin Rouge!* (2001). He also directed productions of PUCCINI's *La Bohème* (revived on Broadway in 2002) and BRITTEN's *A Midsummer Night's Dream* (1994), and has had international success as a record producer.

Luini or **Lovino, Bernardino** c.1481–1532
Italian painter
Born in Luino on Lake Maggiore, Lombardy, he was trained in the school of LEONARDO DA VINCI, to whom many of his works have been attributed. He painted much at Milan. His *Virgin and Child with St John* is in the National Gallery, London, and his *Dream of Joseph* is in the Brera, Milan.

Luitprand *See* LIUTPRAND OF CREMONA

Lukacs, Georg, *properly* **György Szegedy von Lukacs** 1885–1971
Hungarian Marxist philosopher and critic
Born in Budapest into a wealthy Jewish family, he studied in Budapest, Berlin and Heidelberg. He published two important early works on literary criticism, *Soul and Form* (1910) and *The Theory of the Novel* (1916). In 1918 he joined the Hungarian Communist Party, but after the defeat of the uprising in 1919 he lived abroad in Vienna (1919–29) and Moscow (1930–44). He returned to Hungary after World War II as professor at Budapest and joined IMRE NAGY's short-lived revolutionary government in 1956 as Minister of Culture. After the Russian suppression he was briefly deported to Romania and interned but returned to Budapest in 1957. He was a prolific writer on literature and aesthetics. His major book on Marxism, *History and Class Consciousness* (1923, Eng trans 1971), was repudiated as heretical by the Russian Communist Party and later, in abject public confession, by Lukacs himself.

Lukaris, Cyril *See* LUCARIS, CYRIL

Lukas, D(arrell) Wayne 1935–
US racehorse trainer
Born in Antigo, Wisconsin, he was the first trainer to top the US winnings list for eight consecutive years (1984–91) but his

Lumière, Auguste Marie Louis Nicolas 1862–1954 and **Louis Jean** 1865–1948
French industrial and physiological chemists and pioneers of motion photography

The Lumière brothers were born in Besançon, the sons of a photographer and manufacturer of photographic materials. Auguste was educated at the University of Bern, Switzerland, and Louis at the École Technique, La Martinière. At the age of 17 Louis invented a dry-plate process which transformed the fortunes of the family business, Lumière and Jougla. In 1894, after seeing a demonstration of THOMAS ALVA EDISON's kinetoscope, which could record movement, Louis determined to invent a method by which moving pictures could be projected; together the brothers invented the *cinématographe* (cinematograph), the first machine to project images on a screen, in 1895. The same year they built the first cinema, in Lyons, and produced the first film newsreels and the first motion picture in history, *La Sortie des ouvriers de l'usine Lumière* (Eng trans *Workers Leaving the Lumière Factory*). On 28 December 1895, which has since been regarded as the birthday of world cinema, the first film was projected to a paying public; this took place at the Grand Café on the Boulevard des Capucines in Paris.

During the next five years the Lumières amassed a huge catalogue of newsreel shot all over the world by their team of skilled photographers, and Louis directed 60 and produced about 2,000 films, including dramatizations of *Faust* and *The Life and Passion of Jesus Christ*. After 1900 they worked to improve colour photography, inventing the Autochrome screen plate for colour photography in 1903, and studied colloidal substances in living organisms. Auguste also carried out research into cancer, vitamins and oral vaccination. Both were elected to the French Academy of Sciences. Louis died in Bandol and Auguste in Lyons.

🕮 Bernard Chardère, *Les Lumière* (1985).

> *Mon frère en une nuit, avait inventé le cinématographe.*
>
> 'My brother, in one night, had invented the cinema.'
>
> – Auguste Lumière on his brother's flash of inspiration which resulted in the 'Kinetoscope de projection'. Quoted in C W Ceram, *Archaeology of the Cinema* (1965).

$17.8 million record winnings in 1989 did not last long. He lost some investors and then, two years later, lost millions when Calumet Farms went bankrupt. In 1993 his son, and chief assistant, nearly died after he was kicked by a horse. Undaunted, Lukas trained it into a champion and Tabasco Cat became his first Triple Crown winner in 1994. He went on to make history as the first trainer to win five consecutive Triple Crown races, winning them, sensationally, with different horses (Tabasco Cat, Thunder Gulch and Timber County).

Lukashenko, Alexander 1954–
Belarusian politician
Born in Kopys in the former Byelorussian SSR, he served in the military before becoming director of a state farm. In 1990 he was elected to parliament, where he was noted for his hardline authoritarian views and opposition to the dissolution of the USSR. He won Belarus's first democratic presidential election in 1991, partly on a platform of improving relations with Russia. In 1996 a referendum extended his term of office despite widespread domestic and international protest. A further referendum, three years after his successful re-election in 2001, abolished presidential term limits altogether; he was declared to have won a third term in 2006, amid ongoing international condemnation of his regime.

Luke, St 1st century AD
New Testament evangelist
Born possibly in Antioch, Syria, he may have been the 'beloved physician' and companion of ST PAUL (Colossians 4.14, Philippians 24). It is said that he was martyred. He was first named as author of the third Gospel in the 2nd century AD, and tradition has since ascribed to him both that work and the Acts of the Apostles. He is the patron saint of doctors and artists, and his feast day is 18 October.

Luks, George Benjamin 1867–1933
US painter
Born in Williamsport, Pennsylvania, he studied art in Philadelphia, London and Paris. From 1908 he was a member of the Eight, painting realistic works of New York City scenes. He also was a graphic artist, a portrait painter and originator of the comic strip 'Hogan's Alley' in the *New York World*. His paintings, which show his adventurous spirit and vitality, include *The Spielers* (1905, Addison Gallery, Andover, Massachusetts) and *The Wrestlers* (1905, Museum of Fine Arts, Boston).

Lula, *properly* **Luis Inácio Lula da Silva** 1944–
Brazilian labour leader
He came to national prominence as the leader of the Metalworker's Union of São Bernardo, a São Paulo industrial zone housing key industries, especially in motor vehicles. Forced by the military regime's labour legislation to concentrate on local issues, Lula led strikes in the Saab-Scania plant in 1978 and 1979, involving 500,000 workers and making the employers concede higher wages through direct negotiations rather than via government-led labour courts. In October 1979 he founded the PT (Partido dos Trabalhadores), to achieve representation for workers in Congress; it has drawn support from a range of traditional radical movements and the left wing of the Church. Elected to Congress in 1986, he narrowly defeated LEONEL BRIZOLA as the candidate for the Left against FERNANDO COLLOR DE MELLO, but lost the 1989 presidential race. He then ran unsuccessfully against FERNANDO CARDOSO in 1994 and 1998. He was finally successful in the 2002 presidential election, and was re-elected in 2004, despite allegations of corruption within the PT.

Lully, Jean Baptiste, *originally* **Giovanni Battista Lulli** 1632–87
French composer
Born in Florence of Italian parents, he went as a boy to Paris, and was finally, after much ambitious intriguing, made operatic director by LOUIS XIV (1672). With Philippe Quinault as librettist, he composed many operas, in which he made the ballet an essential part. Most popular were *Thésée* (1675), *Armide et Rénaud* (1686), *Phaëton* (1683) and *Acis et Galatée* (1686). He also wrote church music, dance music and pastorals.

Lully or **Lull, Raymond** or **Ramón**, *known as* **the Enlightened Doctor** c.1232–1315
Spanish theologian and mystic
Born in Palma, Majorca, he served as a soldier and led a dissolute life, writing lyrical troubadour poetry, but from 1266 became an ascetic and resolved on a spiritual crusade for the conversion of the Muslims. To this end, after some years of study, he produced his *Ars Magna*, the 'Lullian method', a mechanical aid to the acquisition of knowledge and the solution of all possible problems by a systematic manipulation of certain fundamental notions (the Aristotelian categories etc). He also wrote a book against the Averroists, and in 1291 went to Tunis to convert the Muslims, but was imprisoned and banished. After visiting Naples, Rome, Majorca, Cyprus and Armenia, he again sailed (1305) for Bugia (Bougie) in Algeria, and was again banished. At Paris he lectured against the principles of AVERROËS, and returning to Bugia, was stoned and died a few days afterwards. The Lullists combined religious mysticism with alchemy, but it has been disproved that Lully himself ever dabbled in alchemy. He was the first to use a vernacular language for religious or philosophical writings. He also wrote impressive poetry.

Lulu, *originally* **Marie McDonald McLaughlin Lawrie** 1948–
Scottish singer and actress
Born in Lennoxtown, near Glasgow, she had the first Scottish hit of the Beat era with a cover of the Isley Brothers' 'Shout' in 1964 and subsequently had a hit in the USA with the title song from the film *To Sir With Love* (1967), in which she had also acted. She was joint winner of the 1969 Eurovision Song Contest with 'Boom Bang-a-Bang' and her albums have included *New Routes* (1969) and *Lulu* (1981). During the 1970s she became better known as an entertainer and television personality than as a pop singer, and she had her own BBC series *It's Lulu*. On television, she acted Adrian's mother Pauline in *The Growing Pains of Adrian Mole* (1987), appeared in *Absolutely Fabulous* (1995) and hosted *Red Alert* (1999). In 1993 she had her first number one alongside pop group Take That on 'Relight My Fire'. She was married to Maurice Gibb of The Bee Gees from 1969 to 1973. She was awarded the OBE in 2000.

Lumière, Auguste Marie Louis Nicolas and **Louis Jean** *See panel above*

Lumley, Joanna Lamond 1946–
English actress
Born in Srinagar, Kashmir, of British parents, she worked as a model before switching to acting. She had a tiny role as a Bond girl in the film *On Her Majesty's Secret Service* (1969) and appeared in *The Trail of the Pink Panther* (1982) and *Curse of the Pink Panther* (1983). She made her name on television, however, playing Purdey in *The New Avengers* (1976–77), for which she received a BAFTA Special Award in 2000, Sapphire in *Sapphire and Steel* (1979–82) and Patsy in *Absolutely Fabulous* (1992–95 and 2001–04, winning her two BAFTA Awards). Her series of six ten-minute monologues, *Up in Town* (2002), saw her reassessed by critics as a serious dramatic actress. On stage, she has starred in *Noel and Gertie* (1983), *Blithe Spirit* (1986) and *The Revengers' Comedies* (1991). Her autobiographies, *Stare Back and Smile* and *No Room for Secrets*, were published in 1989 and 2004. She was awarded the OBE in 1995.

Lummer, Otto Richard 1860–1925
German physicist
Born in Breslau (Wrocław, Poland), he became an assistant to HERMANN VON HELMHOLTZ, and in 1904 was appointed professor of physics at Breslau University. His main field of research was optics. He was one of the discoverers of the interference effect which became known as the 'Lummer fringes' (1884), and designed various optical instruments, including a high-resolution spectroscope, a photometer (1889) and a bolometer (1892). His most important theoretical contribution was his investigation of certain properties of black-body radiation, an essential step on the road to MAX PLANCK's quantum theory.

Lumumba, Patrice (Hemery) 1925–61
Congolese politician
Born in Katako Kombe and educated at mission schools, both Catholic and Protestant, he became a post office clerk and then director of a brewery. He helped form the *Mouvement National Congolais* in 1958 to challenge Belgian rule and, when the Congo became an independent republic, he was made its first prime minister (1960). A major symbolic figure in the African history of the period, he sought a unified Congo and opposed the secession of Katanga under Moise Tshombe. He was arrested by his own army in 1960, handed over to the Katangese and murdered. His name, however, remains significant as the embodiment of African nationalism and the opponent of balkanization manipulated by ex-colonial countries and their allies. 🕮 Robin McKown, *Lumumba: A Biography* (1969)

Lunardi, Vicenzo 1759–1806
Italian aeronaut
Born in Lucca, he made, from Moorfields in London on 15 September 1784, the first hydrogen balloon ascent in England.

Lundy, Benjamin 1789–1839
US abolitionist
Born in Hardwick, New Jersey, a saddler to trade, he moved to Ohio where he organized one of the first anti-slavery societies, the Union Humane Society. An itinerant campaigner, he founded *The Genius of Universal Emancipation* (1831–36) and in 1836 *The National Enquirer* in Philadelphia (later called the *Pennsylvania Freeman*).

Lunn, Sir Arnold Henry Moore 1888–1974
English Roman Catholic apologist and Alpine ski pioneer
He was born in India, the son of the travel-bureau pioneer Sir Henry Lunn (1859–1939) and the brother of the writer HUGH KINGSMILL. His first books were on the Alps and skiing, but he began studying Roman Catholicism from his father's Methodist perspective in *Roman Converts* (1924), *John Wesley* (1929), *The Flight from Reason* (1930) and, in debate with RONALD ARBUTHNOTT KNOX, *Difficulties*. Converted to Catholicism, he produced a classic of triumphalist Catholicism in *Now I See* (1933), and continued his dual-authorship debates, now from Knox's camp against C E M JOAD, J B S HALDANE and GEORGE GORDON COULTON. His *Spanish Rehearsal* (1937) defended General FRANCO. An accomplished skier, he invented slalom gates and obtained Olympic recognition for the modern Alpine slalom race and downhill races. He founded and edited the *British Ski Year Book* in 1919.

Lunny, Donal 1945–
Irish folk musician, composer and record producer
He was born in Newbridge, County Kildare. His first instrument was drums, but he switched to guitar and then to bouzouki, as well as keyboards. He was a founder member of Planxty with CHRISTY MOORE, Andy Irvine and Liam O'Flynn, then of The Bothy Band in 1975, and later Moving Hearts in 1981, three of the most important and influential groups in Irish music. Although self-effacing, he made a crucial contribution to all three, and he also ran an important record company, Mulligan, in Dublin. He continued to perform in the 1980s and 1990s, but devoted much of his time to producing records, and has been instrumental in developing the crossover success of Irish music, reflected in the eclectic *Common Ground* project (1996). He later formed the group Coolfin, and released an album of the same name in 1998. His brother, Manus Lunny, is also a musician, and is a member of the Scottish folk-rock group Capercaillie.

Luns, Joseph Marie Antoine Hubert 1911–2002
Dutch politician
After studying law, he joined the Dutch diplomatic service (1940–52). In 1952 he became Minister without Portfolio for the Dutch Catholic People's Party, and from then on was inextricably bound up with Dutch foreign affairs. For the whole of the period between 1957 and 1971 he was foreign minister, and from 1971 to 1984 he was Secretary-General of NATO. He was integrally involved in the formation and consolidation of the European Community (EC), and was a central figure in international relations during the days of the cold war.

Lunt, Alfred 1892–1977
US actor
He was born in Milwaukee, Wisconsin, and educated at Carroll College, Waukesha. He abandoned plans to be an architect, making his stage debut with the Castle Square Theatre Company in Boston (1912). He made his New York debut in *Romance and Arabella* (1917) and had his first major success in *Clarence* (1919–21). In 1922 he married actress Lynn Fontanne (1887–1983) and the couple seldom performed separately thereafter. He appeared in such plays as *The Guardsman* (1924), *Elizabeth, The Queen* (1930), *Design for Living* (1933), *Idiot's Delight* (1936) and *The Seagull* (1938). He made his film debut in *Backbone* (1923) and also recreated *The Guardsman* (1931), but the couple appeared primarily on stage. Their last performance in New York and London in *The Visit* (1958–60) was an unqualified success. Broadway's Lunt Fontanne Theatre, opened in 1958, was named in their honour.

Lupescu, Magda 1902–77
Mistress and second wife of King Carol II of Romania
Her Jewish descent as much as her dissolute behaviour earned her the disapproval of Romanian society, itself notorious for its profligacy. Because of the scandal surrounding their affair, Carol renounced his claim to the throne and when he returned to Romania in 1930 it was on condition that she remained abroad. When she also returned and took up residence in the palace, the prime minister, Iuliu Maniu, resigned. Upon her marriage in 1947 to Carol, she took the name Princess Elena and lived in exile with the former king.

Lupino, Ida 1918–95
English film actress and director
Born in London, the daughter of popular comedian Stanley Lupino (1893–1942), she trained at RADA and was still a teenager when she made her leading role debut in *Her First Affaire* (1932). Moving to Hollywood in 1933, she rose to stardom as the adulterous murderess in *They Drive By Night* (1940). Under contract to Warner Brothers, she appeared in musicals and comedies, but was most successful in roles expressing inner torment, repression and malevolence. Her films include *High Sierra* (1941), *Ladies in Retirement* (1941), *The Hard Way* (1943) and *Road House* (1948). She left Warner Brothers in 1947 to form her own company, producing, co-writing and directing *Not Wanted* (1949). She continued to act, but focused increasingly on direction with *Outrage* (1950) and *The Bigamist* (1953). With the formation of Four Star Productions (with Charles Boyer, DAVID NIVEN and Dick Powell), she worked extensively for television, and also appeared in *Mr Adams and Eve* (1957–58) with her third husband, Howard Duff (1917–90).

Lupton, Thomas Goff 1791–1873
English mezzotint engraver
Born in London, he was one of the first to use steel in engraving. Among his works are J M W TURNER's *Ports and Rivers*.

Lurçat, Jean 1892–1966
French painter and tapestry designer
Born in Bruyères, Vosges, he went to Paris in 1912 and trained at the École des Beaux-Arts and the Académie Colarossi. His achievement was to revive the art of tapestry in France. By 1940 no fewer than 40 of his designs were being woven by Aubusson, and in 1956 his tapestry *Hommage aux Morts de la Résistance et de la déportation* ('Homage to Those Who Died in the Resistance

and After Transportation') was exhibited in Paris. In 1945 he bought an 11th-century fortress overlooking Saint-Céré, from which he transmitted calls to the Resistance. His best-known works also include *The Apocalypse* for the church at Assy (1948); tapestries for the Palais de L'Europe in Strasbourg (1951–54); the vast *Le Chant du Monde* (1957–65, 'The Song of the World', Angers), inspired by the medieval *Apocalypse* at Angers; *La Flamme et l'Océan* (1962, 'The Flame and the Ocean', Musée Unterlinden, Colmar); and *Tout Feu Tout Flamme* (1963, 'Full of Enthusiasm', Lyons).

Luria, Aleksandr Romanovich 1902–77
Soviet psychologist
Born in Kazan, he began his studies at the Moscow Medical Institute under LEV SEMYONOVICH VYGOTSKY, the influential child psychologist. From 1945 he taught at Moscow State University, and carried out extensive researches into the effects of brain injuries that had been sustained by people during World War II. He established, and became head of, the neuropsychology section of the department of psychology at the university in 1967. His contributions to the field of neuropsychology (the application of the theories and methods of experimental psychology to the understanding of neurological disorders) have been both empirical and theoretical, his influence being particularly felt by researchers concerned with understanding the effects of damage to the frontal lobes, and of damage to those regions of the left hemisphere of the brain that are concerned with language. His books include *The Man with a Shattered World* (Eng trans 1972) and *The Working Brain* (Eng trans 1973).

Luria, Salvador Edward 1912–91
US biologist and Nobel Prize winner
Born in Turin, Italy, he graduated in medicine at Turin University in 1935, and went on to the Radium Institute in Paris to study medical physics, radiation and techniques of working with phage, the bacterial virus. Later he emigrated to the USA, where he worked at Indiana University. With MAX DELBRÜCK, he showed that bacteria and phage genes can mutate, and that different strains of phage can exchange and recombine genes. With A D HERSHEY and Delbrück, Luria founded the Phage Group, committed to using phage to investigate genetics. In 1969 he was awarded the Nobel Prize in physiology or medicine, jointly with Delbrück and Hershey, for discoveries related to the role of DNA in bacterial viruses. He wrote *General Virology* (1953), which became a standard textbook.

Lurie, Alison 1926–
US novelist
She was born in Chicago and educated at Radcliffe College, Massachusetts. Since 1968 she has taught at Cornell University, from 1976 as professor of English (now emeritus), and academic life forms the backdrop to her first books, the ironically titled *Love and Friendship* (1962), *The Nowhere City* (1965) and *Foreign Affairs* (1984) – the last of which won her the Pulitzer Prize. She has increasingly turned to non-fictional commentary, brilliantly in *The Language of Clothes* (1981), and often contentiously in *Don't Tell the Grown-ups: Children's Literature* (1990). Recent novels include *The Last Resort* (1998) and *Truth and Consequences* (2005).

Lusignan, Guy of *See* GUY OF LUSIGNAN

Lusinchi, Jaime 1924–
Venezuelan politician
Born in Clarines, in Anzoategui state, he joined the Democratic Action Party (AD) while a medical student but was exiled during the repressive regime of General Jimenez, spending the time in Argentina, Chile and the USA (1952–58). The revival of democratic government saw his return and he became politically active again, entering parliament and eventually becoming AD leader. In 1984 he succeeded the Christian Social Party (COPEI) leader, Luis Herrera, as president but the austere policies he followed in an effort to solve his country's economic problems proved unpopular and he lost the 1988 election to his AD rival, Carlos Andres Perez. He was later accused of the inappropriate use of party funds, and in 2000 went into self-imposed exile in Miami, Florida.

Luther, Martin *See panel p989*

Luthuli or **Lutuli, Albert John Mvumbi** 1898–1967
South African black resistance leader and Nobel Prize winner
Born in Rhodesia, the son of a Zulu Christian missionary, and educated at a US mission school near Durban, he spent 15 years as a teacher before being elected tribal chief of Groutville, Natal. Deposed for anti-apartheid activities, he became president-general of the African National Congress (1952–60), in which capacity he dedicated himself to a campaign of non-violent resistance and was a defendant in the notorious Johannesburg treason trial (1956–57). He was awarded the 1960 Nobel Peace Prize for his unswerving opposition to racial violence in the face of repressive measures by the South African government and impatience from extremist Africans. He was elected Rector of Glasgow University (1962) but severe restrictions imposed by the South African government (in 1961, and for another five years in 1964), prevented him from leaving Natal. In 1962 he published *Let My People Go*. 🕮 Mary Benson, *Chief Albert Lutuli of South Africa* (1963)

Lutosławski, Witold 1913–94
Polish composer and conductor
Born in Warsaw, he travelled and taught widely in western Europe and the USA. The recipient of many awards, he was a prolific writer. His orchestral works are his most impressive – *Symphonic Variations* (1938), four symphonies (1947, 1967, 1983, 1993), *Concerto for Orchestra* (1954), *Livre pour orchestre* (1968), his Cello Concerto (1970), *Mi-parti* (1976), *Chain 3* (1986) and his *Concerto for Piano and Orchestra* (1988). He also composed chamber, vocal and piano music. The BBC Symphony Orchestra staged a festival of his work in 1997 at the Barbican Centre, London.

Lutuli, Albert John Mvumbi *See* LUTHULI, ALBERT JOHN MVUMBI

Lutyens, Sir Edwin Landseer 1869–1944
English architect
He was born in London. His designs ranged from the picturesque of his early country houses, including Marsh Court, Stockbridge, and the restoration of Lindisfarne Castle, which owed much to the Arts and Crafts Movement, to those in the Renaissance style such as Heathcote, Ilkley and Salutation, Sandwich. He finally evolved a classical style exhibited in the Cenotaph, Whitehall, which reached its height in his design for Liverpool Roman Catholic Cathedral. Other prominent works were his magnificent Viceroy's House, New Delhi, a masterpiece in classical design, the British Pavilion at the Rome Exhibition of 1910 and the British Embassy in Washington. 🕮 Christopher Hussey, *The Life of Sir Edwin Lutyens* (1950)

Lutyens, (Agnes) Elizabeth 1906–83
English composer
Born in London, the daughter of Sir EDWIN LUTYENS, she studied in Paris and at the Royal College of Music, and had a setting of KEATS's poem *To Sleep* (1819) performed while still attending the College. She was one of the first British composers to adopt the twelve-note technique, and the Chamber Concerto No 1 (1939), composed in her own interpretation of this style, was a highly original work. Her compositions were, in general, not immediately well received – the chamber opera *Infidelio* (1954) and cantata *De Amore* (1957) were not performed until 1973 – but she later became accepted as a leading British composer. Her work includes *O Saisons, O châteaux* (1946), the chamber opera *The Pit* (1947), *Concertante* (1950), *Quincunx* (1959), *The Country of the Stars* (1963), *Vision of Youth* (1970) and *Echoi* (1979). She published her autobiography, *A Goldfish Bowl*, in 1972.

Luwum, Janani 1922–77
Ugandan bishop
Born in East Acholi, the son of a Christian, he became a teacher and was converted in 1948. He was ordained into the Anglican Church and, despite an evangelicanism which disturbed more conventional Christians in Uganda, became a theological college principal, Bishop of Northern Uganda and was elected Archbishop of Uganda in 1974. He spoke out fearlessly against the atrocities committed during IDI AMIN's period of rule, as a result of which he was murdered. The Amin government forbade a memorial service for him.

Luxembourg, François Henri de Montmorency-Bouteville, Duc de 1628–95
French soldier
Born in Paris, he was brought up by his aunt, mother of the Great CONDÉ. After 1659 he was pardoned by LOUIS XIV, who made him Duc de Luxembourg (1661). In 1667 he served under Condé in Franche-Comté. In 1672 he himself successfully invaded the Netherlands although he was driven back in 1673. During the

Luther, Martin 1483–1546
German religious reformer, and founder of the Reformation

Luther was born in Eisleben, the son of a worker in the copper mines. He went to school at Magdeburg and Eisenach, and went to the University of Erfurt in 1501, taking his degree in 1505. He was also interested in the study of the Scriptures, and spent three years in the Augustinian monastery at Erfurt. In 1507 he was ordained a priest, and in 1508 went to lecture and preach at the University of Wittenberg. On a mission to Rome in 1510–11 he was appalled by the corrupt practices he found there, in particular the sale of indulgences by the Dominican Johann Tetzel and others to raise funds for building and other purposes. From this experience, Luther's career as a Reformer began.

As professor of biblical exegesis at Wittenberg (1512–46), he began to preach the doctrine of salvation by faith rather than works; and in 1517 he drew up a list of 95 theses on indulgences, denying to the pope all right to forgive sins, and nailed them on the church door at Wittenberg. Tetzel published a set of counter-theses and burnt Luther's, and the Wittenberg students retaliated by burning Tetzel's. In 1518 Luther was joined by PHILIP MELANCHTHON. The pope, LEO X, at first took little notice of the disturbance, but in 1518 summoned Luther to Rome to answer for his theses. His university and the elector interfered, and ineffective negotiations were undertaken by Cardinal CAJETAN and by Miltitz, envoy of the pope to the Saxon court. JOHANN VON ECK and Luther held a memorable disputation at Leipzig (1519).

Luther meanwhile attacked the papal system as a whole more boldly. ERASMUS and ULRICH VON HUTTEN now joined in the conflict. In 1520 Luther published his famous address to the *Christian Nobles of Germany*, followed by a treatise *On the Babylonian Captivity of the Church of God*, which works attacked also the doctrinal system of the Church of Rome. A papal bull containing 41 theses was issued against him, and he burned it before a crowd of doctors, students and citizens in Wittenberg. Germany was convulsed with excitement; and Luther was summoned to appear before the first Diet at Worms, which CHARLES V had convened in 1521. Finally he was put under the ban of the empire; on his return from Worms he was seized, at the instigation of the Elector of Saxony, and lodged (mostly for his own protection) in the Wartburg. During the year he spent there he translated the Scriptures and composed various treatises.

His Bible translation and its subsequent revisions, written in a straightforward style, were hugely successful, and their variety of German became the basis of the modern literary standard.

Civil unrest called Luther back to Wittenberg in 1522; he rebuked the unruly elements, and made a stand against lawlessness on the one hand and tyranny on the other. In this year he published his acrimonious reply to HENRY VIII on the seven sacraments. Estrangement had gradually sprung up between Erasmus and Luther, and there was an open breach in 1525, when Erasmus published *De Libero Arbitrio*, and Luther followed with *De Servo Arbitrio*. In that year Luther married Katherine von Bora (1499–1552), one of nine nuns who had withdrawn from convent life. In 1529 he engaged in his famous conference at Marburg with ZWINGLI and other Swiss theologians, determinedly maintaining his views as to the real (consubstantial) presence in the Eucharist.

The drawing up of the Augsburg Confession, with Melanchthon representing Luther, marks the culmination of the German Reformation in 1530. Luther died in Eisleben, and was buried at Wittenberg. He possessed the power of kindling other souls with the fire of his own convictions.

📖 Luther's voluminous works include *Table-talk*, *Letters* and *Sermons*. His commentaries on Galatians and the Psalms are still read; and he was one of the great leaders of sacred song, his hymns having an enduring power. See also H A Oberman, *Luther* (1990); James Atkinson, *Martin Luther and the Birth of Protestantism* (1968); Roland Bainton, *Here I Stand: A Life of Martin Luther* (1951).

> *Esto peccator et pecca fortiter, sed fortius fide et gaude in Christo.*
>
> 'Be a sinner and sin boldly, but more boldly believe and rejoice in Christ.'
>
> – From a letter to Melanchthon (1521).

war he stormed Valenciennes and twice defeated the Prince of Orange. Made a marshal in 1675, soon after the peace (1678) he quarrelled with the Marquis de LOUVOIS, and was not employed for twelve years. In 1690 he commanded in Flanders and defeated the Allies at Fleurus, and later he twice more routed his old opponent, now King WILLIAM III of Great Britain, at Steinkirk (1692) and Neerwinden (1693).

Luxemburg, Rosa 1871–1919
German left-wing revolutionary
She was born in Zamość in Russian Poland. Converted to Communism in 1890, she took part in underground activities in Poland and founded the Polish Social Democratic Party (later the Polish Communist Party). A German citizen from 1895, she emigrated to Zurich in 1898, where she studied law and political economy. She moved to Berlin and became a leader of the left-wing movement, writing tracts such as *Sozialreform oder Revolution*. At the outbreak of World War I she formed, with KARL LIEBKNECHT, the Spartakusbund (Spartacus League), later the core of the German Communist Party (KPD), and spent most of the war in prison. After her release in 1919 she took part in an abortive uprising, and was murdered with Liebknecht in Berlin.
📖 J P Nettl, *Rosa Luxemburg* (2 vols, 1966)

Lu Xun (Lu Hsün) 1881–1936
Chinese writer
He was born in Shaoxing, Zhejiang (Chekiang), into a family of scholars, and by 1913 had become professor of Chinese literature at the National Peking University and National Normal University for Women. In 1926 he went as professor to Amoy University in Xiamen and he was later appointed dean of the College of Arts and Letters at Sun Yat-sen University, Guangzhou (Canton). His career as an author began with a short story, *Diary of a Madman* (1918). *The True Story of Ah Q* (1921, Eng trans 1941) is considered his most successful book, and has been translated into many languages. Between 1918 and 1925 he wrote 26 short stories and these appear in two volumes entitled *Cry* and *Hesitation*. 📖 Huang Sung-k'ang, *Lu Hsün and the New Culture Movement in Modern China* (1957)

Lvov, Prince Georgi Yevgeniyevich 1861–1925
Russian politician
Born in Popovka, he was head of the first and second provisional governments after the February Revolution of 1917, but his moderate policies and popular opposition to Russia's war effort led to the collapse of his government. He was succeeded by ALEKSANDR KERENSKY, and arrested by the Bolsheviks, but escaped to Paris.

Lwoff, André Michel 1902–94
French microbiologist and Nobel Prize winner
Born in Ainy-le-Château, of Russian-Polish extraction, he worked at the Pasteur Institute in Paris from 1921, becoming departmental head there in 1938. From 1959 to 1968 he was professor of microbiology at the Sorbonne. He researched the genetics of bacterial viruses (phage) and showed that when phage enters a bacterial cell, it becomes part of the bacterial chromosome and divides with it (lysogeny), in which form it protects the bacterium against further invasion by the same type of virus. These findings have had important implications for the development of drug resistance and for cancer research. In 1965 Lwoff was awarded the Nobel Prize in physiology or medicine jointly with FRANÇOIS JACOB and JACQUES MONOD, for their discoveries concerning genetic control of enzyme and virus synthesis. He was elected a Foreign Member of the Royal Society in 1958 and was appointed director of the Cancer Research Institute at Villejuif, France, a position he held until his retirement in 1972. His writings include *Biological Order* (1962) and *Jeux et combats* (1981, 'Games and Combats').

Lyadov, Anatoli Konstantinovich *See* LIADOV, ANATOLI KONSTANTINOVICH

Lyapunov, Aleksandr Mikhailovich 1857–1918
Russian mathematician
Born in Yaroslavl, he studied at St Petersburg University, where he came under the influence of PAFNUTII CHEBYSHEV, and then taught at Kharkov University, until he returned to St Petersburg as professor in 1901. He is principally associated

with important methods in the theory of the stability of dynamical systems, related to HENRI POINCARÉ's work. He committed suicide after his wife's death from tuberculosis.

Lyautey, Louis Hubert Gonzalve 1854–1934
French soldier and colonial administrator
Born in Nancy, he held administrative posts in Algeria, Tongking and Madagascar (under JOSEPH GALLIÉNI), where he reformed the administration. But his most brilliant work was done in Morocco, where he was the resident commissary-general from 1912 to 1925, with a break as French Minister of War in 1916–17. He established firm French authority, and developed Casablanca as a seaport.

Lycurgus
Traditional, possibly legendary, law-giver of Sparta
He is said to have instigated the Spartan ideals of harsh military discipline.

Lydgate, John c.1370–c.1451
English monk and poet
He was born in Lydgate, Suffolk, and became a Benedictine monk. He may have studied at Oxford and Cambridge. He travelled in France and perhaps Italy, and became prior of Hatfield Broadoak, Essex, in 1423. A court poet, he wrote *The Troy Book* (1412–20), based on Colonna's Latin prose *Historia Trojana*, *The Siege of Thebes* (1420–22), represented as a new Canterbury tale, and the *Fall of Princes* (1431–38), based on BOCCACCIO. Other works include the *Daunce of Machabre*, from the French, *Temple of Glas*, a copy of CHAUCER's *House of Fame* and *London Lickpenny*, on London. 🕮 D Pearsall, *John Lydgate* (1970)

Lydiard, Arthur Leslie 1917–2004
New Zealand running coach and popularizer of jogging
Born in Auckland, he was a member of the New Zealand marathon team at the Empire Games there in 1950, and won the national championships in 1955 and 1957. He was the successful coach of many world-class distance- and middle-distance runners, such as Murray Halberg and PETER SNELL, coached the New Zealand team for the Olympic Games in Tokyo (1964) and for the Commonwealth Games in Christchurch (1974), and has also coached national teams in Mexico, Venezuela, Finland and Denmark. In 1960 he introduced 'jogging' groups for cardiac rehabilitation, lecturing worldwide and writing on this popular activity.

Lyell, Sir Charles 1797–1875
Scottish geologist
Born in Kinnordy, Forfarshire, he was educated at Ringwood, Salisbury and Midhurst, studied law at Exeter College, Oxford, and was called to the Bar. WILLIAM BUCKLAND interested him in geology at Oxford, and he later became secretary to the Geological Society of London. He decided to give up law during an excursion to France in 1828 with RODERICK MURCHISON, and on his return he completed the first volume of his *Principles of Geology* (1830). He had been appointed professor of geology at King's College London, by 1832. His authoritative *Principles of Geology* (1830–33) was very influential, as was his memoir *Consolidation of lava upon steep slopes of Etna*, in which he refuted the elevation crater theory of LEOPOLD VON BUCH. He made two long geological tours of the USA and published his observations as *Travels in North America* (1845) and *A Second Visit to the United States* (1849). His 'uniformitarian' principle taught that the greatest geological changes might have been produced by the forces in operation now, given sufficient time. His interest was primarily in the biological side of geology, and his work had as great a contemporary influence as CHARLES DARWIN's *Origin of Species*. Lyell's other publications include *The Elements of Geology* (1838) and *The Geological Evidence of the Antiquity of Man* (1863), a study discussing the nature and significance of worked flints found in the valley of the Somme, and which startled the public by its unbiased attitude towards Darwin. He was knighted in 1848. 🕮 L G Wilson, *Charles Lyell, The Years to 1841: The Revolution in Geology* (1972)

Lyle, Sandy, *properly* **Alexander Walter Barr Lyle** 1958–
Scottish golfer
Born in Shrewsbury, Shropshire, England, of Scottish parents, he started his golfing career by representing England at boys, youth and full international levels. He topped the European Order of Merit in 1979 and 1985 and won the World Match-Play title in 1988. His major championship successes have been the Open in 1985 and the US Masters in 1988. An extremely long hitter with an admirably phlegmatic temperament, with NICK FALDO and IAN WOOSNAM he was largely responsible for the revival of British professional golf at world level.

Lyly or **Lily, John** c.1554–1606
English dramatist and novelist, 'the Euphuist'
Born in the Weald of Kent, he took his BA at Magdalen College, Oxford, in 1573, and studied also at Cambridge. WILLIAM CECIL, Lord Burghley, gave him a post of trust in his household, and he became vice-master of the St Paul's choristers. Having in 1589 taken part in the Marprelate controversy, he became MP for Aylesbury and Appleby (1597–1601). His *Euphues*, a romance in two parts – *Euphues, The Anatomie of Wit* (1578) and *Euphues and his England* (1580) – was received with great applause. It lead to the term 'euphuism', referring to an artificial and extremely elegant language, with much use made of complex similes and antitheses. His other works include the comedy *The Woman in the Moon*, produced in or before 1583, *Campaspe* and *Sapho and Phao* (both 1584), *Endimion* (1591), *Gallathea* and *Midas* (both 1592), *Mother Bombie* (1594) and *Love's Metamorphosis* (1601). 🕮 J D Wilson, *John Lyly* (1905)

Lyman, Theodore 1874–1954
US physicist
Born in Boston, he studied at Harvard where he remained for the majority of his career, being appointed director of the Jefferson Physical Laboratory (1910–47). He addressed the problems of using diffraction gratings to measure wavelengths in the extreme ultraviolet region of the spectrum, and published his first accurate measurements for wavelengths below 2,000 angstroms in 1906, extending the known extreme ultraviolet region significantly. He analysed the spectra and optical properties of many materials, and in 1914 discovered the hydrogen spectral lines which bear his name, a result which made an important contribution to NIELS BOHR's development of quantum theory.

Lynagh, Michael Patrick 1963–
Australian rugby union player
Born in Brisbane, he gained 72 caps, mostly as a fly-half, between 1984 and 1995, and at the time of his retirement held the record for the most points scored (911), the most conversions (140) and the most penalty goals in international rugby (177). He retired from the competitive international scene as Australia's captain after the 1995 World Cup and played for Saracens in England at the end of his career.

Lynam, Des(mond) 1942–
British television sports commentator
Born in County Clare, Ireland, he joined the BBC in 1969, initially as a boxing commentator but subsequently as an anchorman of radio and television sport. His suave good looks and relaxed presentation of such long-running programmes as *Grandstand* and *Match of the Day* made him the most popular sports presenter in British television. In 1999, after three decades with the BBC, he left and joined ITV. He stood down in 2004 but has continued to work in television and radio, most notably as the host of *Countdown* (2005–06).

Lynch, David Keith 1946–
US film director
He was born in Missoula, Montana, and attended art schools in Washington, DC, Boston and Philadelphia. His first full-length feature film, *Eraserhead* (1976), testified to Lynch's dark originality and obsession with dreamlike imagery. It was followed by *The Elephant Man* (1980), a bleak, if more conventional, narrative about JOSEPH MERRICK, which earned Lynch a Best Director Academy Award nomination, as did the surrealistic thriller *Blue Velvet* (1986). He then masterminded the cult television series *Twin Peaks* (1990), before returning to the cinema with the sensational love story *Wild at Heart* (1990), which won the Palme D'Or at Cannes. Subsequent films include *Twin Peaks: Fire Walk with Me* (1992), *The Straight Story* (1999) and *Mulholland Dr.* (2001), for which he won Best Director at Cannes and received his third Best Director Academy Award nomination.

Lynch, Jack (John) 1917–99
Irish statesman
Educated at Cork and Dublin, he joined the civil service in the Department of Justice in 1936, continued his legal studies, and was called to the Bar in 1945. He then entered politics and represented Cork for Fianna Fáil (1948–81). He served in education, industry and commerce, and finance before he assumed the Fianna Fáil leadership and became Taoiseach (prime minister) in 1966. He was replaced by the Fine Gael leader, LIAM COSGRAVE, in 1973 but was re-elected in 1977. He resigned in 1979, to be succeeded by CHARLES HAUGHEY, and he retired from politics in 1981.

Lynd, Robert 1879–1949
Irish essayist and critic
He was born in Belfast, studied there at Queen's University, then went to London (1901) and was from 1912 literary editor of the *Daily News* (later the *News Chronicle*). He also contributed to the *New Statesman* (1913–45), signing himself 'Y Y'. His intimate, witty essays, of which he wrote numerous volumes, are on a wide variety of topics. Titles include *The Art of Letters* (1920), *The Blue Lion* (1923) and *In Defence of Pink* (1939).

Lynd, Robert Staughton 1892–1970
US sociologist
Born in New Albany, Indiana, he studied at Princeton University and Union Theological Seminary. He collaborated with his wife, Helen Merrell (1896–1982), to write the well-known *Middletown:A Study in Contemporary American Culture* (1929) and *Middletown in Transition* (1937), which examine the culture of an ordinary US midwestern city (Muncie, Indiana). He was a professor at Columbia University (1931–60), and she taught at Sarah Lawrence College (1929–64).

Lynden-Bell, Donald 1935–
English astrophysicist
Born in Dover, Kent, he studied at Cambridge, and spent two years with ALLAN SANDAGE at the California Institute of Technology working on the dynamics of galaxies. He then returned to Cambridge and since 1972 has been professor of astrophysics and director of the Institute of Astronomy (1972–77, 1982–87, 1992–94). In 1962 Lynden-Bell identified the Population II stars which contain few metals and have little net motion around the centre of our galaxy. He pioneered the study of the dynamic evolution of the centres of globular clusters, and in 1969 was the first to propose that the cores of galaxies might contain supermassive black holes. His 1985 review of galactic structure meant that the distance to the centre of the galaxy was changed from 100,000 to 85,000 parsecs. The Royal Astronomical Society awarded Lynden-Bell the Eddington Medal in 1984, and he received the Bruce Medal of the Astronomical Society of the Pacific in 1998. He was elected Fellow of the Royal Society in 1978 and awarded its gold medal in 1993, and was awarded the CBE in 2000. Asteroid 18235 Lynden-Bell was named in his honour.

Lyndsay or **Lindsay, Sir David** c.1486–1555
Scottish poet
Born probably at The Mount, near Cupar, Fife, or at Garmylton (Garleton), near Haddington, East Lothian, he was appointed 'usher' (1512) of the newborn prince who became JAMES V. In 1538 he appears to have been Lyon King-of-Arms. He went on embassies to the Netherlands, France, England and Denmark, and he (or another David Lyndsay) represented Cupar in parliament (1540–46). The earliest and most poetic of his writings is the allegorical *The Dreme* (1528), followed by *The Complaynt of the King* (1529) and *The Testament and Complaynt of Our Soverane Lordis Papyngo* (1530). He also wrote a satire on court life called *Ane Publict Confession of the Kingis Auld Hound Callit Bagsche* (1536), *The Historie of Squyer Meldrum* and *Ane Satyre of the Thrie Estaitis*, his most remarkable work, which was performed at Linlithgow in 1540 and revived at the Edinburgh Festival. 🕮 W Murison, *Sir David Lindsay* (1938)

Lynen, Feodor Felix Konrad 1911–79
German biochemist and Nobel Prize winner
Born and educated in Munich, he joined the department of chemistry at the University of Munich (1942), and later became professor there (from 1947) and director of the Max Planck Institute for Cell Chemistry and Biochemistry (1954–79). In 1951 he isolated coenzyme A and showed that it formed acetyl-S-CoA, an important intermediate in lipid metabolism. In 1953, with SEVERO OCHOA, he substituted compounds of ethanolamine for the full coenzyme A molecule in the study of the pathway of fatty acid degradation. At the same time as KONRAD BLOCH, Lynen contributed evidence towards elucidating the biosynthesis of cholesterol, for which he shared the Nobel Prize in physiology or medicine in 1964 jointly with Bloch.

Lynn, Loretta, *née* **Webb** 1935–
US country singer
She was born into rural poverty in Butcher's Hollow, Kentucky, married at the age of 14 and had four children by 18. Her first single, 'Honky-Tonk Girl', became a minor hit and earned her an invitation to perform in the prestigious *Grand Ole Opry* country music show in Nashville in 1960. She matured into a major country singer and songwriter with a string of hits, including a celebrated series of duets with Conway Twitty (1933–93) in the 1970s. She composes both the melodies and lyrics of her songs which often focus on the troubles of rural women and feature defiant parentheses such as 'Don't Come Home A-Drinkin' (with Lovin' on Your Mind)' and 'You Ain't Woman Enough (to Take My Man)'. Her career cooled after 1980, but she remained a big name, and her collaboration with TAMMY WYNETTE and DOLLY PARTON on *Honky Tonk Angels* (1993) was a success. In 2000 she released *Still Country*, her first solo album of new material since 1988. The fresh, informal *Van Lear Rose* (2004), produced by White Stripes guitarist Jack White (1975–), won two Grammy awards. Her bestselling first autobiography *Coal Miner's Daughter* (1976) became a bestseller, and was filmed in 1979. Her second, *Still Woman Enough*, appeared in 2002. Her sister Crystal Gayle (1951–) is also a well-known country-pop artist.

Lynn, Dame Vera, *originally* **Vera Margaret Welch** 1917–
English singer
Born in the East End of London, she joined a singing troupe at the age of 11 and at 15 became a vocalist with Howard Baker's orchestra. She began broadcasting and singing with ensembles such as the Joe Loss Orchestra in the late 1930s, and had her own radio show, *Sincerely Yours*, from 1941 to 1947. Her performances to the troops during World War II earned her the title 'The Forces' Sweetheart', with songs including 'We'll Meet Again' (1939) and 'White Cliffs of Dover' (1942), and her many honours include being made a DBE (1975) and receiving the Burma Star Medal and War Medal (1985). She remains strongly associated with British patriotic sentiment and spoke at the VE Day diamond anniversary rally in 2005, ten years after making her farewell singing performance at the golden jubilee event. 🕮 Robin Cross and Vera Lynn, *We'll Meet Again* (1994)

Lyon, John d.1592
English philanthropist
A yeoman landowner of the estate of Preston, in Middlesex, he was relatively prosperous but childless and used his money for the endowment of local charities. In 1572 he obtained a royal charter from Queen ELIZABETH I for the pre-Reformation school at Harrow, which he supported with endowments to guarantee its continuation. In 1590 he drew up statutes and a course of classical education for the school, and is regarded as the founder of the public school there.

Lyon, Mary Frances 1925–
English biologist
Born in Norwich, Norfolk, she studied at Cambridge, and in 1950 joined the UK Medical Research Council's staff, working from 1955 at their Radiobiology Unit, Harwell/Chilton (head of genetics division from 1962, deputy director from 1986). She has published on many aspects of mammalian genetics, but her name is particularly associated with the 'Lyon hypothesis' which she propounded in 1961. This proposed that one of the two X chromosomes in female mammals is inactivated in early development, so that females are made up of different genetic cell lines (characterized by which of the X chromosomes is switched off). This idea, widely confirmed, has greatly helped studies on clinical genetics and imprinting. Her studies of the mammalian X chromosome and the mouse genomes greatly broadened understanding of the mammalian genome and the problems of hereditary disease. A foreign associate of the US National Academy of Sciences and foreign honoraria member of the Genetics Society of Japan, she was elected a Fellow of the Royal Society in 1973, and was awarded its royal medal in 1984. She retired in 1990 and received the Wolf Prize for medicine in 1997. In 2006 she was awarded Rockefeller University's Pearl Meister Greengard Prize, which recognises the lifetime achievements of women scientists.

Lyon, Mary Mason 1797–1849
US educator
Born in Buckland, Massachusetts, she was an early advocate of higher education for all women and founded Mount Holyoke Female Seminary in South Hadley, Massachusetts. She served as its president for twelve years, operating on a shoestring budget, and her students included EMILY DICKINSON in 1848. The seminary later became Mount Holyoke College, the first women's college in the USA.

Lyons, Edmund Lyons, 1st Baron 1790–1858
English naval commander
Born near Christchurch, Hampshire, he joined the navy in 1803, and served in the passage of Dardanelles (1807) and in the Dutch West Indies (1810–11). Promoted rear admiral in 1850, he served in the Mediterranean as commander-in-chief (1855–58).

Lyons, Dame Enid Muriel *See* LYONS, JOSEPH ALOYSIUS

Lyons, Francis Stewart Leland 1923–83
Irish historian
Born in Derry, he was educated in Tunbridge Wells, at High School, Dublin, and Trinity College, Dublin, where he taught until becoming professor of history at the University of Kent in 1964. He progressed from his technical doctoral thesis, subsequently published, on *The Irish Parliamentary Party 1890–1910* (1951), to a series of works embodying detailed research and judicious assessment of modern scholarship, notably *The Fall of Parnell* (1960), *John Dillon* (1968), *Ireland Since the Famine* (1971), *Charles Stewart Parnell* (1977) and *Culture and Anarchy in Ireland 1890–1939* (1978). He was provost of Trinity College, Dublin, from 1974 to 1981, and was working on a historical biography of W B YEATS when he died.

Lyons, Sir Joseph 1848–1917
English businessman
Born in London, he first studied art, and invented a stereoscope, before joining with three friends to establish what was to become J Lyons and Co Ltd. Starting in Piccadilly with a tea-shop, he became head of one of the largest catering businesses in Great Britain.

Lyons, Joseph Aloysius 1879–1939
Australian statesman
Born in Stanley, Tasmania, and educated at Tasmania University, he was a teacher before entering politics in 1909 as a Labour MP in the Tasmanian House of Assembly. He held the post of Minister of Education and Railways (1914–16) and was premier (1923–29). In the federal parliament he was in turn Postmaster-General, Minister of Public Works and Treasurer. In 1931 he broke away as a protest against the government's financial policy, he himself being in favour of reduced public expenditure, and founded and led an opposition party, the United Australian Party. He became prime minister (1932–39) after the 1931 election. His wife, Dame Enid Muriel Lyons (1897–1981), was born in Leesville, Tasmania, and was very active in her husband's career. In 1943, after his death, she won the Federal seat of Darwin, Tasmania, becoming the first woman member of the House of Representatives and later the first woman member of the Federal Cabinet. She was created GBE in 1937 and retired in 1951. She wrote entertainingly of her marriage in *So we take Comfort* (1965) and of her life in parliament in *Among the Carrion Crows* (1972).

Lyot, Bernard Ferdinand 1897–1952
French astronomer and inventor
Born in Paris and trained as an engineer at the École Supérieure d'Électricité, he joined the staff of the Paris Observatory at Meudon (1920), where his early researches were concerned with the measurement of polarization of light from the moon and planets. In 1931 he succeeded in observing the solar corona from the summit of the Pic du Midi using his new coronagraph, an instrument in which scattered light was reduced to an absolute minimum. Previously such observations had only been possible during a total solar eclipse. Two years later he started photography of the sun through monochromatic polarizing filters: his pioneer cinematographic films of the movements of solar prominences taken in the light of the red hydrogen Ha line created a sensation. He was awarded the gold medal of the Royal Astronomical Society (1939) and the Bruce Medal of the Astronomical Society of the Pacific (1946). He died in Egypt on his return from an expedition to Khartoum where he had observed the total solar eclipse of February 1952.

Lysander d.395 BC
Spartan naval commander
He commanded the fleet which defeated the Athenians at the Battle of Aegospotami in 405 BC, and in 404 BC took Athens, thus ending the Peloponnesian War. He died while unsuccessfully besieging Haliartus in Boeotia.

Lysenko, Trofim Denisovich 1898–1976
Soviet geneticist and agronomist
Born in Karlovka, Ukraine, he graduated from Uman School of Horticulture (1921) and the Kiev Agricultural Institute (1925). During the famines of the early 1930s, he promoted 'vernalization', suggesting that plant growth could be accelerated by short exposures to low temperatures. His techniques seemed to offer a rapid way of overcoming the food shortages then prevailing, and gained him political support. In 1935 he developed a theory of genetics which suggested that environment can alter the hereditary material. As director of the Institute of Genetics of the Soviet Academy of Sciences (1940–65), he pronounced the Mendelian theory of heredity to be wrong, ruthlessly silencing scientists who opposed him. After STALIN's death in 1956, Lysenko increasingly lost support and was forced to resign in 1965. He was awarded the Stalin prize in 1949 for his book *Agrobiology* (1948). 🕮 Zhores A Medvedev, *The Rise and Fall of T D Lysenko* (1969)

Lysias c.458–c.380 BC
Greek orator
The son of a rich Syracusan, he was educated at Thurii in Italy, and settled in Athens about 440 BC. The Thirty Tyrants in 404 BC stripped him and his brother Polemarchus of their wealth, and killed Polemarchus. The first use to which Lysias put his eloquence was, on the fall of the Thirty (403 BC), to prosecute Eratosthenes, the tyrant chiefly to blame for his brother's murder. He then practised with success as a writer of speeches for litigants. From his surviving speeches Lysias emerges as delightfully lucid in thought and expression, and strong in character-drawing. The family home in Athens is portrayed in PLATO's *Republic*.

Lysimachus d.281 BC
Macedonian general, King in Thrace
He served ALEXANDER THE GREAT until he became king in Thrace, to which he later added north-west Asia Minor and Macedonia. He was defeated and killed at Koroupedion by SELEUCUS I NICATOR.

Lysippus of Sicyon 4th century BC
Greek sculptor
He was a prolific worker, said to have made more than 1,500 bronzes, and introduced a new naturalism, reducing the size of the head and making the limb more slender. There is a Roman marble copy of his bronze *Apoxyomenos* (*Man using a Strigil*), which shows an awareness of space as part of sculpture, in the Vatican Museum, Rome (c.330 BC). He made several portrait busts of ALEXANDER THE GREAT.

Lyte, Henry Francis 1793–1847
Scottish hymnwriter
Born in Ednam, near Kelso, he studied at Trinity College, Dublin, and took orders in 1815. His *Poems, Chiefly Religious* (1833, reprinted as *Miscellaneous Poems*, 1868) are not as well known as his hymns, among which are 'Abide with me' and 'Pleasant are thy courts'.

Lyttelton, Humphrey (Richard Adeane) 1921–
English jazz trumpeter and bandleader
He was born in Eton, Berkshire. He taught himself to play the cornet while at Eton (where his father was a housemaster), and after attending Camberwell School of Art and serving throughout World War II in the Grenadier Guards, he played trumpet with George Webb's Dixielanders before forming his own band in 1948. He has led a band continuously since then, and maintains a high musical standard. He was one of the first 'trad' bandleaders to move towards mainstream jazz, replacing the banjo with a guitar and introducing an alto saxophone into the line-up. He founded his own record label, Calligraph, in 1984, and recorded for the first time with another veteran English jazz musician, clarinettist Acker Bilk (1929–), in 1992. He is also well known as a jazz broadcaster and writer, and as the host of the comedy radio panel show *I'm Sorry I Haven't a Clue* (1972–). 🕮 *It Just Occurred to Me ... An Autobiographical Scrapbook* (2006)

Lyttelton, Oliver *See* CHANDOS, 1ST VISCOUNT

Lyttleton, Sir Thomas *See* LITTLETON, SIR THOMAS

Lytton, Bulwer, *pseudonym of* **Edward George Earle Bulwer-Lytton, 1st Baron Lytton (of Knebworth)** 1803–73
English novelist, playwright, essayist, poet and politician
He was born in London, the youngest son of General Earle Bulwer (1776–1807) by Elizabeth Barbara Lytton (1773–1843), the heiress of Knebworth in Hertfordshire, and educated at Trinity Hall, Cambridge (1822–25), where he won the Chancellor's gold medal for a poem, but left with only a pass degree. His marriage (1827), against his mother's wishes, to the Irish beauty Rosina Wheeler, ended in separation (1836), and the temporary estrangement from his mother forced him to support himself by writing. His enormous output, vastly popular during his lifetime, but now forgotten, includes *Eugene Aram* (1832), *The Last Days of Pompeii* (1834) and *Harold* (1843). Among his plays are *The Lady of Lyons* (1838), *Richelieu* (1839) and *Money* (1840), and his poetry includes an epic, *King Arthur* (1848–49). MP for St Ives (1831–41), he was created a baronet in 1838, and in 1843 he succeeded to the Knebworth estate and assumed the surname of Lytton. He re-entered parliament as MP for Hertfordshire in 1852, and in the DERBY government (1858–59) was Colonial Secretary. He was raised to the peerage in 1866.

Lytton, Sir Henry Alfred 1867–1936
English actor
He was born in London and first appeared on stage with the D'Oyly Carte Opera Company in Glasgow in 1884. Until 1932 he played leading parts in GILBERT and SULLIVAN opera. He wrote *Secrets of a Savoyard* (1927) and *A Wandering Minstrel* (1933).

Lytton, (Edward) Robert Bulwer-Lytton, 1st Earl of, *pseudonym* **Owen Meredith** 1831–91
English poet, diplomat and politician
Born in London, he was educated at Harrow school and at Bonn. In 1849 he went to Washington as attaché and private secretary to his uncle, HENRY BULWER, and subsequently was appointed attaché, secretary of legation, consul or chargé d'affaires at Florence (1852), Paris (1854), The Hague (1856), St Petersburg and Constantinople (now Istanbul, 1858), Vienna (1859), Belgrade (1860), Constantinople again (1863), Athens (1864), Lisbon (1865), Madrid (1868), Vienna again (1869) and Paris (1873). In the last year he succeeded his father, BULWER LYTTON, as 2nd Baron Lytton, and in 1874 became Minister at Lisbon. From 1876 to 1880 he was Viceroy of India, where he effected reform but failed to prevent the Second Afghan War (1878), and in 1880 he was made Earl of Lytton; in 1887 he was sent as ambassador to Paris. His works, published mainly under his pseudonym, include novels, poems (eg the epic *King Poppy*, 1892) and translations from Serbian. His *Indian Administration* (1899) and his *Letters* (1906) were both edited by his daughter, Lady Betty Balfour.

Lyubimov, Yuri Petrovich 1917–
Hungarian theatre director
Born in Yaroslavl, Russia, he joined the Vakhtangov Theatre Company in Moscow after World War II, and after the tremendous success of his production of BERTOLT BRECHT's *The Good Person of Setzuan* was appointed director of the Taganka Theatre, Moscow, in 1964. At the Taganka he staged a series of provocative productions (both dramatically and politically), including an adaptation of *Ten Days That Shook The World* (1967), MOLIÈRE's *Tartuffe* (1969) and a modern-dress *Hamlet* (1974). He fell from favour, and while he was in England in 1983–directing an award-winning stage production of DOSTOEVSKY's *Crime and Punishment* – he was fired from his theatre, expelled from the Party and deprived of his Soviet citizenship. He subsequently worked on several productions outside the Soviet Union, but returned to his native country in 1988, directing *Self-Murderer* (1990) and *Electra* (1992), both in Moscow. Later productions include the opera *Nabucco* in Bonn in 1997 and *Eugene Onegin* in Moscow in 2000. He became a Hungarian citizen in 1999.

M

Ma, Yo-Yo 1955–
US cellist
Born in Paris, the son of Chinese immigrants who were professionals in classical music, he was a prodigy on the cello, an instrument he took up because his elder sister already played the violin. He moved to New York with his family at the age of seven and two years later made his debut at Carnegie Hall. After studying at the Juilliard School of Music and graduating from Harvard in 1976, he achieved international fame as a cello virtuoso, playing both as a soloist and in chamber music ensembles around the world. He has won 15 Grammy awards for his recordings. He also played on the musical scores of the films *Crouching Tiger, Hidden Dragon* (2000) and *Memoirs of a Geisha* (2005).

Maathai, Wangari Muta 1940–
Kenyan environmental and political campaigner and Nobel Prize winner
Born in Nyeri, she won a scholarship to Mount St Scholastica College in Kansas, and went on to obtain an MSc from the University of Pittsburgh and a PhD from the University of Nairobi, Kenya. In 1976, she founded the Green Belt Movement, a tree-planting initiative in association with women's groups; the organization spread across Africa, and planted over 30 million trees. Despite several arrests for campaigning against deforestation, in 2002 she was elected to Kenya's parliament, becoming deputy environment minister in 2003. She was awarded the 2004 Nobel Peace Prize for her contribution to sustainable development, democracy and peace – the first environmentalist, and the first African woman, to receive the award.

Maazel, Lorin Varencove 1930–
US conductor and violinist
He was born in Neuilly, France, and went to the USA as a child prodigy on the violin. He studied at the University of Pittsburgh and became leader of a number of US orchestras, including the New York Philharmonic Orchestra and the Chicago and Cleveland orchestras. In 1960 he became the first US conductor to appear at Bayreuth, and he was later appointed musical director of the Deutsche Oper (1965–71), musical director of the Cleveland Orchestra (1972–82), and director of the Vienna Staatsoper (1982–84). He was the musical director of the Pittsburgh Symphony Orchestra (1988–96), the Orchestre National de France (1988–90), the Bavarian Radio Symphony Orchestra (1993–2002) and, from 2002, the New York Philharmonic Orchestra. Since the 1990s he has also been active as a composer.

Mabillon, Jean 1632–1707
French scholar
Born in St Pierremont in Champagne, he became a Benedictine monk in 1654, and from 1664 worked in the abbey of St Germain-des-Prés in Paris. Considered the founder of Latin palaeography, he edited the works of BENEDICT OF NURSIA (1667), and wrote a history of the Benedictine order (9 vols, 1668–1702) and *De re diplomatica* (1681; supplement 1704).

Mabon *See* ABRAHAM, WILLIAM

Mabuse, Jan, *properly* **Gossaert** c.1470–1532
Flemish painter
Born in Maubeuge (Mabuse), he entered the painters' guild of St Luke in Antwerp in 1503, and was influenced by QUENTIN MATSYS and HANS MEMLINC. In 1508–09 he accompanied Philip of Burgundy to Italy, where he adopted the High Renaissance style, which he introduced to the Netherlands. He later lived in Middelburg.

McAdam, John Loudon 1756–1836
Scottish inventor and engineer
Born in Ayr, he went to New York in 1770, where he made a fortune in his uncle's counting-house. On his return to Scotland in 1783 he bought the estate of Sauchrie in Ayrshire, and started experimenting with a revolutionary method of road construction. In 1816 he was appointed surveyor to the Bristol Turnpike Trust, and remade the roads there with crushed stone bound with gravel, raising them to improve drainage – the 'macadamized' system. His advice was widely sought, but the cost of his experiments had impoverished him. He petitioned parliament in 1820, was voted £2,000 in 1825, and two years later was made surveyor-general of metropolitan roads.

McAleese, Mary Patricia, *née* **Leneghan** 1951–
Irish Fianna Fáil politician
Born in Belfast, she was educated at Queen's University, Belfast. She began her career in law and was appointed Reid Professor of Criminal Law at Trinity College, Dublin (1975–79 and 1981–87). In 1994 she became Pro-Vice Chancellor of Queen's University, Belfast. She has held several directorships, including those of the Institute of Professional Legal Studies (1987–97) and Channel 4 Television (1992–97), and was a founder member of the Irish Commission for Prisoners Overseas. She was elected president of Ireland in 1997, and re-elected unopposed in 2004. 🕮 *Love in Chaos: Spiritual Growth and the Search for Peace in Northern Ireland* (1999)

McAliskey, (Josephine) Bernadette, *née* **Devlin** 1947–
Irish political activist
Born into a poor Catholic family, she was brought up in Dungannon, County Tyrone, and educated at St Patrick's Girls' Academy, Dungannon, and Queen's University, Belfast. While at university she became the youngest MP in the House of Commons since WILLIAM PITT, the Younger, when she was elected as an Independent Unity candidate in 1969, at the age of 21. Her aggressive political style led to her arrest while leading Catholic rioters in the Bogside, Belfast, and she was sentenced to nine months' imprisonment. In 1971 she lost Catholic support when she gave birth to an illegitimate child. She married two years later and did not stand in the 1974 general election. In 1979 she unsuccessfully sought a seat in the European Parliament, and in 1981 actively supported the IRA hunger strikers, making a dramatic appearance in Spain after her recovery from an attempted assassination in which she and her husband were shot. She was a co-founder of the Irish Republican Socialist Party in 1974. She is an active commentator, but is now on the fringes of politics in Northern Ireland. 🕮 G W Target, *Bernadette: The Story of Bernadette Devlin* (1975)

Macalpin *See* KENNETH I

McAlpine, Sir Robert 1847–1934
Scottish building contractor
Born in Newarthill, Lanarkshire, he left school at the age of 10 to work in the pits, after which he was apprenticed as a bricklayer. In 1868 he set up a building business in the Hamilton area and began to win contracts nationally. He rebuilt his operations after a threat of bankruptcy in 1877, winning the crucial contract to build the Singer's factory at Kilbowie, Dunbartonshire. A rapid expansion as a contractor followed, in which McAlpine made use of new building materials, including concrete, and new techniques such as labour-saving machinery. In the post-war period he won large contracts from local authorities, especially for roads, and it was his company that built Wembley Stadium. He was created a baronet in 1918.

McAnally, Ray(mond) 1926–89
Irish actor
Born in Buncrana, Donegal, he made his professional debut in *A Strange House* (1942). A member of Dublin's Abbey Theatre from 1947, he had appeared in some 150 productions there by 1963 and attributed his versatility to a philosophy of 'five lines one week, King Lear the next'. His many celebrated performances include *The Shadow of a Gunman* (1951) and *The Country Boy* (1959). Performances in London include *A Cheap Bunch of Nice Flowers* (1962), *Who's Afraid of Virginia Woolf?* (1964) and *The Best of Friends* (1988). He frequently returned to the Abbey Theatre to direct and teach. Active in the cinema from 1957, his many films include *The Mission* (1986, BAFTA award) and *My Left Foot* (1989). A veteran of over 500 television

MacArthur, Douglas 1880–1964
US soldier

Douglas MacArthur was born in Little Rock, Arkansas, the son of Lieutenant-General Arthur MacArthur (1845–1912). He was educated at West Point, commissioned in the Corps of Engineers in 1903, and went to Tokyo in 1905 as aide to his father. In World War I he commanded the 42nd (Rainbow) Division in France, and was decorated 13 times and cited seven additional times for bravery. In 1919 he became the youngest-ever superintendent of West Point, and in 1930 he was made a general and chief of staff of the US army. In 1935 he became head of the US military mission to the Philippines.

In World War II he was appointed commanding general of the US armed forces in the Far East in 1941. In March 1942, after a skilful but unsuccessful defence of the Bataan Peninsula, he was ordered to evacuate from the Philippines to Australia, where he set up HQ as supreme commander of the South West Pacific Area. As the war developed he carried out a brilliant 'leap-frogging' strategy which enabled him to recapture the Philippine Archipelago from the Japanese. He completed the liberation of the Philippines in July 1945, and in September 1945, as supreme commander of the Allied powers, formally accepted the surrender of Japan on board the *Missouri*. He then exercised almost unlimited authority in the occupied Empire, giving Japan a new constitution and carrying out a programme of sweeping reform.

When war broke out in Korea in June 1950 President TRUMAN ordered MacArthur to support the South Koreans in accordance with the appeal of the UN Security Council. In July he became commander-in-chief of the UN forces. After initial setbacks he pressed the war far into North Korea, but after the Chinese entered the war in November, MacArthur demanded powers to blockade the Chinese coast, bomb Manchurian bases and to use Chinese nationalist troops from Formosa against the communists. This led to acute differences with the US Democratic administration and in April 1951 President Truman relieved him of his commands. He failed to be nominated for the presidency in 1952.

A brilliant military leader and a ruler of Japan imbued with a deep moral sense, MacArthur became a legend in his lifetime. Equally, he inspired criticism for his imperious belief in his own mission and his sense of self-dramatization.

📖 W Manchester, *American Caesar: Douglas MacArthur, 1880–1964* (1978); R Rovere and A Schlesinger, *The MacArthur Controversy and American Foreign Policy* (1965); J Gunther, *The Riddle of MacArthur: Japan, Korea, and the Far East* (1952; reprint 1974).

> 'But in the coming of my memory, always I come back to West Point. Always there echoes in my ear – Duty – Honour – Country.'
>
> – Farewell address to the cadets of West Point, 12 May 1962.

productions after 1959, he also won BAFTA awards for *A Perfect Spy* (1988) and *A Very British Coup* (1989).

Macan t-Saoir, Donnachadh Ban *See* MCINTYRE, DUNCAN BAN

Macapagal-Arroyo, Gloria 1948–
Philippine politician
Born in Lubao, Pampanga, the daughter of Diosdado Macapagal (1910–97), president (1961–65), she was educated at Assumption College, Georgetown University, the Ateneo de Manila University and the University of the Philippines. She joined the Philippine government in 1986 and served as under-secretary at the department of Trade and Industry (1986–92) before becoming a senator in 1992. Having been secretary at the department of Social Welfare and Development, she became vice-president of the Philippines in 1998 and president in 2001. She was re-elected in 2004.

MacArthur, Charles Gordon 1895–1956
US playwright
Born in Scranton, Pennsylvania, he became a heavy drinker and prankster. While working as a journalist in Chicago he managed to convince the Chief of Police that one HENRY WADSWORTH LONGFELLOW had been wrongly charged with rape. During World War I he is said to have dropped empty whisky bottles over Berlin – friends suggested he might simply have leaned out of the plane and breathed over the city. He is best known for his collaborations with BEN HECHT: *The Front Page* (1928) for the stage, and the films *Barbary Coast* (1935) and *The Scoundrel* (1935), plus their enduring adaptation of *Wuthering Heights* (1939).

MacArthur, Douglas *See panel above*

Macarthur, Elizabeth, *née* **Veale** 1766–1850
Australian pioneer
Born in Bridgerule, Devon, England, in 1788 she married JOHN MACARTHUR and sailed with him and their son to New South Wales in 1789. In 1793 John received a grant of land near Parramatta, New South Wales, which he named Elizabeth Farm. During her husband's prolonged absences from the colony, she was left, with their seven surviving children, to manage Macarthur's involved business ventures. Supported by her husband's nephew Hannibal Hawkins Macarthur (1788–1861), she introduced the merino sheep to Elizabeth Farm and to their new grant of land at Camden, New South Wales, and successfully carried out experiments in the breeding of sheep for fine wool which led to the establishment of the Australian wool industry.

MacArthur, Dame Ellen 1977–
English yachtswoman
Born in Whatstandwell, Derbyshire, she took up sailing as a child and at the age of 18 sailed single-handed around Britain. Following success in the Route du Rhum transatlantic race in 1998 she was named Yachtsman of the Year. In 2000 she took part in the Vendée Globe round-the-world event, finishing second and in the process becoming the youngest woman to sail single-handed around the globe and only the second person to complete a solo circumnavigation in fewer than 100 days. In February 2005 she broke the record for a solo circumnavigation; on her return she was awarded the title Dame Commander of the British Empire.

Macarthur, John 1767–1834
Australian pioneer and wool merchant
Born in England, he joined the army at the age of 15. In 1789 he became a lieutenant in the New South Wales Water Corps, and emigrated to Australia with his wife ELIZABETH MACARTHUR, becoming leader of the settlers in New South Wales. He inspired the Rum Rebellion (1808–10), in which the British soldiers mutinied and imprisoned the governor, WILLIAM BLIGH of *Bounty* fame. Macarthur was banished to England in 1810, but returned in 1816 and made a fortune in the wool trade. He was a member of the New South Wales Legislative Council (1825–32).

MacArthur, Robert Helmer 1930–72
US ecologist
Born in Toronto, Canada, he moved to the USA at the age of 17 and studied mathematics. While working for his PhD at Yale he changed to zoology; he became professor of biology at Princeton University in 1965. His mathematical training led him to develop quantitative models of the relative abundances of species in different habitats, showing the importance of the balance between immigration and extinction. One of his most influential ideas was the categorization of animals into two groups, one group exhibiting rapid growth followed by catastrophic decline, with fast rates of population increase (r-selected species, eg lemmings), and the other k-selected species having stable populations and slow intrinsic growth rates (eg tigers).

Macartney, George, 1st Earl 1737–1806
Irish diplomat
Born in Lissanoure, near Belfast, and educated at Trinity College, Dublin, he was sent as an envoy to Russia in 1764. From 1769 to 1772 he was chief-secretary of Ireland, and in 1775 was appointed governor of Grenada, where he was taken prisoner by the French in 1779. Later governor of Madras (1781–85), he was made an earl in 1792 and headed the first diplomatic mission to China (1792–94). After a mission to LOUIS XVIII at Verona (1795–96), he went out as governor of the new colony of the Cape of Good Hope (1796), but returned in ill health in 1798.

Macaulay, Dame (Emilie) Rose 1881–1958
English novelist and essayist
She was born in Rugby, Warwickshire, and educated at Somerville College, Oxford, where she read history. Her first novel was *Abbots Verney* (1906), followed by *Views and*

Vagabonds (1912) and *The Lee Shore* (1920), winner of a £1,000 publishers' prize. Her later novels include *Dangerous Ages* (1921), which won the Femina Vie Heureuse prize, *Crewe Train* (1926), *They Were Defeated* (1932) and *And No Man's Wit* (1940). After World War II she wrote two further novels, *The World My Wilderness* (1950), and *The Towers of Trebizond* (1956), which won the James Tait Black Memorial Prize. Her travel books include *They Went to Portugal* (1946), *Fabled Shore* (1949) and *The Pleasure of Ruins* (1953). She also wrote collections of essays, such as *A Casual Commentary* (1925) and *Catchwords and Claptrap* (1926). She was created DBE in 1958. 🕮 C B Smith, *Rose Macaulay, a Biography* (1972)

Macaulay (of Rothley), Thomas Babington Macaulay, 1st Baron 1800–59
English writer and politician
Born in Rothley Temple, Leicestershire, and educated at Trinity College, Cambridge, he was called to the Bar in 1826, and then combined his legal career with writing. His article on MILTON in the August 1825 issue of the *Edinburgh Review* had gained him recognition, and for nearly 20 years he was one of the most prolific and popular of the writers on the magazine. He became MP for the borough of Calne in 1830, and took part in the Reform Bill debates. He was legal adviser to the Supreme Council of India (1834–38) and on his return in 1839 became MP for Edinburgh, and later secretary of war under Lord MELBOURNE. He received a peerage in 1857. His *History of England from the Accession of James II* (5 vols, 1848–61) enjoyed unprecedented popularity for a work of its kind. He has been convicted of historical inaccuracy, but as a picturesque narrator he has few rivals. 🕮 J Millgate, *Macaulay* (1973)

McAuley, Catherine Elizabeth 1787–1841
Irish religious
Born in Dublin, she was left money by her adoptive parents to buy a site for a school for poor children and a residence for working women, to be called House of Our Blessed Lady of Mercy. In 1831 she founded the order of the Sisters of Mercy.

McAuley, James 1917–76
Australian poet, critic and writer
Born in Lakemba, Sydney, he spent much time during and after World War II in Papua New Guinea, where he likened the destruction of traditional social structures there to the larger upheavals of the western world. His verse is of a classical and visionary style, and was first collected in *Under Aldebaran* (1946). His second volume, *A Vision of Ceremony*, did not appear until 1956, followed by *Captain Quiros* in 1964. In 1955 he started a controversy which lasted for 40 years by sending the collected works of a fictitious dead poet, 'Ern Malley', to the editor of the modernistic broadsheet *Angry Penguins*, thus hastening the demise of that periodical. McAuley founded the conservative literary and political journal *Quadrant* and edited it from its inception in 1956 to 1963. He also published some books of critical writing and compiled *A Map of Australian Verse: The Twentieth Century* (1975).

McBean, Angus Rowland 1904–89
Welsh stage photographer
Born in Newbridge, Monmouth, he was educated at Monmouth Grammar School. After a number of jobs, including the design of theatrical masks and scenery, he started as a full-time theatrical photographer in 1934. He became noted for his individual approach to portraiture (where he often used elaborate settings designed for the individual sitter) and for his use of photographic montage, collage and double exposure to achieve a surreal effect. In later years he worked in the field of pop music, but withdrew from professional photography after 1969.

Macbeth c.1005–1057
King of Scotland
He was Mórmaer (chief) of Moray (c.1031) and married Gruoch, granddaughter of Kenneth III. He became king in 1040 when he defeated and killed King DUNCAN I and drove Duncan's sons, Malcolm and Donald Bán, into exile. He seems to have represented a Celtic reaction against English influence and he ruled for over a decade. MALCOLM III, Duncan's son, ultimately defeated and killed him at Lumphanan. The conventional, Shakespearean view of Macbeth as a villainous usurper has little historical basis. His usurpation was a normal feature of Celtic succession struggles, his reign was a period of plenty, he was a friend to the Church and went on pilgrimage to Rome. SHAKESPEARE took his material from the *Chronicles* of HOLINSHED, who drew on HECTOR BOECE. 🕮 R J Steward, *Macbeth: Scotland's Warrior King* (1988)

Macbeth, Ann 1875–1948
English embroiderer
Born in Little Bolton, she studied at Glasgow School of Art (1897–1900) and was a member of staff there from 1901 to 1920, latterly as head of the embroidery department. She was influential in advocating new methods of teaching embroidery through lecturing, teaching and through several books, including the instruction manual, *Educational Needlecraft*. She executed a number of ecclesiastical commissions and her embroidered panels decorate many Glasgow interiors. She was a member of the famous Glasgow School and received the Lauder award in 1930.

MacBeth, George Mann 1932–92
Scottish poet and novelist
Born in Shotts, Lanarkshire, he was educated at King Edward VII School in Sheffield and New College, Oxford, and produced poetry programmes at the BBC (1955–76). Associated with the informal coterie known as The Group (and represented in *The Group Anthology*, 1963), and with performance poetry in the 1960s, he published 20 books of verse, some of it experimental in form and violent in matter, although his later work was more traditional in form. A *Collected Poems 1958–70* appeared in 1971, and was later updated as *Collected Poems 1958–82*. He also published children's books and ten novels, the last of which, *The Testament of Spencer* (1992), appeared shortly after his death. 🕮 *A Child of the War* (1987)

McBey, James 1883–1959
Scottish artist and etcher
Born in Newburgh, Aberdeenshire, he worked in a bank but left to become an artist and was entirely self-taught, producing his first etching in 1902. He travelled extensively in the UK, Spain, the Netherlands, North Africa, Central and North America, and as a war artist in France and with the Australian Camel Patrol in Egypt and Palestine during World War I. His etched work has great spontaneity and strength.

MacBride, Maud *See* GONNE, MAUD

MacBride, Seán 1904–88
Irish statesman and Nobel Prize winner
The son of MAUD GONNE and Major John MacBride, he carried on his parents' commitment to Irish nationalism and served in the Irish Republican Army before entering the government of independent Ireland. He became involved in international human rights and was chairman of Amnesty International (1961–75). In 1974 he shared the Nobel Peace Prize with SATO EISAKU.

McBride, Willie (William) John 1940–
Northern Irish rugby player
Born in Toomebridge, County Antrim, he played mostly with the Ballymena team from 1962. A tough lock-forward, he made a record 17 test appearances for the British Lions over the course of five tours, and played for Ireland 63 times. His greatest moment came when he captained the Lions to South Africa in 1974. The team went through the tour unbeaten, with McBride leading his men in a series of very physical encounters with the opposition. He also coached Ireland, managed the Lions team of 1983 and was awarded the MBE in 1971.

McCabe, Patrick 1955–
Irish writer
He was born in Clones, County Monaghan, and originally worked as a teacher of disabled children. His books include *Music on Clinton Street* (1986), *Breakfast on Pluto* (1998, filmed 2005), *Emerald Germs of Ireland* (2001) and *Winterwood* (2006). *The Butcher Boy* (1992), the dark and hilarious tale of a young killer in small-town Ireland, was shortlisted for the Booker Prize and made into a film in 1997.

Maccabees
Jewish family
The founder of the dynasty, Mattathias, a priest, was the first to make a stand against the persecutions of the Jewish nation and creed by ANTIOCHUS IV EPIPHANES. He was the great-great-grandson of Hasmon and the family is often known as the 'Hasmoneans'. Mattathias and his five sons, Jochanan, Simon, Jehudah, Eleazer and Jonathan, together with a handful of faithful men, attacked the national enemy, destroyed heathen worship, and fled into the wilderness of Judah. They soon increased in number and were able to restore the ancient worship of Jehovah in some of the major settlements. At the death of Mattathias (166 BC) his son Jehudah or Judas, now called Makkabi (*Makkab*, 'hammerer') or Maccabæus, took command of the patriots, reconquered Jerusalem, purified the

temple, and re-inaugurated the holy service (164). Having concluded an alliance with the Romans, he died in battle (160). His brother Jonathan renewed the Roman alliance and acquired the dignity of high priest, but was assassinated by the Syrians. Simon, the second brother, completely re-established the independence of the nation (141), and 'Judah prospered as of old'. He was murdered (135) by his son-in-law, PTOLEMY.

MacCaig, Norman Alexander 1910–96
Scottish poet
Born in Edinburgh, he was educated at the Royal High School and the university there. He was a primary school teacher for almost 40 years, became the first Fellow in creative writing at Edinburgh University (1967–69), then lectured in English Studies at Stirling University (1970–79). With *Far Cry* (1943) and *The Inward Eye* (1946), he was labelled a member of the New Apocalypse school. His *Collected Poems* was first published in 1985, and other collections include *Riding Lights* (1955), *The Sinai Sort* (1957), *A Round of Applause* (1962), *Rings on a Tree* (1968), *A Man In My Position* (1969), *The White Bird* (1973), *The Equal Skies* (1980) and *Voice-Over* (1988). He was awarded the Queen's Gold Medal for poetry in 1986. A new edition of *Collected Poems* appeared in 1990. 🕮 R Fulton, in *Contemporary Scottish Poetry* (1974)

McCall Smith, Alexander 1948–
Scottish writer and academic
He was born in Bulawayo, Rhodesia (now Zimbabwe), to British parents, and studied law at Edinburgh. He taught law in Belfast, then in Swaziland and Botswana, where he helped to found a law school and established a criminal code. He returned to Edinburgh to teach medical law, and earned a reputation as an expert in medical legal ethics. He has written some 30 children's books, and in the 1990s branched into adult fiction. As a writer, he is best known for the *No 1 Ladies' Detective Agency* series, a group of novels which describe the adventures of an all-female detective agency in Botswana; they have been translated into some 25 languages. His other novels include *The 2½ Pillars of Wisdom*, *The Sunday Philosophy Club* series and the *44 Scotland Street* series. Now professor emeritus at the University of Edinburgh, he has served as vice-chairman of the Human Genetics Commission and as a member of the International Bioethics Commission of UNESCO. He is a fellow of the Royal Society of Edinburgh, and an amateur bassoonist.

McCarthy, Cormac 1933–
US author
Born in Providence, Rhode Island, he studied at the University of Tennessee, but left without graduating, publishing his first novel, *The Orchard Keeper*, in 1965. Acclaimed as an exemplar of 'Southern Gothic', this was followed by novels such as *Outer Dark* (1968) and *Suttree* (1979). His Western-inspired 'Border Trilogy' comprised *All the Pretty Horses* (1992), *The Crossing* (1994) and *Cities of the Plain* (1998), and won him a wide international readership. Recent novels include *No Country for Old Men* (2005) and *The Road* (2006). 🕮 Harold Bloom (ed), *Cormac McCarthy* (2001)

MacCarthy, Denis Florence 1817–82
Irish writer
Born in Dublin, he trained for the priesthood, but wrote poetry, much of it in a historical and patriotic vein. He also published highly regarded translations of a number of plays by PEDRO CALDERÓN DE LA BARCA, and published *Shelley's Early Life* (1872).

MacCarthy, Sir Desmond 1878–1952
English writer and critic
Born in Plymouth and educated at Eton and Trinity College, Cambridge, he entered journalism and was successively editor of *New Quarterly* and *Eye Witness* (later *New Witness*). By 1913 he was writing for the *New Statesman*, of which he became literary editor in 1920, and later drama critic. He was also editor of *Life and Letters*, book reviewer for *The Sunday Times*, and a broadcaster of repute. His criticism, collected in book form, is represented by *Portraits* (1931), *Experience* (1935), *Drama* (1940), *Humanities* (1954) and *Theatre* (1955).

McCarthy, Eugene J(oseph) 1916–2005
US Democratic politician
He was born in Watkins, Minnesota. A teacher of political science, he entered the House of Representatives as a Democrat (1949) and in 1958 was elected senator from Minnesota. In 1968 he challenged President JOHNSON for the presidential nomination, on a policy of opposition to the Vietnam War. Johnson stood down, but McCarthy did not gain the Democratic nomination. He left the Senate in 1971 to devote himself to teaching and writing, although he mounted independent presidential campaigns in 1972, 1976 and 1988. His publications include *Required Reading* (1988) and *Colony of the World* (1993).

McCarthy, John 1927–
US computer scientist
He was born in Boston and educated at California Institute of Technology (BS) and Princeton University (PhD in Mathematics, 1951). He taught mathematics at Princeton, Stanford and Dartmouth College and communication science at MIT before becoming professor of computer science at Stanford in 1962. In 1955 he coined the term 'artificial intelligence'; he has made major contributions to that field, focusing primarily on the formalization of common-sense knowledge. He has received, among other honours, the Turing Award (1971), the Kyoto Prize (1988) and the National Medal of Science (1990), and has served as president of the American Association for Artificial Intelligence (1983–84).

McCarthy, John 1957–
English journalist
Born in London, brought up in Hertfordshire and educated at Haileybury and Hull University, he worked as an advertising salesman for a shipping journal, then became a freelance journalist. Having worked for Worldwide Television News since 1981, he went to Lebanon as acting bureau chief. After only 32 days there, on 17 April 1986 he was abducted by the revolutionary fundamentalist group Islamic Jihad. He was held as a hostage for 1,943 days until his release on 8 August 1991. He wrote *Some Other Rainbow* (1993) with Jill Morrell about the experience. He subsequently travelled to Patagonia with his fellow former hostage BRIAN KEENAN, a journey described in their bestselling book *Between Extremes* (1999). He now works as a print and broadcast journalist. For his television series *It Ain't Necessarily So* (2001), he explored the Middle East in search of evidence for biblical stories. He was made a CBE in 1992.

McCarthy, Joseph Raymond 1909–57
US politician
Born in Grand Chute, Wisconsin, he studied at Marquette University, Milwaukee, became a circuit judge in 1939, and after war service was elected senator in 1946. He became known for his unsubstantiated accusations in the early 1950s that communists had infiltrated the State Department, and in 1953 became chairman of the House Committee on Un-American Activities. By hectoring cross-examination and damaging innuendo he arraigned many innocent citizens and officials, overreaching himself when he came into direct conflict with the army. This kind of anti-communist witch hunt became known as 'McCarthyism'. His power diminished after he was formally censured for his methods by the Senate in 1954.

McCarthy, Mary Thérèse 1912–89
US novelist and critic
She was born in Seattle, Washington, and at the age of eight won a state prize for an article entitled 'The Irish in American History'. Educated at Vassar College, New York, she wrote book reviews for the *Nation* and the *New Republic* and was an editor for Covici Friede in 1936–37. She was an editor and theatre critic for the *Partisan Review* (1937–48), during which period she wrote articles, stories and novels. Her voice has often been described as scathing, yet although she brought little emotional warmth to her work, she was a highly intelligent, observant novelist. Her best-known fiction includes *The Company She Keeps* (1942), *The Groves of Academe* (1952) and *The Group* (1963), a bestseller about eight Vassar graduates and their sex lives. She also wrote the documentary denunciations of US involvement in the Vietnam War, *Vietnam* (1967) and *Hanoi* (1968). Other works include *A Charmed Life* (1955), *Sights and Spectacles* (1956), the autobiographical *Memories of a Catholic Girlhood* (1957) and *Cannibals and Missionaries* (1979). 🕮 C Gerlderman, *Mary McCarthy* (1988)

McCartney, Sir (James) Paul 1942–
English songwriter, vocalist and bass guitarist
Liverpool-born and a former member of the BEATLES, he is one of the most distinctive lyricists in popular music. His song 'Yesterday' has been covered over 3,000 times by other artists. Following his first solo album, *McCartney* (1970), and a second, *Ram* (1971), recorded with his wife, Linda Eastman (1941–98), he recruited guitarist Denny Laine (1944–) to form Wings in 1971. Critics detected a lack of direction in the banned political single 'Give Ireland Back to the Irish' (1972) and its sequel 'Mary Had a Little Lamb' (1972), but the albums *Band on the Run* (1973) and *Venus & Mars* (1975) partially restored his reputation, while

'Mull of Kintyre' (1977) was a huge hit. Wings disbanded in 1981. His autobiographical film *Give My Regards to Broad Street* appeared in 1984. He co-composed his *Liverpool Oratorio* with Carl Davis in 1991, and wrote a symphony, *Standing Stone*, in 1997. His 2005 rock album *Chaos and Creation in the Backyard* continued a latter-day creative renaissance, first evident in 1997's *Flaming Pie*, which has elsewhere seen him exploring classical and electronic forms as well as his more familiar pop. In recent years he has also exhibited his paintings and has continued to campaign for a number of charitable and environmental causes. His second marriage, to the model Heather Mills (1968–) lasted from 2002–06. He was knighted in 1997. 🕮 Barry Miles, *Many Years From Now* (1997)

McCartney, Stella Nina 1972–
English fashion designer
The daughter of Linda and PAUL MCCARTNEY, she was born in London and worked with CHRISTIAN LACROIX and BETTY JACKSON before taking a degree at St Martin's College of Art and Design. Her graduation show collection was bought by the London boutique Tokio, and shortly afterwards she set up her own design company. In 1997 she became chief designer for Chloé, Paris, reviving the company's fortunes. She left Chloé in 2001 to launch her eponymous label, in partnership with Gucci. Her first store opened in 2002, and she launched her first fragrance in 2003. Unusually for a high-end designer, she uses no fur, leather or animal products in her collections.

McCauley, Mary Ludwig Hays, *known as* **Molly Pitcher** 1754–1832
American Revolutionary war heroine
Born near Trenton, New Jersey, she earned her nickname by carrying water to her husband, John Hays (or Heis), and the other men of the 7th Pennsylvania Regiment during the Battle of Monmouth on 28 June 1778. When her husband collapsed from the heat, like (or perhaps confused with) MARGARET CORBIN, she took his place at his cannon for the remainder of the battle. For this act of bravery she was rewarded with a government pension in 1822.

McCay, Winsor Zezic, *also called* **Silas** 1867–1934
US cartoonist and film animator
He was born in Spring Lake, Michigan. His first newspaper illustrations were for the *Times-Star* (1893), and he created his first strip, *Tales of the Jungle Imps*, in 1903. He joined the *New York Herald* to make his first successful strip, *Dreams of a Rarebit Fiend* (1904), which was filmed by THOMAS EDISON. He drew under the pen name 'Silas', but used his own name for the explosive *Little Sammy Sneeze* (1904) and his masterpiece, *Little Nemo in Slumberland* (1905), which owed its success to McCay's mastery of perspective. From 1909 he began experimenting in animation, his films including *Gertie the Dinosaur* (1914), and *The Sinking of the Lusitania* (1918), the first dramatic/documentary cartoon.

McClellan, George Brinton 1826–85
US general
He was born in Philadelphia. In the Civil War in 1861, as major-general in the US army, he drove the enemy out of West Virginia, and was called to Washington to reorganize the army of the Potomac. He advanced near to Richmond, but was compelled to retreat, fighting the Seven Days Battles (25 June to 1 July 1862). After the disastrous second Battle of Bull Run (29–30 August), followed by a Confederate invasion of Maryland, he reorganized the army at Washington, marched north, met ROBERT E LEE at Antietam, and compelled him to recross the Potomac. He followed the Confederates into Virginia, too slowly for ABRAHAM LINCOLN, who replaced him with AMBROSE E BURNSIDE. In 1864, as Democratic candidate for the presidency, he was defeated by Lincoln, and in 1878 was elected governor of New Jersey.

McClelland, William 1889–1968
Scottish educationalist
Born in Newton Stewart, Wigtownshire, and educated at Edinburgh University, he held various lecturing posts at Edinburgh and Aberdeen from 1921 before becoming concurrently professor of education at St Andrews and director of studies at Dundee Training College in 1925. Deeply interested in improving methods of teacher training, he was executive officer for the National Committee for Training Teachers in Scotland (1941–59) and chairman of the Advisory Council on Education in Scotland (SACE) (1947–51), being generally credited with the 1946 SACE report on training of teachers, which exercised a decisive influence within the training system. A specialist on statistical methods and educational psychology, he also wrote *Selection for Secondary Education* (1942), a pioneering study of the 11-plus examination.

McClintock, Barbara 1902–92
US geneticist and Nobel Prize winner
Born in Hartford, Connecticut, she received a PhD in botany from Cornell University, where she worked from 1927 to 1935. Later she held posts at the University of Missouri (1936–41) and Cold Spring Harbor (1941–92). Her work on the chromosomes of maize provided the ultimate proof of the chromosome theory of heredity. In the 1940s she showed how genes can control other genes, and can be copied from chromosome to chromosome. It was not until the 1970s that her work began to be appreciated, and finally in 1983 she was awarded the Nobel Prize in physiology or medicine. 🕮 Evelyn Fox Keller, *A Feeling for the Organism* (1983)

McClure, Sir Robert John Le Mesurier 1807–73
Irish explorer and admiral
Born in Wexford, he joined the navy in 1824, and served in Sir GEORGE BACK's Arctic expedition in 1836, and Sir JOHN ROSS's Franklin expedition in 1848. As commander of a ship in another Franklin expedition (1850–54), he penetrated eastwards to the north coast of Banks Land. He received a parliamentary award for the discovery of the Northwest Passage which is now credited to Sir JOHN FRANKLIN.

McClure, Samuel Sidney 1857–1949
US editor and publisher
Born in County Antrim, Ireland, he went to the USA with his family at the age of nine. While studying at Knox College in Illinois, he established (1884) the McClure Syndicate, the first newspaper syndicate in the USA, which allowed newspapers across the country to reprint previously published stories for a fee. Later he also bought novels from writers such as RUDYARD KIPLING and ROBERT LOUIS STEVENSON and offered them for serialization. In 1893 he founded *McClure's Magazine*, and as its editor he assembled a staff that included IDA M TARBELL, LINCOLN STEFFENS and other gifted journalists, whose 'muckraking' exposés of social and political corruption led to legislative reforms and made *McClure's* the most influential US periodical of its era.

McColgan, Liz (Elizabeth) 1964–
Scottish athlete
Born in Dundee, she studied at the University of Alabama. She won the 10,000 metres gold medal in the 1986 Commonwealth Games, then won the silver medal at the Seoul Olympics of 1988. She retained her Commonwealth title in Auckland in 1990, and won a bronze in the 3,000 metres. Not long after the birth of her daughter, she won the 1991 New York Marathon in 2 hours, 27 minutes, the fastest female marathon debut. Also that year she won the 10,000 metres at the world championship in Tokyo. In 1993 she had two knee operations and was advised to give up racing, but returned to racing in 1995, when she came fifth in the London Marathon and finished fourth in the 10,000 metres in the European Cup. Her other marathon successes include the Tokyo Marathon (1992) and the London Marathon (1996). Awarded the MBE in 1992, she retired in 2001.

MacColl, Dugald Sutherland 1859–1948
Scottish painter and art historian
Born in Glasgow, he studied at London and Oxford, and after travelling Europe studying works of art, he established a reputation as a critic and brought out his *Nineteenth Century Art* in 1902. As Keeper of the Tate Gallery (1906–11) and of the Wallace Collection (1911–24), he instituted many reforms and improvements. He wrote *Confessions of a Keeper* (1931).

MacColl, Ewan, *originally* **James Miller** 1915–89
Scottish folk-singer, composer, collector, author, playwright and socialist
He was born in Auchterarder, Perthshire, and raised in industrial Lancashire. As a playwright, he collaborated with JOAN LITTLEWOOD in forming the experimental Theatre Workshop in the 1940s and played an important role in reviving street theatre. By the turn of the 1950s however, his musical interests were prominent; he combined music and drama in his opera *Landscape with Chimneys* (1955). To some extent this anticipated his series of 'Radio Ballads', begun in 1957 and recorded with his third wife Peggy Seeger, which combined contemporary social comment with traditional musical forms and had a powerful influence on songwriting and performing in subsequent decades. He founded the Ballads and Blues Club, subsequently known as the Singers Club, a bastion of his purist (but never reactionary or nostalgic) belief that folk music was a direct expression of everyday life, not high art and never mere 'entertainment'. He was one of the most influential pioneers of

the British folk-music revival, and his best-known songs include 'Dirty Old Town' (1946), and 'The First Time Ever I Saw Your Face' (1958, hauntingly recorded by Roberta Flack in 1972). He published several anthologies of folk song with Peggy Seeger, and an autobiography, *Journeyman* (1990).

McColl, Robert Smyth 1876–1959
Scottish footballer and businessman
Born in Glasgow, he began playing for the amateur club Queen's Park in 1894. He moved to Newcastle seven years later, eventually turning professional. Returning to Scotland on signing for Rangers (1904), he went back to Queen's Park in 1907, thus becoming the only professional to rejoin the club. A centre-forward, he won 13 caps for Scotland between 1896 and 1908, the high point being a hat-trick against England in 1900. After retiring from football he established a successful chain of confectioners, R S McColl's.

McCollum, Elmer Verner 1879–1967
US biochemist
Born in Fort Scott, Kansas, he studied at the universities of Yale, Cincinnati and Manitoba, and became professor of biochemistry at Johns Hopkins University, Baltimore (1917–44). In 1913 he published the first description of a vitamin, and distinguished between vitamins A (fat-soluble) and B (water-soluble). In 1922 he discovered the 'rickets-preventative factor', vitamin D, by testing more than 1,000 different diets on rats. His A, B and D were later shown to consist of separable constituents (eg A1 and A2). He was a prolific writer, and his works include the popular *The Newer Knowledge of Nutrition* (1918) and *A History of Nutrition* (1957). He received numerous awards and was elected a Foreign Member of the Royal Society in 1961.

McConnell, Jack Wilson 1960–
Scottish Labour politician
Born in Irvine and brought up on the island of Arran, he was educated at Stirling University and worked as a mathematics teacher before concentrating on politics, representing Motherwell and Wishaw. He served as General Secretary of the Scottish Labour Party (1992–98) and went on to become Scotland's Minister for Finance, Minister for Education, Europe and External Affairs and ultimately, in 2001, First Minister in succession to HENRY MCLEISH.

McCormack, John 1884–1945
US tenor
Born in Athlone, Ireland, he made his London debut in 1905, sang at Covent Garden, London (1906–07), and also appeared in oratorio and as a lieder singer. As an Irish nationalist, he lost British support during World War I and took US citizenship in 1919, turning to popular sentimental songs. He returned to England in 1924, and toured widely until he retired from the stage (1938). During World War II, however, he continued to sing on the radio. He was raised to the papal peerage as a count in 1928.

McCormick, Cyrus Hall 1809–84
US inventor and industrialist
Born in Rockbridge, Virginia, and educated locally, he was the son of Robert McCormick (1780–1846) who patented several agricultural implements but had in 1831 abandoned an attempt to build a mechanical reaper. Cyrus took up the challenge successfully, but did not patent his machine until 1834, the year after the reaper invented by OBED HUSSEY had been patented. US agriculture had entered a period of rapid expansion, and there was intense competition between the two men and with other manufacturers, but in the end the McCormick Harvesting Machine Company emerged as the leader. In 1902 it became the International Harvester Company, with his son Cyrus Hall McCormick, Jnr (1859–1936) as first president and chairman of the board. 🕮 Herbert N Casson, *Cyrus Hall McCormick: His Life and Work* (1909)

McCormick, Eric Hall 1906–95
New Zealand cultural historian
Born in Taihape, he was secretary of, and later editor to, the National Historical Committee which commissioned publications to mark the centenary of European settlement in 1840. For this series he wrote *Letters and Art in New Zealand* (1940), the first critical conspectus of New Zealand writing, later expanded as *New Zealand Literature: A Survey* (1959). His other critical works include *Alexander Turnbull: His Life, His Circle, His Collections* (1974), *The Expatriate, a Study of Frances Hodgkins* (1954), *Portrait of Frances Hodgkins* (1981), and the autobiographical *The Inland Eye: A Sketch in Visual Autobiography* (1959). He contributed greatly to the recognition of New Zealand literature from 1940.

MacCormick, John MacDonald 1904–61
Scottish nationalist politician
Born in Glasgow and a graduate of Glasgow University, he initially became active in the Scottish movement for self-government through the Independent Labour Party, and, from its foundation, the National Party of Scotland (1928). He was chairman of the Scottish National Party from its foundation in 1934 until 1942 when the party refused his request that it seek all-party support for independence and cease fighting elections. He thereupon founded and became chairman of the Scottish Convention, and chairman of the National Assembly, organizing the Scottish Covenant in 1949 which ultimately attracted two million signatures but achieved nothing. He wrote *The Flag in the Wind* (1955).

McCourt, Frank 1931–
US author
Born in Brooklyn, New York, he moved with his family to Limerick, Ireland, at the age of four and did not return to the USA until he was 19, when he became a teacher in New York. After retiring from teaching he teamed up with his brother Malachy to perform the two-man musical show *A Couple of Blackguards*, which drew on their youth in Ireland. McCourt's childhood experience of hardship and poverty in Ireland also provided the material for the bestselling memoir *Angela's Ashes* (1996, Pulitzer Prize), which was subsequently filmed. A sequel, *'Tis: A Memoir* appeared in 1999, and *Teacher Man* in 2005.

McCowen, Alec (Alexander Duncan) 1925–
English actor
Born in Tunbridge Wells, Kent, he trained at RADA and has won most acclaim as a theatre actor, performing the classics with the Old Vic and the Royal Shakespeare Company in the 1950s and 1960s; acting on Broadway in *Antony and Cleopatra* (1951), *The Comedy of Errors* (1964), *King Lear* (1964) and *The Misanthrope* (1975); and staging his one-man shows *St Mark's Gospel* (1978) and *Kipling* (1984). His films include *The Loneliness of the Long Distance Runner* (1962), *The Witches* (1966), *Frenzy* (1972), *Cry Freedom* (1987), *Henry V* (1989) and *Gangs of New York* (2002). On television, he took the title role in *Mr Palfrey of Westminster* (1984–85). 🕮 *Young Gemini* (1979)

McCoy, Tony (Anthony Peter) 1974–
Northern Irish National Hunt jockey
Born in Moneyglass, County Antrim, he rode his first winner in 1992. Unusually tall and heavy for the profession, he is nevertheless racing's most successful jump jockey. He has broken numerous records, including fastest to reach 1,000 winners and most wins in a season (289 in season 2001–02). In 2002 he broke RICHARD DUNWOODY's record of all-time jump winners; he has been champion jockey every season from 1995–96 to 2005–06. He was awarded the MBE in 2003.

McCracken, James 1927–88
US tenor
Born in Gary, Indiana, he became a steelworker and joined the US navy, where his potential as a singer was spotted. A large, powerfully built man with great stage presence, he made his operatic debut as Rodolfo in PUCCINI's *La Bohème* ('Bohemian Life') in 1952, but his Otello, first performed in Europe in 1959, marked a turning point in his career. In 1963 he returned to the USA to become the first native US citizen to sing Otello at the Metropolitan Opera, and he became one of their leading tenors. He wrote about his operatic experience with his wife (the mezzo-soprano Sandra Warfield) in *A Star in the Family* (1971).

McCrae, John 1872–1918
Canadian poet
Born in Guelph, Ontario, he graduated from the University of Toronto in 1898, served in the South African War, and practised medicine in Montreal until the outbreak of World War I. He served as an army medical officer from 1914 until his death in France, and he is best remembered for his war poem 'In Flanders Fields' (1915).

McCrea, Sir William Hunter 1904–99
Irish theoretical astrophysicist and mathematician
Born in Dublin, he was educated at Cambridge, lectured in mathematics at Edinburgh University and at Imperial College, London, and later became the professor of mathematics at Queen's University, Belfast (1936). After World War II he moved to Royal Holloway College, London, and then to the University of Sussex (1966). In 1934, with EDWARD MILNE, McCrea was the founder of modern Newtonian cosmology, applying classical

physics to the primordial gas cloud that condensed to form the galaxies. He also extended ERNST MACH's viewpoint, suggesting that WERNER HEISENBERG's uncertainty principle applies to light as it travels. He emphasized the effect of turbulence in condensing gas clouds and its role in the formation of planets and stars, and made important contributions to relativity and the low-probability transitions of electrons between atomic energy states. In 1975 McCrea proposed that comets may have been formed in the galactic spiral arms, and that the Earth, Moon and Mars were formed from a single body that differentiated and then split up. He was elected FRS in 1952, and knighted in 1985.

MacCready, Paul 1925–
US aeronautical engineer and inventor
Born in New Haven, Connecticut, he studied physics at Yale University (1947) and aeronautics at the California Institute of Technology (1952). In 1956 he became the first American to be World Gliding Champion. He designed the ultra-light aircraft *Gossamer Condor* which in 1977 made the first man-powered flight over a one-mile (1.6km) course. In 1979 its successor, *Gossamer Albatross*, crossed the 23 miles (37km) of the English Channel in just under three hours at a height of only a few metres, propelled and piloted by US racing cyclist, Bryan Allen. In 1981 his *Solar Challenger* flew from Paris to London at an average speed of 37mph (59.5kph), powered by 16,000 solar cells, and in 1985 he built a powered reproduction of a pterodactyl. In 1987 his solar-powered car Sunraycer won a trans-Australia race, and he subsequently collaborated with GM Motors on an electric sports car, the Impact. His work on solar-powered craft was eventually taken up by NASA, leading to the unmanned *Pathfinder*, *Pathfinder Plus* and *Helios* craft which reached upwards of 70,000 feet in the late 1990s. 🕮 Paul Ciotti, *More with Less: Paul MacCready and the Dream of Efficient Flight* (2003)

McCubbin, Frederick 1855–1917
Australian landscape painter
Born in Melbourne, Victoria, where he lived and worked for most of his life, he taught drawing at the National Gallery of Victoria's Art School from 1886 until his death. The previous year, with other painters including TOM ROBERTS, he had established the first of the artist camps which grew into the Heidelberg school of Australian painting. From his romantic depictions of bush life he turned to an Impressionistic style, and he exhibited in London and Paris in 1897. Although principally known for his landscapes, he also executed many successful portraits during his later years.

McCullers, (Lula) Carson, *née* **Smith** 1917–67
US novelist
She was born in Columbus, Georgia, and attended classes at Columbia University, New York, and New York University. After marrying in 1937, she moved to Charlotte, North Carolina, then in 1941 to Greenwich Village, New York. *The Heart is a Lonely Hunter*, her first book, about a character who could neither hear nor speak, appeared in 1940, distinguishing her immediately as a novelist of note. She wrote the best and the bulk of her work in a six-year spell during World War II. Along with WILLIAM FAULKNER, TENNESSEE WILLIAMS and TRUMAN CAPOTE she is credited with fashioning a type of fiction labelled by critics as Southern Gothic. Fusing, in her own words, 'anguish and farce', she peopled her work with grotesque characters who are expressionistic extensions of normal, universal human problems. Her books include *Reflections in a Golden Eye* (1941), *The Member of the Wedding* (1946), *The Ballad of the Sad Cafe* (1951) and *Clock Without Hands* (1961), a last ironic look at the South. 🕮 V S Carr, *The Lonely Hunter* (1975)

McCullin, Don(ald) 1935–
English photojournalist
Born in London, he had an impoverished childhood and was introduced to photography only through National Service in the RAF as a photographic technician (1954–56). Subsequently taking photographs of North London street gangs, he came to the notice of *The Observer* and began to work as a press photographer from 1958; he worked for *The Sunday Times* from 1966. His talent for photographing conflict soon emerged, and he spent 18 years documenting war zones from Vietnam to the Congo, Cambodia to Northern Ireland, with his powerful, unsentimental yet immensely affecting style. After Beirut in 1982 he largely retired from combat photojournalism and focused on humanitarian stories, but remains widely acclaimed as one of the world's greatest war photographers. He was awarded the CBE in 1993. 🕮 *Unreasonable Behaviour: An Autobiography* (1990)

McCullough, Colleen 1937–
Australian novelist
Born in Wellington, New South Wales, she is best known for her novel *The Thorn Birds* (1977), a saga of sex, religion and disaster, later produced as a television series. Her earlier book *Tim* (1974) was also filmed, as was *An Indecent Obsession* (1981). The delicate novella *The Ladies of Missalonghi* (1987) showed that she is capable of some fine writing, and her recent books, including a series of novels set in ancient Rome, demonstrate a concern for historical detail. Later publications include *The Grass Crown* (1991), *Fortune's Favorites* (1993), *The Song of Troy* (1998), *Morgan's Run* (2000) and *On, Off* (2006).

MacCunn, Hamish 1868–1916
Scottish composer
Born in Greenock, near Glasgow, he studied at the Royal College of Music in London, and from 1888 to 1894 was professor of harmony at the Royal Academy of Music. His works, largely Scottish in character and subject, include the overtures *Cior Mhor* (1887), *Land of the Mountain and the Flood* (1887) and *The Dowie Dens of Yarrow*, choral works, such as *The Lay of the Last Minstrel*, the operas *Jeanie Deans* (1894) and *Diarmid* (1897), and songs.

McCurry, Steve 1950–
US photojournalist
Born in Philadelphia, he was educated at the College of Arts and Architecture at Pennsylvania State University and subsequently worked as a freelance photographer in India. He established his reputation with award-winning photographs taken while disguised in Afghan costume in rebel-controlled Afghanistan prior to the Russian invasion of 1979. A member of Magnum Photos since 1985, he has covered conflicts throughout the world, including the Iran–Iraq War, Cambodia and Yugoslavia, concentrating chiefly on the impact of war upon those caught up in it; he has also photographed widely in Southeast Asia. He is perhaps best-known for his photograph of a green-eyed Afghan refugee girl, taken in Peshawar, Pakistan in 1984, which exemplifies his striking eye for colour and humanity. His publications include *Monsoon* (1995) and *Looking East* (2006).

MacDiarmada, Seán, *English* **John MacDermott** 1884–1916
Irish revolutionary
Born in Kiltyclogher, County Leitrim, he worked as a barman and tram conductor in Glasgow and Belfast, where he became involved in the Ancient Order of Hibernians. He participated in the Sinn Féin by-election defeat in 1908, but had already entered the moribund Irish Republican Brotherhood (IRB) which he now regalvanized as agent for THOMAS J CLARKE. Appointed IRB organizer, he infiltrated the Gaelic Athletic Association, the Gaelic League, and later the Irish Volunteers with his agents, and edited the IRB paper *Irish Freedom*. Crippled by polio in 1912, his intransigence increased, and he ensured the hijack of the JOHN MACNEILL wing of the Irish Volunteers in an ultimate insurrection which was finally achieved in Easter 1916. He was afterwards court-martialled and shot.

MacDiarmid, Alan G 1927–2007
US chemist and Nobel Prize winner
Born in New Zealand, he was educated at the University of New Zealand, the University of Wisconsin and at Cambridge University. He joined the staff of the University of Pennsylvania in 1955, where he went on to do pioneering work into conductive polymers. In 2000 he shared the Nobel Prize in chemistry with ALAN J HEEGER and HIDEKI SHIRAKAWA, and the same year received the Rutherford Medal, New Zealand's top science award. In 2001 he became a member of the Order of New Zealand.

MacDiarmid, Hugh, *pseudonym of* **Christopher Murray Grieve** 1892–1978
Scottish poet
Born in Langholm, Dumfriesshire, he was educated at Langholm Academy, and became a pupil-teacher at Broughton Higher Grade School, Edinburgh, before turning to journalism. He served with the Royal Army Medical Corps in Greece and France during World War I, and was a munitions worker in World War II. A founder member of the National Party of Scotland (which became the Scottish National Party) in 1928, and intermittently an active communist, he stood as a Communist candidate in 1964. He became the leader of the Scottish Renaissance and dedicated his life to the regeneration of Scots as a literary language, repudiated by his fellow Scottish poet, EDWIN MUIR, in 1936. As a journalist in Montrose, he edited

anthologies of contemporary Scottish writing, such as *Northern Numbers* (1920–22) and *The Scottish Chapbook* (1922–23), in which he published his own early poetry. His early lyrical verse appeared in *Sangschaw* (1925) and *Penny Wheep* (1926), but he is best known for *A Drunk Man Looks at the Thistle* (1926). Other publications include *To Circumjack Cencrastus* (1930), the three *Hymns to Lenin* (1931, 1932, 1957), *Scots Unbound* (1932), *Stony Limits* (1934), *A Kist o' Whistles* (1947) and *In Memoriam James Joyce* (1955). He wrote numerous essays, such as *Albyn* (1927) and *The Islands of Scotland* (1939), and his autobiography was published in *Lucky Poet* (1943) and *The Company I've Kept* (1966). 🕮 A Bold, *Hugh MacDiarmid: A Biography* (1985)

MacDonagh, Donagh 1912–68
Irish dramatist
He was born in Dublin and orphaned by the execution of his father, THOMAS MACDONAGH, in 1916 and the drowning of his mother during an attempt to plant the tricolour on an island in Dublin Bay in 1917. Educated at Belvedere College and University College, Dublin, he became a barrister in 1935 and was made a district justice in 1941. He won success as a writer with the exuberant *Happy as Larry* (1946), and other plays such as *God's Gentry* (1951, a study of tinker life) and *Step-in-the-Hollow* (1957). He was also a highly acclaimed broadcaster, and edited with LENNOX ROBINSON *The Oxford Book of Irish Verse* (1958), which drew criticism for its loose interpretation of Irishness. He published poems, *The Hungry Grass* (1947) and *A Warning to Conquerors* (1968), and a perceptive essay on his father. 🕮 Introduction to *The Oxford Book of Irish Verse* (1958)

MacDonagh, Thomas 1878–1916
Irish poet, critic and nationalist
He was born in Cloughjordan, County Tipperary, and later lived in Dublin, where he helped PATRICK PEARSE to found St Enda's College (1908), and published several volumes of delicate and sardonic poems, original works and translations from the Irish. In 1914 he founded the Irish Theatre with Joseph Plunkett and Edward Martyn (1859–1923). He was also an outstanding critic of English literature, and his aspirations for Irish literature derived from his deep love of English and his recognition of comparable possibilities, as may be seen by his *Literature in Ireland* (posthumous, 1916) and *Thomas Campion* (1913), and by his articles in the *Irish Review*. An Irish Volunteer, he was very belatedly drawn into preparations for the Easter Rising of 1916, commanded at Jacob's Factory in the fighting, and was executed. The poet JAMES STEPHENS wrote an introduction to *Poetical Works* (1917) after his death, and W B YEATS wrote his epitaph in 'Easter 1916'. 🕮 A W and E Parks, *Thomas MacDonagh, the Man, the Patriot and the Writer* (1967)

MacDonald, Alexander, *Gaelic* **Alasdair Mac Mhaighstir Alasdair** c.1695–c.1770
Scottish poet
Born in Islandfinnan, where his father was minister, and educated in Glasgow, he was the foremost Gaelic literary figure of the 18th century, and his poems reflect the turbulent times in which he lived. He took part in the 1745 rebellion on the Jacobite side, and his best verse is inspired by the subsequent upheavals in and diminution of Gaelic culture. His masterwork is *Birlinn Chlann Raghnaill* (c.1780), a long poem about Clan Ranald, lamenting the fate of Gaeldom after the '45. A translation of the poem by HUGH MACDIARMID was published in 1935.

Macdonald, Dwight 1906–82
US writer and film critic
He was born in New York City. While still a student at Yale he became a literary editor and also a Trotskyite while working for the business magazine *Fortune* (1929–36). A penetrating social and political commentator, he wrote regularly for *Partisan Review*. He was a staff writer for *The New Yorker* (1951–71) and film critic for *Esquire* (1960–66). His essays were collected in several books, including *The Memoirs of a Revolutionist* (1957), *Against the American Grain* (1963) and *Discriminations: Essays and Afterthoughts* (1974).

McDonald, Elaine 1943–
Scottish dancer
Born of Scottish parents in Tadcaster, Yorkshire, she trained at the Royal Ballet School in London, joining Western Ballet Theatre in 1964 and moving with the company to Glasgow when it became Scottish Ballet in the late 1960s. Remaining with the company for the whole of her dancing career, she became a dancer of international repute and created many roles for the choreographer/director Peter Darrell, including *Sun Into Darkness* (1966), *Beauty and the Beast* (1969), *Tales of Hoffman* (1972), *Mary Queen of Scots* (1976) and *Five Ruckert Songs* (1978). She was artistic controller of the company (1988–89) as well as associate director of Northern Ballet Theatre (1990–92), and became director of the Creative Dance Artists Trust in 1993. She was awarded an OBE in 1983. 🕮 J S Dixon (ed), *Elaine McDonald* (1983)

Macdonald, Flora 1722–90
Scottish Jacobite heroine
Born in South Uist in the Hebrides, she was adopted by Lady Clanranald. After the Battle of Culloden (1746) which finally broke the 1745 Jacobite rebellion, she took the Young Pretender, CHARLES EDWARD STUART, disguised as her maid 'Betty Burke', from Benbecula to Portree. In 1750 she married the son of Macdonald of Kingsburgh, where in 1773 she entertained Dr JOHNSON. In 1774 she emigrated to North Carolina with her husband, who fought in the American Revolution. She returned to Scotland in 1779, followed by her husband two years later, and they settled at Kingsburgh. 🕮 Alexander MacGregor, *Life of Flora MacDonald* (1882)

MacDonald, Frances 1873–1921
Scottish painter and designer
Born in Glasgow, the sister of MARGARET MACDONALD, she became the wife of Herbert MacNair (1868–1955). These three, together with CHARLES RENNIE MACKINTOSH, comprised the Glasgow 'Group of Four', the prime exponents of Art Nouveau in Scotland, whose influence was international. Frances MacDonald's paintings and decorations are generally strongly poetic, incorporating insubstantial figures in symbolic settings.

MacDonald, George 1824–1905
Scottish novelist, lecturer and poet
Born in Huntly, Aberdeenshire, he was educated at King's College, Aberdeen, and Highbury Theological College, and became a Congregationalist pastor at Arundel. However, his unorthodox views – especially his belief in purgatory, and in a place in heaven for everyone, even animals – caused conflict with his parishioners, and finally brought about his resignation. After the successful publication of his poem 'Within and Without' (1856), he turned to writing and lecturing, publishing the allegorical novel *Phantastes* (1858), which met with a cold reception. He followed this with a series of novels, including *David Elginbrod* (1863), *Robert Falconer* (1868) and *Lilith* (1895), confessing that he used his books as his pulpit. He is now best known for his children's books, among them *At the Back of the North Wind* (1871) and *The Princess and Curdie* (1888), but his adult works have enjoyed a revival, especially among evangelical Christians. 🕮 W Raeper, *George MacDonald* (1987)

Macdonald, Sir Hector Archibald 1857–1903
Scottish soldier
Born on the Black Isle, Easter Ross, he was apprenticed to a draper in Inverness before joining the Gordon Highlanders and serving in India and Afghanistan. Promoted from the ranks in 1880, he transferred to the Egyptian army and served with HORATIO KITCHENER in the Sudan campaign which ended in 1898. At the Battle of Omdurman his tactical awareness prevented a dervish counter-attack on the Anglo-Egyptian army in its moment of victory. He was promoted major-general and was knighted in 1901. During the Boer War he commanded the Highland Brigade and in 1902 he became commander of the British forces in Ceylon (now Sri Lanka). His career ended in disgrace when he committed suicide rather than face charges of paederasty.

Macdonald, Jacques Étienne Joseph Alexandre, Duc de Tarente 1765–1840
French soldier
Born in Sedan, the son of a Scottish Jacobite schoolmaster, he fought in the cause of the Revolution and rapidly rose to high rank. In 1798 he was made governor of Rome and subjugated Naples, but Count SUVOROV defeated him after a bloody contest on the Trebbia (1799). In 1805 he lost the favour of NAPOLEON I but, restored to command in 1809, took Laibach (now Ljubljana), fought at Wagram, and was created marshal and Duc de Tarente (Taranto). He held a command in Spain in 1810, and in the Russian campaign, and in 1813 he contributed to the successes of Lützen and Bautzen, but was routed by BLÜCHER at the Katzbach. After Leipzig he helped to cover the French retreat. The BOURBONS made him a peer, and from 1816 he was Chancellor of the Legion of Honour.

Macdonald, Sir John Alexander 1815–91
Canadian statesman
Born in Glasgow, Scotland, he emigrated with his parents in 1820. He was called to the Bar in 1836 and appointed QC.

Entering politics he became leader of the Conservatives and premier in 1856, and in 1867 formed the first government for the new Dominion. Minister of Justice and Attorney-General of Canada until 1873, he was again in power from 1878 until his death. He was instrumental in bringing about the confederation of Canada and in securing the construction of the Intercolonial and Canadian Pacific railways.

MacDonald, Margaret, *married name* **Mackintosh** 1865–1933
Scottish artist
Born in Staffordshire, the sister of FRANCES MACDONALD, she studied at the Glasgow College of Art, and in 1900 married CHARLES RENNIE MACKINTOSH. Best known for her work in watercolours and stained glass, she exhibited widely on the Continent, winning the Diploma of Honour at the Turin International Exhibition of 1902. She collaborated with her husband in much of his work.

MacDonald, (James) Ramsay 1866–1937
Scottish Labour statesman
He was born in Lossiemouth, Morayshire, and educated at a board school. He joined the Independent Labour Party in 1894 and was secretary (1900–11) and leader (1911–14, 1922–31) of the Labour Party. A member of the London County Council (1901–04) and of parliament from 1906, he became leader of the opposition in 1922, and from January to November 1924 was prime minister and Foreign Secretary of the first Labour government in Britain – a minority government at the mercy of the Liberals. He was prime minister again from 1929 to 1931. He met the financial crisis of 1931 by forming a predominantly Conservative 'National' government (opposed by most of his party), which he rebuilt and led (1931–35) after a general election. In 1935 STANLEY BALDWIN took over the premiership and MacDonald became Lord President. He died shortly after his retirement in 1937.

Macdonald, Ross, *pseudonym of* **Kenneth Millar** 1915–83
US thriller writer
Born in Los Gatos, California, of Canadian parentage, and raised in Ontario, he took a PhD at the University of Western Ontario, and became a college teacher. From the 1950s he lived in southern California. His 'Lew Archer' series, a chip off the RAYMOND CHANDLER and DASHIELL HAMMETT block, is sustained by tough and witty dialogue and rare intelligence, and many of his novels have been adapted for Hollywood. One of the finest writers in the genre, he is the author of such durable titles as *The Moving Target* (1949), *The Barbarous Coast* (1956), *The Underground Man* (1971) and *The Blue Hammer* (1976). He also wrote as 'John Macdonald' and 'John Ross Macdonald'. 🕮 J Speir, *Ross Macdonald* (1978)

McDonald, Sir Trevor 1939–
Trinidadian television newscaster
Born in San Fernando, Trinidad, he began his career reporting for local radio stations there and went on to become an announcer, sports commentator and assistant programme manager. He joined Trinidad Television in 1962, where he presented the news and interviewed for current affairs programmes. Moving to London seven years later, he joined the BBC World Service and, in 1973, ITN. After general reporting assignments, including Northern Ireland, he became sports correspondent (1978–80) and diplomatic correspondent (1980–87), before a stint as diplomatic editor of *Channel 4 News* (1987–89). He switched to newscasting in 1989 and, three years later, became the main presenter of *News at Ten*, where he remained until scheduling changes saw the end of the programme in 1999. He then presented ITV's *The Evening News* until returning as presenter of *News at Ten* after its reinstatement in early 2001. He stood down as a newsreader in 2005, but continues to present the current affairs programme *Tonight with Trevor McDonald* (1999–). He has received numerous broadcasting awards, was awarded the OBE in 1992 and knighted in 1999. 🕮 *Fortunate Circumstances* (1993)

Macdonell, Alastair Ruadh c.1724–1761
Scottish Jacobite
Born in Glengarry, Inverness-shire, he joined the French Scots brigade (1743) and was sent to Scotland to support the 1745 Jacobite rebellion, but was captured and imprisoned in the Tower of London (1745–47). He succeeded his father (1754) as 13th chief of Glengarry. ANDREW LANG proved that he had become a government spy in *Pickle the Spy* (1897).

McDonnell, James Smith 1899–1980
US aircraft manufacturer and pioneer in space technology
Born in Denver, Colorado, he graduated from Princeton before taking a master's degree in aeronautical engineering at the Massachusetts Institute of Technology (MIT) in 1925. He had a varied career as test pilot, stress analyst and chief engineer to several US companies, and set up his own company in 1928. By 1938 he had organized the McDonnell Aircraft Corporation and embarked on a series of successful military and naval aircraft, including the Banshee, Demon, Voodoo, and the famous F-4 Phantom, of which over 5,000 were built. He took his company into space technology and constructed the Mercury and Gemini manned satellite capsules.

McDormand, Frances 1957–
US actress
Born in Chicago and adopted by a family of travelling preachers, she studied at the Yale University School of Drama. Her films have included *Blood Simple* (1984), *Raising Arizona* (1987), *Mississippi Burning* (1988, Academy Award nomination) and *Miller's Crossing* (1990), and she won an Academy Award for Best Actress as the tenacious policewoman Marge Gunderson in *Fargo* (1996), directed by her husband JOEL COEN. She has appeared widely on television and on stage, and received further Academy Award nominations for *Almost Famous* (2000) and *North Country* (2005).

McDougall, William 1871–1938
US psychologist
He was born in Chadderton, Lancashire. After studying at Weimar in Germany, and at Manchester and Cambridge, he trained in medicine at St Thomas's Hospital, London, and in 1898 accompanied an anthropological expedition to the Torres Strait. He held academic posts at both Oxford and Cambridge, and in 1920 went to Harvard as professor of psychology. In 1927 he transferred to Duke University, North Carolina, where he conducted experiments in parapsychology. He preached purposive psychology as opposed to behaviourism and his chief works are *Physiological Psychology* (1905), *Body and Mind* (1911), *Outlines of Psychology* (1923) and *The Energies of Man* (1933).

MacDowell, Edward Alexander 1861–1908
US composer and pianist
Born in New York City, he studied in Paris, Wiesbaden and Frankfurt, and in 1881 was appointed head teacher of piano at the Darmstadt Conservatory. At the invitation of FRANZ LISZT, he played his first piano concerto in Zurich in 1882. He returned to the USA in 1888, and was head of the newly organized department of music at Columbia University from 1896 to 1904, when he suffered a mental breakdown. He composed extensively for voices, piano and orchestra, and is best remembered for some of his small-scale piano pieces, such as *Woodland Sketches* (1896) and *Sea Pieces* (1898).

Maček, Vladko 1879–1964
Croatian politician
A doctor of law, he served in the Austrian army during World War I. As a member of the Croatian Peasant Party (HSS), he was imprisoned in 1924 with its leader, STJEPAN RADIĆ, becoming party leader himself in 1928. Again imprisoned in 1933, on charges of treason, he was released the following year under the regency of Prince Paul Karadjordjević. In 1939 he signed an agreement with Dragiša Cvetković, securing Croatian participation in government. He became vice-president of Yugoslavia, continuing in this position under General Dušan Simović who seized power in a coup in 1941. He refused JOACHIM VON RIBBENTROP's offer of assistance in creating an independent Croatia and at first urged the Croats to support the Fascist regime of Aute Pavelić. He retired from political life shortly afterwards and was interned on his farm until the end of World War II when he went into exile in France and the USA.

McEnroe, John Patrick 1959–
US tennis player
He was born in Wiesbaden, Germany. He reached the semi-final at Wimbledon as a pre-qualifier in 1977, turned professional in 1978, and was runner-up to BJÖRN BORG in the 1980 Wimbledon final. He won the Wimbledon title three times (1981, 1983–84), the US Open singles four times (1979–81, 1984), and eight Grand Slam doubles events, seven of them with Peter Fleming, and one at Wimbledon in 1992, with Michael Stich. He was Grand Prix winner in 1979 and 1984–85, and world championship winner in 1979, 1981 and 1983–84. Throughout his professional career, his outbursts on court resulted in much adverse publicity.

McEwan, Geraldine, *originally* **McKeown** 1932–
English actress
Born in Windsor, she received attention for *Member of the Wedding* in 1957, and went on to appear at the Shakespeare

Memorial Theatre in Stratford-upon-Avon, playing such roles as Jean Rice in *The Entertainer* (1957), Olivia in *Twelfth Night* (1957, 1960), Beatrice in *Much Ado About Nothing* (1961) and Ophelia in *Hamlet* (1961). On television, she played the title role in *The Prime of Miss Jean Brodie* (1978), Emmeline Lucas in *Mapp & Lucia* (1985–86), Mother in *Oranges Are Not the Only Fruit* (1990) and Miss Farnaby in *Mulberry* (1992–93). Her films include *Foreign Body* (1986), *Robin Hood: Prince of Thieves* (1991) and *Titus* (1999). Since 2004, she has played the title role in *Miss Marple* for Granada Television.

McEwan, Ian Russell 1948–
English writer of novels, short stories and screenplays
He was born in Aldershot, Hampshire, and educated at the universities of Sussex and East Anglia. His first collections of stories, *First Love, Last Rites* (1975) and *In Between the Sheets* (1978), attracted notoriety for their preoccupation with the erotic and the macabre, still a distinguishing feature of his writing. Less obtrusive but equally consistent is the nature of romantic love, a theme explored in the novels *The Comfort of Strangers* (1981) and *The Innocent* (1990), and the screenplay *The Ploughman's Lunch* (1985). McEwan's 1987 novel, *The Child in Time*, won the Whitbread Novel Award. His later novels, including *Black Dogs* (1992), build on the theme of the nature of human understanding and man's relationship with history and contemporary society. Later publications include *The Daydreamer* (1994), *The Short Stories* (1995), *Enduring Love* (1997), *Amsterdam* (1998), which won the Booker Prize, *Atonement* (2001), centred on World War II, *Saturday* (2005, James Tait Black Memorial Prize) and *On Chesil Beach* (2007). Many of his novels have been made into films. He was awarded the CBE in 2000.

McEwen, Sir John Blackwood 1868–1948
Scottish composer
Born in Hawick, Roxburghshire, he taught music in Glasgow, and was professor of composition and harmony at the Royal College of Music in London (1898–1924), and Principal from 1924 to 1936. His particular interest was to promote a revival of composition for chamber orchestras.

Macewen, Sir William 1848–1924
Scottish neurosurgeon
He was born and educated in Glasgow, where he worked throughout his life. His interest in surgery was stimulated by JOSEPH LISTER, then Regius Professor of Surgery at Glasgow University, and he adopted and then extended Lister's antiseptic surgical techniques and pioneered operations on the brain for tumours, abscesses and trauma. In 1879 he successfully removed a tumour involving the meninges of the brain, the first time this had been performed with the survival of the patient. He developed a new procedure for repairing hernias and published work on the treatment of aneurysms by acupuncture. In addition, he operated on bones, introducing methods of implanting small grafts to replace missing portions of bones in the limbs. In 1892 he was appointed to the chair which Lister had held when Macewen was a student, and he was knighted in 1902. 🕮 Hugh Allan Macewen, *The Man in the White Coat: An Account of the Forebears and Early Life of Sir William Macewen, Surgeon* (1975)

McFadden, Daniel L 1937–
US economist and Nobel Prize winner
Born in Raleigh, North Carolina, and educated at the University of Minnesota, he joined the staff of the department of economics at the University of California, Berkeley. He shared the 2000 Nobel Prize in economics with JAMES J HECKMAN for his development of theory and methods for analysing discrete choice.

McGahern, John 1934–2006
Irish novelist and short story writer
Born in Dublin and educated at University College, he was a teacher before becoming a full-time writer. Although his first novel *The Barracks* (1963) was critically acclaimed, it was *The Dark* (1965) which established his reputation when it was banned by the Irish Censorship Board for indecency, costing him his teaching position. His work generally employs a terse and restrained prose style to dissect the drama and emotion within mundane, often domestic, situations. Other novels include *The Leavetaking* (1974), *Amongst Women* (1990) and *That They May Face the Rising Sun* (2002, US *By The Lake*). Considered a master of the short story, he has earned numerous awards and honorary doctorates and has been influential to a younger generation of Irish writers, including COLM TÓIBÍN. 🕮 *Memoir* (2005, US *All Will Be Well*)

McGee, Thomas D'Arcy 1825–68
Canadian writer and politician
Born in Carlingford, County Louth, Ireland, he was influenced by the mass movements of the Rev THEOBALD MATHEW and DANIEL O'CONNELL against drink and the Union. In 1842 he left for Quebec and Boston, where he worked on the Catholic *Boston Pilot*. He became its editor at the age of 19, wrote fiction and supported a variety of romantic causes, returning to Ireland in 1845 where he was identified with the Young Ireland Party's journal, the *Nation*. After the abortive rebellion of 1848 he returned to the USA, where he argued for US annexation of Canada in his New York *Nation*. He lost Catholic ecclesiastical support by sympathy for GIUSEPPE MAZZINI's anti-papal Roman Republic, and started the *American Celt* in Boston, publishing high-flown Romantic poems and *A History of the Irish Settlers in North America* (1851). He moved to Montreal in 1857, founded the *New Era* newspaper, took Canadian citizenship and became an MP in 1858, and was Minister of Agriculture (1864–68). A strong advocate of Canadian Confederation, he was assassinated in Ottawa for his opposition to a threatened Fenian invasion of Canada. His published works include *A Popular History of Ireland* (1862–69) and *Poems* (1869). 🕮 I M Skelton, *The Life of Thomas McGee* (1925)

McGeechan, Ian 1946–
Scottish rugby player and coach
Having moved to Yorkshire as a teenager, he played club rugby for Headingley, and made his international debut in 1972 in the same match as ANDY IRVINE. He played 32 times for Scotland between then and 1979, twelve at fly-half and 20 as centre. He also played eight times for the British Lions, on the 1974 tour of South Africa and the 1977 series in New Zealand. Scotland's assistant coach in the inaugural World Cup of 1987, he took over as head coach the following year, and was also coach of the British Lions in 1989. In 1990, his crucial role in Scotland's Grand Slam win heightened his reputation as one of the best coaches in world rugby. He also coached the Lions in 1993 and 1997, but stood down as Scotland coach after five years in 1993. He was then director of rugby at Northampton Saints before returning as director of rugby for the Scottish Rugby Union. In 2005 he took up a similar post at London Wasps.

McGill, Donald, *originally* **Fraser Gould** 1875–1962
English comic-postcard artist
Born in Blackheath, West Midlands, he was a junior to a naval architect, then studied cartooning with JOHN HASSALL's correspondence course. In 1905 he drew his first comic card for Asher's Pictorial Postcards, for whom one popular card sold two million copies. Famous for his outsize women in bathing costumes, paddling alongside weedy henpecked husbands, and for the double meanings in his captions, McGill did not receive critical attention until GEORGE ORWELL's *Horizon* article (1941). He is estimated to have drawn 500 cards a year for 50 years.

McGill, James 1744–1813
Canadian entrepreneur and philanthropist
Born in Glasgow, Scotland, he emigrated to Canada in the 1770s, and made a fortune in the northwest fur trade and in Montreal. He bequeathed land and money to found McGill College, Montreal, which became McGill University in 1821.

MacGill, Patrick 1890–1963
Irish navvy, novelist and poet
Born in the Glenties, County Donegal, and sold into servitude by his farming parents, he escaped to Scotland, working as a farm labourer and a navvy. His early verses attracted the attention of patrons, and he got a job on the London *Daily Express*, and was then adopted as secretary by Canon JOHN DALTON of Windsor. His brilliantly naturalistic novel of migrant navvy life, *Children of the Dead End*, was published in 1914, followed a year later by a powerful feminist parallel narrative of the forcing of female Irish labour into prostitution, *The Rat-Pit*. He volunteered when war broke out, and wrote a kaleidoscopic account of the troops before embarkation, *The Amateur Army* (1915), then *The Red Horizon* (1916) and *The Great Push* (1916), describing action in France in which he was wounded. Later works include *Glenmornan* (1919), *Lanty Hanlon* (1922), *Moleskin Joe* (1923), and *Black Bonar* (1928). He went to the USA in 1930, where he declined into poverty and developed multiple sclerosis.

McGillivray, Alexander 1759–93
Creek leader
Born in Alabama, the son of a Scots trader and a French-Creek mother, he became a chief of the Creek nation and served as a

British agent during the American Revolution. He accepted Spanish aid in resisting US westward expansion, leading attacks on American settlers. In 1790, under the Treaty of New York, he acknowledged US sovereignty, but two years later he resumed Spanish-subsidized attacks.

MacGillivray, James Pittendrigh 1856–1938
Scottish sculptor and poet
He was born in Inverurie, Aberdeenshire, the son of a sculptor, and studied under William Brodie and John Mossman. His major sculptures, in a naturalistic style, include the huge statue of ROBERT BURNS in Irvine, the Scottish National Memorial to WILLIAM GLADSTONE in Coates Crescent Garden, Edinburgh, the great statue to the third Marquess of Bute in Cardiff, the statue of BYRON in Aberdeen, and the JOHN KNOX statue in St Giles Cathedral, Edinburgh. His most notable publications were verse (*Pro Patria*, 1915, and *Bog Myrtle and Peat Reek*, 1922) and various papers of professional significance. He was appointed the king's sculptor-in-ordinary for Scotland in 1921.

McGonagall, William 1830–1902
Scottish doggerel poet and novelist
The son of an immigrant Irish weaver, he spent some of his childhood on the island of South Ronaldsay in the Orkneys, settled with his family in Dundee at the age of eleven, and became a handloom weaver with his father. He acted at Dundee's Royal Theatre and in 1878 published his first collection of poems, including 'Railway Bridge of the Silvery Tay'. He then travelled in central Scotland, giving readings and selling his poetry in broadsheets, becoming idolized in Edinburgh by the legal and student fraternity. His poems are characterized by a disarming naïveté and a calypso-like disregard for metre. His *Poetic Gems* were published in 1890 and *More Poetic Gems* in 1962, and his *Collected Works* were most recently published in 1992.

McGoohan, Patrick Joseph 1928–
Irish–US actor
Born in Long Island, New York, his Irish–American parents returned to the family farm in County Leitrim when he was six months old and later moved to Sheffield, South Yorkshire, where he joined Sheffield Repertory. He made his West End debut in *Serious Charge* (1953). After his film debut in *The Dam Busters* (1954), he appeared in pictures such as *Hell Drivers* (1957), *Ice Station Zebra* (1968) and *Escape from Alcatraz* (1979). He became best known on television as secret agent John Drake in *Danger Man* (1960–67) and Number Six in the surrealistic cult classic *The Prisoner* (1967–68). He also appeared in and directed episodes of the US detective series *Columbo* (1971–78).

McGough, Roger 1937–
English poet, playwright and performer
Born in Liverpool, and educated at Hull University, he worked as a schoolteacher and art college lecturer. He became associated with the 'Mersey Sound', a title used for the hugely successful *Penguin Modern Poets No. 10* (1967), which he shared with the other 'Liverpool Poets', ADRIAN HENRI and BRIAN PATTEN. He enjoyed brief pop success with the performing group The Scaffold and their song 'Lily the Pink' (1969). He makes particular use of irony and puns in his work. Much more of a 'street' poet than either Henri or Patten, he employs the rhythms of speech in a curiously subversive way. This was evident in the novel-plus-poems *Frinck, A Life in the Day of, and Summer with Monika* (1967), and it saw service again in collections like *Gig* (1973), *In the Glassroom* (1976) and the acclaimed *Waving at Trains* (1982). McGough has written many plays, often with music, and a number of humorous children's books such as *The Magic Fountain* (1995). Later works include the novel *Defying Gravity* (1992), the children's book *Until I Met Dudley* (1997) and *The Way Things Are* (1999). His *Collected Poems* was published in 2003. He was awarded the OBE in 1997 and the CBE in 2004. 🕮 *Said and Done* (2005)

McGovern, George Stanley 1922–
US politician
Born in Avon, South Dakota, the son of a Methodist minister, he served in the US air force during World War II, and became a professor of history and government at Dakota Wesleyan University. He served as a Democratic congressman (1956–61) and senator (1963–81) from South Dakota and was an early opponent of the Vietnam War. In July 1972, following a campaign expounding his new radicalism, he was chosen as Democratic candidate to oppose RICHARD NIXON in the presidential election but was heavily defeated, largely due to his wholly unsuccessful attempts to negotiate with Hanoi. He was re-elected to the Senate in 1974. In 1984 he failed to secure a second nomination, with his party favouring WALTER F MONDALE instead, and his effort to win the 1992 nomination was likewise unsuccessful. His autobiography, *Grassroots*, was published in 1978. He was awarded the Presidential Medal of Freedom in 2000, and has continued to be an active commentator on US foreign policy. 🕮 Robert Sam Anson, *McGovern* (1972)

McGowan, Harry (Henry) Duncan, 1st Baron 1874–1961
Scottish chemical manufacturer
Born in Glasgow, he joined ALFRED NOBEL's Explosives Company as an office boy in 1889. Twenty years later he had risen to assistant manager, and was sent to Canada where Nobel, PIERRE DUPONT and others were in competition for a share of the market. He recommended a merger of all the manufacturers into one company and, when that proved to be successful, he pursued a policy of mergers and marketing agreements for the rest of his life. In 1918, by which time he was managing director of Nobel's, he combined all the British explosives manufacturers into one group of companies, and began to diversify into other industries, becoming a director of the British Dyestuffs Corporation in 1919. In 1926 he persuaded ALFRED MOND and others to join him in forming Imperial Chemical Industries, of which he was chairman and sole managing director from 1930 to 1950. He received a baronetcy in 1937.

MacGowan, Shane Patrick Lysaght 1957–
Irish singer and songwriter
He was born in Kent to Irish parents, and spent his early years in County Tipperary. He displayed an early talent for poetry and won a music scholarship to Westminster School, but was expelled after being found in possession of drugs. From 1976 he performed in punk bands, forming The Pogues in 1981. They successfully fused punk energy with Irish traditions on albums such as *Rum, Sodomy and the Lash* (1985) and *If I Should Fall from Grace with God* (1988). MacGowan's increasing unreliability, widely regarded as a consequence of his prodigious alcohol and drug consumption, led to his departure from the band in 1991. He subsequently formed a new band, Shane MacGowan and the Popes (1994), but has undertaken several Pogues reunion tours since 2001. 🕮 Carol Clerk, *Pogue Mahone: Kiss My Arse – The Story of the Pogues* (2006)

McGrath, John Peter 1935–2002
English writer, director and film-maker
Born in Birkenhead, Cheshire, he did National Service before studying at St John's College, Oxford, where his early plays were performed. Moving into television, he was one of the creators of the innovative police drama *Z Cars* in 1962. His work for the cinema includes the screenplays for *Billion Dollar Brain* (1967), *The Bofors Gun* (1968) and *Robin Hood* (1991). He also produced such films as *The Dressmaker* (1988) and *Carrington* (1995). As founder and artistic director of the 7:84 Scotland theatre company (1971–88) he wrote many plays exploring the cultural and political struggles within Scotland, including *The Cheviot, The Stag and The Black, Black Oil* (1973) and *The Game's A Bogey* (1974). His books include *The Bone Won't Break: On Theatre and Hope in Hard Times* (1990). 🕮 A Bold, 'The Impact of 7:84', in *Modern Scottish Literature* (1983)

Macgregor, Douglas 1906–64
US industrial psychologist
He took a doctorate in psychology at Harvard University (1935) and taught there before moving to the Massachusetts Institute of Technology (MIT), to help set up an industrial relations section in 1937. He was president of Antioch College (1948–54), and then returned to MIT to become the first Sloan Fellows Professor (1962). His highly regarded book *The Human Side of Enterprise* (1960) discussed two contrasting theories of motivation at work, which he called 'Theory X and Theory Y'. His unfinished book *The Professional Manager* was published posthumously in 1969.

McGregor, Ewan Gordon 1971–
Scottish actor
Born in Perth, he spent his childhood in Crieff and studied at the Guildhall School of Music and Drama. He began his career with the Perth Repertory Company and came to notice with two films by the director DANNY BOYLE, *Shallow Grave* (1994) and *Trainspotting* (1996), the latter propelling him to stardom. His subsequent films include *Brassed Off* (1996), *A Life Less Ordinary* (1997), *Little Voice* (1998), *Moulin Rouge!* (2001), *Black Hawk Down* (2001), *Down with Love* (2003), the three *Star Wars* prequels (1999–2005) and *Miss Potter* (2006). In 2004, he and the actor Charley Boorman (1966–) completed a round-the-world motorbike trip, documented in the television series *Long*

Way Round. He also appeared in London's West End in the musical *Guys and Dolls* (2005).

McGregor, Sir Ian Kinloch 1912–98
US business executive
He was born in Kinlochleven, Scotland, and educated at Glasgow University and the Royal College of Science and Technology (now Strathclyde University). He went to the USA in 1940, when he was seconded to work with the US army. He developed his career in business in the USA, but in 1977 he returned to the UK as deputy chairman of British Leyland, working with Sir MICHAEL EDWARDES. In 1980 he was appointed chairman of the British Steel Corporation, and then became chairman of the National Coal Board (1983–86). Both industries required drastic cutbacks to survive and he faced strong trade union opposition, particularly from the miners in 1984–85. He published *The Enemies Within* in 1986 and was knighted the same year.

MacGregor, John, *pseudonym* **Rob Roy** 1825–92
English writer and traveller
Born in Gravesend, Kent, he was educated at Trinity College, Cambridge. He travelled widely in Europe, the Middle East and Russia, but is best remembered as the pioneer and popularizer of canoeing in Great Britain and designer of the 'Rob Roy' type canoe. His travel books include *A Thousand Miles in a Rob Roy Canoe* (1866).

MacGregor, Robert *See* ROB ROY

MacGregor, Sue (Susan Katriona) 1941–
English radio presenter
She was born in Oxford and educated mainly in South Africa. Her first job was as an announcer and producer with the state-run South African Broadcasting Corporation (1962–67). Moving to London in 1967, she joined the BBC as a reporter (1967–72), working on *World at One*, *World this Weekend* and *PM*, before beginning her 15-year position as presenter of *Woman's Hour* for Radio 4 (1972–87). She also worked on *Tuesday Call* (1973–86), had her own radio series, *Conversation Piece* (1978–94) and presented the television programme *Around Westminster* (1990–92). She presented BBC Radio 4's *Today* programme from 1984 to 2002, and has since continued to work as a broadcaster, notably presenting *The Reunion* on Radio 4. She was made an OBE in 1992 and a CBE in 2002. 🕮 *Woman of Today* (2002)

MacGregor, William York 1855–1923
Scottish painter
Born in Glasgow, he studied at the Slade School of Art in London. He was a leading figure, along with Sir JAMES GUTHRIE, of the so-called 'Glasgow Boys', whose paintings were based on a realistic approach to subject matter, he painted mostly human figures, although his masterpiece, *The Vegetable Stall* (1884) is an unusually large still life. Painted in rich, solid chunks of colour, and remarkably modern in style, it is one of the great Scottish paintings of the late 19th century.

McGuffey, William Holmes 1800–73
US educator
Born near Claysville, Pennsylvania, he was a Presbyterian minister and university professor who is remembered for compiling four of the six *Eclectic Readers*, known as *McGuffey's Readers*. His first two readers, published in 1836, extolled religion and patriotism and constituted a guide to social and moral conduct; his second pair, issued the following year, contained lessons on elocution as well as literary selections in which virtue was rewarded and vice was punished. The books were used as standard texts for nearly a century in the Midwest, and through them McGuffey helped shape the American character.

McGuinness, (James) Martin 1950–
Irish Sinn Féin politician
Born in Londonderry, he joined the IRA as a young man and moved swiftly up its ranks. He avoided internment in Ulster, but was convicted in 1973 of terrorism-related offences in the Irish Republic. He has served as MP for Mid Ulster since 1997, although he has never taken his seat. He was minister for education in the Northern Ireland Executive from 1999 until 2002. He and GERRY ADAMS are credited with the development of a political strategy for Irish republicanism.

McGuire, Edward 1948–
Scottish musician and composer
Born in Glasgow, he studied flute at the Royal Scottish Academy of Music and composition in London and Stockholm. When he joined the Whistlebinkies folk group in Glasgow in 1973 he was still essentially a classical instrumentalist, but folk music soon made its mark on his playing, and his first major composition, 'Trilogy', in the late 1970s, showed the influence of folk themes. His 'Rant' was the test piece for the 1978 Carl Flesch International Violin Competition, and his string quartet was performed in 1983 at an anniversary concert of the Society for the Promotion of New Music at the Barbican in London. Later compositions include *Peter Pan* (1989) for Scottish Ballet, 'A Glasgow Symphony' for the National Youth Orchestra of Scotland (1990), a three-act opera, *The Loving of Etain*, for Paragon Opera's production in Glasgow (1990) and 'Ring of Strings' for the St Magnus Festival (2006). The Paragon Ensemble also recorded his *Songs of New Beginnings* (1991).

Mach, David 1956–
Scottish sculptor
Born in Methil, Fife, he studied at Duncan of Jordanstone College of Art, Dundee, and the Royal College of Art, London. He has attracted both critical and popular attention, through his choice of materials and his working methods. Working to a time limit, often in public view, he has created monumental structures from society's surplus materials, including a military tank constructed from car tyres and enormous classical columns built from magazines. He also produces vast photo-collages, such as *Collage Portrait of Glasgow* (2002). He was elected to the Royal Academy in 1998 and became professor of sculpture there in 2000.

Mach, Ernst 1838–1916
Austrian physicist and philosopher
Born in Turas, Moravia, he studied at Vienna University, and became professor of mathematics at Graz in 1864, of physics at Prague in 1867, and of physics again at Vienna in 1895. He carried out much experimental work on supersonic projectiles and on the flow of gases, obtaining some remarkable early photographs of shock waves and gas jets. His findings have proved of great importance in aeronautical design and the science of projectiles, and his name has been given to the ratio of the speed of flow of a gas to the speed of sound (Mach number) and to the angle of a shock wave to the direction of motion (Mach angle). In the field of epistemology he was determined to abolish idle metaphysical speculation. His writings greatly influenced ALBERT EINSTEIN and laid the foundations of logical positivism. He wrote *Mechanik in ihrer Entwicklung* (1883, Eng trans *The Science of Mechanics*, 1893) and *Beiträge zur Analyse der Empfindung* (1897, 'Contributions to the Analysis of Sensation'). 🕮 John T Blackmore, *Ernst Mach: His Life, Work and Influence* (1972)

Machado, Antonio 1875–1939
Spanish poet
Born in Seville, he was educated at the University of Madrid and the Sorbonne. He wrote lyrics characterized by a nostalgic melancholy, among them *Soledades*, *Galerías y otros poemas* (1907, 'Loneliness, Galleries and Other Poems') and *Campos de Castilla* (1912, 'Fields of Castille'). His brother Manuel (1874–1947), also a poet, collaborated with him on several plays. He is widely regarded as one of the greatest modern Spanish poets.

Machado de Assis, Joaquim Maria 1839–1908
Brazilian novelist
Born in Rio de Janiero, he was an epileptic from a humble family background who became a high-ranking official in the civil service. The co-founder of the Brazilian Academy of Letters in 1896, he became its president from 1897. His novels dissect the minutiae of Brazilian upper-class life in cunningly ambiguous prose, and include *Memórias póstumas de Brás Cubas* (1881, Eng trans *Epitaph of a Small Winner*, 1952), *Quincas Borba* (1891, Eng trans *Philosopher or Dog?*, 1954), *Dom Casmurro* (1900, Eng trans 1953) and *Esaú e Jacó* (1904, Eng trans *Esau and Jacob*, 1966). He also wrote several volumes of short stories. A complete edition of his works in Portuguese was issued in 1959. 🕮 H Caldwell, *Machado de Assis: The Brazilian Master and His Novels* (1970)

Machar, Josef Svatopluk 1864–1942
Czech poet
Born in Kolin, he became a bank official in Vienna. The author of satirical and political verse, he was known for the trilogy *Confiteor* (1887, 'I Confess'), the verse romance *Magdalena* (1893), and the epic *Warriors of God* (1897). His nine-volume *Svědomim věk* (1902–26, 'The Conscience of the Age') is a pessimistic epic of humanity's progress, or lack of it. He became inspector-general of the Czechoslovak army in 1919, having been imprisoned by the Austrians during World War I. 🕮 V Martinek, *Josef Svatopluk Machar* (1948)

Machiavelli, Niccolò 1469–1527
Italian politician, writer and political philosopher

Machiavelli was born in Florence, but nothing much is known of his early life. He was among those who rapidly rose to power in 1498, despite his lack of political experience, when SAVONAROLA's regime in Florence was overthrown. He was appointed head of the Second Chancery and Secretary to the Council of Ten (the main foreign relations committee in the republic). He served on a variety of diplomatic missions over the next 14 years and met many important political leaders including LOUIS XII of France, CESARE BORGIA, Pope JULIUS II and Emperor MAXIMILIAN I. His reports and correspondence demonstrate a shrewd appraisal of people and events and enabled him to try out ideas he was later to develop in his political works.

In 1512, when the MEDICI family, in exile since 1494, returned to run the city and the republic was dissolved, Machiavelli was dismissed from his post (for reasons that are unclear) and the following year was arrested on a charge of conspiracy against the new regime. He was tortured, and although soon released and pardoned, was obliged to withdraw from public life and devote himself to writing. To console himself, as he explained in a famous letter to his friend Francesco Vettori, he studied ancient history, pondered the lessons to be learned from his experiences in government service, and drafted 'a little book' on the subject. That was his masterpiece, *The Prince*, which was written in 1513 and circulated in manuscript form before being published in 1532. It was intended to be a handbook for rulers, advising them what to do and what to say to achieve political success, and its main theme is that rulers must always be prepared to do evil if they judge that good will come of it.

Machiavelli's admirers have praised him as a political realist; his (rather more numerous) critics have denounced him as a dangerous cynic and amoralist. He dedicated the book to the Medici, hoping to secure their sympathetic attention, but he was never offered any further political offices and he spent his last 15 years as a man of letters. He died among family and friends, and was buried in Santa Croce, Florence.

📖 In addition to *The Prince*, he wrote a series of *Discourses* on LIVY (a full-scale analysis of republican government, completed in about 1518), a treatise on *The Art of War* (published 1521), *Mandragola*, a comic play about a seduction (completed in about 1518), and several minor literary and historical works. See also Q Skinner, *Machiavelli* (1981); P Bondanella and M Musa, *The Portable Machiavelli* (1979); M Fleisher, *Machiavelli and the Nature of Political Thought* (1973); R Ridolfi, *The Life of Machiavelli* (1963).

> 'One can make this generalization about men: they are ungrateful, fickle, liars, and deceivers, they shun danger and are greedy for profit; while you treat them well they are yours. They would shed their blood for you, risk their property, their lives, their children, so long as danger is remote, but when you are in danger they turn against you.'
>
> – From *The Prince*, ch.17.

Machaut, Guillaume de *See* GUILLAUME DE MACHAUT

Machel, Samora Moises 1933–86
Mozambique nationalist leader and politician
He trained as a medical assistant before joining FRELIMO (Front for the Liberation of Mozambique) in 1963, soon becoming active in the guerrilla war against the Portuguese colonial power. Commander-in-chief in 1966, he succeeded EDUARDO MONDLANE on the latter's assassination in 1969 and was president of Mozambique from its independence in 1975 until his own death in an air crash. Avowedly a Marxist, his success at politicizing the peasantry in northern Mozambique during the liberation war led him to believe in the dominant role of the party but, after the flight of white Portuguese in 1974 and the economic failure of his policies, he became more pragmatic, turning to the West for assistance, advising ROBERT MUGABE to temper principle with prudence, and establishing more harmonious relations with South Africa.

Machen, Arthur 1863–1947
British novelist
Born in Carleon-on-Usk, Wales, of Anglo-Scottish parentage, he was popular with readers, but critical praise, particularly from the United States, came too late for him to make his fortune as a writer. His books include *The Great God Pan* (1894), *The Hill of Dreams* (1907), and *The Shining Pyramid* (1924). He wrote many well-executed tales of the uncanny, collected in *Tales of Horror and the Supernatural* (1948), and his autobiography (1951, introduced by Morchard Bishop).

Machiavelli, Niccolò *See panel above*

Macià, Francesc or **Francisco** 1859–1933
Spanish Catalan leader
He was born in Villanueva y Geltrú. Elected to parliament in 1905, he was the leader and founder, in 1922, of Estat Català, the Catalan nationalist party, and a central figure in the Catalan struggle to achieve autonomy. After MIGUEL PRIMO DE RIVERA's dictatorship collapsed, Macià forged a coalition of the Catalan Republican Party and Estat Català, creating the Republican Left of Catalonia. He was the first president of Catalonia under the autonomy statute of 1932 granted by the Second Republic. His Republican Left was defeated in the elections of 1933 and Macià died a few weeks later.

McIlvanney, William Angus 1936–
Scottish novelist and poet
Born in Kilmarnock, Ayrshire, he was educated at Kilmarnock Academy and Glasgow University and taught from 1960 to 1975, when he took up writing full-time. His first novel was *Remedy is None* (1966), a paean to working-class values, and it was followed in 1968 by *A Gift from Nessus*. Other novels include *Docherty* (1975), about an Ayrshire miner, which won the Whitbread Novel Award, *The Big Man* (1985), *The Kiln* (1996) and *Weekend* (2006). His thrillers featuring the Glasgow detective Jack Laidlaw, such as *Laidlaw* (1977), *The Papers of Tony Veitch* (1983) and *Strange Loyalties* (1991), evoke comparisons with RAYMOND CHANDLER. Volumes of poetry include *The Longships in Harbour* (1970) and *These Words* (1984). His short stories are collected in *Walking Wounded* (1989), and his essays and journalism in *Surviving the Shipwreck* (1991).

McIndoe, Sir Archibald 1900–60
New Zealand plastic surgeon
He was born in Dunedin. Educated at Otago, at the Mayo Clinic in the USA, and at St Bartholomew's Hospital, London, he was the most eminent pupil of Sir HAROLD GILLIES. He won fame during World War II as surgeon-in-charge at the Queen Victoria Hospital, East Grinstead, where the faces and limbs of injured airmen ('McIndoe's guinea pigs') were remodelled with unsurpassed skill.

McInnes, Hamish 1930–
Scottish mountaineer, writer and broadcaster
Born in Gatehouse of Fleet, Kirkcudbrightshire, he has climbed in Scotland, the European Alps, New Zealand, the Caucasus and the Himalayas, and has been a member of two expeditions to Everest (spring and autumn 1972). He was deputy leader of the successful south-west face of Everest expedition in 1975. He made the first ascent of the Great Prow on Mount Roraima, Guyana, in 1973. A leading authority on mountain rescue, he has been founder and leader of the Glencoe Mountain Rescue Team (1960–94), honorary secretary of the Mountain Rescue Committee of Scotland, and was founder and honorary president of the Search and Rescue Dog Association. His publications include *Climbing* (1964), *West Highland Walks* (4 vols, 1979–88) and *Land of Mountain and Mist* (1989). He was awarded the OBE in 1980.

Macintosh, Charles 1766–1843
Scottish industrial chemist and inventor
He was born in Glasgow and studied at the university there and in Edinburgh. By 1786 he had started a chemical works, and in 1799 he and CHARLES TENNANT developed bleaching powder, which was used industrially to bleach cloth and paper until the 1920s. In 1823 Macintosh succeeded in bonding two pieces of woollen cloth together with a solution of dissolved india-rubber, and thus produced the first waterproof cloth. He patented the process that year and, joining forces with THOMAS HANCOCK, began making waterproof garments at a factory in Manchester. The rubber was difficult to sew and tended to crumble in cold weather and become sticky in hot weather. These difficulties were largely overcome with the invention of vulcanization in the late 1830s, following which the production of waterproof

clothing ('mac(k)intoshes') and outdoor equipment expanded rapidly.

McIntosh, Genista Mary, Baroness, *née* **Tandy** 1946–
English arts administrator
Born in London and educated at the University of York, she began her career working with the York Festival of the Arts before joining the Royal Shakespeare Company, where she was casting director (1972–77), planning controller (1977–84), senior administrator (1984–90) and associate producer (1990). She was executive director of the Royal National Theatre from 1990 to 1997, when she became the first woman chief executive of the Royal Opera House, Covent Garden. She resigned from that post five months later for health reasons and returned to the Royal National Theatre, again as executive director, before leaving to become principal of the Guildhall School of Music and Drama (2002–03). She was created a life peer in 1999.

MacIntyre, Alasdair Chalmers 1929–
Scottish philosopher
Born in Glasgow and raised in Ireland, he was educated at Oxford and London. Unusually broad in his intellectual sympathies, he wrote about and taught a wide range of subjects, holding posts in sociology and in philosophy of religion at, among others, Sussex, Manchester, Boston and Vanderbilt universities. His time in the USA helped him address a more general audience with some revision of his earlier views in his trilogy *After Virtue* (1981), *Whose Justice? Which Rationality?* (1986) and *Three Rival Versions of Moral Enquiry*, the last of these being the 1989 Gifford Lectures at Edinburgh. He values 18th/19th-century Scottish philosophy, and places some importance on studies in Greek thought and language. A figure of considerable international reputation, he is considered by some to be the most famous living philosopher in the English language. Since 2000, he has been research professor of philosophy at the University of Notre Dame.

McIntyre, Duncan Ban, *English name of* **Donnachadh Ban Macan t-Saoir** 1724–1812
Scottish poet
Born in Glenorchy, Argyll, he worked as a forester and gamekeeper, fought as a Hanoverian at Falkirk in 1746, and from 1799 to 1806 was one of the City Guard of Edinburgh. He composed a great deal of nature poetry which, since he was illiterate, was written down by the minister's son at Killin and published in a collection of 1768. Some of it has been translated into English by HUGH MACDIARMID and IAIN CRICHTON SMITH, including his long poem 'Moladh Beinn Dòbhrainn' ('The Praise of Ben Doran'). He also wrote formal occasional verse, love poems, satires and songs.

Mack, Connie, *originally* **Cornelius Alexander McGillicuddy** 1862–1956
US baseball player and manager
Born in East Brookfield, Massachusetts, he was closely involved in the early days of US baseball. He was catcher with various teams from 1886 to 1916, and began his managerial career as player/manager at Pittsburgh (1894–96). He moved on to Philadelphia in 1901 and stayed for 50 years. He holds the record for most years managing (53), most games won (3,776), and most games lost (4,025). He won world championships in 1910–11, 1913 and 1929–30, and in 1930 he was also honoured (unusually for a sportsman) with the Edward P Bok prize for distinguished service to Philadelphia.

Mack, Karl, Freiherr von 1752–1828
Austrian soldier
Born in Nennslingen, Franconia, after fighting the Turks and the French republicans, he was created field marshal (1797). He occupied Rome for the King of Naples, but had to conclude an armistice with the French, and was driven by riots in Naples to seek safety with them. He was carried as a prisoner to Paris, but escaped in 1800. Having surrendered with his army to the French at Ulm in 1805, he was tried by court martial and condemned to death, but the sentence was commuted to 20 years' imprisonment. In 1808 he was freed and in 1819 fully pardoned.

Mack, (Marie) Louise Hamilton 1874–1935
Australian novelist, journalist and war correspondent
She was born in Hobart, Tasmania. Her first juvenile novel, *The World is Round*, appeared in 1896. She moved to London in 1901 and wrote the popular *An Australian Girl in London* (1902); nine other adult novels include *The Red Rose of Summer* (1909) and *The Music Makers* (1914). She spent some years in Florence during which she edited the English-language *Italian Gazette* (1904–07). In 1914 she went to Belgium for the London *Daily Mail* and *Evening News* as the first woman war correspondent; her adventures were published in 1915 as *A Woman's Experiences in the Great War*. Her sister was the Australian naturalist and children's writer Amy Mack (1876–1939).

Mackarness, (Guy) Richard 1916–96
English physician and diet reformer
He was born in Pakistan of English parents and went to England at the age of six. After World War II he took up general practice and also wrote a medical column for the *News Chronicle* and its successor the *Daily Mail*. In 1958 he wrote the bestseller *Eat Fat and Grow Slim*, the first popular dietary book, proposing a diet of protein and fat. He became known worldwide as an advocate of 'clinical ecology' as a control for allergies and certain mental illnesses, as described in his book *Not All in the Mind* (1976). He co-founded the charity Action against Allergies and from 1981 lived in partial retirement in Australia, where he wrote *A Little of What You Fancy* (1985).

McKay, Claude, *originally* **Festus Claudius** 1890–1948
US writer
Born in the mountains of central Jamaica, he published two books of verse in dialect before emigrating to the USA in 1912. Radicalized by his experiences of racial hatred in America, he wrote poems such as his sonnet 'If We Must Die', urging blacks to fight for their freedom and dignity. A leading figure in the Harlem Renaissance, he became the first bestselling black author with his novel *Home to Harlem* (1928), the story of a black soldier returning to New York after World War I, and although the vogue for black literature ended with the coming of the Depression, he continued to write fiction, including *Gingertown* (1932) and *Banana Bottom* (1933). He lived in Russia and Europe from 1922 to 1934 but returned to the USA and was naturalized in 1940. His autobiography is entitled *A Long Way from Home* (1937). 🕮 W F Cooper, *Claude McKay: Rebel Sojourner in the Harlem Renaissance* (1987)

Mackay, Fulton 1922–87
Scottish actor
Born in Paisley, Renfrewshire, he began his stage career in 1947, and was a member of the Citizens' Theatre, Glasgow (1949–51, 1953–58), and of the Old Vic company (1962–63). At the Royal Court Theatre in 1969 he appeared in DAVID STOREY's *In Celebration*. He then became a director of the Scottish Actors Company. He made several television and film appearances, but is probably best remembered for playing the role of the officious prison warden Mr Mackay in the 1970s television series *Porridge*.

McKay, Heather Pamela, *née* **Blundell** 1941–
Australian squash player
Born in Queanbeyan, New South Wales, she played hockey for Australia as a schoolgirl, then at the age of 18 was Queanbeyan tennis champion. Having taken up squash at 17 to keep fit for hockey, she won 14 Australian titles (1960–73), won the British Open in 16 successive years (1962–77), and was world champion in 1976 and 1979. She was unbeaten between 1962 and 1980. She married another top squash player, Brian McKay, in 1965 and ten years later moved to Canada, where she became Canadian racketball champion.

Mackay (of Clashfern), James Peter Hymers Mackay, Baron 1927–
Scottish judge and jurist
Born in Scourie, Sutherland, the son of a railway signalman, he was educated at George Heriot's School and Edinburgh University. After teaching mathematics at St Andrews University he switched to law, and was called to the Bar in 1955. As a QC, specializing in tax law, he was unexpectedly made Lord Advocate for Scotland, and a life peer, by MARGARET THATCHER, in 1979. He took the title of his peerage from the name of a shepherd's cottage he knew as a boy. As Lord High Chancellor of Great Britain in succession to Lord HAVERS (1987–97), he created consternation proposing radical reform. His personal affairs also aroused controversy when, in 1989, he clashed with the Calvinist elders of his Church, the Free Presbyterians, for attending the funeral of a Roman Catholic colleague. He was succeeded in 1997 by LORD IRVINE OF LAIRG, and was made a Knight of the Order of the Thistle the same year. He was Chancellor of Heriot-Watt University in Edinburgh (1991–2005) and became Lord High Commissioner to the General Assembly of the Church of Scotland in 2005.

Mackay, John Alexander 1889–1983
US scholar and ecumenist
Born into a Free Presbyterian family in Inverness, Scotland, he was educated at Aberdeen, Princeton, and in Spain, where he

developed a lifelong love of Hispanic culture. He became the first Protestant to become professor of philosophy at Peru's National University (1915–25), served the YMCA in Uruguay and Mexico (1925–32), and later became president of Princeton Theological Seminary (1936–59). A leader in the ecumenical movement, he was president of the World Alliance of Reformed Churches (1954–59). His works include *The Other Spanish Christ* (1932), *The Presbyterian Way of Life* (1960) and *Ecumenics: The Science of the Church Universal* (1964).

Mackay, Mary *See* CORELLI, MARIE

Mackay, Robert, *English name of* **Rob Donn MacAoidh** 1714–78
Scottish Gaelic poet
Born in Strathmore, Sutherland, he became a herdsman for the Mackay chief, Lord Reay. He became known as 'Rob Donn', an oral bard who described rural life in his area and the disintegration of clan society on Strathnaver and Strathmore after the 1745 Jacobite rebellion. His poetry was later collected and written down by local ministers, and a first edition appeared in 1828.

Macke, August 1887–1914
German painter
Born in Meschede in the Rhineland, he studied at Düsseldorf and designed stage scenery. Profoundly influenced by HENRI MATISSE, whose work he saw in Munich in 1910, he founded the Blaue Reiter group with FRANZ MARC. He was a sensitive colourist, bright but not garish, working in watercolour as well as oil, and remained attached to the kind of subject matter favoured by the Impressionists: figures in a park, street scenes, children and animals (as in *The Zoo*, 1912). He was killed fighting in World War I in Champagne, France.

Mackellar, Dorothea 1885–1968
Australian poet
She was born in Sydney, and her fame rests solely on 'My Country', a poem first published in the London *Spectator* in 1908. Later revised and included in her first collection *The Closed Door* (1911), its opening lines 'I Love a Sunburnt Country,/A Land of Sweeping Plains – ' evoke an emotional response from Australians the world over. Three further volumes of verse were published between 1914 and 1926, all in pastoral and patriotic vein, and three novels, two of which were in collaboration with another Australian, Ruth Bedford (1882–1963): *The Little Blue Devil* (1912) and *Two's Company* (1914).

McKellen, Sir Ian Murray 1939–
English actor
Born in Burnley, Lancashire, he won a scholarship to Cambridge and made his London debut in *A Scent of Flowers* (1964) and, with the actor Edward Petherbridge, founded the Actors' Company (1972), run along democratic lines. His many plays for the Royal Shakespeare Company include the title roles in *Faustus* (1974), *Romeo and Juliet* (1976), *Macbeth* (1976–77), *Wild Honey* (1983, Olivier award) and *Richard III* (1990, Olivier award), and he has also worked with the Royal National Theatre, with the West Yorkshire Playhouse, and appeared numerous times on the London stage. On television, he has acted the title role in *Walter* (1982), Iago in *Othello* (1989) and Amos Starkadder in *Cold Comfort Farm* (1995). His films include *Scandal* (1989), *Gods and Monsters* (1998, Academy Award nomination), the *Lord of the Rings* trilogy (2001–03, Academy Award nomination) and *The Da Vinci Code* (2006). In 1996 he jointly adapted (with director Richard Loncraine) and starred in the film of *Richard III*. In 2007, he starred in TREVOR NUNN's RSC productions of *King Lear* and *The Seagull*. He is an active campaigner for gay rights in the UK and a member of the Stonewall lobbying group. He was made a CBE in 1979 and knighted in 1990. 🕮 Mark Barratt, *Ian McKellen: An Unofficial Biography* (2005)

Mackendrick, Alexander 1912–93
US film director
Born in Boston, Massachusetts, of Scottish origin, he was educated at the Glasgow School of Art, then worked as an animator and commercial artist before joining the script department at Pinewood Studios. During World War II he made documentaries, newsreels and propaganda films for the Ministry of Information, and after the war he joined Ealing Studios, making his directorial debut on *Whisky Galore* (1948). A master of the Ealing comedy and a gifted children's director, he had success with *The Man In The White Suit* (1951), *Mandy* (1952) and *The Maggie* (1954). Embarking on international projects, he created a memorable portrait of greed in *Sweet Smell of Success* (1957). He retired as an active film-maker after *Don't Make Waves* (1967) and lectured at the California Institute of Arts, where he was dean of the film department (1969–78). 🕮 Philip Kent, *Lethal Innocence: The Cinema of Alexander Mackendrick* (1991)

Mackenzie, Sir Alexander 1764–1820
Scottish explorer and fur-trader
Born in Stornoway, Isle of Lewis, he joined the Northwest Fur Company in 1779, and in 1788 established Fort Chipewayan on Lake Athabasca, in Canada. From there he discovered the Mackenzie River (1789), followed it to the sea, and in 1792–93 became the first European to cross the Rocky Mountains to the Pacific Ocean.

Mackenzie, Alexander 1822–92
Canadian statesman
Born in Logierait, Perthshire, Scotland, he went to Canada in 1842 and found work as a mason and contractor. In 1852 he became editor of a Reform paper, and in 1861 he was elected to parliament, leading the Liberal opposition to JOHN MACDONALD'S government from 1867. As the first Liberal prime minister (1873–78), he sought to strengthen the provincial governments and encourage immigration. His go-slow public construction of the Canadian Pacific Railway (for which he took personal responsibility as Minister of Public Works) nearly lost British Columbia to the USA, while his inability to deal with the severe economic depression and his refusal to raise the tariff lost him the election of 1878. In 1880 the party threatened to rebel and he was succeeded by Edward Blake.

Mackenzie, Sir Alexander Campbell 1847–1935
Scottish composer
Born in Edinburgh, he studied music at Sondershausen, Germany, and at the Royal Academy of Music, London. From 1865 to 1879 he was a teacher, violinist and conductor in Edinburgh, and later Principal of the Royal Academy of Music (1887–1924). *The Rose of Sharon* (1884), an oratorio, contains some of his best work. Other compositions include operas, cantatas, Scottish rhapsodies, a concerto and a suite for violin, chamber music and songs. He also wrote *A Musician's Narrative* (1927).

Mackenzie, Sir (Edward Montague) Compton 1883–1972
English writer
Born in West Hartlepool, he was educated at St Paul's School and Magdalen College, Oxford, then studied for the Bar but stopped in 1907 to work on his first play, *The Gentleman in Grey*. His first novel, *The Passionate Elopement*, was published in 1911. There followed his successful story of theatre life, *Carnival* (1912), and the autobiographical *Sinister Street* (2 vols, 1913–14) and *Guy and Pauline* (1915). In World War I he served in the Dardanelles, and in 1917 became director of the Aegean Intelligence Service in Syria, an experience described in his book on the Secret Service, *Extremes Meet* (1928). In 1923 he founded *The Gramophone* (now *Gramophone*), the oldest surviving record magazine in the world. His considerable output includes *Sylvia Scarlett* (1918), *Poor Relations* (1919), *Rich Relatives* (1921), *Vestal Fire* (1927), *The Four Winds of Love* (4 vols, 1937–45), *Aegean Memories* (1940), *Whisky Galore* (1947), *Eastern Epic* (1951) and *Rockets Galore* (1957). His monumental autobiography, *My Life and Times* (1963–71), came out in 10 *Octaves*. 🕮 Andro Linklater, *Compton Mackenzie: A Life* (1987)

McKenzie, Dan Peter 1942–
English geophysicist
Born in Cheltenham, Gloucestershire, he studied physics and geophysics at Cambridge, where from 1984 to 1996 he was professor of earth sciences and since 1996 has been Royal Society Research Professor. In 1966 McKenzie became convinced of the importance of the new hypothesis of HARRY HESS, FREDERICK J VINE and DRUMMOND H MATTHEWS on sea-floor spreading, and wrote a paper on the relationships of oceanic heat flow and gravity (1967). He developed a theory of plate tectonics (1967, with Robert L Parker) which he used in further work on plate geometries, and plate motions (1969). Plate tectonic theory at last provided a plausible mechanism for continental drift, and proved the key to understanding crustal tectonics. McKenzie also worked on problems of convection within the mantle (1966–83), the tectonics of continental mountain belts (1978–81) and on melting within the mantle and its relation to the generation of continents (from 1984). More recently, he has studied similar systems on other planets. He was elected FRS in 1976 and was made a Companion of Honour in 2003. In 2001 he

was awarded the William Bowie Medal of the American Geophysics Union, and in 2002 he won the Crafoord Prize.

Mackenzie (of Rosehaugh), Sir George 1636–91
Scottish lawyer
Born in Dundee, he studied at St Andrews, Aberdeen and Bourges, and was called to the Bar at Edinburgh in 1656. He entered parliament for Ross-shire in 1669, and in 1677 was made King's Advocate. He became known as 'Bluidy Mackenzie' for his vigorous prosecution of the Covenanters. In 1682 he founded the Advocates Library in Edinburgh (now the National Library of Scotland). A prolific author and an admirer of Scottish literature, he wrote works of fiction, politics, history and law. His law writings include *Laws and Customs of Scotland in Matters Criminal* (1674), *Institutions of the Law of Scotland* (1684) and *Observations on the Acts of Parliament* (1686), which are still important. His *Memoirs of the Affairs of Scotland* was published in 1821.

Mackenzie, Henry 1745–1831
Scottish writer
Born in Edinburgh, and educated at Edinburgh University, he became a crown attorney in the Scottish Court of Exchequer (1765), and in 1804 comptroller of taxes. For more than half a century he was 'one of the most illustrious names connected with polite literature in Edinburgh', and a regular contributor to the *Scots Magazine and General Intelligencer*. His sentimental, but highly influential, novel *The Man of Feeling* was published in 1771, followed by *The Man of the World* (1773) and *Julia de Roubigné* (1777). He also wrote two tragedies, *The Spanish Father* (1773, never performed) and *The Prince of Tunis* (1773). One of the founders of the Royal Society of Edinburgh (1783), he is also remembered for his recognition of ROBERT BURNS, and as an early admirer of GOTTHOLD LESSING and SCHILLER. His memoirs were published as *Anecdotes and Egotisms* (1927).

MacKenzie, Sir James 1853–1925
Scottish physician and cardiologist
Born in Scone, Perthshire, he studied medicine in Edinburgh before settling in Burnley, Lancashire, as a general practitioner, where he developed a 'polygraph' for recording the pulse and its relationship to cardiovascular disease. He described several irregularities of the heartbeat and acquired through his writing an international reputation. His work was particularly important in the diagnosis and treatment of atrial fibrillation. His *Diseases of the Heart* (1908) summarized his vast experience. In 1918 he left London to establish the Institute of Clinical Research at St Andrews, designed to establish better guidelines for the treatment of common diseases. In 1915 he was elected FRS and knighted in the same year.

McKenzie, Julia Kathleen 1941–
English actress, singer and director
Trained at the Guildhall School of Music and Drama, London, she is a noted interpreter of the work of US musicals composer STEPHEN SONDHEIM. Her London appearances include *Maggie May* (1965), *Mame* (1969), Sondheim's *Company* (1972); the anthologies *Cowardy Custard* (1973), *Cole* (1974), and *Side by Side by Sondheim* (1977); FRANK LOESSER's *Guys and Dolls* (1982), and Sondheim's *Follies* (1987). She has interspersed musicals with plays, notably BRECHT's *Schweyk in the Second World War* (1982); and three plays by ALAN AYCKBOURN: *The Norman Conquests* (1974), *Ten Times Table* (1979), and *Woman in Mind* (1986). She has also appeared in television films such as *Adam Bede* (1992) and in the feature film *Shirley Valentine* (1989). Following her directorial debut, *Stepping Out* (1984), she has directed such plays as *Steel Magnolias* (1989) and *Putting It Together* (1992), and the musical *Honk! The Ugly Duckling* (1999), which won an Olivier Award for Best Musical.

Mackenzie, William Lyon 1795–1861
Canadian politician
Born in Dundee, Scotland, he emigrated to Canada in 1820, and published the *Colonial Advocate* in Toronto (1824–34), in which he attacked the government continually. In 1828 he was elected to the provincial parliament for York, but was expelled in 1830 for libel on the assembly. He was Mayor of Toronto in 1834. In 1837 he published in his paper a declaration of independence for Toronto, headed a band of 800 insurgents and attacked the city (5 December). Repulsed, he fled across the border, and on 13 December seized Navy Island in the Niagara River, where he declared a provisional government. A Canadian force promptly crossed the river (29 December) and burned the US steamer *Caroline*, which had been supplying the rebels, precipitating an international incident. Mackenzie fled to New York (1838), where he was sentenced by the US authorities to 12 months' imprisonment. He returned to Canada in 1849, and became an MP (1850–58). He was the grandfather of MACKENZIE KING.

Mackenzie Stuart (of Dean), Lord Alexander John 1924–2000
Scottish judge
Born in Aberdeen, he was educated at Fettes College, Edinburgh, Sidney Sussex College, Cambridge, and at Edinburgh University. After practising at the Scottish Bar, he became a judge of the Court of Session (1972), and then the first British judge appointed to the Court of Justice of the European Communities (1973–88), serving as president of that court from 1984 to 1988. He published *The European Communities and the Rule of Law* (1977).

McKern, (Reginald) Leo 1920–2002
Australian actor
Born in Sydney, he worked as a commercial artist before making his stage debut in *Uncle Harry* there (1944) and moving to London in 1946, where he made his debut with the Old Vic Company in *Love's Labour's Lost* (1949). On television, he played Number Two in the cult dystopian drama *The Prisoner* (1967–68) and, most famously, the eccentric barrister Horace Rumpole in JOHN MORTIMER's *Rumpole of the Bailey*, first in a BBC *Play for Today* (1975) and then in an ITV series (1978–92). Also on television, he appeared as Basil Zaharov in *Reilly – Ace of Spies* (1983) and Sancho in *Monsignor Quixote* (1987).

Mackerras, Sir (Alan) Charles (MacLaurin) 1925–
Australian conductor
Born in Schenectady, New York, of Australian parents, he played the oboe with the Sydney Symphony Orchestra (1943–46), was a staff conductor at Sadler's Wells Opera (1949–53), and returned there as musical director (1970–77), gaining an international reputation. Subsequent conducting posts have included the BBC Symphony Orchestra, Sydney Symphony Orchestra, Royal Liverpool Philharmonic Orchestra and Welsh National Opera (musical director 1987–92) and he has been principal guest conductor of numerous orchestras including the Scottish Chamber Orchestra, the San Francisco Opera and the Royal Philharmonic Orchestra. He is a noted scholar of the music of LEOŠ JANÁČEK. Knighted in 1979, he was made a Companion of the Order of Australia in 1997, a Companion of Honour in 2003, and in 2005 received the Royal Philharmonic Society's Gold Medal. He was the first recipient of the Queen's Medal for Music (2005). 🕮 Nancy Phelan, *Charles Mackerras: A Musician's Musician* (1987)

MacKillop, Mary Helen, *known as* **Mother Mary of the Cross** 1842–1909
Australian nun, the country's first saint
She was born in the Fitzroy district of Melbourne, of Scottish parents. With Father Tenison-Woods she founded the Society of the Sisters of St Joseph of the Sacred Heart in Penola, South Australia, in 1866. Although the Society quickly grew, establishing 170 schools and 160 Josephite convents, diocesan rivalry caused Mother Mary to be excommunicated in 1871; however, she was reinstated two years later by Pope PIUS IX, who approved the Sisterhood in the same year. In 1875 she was confirmed as superior-general of the order, which is popularly known as the 'Little Joeys'. Its work is highly regarded, and it is devoted to the education of poorer children and care of orphans and unmarried mothers. The case for the beatification of Mother Mary, the first step towards canonization, was made in 1925, and in 1975 her cause was formally introduced by the Vatican. She was beatified by Pope JOHN PAUL II in 1995.

McKim, Charles Follen 1847–1909
US architect
Born in Chester County, Pennsylvania, he studied architecture at the École des Beaux-Arts in Paris, returning to the USA in 1870 and working in the office of H H RICHARDSON. In 1879 he and William Rutherford Mead (1846–1928) joined up with STANFORD WHITE to found McKim, Mead, & White, which became the nation's leading architectural firm and remained so for decades. Working co-operatively, McKim and his partners designed buildings influenced by Classical and Renaissance models, helping to establish the neoclassical revival in the USA. The firm's best-known buildings include the Boston Public Library (1887–95) and, in New York City, the old Madison Square Garden (1891), the Morgan Library (1903) and Pennsylvania Station (1904–10, demolished in the 1960s). McKim also took on special projects such as the restoration of the White House and the revival (1901) of PIERRE L'ENFANT's plan for Washington, DC. Convinced that young US architects needed

training in the European tradition, he was instrumental in founding the American Academy in Rome, which he supervised from 1894.

Mackinder, Sir Halford John 1861–1947
English geographer and politician
Born in Gainsborough, Lincolnshire, he was educated at Epsom College and Christ Church, Oxford. He became the first Reader in Geography at Oxford (1887–1905) and established the first university school in the subject in 1899 (director, 1899–1904). He thus laid the foundations of British academic geography at Oxford, and later at Reading and the London School of Economics. He held numerous senior university appointments, was an MP (1910–22) and also British High Commissioner for South Russia (1919–1920). In *Democratic Ideals and Reality* (1919), he expounded his famous Eurasian 'Heartland' concept. He also wrote *Britain and the British Seas* (1902) and *The Nations of the Modern World* (1911).

McKinley, William 1843–1901
25th president of the USA
Born in Niles, Ohio, he served in the Civil War, retiring with the rank of major in 1865 and later practising law in Canton, Ohio. He was elected to Congress as a Republican in 1876, and repeatedly re-elected. In 1891, with business community support, he was made governor of Ohio, his name being identified with the high protective tariff carried in the McKinley Tariff Act of 1890. Chosen Republican candidate for the presidency in 1896 and 1900, he conducted exciting contests with W J BRYAN, who advocated the cause of free silver, denounced trusts, high tariffs, and imperialism, and was understood to favour labour at the expense of capital. McKinley, a conservative and an advocate of the gold standard, had the backing not only of Republicans but of the so-called 'Gold Democrats' or 'Sound Money Democrats', in spite of their dislike of his policy on many points. His administration (1897–1901) saw the adoption of the highest tariff rate in US history and the rise of US imperialism. In his first term the Spanish–American War (1898) brought the USA possession of Puerto Rico, Guam and the Philippines, and its colonial empire was further increased by the annexation of Hawaii. The domain of US trade was likewise protected and extended by the proclamation of the Open Door Policy in China. Less than a year into his second term, McKinley was shot by an anarchist, Leon F Czolgosz, in Buffalo, New York, and died eight days later. 🕮 M K Leech, *In the Days of McKinley* (1959)

MacKinnon, Catharine Alice 1946–
US feminist writer and legal scholar
Born in Minneapolis, Minnesota, she studied at Smith College and Yale Law School before studying for a PhD in political science at Yale. Her first publication arose from an extended student essay, *Sexual Harassment of Working Women: A Case of Sex Discrimination* (1979). In 1986 her fight for equality in the workplace bore fruit, when the Supreme Court decreed that sexual harassment was sex discrimination. With feminist writer ANDREA DWORKIN, she formulated an ordinance which classified pornography as a human rights violation; it was, however, rejected in the courts. McKinnon has also lectured and written extensively on the related issues of rape and abortion, as well as working with Croatian and Muslim women demanding justice for Serbian sexual atrocities. In 1990 she became professor of law at the University of Michigan, and in 2006 was named Elizabeth A Long Professor of Law there. Her publications include *Only Words* (1993), *Women's Lives, Men's Laws* (2005) and *Are Women Human?* (2006).

McKinnon, Don(ald) Charles 1939–
New Zealand National Party politician
He was born in London, England, where his father was posted prior to World War II, and educated in New Zealand, the UK and the USA. He worked in farm management in New Zealand before entering politics in 1978, winning the seat of Albany, which he held throughout his career. He became deputy prime minister in 1990. His government portfolios included foreign affairs and Pacific Island affairs. Following his successful resolution of the Bougainville Island dispute in 1997, he was elected Secretary-General of the Commonwealth in 1999, and re-elected in 2003.

Mackinnon, Donald Mackenzie 1913–94
Scottish philosopher of religion
Born in Oban, Argyll, he was professor of moral philosophy at Aberdeen (1947–60) and of philosophy of religion at Cambridge (1960–78). He explored the relations between theology, metaphysics and moral philosophy, championing realism over idealism. His wide concerns, ranging from the theory of knowledge to moral freedom and political action, and from Marxism-Leninism to a theological basis for unilateral disarmament, are evidenced in numerous essays, some of which are collected in *Borderlands of Theology* (1968), *Explorations in Theology 5* (1979) and *Themes in Theology* (1988). His 1965–66 Gifford Lectures were published as *The Problem of Metaphysics* (1974).

MacKinnon, Roderick 1956–
US biophysicist and Nobel Prize winner
Born in Burlington, Massachusetts, he showed an early interest in model volcanoes, butterfly and turtle collections, and microscopic pond-dipping, foreshadowing a career in science. After studying at the University of Massachusetts and Brandeis University, he abandoned medical training for scientific research. His work in protein purification and X-ray crystallography took him to Rockefeller University to study cell membrane proteins, leading eventually to his sharing the 2003 Nobel Prize in chemistry with PETER AGRE.

Mackintosh, Charles Rennie 1868–1928
Scottish architect, designer and watercolourist
Born in Glasgow, he attended Allan Glen's School before starting his architectural apprenticeship and in 1900 marrying MARGARET MACDONALD. His architectural output, though not large and mostly within the Glasgow region, exercised very considerable influence on European design and he was both a leader of the 'Glasgow Style', a movement related to Art Nouveau, and the outstanding exponent of Art Nouveau in Scotland. His works include the Glasgow School of Art (1897–1909), the Cranston tea rooms, and houses like Hill House in Helensburgh (1903–04). His style contrasted strong rectilinear structures and elements with subtle curved motifs, and in his houses there are deliberate references to traditional Scottish architecture. His designs also included detailed interior design, textiles, furniture and metalwork. His work was exhibited at the Vienna Secession Exhibition in 1900, where it was much admired. In 1914 he left Scotland and did no further major architectural work. In his later years he turned to painting, and produced a series of exquisite watercolours, chiefly in France (1923–27).

Mackintosh, Elizabeth *See* TEY, JOSEPHINE

Mackintosh, Hugh Ross 1870–1936
Scottish theologian
He was born in Paisley, Renfrewshire. As professor of systematic theology at New College, Edinburgh (1904–36) and Moderator of the General Assembly of the Church of Scotland (1932), he sought to spread understanding of developments in Continental theology, which he had studied at Marburg. He helped produce translations of ALBRECHT RITSCHL's *Justification and Reconciliation* and FRIEDRICH SCHLEIERMACHER's *The Christian Faith*, and his 1933 Croall Lectures on trends from Schleiermacher to KARL BARTH, described by JOHN BAILLIE as 'a fine mingling of generous appreciation with stern rebuke', were published posthumously as *Types of Modern Theology* (1937). Earlier books of note include *The Doctrine of the Person of Jesus Christ* (1912) and *The Christian Experience of Forgiveness* (1927).

Mackintosh, Sir James 1765–1832
Scottish writer
Born in Aldourie, Inverness-shire, he studied medicine at Edinburgh, then settled in London as a journalist. His *Vindiciae Gallicae* (1791) was written as a defence of the French Revolution in reply to EDMUND BURKE's *Reflections on the Revolution in France* (he later recanted his views, and went on to write *On the State of France*, 1815). He was called to the Bar in 1795, and in 1806 was appointed judge of Bombay's Admiralty Court. On his return he became Whig MP for Nairn (1813). He published a number of works on history and philosophy.

Macklin, Charles, *originally* **Charles McLaughlin** c.1697–1797
Irish actor
He was born in the North of Ireland and after a wild, unsettled youth, he acted in Bristol and Bath, and at Drury Lane from 1733. His popularity grew and in 1741 he appeared in his greatest role, Shylock. From then on he was considered one of the best actors of his day, successful in both tragedy and comedy. In 1735 he killed a fellow actor in a quarrel over a wig, was tried for murder and found guilty of manslaughter, but seems to have escaped punishment. He wrote a tragedy and several farces and comedies, of which *Love à la Mode* (1759) and *The Man of the World* (1781) were printed. His last performance was at Covent Garden in 1789.

Mackmurdo, Arthur Heygate 1851–1942
English architect and designer
Born in London, he studied architecture, then came under the influence of his friends JOHN RUSKIN and WILLIAM MORRIS, and became a central but very individual member of the Arts and Crafts movement. In 1875 he set up in architectural practice and in 1882 was a founder of the Century Guild, a group which designed for all aspects of interiors. He himself designed furniture, textiles, metalwork and for print. The title page of his book *Wren's City Churches* (1883), an inexplicably free, linear design for a book on classical architecture, but which does resemble other examples of his decorative work, is often seen as a forerunner of Art Nouveau.

McKnight Kauffer, Edward 1890–1954
US poster designer, illustrator and artist
Born and educated in the USA, where he trained as a painter, he went to England in 1914. In 1921 he gave up painting for commercial art and designed posters for the Underground Railway Co, London Transport Board, Shell-Mex, BP, Great Western Railway, General Post Office, The Orient Line, Gas Light and Coke Co, and many others. He also illustrated a number of books including *Don Quixote* (1930) and T S ELIOT's *Triumphal March* (1931). He designed a wrapper for the *Studio* and a number of book jackets. In addition, he designed sets and costumes for various productions, including the ballet *Checkmate* in 1937.

McLachlin, Beverley Marian, *née* **Gietz** 1943–
Canadian judge
Born in Pincher Creek, Alberta, she studied at the University of Alberta. She was called to the Bar of Alberta in 1969, and after serving in a number of British Columbian courts joined the Supreme Court of Canada in 1989. She became Canada's first female Chief Justice of the Supreme Court in 2000. Among many other distinguished appointments she is a member of the Privy Council of Canada (2000–).

MacLaine, Shirley, *originally* **Shirley MacLean Beaty** 1934–
US actress
Born in Richmond, Virginia, she entered show business as a teenager and made her film debut in ALFRED HITCHCOCK's black comedy *The Trouble With Harry* (1955). Adept at light comedy, her impish good humour and waif-like appearance made her an unconventional leading lady, and Hollywood struggled at first to showcase her talent. She received the first of five Best Actress Academy Award nominations for her role opposite FRANK SINATRA in *Some Came Running* (1958), and a second for her heart-rending performance in BILLY WILDER's *The Apartment* (1960). She appeared in several lavish 1960s productions, was acclaimed in the musical *Sweet Charity* (1968), and has starred in such successful films as *Being There* (1979), *Terms of Endearment* (1983) for which she finally won the Best Actress Academy Award, *Steel Magnolias* (1989), *Postcards From The Edge* (1990) and *In Her Shoes* (2005). Her numerous volumes of soul-searching autobiography include *Don't Fall Off The Mountain* (1971), *Out on a Limb* (1983), *Going Within* (1989) and *My Lucky Stars* (1995). She is the sister of the actor WARREN BEATTY.

McLaren, Dame Anne Laura 1927–
British developmental biologist and geneticist
Raised in Tal-y-cafn, near Conway, she obtained a DPhil from Oxford, and later joined the Agricultural Research Council's Unit of Animal Genetics in Edinburgh (1959). She was director of the Medical Research Council's Mammalian Development Unit (1974–92) and became a principal research associate at the Wellcome Trust/Cancer Research Campaign Institute in Cambridge. She has published extensively and is best known for her work in the fields of reproductive biology, developmental biology, embryology, genetics and immunology, and for predicting the technique now known as in-vitro cloning. She received the Scientific Medal of the Zoological Society of London in 1967, was elected FRS in 1975 (foreign secretary 1991–96 and vice-president 1992–96, the first woman to serve as an officer of the Royal Society), receiving its Royal Medal in 1990, and was created DBE in 1993. In 2002 she shared the Japan Prize with Andrzej Tarkowski (1933–) for their work in developmental biology. Her publications include *Mammalian Chimeras* (1976) and *Germ Cells and Soma* (1980).

McLaren, Bill 1923–
Scottish rugby broadcaster and writer
Born in Hawick, Roxburghshire, he was a wing-forward for Hawick, and was selected for a Scottish trial, but injury prevented him from playing. After retiring from the game he combined a career as a physical education teacher with journalism, starting off with a local paper before making his first broadcast in 1953. As the BBC's chief rugby union commentator until his retirement in 2002, his love and knowledge of the game gave him an unrivalled reputation as a sports broadcaster of warmth, intelligence and integrity, a reputation enhanced by his loyalty to the BBC despite a lucrative offer to move to the independent network for the 1991 World Cup.

Maclaren, Charles 1782–1866
Scottish writer and editor
Born in Ormiston, East Lothian, he was the co-founder (1817) and first editor of *The Scotsman* (1820–45), editor of the *Encyclopaedia Britannica* (6th edn 1820–23) and wrote *Geology of Fife and the Lothians* (1839).

Maclaren, Ian, *pseudonym of* **John Watson** 1850–1907
Scottish clergyman and writer
He was born in Manningtree, Essex, England, and was a Presbyterian minister in Liverpool from 1880 to 1895. After the success of *Beside the Bonnie Brier Bush* (1894), he gave the stories the motto 'kailyard' (meaning cabbage patch) which gave rise to the 'Kailyard School' of Scottish writers; *Days of Auld Lang Syne* (1895) and others followed. He also wrote religious works, such as *Children of the Resurrection* (1912). 🕮 W R Nicoll, *Ian Maclaren* (1908)

McLaren, Norman 1914–87
Scottish animator
Born in Stirling, he studied interior design at the Glasgow School of Art and became an avid cineaste, mixing live action and drawn animation in his own first films like *Camera Makes Whoopee* (1934) and *Hell Unlimited* (1934). Later employed at the General Post Office Film Unit, he emigrated to Canada in 1941, ultimately running the animation department at the National Film Board. An innovator and experimentalist, he worked in many different forms from hand-drawn works like *Hoppity Hop* (1946) to the three-dimensional *Around is Around* (1952), and *Rhymetic* (1956), a paper cut-out film. He also devised a pixillation technique for animating human actors. Later, he made further advances in matching sound and visuals with *Synchrony* (1971) and created a trio of live-action dance studies that culminated in *Narcissus* (1981–83) before his retirement in 1983.

McLaughlin, John 1942–
English jazz guitarist and composer
He was born in Kirk Sandall, near Doncaster. He played with British blues, rock and free jazz groups in the 1960s, and recorded two classic records, *Extrapolation* (1969) and *My Goal's Beyond* (1970). He played on MILES DAVIS's seminal jazz-fusion albums *In A Silent Way* (1969) and *Bitches Brew* (1970), before forming his own fusion group, The Mahavishnu Orchestra, in 1971. His interest in Indian music and culture was manifest both in that band, and more overtly in Shakti, a collaboration with Indian musicians. Since the late-1970s, he has alternated between acoustic and electric guitars, most often in a trio setting, and has written classical works, including a guitar concerto (1984) and the ballet *Thieves and Poets* (2003). He returned directly to jazz roots with imaginative tributes to JOHN COLTRANE and BILL EVANS in the mid-1990s. 🕮 Paul Stump, *Go Ahead John* (2000)

McLaughlin, (Mary) Louise 1847–1939
US artist
After studying at the McMicken School of Design in Cincinnati, she began to experiment with slip-painting and was influenced by the Limoges ceramics; her work with the underglazing techniques known as faience led her style to be known as 'Cincinnati Limoges' or 'Cincinnati faience' ware. However, she was forced to abandon this work in 1885 due to a lack of facilities. She founded the Cincinnati Art Pottery Club in 1879 with Clara Newton and LAURA ANN FRY to encourage other women, and fired their work at the Coultry Pottery. In 1895 she patented a new method of decoration called 'American faience'. Her most successful work, produced around 1901, was named 'Losanti' (the original name for Cincinnati being Losantiville), a high-fired translucent porcelain carved and filled with delicate glazes. McLaughlin abandoned ceramics entirely in 1906.

Maclaurin, Colin 1698–1746
Scottish mathematician
Born in Kilmodan, Argyll, he graduated from the University of Glasgow (1713), and became professor at Aberdeen (1717). In 1725 he was appointed to the chair of mathematics at

Edinburgh University on ISAAC NEWTON's recommendation. He published *Geometria organica* in 1720, and his best-known work, *Treatise on Fluxions* (1742), gave a systematic account of Newton's approach to the calculus, taking a geometric, rather than analytical, point of view. This is often thought to have contributed to the neglect of analysis in 18th-century Great Britain.

MacLaurin, Richard Cockburn 1870–1920
New Zealand mathematician and academic
He was born in Scotland and his family emigrated to New Zealand when he was four. He read mathematics at Auckland University and Cambridge, and became president of the Massachusetts Institute of Technology (MIT). During his presidency the MIT became a leading scientific and educational body.

MacLean, Alistair 1922–87
Scottish author
Born in Glasgow, he was educated at Glasgow University and served in the Royal Navy (1941–46). In 1954, while a schoolteacher, he won a short-story competition held by the *Glasgow Herald*, contributing a tale of adventure at sea. At the suggestion of William Collins, the publishers, he produced a full-length novel, *HMS Ulysses*, the next year, and this epic story of wartime bravery became an immediate bestseller. He followed it with *The Guns of Navarone* (1957), and turned to full-time writing. He preferred the term 'adventure story' to 'novel' in describing his work. His settings are worldwide, including the China Seas (*South by Java Head*, 1958), Greenland (*Night Without End*, 1960), Florida (*Fear is the Key*, 1961), the Scottish islands (*When Eight Bells Toll*, 1966), a polar scientific station (*Ice Station Zebra*, 1963) and the Camargue (*Caravan to Vaccares*, 1970). As well as two secret-service thrillers (written as 'Ian Stuart'), *The Dark Crusader* (1961) and *The Satan Bug* (1962), he wrote a Western (*Breakheart Pass*, 1974) and biographies of T E LAWRENCE and Captain COOK. Other titles include *Where Eagles Dare* (1967), *Force Ten From Navarone* (1968) and *Athabasca* (1980). Most of his stories were made into highly successful films. 🕮 Jack Webster, *Alistair MacLean: A Life* (1991)

McLean, Bruce 1944–
Scottish artist
Born in Glasgow, he attended Glasgow School of Art and St Martin's School of Art, London. In 1971 he became a lecturer at Maidstone College of Art and formed The Pose Band, Nice Style, a group of performance artists. The aim of his performance art was to parody the self-regard of the art establishment. Although continuing to produce performances, he has also turned to painting and other forms of visual art, including film and ceramics, and has collaborated in later years with architects on design projects. Since 1996 he has been a professor at the Slade School of Fine Art in London.

Maclean, Donald Duart 1913–83
English double-agent
Born in London, the son of Liberal cabinet minister, Sir Donald Maclean, he was educated at Gresham's School and studied at Trinity College, Cambridge, at the same time as ANTHONY BLUNT, GUY BURGESS and KIM PHILBY. Similarly influenced by communism, he joined the diplomatic service in 1935, working in Paris, Washington (1944–48) and Cairo (1948–50), and from 1944 was a Soviet agent. After a 'nervous breakdown' in 1950, he became head of the American department of the Foreign Office, but by 1951 was a suspected traitor, and in May of that year, after Philby's warning, disappeared with Burgess to the USSR. He was joined in 1953 by his wife, Melinda (b.1916), and children, but she left him to marry Philby in 1966. Maclean became a respected Soviet citizen, working for the Foreign Ministry and at the Institute of World Economic and International Relations. In 1970 he published *British Policy Since Suez, 1956–68*. 🕮 Robert Cecil, *A Divided Life: A Biography of Donald Maclean* (1988)

Maclean, Sir Fitzroy Hew 1911–96
Scottish diplomat and soldier
He was educated at Eton and Cambridge, served with the Foreign Office from 1933, and in World War II distinguished himself as commander of the British military mission to the Yugoslav partisans (1943–45). Conservative MP for Lancaster from 1941, and for Bute and North Ayrshire from 1959, he was Under-Secretary for War from 1954 to 1957. His *Eastern Approaches* (1949), *Disputed Barricade* (1957), *A Person from England* (1958), and *Back from Bokhara* (1959) gained him a considerable reputation.

McLean, John 1785–1861
US jurist
Born in Morris County, New Jersey, he was trained as a lawyer in Ohio and served as a member of Congress (1812–16) and a judge of the Ohio supreme court. As Postmaster-General (1823–29), he reformed the entire US postal system and instituted a system of appointments based on merit. He served on the Supreme Court from 1829 and is remembered for his dissenting opinion in the DRED SCOTT case, in which he argued that slavery has no fundamental legal sanction in the USA.

Maclean, John 1879–1923
Scottish Socialist politician
He was born in Pollokshaws, Glasgow, and educated at Pollokshaws Academy and Queen's Park School. Sacked from his post as a schoolteacher in Govan in 1915, he became a full-time Marxist educator and organizer. His classes recruited many working men, and in 1916 he formed the Scottish Labour College. A member of the British Socialist Party before World War I, he became Soviet consul on the Clyde after the Russian Revolution. When the Communist Party was formed he refused to join, instead setting up the Scottish Workers' Party, which promoted a more nationalistic message. He was arrested six times between 1916 and 1923 on various charges of sedition and incitement to strike. His health was badly broken during these prison sentences and he died young.

MacLean, Sorley, *Gaelic* **Somhairle MacGill-Eain** 1911–96
Scottish Gaelic poet
Born on the island of Raasay, off Skye, he attended school there and on Skye before reading English at Edinburgh University. He began writing as a student, and by the end of the 1930s he was an established Scottish literary figure. In 1940 he published *Seventeen Poems for Sixpence*, which he produced with ROBERT GARIOCH, and in 1943, after his recovery from wounds sustained during active service at El Alamein, came *Dàin do Eimhir* ('Poems to Eimhir'), which contained many of his love lyrics addressed to the legendary Eimhir of the early Irish sagas. Influenced by the metaphysical poets as well as the ancient and later Celtic literature and traditional Gaelic song, he reinvigorated the Gaelic literary language and tradition, much as his friend HUGH MACDIARMID was reinstating Scots as a serious literary language. A teacher and headmaster until his retirement in 1972, he produced his major collection of poems, *Reothairt is Contraigh* ('Spring Tide and Neap Tide'), in 1977. His work has been translated and issued in bilingual editions all over the world. In 1989 his *Collected Poems* appeared and in 1990 he received the Queen's Gold Medal for poetry. 🕮 T McCaughey, in *The History of Scottish Literature* (vol 4, 1987, ed Cairns Craig)

Maclehose, Agnes, *née* **Craig** 1759–1841
Scottish literary figure
She was born in Edinburgh, the daughter of a surgeon. In 1776 she married a Glasgow lawyer, from whom she separated in 1780. She met ROBERT BURNS at a party in Edinburgh in 1787, and subsequently, under the name 'Clarinda', carried on a remarkable correspondence with him. A number of Burns's poems and songs were dedicated to her.

MacLeish, Archibald 1892–1982
US poet and librarian
Born in Glencoe, Illinois, and educated at Yale and the Harvard Law School, he taught constitutional law briefly at Harvard College, but moved to Europe in 1923 to concentrate on writing. He was Librarian of Congress (1939–44), assistant Secretary of State (1944–45), co-founder of UNESCO, and Boylston Professor of Rhetoric and Oratory at Harvard University (1949–62). His many works include *The Happy Marriage* (1923), *The Pot of Earth* (1925) and *The Hamlet of A. MacLeish* (1928). For *Conquistador* (1932) he was awarded the 1932 Pulitzer Prize for poetry; for *Collected Poems 1917–1952* he was awarded a second Pulitzer Prize, the Bollingen prize and a National Book award in 1953, and for *J.B.*, a verse play, he won the Pulitzer Prize for drama and the Antoinette Perry ('Tony') award for best play in 1959. 🕮 G Smith, *Archibald MacLeish* (1971)

McLeish, Henry 1948–
Scottish Labour politician
Born in Methil, Fife, he was educated at Heriot-Watt University and worked as a planning officer in local government before entering parliament. As MP for Central Fife (1987–2000) he held several senior posts, including Minister of State and Scottish Office Minister for Devolution, Home Affairs and Local Government, and Minister for Enterprise and Lifelong Learning (1997–2000). He became First Minister of Scotland on the sudden death of DONALD DEWAR in 2000, but resigned unexpect-

edly in November 2001 following a controversy about undeclared rents on parliamentary offices.

McLennan, John Cunningham 1867–1935
Canadian physicist
Born in Ingersoll, Ontario, and educated at the University of Toronto, where he later became professor (1907–31), he did much research on electricity and the superconductivity of metals. He succeeded in liquefying helium in 1923. An early investigator of atomic and molecular energy levels, he used spectrographic techniques over a broad range of wavelengths, and often at low temperatures in the region of 20 kelvin. During the 1920s he published widely on the spectra of many materials including silicon, tin, gold, lead and hydrogen. He also made some of the earliest studies of the effect of temperature on the photoelectric effect.

McLennan, John Ferguson 1827–81
Scottish lawyer and theorist of social evolution
Born in Inverness, he was educated at King's College, Aberdeen. He then studied at Cambridge before being called to the Scottish Bar in 1857. He became parliamentary draftsman for Scotland in 1871. He is chiefly remembered for his theories of totemism and the evolution of familial organization. In *Primitive Marriage* (1865) he proposed an evolution from primitive promiscuity, through a stage of matriarchy, to patrilineal descent. He coined the terms 'exogamy' and 'endogamy', which are still in use today. He also wrote *The Patriarchal Theory*, published posthumously in 1885.

Maclennan (of Rogart), Robert Adam Ross Maclennan, Baron 1936–
Scottish Liberal Democrat politician
Born in Glasgow, he attended the Glasgow Academy, Balliol College, Oxford, Trinity College, Cambridge and Columbia University, New York, before being called to the Bar in 1962. He entered parliament as MP for Caithness and Sutherland (now Caithness, Sutherland and Easter Ross) in 1966 and represented it for 35 years. Originally a Labour supporter, he held junior posts in the governments of HAROLD WILSON and JAMES CALLAGHAN and was a founder-member of the Social Democratic Party (SDP) in 1981. He came to prominence in 1987 when, after DAVID OWEN had resigned the SDP leadership, Maclennan became a 'caretaker' leader until the terms of the merger had been agreed. He then became a leading member of the new party, the Liberal Democrats, under PADDY ASHDOWN, where he was president from 1994 to 1998, and was spokesman on constitutional affairs and national heritage from 1994 to 2001, when he stood down as an MP and was created a life peer. He is the party's spokesperson on Europe in the House of Lords.

MacLeod (of Fuinary), George Fielden MacLeod, Baron 1895–1991
Scottish Presbyterian clergyman
The second son of Sir John MacLeod, 1st Baronet, a Glasgow MP, he was educated at Winchester and Oriel College, Oxford, won the MC and Croix de Guerre in World War I, and studied theology at Edinburgh, becoming minister of St Cuthbert's there (1926–30) and at Govan in Glasgow (1930–38). He founded the Iona Community, which set about restoring the ruined abbey and monastic buildings on the historic island of Iona. As Moderator of the General Assembly of the Church of Scotland (1957–58), he created controversy by supporting the unpopular scheme to introduce bishops into the kirk in the interests of Church unity. Well known as a writer and broadcaster, he was strongly left-wing, as his *Only One Way Left* (1956) testifies. He succeeded to the baronetcy in 1924, but preferred not to use the title, and he was created a life peer in 1967. In 1986 the General Assembly finally accepted as official Church of Scotland policy the position he had argued for so long – that nuclear weapons were so immoral that their use should never be countenanced by the Church.

Macleod, Iain Norman 1913–70
British politician
Born in Skipton, Yorkshire, and educated at Fettes College, Edinburgh, and Gonville and Caius College, Cambridge, he fought in France during World War II, and after working as a member of the Conservative Party secretariat, he became an MP in 1950. He was Minister of Health (1952–55) and of Labour (1955–59), before being appointed Secretary of State for the Colonies in 1959, in which office he oversaw the granting of independence to many British territories in Africa. He was Chancellor of the Duchy of Lancaster and leader of the House of Commons and party chairman (1961–63), then edited *The Spectator* for two years. When EDWARD HEATH became leader, MacLeod was appointed shadow Chancellor (1965–70) and after the Conservative victory in 1970 he became Chancellor of the Exchequer, until his death a month later. One of the most popular figures in his party, and a gifted orator, he had been considered a leading contender for the premiership. 🕮 Robert Shepherd, *Iain Macleod: A Biography* (1994)

Macleod, John James Rickard 1876–1935
Scottish physiologist and Nobel Prize winner
Born in Cluny, Fife, he studied at Aberdeen, Leipzig and Cambridge, and became professor of physiology at Western Reserve University, Cleveland (1903), and at Toronto University (1918). He published many papers on the control of respiration, and on aspects of carbohydrate metabolism, but his fame rests upon his involvement with the discovery of insulin. In 1921 he accepted FREDERICK GRANT BANTING into his department for research on the pancreas with CHARLES BEST, and they succeeded in purifying a pancreatic extract which lowered blood sugar levels. The extract was insulin, and insulin therapy soon became the main treatment for diabetes. In 1923 Macleod and Banting were awarded the Nobel Prize in physiology or medicine. Macleod returned to Scotland in 1928 as professor of physiology at Aberdeen.

Mac Liammóir, Mícheál, *originally* **Alfred Wilmore** 1899–1978
Irish actor, painter and writer
Born in Cork, he moved with his family to London, and became a child actor as Michael Darling in BEERBOHM TREE's production of *Peter Pan*, with NOËL COWARD as Lost Boy. He studied art at the Slade School, becoming a distinguished painter and designer, and a proficient linguist after residence abroad. With his lifelong friend Hilton Edwards, he founded the Gate Theatre Company in Dublin (1928), having toured Ireland with the Shakespearean company of Anew McMaster (1894–1962). His company's work made the most of the dramatic possibilities of Irish writing, drew in much European drama using his translations, adaptations, design and lighting, and offered bold productions of classical material. He wrote fiction, plays and memoirs in Irish and in English, and in the 1960s his one-man shows brought him an international reputation, in *The Importance of Being Oscar* (1960), about the life of OSCAR WILDE, *I Must Be Talking to My Friends* (1963), on Irish history and literature, and *Mostly About Yeats* (1970). His film performances include Iago in ORSON WELLES's *Othello* (1949, brilliantly described in his *Put Money in Thy Purse*, 1954), and the narrator in *Tom Jones* (1963).

Maclise, Daniel 1806–70
Irish painter
Born in Cork, he made pencil portraits in Cork, and in 1827 went to London, where he studied at the school of the Royal Academy. His most notable works are his two frescoes in the Royal Gallery of the House of Lords, *The Meeting of Wellington and Blücher* (1861) and *The Death of Nelson* (1864). He was also known as an illustrator of books for TENNYSON and DICKENS. His sketches of contemporaries in *Fraser's Magazine* (1830–38) were published in 1874 and 1883.

McLuhan, (Herbert) Marshall 1911–80
Canadian writer
Born in Edmonton, he studied English literature at the universities of Manitoba and Cambridge, and in 1946 became a professor at St Michael's College, Toronto. In 1963, having directed two surveys into culture and communication media, he was appointed director of the University of Toronto's Centre for Culture and Technology. He held the controversial view that the invention of printing, with its emphasis on the eye rather than the ear, can lead to the destruction of a cohesive, interdependent society, since it encourages humans to be more introspective, individualistic and self-centred. His publications include *The Mechanical Bride* (1951), *The Gutenberg Galaxy* (1962), *Understanding Media* (1964), *The Medium is the Message* (with Q Fiore, 1967) and *Counter-Blast* (1970). 🕮 D Duffy, *Marshall McLuhan* (1969)

Maclure, William 1763–1840
US geologist
Born in Ayr, Scotland, he was educated privately and soon made a large fortune as a merchant and entrepreneur. He travelled widely in Europe, Russia and the USA, and lived at times in London, Spain and Mexico. He settled in the USA around 1800. On his travels he always studied the geology and met leading geologists, and he employed his own cartographer–naturalist (Charles Lesueur, 1778–1846) and organized expeditions with others. His work as an observer and writer in

geology made him influential and he helped to found the Academy of Natural Sciences in Philadelphia, serving as its president from 1817 to 1840. His *Observations on the Geology of the United States* (1817) gives the first full account of the subject, and he went on to study the West Indies and Mexico. Maclure's later writing supported the ideas on evolution offered by JEAN-BAPTISTE LAMARCK. He believed that primitive rocks had diverse origins, and opposed ABRAHAM WERNER's theory of their exclusively sedimentary origin.

MacMahon, Marie Edmé Patrice Maurice de 1808–93
French soldier and statesman
Born in Sully near Autun, he was descended from an Irish Jacobite family. He served in Algeria and at Constantine (1837), and for his services in the Italian campaign (1859) was made marshal and Duke of Magenta. He became Governor-General of Algeria in 1864. In the Franco-Prussian War (1870–71) he commanded the 1st Army Corps, but was defeated at Wörth, and captured at Sedan. After the war, as commander of the army of Versailles he suppressed the Commune (1871). In 1873 he was elected president of the Republic for seven years, and was suspected of reactionary and monarchical leanings. He resigned in 1879.

McMahon, Sir William 1908–88
Australian politician
Born in Sydney, he studied at the university there and then qualified and practised as a solicitor. After service in World War II he became active in the Liberal Party and was elected to the House of Representatives in 1949. Under HAROLD HOLT he became treasurer and deputy leader. Precluded from the leadership on Holt's death by the veto of the Liberals' coalition partner, the Country Party, he became prime minister on JOHN GORTON's resignation in 1971, but was defeated at the 1972 election. He remained Liberal leader until 1973 and retired from parliament in 1982.

McManus, Mark 1935–94
Scottish actor
Born in Hamilton, Lanarkshire, he emigrated to Australia and was briefly a professional boxer before finding some employment at the docks in Sydney. Performances with the Dockers' Amateur Theatre Group gave him a taste for acting and he turned professional in 1964, touring in SHAKESPEARE, co-starring in the film *Ned Kelly* (1970) and appearing in such television series as *Skippy*, before returning to London in 1971. He then worked with the Royal Court and National Theatre companies and achieved television fame in *Sam* (1973–75). He was best known in the title role of *Taggart* (1985–94), a character first seen in *Killer* (1983). His many theatre appearances included *No Man's Land* (1975), *Julius Caesar* (1977) and *Macbeth* (1983).

McMaster, John Bach 1852–1932
US historian
Born in Brooklyn, New York, he studied civil engineering, but from 1883 to 1920 was professor of American history at Pennsylvania University. He wrote a *History of the People of the US* (8 vols, 1883–1913), *Franklin as a Man of Letters* (1887) and other works.

Macmillan, Chrystal 1882–1937
Scottish feminist, pacifist and lawyer
Born in Edinburgh, she was educated at St Leonard's School in St Andrews, and at Edinburgh University where, as one of its first women graduates, she obtained a first-class degree before further study in Berlin. Called to the Bar in 1924, she never practised, but immersed herself in feminist causes. As the first woman to address the House of Lords (1908), she appealed for the right of female graduates to vote and served on a variety of committees, as well as being a leader of the National Union of Suffrage Societies, secretary of the International Women's Suffrage Alliance, and the founder of the Open Door Council (1929) which opposed legal restraints on women. As a pacifist, she was an instigator of the International Women's Congress at the Hague (1915) and secretary of the International Alliance of Women (1913–23).

Macmillan, Daniel 1813–57
Scottish bookseller and publisher
He was born in Upper Corrie, Arran, and was apprenticed to a bookseller in Irvine at the age of 10. In 1843 he and his brother Alexander opened a bookshop in London, then moved to Cambridge. By 1844 he had branched out into publishing, first educational and religious works and, by 1855, English classics such as CHARLES KINGSLEY's *Westward Ho!* and THOMAS HUGHES's *Tom Brown's Schooldays*. In 1858, the year of his death, the firm opened a branch in London and by 1893 had become a limited liability company with Daniel's son Frederick (1851–1936) as chairman. His other son, Maurice, father of HAROLD MACMILLAN, was also a partner.

MacMillan, Donald Baxter 1874–1970
US explorer
He was born in Provinceton, Massachusetts. A member of the ROBERT PEARY Arctic expedition of 1908–09, he later carried out anthropological research among the Inuit of Labrador, and led expeditions to Greenland (1913–17). He also led expeditions to Baffin Island (1921–22), North Greenland (1923–24) and the North Pole (1925).

McMillan, Edwin Mattison 1907–91
US atomic scientist and Nobel Prize winner
Born in Redondo Beach, California, he was educated at the California Institute of Technology (Caltech) and at Princeton University, where he took his doctorate in 1932. He joined the staff of the University of California at Berkeley, moving to the Lawrence Radiation Laboratory when it was founded within the university in 1934. In 1940, following up the work of ENRICO FERMI who had split the uranium atom by bombarding it with low-velocity neutrons, McMillan and PHILIP HAUGE ABELSON synthesized an element heavier than uranium by bombarding uranium with neutrons in the Berkeley cyclotron. They called this new silvery metal 'neptunium' and the synthesis of this first 'transuranic' element marked the beginning of a new epoch in science and in world affairs. The following year GLENN THEODORE SEABORG, also working at Berkeley, synthesized plutonium, leading on to the development of the atomic bomb. McMillan spent the rest of World War II working on radar and sonar, and on the atomic bomb at Los Alamos. He was appointed to the chair at Berkeley in 1946 and to the directorship of the Lawrence Radiation Laboratory in 1958, retiring in 1973. From 1968 to 1971 he was chairman of the US National Academy of Sciences. He was awarded the Nobel Prize in chemistry, jointly with Seaborg, in 1951.

Macmillan, (Maurice) Harold, 1st Earl of Stockton 1894–1986
English Conservative statesman
Born in London, he was educated at Eton, and Balliol College, Oxford, his studies having been interrupted by service with the Grenadier Guards during World War I, in which he was seriously wounded. In 1919–20 he was in Canada as aide-de-camp to the Governor-General, the Duke of Devonshire, whose daughter, Lady Dorothy (d.1966), he married. Returning to Britain, he partnered his brother Daniel in the family publishing firm, but preserved his interest in politics and stood successfully as Conservative MP for Stockton-on-Tees in 1924; he was defeated in 1929, but re-elected in 1931. Not always willing to conform to the party line, he remained a backbencher until 1940, when CHURCHILL made him Parliamentary Secretary to the Ministry of Supply. After a brief spell as Colonial Under-Secretary, in 1942 he was sent to North Africa to fill the new Cabinet post of Minister Resident at Allied Headquarters where he showed great acumen and proved his ability as a mediator in the many clashes of factions and personalities. Defeated in the Labour landslide of 1945, he was returned later the same year for Bromley, which he held until he retired in 1964. He was Minister of Housing (1951–54), silencing general doubts by achieving his promised target of 300,000 houses in a year. He was Minister of Defence from autumn to spring 1954–55, and thereafter Foreign Minister to the end of 1955, when he was appointed Chancellor of the Exchequer. On ANTHONY EDEN's resignation in 1957 he emerged, in R A BUTLER's words, as 'the best prime minister we have', his appointment being received without enthusiasm, for as an intellectual and a dyed-in-the-wool aristocrat he was regarded with suspicion by many. Nevertheless, his economic expansionism at home, his resolution in foreign affairs, his integrity, and his infectious optimism inspired confidence, and his popularity soared. Having told the people in 1957 that most 'have never had it so good', he embarked upon a new term as prime minister in 1959. His 'wind of change' speech in Cape Town (1960) acknowledged the inevitability of African independence. In 1962, after some electoral setbacks, he carried out a drastic 'purge' of his government, involving seven Cabinet Ministers. Further setbacks followed, such as the PROFUMO scandal (1963), and ill health brought about his reluctant resignation in 1963. He wrote *Winds of Change* (1966), *The Blast of War* (1967), *Tides of Fortune* (1969), *Riding the Storm* (1971), *Pointing the Way* and *At The End of the Day* (both 1972). An earldom was bestowed upon him on his 90th birthday in 1984 and he took the title Earl of Stockton. 🕮 Nigel Fisher, *Harold Macmillan* (1982)

MacMillan, James Loy 1959–
Scottish composer
Born in Kilwinning, Ayrshire, he was educated at Edinburgh and Durham universities. He taught music before attracting critical attention with the première of his orchestral work *The Confession of Isobel Gowdie* in London in 1990. His politically engaged work draws upon his firm Roman Catholic beliefs whilst referencing his Scottish roots. His music is full of melodic accessibility and expression, yet not entirely devoid of modernist atonality. He divides his time between composition and establishing an international career as a conductor.

Macmillan, Sir Kenneth 1929–92
Scottish ballet-dancer and choreographer
Born in Dunfermline, Fife, he was one of the original members of the Sadler's Wells Theatre Ballet (1946–48). In 1953 he began to choreograph with the Royal Ballet (*Somnambulism*), and, after three years as director at the Berlin Opera (1966–69), returned to the Royal Ballet in 1970 as artistic director. In 1977 he became the company's principal choreographer. His works include *Romeo and Juliet* (1965), *The Seven Deadly Sins* (1973), *Élite Syncopations* and *Manon* (both 1974), *Mayerling* (1978), *Isadora* (1981) and *The Judas Tree* (1992). As well as creating ballets for many of the world's foremost companies, he worked on theatre, television, and musical shows. 🕮 Edward Thorpe, *Kenneth Macmillan, the Man and the Ballets* (1985)

Macmillan, Kirkpatrick 1813–78
Scottish inventor
Born near Thornhill, Dumfriesshire, he was a farm labourer and a coachman before becoming a blacksmith in Keir. Having caught sight of a hobby-horse being ridden in the neighbourhood he made one himself. After a while he began to experiment with pedals and cranks as a means of propulsion. He applied pedals to a tricycle in 1834, and in 1840 succeeded in building the world's first primitive bicycle, riding it as far afield as Dumfries and, in two days, to Glasgow, some 70 miles (112.6km) to the north. He never patented his invention and it was widely copied, to such an extent that for many years afterwards it was usually credited to one of his imitators, Gavin Dalzell of Lesmahagow.

McMillan, Margaret 1860–1931
British educational reformer
Born in New York in the USA, and brought up near Inverness, Scotland, she was educated in Frankfurt, Geneva and Lausanne, but returned to Great Britain and campaigned ceaselessly in the industrial north of England for medical inspection and school clinics. In 1902 she joined her sister Rachel (1859–1917) in London, where they opened the first school clinic (1908), and the first open-air nursery school (1914). After Rachel's death, the Rachel McMillan Training College for nursery and infant teachers was established as a memorial.

MacMurrough, Dermot, *Irish Gaelic* **Diarmaid Mac Murchadha Uí**, *surname usually anglicized as* **Murphy** 1110–71
Irish ruler
He was a subject of HENRY II. Succeeding his father as King of Leinster in 1126, he was ousted by the King of Connaught for eloping with Devorgilla, wife of Tiernan O'Rourke (or O'Ruark), King of Breifne. Henry II permitted him to recruit allies among the Normans of Wales, and their principal leader, Richard de Clare (2nd Earl of Pembroke, nicknamed Strongbow, c.1130–1176) arrived in 1170. He took Waterford, married Dermot's daughter Aoife, and with the Normans and Leinstermen captured the Norse city of Dublin. Strongbow succeeded Dermot (1171) as ruler of Leinster but was forced to resubmit to Henry II. Posterity cast Dermot as the archetypal traitor, as in W B YEATS's play, *The Dreaming of the Bones* (1921).

McMurtry, Larry Jeff 1936–
US novelist
Born in Wichita Falls, Texas, and educated at North Texas State College, Denton, and Rice University, Houston, he helped to establish the Western as a serious contemporary genre through his vision of the history of Texas. Hollywood's interest in his work consolidated his reputation: *Horseman, Pass By* (1961) was successfully filmed as *Hud* (1963). McMurtry also wrote the screenplay for Peter Bogdanovich's prize-winning movie of his third novel, *The Last Picture Show* (1966). Later books also dealt with the opposition of freedom and rootedness, and a kind of heroic resistance to circumstance. These include *All My Friends are Going to be Strangers* (1972), *Terms of Endearment* (1975), the basis of a third successful film, and *Cadillac Jack* (1982). Subsequent works include *Lonesome Dove* (1985, Pulitzer Prize), the epic story of a cattle drive from Texas to Montana, *Some Can Whistle* (1989), *Buffalo Girls* (1990), *Streets of Laredo* (1993), *Comanche Moon* (1997) and *Folly and Glory* (2004).

Macnaghten, Edward Macnaghten, Baron 1830–1913
English judge
Born in London, he was educated at Trinity College, Dublin, and Cambridge. He became an MP in 1880, declined to be Home Secretary or a judge and was then appointed direct from the Bar in 1887 to be a Lord-of-Appeal-in-Ordinary and a life peer. His writings were impressive for their literary quality and their wit, but also for his ability to extract a leading principle from a mass of authority. He was also a leader in reforming professional legal education.

McNair (of Gleniffer), Arnold Duncan McNair, 1st Baron 1885–1975
English legal scholar and judge
Born in London, he was educated at Aldenham School and Gonville and Caius College, Cambridge. He taught law at London and Cambridge and served as Vice-Chancellor of Liverpool University. A judge of the International Court of Justice (1946–55), and its president (1952–55), he then became president of the European Court of Human Rights (1959–65). He was also president of the Institute of International Law (1949–50). His writings include *Law of Treaties* (1961), *International Law Opinions* (3 vols, 1956) and he edited German lawyer LASSA OPPENHEIM's *International Law* (1905–06).

Macnamara, Dame (Annie) Jean 1899–1968
Australian physician
Born in Beechworth, Victoria, and educated at Melbourne University, she worked in local hospitals where she developed an interest in 'infantile paralysis'. During the poliomyelitis epidemic of 1925, she tested the usé of immune serum and, convinced of its efficacy, visited England, the USA and Canada with the aid of a Rockefeller scholarship. With MACFARLANE BURNET, she found that there was more than one strain of polio virus, a discovery which led to the development of the 'Salk vaccine' (named after US virologist JONAS SALK). She also supported the experimental treatment developed by ELIZABETH KENNY, and introduced the first artificial respirator (iron lung) into Australia. She was created a DBE in 1935, and later became involved in the controversial introduction of the disease myxomatosis as a means of controlling the rabbit population of Australia. In the early 1950s it was estimated that as a result of her efforts the wool industry had saved over £30 million.

McNamara, Robert Strange 1916–
US Democrat politician and businessman
Born in San Francisco, he served in the US air force (1943–46), then worked his way up in the Ford Motor Company to be president by 1960. In 1961 he joined the KENNEDY administration as Secretary of Defense, in which post he was an early influential advocate of the escalation of the Vietnam War. By 1967 he was convinced that the war was unwinnable, but his pleas to seek a diplomatic solution went unheeded, and he resigned to become president of the World Bank (1968–81). In the 1980s he emerged as a critic of the nuclear arms race. He reawakened the Vietnam controversy with his 1995 memoir *In Retrospect: The Tragedy and Lessons of Vietnam*, which examined the blunders of the US government and expressed regret for his role. He later published *Argument Without End: The Search for Answers to the Vietnam Tragedy* (1999). In 2003 he appeared in the documentary film *The Fog of War: Eleven Lessons from the Life of Robert S McNamara*, which won the Academy Award for Best Documentary Feature. He has maintained his involvement in politics, joining other former Secretaries of Defense and State to discuss the Iraq War with President GEORGE W BUSH in 2006.

McNaught, William 1813–81
Scottish mechanical engineer and inventor
Born in Paisley, Renfrewshire, he was apprenticed to ROBERT NAPIER at the age of 14 and attended classes at the Andersonian Institution in Glasgow. Eight years later he joined his father in the manufacture of steam-engine components, and became aware of the need felt by many industrialists for an increase in the power of the single-cylinder low-pressure beam engines they had already installed in their factories. He conceived the idea in 1845 of adding a second smaller cylinder operating at a higher pressure which emitted its spent steam into the original cylinder where its remaining energy could be utilized. For many years the process of adding an extra cylinder to an existing engine was called 'McNaughting'.

McNaughton, Andrew George Latta 1887–1966
Canadian soldier
He was born in Moosomin, Saskatchewan. Educated at McGill University, he became a lecturer in engineering after obtaining a commission in the artillery arm of the Canadian militia. He served in World War I, and attained the rank of brigadier-general. Chief of General Staff (1929–35), he was president of the National Research Council from 1935 to 1939, and during World War II commanded the 1st Canadian Division (1939), Canadian Corps (1940) and 1st Canadian Army (1942–43) as lieutenant-general.

McNaughton or **McNaghten** or **McNaughten, Daniel**
19th century
English murderer
He was tried in 1843 for the murder of Edward Drummond, private secretary to Sir ROBERT PEEL. The question arose whether he knew the nature of his act. The criminal responsibility of the insane is now embodied in the judges' 'answers', known as the McNaughton Rules. They are that (*a*) every man is presumed sane until the contrary is proved and (*b*) it must be clearly proved that at the time of committing the act, the accused's reason was impaired so as not to know the nature of the act, or that he was doing wrong.

Macnee, (Daniel) Patrick 1922–
English actor
Born in London, he chose acting as a career after being expelled from Eton College. He found work as an extra in such films as *The Life and Death of Colonel Blimp* (1943), before securing larger parts in *Les Girls* (1957), *The Sea Wolves* (1980) and *A View to a Kill* (1985), and occasionally appearing as a cowboy in Hollywood Westerns. He spent two years in the Broadway production of *Sleuth* (1972–73), and is considered something of a pioneer in Canadian television, but it was as the archetypal Englishman John Steed in the 1960s fantasy espionage series *The Avengers* (1961–69) and its sequel, *The New Avengers* (1976–77), that he became best known. 🕮 *Blind in One Ear* (1988)

MacNeice, (Frederick) Louis 1907–63
Northern Irish poet
Born in Belfast, he was educated at Marlborough and at Merton College, Oxford, and became a lecturer in classics at Birmingham (1930–36) and in Greek at Bedford College, University of London (1936–40). He was closely associated with the British left-wing poets of the 1930s, especially W H AUDEN, with whom he wrote *Letters from Iceland* (1937). Among his volumes of poetry are *Blind Fireworks* (1929), *Autumn Journal* (1938), *Collected Poems* (1949), *Autumn Sequel* (1954), and *Eighty-Five Poems* and *Solstices* (both 1961). He was the author of a novel, *Round about Way* (1932, under the pseudonym of Louis Malone), and several verse plays for radio, notably *The Dark Tower* (1947), as well as translations of AESCHYLUS and of GOETHE's *Faust*. He also produced several volumes of literary criticism. A volume of autobiography, *The Strings Are False*, appeared posthumously in 1965, and his *Collected Poems* in 1966.

McNeill, Billy (William), *known as* **Caesar** 1940–
Scottish footballer and manager
Born in Bellshill, Lanarkshire, he was the backbone of the highly successful Glasgow Celtic side between 1965 and 1975. He received the European Cup after Celtic's victory at Lisbon in 1967, and had nine championship and seven Scottish Cup medals. He was capped 29 times. Appointed to succeed JOCK STEIN as manager of his old club in 1978, he left after a quarrel with the board, but following comparatively unsuccessful spells with Manchester City and Aston Villa he returned in 1987. In his first season he guided Celtic to League and Cup victory in the club's centenary year. They also won the 1989 Scottish Cup before McNeill was forced to leave the club in 1991.

McNeill, F(lorence) Marian 1885–1973
Scottish folklorist
Born in Saint Mary's Holm, Orkney, she was educated there and at the universities of Glasgow and Edinburgh, becoming active as a suffragette. She worked for the Association for Moral and Social Hygiene, then as a tutor in Athens and as a freelance journalist in London. Returning to Scotland in 1926, she worked on the *Scottish National Dictionary*, but remains best known for her work as a folklorist. Her reputation is based upon *The Scots Kitchen* (1929), a study of Scottish culinary history. *The Silver Bough* (1957–68) is a four-volume study of the folklore, festivals and traditions of Scotland, and *Hallowe'en* (1970) uses photographs and illustrations to explore the origins of the rites and ceremonies associated with this occasion in Scotland.

MacNeill, John, *pen name* **Eoin** 1867–1945
Irish historian and nationalist
Born in Glenarm, County Antrim, and educated at St Malachy's College, Belfast, he made himself an authority on Old Irish. He ultimately became professor of early Irish history at University College, Dublin (1908–45), and his pioneer work in Irish history strongly asserted the strength of its legal and cultural civilization, exhibited in the inspirational lectures *Phases of Irish History* (1919), and the more formal works *Celtic Ireland* (1921) and *Early Irish Laws and Institutions* (1935). In 1913 he inspired and led the Irish Volunteers. His organization was taken over by JOHN REDMOND, who persuaded most of its members to support the Allied cause in 1914 after the outbreak of World War I. Irish Republican Brotherhood manipulation steered MacNeill's Volunteers towards insurrection in 1916 without his knowledge. In the end he accepted the insurrection with reluctance but countermanded it when it became clear German aid would fail. After the Dublin Rising, MacNeill was interned, and played a part in organizing the new Sinn Féin Party and its abstentionist body Dáil Éireann where, as MP for Derry, he was given Cabinet status. He supported the Anglo-Irish Treaty and was Minister for Education in the first Irish Free State government. He was delegate for his government to the Boundary Commission which shattered Irish nationalist hopes of a revision of Irish partition in the Catholics' favour; he resigned rather than accept its verdict, and the boundary was left unchanged.

Maconchy, Dame Elizabeth Violet 1907–94
English composer
Born in Broxbourne, Hertfordshire, of Irish parentage, she studied under RALPH VAUGHAN WILLIAMS at the Royal College of Music and in 1929 went to Prague, where her first major work, a piano concerto, was performed (1930). Her suite *The Land* was performed at the London Proms the same year, and her early works were often written for festivals of the International Society for Contemporary Music. Her most characteristic work is in the field of chamber music, and among her best-known compositions are her *Symphony* (1953) and overture *Proud Thames*, also written in Coronation Year, a carol cantata *A Christmas Morning* (1962), a choral and orchestral work *Samson and the Gates of Gaza* (1963), an opera for children, *The King of the Golden River* (1975), *Heloise and Abelard* (1978) and *My Dark Heart* (1981). She also wrote a group of one-act operas, twelve string quartets and songs. She was made a DBE in 1987. Her daughter, Nicola Frances LeFanu (1947–), is also a composer.

Macphail, Agnes Campbell, *née* **Campbell** 1890–1954
Canadian suffragette and politician
She was born in Grey County, Ontario, and became a schoolteacher. She became involved with the women's suffrage movement and was elected Canada's first woman MP for the United Farmers of Ontario (1921–40). She was a leader of the Co-operative Commonwealth Federation of Canada, which had been formed in 1933 and represented Canada in the Assembly of the League of Nations.

McPherson, Aimee Semple, *née* **Kennedy** 1890–1944
US Pentecostal evangelist
She was born near Ingersoll, Ontario, Canada, into a Salvation Army family. She became a Pentecostalist and married a preacher, Robert Semple. They went to China as missionaries but on his death in 1910, she returned to North America and subsequently embarked on a hugely successful evangelistic career. In 1918 she founded the Foursquare Gospel movement in Los Angeles, and for nearly two decades she conducted a preaching and healing ministry in the Angelus Temple, Los Angeles, which cost her followers $1.5 million to construct. She had her own radio station, bible school, magazine, and social service work. Considerable controversy surrounded her: she was continually embroiled in legal suits against her, and disappeared for five weeks in a bizarre and unexplained incident in 1926 (she claimed she was kidnapped but was later suspected to have been involved in a romantic liaison). Even her death raised questions: authorities differ on whether it was due to a heart attack or an overdose of barbiturates. Her books include *This is That* (1923), *In the Service of the King* (1927) and *Give Me My Own God* (1936).

Macpherson, James 1736–96
Scottish poet and 'translator' of Ossian
Born in Ruthven, Inverness-shire, he was educated at King's College and Marischal College, Aberdeen, and studied for the ministry, but in 1756 became a village schoolmaster in Ruthven. In 1758 he published an epic poem, *The Highlander*,

and two years later published some fragments of Gaelic oral poetry, *Fragments of Ancient Poetry Collected in the Highlands of Scotland* (1870). The introduction by Hugh Blair suggested that a poetic epic relating to the legendary hero Fingal, as told by his son OSSIAN, was still extant. In 1760 Macpherson was commissioned by the Faculty of Advocates in Edinburgh to tour the Highlands in search of this material, which he published in 1762 as *Fingal: an Ancient Epic Poem in Six Books*; it was followed by *Temora, an Epic Poem, in Eight Books* (1763). They were received with huge acclaim, but their authenticity was soon questioned and Macpherson was unable to produce the originals. He seems, in fact, to have used some original Gaelic poetry, greatly amended, and invented the rest. In 1763 he was appointed Surveyor-General of the Floridas, but soon returned to London and became a wealthy merchant with interests in the East India Company. He was MP for Camelford from 1780 and was buried, at his own request and expense, in Westminster Abbey.

Macpherson, Robert d.1872
Scottish artist and pioneering photographer
Born in Forfarshire, he studied medicine in Edinburgh, but left to pursue an artistic career and went to Italy (1840), living in Rome for the rest of his life. He made a living as a painter and picture-dealer for some years before taking up photography in 1851; he became one of the most prolific and successful photographers in Italy. He exhibited internationally and is regarded as one of the greatest architectural photographers, and was also the inventor of a photo-lithographic process.

McQuaid, John Charles 1895–1973
Irish prelate
Born in Cootehill, County Cavan, and educated there, and in Dublin and Rome, he was ordained priest in the Holy Ghost Fathers in 1924, becoming dean of studies in 1925, and then president at his order's Blackrock College in 1931. An influential commentator on social and moral questions, he was credited with strong links to ÉAMON DE VALERA, whose sons were his pupils, and this may have accounted for his being named Archbishop of Dublin by Pope PIUS XII in 1940, the only Irish bishop from a religious order during his papacy. He fell foul of de Valera through championing the cause of striking schoolteachers in 1947, and was reduced thereafter to opposing state policy. He played a leading part in the Irish bishops' successful objection to a national health proposal, the Mother and Child Scheme of Dr Noël Browne, whose consequent resignation from the first COSTELLO government led to its fall in 1951. He also banned Catholics from attending Trinity College, Dublin, from 1944, being bitterly hostile to mixed religious education. He retired in 1972.

Macquarie, Lachlan, *known as* **the Father of Australia** 1761–1824
Scottish soldier and colonial administrator
Born on the island of Ulva, off Mull, he joined the Black Watch in 1777, and after service in North America, India and Egypt was appointed governor of New South Wales following the deposition of Captain WILLIAM BLIGH. The colony, depressed and demoralized, populated largely by convicts and exploited by influential land-grabbers and monopolists, was raised by his energetic administration and firm rule to prosperity: its population trebled, extensive surveys were carried out, and many roads were built. In 1821 the monopolists' political manoeuvring and his own ill health compelled him to return to Great Britain. He gave his name to the Lachlan and Macquarie rivers, and to Macquarie Island.

Macquarrie, John 1919–
Scottish theologian and philosopher of religion
He was born in Renfrew, Strathclyde. A lecturer at Glasgow (1953–62), and professor at Union Theological Seminary, New York (1962–70) and at Oxford (1970–86), he has written extensively across the whole field of theology. While the influence of RUDOLF BULTMANN and PAUL TILLICH may be traced in *An Existentialist Theology* (1955) and *Principles of Christian Theology* (1966), his catholic interests may be discerned in *Paths in Spirituality* (1972), *In Search of Humanity* (1982), the Gifford Lectures *In Search of Deity* (1984), and *Theology, Church and Ministry* (1986). Students have also appreciated successive revisions of *Twentieth Century Religious Thought* (1963–88), and his editing of *A Dictionary of Christian Ethics* (1967), revised, with J F Childress, as *A New Dictionary of Christian Ethics* (1986). Later publications include *Heidegger and Christianity* (1994), *Invitation to Faith* (1995) *Christology Revisited* (1998) and *On Being a Theologian* (1999).

McQueen, Alexander 1970–
English fashion designer
He was born in London and studied at St Martin's School of Art. His final collection there in 1992 established his presence on the fashion scene, and his low-cut 'bumsters' brought him some notoriety in the form of tabloid newspaper coverage. His designs have attracted a loyal following, and he became chief designer for Givenchy in 1996, moving to the same position at Gucci in 2000. He won the London Fashion Awards Designer of the Year prize in 1996, 1997, 2001 and 2003. He was awarded the CBE in 2003.

McQueen, Steve(n) 1969–
English artist
Born in London, he studied at the Chelsea School of Art, Goldsmiths College, London, and the Tisch School of the Arts, New York. He is known particularly for his video art pieces such as *Deadpan* (1997), a black-and-white film of the walls of a house as they fall around the artist, and *Drumroll* (1999), made using an oil drum fitted with cameras and rolled through the streets of Manhattan. Among his international prizes are the ICA Futures award (1996) and the Turner Prize (1999).

McQueen, (Terence) Steve(n) 1930–80
US actor
Born in Indianapolis, Indiana, after a delinquent youth he took up acting on stage and television, and by 1955 was a film star with a reputation as a tough, unconventional rebel, both on and off the screen. He co-starred in *The Magnificent Seven* (1960), a role which helped to create his image as a laconic loner, and became the archetypal 1960s cinema hero/rebel with his performances in *The Great Escape* (1963), *The Cincinnati Kid* (1965) and *Bullitt* (1968). He attempted IBSEN in *An Enemy of the People* in 1977 before returning to action roles in two final films. He was married to actress Ali McGraw (1973–78), and died after a long struggle with cancer. 🕮 Grady Ragsdale, *Steve McQueen: The Final Chapter* (1983)

Macquer, Pierre Joseph 1718–84
French chemist and physician
Born in Paris, he qualified in medicine in 1742. Elected to the Academy of Sciences in 1745, he studied dyes, arsenic, platinum and the properties of milk. He began lecturing at the Jardin du Roi in 1770 and was appointed professor in 1777. After helping Jean Hellot, scientific adviser to the famous porcelain factory at Sèvres, to study the effects of firing on hundreds of clays from different parts of France, he succeeded him as adviser in 1766. Macquer is best known as the author of two widely read textbooks and the first dictionary of chemistry – *Élémens de chymie théorique* (1749, 'Elements of Theoretical Chemistry') and *Élémens de chymie pratique* (1751, 'Elements of Practical Chemistry') – which provided much-needed, straightforward accounts of the state of knowledge at the time and were particularly popular in their English translations. Macquer's greatest work, *Dictionnaire de chymie* (1766), was translated into German, English, Danish and Italian. He was sympathetic to the revolutionary ideas of ANTOINE LAVOISIER but died, in Paris, before he could incorporate them into a new edition of the *Dictionnaire*.

McRae, Colin 1968–
Scottish rally driver
Born in Lanark, he made his debut in 1986 and soon earned the nickname 'The Flying Scotsman'. Driving for Subaru (1991–98) and subsequently (from 1999) for Ford, he won the British rally championship in 1991, 1992 and 1998 and the world rally championship in 1995, becoming the youngest driver ever to win the title. His autobiography *The Real McRae* appeared in 2001.

Macrae, (John) Duncan 1905–67
Scottish actor
He was born and educated in Glasgow, and taught before becoming a full-time actor. He made his first London appearance in 1945, and became known and respected in a broad range of roles, but particularly as a Scottish actor. His long association with the Citizens' Theatre in Glasgow dated from its opening production in 1943, and, in partnership with the Scottish playwright and critic T M Watson, he ran a company to present plays on tour in Scotland (1952–55). His many performances included Sir DAVID LYNDSAY's *Ane Satyre of the Thrie Estaitis* (1948), Robert McLellan's *Jamie the Saxt* (1955) and Robert Kemp's Scots translation of MOLIÈRE's *L'École des Femmes* (1956, *Let Wives Tak Tent*). The best known of his many films is *Whisky Galore* (1948), and he also appeared in numerous television productions.

Macready, William Charles 1793–1873
English actor and theatre manager
He was born in London. After making his debut at Birmingham in 1810, he appeared at Covent Garden in London (1816), but it was not until 1837 that he became known as the leading English actor of his day. In that year he became manager of Covent Garden, where he produced SHAKESPEARE. After two seasons he moved to Drury Lane (1841–43), then played in the provinces, Paris and the USA. His last visit to the USA was marked by riots (10 May 1849) in which 22 people died, following the hissing of his Macbeth by supporters of US actor EDWIN FORREST. He made his last appearance on the stage at Drury Lane in 1851. He wrote *Reminiscences and Diaries* (1875) and *Diaries* (ed W Toynbee, 1912). 🕮 Alan S Dower, *The Eminent Tragedian William Charles Macready* (1966)

Macrobius, Ambrosius Theodosius 5th century
Roman writer and neo-Platonist philosopher
Born probably in Africa, he wrote a commentary on CICERO's *Somnium Scipionis* ('The Dream of Scipio'), and *Saturnaliorum Conviviorum Libri Septem*, a series of historical, mythological and critical dialogues.

Macsween, John Angus 1939–2006
Scottish butcher and entrepreneur
Born in Edinburgh, he left school at the age of 16 to work in the family butcher's shop. He showed flair as a businessman, managing a change from retail to wholesale business in the 1980s and establishing the world's first haggis factory. Innovations such as the development of vegetarian haggis helped him to successfully sell to fashionable shops in London and overseas, and he was credited with establishing a new market for the traditional dish.

MacSwiney, Terence 1879–1920
Irish nationalist and writer
Born in Cork, he trained as an accountant, and wrote poetry and plays under the influence of DANIEL CORKERY. He was a major influence in forming the Irish Volunteers in Cork in 1913, and wrote for *Irish Freedom*, but accepted JOHN MACNEILL's countermand of the Easter Rising in 1916. He was elected Sinn Féin MP for West Cork in 1918, sitting in Dáil Éireann and maintaining his work as volunteer recruiter and organizer. In March 1920 he was elected Lord Mayor of Cork after the murder of Mayor Tómas Mac Curtain by irregular British forces; he was arrested the following August and sentenced to two years' imprisonment. He declared his intention to hunger-strike, was transferred to Brixton prison, and died after a fast of 74 days which had aroused worldwide sympathy. Among others deeply influenced by his sacrifice was a Vietnamese kitchen-worker in the London Ritz hotel, the future HO CHI MINH.

M'Taggart, John M'Taggart Ellis 1866–1925
English philosopher
Born in London, he was educated at Clifton College and at Trinity College, Cambridge, where he later taught (1897–1923). His early works were commentaries on HEGEL's philosophy and were effectively preliminaries to his own systematic metaphysics set out in *The Nature of Existence* (2 vols, 1921, and posthumously, 1927). He is regarded as the most important of the Anglo-Hegelian or Idealistic philosophers who dominated British and US thought in the late 19th and early 20th centuries.

McTaggart, William 1835–1910
Scottish painter
Born in Kintyre, he lived in or near Edinburgh for most of his life. In 1852 he entered the Trustees' Academy, where he studied under ROBERT SCOTT LAUDER. He became the outstanding landscape painter of his time. His grandson WILLIAM MACTAGGART was also a painter.

MacTaggart, Sir William 1903–81
Scottish painter
Born in Loanhead, near Edinburgh, he was the grandson of WILLIAM MCTAGGART. He attended Edinburgh College of Art (1918–21), where he later taught, and was the recipient of many honours. His main subject matter was landscape and seascape, painted in a richly coloured expressionistic manner, and he is remembered as a prominent representative of the modern Scottish school.

MacThómais, Ruaraidh *See* THOMSON, DERICK

McWilliam, F(rederick) E(dward) 1909–92
Northern Irish sculptor
Born in Banbridge, County Down, he studied at the Slade School of Art, London, before travelling in France on a scholarship (1931). On his return to England, he began to carve as well as paint. He held his first one-man show in 1939, but his career was interrupted by World War II and service in the RAF. He was sent to India where he was influenced by Indian sculpture, and after the war he taught at Chelsea School of Art (1946–47), then at the Slade School (1947–68). A highly individual artist, he continued to carve and also made bronze castings. His works include *Princess Macha* (1957) and *Women of Belfast* (1972–73). A major retrospective of his work was held at the Tate Gallery, London, in 1989.

Macy, Anne Mansfield Sullivan, *née* **Sullivan** 1866–1936
US educator
Born in Feeding Hills, Massachusetts, she lost most of her sight in childhood due to an infection and attended the Perkins Institute for the Blind in Boston. She regained some of her sight through operations, but nevertheless learned the manual alphabet in order to communicate with other disabled people. In 1887 she was chosen to teach HELEN KELLER, a girl who could not see, hear or speak. Using the manual alphabet and a method of touch-teaching in which she allowed the child to hold objects rather than have their properties explained, she was dramatically successful in instructing her. She later accompanied Keller to Radcliffe College and on worldwide lecture tours. In 1905 she married John Macy, a writer and critic, but continued in her work for the blind, championing the cause of the new American Foundation for the Blind during the 1920s.

Mad Anthony *See* WAYNE, ANTHONY

Madariaga, Salvador de 1886–1978
Spanish writer, scholar and diplomat
He was born in La Coruña, and educated at the Instituto del Cardenal Cisneros, Madrid, and at the École Polytechnique, Paris. He was a London journalist (1916–21) and director of the disarmament section of the League of Nations Secretariat (1922–27). From 1928 to 1931 he was professor of Spanish studies at Oxford, and was Spanish ambassador to the USA (1931) and to France (1932–34). A liberal opponent of the FRANCO regime, he lived in exile. His publications include *The Genius of Spain* (1923), *Theory and Practice of International Relations* (1938), *Portrait of Europe* (1952), *Democracy v. Liberty?* (1958) and *Latin America between the Eagle and the Bear* (1962).

Madar-i-Millat *See* JINNAH, FATIMA

Madden, Sir Frederic 1801–73
English antiquary and palaeographer
Born in Portsmouth, he was keeper of manuscripts in the British Museum (1837–66). He edited *Havelok the Dane* (1833), *William and the Werewolf* (1832), the early English versions of the *Gesta Romanorum* (1838), the WYCLIFFE version of the Bible (1850), LAYAMON's *Brut* (1847), and the works of MATTHEW PARIS (1858).

Mademoiselle, La Grande *See* MONTPENSIER, ANNE MARIE LOUISE D'ORLÉANS, DUCHESSE DE

Maderna, Bruno 1920–73
Italian composer and conductor
Born in Venice, he appeared from the age of seven as an infant prodigy violinist and conductor, and studied composition and conducting. Early in his musical career he composed for films and radio, and taught at the Venice Conservatorio. In 1955 he began to research the techniques and possibilities of electronic music, founding, with LUCIANO BERIO, the Studio di Fonologia Musicale of Milan Radio in Italy (1955). He became music director of Milan Radio. His compositions are intellectual, based on a mathematical calculation of form rather than an emotional or inspirational approach, but much of the resulting music is surprisingly lyrical. He wrote pieces for combinations of live and taped music, such as the *Compositions in Three Tempi* and *Music in Two Dimensions* (1958) for flute and taped sounds, and a number of compositions for electronic music, such as *Dimensions II* (1960). His opera *Satyricon* appeared in 1973.

Maderna or **Maderno, Carlo** 1556–1629
Italian architect
Born in Capalago, he had moved to Rome by 1588, where he became assistant to his uncle, DOMENICO FONTANA. He was the leading exponent of the early Baroque in Rome, producing bold and vigorous designs, divorced from the Mannerist style of the preceding generation. In 1603 he was appointed architect to St Peter's, where he lengthened the nave and added a massive façade (1606–12). Other notable works include Sta Susanna (1597–1603), and the Palazzo Barberini (1628–38), completed by FRANCESCO BORROMINI and GIAN LORENZO BERNINI, in Rome, the latter in a revolutionary design, dispensing with the traditional quadrangular courtyard in favour of an H-plan.

Madonna, *full name* **Madonna Louise Veronica Ciccone** 1958–
US pop singer and actress

Madonna was born in Bay City, Michigan, and trained as a dancer at Michigan University before moving to New York to study with the Alvin Ailey American Dance Theater. She performed as a singer with a number of rock groups before producing her first hit, *Holiday*, in 1983, a dance number with a typically saccharine melodic line. Highly ambitious and commercially astute, she made her debut album in the same year which delivered four more US hit singles. Her brash, overtly sexual stage persona and striking fashions made her an influential role model for teenagers from the 1980s, and her success has been greatly enhanced by clever promotion and image-making. The perceived contrast between her hard-headed business persona and her apparent willingness to be presented as a sex object (as in her enormously successful 1993 photo-book *Sex*) was given a post-feminist spin when she was championed by the US academic CAMILLE PAGLIA. She has continued to shadow dance music trends, using techno producer William Orbit (1956–) on several recordings in the late 1990s. 2005's *Confessions on a Dancefloor* successfully matched the prevailing retro-disco mood, serendipitously harking back to her early hits. She has appeared in a number of films, including *Desperately Seeking Susan* (1985) and *Evita* (1996), the massively successful film musical of the life of EVA PERÓN. She heads the recording company Maverick, and has been married to SEAN PENN and Guy Ritchie.

♫ Major recordings include *Like A Virgin* (1984), *True Blue* (1986), *Like a Prayer* (1989), *Erotica* (1992), *Bedtime Stories* (1994), *In the Beginning* (1998), *Ray of Light* (1998), *Music* (2000).

🕮 Andrew Morton, *Madonna* (2001).

'A lot of people are afraid to say what they want. That's why they don't get what they want.'

– From *Sex* (1993).

Madero, Francisco Indalecio 1873–1913
Mexican revolutionary and statesman
Born in San Pedro, Coahuila, the son of a wealthy landowner, and educated in Paris and the USA, he was no social revolutionary, although he greatly improved the peons' condition on his own estates. He unsuccessfully opposed PORFIRIO DÍAZ's local candidates in 1904, and in 1908, when Díaz was quoted as saying that he would not seek another term, Madero took the dictator at his word and launched his own presidential campaign. A spiritualist, vegetarian, and practitioner of homeopathic medicine, he seemed an unlikely challenger, and at first was not taken seriously, but his popularity grew rapidly and Díaz turned to repression, imprisoning Madero and many of his supporters. He escaped to the USA, from where he directed a military campaign. His supporters, including PANCHO VILLA, captured Ciudad Juárez, where Madero formed his capital (May 1911), and the dictatorship crumbled. Once he had been elected president (Oct 1911), Madero's moderate political reform programme pleased no one and he faced a succession of revolts by EMILIANO ZAPATA and others demanding land reform, as well as by supporters of the old dictatorship. On the night of 23 February 1913, he and his vice-president were murdered following a military coup led by General VICTORIANO HUERTA, planned with the assistance of US ambassador Henry L Wilson.

Madhva 14th century
Kanarese Brahmin philosopher
Born near Mangalore, South India, he studied in Trivandrum, Benares and elsewhere, settled in Udipi and is traditionally held to have vanished in mid-lecture in 1317 and retired to the Himalayas. Taking RAMANUJA's side against ŚANKARA, he promoted *dvaita* or dualistic *Vedanta*, allowing for the separate existence of the Divine, human souls, and matter. His belief that some souls were eternally damned suggests a Christian influence on his thinking.

Madison, Dolley Payne Todd, *née* **Payne** 1768–1849
US society hostess and First Lady
Born in Guilford County, North Carolina, she was already a widow when she married JAMES MADISON in 1794. She became famous as a vivacious Washington hostess, especially after Madison had become Secretary of State (1801–09). Madison became 4th president of the USA in 1809, and as First Lady (1809–17), she restored formality to the White House and was considered a premier hostess and society figure. In 1814, when the British captured Washington and burned government buildings including the White House, she salvaged many important state documents and artistic artefacts.

Madison, James 1751–1836
4th president of the USA
Born in Port Conway, Virginia, he graduated from the College of New Jersey (now Princeton) and quickly became involved in revolutionary politics. In 1776 he was a member of the Virginian Convention, and he served in the Continental Congress (1780–83, 1787) and the Virginia legislature (1784–86). He was one of the most active delegates to the Constitutional Convention of 1787, and his capable management of the proceedings and ability to engineer compromises won him the title 'master builder of the constitution'. Among other contributions, he was the chief author of the 'Virginia plan', and he suggested the compromise by which, for taxation, representation, etc, slaves were regarded as population and not chattels, five being counted as three persons, thus securing the adoption of the Constitution by South Carolina and the other slave-holding states. He was influential in the campaign to win ratification of the Constitution, and he joined ALEXANDER HAMILTON and JOHN JAY in writing the *Federalist Papers* (1787–88). As a congressman from Virginia (1789–97) he was an advocate of the Bill of Rights and was anxious to limit the powers of the central government. He was a leader of the Jeffersonian Republicans, joining THOMAS JEFFERSON in opposing the Alien and Sedition Acts and drawing up the Virginia Resolves. When Jefferson was elected president in 1800, Madison was made Secretary of State, and in 1809 he succeeded Jefferson as president. His administration was dominated by concerns about the European wars of the period and the damage done to US commerce, and by the War of 1812, an unpopular conflict with Great Britain in which the USA gained none of its objectives. In 1817, at the close of his second term, Madison retired to Virginia.

Madoc, *properly* **Madog ab Owain Gwynedd** fl.1150–80
Welsh prince
Probably legendary, he was long believed by his countrymen to have discovered America in 1170. The story is in RICHARD HAKLUYT's *Voyages* (1582) and Lloyd and Powell's *Cambria* (1584). An essay by Thomas Stephens, written in 1858 for the Eisteddfod (published 1893), proved it to be without foundation, but it provided the basis for ROBERT SOUTHEY's poem *Madoc* (1805).

Madonna *See panel above*

Maecenas, Gaius Cilnius d.8 BC
Roman statesman
He was the trusted counsellor of AUGUSTUS, and his name has become a synonym for a patron of letters.

Maedoc, St Maol *See* MALACHY, ST

Maerlant, Jacob van c.1235–c.1300
Flemish didactic poet
He was the author of verse translations of French and Latin originals, including the *Roman de Troie* (c.1264, 'The Tale of Troy'), and VINCENT DE BEAUVAIS's *Speculum Majus* (1284) as *Spiegel Historiael*, a history of the world.

Maes, Nicolaes 1634–93
Dutch painter
Born in Dordrecht, from c.1648 he was a pupil of REMBRANDT in Amsterdam. Painting in a style close to his master's he specialized in painting genre scenes, especially of single figures praying or sleeping. He travelled to Antwerp (c.1665) and there became influenced by Flemish art, especially that of VAN DYCK. Upon his return to the Netherlands in 1667 he began to paint portraits which, because of their very different style, were for a long time thought to have been by a different artist.

Maeterlinck, Maurice, Count 1862–1949
Belgian dramatist and Nobel Prize winner
Born in Ghent, he studied law there, but became a disciple of the Symbolist movement, and in 1889 produced his first volume of poetry, *Les Serres chaudes* ('The Greenhouses'). In the same year came his prose play, *La Princesse Maleine* (Eng trans *The Princess Maleine*, 1890), and in 1892 *Pelléas et Mélisande* (Eng trans *Pelleas and Melisande*, 1894), on which CLAUDE DEBUSSY based his opera. Other plays include *Joyzelle* (1903, Eng trans

1906) and *Marie-Magdeleine* (1910, Eng trans *Mary Magdalene*, 1910). *La Vie des abeilles* (1901, Eng trans *The Life of the Bee*, 1901) is one of his many popular expositions of scientific subjects, and he also wrote several philosophical works. He was awarded the Nobel Prize in literature in 1911. 🕮 B Knapp, *Maurice Maeterlinck* (1975)

Maevius and **Bavius** 1st century BC
Roman poets
They were colleagues, and were lampooned by VIRGIL in his Eclogues, and also by HORACE. Their names were used by WILLIAM GIFFORD for the titles of his satires on the Della Cruscan school of poets ('The Baviad' and 'The Maviad').

Maffei, Francesco Scipione, Marchese di 1675–1755
Italian dramatist
Born in Verona, he fought in the War of the Spanish Succession (1703–04) under his brother Alessandro, a field marshal. He was a leading reformer of Italian drama, and his tragedy *Merope* (1714, Eng trans 1740) ran through 70 editions; the comedy *Le Ceremonie* (1728) was also successful. He also wrote scholarly works, including *Verona illustrata* (4 vols, 1731–32, Eng trans *A Compleat History of Verona*). 🕮 G Silvestri, *Un europeo del Settecento* (1954)

Magellan, Ferdinand c.1480–1521
Portuguese navigator
He was born near Villa Real in Tras os Montes, served in the East Indies and Morocco, then laid before CHARLES V a scheme for reaching the Moluccas by the west. Sailing from Seville on 10 August 1519 with five ships and 270 men, he coasted Patagonia, passing through the strait which bears his name (21 October to 28 November), and reached the ocean which he named the Pacific. He was later killed by local people in the Philippine Islands, but his ship, the *Victoria*, was taken safely back to Spain by the Spanish captain, JUAN SEBASTIAN DEL CANO, on 6 September 1522, to complete the first circumnavigation of the world. The four other ships had been lost, and of the 270 men who had set out three years earlier, fewer than 20 returned. 🕮 Edouard Roditi, *Magellan of the Pacific* (1972)

Magendie, François 1783–1855
French physiologist
Born in Bordeaux, he graduated in medicine at Paris in 1808, was elected a member of the French Academy of Sciences in 1821, and became its president in 1837. In 1831 he was appointed professor of anatomy at the Collège de France. A pioneer of scientific pharmacology, he used vivisection to conduct trials on plant poisons, and through such researches he introduced into medicine the range of plant-derived compounds now known as alkaloids, many of which possess outstanding pharmacological properties. He investigated the role of proteins in human diet, was interested in olfaction and inquired into the white blood cells. He worked extensively on the nerves of the skull and the paths of the spinal nerves. His numerous works include the *Elements of Physiology* (1816–17). He is often regarded as the founder of experimental physiology.

Magician, Simon the *See* SIMON MAGUS

Maginot, André Louis René 1877–1932
French politician
Born in Paris, he was first elected to the Chamber of Deputies in 1910. As Minister of War (1922–24, 1926–31) he pursued a policy of military preparedness, and ordered the construction on the Franco-German border of the famous Maginot line of fortifications, comprising concealed weapons, underground stores and living quarters. However, in World War II, the German strategy of invading through Belgium made the scheme redundant, and its name has since become a euphemism for a useless form of defence.

Magliabechi, Antonio 1633–1714
Italian bibliophile
Born in Florence, he was a goldsmith by trade but slowly turned to books. His learning and his memory were prodigious and precise. In 1673 he was appointed court librarian by the Grand Duke of Tuscany. His vanity and intolerance involved him in bitter literary squabbles. His library of 30,000 volumes, bequeathed to the Grand Duke, is now a free library named after him.

Magnus, St *See* MAGNUS ERLENDSSON

Magnus I Olafsson, *called* **the Good** 1024–47
King of Norway and of Denmark
The illegitimate son of King OLAF II HARALDSSON (St Olaf), he was named after Emperor CHARLEMAGNE. After St Olaf's death at the Battle of Stiklestad (1030), the boy went to Prince Jaroslav the Wise in Kiev. In 1035 he assumed the Norwegian throne by popular acclaim. He inherited the Danish throne in 1042, and won a notable victory over the Wends in 1043 at Lürschau Heath in southern Jutland. In 1045 he agreed to share the throne of Norway with his uncle HARALD III SIGURDSSON, and died two years later during a campaign in Denmark.

Magnus III Olafsson, *called* **Barfot ('Barefoot')** c.1074–1103
King of Norway
One of the last of the Norse Viking sea-kings bent on strengthening Norway's hold over her North Sea territories, he was the son of King OLAF III HARALDSSON. He became king in 1093 and attacked the Hebrides, Orkney and Shetland (1098–99). In 1102–03 he led another punitive naval expedition west to Scotland and Ireland. He took Dublin, and built new fortifications in the Isle of Man, but was killed in an ambush in Ulster. He earned his nickname because he abandoned Norse trousers in favour of the Scottish kilt.

Magnus V Erlingsson 1156–84
King of Norway
The son of Earl Erling the Crooked, he became king in 1162 and was raised to the throne, under his father's regency, as a child. In 1164 he was crowned by Archbishop Eystein at a church ceremony in Bergen, the first religious coronation in Norway. After his father's death (1179) he was engaged in a long war against a rival claimant to the throne, the Faroese-born usurper SVERRIR SIGURDSSON and was forced to flee to Denmark for safety. He died in a naval battle in an attempt to regain his kingdom.

Magnus VI Haakonsson, *called* **Lagabøter ('Law-Reformer')** 1238–80
King of Norway
He was the son of HAAKON IV HAAKONSSON, and succeeded to the throne (1263) when his father died in Orkney on his return to Norway after the Battle of Largs. He made peace with King ALEXANDER III of Scotland and ceded the Western Isles and the Isle of Man. Under him the Church became virtually independent, and Norwegian maritime trade flourished. He revised and standardized the laws of the land in a series of legal codes, from which he earned his nickname, and which were based on the 'four sisters' of Mercy, Truth, Fairness and Peace.

Magnus VII (of Norway) *See* MAGNUS ERIKSSON

Magnus Eriksson 1316–74
King of Sweden, and King of Norway as Magnus VII
He was the son of Duke Erik Magnusson of Sweden and Ingeborg, the daughter of King Haakon V of Norway (1270–1319). He inherited the throne of Norway from his grandfather at the age of three (1319), and was elected to the Swedish throne the same year on the deposition of his treacherous uncle, Birger Magnusson (1280–1321). A regency controlled both kingdoms until 1332. In 1335 he married Blanche of Namur, by whom he had two sons. He handed over the Crown of Norway to his younger son, Haakon VI (1355), and was temporarily deposed in Sweden (1356) by his elder son, Erik (XII). After Erik's death (1359) he returned to power, but lost the strategic Baltic island of Gotland (1361) to an invasion by King Valdemar IV Atterdag of Denmark, and was again deposed (1364), in favour of his nephew, Albert of Mecklenburg. He was imprisoned from 1364 to 1371, and died in a shipwreck. He is associated with a code of law which covered the whole of Sweden and which remained in force until the 18th century.

Magnus Erlendsson, *known as* **St Magnus** c.1075–1116
Earl of Orkney
Early in the 12th century, the Norse earldom of Orkney was shared by Magnus and his cousin, Earl Haakon. After years of feuding, they agreed to hold a peace-meeting on the island of Egilsay in 1116. Haakon treacherously broke the terms of the truce, took Magnus prisoner, and had him executed. The manner of Magnus's death suggested martyrdom, and soon miracles were reported. In his honour, his nephew Earl Rognvald Kali built St Magnus's Cathedral in Kirkwall, where his relics were discovered in 1919. His feast day is 16 April.

Magnus Maximus d.388 AD
Roman emperor
He was a Roman army commander in Britain who, after being proclaimed emperor by his troops in AD 383, crossed to Gaul and overthrew the emperor of the West, GRATIAN. Recognized as emperor by the Emperor of the East, THEODOSIUS I, THE GREAT, who was then preoccupied with problems nearer home, Maximus proceeded to rule over Gaul, Spain and Britain. His attempts to

add Italy to his empire backfired, as Theodosius defeated him in battle and had him executed.

Magnus, Heinrich Gustav 1802–70
German physicist
Born in Berlin, he went to the University of Berlin in 1822, was awarded a doctorate five years later for a dissertation on tellurium, and then moved to Sweden to work under JÖNS BERZELIUS. He returned to Berlin in 1828 and turned towards physics, becoming professor of technology and physics at the University of Berlin in 1845. He worked on a wide range of topics including thermoelectricity, electrolysis, optics, mechanics, magnetism, fluid mechanics and aerodynamics. Working in this last field in 1853, he discovered and evaluated the Magnus effect – the sideways force experienced by a spinning ball, which is responsible for the swerving of golf or tennis balls when hit with a slice.

Magnússon, Eiríkur 1833–1913
Icelandic philologist and scholar
Born in eastern Iceland, he became librarian of Cambridge University, England. Among the many classical Icelandic texts he edited and translated was JÓN ARASON's monumental collection of folk tales (*Legends of Iceland*, 1864–66). He also collaborated with WILLIAM MORRIS in a notable series of Saga translations, including *Grettis Saga* (1869), *Volsunga Saga* (1870) and *The Saga Library* (5 vols, 1891–95).

Magnusson, Magnus 1929–2007
Scottish journalist and broadcaster
Born in Reykjavík, Iceland, he was raised in Edinburgh and educated at the Edinburgh Academy and Oxford. He entered journalism in 1953 with the *Scottish Daily Express*, later becoming assistant editor of *The Scotsman* (1961–67). As a broadcaster, his wide historical and cultural interests informed such television series as *Chronicle* (1966–80), *BC: The Archaeology of the Bible Lands* (1977) and *Vikings!* (1980), although he was best known as quizmaster of the long-running *Mastermind* (1972–97). A dedicated public servant, he was Rector of Edinburgh University (1975–78), chairman of the Ancient Monuments Board for Scotland (1981–89) and chairman of Scottish Natural Heritage (1992–96). His numerous publications and translations include *Introducing Archaeology* (1972), *Treasures of Scotland* (1981) and *Scotland: The Story of a Nation* (2000). He was editor of the fifth edition of *Chambers Biographical Dictionary* (1990) and of *The Nature of Scotland* (1991). In 1989 he was awarded an honorary knighthood.

Magoun, Horace Winchell 1907–91
US neuroscientist
Born in Philadelphia, he studied at Rhode Island State College and received his PhD from Northwestern University Medical School in 1934, remaining there as assistant professor (1934–37) and professor of microanatomy (1937–50). In 1950 he moved to the School of Medicine at UCLA as professor of anatomy. He demonstrated the important role of the hypothalamus, and was a pioneer in the development of the field of neuroendocrinology. Later he studied the factors which control sleep, wakefulness, awareness and other components of higher nervous activity, and his 1963 publication *The Waking Brain* summarizes much of his work on brain–endocrine interactions. He collaborated on many neurological and psychopharmacological projects and was one of the leaders in the creation of neuroscience, the multidisciplinary approach to the study of the nervous system.

Magritte, René François Ghislain 1898–1967
Belgian Surrealist painter
Born in Lessines, Hainault, he moved in 1913 to Charleroi after his mother committed suicide. He was educated at the Académie Royale des Beaux-Arts (1916–18) in Brussels. He became a wallpaper designer and commercial artist and in 1924 a leading member of the newly formed Belgian Surrealist group. He made his name with *The Menaced Assassin* (1926, Museum of Modern Art, New York) but after a badly received one-man show in Brussels (1927), he lived in Paris until 1930, and became associated with ANDRÉ BRETON and others there. Apart from a brief Impressionist phase in the 1940s, Magritte remained faithful to Surrealism, using Freudian symbols and recurring motifs of dreamlike incongruity, as in *Rape*, in which he substitutes a torso for a face. His best-known paintings include *Man with a Newspaper* and *The Reckless Sleeper* (1928), *The Red Model* (1935, Pompidou Centre, Paris), *The Wind and the Song* (1928–29) and *The Human Condition* (1, 1934; 2, 1935). In 1957 he designed the mural *La Fée Ignorante* for the Palais des Beaux-Arts in Charleroi, and in 1961 the mural *Les Barricades Mystérieuses* for the Palais des Congrès, Brussels. He was acclaimed in the USA as an early innovator of the Pop Art of the 1960s. 🕮 Richard Calvocoressi, *Magritte* (1990)

Mahan, Alfred Thayer 1840–1914
US naval historian
Born in West Point, New York, he served in the US navy (1854–1896), and in 1906 was given the rank of rear admiral retired. In works such as *The Influence of Sea Power upon History, 1600–1812* (3 vols, 1890–92), he argued for the strategic importance of naval power in determining a nation's strength and position in international politics. His theories were greatly admired in the USA, Great Britain, Japan and Germany, and were a major cause of the worldwide naval build-up that preceded World War II. He also wrote biographies of HORATIO NELSON, DAVID FARRAGUT and other naval figures.

Mahap, Walter *See* MAP, WALTER

Maharaj Ji, *also known as* **Maharaji**, *originally* **Prem Pal Singh Rawat** 1957–
Indian guru
He was born in India and succeeded his father as Perfect Master of the Divine Light Mission when still a teenager. The movement has an ecstatic and erotic devotion to Krishna and attracted a large following in the West. On moving to the USA in 1971, he adopted an increasingly lavish lifestyle while the movement lost much of its original Hindu ethos. Many Eastern followers grew disillusioned and links with the Indian ashrams were severed in 1974. There remains a reduced but devoted following for the cult, now known as Elan Vital, based in the USA. 🕮 Ruth Tucker, *Strange Gospels* (1989)

Maharishi Mahesh Yogi, *originally* **Mahesh Prasad Varma** 1911–
Indian cult leader
He was born in Jabalpur and abandoned his scientific studies to become a follower of guru Dev. He founded the science of creative intelligence and, as an exponent of the relaxation technique called transcendental meditation, he became one of the first Eastern gurus to attract a Western following, notably THE BEATLES who travelled to meditate with him in 1968. He first introduced his Hindu meditation technique, based on a literalist interpretation of yogic concepts and the use of mantras, to the West in 1958, and went on to found the Spiritual Regeneration movement, aimed at saving the world through meditation. This concept developed into a worldwide network of meditation centres with an estimated four million practitioners.

Mahathir bin Mohamad, Datuk Seri 1925–
Malaysian politician
Born in Alur Setar, in Kedah state, he practised as a doctor (1957–64) before being elected to the House of Representatives as a United Malays' National Organisation (UMNO) candidate. He won the support of UMNO's radical youth wing through his advocacy of 'affirmative action' in favour of bumiputras (ethnic Malays) and a more Islamic social policy. After holding several ministerial posts he was appointed UMNO leader and prime minister in 1981, immediately launching a new 'look east' economic policy, which sought to emulate Japanese industrialization. Despite internal ethnic conflicts, he was re-elected in 1982, 1986, 1990, 1995 and 2000, stepping down in 2003.

Mahdi, al- *See* MUHAMMAD AHMED

Mahfouz or **Mahfuz, Naguib** 1911–2006
Egyptian novelist and Nobel Prize winner
Born in the al-Gamaliyya old quarter of Cairo, he studied philosophy at King Fuad I (now Cairo) University. He worked in university administration, then for the government's Ministry of Waqfs (religious foundations) and in journalism. He started writing as a boy and by 1939 had already written three novels, among them *Kifah Tiba* (1944, 'The Struggle of Thebes'). He later began work on *Al-Thulathiya* (1956–57, 'The Cairo Trilogy'), a monumental, partially autobiographical work about three generations of an Egyptian family between the two World Wars. His controversial novel *Awlad Haratina* (1967, Eng trans *The Children of Gebelawi*, 1981) was serialized in the newspaper *al-Ahram*. An allegorical work which shows his disillusionment with religion, it depicts average Egyptians living the lives of CAIN and ABEL, MOSES, JESUS CHRIST and MUHAMMAD, and portrays the decline of five communities towards futility and nihilism. It was banned throughout the Arab world, except in Lebanon. He subsequently became more interested in the plight of the individual, as in *Al-Liss wa-l-Kilab* (1961, 'The Thief and the Dogs'), *Al-Shahhadh* (1965, 'The Beggar') and *Miramar*

Mahler, Gustav 1860–1911
Czechoslovakian-born Austrian composer

Gustav Mahler was born in Kalist in Bohemia (now the Czech Republic). He began to learn the piano at an early age, and in 1875 he went to the Vienna Conservatory, where he studied composition and conducting. He became a follower of ANTON BRUCKNER, although he was not his pupil. He wrote the cantata *Das klagende Lied* for the Beethoven Prize in 1881, but was unsuccessful. He then turned to conducting, rapidly reaching important positions in Prague, Leipzig, Budapest and Hamburg, where in 1891 he became chief conductor of Hamburg Opera. There he introduced several new works and took the company on tour, which resulted in his only visit to London (1892). In 1897 he became conductor and artistic director at the Vienna State Opera House, where he established the high standards for which that theatre has since become famous.

In 1902 Mahler married Alma Schindler (1879–1964), who played an important part in his life and published his letters and other documents and reminiscences after his death. They had two daughters, of whom the elder died in 1907 at the age of four. Mahler detested the intrigues of theatrical life and was much affected by the frequent personal attacks upon him for his Jewish birth, despite (or perhaps because of) his conversion to Roman Catholicism, and he resigned after ten years to devote himself to composition and the concert platform. From 1908 to 1911 he was conductor of the New York Philharmonic Society, spending his summers composing in Austria.

His mature works consist entirely of songs and symphonies. He wrote nine numbered symphonies, one requiring a solo voice and three requiring choral forces, plus the song symphony *Das Lied von der Erde*, which he did not include in the nine for superstitious reasons (BEETHOVEN, SCHUBERT and Bruckner having all died after completing nine); in the end he too left a tenth symphony unfinished. He also wrote songs with orchestral accompaniment, notably *Kindertotenlieder* (1901–04, 'Songs on the Death of Children'), based on poems by the German poet and scholar Friedrich Rückert (1788–1866).

In his lifetime and for many years after, Mahler was known principally as a conductor; more recently, his compositions have gained enormous popularity in Europe and the USA, and many of his works are now regarded as part of the central orchestral repertoire. He is an important bridge between the late Romantic 19th-century style and the revolutionary works of SCHOENBERG and his followers.

🕮 Alma Mahler's edition of documents has been published in an English edition by D Mitchell and K Hartner, *Alma Mahler: Memories and Letters* (3rd edition, 1975). There is an important memoir of Mahler written by his pupil, the conducter Bruno Walter, published in an English translation (New York, 1941). See also D Cooke, *Gustav Mahler, An Introduction to his Music* (1980); D Mitchell, *Gustav Mahler* (3 vols: I (2nd edition), 1980; II, 1975; III 1985); M Kennedy, *Mahler* (1974).

> 'A symphony must be like the world, it must embrace everything.'
>
> – In conversation with SIBELIUS. Quoted in Ian Crofton and Donald Fraser, *A Dictionary of Musical Quotations* (1985).

(1967, Eng trans 1978). Described as 'a DICKENS of the Cairo cafés' and 'the BALZAC of Egypt', he won the Nobel Prize in literature in 1988, the first Arab to receive the award. His work is still unavailable in many Middle Eastern countries on account of his outspoken support for President SĀDĀT's Camp David peace treaty with Israel in 1978. In 1994 Islamic militants tried to stab him to death, but he survived. Later works include *Asda al-sira al dhatiyya* (1996, 'Echoes of an Autobiography'). 🕮 Trevor Le Gassick (ed), *Critical Perspectives on Naguib Mahfouz* (1991)

Mahler, Gustav *See panel above*

Mahmud II 1785–1839
Ottoman Sultan of Turkey
Born in Constantinople (Istanbul), he succeeded his brother Mustafa IV in 1808. His reign saw the loss to Russia of Bessarabia; the independence of Greece and Serbia; and the autonomy of Egypt under MEHEMET 'ALI. At home he increased central control over the provinces, curbed the power of the religious leaders (ulama), and set up European-type schools. He suppressed the corps of janissaries, replacing it with a new regular army on the European model.

Mahmud of Ghazni 971–1030
Muslim Afghan conqueror of India
The son of Sebüktigin, a Turkish slave who became ruler of Ghazni (modern Afghanistan), he succeeded to the throne in 997. He invaded India 17 times (1001–1026), and created an empire that included the Punjab and much of Persia. A great patron of the arts, he made Ghazni a remarkable cultural centre.

Mahon, Derek 1941–
Northern Irish poet
Born in Belfast, he was educated at Belfast Institute and Trinity College, Dublin. He was associated with the Northern Poets in Belfast in the 1960s, with SEAMUS HEANEY and Michael Longley (1939–). A poet drawn to squalid landscapes and desperate situations, he acknowledges LOUIS MACNEICE and W H AUDEN among his influences. His poetry collections include *Twelve Poems* (1965), *Night-Crossing* (1968), *The Snow Party* (1975), *The Hunt by Night* (1982), *Antarctica* (1985) and *Harbour Lights* (2005). His *Collected Poems* appeared in 1999. He has also published translations and screenplays. 🕮 Introduction to the *Penguin Book of Contemporary Irish Poetry* (1990)

Mahony, Francis Sylvester, *pseudonym* **Father Prout** 1804–66
Irish priest and humorist
Born in Cork, he became a Jesuit priest, but was expelled from the order for a late-night frolic and was ordained a priest at Lucca in 1832. He moved to London in 1834 and gave up the priesthood for journalism and poetry, and contributed to *Fraser's Magazine* and *Bentley's Miscellany*. He is remembered as author of the poems 'The Bells of Shandon' and 'The Lady of Lee'. 🕮 C Kent, memoir in *Works* (1881)

Mahony, Marion Lucy, *married name* **Griffin** 1871–1961
US architect and designer
Born in New York of Irish parentage, she was one of the first two women to receive a degree in architecture from the Massachusetts Institute of Technology. She worked in FRANK LLOYD WRIGHT's Oak Park Studios until 1909 and became his chief draftsman, completing many of his commissions and designing several of her own. Wright's work was published in 1910, and of 27 attributable drawings, 17 were Mahony's and the other ten were the joint work of Mahony and others. In 1911 Mahony married WALTER BURLEY GRIFFIN, a colleague in Wright's office, and it was she who produced the drawings with which her husband won the Canberra competition in 1912. In 1916 Wright included two Decatur Houses in an exhibition of his work which were entirely Mahony's work, but she was shunned by Wright in later years, though she did inherit some of his commissions when he left for Europe.

Maiden, Joseph Henry 1859–1925
Australian botanist
Born in London, England, he was educated at the University of London. In 1880 he emigrated to Australia, and from 1896 to 1924 was director of the Sydney Botanic Gardens and Government Botanist of New South Wales. A prolific writer, he published many scientific papers and books, including *The Useful Native Plants of Australia* (1889), *Australian Economic Botany* (1892), *The Forest Flora of New South Wales* (8 vols, 1902–24), *A Census of New South Wales Plants*, and his greatest work, *A Critical Revision of the Genus Eucalyptus* (1903–33).

Maier, Hermann 1972–
Austrian skier
Born in Flachau, he worked as a bricklayer before winning a place with the Austrian national ski team. He rose rapidly to the top of the sport, winning his first World Cup race in 1997 and two gold medals in the slalom at the Winter Olympics at Nagano in 1998, and going on to capture the overall World Cup title that year. Further World Cup titles followed in 1998, 2000 and 2001, confirming Maier's status as the dominant figure in men's World Cup skiing. Injuries sustained in a motorcycle accident meant that he was unable to defend his title in 2002 but he recovered sufficiently to win the 2004 World Cup title and a gold in the giant slalom at the 2005 World Championships.

Mailer, Norman Kingsley 1923–
US novelist and journalist
Born in Long Branch, New Jersey, he was brought up in Brooklyn, educated at Harvard University, and during World War II served in the Pacific. His first novel *The Naked and the Dead* (1948), an anti-war blast and social satire, became a bestseller, establishing him as a leading novelist of his generation. He maintained his antagonism towards contemporary society in *Barbary Shore* (1951) and *The Deer Park* (1955), but his writing of this period documents his gradual ideological shift from liberal socialism to a kind of anarchistic libertarianism. A proponent of the 'New Journalism', using novel-writing techniques to portray real people and events, he has created a vast body of work. As a polemicist, campaigner and protester he was prominent throughout the 1960s, publishing *An American Dream* (1965), *Why Are We In Vietnam?* (1967) and *Armies of the Night* (1968, winner of a National Book award and the Pulitzer Prize). Subsequent books include *The Executioner's Song* (1979, Pulitzer Prize), *Ancient Evenings* (1983), *Harlot's Ghost* (1991), an account of the CIA from the end of World War II to the assassination of JOHN F KENNEDY, *The Spooky Art* (2003), a book about writing, and the novel *The Castle in the Forest* (2007). He published two biographical works in 1995, *Oswald's Tale* – a study of the life of LEE HARVEY OSWALD – and *Portrait of Picasso as a Young Man*. He has also been active as a screenwriter, film director and actor, with such works as *Tough Guys Don't Dance* (1987, from his 1984 thriller with the same title). In 2005 he was awarded the National Book Medal for Distinguished Contribution to American Letters. 🕮 Mary V Dearborn, *Mailer: A Biography* (1999)

Maillart, Ella Kini 1903–97
Swiss travel writer
Born in Geneva, she represented Switzerland in the 1924 Olympic Games in Paris in the single-handed sailing competition, captained the Swiss ladies hockey team in 1931 and skied for her country from 1931 to 1934. She crossed Russian Turkestan in 1932 and wrote of her tribulations in both French and English. In 1934, working as a journalist for *Petit Parisien*, she went to Mongolia to report on the Japanese invasion and returned via Peking (Beijing) across Tibet and into Kashmir with PETER FLEMING, described in *Oasis interdites* (1937, Eng trans *Forbidden Journey*, 1937). She worked and journeyed in Iran and Afghanistan, and then spent the period 1939–45 living in an ashram in southern India under the tutelage of Sri RAMANA. She was one of the first travellers into Nepal when it opened in 1949, and wrote *The Land of the Sherpas* (1955). She later worked as a travel guide, and spent six months of each year in Switzerland.

Maillart, Robert 1872–1940
Swiss civil engineer
Born in Berne, he studied at the Zurich Polytechnic (1890–94), worked with FRANÇOIS HENNEBIQUE, then set up on his own in 1902. He was one of the first to realize the economic and aesthetic advantages of three-hinged reinforced-concrete arch bridges in the Swiss Alps, designing some remarkable examples, from the bridge over the Inn at Zuoz (1901) to the spectacular curving Schwandbach Bridge at Schwarzenburg (1933). He also designed many industrial buildings in which he employed the so-called 'mushroom' column supporting a flat two-way reinforced floor slab.

Maillol, Aristide Joseph Bonaventure 1861–1944
French sculptor
Born in Banyuls-sur-Mer, he studied at the École des Beaux-Arts in Paris, and spent some years designing tapestries. The latter half of his life was devoted to sculpting female nudes, such as the *Three Graces*, *Mediterranean*, *Crouching Woman* (c.1901, Museum of Modern Art, New York) and *The Mountain* (1937), in a style of monumental simplicity and classical serenity.

Maiman, Theodore Harold 1927–2007
US physicist
He was born in Los Angeles, and after military service in the US navy, studied engineering physics at Colorado and Stanford universities, then joined the Hughes Research Laboratories in Miami in 1955. The maser (producing coherent microwave radiation) had been devised and constructed in 1953 by CHARLES TOWNES (and independently by NIKOLAI BASOV and ALEKSANDR PROKHOROV in the USSR in 1955). Maiman made some design improvements to the solid-state maser, and turned to the possibility of an optical maser, or laser (Light Amplification by Simulated Emission of Radiation). He constructed the first working laser in the Hughes laboratories in 1960. Lasers have found use in a variety of applications in scientific research, surgery, industry, retail and leisure. He received the Japan Prize in 1987, and published his autobiography *The Laser Odyssey* in 2000.

Maimonides, Moses, *originally* **Moses ben Maimon** 1135–1204
Jewish philosopher
Born in Córdoba, Spain (then ruled by the Moors), he studied Greek medicine and Aristotelian philosophy. He moved to Egypt where he settled in Cairo about 1165 and became physician to SALADIN, and head of the Jewish community. The foremost figure of medieval Judaism, he wrote an important commentary in Hebrew on the Mishna (Jewish code of law), but his other main writings are in Arabic. His greatest work is the *Guide to the Perplexed* (1190), which argued for the reconciliation of Greek philosophy and Judaism. He had an enormous influence on a range of philosophers and traditions, Jewish, Muslim and Christian. 🕮 Solomon Zeitlin, *Maimonides* (2nd edn 1955)

Mainbocher, *originally* **Main Rousseau Bocher** c.1890–1976
US fashion designer
He was born in Chicago, where he studied and worked. After World War I, he stayed on in Paris, eventually becoming a fashion artist with *Harper's Bazaar* and, later, editor of French *Vogue* until 1929. He started his couture house in Paris in 1930. One of his creations was the wedding dress of Mrs WALLIS SIMPSON, the Duchess of Windsor (1937). He opened a salon for ready-to-wear clothes in New York in 1940, but returned to Europe in 1971.

Maintenon, Françoise d'Aubigné, Marquise de, *known as* **Madame de Maintenon** 1635–1719
French queen
The second wife of LOUIS XIV and granddaughter of the Huguenot Théodore Agrippa d'Aubigné (1552–1630), she was born in Niort, Poitou. She was converted to Roman Catholicism in her teens, and in 1652 she married the crippled poet PAUL SCARRON, whose death (1660) left her penniless. In 1669 she was appointed governess of the two illegitimate sons of her friend the Marquise de MONTESPAN by Louis XIV, and she became the king's mistress. In 1674, with his help, she bought the estate and marquisate of Maintenon. After the death of Queen Maria Theresa in 1683, Louis secretly married Madame de Maintenon, and she was accused of influencing him, particularly over the persecution of Protestants after the revocation of the Edict of Nantes (1685). She encouraged piety and dignity at court and her letters are still very interesting to read. After Louis's death (1715), she retired to a home for poor noblewomen which she had founded in 1680 at Saint-Cyr. 🕮 Mme Saint-René Taillandier, *Madame de Maintenon* (1920, Eng trans 1922)

Mairet, Ethel 1872–1952
English weaver
After visiting Ceylon (now Sri Lanka) between 1903 and 1906, she worked with CHARLES ROBERT ASHBEE and the Guild of Handicrafts. She started weaving in Devon in 1911 and, after marrying Philip Mairet (her second husband), established the workshop 'Gospels' based at Ditchling in Sussex. Gospels became a creative centre for many weavers from all over the world. Her writing revealed a desire for rethinking the educational approach to handweaving and a reassessment of its relationship to power loom production.

Maisonneuve, Paul de Chomeday, Sieur de 1612–76
French colonial administrator
Born in Neuville-sur-Vannes, France, he was chosen in 1641 by the Company of Notre-Dame de Montreal to establish a new settlement in Canada. As commander of a detachment of French soldiers, he landed on the island of Montreal in 1642 and founded the city of Ville Marie, later called Montreal. He served as the city's first governor (1642–63).

Maistre, Joseph Marie, Comte de 1753–1821
French political philosopher and diplomat
Born in Chambéry, he emigrated to Switzerland during the French Revolution (when Savoy was annexed), but became ambassador to St Petersburg (1803–17) for VICTOR EMMANUEL I (King of Piedmont-Sardinia), and later Minister of State of Sardinia. He was hostile to all liberal and democratic thought and defended a doctrine of the divine right of kings. He was the brother of XAVIER DE MAISTRE.

Maistre, Xavier, Comte de 1763–1852
French novelist, painter and soldier
Born in Chambéry, he was exiled after the French occupation of Savoy (1798), and joined the Russian army, becoming a general.

He spent most of the rest of his life in Russia, publishing several appealing works, such as *Voyage autour de ma chambre* (1794, 'Journey around my Room'), describing a period of imprisonment, and *Les Prisonniers du Caucase* (1825, 'The Prisoners of the Caucasus') and *La Jeune Sibérienne* (1825, 'The Young Siberian Woman'). He was the brother of the political philosopher JOSEPH MARIE, COMTE DE MAISTRE. 🕮 A Berthier, *Xavier de Maistre* (1921)

Maitland, Frederic William 1850–1906
English legal historian
Educated at Eton College and Trinity College, Cambridge, he became a barrister (1876), Reader in English law at Cambridge (1884) and Downing professor (1888). He wrote a *History of English Law before Edward I* (1895, with Sir FREDERICK POLLOCK), *Domesday Book and Beyond* (1897), and other works on legal antiquities and history, and edited several volumes of legal records. He was one of the creators of English legal history.

Maitland, Sir Richard, *known as* **Lord Lethington** 1496–1586
Scottish lawyer and poet
He studied at the University of St Andrews, became a Lord of Session in 1551, and (after losing his sight in 1561) Lord Privy Seal in 1562, becoming known for his moderation and integrity. His poems – mostly lamentations for the poor state of his country – were published in 1830 by the Maitland Club. He made a collection of early Scottish poetry, now forming two manuscript volumes, which are in the Pepysian collection at Cambridge. He also wrote a *Historie of the Hous of Seytoun*.

Maitland, William, *known as* **Secretary Lethington** c.1528–1573
Scottish politician
The son of Sir RICHARD MAITLAND, in 1558 he became Secretary of State to the queen-regent, MARY OF GUISE. He represented MARY, QUEEN OF SCOTS at the court of ELIZABETH I, but aroused her hostility by his connivance at DAVID RIZZIO's murder in 1566. He was also privy to the assassination of Lord DARNLEY and was one of the commissioners who presented to Elizabeth an indictment of Mary in 1568. Accused of plotting against his colleagues, he was jailed in Edinburgh Castle and died in prison at Leith.

Major, John 1943–
English Conservative statesman
He was born in Merton, south-west London, the son of a trapeze performer, and educated at Rutlish Grammar School. He started a career in banking but his interest in politics grew and he eventually won a Commons seat, as Conservative MP for Huntingdonshire, in 1979. He entered MARGARET THATCHER's government as a junior Minister in 1981 and rose to become Treasury Chief Secretary, under Chancellor NIGEL LAWSON, in 1987. Thereafter, having caught the eye of the prime minister, his progress was spectacular. In the summer of 1989 he replaced Sir GEOFFREY HOWE as Foreign Secretary, in controversial circumstances, and in the autumn of the same year, even more surprisingly, returned to the Treasury as Chancellor of the Exchequer, when Lawson dramatically resigned. He remained loyal to Thatcher in the first round of the 1990 Conservative Party leadership election. When she stood down, he ran successfully against MICHAEL HESELTINE and DOUGLAS HURD to become prime minister, thus completing one of the swiftest rises to power of recent times. Despite the country's deepening recession and Labour's improving showing in the opinion polls, he remained in power after the 1992 general election. However, when his party succumbed to the Labour landslide victory of 1997, Major immediately resigned the leadership. He was made Companion of Honour in 1999. He published his autobiography in 1999 and stood down as an MP at the 2001 general election. 🕮 Terry Major-Ball, *Major Major: Memories of an Older Brother* (1994)

Major, Dame Malvina Lorraine 1943–
New Zealand operatic soprano
She was born in Hamilton and studied in Auckland with Dame Sister Mary Leo, teacher of KIRI TE KANAWA, and at the London Opera Centre. She won the KATHLEEN FERRIER Scholarship in 1966 and made her international debut as Rosina in *The Barber of Seville* in Salzburg in 1968. She went back to New Zealand in 1970, took leading roles around the country, including Constanze opposite Inia te Wiata in *Die Entführung aus dem Serail* ('The Abduction from the Seraglio'), and had two successful television series. Returning to the international scene in 1985 in *La Finta giardiniera* ('The Feigned Gardener') in Brussels, she then toured as Donna Anna in *Don Giovanni* with the Australian Opera (1987–88). She was made DBE in 1991.

Makarios III, *originally* **Mihail Christodoulou Mouskos** 1913–77
Cypriot Orthodox archbishop and statesman
Born in Pano Panayia, he was ordained priest in 1946, elected Bishop of Kition in 1948, and became archbishop and primate in 1950. Suspected of collaborating with anti-British (EOKA) guerrilla forces, he was exiled to the Seychelles by the colonial government, later lived in Athens, but returned after a 1959 agreement that gave Cyprus independence and made Makarios head of state as the first president of the Republic of Cyprus. He had to cope with a restive Turkish Muslim minority, fellow bishops who criticized his dual role, and a small but active Communist presence which Makarios was not above using for his own ends. A short-lived coup put his life in danger and removed him briefly from leadership in 1974, but he was reinstated in 1975. On his death the posts of archbishop and head of state were separated, thus closing a chapter of Byzantine history that had somehow lingered into the 20th century. 🕮 Stanley Mayes, *Makarios* (1981)

Makarova, Natalia 1940–
Russian dancer
Born in Leningrad (now St Petersburg), she studied there, joining the Kirov in 1959 and becoming one of their star dancers. She defected to the West in 1970, while on tour in London, and established herself as one of the best-known dancers of the 1960s and 1970s, particularly in the title role of *Giselle* (1961). Establishing herself with American Ballet Theater in New York from 1970, she often guested with the Royal Ballet, Covent Garden and other international companies. While specializing in the classics, she also created roles for contemporary choreographers like ANTONY TUDOR, GLEN TETLEY and GEORGE BALANCHINE. Her work as producer includes *La Bayadère* (1980) for American Ballet Theater, and *The Kingdom of the Shades* (1985) and *Swan Lake* (1988), both for London Festival Ballet. In London in 1988 she became the first dancer in exile to guest with her home company, the Kirov. Her publications include *A Dance Autobiography* (1979) and *On Your Toes* (1984).

Makeba, Miriam 1932–
US singer
She was born in Johannesburg, South Africa, but was exiled because of her political views. After settling in the USA she became widely known in the 1960s as 'the empress of African song', making concert tours and recording several albums. She was the first African performer to gain an international following and played a vital role in introducing the sounds and rhythms of traditional African song to the West, notably with the Xhosa song 'Qongqothwane (The Click Song)'. Her marriage to the militant black leader STOKELY CARMICHAEL in the late 1960s effectively ended her career in the USA, as she was declared persona non grata; she moved to Guinea and virtually disappeared from the international concert arena, emerging only to take part in special, politically oriented events. Her marriage over, she re-emerged in the 1980s as awareness of the political situation in South Africa grew, joining PAUL SIMON's *Graceland* tour in 1987–88 and publishing her autobiography, *Makeba: My Story* in 1988. In 1990 she returned to South Africa after 30 years in exile and resumed her recording career. She began a lengthy international farewell tour in 2005.

Makhmalbaf, Mohsen 1957–
Iranian film director
Born in Tehran, as a young man he was a militant Islamic opponent of the Shah, and was imprisoned and tortured for stabbing a policeman – an incident recreated in *A Moment of Innocence* (1996) (which features both Makhmalbaf and the policeman himself). His films are widely varied in style and subject matter, but always exuberant and inventive. *Once Upon a Time, Cinema* (1992) is a phantasmagoric history of Iranian film, while *Gabbeh* (1996) creates its own legendary world to celebrate the skills and traditions of carpet weavers. *Kandahar* (2001) is a sumptuously shot indictment of the repressive policies of the Taliban regime in Afghanistan. He has co-written scripts for films by his daughter Samira (1980–), including *The Apple* (1998) and *Blackboards* (2000), and by his wife Marzieh Meshkini (1969–), including *The Day I Became a Woman* (2000).

Mäkinen, Tommi Antero 1964–
Finnish rally driver
Born in Puuppola, he began his motorsport career racing tractors, but graduated to rally driving in 1985. He was unstoppable from 1996–99, winning four successive World Rally Championships (WRC) with Mitsubishi. This tally equals

the record of fellow Finn JUHA KANKKUNEN, although Mäkinen shades the rivalry with a total of 24 WRC wins to Kankkunen's 23.

Makovecz, Imre 1935–
Hungarian architect
Born in Budapest, he was educated at Budapest Technical University where he subsequently became a professor. He established his international reputation with his design for the Hungarian Pavilion at the International Fair in Seville (1992) and has been praised for his organic but highly idiosyncratic style of architecture, often influenced by Magyar folklore and strongly spiritual in character. His other work includes designs for a range of hotel and cultural buildings in Hungary as well as for churches at Paks (1987), Siófok (1989) and Százhamlombatta (1997). 🕮 Edwin Heathcote, *Imre Makovecz: The Wings of the Soul* (1997)

Malachy, St, *also called* **St Maol Maedoc** c.1094–1148
Irish prelate and reformer
Born in Armagh, he became abbot of Bangor (1121), Bishop of Connor (1125) and, in 1134, Archbishop of Armagh. He substituted Roman for Celtic liturgy, and renewed the use of the sacraments. In 1139 he went to Rome, visiting St BERNARD at Clairvaux. On his return (1142), he introduced the Cistercian Order into Ireland. In 1148 he once more went to France, and died at Clairvaux in St Bernard's arms. The so-called 'Prophecies of St Malachy', first published in *Lignum Vitae* (1595) by the Flemish Benedictine Arnold Wion, are spurious. He was canonized in 1190 – the first papal canonization of an Irishman. His feast day is 3 November.

Malamud, Bernard 1914–86
US novelist
He was born in Brooklyn, New York, and educated at Columbia University, then taught at Oregon State University (1949–61) and Bennington College (1961–86). One of the leading US writers of the later 20th century, he wrote fiction that mingled mysticism, pessimism and gentle humour, and drew on the idiom of Jewish America. *The Natural* (1952), his first novel, used baseball as an extended metaphor for life, following the fading career of a once-promising big hitter. *The Assistant* (1957) was darker in mood, but had a warm critical reception. In *A New Life* (1961) he abandoned the close urban setting of his previous novels for the mountainous western USA, where Seymour Levin arrives at a small college to teach and analyse happiness. *The Fixer* (1966), set in Tsarist Russia, is Malamud's bleakest and most potent book, and is streaked with self-deprecating humour. Later novels include *Dubin's Lives* (1979), and *God's Grace* (1982), a prophetic, apocalyptic allegory. He was also an accomplished short-story writer; *The Stories of Bernard Malamud* was published in 1983. He won the National Book award twice, in 1959 and 1967, and the Pulitzer Prize in 1967. 🕮 J Helterman, *Understanding Malamud* (1985)

Malan, Daniel F(rançois) 1874–1959
South African politician
Born in Riebeek West, Cape Province, he was educated at Victoria College, Stellenbosch, and Utrecht University. On his return to South Africa in 1905 he became a predikant of the Dutch Reformed Church, but after ten years abandoned his clerical career to become editor of *Die Burger*, the Nationalist newspaper. He became an MP in 1918, and in 1924 in the HERTZOG Nationalist–Labour government he held the portfolios of the Interior, of Education and of Public Health. He introduced measures strengthening the Nationalist position – in particular, that of making Afrikaans an official language. He was leader of the opposition (1934–39, 1940–48), and on becoming prime minister and Minister for External Affairs in 1948, embarked on the hotly controversial policies of apartheid with the aim of re-aligning South Africa's multiracial society. The Group Areas Act divided the country into white, black and coloured zones. The apartheid legislation, which involved strongly contested constitutional changes, was met by non-violent civil disobedience at home and vigorous criticism abroad. Malan resigned from the premiership in 1954. Crusty and austere, he was a scholar of profound convictions and an uncompromising manner. He never wavered in his belief in a strict white supremacy, in a Heaven-sent Afrikaner mission and a rigidly hierarchical society. 🕮 Eric Robins, *This Man Malan* (1953)

Malatesta, Enrico 1853–1932
Italian anarchist
Born in Campania of a wealthy family, he studied medicine at Naples University but was expelled for encouraging student unrest. To demonstrate his beliefs, he gave away his personal wealth and worked as an electrician in cities around Europe, at the same time preaching anarchism and spending numerous periods in prison. He became something of a legend because of his unusually small stature and ability to escape. He settled in London in 1900, advocating peaceful opposition to authority, and in 1911 survived an attempt to deport him for alleged complicity with the Sidney Street anarchists who had killed three policemen. He returned to Italy in 1913 and died peacefully 19 years later.

Malaurie, Jean 1922–
French explorer and anthropogeographer
Born in Mainz, Germany, he studied in Paris and began his career as a research fellow and later professor in Arctic geomorphology and anthropogeography at the École des Hautes Études en Sciences Sociales, Paris, where he founded the Centre for Arctic Studies (1957–). He has led over 30 scientific expeditions to the Arctic, made several documentary films on the Inuit, and became the first European to reach the geomagnetic North Pole (1951). He has published and lectured widely and his book *The Last Kings of Thule* (1955) has been translated into 22 languages.

Malcolm I d.954
King of Scotland
He was the son of Donald II, and succeeded his cousin, Constantine II, in 943. He annexed Moray, but lost Northumbria, and was killed near Dunnottar.

Malcolm II c.954–1034
King of Scotland
He was the son of Kenneth II, and became king in 1005 after his slaughter of Kenneth III. He won a great victory over the Northumbrians at Carham (1018) and secured Strathclyde, but had to submit to the English King KNUT SVEINSSON (Canute) in 1032. He was succeeded by his grandson DUNCAN I.

Malcolm III, *called* **Canmore**, *from Gaelic* **Ceann-mor ('Great Head')** c.1031–1093
King of Scotland
He was a child when his father, King DUNCAN I, was killed by MACBETH (1040). He stayed in Northumbria with his uncle, Earl Siward, who established him (1054) in Cumbria and Lothian. In 1057, after Macbeth was killed, Malcolm became King of all Scotland. In 1069 he married MARGARET, sister of EDGAR THE ÆTHELING. He invaded England five times (1061–1093), and was killed at Alnwick. He left five sons, of whom four succeeded him, Duncan, Edgar, ALEXANDER (I) and DAVID (I).

Malcolm IV, *called* **the Maiden** c.1141–1165
King of Scotland
He was the grandson and successor (1153) of DAVID I. Compelled to restore the northern English counties to HENRY II in return for the earldom and honour of Huntingdon (1157), he served on Henry's expedition to Toulouse (1159), and was then knighted. Malcolm continued to implement David I's Normanizing policies, despite native opposition. He defeated Fergus, Lord of Galloway (1161) and Somerled, Lord of Argyll (1164). His byname was coined in the 15th century, in recognition of his well-attested reputation for chastity.

Malcolm, George John 1917–97
English harpsichordist, pianist and conductor
He was born in London and studied at Oxford and the Royal College of Music. He was Master of Music at Westminster Cathedral (1947–59), where he conducted the first performance of the Missa Brevis which BENJAMIN BRITTEN wrote specially for his choir. He acquired an international reputation as a harpsichordist, especially in the works of BACH.

Malcolm X, *originally* **Malcolm Little**, *Muslim name* **el-Hajj Malik el-Shabazz** 1925–65
US black nationalist leader
Born in Omaha, Nebraska, the son of a radical Baptist minister, he was brought up in Lansing, Michigan, and Boston. After an adolescence of violence, narcotics and petty crime, he came under the influence of ELIJAH MUHAMMAD while in prison for burglary, changed his name, and after his release in 1952 became Muhammad's chief disciple within the Black Muslims. He greatly expanded the organization's following, and became the most effective spokesman for the Black Power movement. In 1963 Malcolm was suspended from the Nation of Islam after disagreements with Muhammad and gained the profound hatred of the leader's loyal followers. Malcolm founded the Organization for Afro-American Unity, dedicated to the alliance of American blacks and other non-white peoples. In the last year of his life, following a pilgrimage to Mecca,

Malcolm announced his conversion to orthodox Islam and put forward the belief in the possible brotherhood between blacks and whites. Malcolm's extreme stance and the inflammatory nature of his oratory, which had scared many whites, appealed to many northern blacks in the urban ghettos, but had been met with criticism by moderate civil rights leaders who deplored his violent message. In 1965 Malcolm was killed in Harlem by Black Muslim assassins who retaliated against the man they viewed as a traitor.

Malebranche, Nicolas 1638–1715
French philosopher
Born in Paris, he studied theology and joined the Catholic community of Oratorians (1660), but became interested in philosophy, particularly the work of RENÉ DESCARTES. His own major work, *De la recherche de la vérité* (1674, Eng trans *Search for the Truth*), draws on Descartes's dualism of mind and body but explains all causal interaction between them by a theory of 'occasionalism' (divine intervention, governing our bodily movements and all physical events), and argues as a corollary that 'we see all things in God' since external objects cannot act directly upon us. His other works include *Traité de la morale* (1684, Eng trans *A Treatise of Morality*) and *Entretiens sur la métaphysique et la religion* (1688, 'Dialogues on Metaphysics and on Religion').

Malenkov, Giorgi Maksimilianovich 1901–79
Soviet politician
Born in Orenburg in Central Russia, he joined the Communist Party in 1920, began working for the central committee in Moscow in 1925 and was quickly selected by STALIN to serve as his personal secretary. He was involved in the collectivization of agriculture and Stalin's purges of the 1930s. From 1934 he headed the party's personnel department and during World War II was part of the five-man defence council which managed the Soviet war effort, being placed in charge of armaments. He was appointed deputy prime minister in 1946 and made a full member of the politburo, and on Stalin's death in 1953 took over as de facto party leader. This post, however, was soon assumed by NIKITA KHRUSHCHEV and a power struggle ensued. In 1955 Malenkov was forced to resign as prime minister, pleading inadequate experience and admitting responsibility for the failure of Soviet agricultural policy. He was succeeded by Marshal NIKOLAI BULGANIN and relegated to the office of Minister for Electric Power Stations, but in 1957, he was accused, with VYACHESLAV MOLOTOV and LAZAR KAGANOVICH, of setting up an 'anti-party' group, and dismissed both from the government and the party's presidium and central committee, and was sent to Kazakhstan as manager of a hydroelectric plant. He retired in 1968 and died in obscurity.

Malesherbes, Chrétien (Guillaume de Lamoignon) de 1721–94
French statesman
He was born in Paris. In 1744 he became a Counsellor of the Parlement of Paris, and in 1750 he was made chief censor of the press; he allowed the publication of the *Encyclopédie* in Paris, despite the fact that its 'privilege' (licence) had been revoked. On LOUIS XVI's accession (1774) he was made Secretary of State for the royal household. He brought about prison and legal reforms alongside ANNE ROBERT JACQUES TURGOT's economic improvements, but resigned on Turgot's dismissal (1776). Under the Convention he went to Paris to conduct the king's defence. Despite his integrity and reforming zeal, he was mistrusted as an aristocrat during the Revolution, arrested as a Royalist in 1794, and guillotined.

Malevich, Kasimir Severinovich 1878–1935
Russian painter and designer
Born and trained near Kiev, he worked in Moscow from c.1904. Around 1910 his work began to show Cubist and Futurist influences; however, he was above all interested in developing a totally non-objective art, and in Moscow c.1913 he launched Suprematism, a movement dedicated to the expression in painting of the absolute purity of geometrical forms. The austerity of the earliest Suprematist works had given way by 1917 to less rigid compositions, with a greater colour range and a suggestion of three-dimensional space; in 1918–19, however, he returned to his early ideals with the *White on White* series. After this he virtually stopped producing abstract paintings, and concentrated on expounding his theories through writing and teaching, first at Vitebsk, where he was highly influential, and later in St Petersburg, where he lived from 1922. In 1926 he published *Die gegenstandlose Welt* ('The Non-Objective World'), in which he outlined his theories.

Malherbe, François de 1555–1628
French poet
Born in Caen, he ingratiated himself with HENRY IV, and received a pension. He founded a literary tradition, 'Enfin Malherbe vint', and led his countrymen to disdain the richly coloured verses of PIERRE DE RONSARD, and to adopt a clear, refined, but prosaic style. He was an industrious writer, producing odes, songs, epigrams, epistles, translations and criticisms. 🕮 R Fromilhague, *La vie de Malherbe* (1954)

Malibran, Marie Felicita, *née* **Maria García** 1808–36
Spanish mezzo-soprano
Born in Paris, she was the daughter of the Spanish singer MANUEL GARCÍA, who was her most important teacher, and sister of PAULINE VIARDOT-GARCÍA. She made her operatic debut in London in 1825, and went on to become the most famous female singer of her time. Divorcing her first husband in 1836, she remarried, but died the same year following a fall from a horse.

Malik, Yakob Aleksandrovich 1906–80
Soviet politician
Born in the Ukraine, he was said to be one of STALIN's favourite 'juniors'. Ambassador to Japan (1942–45) and Deputy Foreign Minister (1946), he succeeded ANDREI GROMYKO as Soviet spokesman at the United Nations Organisation (1948) and was ambassador to Britain (1953–60). From 1960 he was again Deputy Foreign Minister, serving a second term as ambassador to the United Nations (1968–76).

Malinovsky, Rodion Yakovlevich 1898–1967
Russian soldier
He was born in Odessa. He fought in World War I and joined the Red Army after the Revolution (1917). A major-general at the time of the Nazi invasion in 1941, he commanded the forces which liberated Rostov, Kharkov and the Dnieper basin and led the Russian advance on Budapest and into Austria (1944–45). When Russia declared war on Japan, he took a leading part in the Manchurian campaign. In October 1957 he succeeded Marshal GEORGI ZHUKOV as NIKITA KHRUSHCHEV's Minister of Defence.

Malinowski, Bronisław (Kasper) 1884–1942
British anthropologist, a founder of modern social anthropology
Born in Kraków, Poland, he studied physics and mathematics at the Jagellonian University, and went on to study psychology under WILHELM MAX WUNDT at Leipzig, and sociology under EDVARD WESTERMARCK at London. In 1914 he left on a research assignment to Australia, but with the outbreak of war was partially confined to the Trobriand Islands, off the eastern tip of New Guinea. Returning to London in 1920, he was appointed in 1927 to the first chair in social anthropology at the London School of Economics. In 1938 he moved to the USA, where he taught at Yale University and undertook field research in Mexico. He was the pioneer of 'participant observation' as a method of fieldwork, and his works on the Trobriand Islanders, especially *Argonauts of the Western Pacific* (1922) and *Coral Gardens and their Magic* (2 vols, 1935), set new standards for ethnographic description. His better-known writings on the Trobriands include *Crime and Custom in Savage Society* (1926) and *Sex and Repression in Savage Society* (1927). A major proponent of functionalism in anthropology, he set out his views in *A Scientific Theory of Culture* (1944). 🕮 *Malinowski and the Work of Myth* (1992)

Malipiero, Francesco 1882–1973
Italian composer
Born in Venice, he became a professor at the Venice Conservatorio (1932) and its director (1939–52). He wrote much chamber and symphonic music in a characteristic style and edited MONTEVERDI and VIVALDI. He wrote *Claudio Monteverdi* (1930), *Igor Stravinsky* (1945) and the autobiographical *Cosi va lo mondo, 1922–45* (1946).

Malkovich, John Gavin 1953–
US actor and director
Born in Christopher, Illinois, he studied at Eastern Illinois and Illinois State universities, and became one of the first members of Chicago's Steppenwolf Theatre Company in 1976. His move into films scored some early successes, including an Academy Award nomination for Best Supporting Actor for *Places in the Heart* (1984), and he went on to star in films such as *Empire of the Sun* (1987), *Dangerous Liaisons* (1989), *In the Line of Fire* (1993, BAFTA and Academy Award nominations) and *Shadow of the Vampire* (2000). The surreal comedy *Being John Malkovich* (1999), about Malkovich's mind in the grip of an unemployed puppeteer, was a hit for the director Spike Jonze (1969–). Malkovich directed *The Dancer Upstairs* in 2000.

Mallarmé, Stéphane 1842–98
French Symbolist poet
Born in Paris, he taught English in various schools in Paris and elsewhere, and visited England on several occasions. He translated EDGAR ALLAN POE's 'The Raven' as 'Le Corbeau' (1875), and in prose and verse he was a leader of the Symbolist school. *L'Après-midi d'un faune* ('A Faun's Afternoon'), which inspired the prelude by DEBUSSY, is one of his best-known poems. His *Les Dieux antiques* (1880, 'The Ancient Gods'), *Poésies* (1899) and *Vers et prose* (1893) were other works admired by the 'decadents'. In the second half of the 20th century he has been much admired by the Structuralists. 🕮 H Mondor, *La vie de Mallarmé* (2 vols, 1941)

Malle, Louis 1932–95
French film director
Born in Thumeries to a wealthy sugar-producing family, he attended the Institut des Hautes Études Cinématographiques and began his career working as an assistant to the explorer JACQUES COUSTEAU; they shared an Academy Award for the underwater documentary *Le Monde du silence* (1956, *The Silent World*). Malle made his directorial debut with the thriller *L'Ascenseur pour l'échafaud* (1957, *Frantic*) and was associated with the nouvelle vague through innovative features like *Les Amants* (1958, *The Lovers*) and *Zazie dans le métro* (1960, *Zazie in the Underground*). Interested in social issues, world affairs and the problems of adolescence, he was a sympathetic director of actors and a rare European film-maker who was able to pursue his personal vision of cinema with equal success on both sides of the Atlantic. His later films include *Le Souffle au cœur* (1971, *Murmur of the Heart*), *Lacombe Lucien* (1974), *Atlantic City* (1980) and *Au Revoir les enfants* (1987, 'Goodbye Children'). He was married to US actress CANDICE BERGEN from 1980 until his death.

Mallea, Eduardo 1903–82
Argentine novelist, essayist and editor
Born in Bahia Blanca, son to a self-sacrificing and humane country doctor who greatly influenced him, he was literary editor of the newspaper *La Nación* from 1931. His ambition in his fiction was always to explore the essence of Argentina. But he was an inveterate traveller, and his books drew intelligently from European models, including CHEKHOV, WILLIAM BLAKE, MIGUEL DE UNAMUNO and RAMÓN PÉREZ DE AYALA. Like JORGE LUIS BORGES, he has been attacked by Marxists. His books include *Historia de una pasión argentina* (1937, Eng trans *History of an Argentine Passion*, 1983) and *Todo verdor perecerá* (1941, Eng trans *All Green Shall Perish and Other Novels and Stories*, 1966). 🕮 H E Lewald, *Eduardo Mallea* (1977); J H Richard, *The Writings of Eduardo Mallea* (1959)

Mallet, David, *originally* **David Malloch** c.1705–1765
Scottish poet
Born near Crieff, Perthshire, he worked as the janitor at Edinburgh High School (1717–18), then studied at Edinburgh University. In 1720 he became a tutor, working from 1723 to 1731 in the family of the Duke of Montrose. Living mostly in London, he changed his name from Scots Malloch to English Mallet. *William and Margaret* (1723), developed from the fragment of an old ballad, gained him a reputation as a poet, which he enhanced by *The Excursion* (1728). He also wrote a play, *Mustapha*, which had a brief success in 1739. *Alfred, a Masque* (1740), was written in conjunction with JAMES THOMSON, and one of its songs, 'Rule Britannia', was claimed by both.

Mallon, Mary *See* TYPHOID MARY

Mallory, George Herbert Leigh 1886–1924
English mountaineer
Born in Mobberley, Cheshire, he began climbing whilst still at school. After graduating from Cambridge, where he associated with members of the Bloomsbury Group, he became a schoolmaster and later served in World War I. Exceptionally fit and a gifted natural mountaineer, he was one of the members of the Alpine Club chosen for the Everest expeditions of 1921 and 1922. Neither expedition made it to the top, and a third was embarked upon in 1924. After making good progress, Mallory and his partner Andrew Irvine (1902–24) set out to reach the summit on 8 June, but were never seen again. It is thought that they may have reached the summit – 29 years before EDMUND HILLARY and TENZING NORGAY – but this has never been proved; Mallory's body was found on the mountain in 1999. He is often quoted as having replied, 'Because it is there' to a journalist's query about his reason for attempting to climb Everest; however, he later claimed that he could not remember making this remark. 🕮 Peter and Leni Gillman, *The Wildest Dream: Mallory, His Life and Conflicting Passions* (2001)

Mallowan, Sir Max Edgar Lucien 1904–78
English archaeologist
Born in London, he studied classics at New College, Oxford (1921–25). His apprenticeship in field archaeology was served with LEONARD WOOLLEY at Ur in Mesopotamia (1925–31), and it was at Ur that he met the novelist AGATHA CHRISTIE, whom he married in 1930. He made excavations for the British Museum, London, at Arpachiyah near Nineveh (1932–33), and in Syria at Chagar Bazar (1935–36) and Tell Brak (1937–38). After service in the RAF in World War II he became professor of Western Asiatic archaeology at London University (1947–60). From this base he continued to excavate in the Near East for several months each year, principally at Nimrud, the ancient capital of Assyria (1949–60), with striking results described in detail in *Nimrud and Its Remains* (1970). Agatha Christie's *Come, tell me how you live* (1946) is a wry account of Mallowan's five seasons' digging in Syria (1934–38). His own autobiography, *Mallowan's Memoirs*, appeared in 1977.

Malmesbury, William of *See* WILLIAM OF MALMESBURY

Malone, Edmund 1741–1812
Irish editor of Shakespeare
Born in Dublin, he graduated from Trinity College and was called to the Irish Bar in 1767, but from 1777 devoted himself to literary work in London, his first work being a 'supplement' to George Steevens's edition of Shakespeare (1778). His own 11-volume edition of the great dramatist (1790) was warmly received. He had been one of the first to express his disbelief in THOMAS CHATTERTON's Rowley poems, and in 1796 he denounced the Shakespeare forgeries of WILLIAM HENRY IRELAND. He left behind a large mass of materials for 'The Variorum Shakespeare', edited in 1821 by James Boswell the younger. The Malone Society was founded in his honour (1907).

Malone, Karl 1963–
US basketball player
Born in Newark, New Jersey, he played for the Utah Jazz from 1985 to 2003, when he joined the Los Angeles Lakers. His consistency in the power forward position earned him the nickname 'The Mailman' (because he always delivered) and two NBA Most Valuable Player awards, in 1997 and 1999. He also helped the USA to two gold medals, at the 1992 and 1996 Olympics.

Malory, Sir Thomas d.1471
English writer
In WILLIAM CAXTON's preface to Malory's masterpiece, *Le Morte d'Arthur*, it states that Malory was a knight, that he finished his work in the ninth year of the reign of EDWARD IV (1469–70), and that he 'reduced' it from some French book. It is probable that he was the Sir Thomas Malory of Newbold Revel, Warwickshire, whose quarrels with a neighbouring priory and (probably) Lancastrian politics brought him imprisonment. Of Caxton's black-letter folio only two copies now exist. An independent manuscript was discovered at Winchester in 1934. *Le Morte d'Arthur* is a prose romance, which gives epic unity to the whole mass of French Arthurian romance. TENNYSON, ALGERNON CHARLES SWINBURNE and many others took their inspiration from Malory. 🕮 S Johnson, in *Lives of the Most Eminent English Poets* (10 vols, 1779–81)

Malouf, David George Joseph 1934–
Australian novelist and librettist
He was born in Brisbane. A full-time writer since 1978, he has written some verse, collected in *Selected Poems* (1991) and *Poems 1959–1979*, and short stories in *Antipodes* (1985), but is best known for his novels, beginning with *Johnno* (1975). His second novel, *An Imaginary Life*, received wide acclaim when it was serialized by *The New Yorker* in 1978. Other novels are *Harland's Half Acre* (1984), *Great World* (1991) and *Remembering Babylon* (1993). He has written librettos for RICHARD MEALE's opera *Voss* (premiered in 1986), from PATRICK WHITE's novel, and for MICHAEL BERKELEY's opera *Baa Baa Black Sheep*, which was taken from RUDYARD KIPLING's autobiographical story and premiered in 1993. *The Conversations at Curlow Creek*, between a bushranger about to be hanged and the police officer sent to supervise his execution, was published in 1996, and his later works include *Untold Tales* (1999) and two collections of stories, *Dream Stuff* (2000) and *Every Move You Make* (2006). He was made an Officer of the Order of Australia (AO) in 1997. 🕮 P Neilsen, *Imagined Lives: A Study of the Novels of David Malouf* (1990)

Malpighi, Marcello 1628–94
Italian anatomist and microscopist
Born near Bologna, where he studied philosophy and medicine, he later became professor at the universities of Pisa, Messina and Bologna (1666), and from 1691 served as chief physician to Pope INNOCENT XII. An early pioneer of histology, plant and animal, he conducted a remarkable series of microscopic studies of the structure of the liver, lungs, skin, spleen, glands and brain. He gave the first full account of an insect, the silkworm moth, and investigated muscular cells. 🕮 Howard Adelmann, *Marcello Malpighi and the Evolution of Embryology* (5 vols, 1966)

Malraux, André 1901–76
French writer
Born in Paris, he studied Oriental languages and spent much time in China, where he worked for the Guomindang (Kuomintang) and was active in the 1927 revolution. He also fought as a pilot with the Republican forces in the Spanish Civil War, and in World War II he escaped from a prisoner-of-war camp to join the French Resistance movement. He was Minister of Information in DE GAULLE's government (1945–46), minister delegate from 1958 and Minister of Cultural Affairs (1960–69). He is best known for his novels, which are a dramatic meditation on human destiny and are highly coloured by his personal experience of war, revolution and resistance to tyranny. Among them are *Les Conquérants* (1928, Eng trans *The Conquerors*, 1929), *La Condition humaine* (1933, Eng trans *Man's Fate*, 1934, winner of the Prix Goncourt) and *L'Espoir* (1937, Eng trans *Man's Hope*, 1938). He also wrote *La Psychologie de l'art* (1947, Eng trans *The Psychology of Art*, 1949), *Les Voix du silence* (4 vols, 1951, Eng trans in 4 vols *The Voices of Silence*, 1953), and other books on art and museums. 🕮 A Madsen, *Malraux* (1979); C Malraux, *Le Bruit de nos pas* (3 vols, 1965–69)

Malthus, Thomas Robert 1766–1834
English economist and clergyman
Born near Dorking, Surrey, he was educated at Jesus College, Cambridge, of which he was elected a Fellow in 1793, and in 1797 he was appointed curate at Albury, Surrey. In 1798 he published anonymously his *Essay on the Principle of Population*, with a greatly enlarged and altered edition in 1807. In it he maintained that the optimistic hopes of WILLIAM GODWIN and JEAN JACQUES ROUSSEAU are rendered baseless by the natural tendency of population to increase faster than the means of subsistence. (Malthus gives no sanction to the theories and practices currently known as Malthusianism.) The problem had been handled by BENJAMIN FRANKLIN, DAVID HUME and many other writers, but Malthus crystallized the views of those writers, and presented them in systematic form with elaborate proofs derived from history, and he called for positive action to cut the birth rate, by sexual abstinence or birth control. In 1805 he was appointed professor of political economy at the East India College at Haileybury. His other works included *An Inquiry into the Nature and Progress of Rent* (1815), largely anticipating DAVID RICARDO, and *Principles of Political Economy* (1820). CHARLES DARWIN read Malthus in 1838, and was greatly influenced by him, seeing in the struggle for existence a mechanism for producing new species – natural selection. 🕮 J Ronar, *Malthus and His Work* (1885)

Malus, Étienne Louis 1775–1812
French physicist
Born in Paris, he was a military engineer in NAPOLEON I's army (1796–1801), and carried out research in optics, discovering the polarization of light by reflection in 1808. This phenomenon provided a very convincing demonstration of the transverse nature of light. Also in 1808 he discovered a fundamental theorem in geometrical optics, which generalizes CHRISTIAAN HUYGENS's construction to determine the position of a wavefront after light originating from a point source has been reflected or refracted. His paper explaining the theory of double refraction in crystals won him the French Institute's prize in 1810.

Malvern, 1st Viscount *See* HUGGINS, GODFREY MARTIN

Mameli, Goffredo 1827–49
Italian poet and patriot
Born in Genoa, he was a volunteer in GARIBALDI's forces. His patriotic poem 'Fratelli d'Italia' ('Brothers of Italy') was adopted as the Italian national anthem in 1946. He died in the defence of Rome against the French. 🕮 A Viviani, *Mameli* (1937)

Mamet, David Alan 1947–
US dramatist, screenwriter and director
Born in Chicago, he graduated from Goddard College, Vermont, and studied acting in New York. His best-known plays, including *American Buffalo* (1975), *Glengarry Glen Ross* (1983, Pulitzer Prize, filmed 1992), *Speed-the-Plow* (1988) and *Oleanna* (1992), address the psychological and ethical issues that confront modern, urban society. Other plays include *Sexual Perversity in Chicago* (1977), *The Water Engine* (1977), *A Life in the Theater* (1978), *Edmond* (1982, adapted for film 2006), and *The Shawl* (1985). He won his third Obie award for *The Cryptogram* (1994), a play inspired by his childhood, featuring a small boy struggling to decipher the hostile and cryptic language of the adults around him. He has translated works by CHEKHOV, and his screenplays include a new adaptation of *The Postman Always Rings Twice* (1981), *The Untouchables* (1987), *Vanya on 42nd Street* (1994), based on Chekhov's *Uncle Vanya*, and *Wag the Dog* (1997) for which he received an Academy Award nomination. He wrote and directed the film *House of Games* (1987), a look at seedy professional gambling, later directing other films such as the film industry satire *State and Main* (2000), *Heist* (2001) and *Spartan* (2004). He has also published essay collections such as *Writing in Restaurants* (1986) and *Make-Believe Town* (1996). 🕮 *The Cabin* (1992); C W E Bigsby, *David Mamet* (1985)

Mamluks
Egyptian sultans
They are commonly divided into the two lines of Kipchak (Bahris, 1250–1382) and Circassian (Burjis, 1382–1517) origin. Their name derives from that originally applied to the group from which they were drawn, a privileged caste of military slaves recruited from various non-Muslim peoples (especially Turks and Caucasians) and who, as converts, served in the armies of most Islamic powers from the 9th century onwards. In 1250 the Ayyubid Sultan of Egypt, Turan-Shah, was murdered by a group of Turkish Kipchak mamluks belonging to his military household, who later enthroned one of their number, thus inaugurating the *dawlat al-Atrak* ('state of the Turks'). The Mamluks defeated the Mongol invaders of Syria at 'Ayn Jalut and Hims (1260). One of the successful commanders in these campaigns was Baybars (1233–77), who murdered his predecessor to become sultan (1260) and went on to consolidate Mamluk rule, capturing Caesarea, Jaffa and Antioch from the Franks and reducing the crusader states to a coastal strip based around Acre. Although he secured religious legitimation by installing various members of the 'Abbasid family as caliphs in Cairo, Baybars was unable to establish a dynasty. In 1279 the throne was seized by al-Mansur Qalawun (d.1290) whose son al-Ashraf Khalil (d.1293) captured Acre, crushing the crusaders' kingdom (1291). Khalil's murder by a rival led to a period of turbulence from which his brother, al-Nasir Muhammad (d.1341), emerged victorious in 1310 after having been deposed twice. The sultanate remained in this family until 1382, when the last Qalawunid was dethroned by Barquq (d.1399), the representative of the Circassian element whose influence had come to outweigh that of the Kipchaks. After the deposition and death of Barquq's son Faraj (1389–1412), the succession ceased to be hereditary, but tended to be determined by the strongest Mamluk faction. In the 15th century the Mamluks failed to keep pace with developments in warfare, and consequently were no match for the technically superior Ottoman army. They were decisively defeated by SELIM I, who incorporated Egypt into the Ottoman Empire (1516–17). While the sultanate thus ended with his execution of the last Burji, Tuman-Bay, the Mamluk class retained a privileged status under Ottoman rule until it was finally suppressed by MEHEMET 'ALI in 1812.

Manasseh 7th century BC
Biblical King of Judah
He was the son of Hezekiah whom he succeeded as king (697–642 BC). He earned notoriety for his idolatry and wickedness until, as a captive in Babylon, he repented. *The Prayer of Manasseh* is apocryphal.

Manasseh Ben Israel 1604–57
Dutch Jewish scholar
Born in Lisbon, Portugal, he was taken early to Amsterdam. He became chief rabbi there at the age of 18, and set up the first printing press in the Netherlands (1626). From 1655 to 1657 he was in England, securing from CROMWELL the readmission of the Jews to Great Britain. He wrote important works in Hebrew, Spanish and Latin, and in English a *Humble Address* to Cromwell, *A Declaration*, and *Vindiciae Judaeorum* (1656, 'Vindication of the Jews').

Manby, George William 1765–1854
English inventor
He was barrack-master at Yarmouth from 1803. In 1807 he demonstrated a means of saving shipwrecked persons by firing

a rope to the ship from a mortar on shore. He wrote on this method, on lifeboats, criminal law and other subjects.

Manchester, Edward Montagu, 2nd Earl of 1602–71
English soldier
In 1623 he accompanied Prince Charles (CHARLES I) to Spain on his abortive mission to woo the Infanta Maria, and in 1626 was raised to the House of Lords as Baron Montagu of Kimbolton, but was better known by his courtesy title of Viscount Mandeville. Siding with the Popular party, and an acknowledged leader of the Puritans in the Upper House, in 1642 he was impeached by the king for treachery, but was acquitted. He succeeded his father as 2nd Earl in the same year. At the outbreak of the Civil War he fought for the Parliamentarians. He served under the 3rd Earl of ESSEX at Edgehill, and then held the associated (eastern) counties against WILLIAM CAVENDISH, Duke of Newcastle, took Lincoln (1644), and routed Prince RUPERT at Marston Moor (1644). He then marched to oppose the Royalists in the south-west, and defeated them at Newbury (the second battle). Deprived of his command (1645), he opposed the trial of the king, and protested against the Commonwealth. Afterwards, having been active in promoting the Restoration, he was made Lord Chamberlain (1660), a step designed to conciliate the Presbyterians.

Manchester, William Raymond 1922–2004
US novelist and contemporary historian
Born in Attleboro, Massachusetts, he began his career as a newspaper reporter and foreign correspondent in the Middle East, India and South-East Asia. His book *The Death of a President* (1967), written at the behest of the Kennedy family, was a landmark in reportage and sold in millions but was subsequently superseded as new evidence on the assassination of President JOHN F KENNEDY emerged. Among his other major works are *The Arms of Krupp* (1968), a history of the German munitions makers, and the biographies *American Caesar: Douglas MacArthur, 1880–1964* (1978) and *The Last Lion: Winston Spencer Churchill* (2 vols, 1983–87). Later publications include *This Is Our Time* (1989) and his last book, *A World Lit Only By Fire* (1992), a history of the Renaissance and the Reformation. 🕮 *Controversy* (1976)

Mancini, Hortense, Duchesse de Mazarin 1646–99
Italian beauty
She was the sister of MARIE ANNE, OLYMPE, LAURA and MARIE MANCINI. Married off by Cardinal MAZARIN to Armand Charles de la Porte, who assumed the Mazarin title, she separated from him and became famous for her beauty at the court of CHARLES II in London.

Mancini, Laura, Duchesse de Mercoeur 1636–57
Italian beauty
She was the sister of HORTENSE, MARIE ANNE, OLYMPE, and MARIE MANCINI. She went to the French court and was married to Louis de Vendôme. Louis Joseph, Duc de VENDÔME was their son.

Mancini, Marie, Princess de Colonna 1640–1715
Italian beauty
She was the sister of HORTENSE, MARIE ANNE, OLYMPE and LAURA MANCINI. She was a mistress of LOUIS XIV, who was prevented from marrying her by the machinations of Cardinal MAZARIN. She lived in Spain for most of her life.

Mancini, Marie Anne, Duchesse de Bouillon 1649–1714
Italian noblewoman and alleged poisoner
She was the sister of HORTENSE, LAURA, MARIE and OLYMPE MANCINI. She moved with them and their uncle Cardinal MAZARIN to France and became renowned for her beauty, her literary salon and for her patronage of the French poet JEAN DE LA FONTAINE. She was banished in 1680, having been involved in the *cause célèbre* of the notorious sorceress La Voisin (real name Catherine Deshayes Monvoisin, burned 1680) known as the 'Affair of the Poisons'.

Mancini, Olympe, Comtesse de Soissons 1639–1708
Italian beauty
The sister of HORTENSE, MARIE ANNE, LAURA and MARIE MANCINI, she was a mistress of LOUIS XIV. She was involved with her sister, Marie Anne, in the La Voisin intrigues and, accused of poisoning her husband and the Queen of Spain, she fled to the Netherlands. Her son was Prince EUGÈNE OF SAVOY.

Mandela, Nelson Rolihlahla *See panel p1030*

Mandela, (Nomzano) Winnie (Winifred), *Xhosa surname* **Madikizela** 1934–
South African civil rights activist
Born in Bizana, she married NELSON MANDELA in 1958, and became active in his work for the African National Congress (ANC). When he was put in prison by the South African government (1964–90), she too was banned, imprisoned (1969–70), and forced into internal exile (1977–85). In 1985 she returned to Soweto and became involved in the militant politics of the township. Throughout Nelson Mandela's 26-year incarceration (1964–90), she campaigned ceaselessly for black rights on his behalf and for his release. Her popularity declined in 1988–89 when her bodyguards were implicated in the kidnapping, beating and murder of a black youth. She was convicted of the kidnapping alone but her six-year sentence was commuted to a £9,000 fine. She was appointed head of the ANC's department of social affairs in 1994, but was removed the following year. Her marriage came under strain due to her controversial activities and associations, and the couple separated in 1992 and divorced in 1996. She retained her position as president of the ANC Women's League, winning re-election in 1997. In 2003 she was convicted of fraud and theft, reduced on appeal the following year to a single fraud conviction and suspended sentence, in relation to a bank loan scandal. She then resigned from all her positions within the ANC, including her parliamentary seat.

Mandelbrot, Benoit 1924–
US mathematician
Born in Warsaw, Poland, he went to Paris in 1994 to study at the École Polytechnique, before moving to the USA in the late 1950s to work at IBM. Now based at Yale University, he is best known for his work on fractal geometry, a way of describing complex yet repetitive shapes that has become one of the main planks of the branch of mathematics known as chaos theory. He coined the term 'fractal', and discovered one of the best-known fractals, the Mandelbrot set. He has applied fractal geometry to describing the behaviour of living systems and financial markets.

Mandelson, Peter Benjamin 1953–
English politician
Born in London, and educated at St Catherine's College, Oxford, he was the Labour Party's Director of Campaigns and Communications in 1985–90 and became MP for Hartlepool in 1992. He was one of the chief strategists behind the New Labour victory in the general election of 1997 and subsequently served as Secretary of State for Trade and Industry (1998) and Northern Ireland (1999–2001). He resigned from both posts in circumstances of political scandal, the first involving alleged financial irregularities and the second accusations of cronyism in the issuing of British passports. In both instances Mandelson denied improper behaviour on his part, and he was later exonerated by the Hammond inquiry. In 2004 he resigned his parliamentary seat in order to take up the position of European Commissioner for Trade. 🕮 Donald Macintyre, *Mandelson and the Making of New Labour* (2000)

Mandelstam, Osip Yemilevich 1891–1938
Russian poet, critic and translator
Born of Jewish parents in Warsaw, he grew up in St Petersburg and attended Heidelberg University. A classicist whose Russian 'sounds like Latin', he had a great love of Greek poetry. Three books of poems appeared during his lifetime – *Kamen* (1913, Eng trans *Stone*, 1981), *Tristia* (1922) and *Stikhotvoreniya* (1928, 'Poems') – and *Sobraniye sochineniy* (1964–71, Eng trans *The Complete Poetry*, 1973) appeared in 1973. He is regarded by some as the greatest Russian poet of the century. Arrested, exiled and rearrested, he died on his way to one of STALIN's camps. His wife Nadezhda Mandelstam wrote their story in *Hope Against Hope* (1970). 🕮 N Struve, *Osip Mandelstam* (1982)

Mander, Karel van 1548–1606
Flemish portrait painter and writer
Born in Meulebeke, he lived mostly in Haarlem, and is chiefly remembered for his *Schilderbouck* (1604, 'The Book of Painters'), a collection of biographical profiles of painters, important as a source for the art history of the Low Countries.

Mandeville, Bernard 1670–1733
British satirist
Born in Dort, the Netherlands, he took his MD at Leyden in 1691, then practised medicine in London. He is known as the author of the satirical verse, *The Fable of the Bees* (1723, originally *The Grumbling Hive*, 1705). In it he argued that 'private vices are public benefits', and that every species of virtue is basically some form of gross selfishness. The book was widely attacked, and condemned by the grand jury of Middlesex. He also wrote several works arguing for an improvement in the status of women, including *The Virgin Unmasked* (1709), and *A Modest*

Mandela, Nelson Rolihlahla 1918–

South African lawyer, statesman and Nobel Prize winner

Nelson Mandela was born in Umtata, the son of a local chief in Transkei. He practised as a lawyer in Johannesburg, establishing the country's first black legal practice. In 1944 he joined the African National Congress (ANC), and for the next 20 years he directed a campaign of defiance against the South African government and its policy of apartheid or 'separate development'. The ANC was banned in 1960 after the Sharpeville massacre; the following year Mandela organized a three-day national strike, and in 1964 he was sentenced to life imprisonment for political offences that included sabotage and treason. From his prison cell, Mandela became a symbol of black resistance to apartheid, acquiring a charisma that was enhanced by his refusal to enter into any kind of deal with the authorities.

During the 1970s and 1980s, Mandela grew into an international figure and the focus of an increasingly powerful international campaign for his release, in which his second wife WINNIE MANDELA (married to him in 1958) played a leading part. In 1988 his seventieth birthday provided the opportunity for further intensifying demands for his release, and international alarm at reports of his declining health led to his being moved to a more comfortable confinement.

The liberalizing measures of F W DE KLERK (president from 1989) began the process of dismantling apartheid; within months of his election, de Klerk visited Mandela in prison, and finally ordered his release in February 1990, after lifting the ban on the ANC, removing restrictions on political groups, and calling a halt to the executions. In 1991 Mandela was elected president of the ANC (his friend OLIVER TAMBO was elected chairman), and entered into talks with de Klerk about the country's future. He travelled extensively to win support for continued international pressure to abolish apartheid completely. In 1993 he was awarded the Nobel Peace Prize jointly with de Klerk for their work in the process of reform. On 10 May 1994 he was inaugurated as South Africa's first black president.

Nelson Mandela's marriage to Winnie came under increasing strain as a result of her controversial activities and associations, and they were separated in 1992 and divorced in 1996. He had appointed her to government office in 1994, but removed her the following year. This embarrassment, together with continued hostility between the ANC and the Zulu Inkatha movement, only slightly tarnished Mandela's triumph as the new leader of his country, and he continued to strengthen relations with South Africa's trading partners in Europe and America. His term as president ended in 1999, but he remained active as an international elder statesman until his virtual retirement from public life in 2004. Among the numerous honours he has received are the Order of Merit (1995) and the Order of St John in the UK, and the Presidential Medal of Freedom in the USA. He was also granted the freedom of the city of Johannesburg in 2004.

📖 Mandela wrote *No Easy Walk to Freedom* (1965); his autobiography, *Long Walk to Freedom*, was published in 1994. See also Anthony Sampson, *Mandela: The Authorised Biography* (1999).

> Mandela's world renown was recognized when South Africa hosted the Rugby World Cup in 1995. Mandela himself, in acknowledgement of the importance of sport to international reputation, walked out on to the pitch wearing his country's shirt before the final, which South Africa won. As well as the Nobel Prize, Mandela has honorary degrees from over 50 universities throughout the world.
>
> 'During my lifetime I have dedicated my life to this struggle of the African people. I have fought against white domination, and I have fought against black domination. I have cherished the ideals of a democratic and free society in which all persons live together in harmony with equal opportunities. It is an ideal which I hope to live for, and to see realized. But My Lord, if needs be, it is an ideal for which I am prepared to die.'

Defence of Public Stews (1724), on the condition of brothels. 📖 J M Robertson, *Pioneer Humanists* (1907)

Mandeville, Viscount (Edward) *See* MANCHESTER, 2ND EARL OF

Mandeville, Sir Jehan de or **John**, *also spelt* **Maundeville** or **Maundevylle** 14th century

Unknown compiled of a travel book

This writer compiled a famous book of travels, *The Voyage and Travels of Sir John Mandeville, Knight*. The book was published apparently in 1366, and soon translated from the French into all European languages. It may have been written by a physician, Jehan de Bourgogne, otherwise Jehan à la Barbe, who died in Liège in 1372, and who is said to have revealed on his deathbed his real name of Mandeville (or Maundevylle), explaining that he had fled his native England to escape prosecution for a homicide. Some, however, attribute it to Jean d'Outremeuse, a Frenchman. 'Mandeville' claims to have travelled through Turkey, Persia, Syria, Arabia, North Africa and India, but much of the book is a compilation from various literary sources.

Manen, Hans van 1932–

Dutch dancer, choreographer and director

Born in Nieuwer, Amstel, he joined Ballet Recital in 1952, moving to Amsterdam Opera Ballet in 1959. Later that year he became one of the founding members of Netherlands Dance Theater (NDT), of which he was artistic director from 1961 until 1971. In 1973 he joined the Dutch National Ballet as choreographer and ballet master, and in 1988 rejoined NDTas resident choreographer. His work for NDT includes *Symphony in Three Movements* (1963), *Essay in Silence* (1965), *Five Sketches* (1966), *Squares* (1969), *Septet Extra* (1973) and *Two Faces* (2000).

Manet, Édouard 1832–83

French painter

Born in Paris, he was originally intended for a legal career, and sent on a voyage to Rio to distract his thoughts from art. Nevertheless, between 1850 and 1856 he studied under Thomas Couture (1815–79), and his *Spanish Guitar Player* was awarded an honourable mention at the 1861 Salon. Pursuing official recognition, he entered his *Déjeuner sur l'herbe* for the Salon of 1863 but it scandalized the jury with its portrayal of a nude female with clothed male companions, and was rejected. This was followed by the acceptance of his *Olympia* in 1865, but, being a stark depiction of a woman obviously modelled by a prostitute, it elicited a similar outcry from the public. Manet was influenced by conventional artists: *Olympia* owes a great deal to the nudes of GIORGIONE, TITIAN and RAPHAEL. But the strong contrasts he learned from the Spanish masters – he was an ardent admirer of VELÁZQUEZ – and his adherence to the advice of GUSTAVE COURBET in always selecting subjects from contemporary life marked him out from the older Salon artists. In the 1870s he came under the influence of the Impressionists and, in particular, of MONET while painting at Argenteuil, and his technique became free and more spontaneous. He never exhibited with the group but became a father figure to them because of his stand against the conventions of the Salon. His last major work was *Un Bar aux Folies-Bergère* (1881–82). In that year, official recognition finally arrived – he was appointed Chevalier of the Legion of Honour – but he died an embittered man.

Manetho 3rd century BC

Egyptian historian

He was high priest of Heliopolis. He wrote in Greek a history of the 30 dynasties from mythical times to 323 BC, of which only portions have been preserved in the works of Julius Africanus (AD 300), EUSEBIUS OF CAESAREA, and George Syncellus (AD 800).

Manfred 1232–66

King of Sicily

He was a natural son of Emperor FREDERICK II, and was made Prince of Taranto. He was regent in Italy for his half-brother, Conrad IV, and defended the empire's interests against Pope INNOCENT IV for his nephew Conradin of Swabia. The pope, however, compelled Manfred to flee for shelter to the Saracens, who helped him defeat the papal troops. In 1257 he became Master of Naples and Sicily, and on the (false) rumour of Conradin's death (1258) he was crowned king at Palermo. In spite of excommunication by Pope Alexander IV, he occupied

Tuscany after victory at Montaperti (1260). Pope URBAN IV renewed the excommunication and bestowed Manfred's dominions on CHARLES OF ANJOU, brother of LOUIS IX of France. Manfred fell in battle at Benevento, and was succeeded by Charles.

Mangan, James Clarence 1803–49
Irish poet
Born in Dublin, the son of a grocer, he worked as a lawyer's clerk, and later found employment in the library of Trinity College, Dublin. Although he knew no Irish, he published English versions of Irish poems in *The Poets and Poetry of Munster* (1849), notably 'My Dark Rosaleen', 'The Nameless One' and 'The Woman of Three Cows'. He also published translations from German poets in *Anthologia Germanica* (1845). 🕮 D J O'Donaghue, *The Life and Writings of James Clarence Mangan* (1897)

Mangin, Noel 1931–95
New Zealand operatic bass
Born in Wellington, he trained as a tenor and sang thus in *The Merry Widow* in 1956. He made his operatic debut as a baritone in 1957 but by 1959 was singing the demanding bass role of Osmin in *Die Entführung aus dem Serail* ('The Abduction from the Seraglio') with the New Zealand Opera Company. He made his debut at Sadler's Wells in *Tosca* in 1963, and at the Hamburg Statsoper in 1967. In 1977 he went freelance with a repertoire of over 100 bass roles, and was always in demand as Osmin; as Dr Bartolo or Don Basilio in *The Barber of Seville*; or as Baron Ochs in *Der Rosenkavalier* – the 'heavy comic' roles. In 1979 he sang the roles of Fafner, Hunding and Hagen in one complete *Ring* cycle.

Manichaeus or **Mani** c.215–276 AD
Persian religious leader
Born in Ecbatana, he was the founder of the heretical sect of Manichaeism. About AD 245 he began to proclaim his new religion at the court of the Persian King Sapor (Shahpur) I. He travelled widely, but eventually King Bahram I abandoned him to his Zoroastrian enemies, who crucified him.

Manilow, Barry, *originally* **Barry Alan Pincus** 1946–
US pop singer, pianist and composer
Born in Brooklyn, New York City, he began his professional career composing advertising jingles. His work as musical director on BETTE MIDLER's award-winning first album, *The Divine Miss M* (1972), launched his own career as a performer. 'Mandy' (1974) was the first of his many hits throughout the 1970s; since 1984, he has revisited earlier genres of pop music with albums of jazz and swing arrangements. His 1978 song 'Copacabana' inspired both a TV film (1985) and a stage musical (1994).

Manin, Daniele 1804–57
Italian lawyer and statesman
Born in Venice of Jewish ancestry, he practised at the Bar, and became a leader of liberal opinion. As president of the Venetian republic (1848) he was at the centre of the heroic five months' defence against the Austrians. When Venice capitulated (1849), Manin, with 39 others, was excluded from the amnesty, but escaped to Paris, where he taught Italian. He shifted from his republican stance to support for a united Italy, and he supported GIUSEPPE LA FARINA in his creation of the Italian National Society. His bones were taken to Venice in 1868.

Maniu, Iuliu 1873–1953
Romanian politician
The leader of the National Party, he directed the provisional government in Transylvania which proclaimed union with Romania (1918). Later, as leader of the National Peasant Party, he served as prime minister and tried to carry out agrarian reform (1928–30) but resigned from office when King CAROL II of Romania introduced his mistress, MAGDA LUPESCU, into the Romanian court. He was again prime minister (1932–33) and his electoral alliance with the Iron Guard was an expediency aimed at curbing the king's power (1937). He played a major role in the coup of 1944 and was a minister without portfolio in General Sănătescu's national government which declared war on Germany. The post-war Communist regime, in a move intended to destroy the Peasant Party, had him arrested, accused of conspiring with US intelligence agents. He received a life sentence (1947) and died in prison.

Mankiewicz, Herman Jacob 1897–1953
US screenwriter
He was born in New York. A member of the United States Marine Corps, he later worked in Europe for the Red Cross Press Service, as ISADORA DUNCAN's publicity manager and as Berlin correspondent for the *Chicago Tribune*. Returning to the USA in 1922, he was assistant drama editor for the *New York Times* (1922–26) and wrote his first screenplay for *The Road To Mandalay* (1926). A prolific writer, he was also much in demand as a script doctor and in addition was the producer of a number of films, including the MARX BROTHERS comedies *Horse Feathers* (1932) and *Duck Soup* (1933). A member of the Algonquin Round Table set and a frequent contributor to *The New Yorker*, his move to Hollywood was widely seen as the prostituting of a fine, witty literary talent. His most significant contribution to the cinema came as the co-writer of ORSON WELLES's *Citizen Kane* (1941), for which he received an Academy Award. Other credited screenplays include *The Royal Family of Broadway* (1930), *Dinner At Eight* (1933), *It's A Wonderful World* (1939) and *The Enchanted Cottage* (1946). He was the brother of JOSEPH LEO MANKIEWICZ.

Mankiewicz, Joseph Leo 1909–93
US film-maker
Born in Wilkes-Barre, Pennsylvania, he worked as a reporter before joining Paramount Pictures as a junior writer in 1929. As a screenwriter, he collaborated on such films as *If I Had A Million* (1932) and *Manhattan Melodrama* (1934). Under contract to MGM from 1933, he produced sophisticated comedies like *The Philadelphia Story* (1940) and *Woman Of The Year* (1942). He made his directorial debut with *Dragonwyck* (1946) and won Academy Awards for Direction and Screenwriting on both *A Letter to Three Wives* (1949) and *All About Eve* (1950). His best work is distinguished by the quality of its wit, the sharpness of its dialogue and the power of its performances. Among his films are *Julius Caesar* (1953), *Guys and Dolls* (1955) and the notorious failure *Cleopatra* (1963). He directed *Carol for Another Christmas* (1964) for television and made his final film, *Sleuth*, in 1972.

Mankowitz, (Cyril) Wolf 1924–98
English author, playwright and antique dealer
He was born in Bethnal Green, London, and studied at Cambridge. An authority on JOSIAH WEDGWOOD, he published *Wedgwood* (1953) and *The Portland Vase* (1953), and was an editor of *The Concise Encyclopedia of English Pottery and Porcelain* (1957). Other publications include the novels *Make Me an Offer* (1952), *A Kid for Two Farthings* (1953) and *A Night With Casanova* (1991), and a collection of short stories, *The Mendelman Fire* (1957). Among his plays is *The Bespoke Overcoat* (1954), and his films, *The Millionairess* (1960), *The Long, The Short, and the Tall* (1961), *Casino Royale* (1967) and *The Hebrew Lesson* (1972), as well as his documentary on Yiddish cinema from 1929 to 1939, *Almonds and Raisins* (1984).

Manley, (Mary) Delarivier or **de la Rivière** c.1672–1724
British writer
She was born either in the Netherlands or in Jersey, the daughter of a future governor of Jersey. After her father's death (1688) she was lured into a bigamous marriage with her cousin, John Manley of Truro, MP, who soon deserted her. She went to England, where she had a success with the publication of her letters, and in 1696 wrote two plays, entitled *The Lost Lover* and *The Royal Mischief*. She also wrote gossipy chronicles disguised as fiction, especially the scandalous anti-Whig *The New Atalantis* (1709), and in 1711 she succeeded JONATHAN SWIFT as editor of *The Examiner*. She wrote a fictional account of her own early struggles in *The Adventures of Rivella* (1714). Her last work was *The Power of Love, in Seven Novels* (1720). 🕮 *Letters Written by Mrs Manley* (1696)

Manley, Michael Norman 1924–97
Jamaican politician
Born in Kingston, the son of NORMAN MANLEY, and educated in Jamaica, he served in the Royal Canadian Air Force in World War II, and then studied at the London School of Economics (1945–49). He spent some time in journalism in Britain before returning to Jamaica. He became a leader of the National Workers' Union in the 1950s, sat in the Senate (1962–67) and was then elected to the House of Representatives. He became leader of the People's National Party (PNP) in 1969 and prime minister in 1972. He embarked on a radical, socialist programme, cooling relations with the USA, and despite rising unemployment was re-elected in 1976. He was decisively defeated in 1980 and 1983 but returned to power in 1989, with a much more moderate policy stance. However, he was forced to resign in 1992 due to poor health. His publications include *The Politics of Change* (1994) and *The Poverty of Nations* (1991).

Manley, Norman Washington 1893–1969
Jamaican politician
He was born in Kingston. He studied law, was called to the Bar and became a respected QC. In 1938 he won fame by successfully defending his cousin, and political opponent,

Mann, Thomas 1875–1955
German novelist and Nobel Prize winner

Thomas Mann was born in Lübeck into a patrician family of merchants and senators of the Hanseatic League. His older brother was HEINRICH MANN, also a novelist, and his mother was a talented musician of mixed German and Portuguese West Indian blood. The tensions between a conservative background and an artistic disposition, as well as between the Nordic and Latin temperaments inherent in his own personality, were to form the psychological basis of his subject matter.

At the age of 19, without completing school, he settled with his mother in Munich, and after a spell at the university he joined his brother in Italy, where he wrote his early masterpiece, *Buddenbrooks: Verfall einer Familie* (1901, Eng trans *Buddenbrooks: The Decline of a Family*, 1924), the saga of a family like his own, tracing its decline through four generations as business acumen gives way to artistic sensibilities. With this work, Mann was a leading German writer at the age of 25.

On his return to Munich he became a reader for the satirical literary magazine *Simplicissimus*, which published many of his early, remarkable short stories. The novelettes *Tonio Kröger* (1902), *Tristan* (1903) and *Der Tod in Venedig* (1913, Eng trans *Death in Venice*, 1925) all deal with the problem of the artist's salvation; in the last of these, the subject of an opera by BENJAMIN BRITTEN (1973) and a film by LUCHINO VISCONTI (1971), a successful writer dies on the brink of perverted eroticism.

World War I precipitated a quarrel between the two novelist brothers, with Thomas's *Betrachtungen eines Unpolitischen* (1918, Eng trans *Reflections of a Nonpolitical Man*, 1983) revealing his militant German patriotism, already a feature of his essay on FREDERICK THE GREAT, and a distrust of political ideologies, including the radicalism of his brother. *Der Zauberberg* (1924, Eng trans *The Magic Mountain*, 1927), was inspired by a visit to his wife at a sanatorium for consumptives in Davos in 1913 and tells the story of a patient, Hans Castorp, with the sanatorium representing Europe in its moral and intellectual disintegration.

In 1929, Mann won the Nobel Prize in literature. In the same year he delivered a speech against the rising Nazis, and in 1930 he exposed Italian fascism in *Mario und der Zauberer* (1930, Eng trans *Mario and the Magician*, 1930). He left Germany for Switzerland after 1933 and in 1936 delivered an address for FREUD's eightieth birthday. Both shared an enthusiasm for the biblical patriarch, JOSEPH, and Mann wrote a tetralogy on his life (1933–43).

He settled in the USA in 1936 and wrote a novel on a visit to GOETHE by an old love, Charlotte Buff, *Lotte in Weimar* (1939). During World War II, he delivered anti-HITLER broadcasts to Germany, which at the end of the war were collected under the titles *Achtung Europa!* (1938) and *Deutsche Hörer!* (1942, Eng trans *Listen Germany! Twenty-Five Messages to the German People over the BBC*, 1943; augmented edition of 55 messages, 1945). In 1947 he returned to Switzerland and was the only returning exile to be fêted by both West and East Germany. His greatest work, a modern version of the medieval legend *Doktor Faustus* (1947), combines art and politics in the simultaneous treatment of the life and catastrophic end of a composer, Adrian Leverkühn, and German disintegration in two world wars.

His last unfinished work, hailed as Germany's greatest comic novel, *Bekenntnisse des Hochstaplers Felix Krull*, Part I (1922; 1953, Eng trans *Confessions of Felix Krull, Confidence Man*, 1955), written with astonishing wit, irony and humour and without the tortuous stylistic complexities of the *Bildungsroman*, commended itself most to English translators.

📖 Thomas Mann was essentially a 19th-century German conservative whose cultural landmarks disappeared in World War I, and he resorted in his work to a critique of the artistic. Other later works include *Der Erwählte* (1951, Eng trans *The Holy Sinner*, 1951), a retelling of the 12th-century legend of an incestuous pope named Gregory *Die Betrogene* (1953, Eng trans *The Black Swan*, 1954) and *Last Essays*, on SCHILLER, Goethe, NIETZSCHE and CHEKHOV.

> *Die Zeit hat in Wirklichkeit keine Einschnitte, es gibt kein Gewitter oder Drommetengetön beim Beginn eines neuen Monats oder Jahres, und selbst bei dem eines neuen Säkulums sind es nur wir Menschen, die schiessen und läuten.*
>
> 'Time has no divisions to mark its passage, there is never a thunderstorm or blare of trumpets to announce the beginning of a new month or year. Even when a new century begins it is only we mortals who ring bells and fire off pistols.'
>
> –From *Der Zauberberg*, ch.4, section 4 (translated by H T Lowe-Porter).

ALEXANDER BUSTAMANTE, who was then an active trade unionist, on a charge of sedition. In the same year Manley founded the People's National Party (PNP) and in 1955, seven years before Jamaica achieved full independence, became prime minister. He handed over leadership of the PNP to his son MICHAEL MANLEY in 1969.

Mann, Heinrich 1871–1950
German novelist
He was born in Lübeck, the brother of THOMAS MANN. He began to be described as the German ZOLA for his ruthless exposure of pre-1914 German society in *Im Schlaraffenland* (1901, Eng trans *Berlin, the Land of Cockaigne*, 1925), and the trilogy describing the three classes of Kaiser WILHELM II's empire, *Die Armen* (1917, 'The Poor'), *Der Untertan* (1918, 'The Subject') and *Der Kopf* (1929, 'The Head'). He is best known for the macabre, Expressionist novel, *Professor Unrat* (1905, 'Professor Garbage'), describing the moral degradation of a once outwardly respectable schoolmaster, which was translated and filmed as *The Blue Angel* (1932). He lived in France (1933–40) and then escaped to the USA. Other works include *Die kleine Stadt* (1901, 'The Little Town'), set in a small Italian town, and a remarkable autobiography, *Ein Zeitalter wird besichtigt* (1945–46, 'Exposition of an Era'). His influence is evident in the works of JAKOB WASSERMANN and LION FEUCHTWANGER. 📖 R N Lina, *Heinrich Mann* (1967)

Mann, Horace 1796–1859
US educationalist
Born in Franklin, Massachusetts, he entered the Massachusetts legislature in 1827, and was president of the state senate (1827–37). As Secretary of the Massachusetts Board of Education (1837–48), he improved and reorganized the public school system and established the basis for universal, non-sectarian public education. His call for free public education as a bulwark of democracy had a national influence. He became a member of the House of Representatives (1848–53), and president of Antioch College, Ohio (1852–59). He is regarded as the 'father of American public education'.

Mann, Thomas *See panel above*

Mannerheim, Carl Gustav Emil, Baron 1867–1951
Finnish soldier and politician
He was born in Villnäs, but fought in the Russian army during the Russo-Japanese War (1904–05) and World War I. When Finland declared her independence (1918), he became Supreme Commander and regent. Defeated in the presidential election of 1919, he retired into private life, but returned as commander-in-chief against the Russians in the Russo-Finnish War of 1939–40. He continued to command the Finnish forces until 1944, when he became president of the Finnish Republic, remaining in office until 1946. He died at Lausanne, Switzerland. 📖 S Jagerskjold, *Mannerheim* (1987)

Mannheim, Karl 1893–1947
German sociologist
Born in Budapest, Hungary, he was educated at the universities of Budapest and Strasbourg. In 1919, after the Hungarian revolution, he emigrated to Heidelberg, became a lecturer at the university (1925), and in 1930 was appointed professor of sociology and political economy at Frankfurt University. When he was expelled from Germany by the Nazis in 1933, he fled to England, where he joined the London School of Economics. In 1945 he became professor of sociology and philosophy of education at the London University Institute of Education. One of the founders of the sociology of knowledge, he also wrote

about political planning and education. His books include *Ideology and Utopia* (1929, trans 1936), *Man and Society in an Age of Reconstruction* (1935, trans 1940), *Freedom, Power and Democratic Planning* (1950) and *Diagnosis of Our Time* (1943).

Manning, Henry Edward 1808–92
English Roman Catholic prelate
Born in Totteridge, Hertfordshire, he was educated at Harrow and Balliol College, Oxford. After taking a classical first in 1830, he was elected a Fellow of Merton (1832). An eloquent preacher and a High Churchman, in 1833 he became rector of Woollavington and Graffham, Sussex, and in 1840 archdeacon of Chichester. In 1851, he joined the Roman Catholic Church, and in 1865 succeeded Cardinal WISEMAN as Archbishop of Westminster. At the Ecumenical Council of 1870 Manning was one of the most zealous supporters of the infallibility dogma, and, elected a cardinal in 1875, continued as a leader of the Ultramontanes. He was a member of the royal commissions on the housing of the poor (1885) and on education (1886), and took a prominent part in temperance and benevolent movements.

Manning, Dame (Elizabeth) Leah, *née* **Perrett** 1886–1977
English Labour politician
Born in Rockford, Illinois, she was strongly influenced by the legend of her great-grandmother (by marriage), the Methodist philanthropist Susan Tappin, who did good works among the poor of London's East End. She trained as a teacher at Homerton College, Cambridge, where she also began her involvement with the Fabian Society. She was an MP in the Labour government (1929–31, 1945–50), and she tirelessly championed the Republican cause during the Spanish Civil War. Her publications include *What I Saw in Spain* (1933), in which she strongly advocates a policy of non-intervention, and her autobiography, *A Life for Education* (1970). She was created DBE in 1966.

Manning, Olivia 1908–80
English novelist
She was born in Portsmouth, but spent much of her youth in Ireland, and had 'the usual Anglo-Irish sense of belonging to nowhere'. She trained at art school, and then went to London, and in 1937 published her first novel, *The Wind Changes*. She married in 1939 and went abroad that year with her husband, Reggie Smith, a British Council lecturer in Bucharest. Her experiences there formed the basis of her 'Balkan trilogy', comprising *The Great Fortune* (1960), *The Spoilt City* (1962) and *Friends and Heroes* (1965). When the Germans approached Athens, she and her husband evacuated to Egypt, finally ending up in Jerusalem. She returned to London in 1946, where she lived until her death. Her prolific output includes *Artist Among the Missing* (1949), *A Different Face* (1953), and her 'Levant trilogy', comprising *The Danger Tree* (1977), *The Battle Lost and Won* (1978) and *The Sum of Things* (1980). The 'Balkan trilogy' and the 'Levant trilogy' form a single narrative entitled *Fortunes of War*, which ANTHONY BURGESS described as 'the finest fictional record of the war produced by a British writer'. 🕮 K Dick, *Friends and Friendship* (1974)

Manning, Thomas 1772–1840
English traveller
Born in Broome, Suffolk, he went to Caius College, Cambridge, to study Chinese (1790), and in 1806 went to Canton as a doctor. In 1811–12 he was the first Englishman to visit Lhasa in Tibet. He returned to England in 1817, and later travelled to Italy (1827–29).

Mannix, Daniel 1864–1963
Australian Catholic archbishop
Born in Deerpark, Rathluirc, County Cork, Ireland, and ordained at Maynooth in 1890, he was appointed Coadjutor-Archbishop of Melbourne, Australia, in 1912 and Archbishop in 1917, and campaigned strongly for the rights of Catholics in Australian society, especially state aid for Church schools. After the Easter Rising in Ireland (1916) he became an outspoken supporter of Irish Home Rule, and opposed WILLIAM MORRIS HUGHES's demands for conscription in 1916–17. His position verged on a populist identification with the working classes, with whom he enjoyed an immense prestige which he never lost; the social establishment demanded his deportation. In 1920, after being fêted in the USA, he returned to Europe but was refused entry to Ireland by the British government. His social views involved a hostility to capitalism that for many years made him close to the Australian Labor Party, but increasingly he came to regard communism as the greater threat, and he supported the Democratic Labor Party after the Labor Party split of the mid-1950s. His involvement with the Catholic laity and his combative nature made him a powerful force in Australian society and politics for half a century.

Manns, Sir August 1825–1907
German musician
Born in Prussia, he became musical director at the Crystal Palace in London in 1855, and from 1883 to 1902 conducted the HANDEL Festivals.

Mannyng, Robert, *also known as* **Robert of Brunne** d.c.1338
English chronicler and poet
Born in Bourne, Lincolnshire, he entered the nearby Gilbertine monastery of Sempringham in 1288. His chief work is *Handlynge Synne* (c.1303), a free and amplified translation into English rhyming couplets of the *Manuel des Pechiez* of William of Wadington. It is a landmark in the transition from early to later Middle English, and a colourful picture of contemporary life. He also composed a rhyming translation of ROBERT WACE's *Brut d'Angleterre*, with a translation from French of a rhyming chronicle, *The Story of Ingeland*, by the Augustinian canon, Peter Langtoft. 🕮 R Crosby, *Robert Mannyng of Brunne: A New Biography* (1942)

Manoel I, *also spelt* **Manuel** or **Emanuel I**, *called* **the Fortunate** or **the Great** 1469–1521
King of Portugal
Born in Alcocheta, he was the grandson of John I, and succeeded John II (1495). His reign, marred by persecution of the Jews, consolidated royal power, and marked a golden age for Portugal: he prepared the code of laws which bears his name, and made his court a centre of chivalry and the arts. He also sponsored the voyages of VASCO DA GAMA, PEDRO CABRAL, ALBUQUERQUE and others, which helped to make Portugal the first naval power of Europe, opened up sea trade with India, discovered Brazil and consolidated Portuguese presence in the East.

Manrique, César 1919–92
Spanish artist and ecologist
Born in Arrecife, Lanzarote, Canary Islands, he fought in the Spanish Civil War in Catalonia in 1937. In 1945 he went to Madrid to study at the San Fernando Fine Art School, and in 1953 he defied General FRANCO by painting abstracts. Exhibitions in Europe, Japan, the USA, and at the 28th Venice Biennale brought him international recognition. Returning from a stay in New York in 1968, he became the arbiter of artistic taste on his island, and by prohibiting high-rise buildings he prevented some of the worst excesses of mass tourism. He was killed in a road accident, leaving as lasting monuments to his sense of design a unique cactus garden, a house containing his paintings (the Fundacion César Manrique), and public sculptures all over Lanzarote.

Manrique, Jorge 1440–79
Spanish poet
Born in Paredes de la Nava, he is best remembered for his elegy on his father's death, *Coplas por la muerte de su padre* ('Verses for the Death of his Father'). He also wrote love-songs, satires and acrostic verses. He was killed in the civil wars. 🕮 A Serraro de Hero, *Personalidad y destino de Jorge Manrique* (1966)

Mansard or **Mansart, François** 1598–1666
French architect
Born in Paris, he was apprenticed to SALOMON DE BROSSE. Considered to embody French 17th-century Classicism, his mastery is evident in his first major work, the north wing of the Château de Blois, which featured the double-angled high-pitched roof which bears his name. He designed churches such as Sainte Marie de la Visitation and Val-de-Grâce, and built or remodelled several notable buildings in Paris and elsewhere, such as the Hôtel de la Vrillière and the Château de Maisons.

Mansard or **Mansart, Jules Hardouin** 1645–1708
French architect
Born in Paris, he became chief architect to LOUIS XIV and designed many notable buildings, especially part of the Palace of Versailles, including the Grand Trianon. He was the great-nephew by marriage of FRANÇOIS MANSARD.

Mansbridge, Albert 1876–1952
English adult educator
Born in Gloucester and educated at Board schools and Battersea Grammar School, he left school aged 14, and became a clerk and then cashier of the Co-operative Permanent Building Society. After attending extension classes at King's College London, he became an evening-class teacher under the London School Board. He proposed a scheme in 1903 which led to the formation of the Association to Promote the Higher Education of Working Men, later known as the Workers'

Educational Association (WEA). In 1905 he became general secretary, encouraging the development of branches and setting great store by the three-year university tutorial classes which an Oxford conference on the WEA and the university advocated in 1907. After visits to the Commonwealth in 1913–14 he became seriously ill but was instrumental in founding the National Central Library (1916), and was a member of the adult education committee of the Ministry of Reconstruction which produced an important report in 1919. Among his publications is a biography of MARGARET MCMILLAN.

Mansell, Nigel Ernest James 1953–
English racing driver
Born in Solihull, West Midlands, he made his Grand Prix debut in 1980, and had his first win in 1985, with the Williams team. He finished second in the 1986 world championship after a burst tyre forced his withdrawal in the last race. Following a spell with Ferrari, he returned to Williams in 1991, and in 1992 won the world championship. He did not defend his title, preferring to drive in the Indycar circuit in the United States. He won his first race in Australia in 1993, where he was the first driver to win his maiden race since GRAHAM HILL's victory at the Indianapolis 500 in 1966, and in 1993 he became the first man to win the Indycar world series championship in his rookie year. He made a brief return to Formula One racing in 1995 but retired later that year.

Mansfield, Katherine, *pen name of* **Kathleen Mansfield Beauchamp** 1888–1923
New Zealand short-story writer
Born in Wellington, she was educated at Queen's College, London, returned briefly to New Zealand to study music, then left again for London in 1908, determined to pursue a literary career. Finding herself pregnant, she was installed by her mother in a hotel in Bavaria, but miscarried. The experience bore fruit in the stories collected as *In a German Pension* in 1911. That same year she met JOHN MIDDLETON MURRY, and thereafter her work began to surface in Murry's *Rhythm*. From 1912 the couple lived together (they married in 1918), mingling with the literati, particularly D H LAWRENCE, who portrayed them as Gudrun and Gerald in *Women in Love* (1921). Her first major work was *Prelude* (1917), a recreation of the New Zealand of her childhood. *Bliss, and Other Stories* (1920), containing the classic stories 'Je ne parle pas français' and 'Prelude', confirmed her standing as an original and innovative writer. The only other collection published before her premature death from tuberculosis was *The Garden Party, and Other Stories* (1922). Posthumous collections include *Something Childish and Other Stories* (1924, published in the USA as *The Little Girl and Other Stories*, 1924). *The Letters of Katherine Mansfield*, edited by Murry, appeared in 1928 and *Katherine Mansfield's Letters to John Middleton Murry 1913–1922*, detailing the couple's stormy but tender relationship appeared in 1951. Vincent O'Sullivan edited *Poems of Katherine Mansfield* (1988), and her work for the theatre was collected in *Katherine Mansfield: Dramatic Sketches* (1988). 🕮 Claire Tomalin, *Katherine Mansfield: A Secret Life* (1988)

Mansfield, Sir Peter 1933–
English physicist and Nobel Prize winner
He was born in London in 1933, and left school at 15 to work as a printer's assistant before going to university in London in 1956. Since 1964, he has worked at the University of Nottingham. His research has centred on nuclear magnetic resonance (NMR), a technique for probing matter with radio waves which was originally used solely for inert materials such as metals. In the 1970s, Mansfield developed the mathematical tools for turning the radio signals from NMR into images, paving the way for the magnetic resonance imaging used in medicine. For this he was awarded the 2003 Nobel Prize in physiology or medicine, which he shared with PAUL LAUTERBUR.

Mansfield, William Murray, 1st Earl of 1705–93
English judge
Born in Perth, Scotland, the fourth son of Viscount Stormont, he was educated at Westminster and Christ Church, Oxford. He was called to the Bar in 1730 and soon acquired an extensive practice. He was appointed Solicitor-General in 1742, entered the House of Commons as MP for Boroughbridge, was appointed Attorney-General (1754), and became Chief Justice of the King's Bench (1756) and a member of the Cabinet, and was created Baron Mansfield. His judgements were influential, particularly by incorporating many principles of mercantile custom in rules of law and therefore developing the law of maritime contracts, insurance and bills. He also made important contributions to international law. He was impartial as a judge, but his opinions were unpopular. 'Junius' (Sir PHILIP FRANCIS) bitterly attacked him, and during the Gordon riots of 1780 his house was burned. Made Earl in 1776, he resigned office in 1788.

Manship, Paul Howard 1885–1966
US sculptor
Born in St Paul, Minnesota, he studied in New York and Philadelphia, and attended the American Academy in Rome from 1908 to 1912. Returning to New York, he became renowned for his bronze figurative sculptures, which drew heavily on Roman and Greek sources. His subject matter is taken principally from Classical mythology and treated in the stylized, decorative manner of the Art Deco period. From 1921 to 1927 he worked in Paris. His many important commissions include the gilded *Prometheus Fountain* (1934) for the Rockefeller Center, New York. In the 1930s he was widely regarded as the USA's greatest sculptor, but his mannered style later became unfashionable.

Manson, Charles, *originally* **Charles Milles Maddox** 1934–
US cult leader and murderer
Born in Cincinnati, Ohio, the son of a prostitute, he committed his first armed robbery at the age of 13 and a rape at 17. In 1960 he was imprisoned for a variety of offences including procuring, fraud and theft. On his release in 1967 he set up a hippy commune, first in San Francisco and later at the Saphn ranch outside Los Angeles. It became a base for various criminal activities. The group was called 'the Family', and Manson was unquestionably the leader. He had enormous power over his followers and began drawing up a death list of 'Pigs' – people to be killed starting on a day code-named 'Helter Skelter'. He ordered his followers to carry out the killings. In 1979 he was found guilty of nine murders and sentenced to life imprisonment.

Manson, Sir Patrick, *known as* **Mosquito Manson** 1844–1922
Scottish physician
Born in Oldmeldrum, Aberdeen, he studied medicine in Aberdeen and then practised in China (from 1871) and Hong Kong (from 1883), where he helped start and was the first dean of a school of medicine that became the University of Hong Kong. In China, he studied a chronic disease called elephantiasis and showed that it is caused by a parasite spread through mosquito bites. This was the first disease to be shown to be transmitted by an insect carrier. In 1890 Manson set up practice in London, where he became the leading consultant on tropical diseases and was appointed medical adviser to the Colonial Office, and in 1899 he helped to found the London School of Tropical Medicine. He was the first to argue that the mosquito is host to the malaria parasite (1877), and encouraged Sir RONALD ROSS's malaria research.

Manstein, Fritz Erich von 1887–1973
German soldier
At the outset of World War II he became chief of staff to KARL VON RUNDSTEDT in the Polish campaign and later in France, where he was the architect of HITLER's *Blitzkrieg* invasion plan. In 1941 he was given command of an army corps on the Eastern Front. After the disaster of Stalingrad, he successfully staged a counter-attack at Kharkov, though he failed to relieve FRIEDRICH PAULUS's 6th Army. After being captured in 1945 he was imprisoned as a war criminal but released in 1953.

Mansur, al-, *meaning* **the victorious** d.775
A title assumed by many Muslim princes
It was most notably assumed by the cruel and treacherous 'Abbasid caliph Abu-Jafar, who succeeded his brother al-Saffah in 754 and founded Baghdad in 764. He died while leading his fifth pilgrimage to Mecca.

Mantegna, Andrea 1431–1506
Italian painter
Born near Vicenza, he was apprenticed to the tailor-painter Francesco Squarcione (1396–c.1468) in Padua and seems to have been adopted by him. In 1453 he married a daughter of Jacopo Bellini and quarrelled with his master. In 1459 he was persuaded by Ludovico Gonzaga, Duke of Mantua, to work for him, and remained in Mantua in his service for the rest of his life with the exception of a two-year stay in Rome (1488–90) when he painted a fresco cycle (now destroyed) for the private chapel of Pope Innocent VIII. In Padua he had come under the influence of DONATELLO and his debt to him is evident in works such as his Saint Zeno Altarpiece and his *Saint Sebastian*. His style is very sculptural and ostentatious in its use of foreshortening. At Mantua his most important works were

nine tempera pictures of *The Triumph of Caesar* (c.1486) which were later acquired by the English king CHARLES I and are now at Hampton Court Palace, and his decoration of the ceiling of the Camera degli Sposi. The latter is an illusionistic tour-de-force in which the ceiling is opened up to the heavens and putti look down from the painted balustrade. This is the first example of an effect which became common during the Baroque era. The other chief feature of his art was his incorporation of Classical motifs into his compositions. In this he strove for accuracy, and with this aim he built up a collection of Classical statuary which was the envy of the pope.

Mantel, Hilary Mary 1952–
English novelist
Born in Derbyshire, she studied law at the London School of Economics and Sheffield University, and worked as a social worker and English teacher. She lived in Botswana and Saudi Arabia for several years before returning to Britain in the mid-1980s. She served as film critic for *The Spectator* from 1987 to 1991, and is the author of ten novels including *Every Day Is Mother's Day* (1985), *The Giant* (1998) and *Beyond Black* (2005). She has won several awards, including the Shiva Naipaul Memorial Prize for an article about Jeddah (1997). She is a fellow of the Royal Society of Literature, and was awarded the CBE in 2006.

Mantell, Gideon Algernon 1790–1852
English palaeontologist
Born in Lewes, Sussex, he studied medicine in London and returned to Lewes as a practising surgeon. Busy and successful, he also took time to study the local geology and collected many fossils which were put on show to the public. He wrote *The Fossils of the South Downs* in 1822, moved to Brighton in 1833 and was able to complete his *Geology of the South-east of England* by 1837. His collection was sold to the British Museum in 1838 and he followed it to London in 1844. He discovered several dinosaur types, including the first to be fully described; noting the similarity between the fossil teeth and those of the living iguana, he named it 'Iguanodon' (1825). In 1831 he introduced the notion of the 'age of reptiles', one of the earliest pictorial representations of which was produced by the celebrated artist John Martin (1789–1819) for Mantell's *The Wonders of Geology* (1838).

Mantle, Mickey (Charles) 1931–95
US baseball player
Born in Spavinaw, Oklahoma, he achieved legendary status as a star with the New York Yankees. Highlights of his career included a record 177-metre home run, seven World Series titles and, in 1956, his winning of a Triple Crown in batting, home runs and runs batted in, despite the fact that his career was much disrupted by injury. Admired as a hitter, baserunner and centre fielder without equal, he won three Most Valuable Player awards and was elected to the Baseball Hall of Fame in 1974.

Manuel I, Comnenus c.1122–1180
Byzantine emperor
He was the youngest son of John II, whom he succeeded in 1143. Although he absorbed Croatia, Bosnia and Dalmatia into the empire (1167), his initial successes against the Turks and the Normans were halted by the catastrophic defeat of his army by the Seljuks at Myriokephalon (1176). This marked the beginning of the downfall of the empire.

Manuel II, Palaeologus 1350–1425
Byzantine emperor
The son of John V Palaeologus, he became emperor in 1391 (but reverted to being co-emperor 1399–1402 and 1421–25). For much of his reign he was besieged in Constantinople (Istanbul) by the Turks. At one point he was relieved by the advance of TIMUR into Asia Minor, but he failed to profit from this diversion and was overwhelmed, finally retiring to a monastery.

Manuel, Nikolaus, *called* **Deutsch** 1484–1530
Swiss painter, poet and reformer
Born in Bern, he began as a painter of stained glass but changed over to orthodox media and produced biblical and mythological pictures in the Renaissance style, often showing the influence of HANS BALDUNG in his tendency toward the macabre. He held several government offices, was a member of the Great Council, and wrote satirical verse.

Manuel, Peter 1931–58
Scottish criminal
Born in New York, of Scottish parentage, he emigrated with his family to Glasgow during the Depression. Between September 1956 and January 1958, in addition to committing a number of burglaries, he broke into the home of William Watt in Rutherglen and shot the three occupants dead, strangled and robbed a girl at Mount Vernon, robbed a house in Uddingston, killing all three of the family who lived there, and shot dead a Newcastle taxi driver. He was also accused of battering to death Ann Kneilands of East Kilbride, but was acquitted through lack of evidence. His trial at Glasgow High Court was one of the most highly publicized in legal history. Having already successfully defended himself against a former charge, he dismissed the counsel appearing on his behalf. Conducting his case with some skill, he brought in a special defence plea giving alibis and accusing William Watt himself, already a suspect, of the Rutherglen murders. Manuel, however, was found guilty of seven of the murders, and hanged. The Newcastle shooting was later officially attributed to him by an inquest jury.

Manutius, Aldus *See* ALDUS MANUTIUS

Manzoni, Alessandro 1785–1873
Italian novelist and poet
Born in Milan, of a noble family, he lived in Paris from 1805 to 1807, and published his first poems in 1806. Having married happily in 1810, he spent the next few years writing sacred lyrics and a treatise on the religious basis of morality. But the work which gave him European fame is his historical novel, *I promessi sposi* (1827, Eng trans *The Betrothed Lovers*, 1828), a Milanese story of the 17th century, and one of the most notable novels in Italian literature. Despite his Catholic devoutness, he was a strong advocate of a united Italy, and became a senator of the kingdom in 1860. 🕮 A Colquhoun, *Manzoni and His Times* (1954)

Manzú, Giacomo 1908–91
Italian sculptor
He was born in Bergamo, and was apprenticed to various craftsmen, including a woodcarver and a stuccoist, before studying at the Fantoni Trade School. In 1930 he was commissioned to make religious reliefs and saints for the Catholic University of Milan, and in 1936 he visited Paris, where he admired the work of AUGUSTE RODIN. He held his first one-man exhibition in Rome in 1937, and subsequently taught sculpture in Milan (1940) and Turin (c.1940–45). He revived Classical techniques of relief sculpture in bronze, and is particularly known for the bronze doors of St Peter's in Rome (1950) and of Salzburg Cathedral, Austria (1955). He also made a commissioned portrait bust of Pope JOHN XXIII for the Vatican (1963) and a relief of *Mother and Child* in The Rockefeller Center in New York (1965).

Mao Dun (Mao Tun), *pseudonym of* **Shen Yanbing (Shen Yen-ping)** 1896–1981
Chinese writer
He was born in Wuzhen, Zhejiang (Chekiang) province, educated at Beijing (Peking) University, and became a founder member of the Literary Research Society (1920), and editor of the *Short Story Monthly* (1921–23). Moving to Shanghai, he taught a course of fiction at Shanghai College, and became editor of the *Hankou (Hankow) National Daily*, but in 1926 he had to go underground because of his Communist sympathies. He wrote a trilogy of novellas, published as *Shi* (1930, 'Eclipse'), a bestselling novel, *Ziye* (1932, 'Midnight'), about financial exploiters in the decadent Shanghai of the time, and a collection of short stories. In 1930 he helped to organize the influential League of Left-Wing Writers. After the Communists came to power in 1949 he was China's first Minister of Culture (1949–65), and founder editor of the literary journal *People's Literature* (1949–53). During the Cultural Revolution he was kept under house arrest in Beijing (1966–78). 🕮 M Galik, *Mao Tun and Modern Chinese Literary Criticism* (1969)

Mao Zedong (Mao Tse-tung) *See panel p1036*

Map or **Mahap** or **Mapes, Walter** c.1137–1209
British ecclesiastic and writer
Born probably in Herefordshire, England, he is sometimes said to have been a Welshman. He studied at Paris, became a clerk to HENRY II of England, went on a mission to Rome, and became canon of St Paul's and archdeacon of Oxford (1197). Although famous in his day as a writer and wit, the only work which can be attributed to him with certainty is the satirical miscellany *De Nugis Curialium* ('Of Courtiers' Trifles'), a collection of anecdotes, reflections and tales gleaned from history, romance and gossip. 🕮 T Wright, *Latin Poems Commonly Attributed to Walter Map* (1879)

Mao Zedong (Mao Tse-tung) 1893–1976
Chinese Communist leader and first Chairman of the People's Republic

Mao Zedong was born in Shaoshan in Hunan province, the son of a peasant farmer. He was educated at Changsha, and in 1918 went to the University of Beijing (Peking), where as a library assistant he studied the works of MARX and others and helped found the Chinese Communist Party (CCP) in 1921. Seeing the need to adapt communism to Chinese conditions, and seeking a rural rather than urban-based revolution, he set up a communist 'people's republic' (soviet) at Jiangxi (Kiangsi) in south-east China between 1931 and 1934. The soviet defied the attacks of CHIANG KAI-SHEK's forces until 1934, when Mao and his followers were obliged to uproot themselves and undertake an arduous and circuitous 'Long March' (1934–36) to Shaanxi (Shensi) province in north-west China.

During the Long March, Mao was elected CCP chairman at the Zunyi conference of February 1935. At the new headquarters of Yan'an, he set about formulating a unique communist philosophy which stressed the importance of ideology, re-education and 'rectification', and, in 1939, he married his third wife, JIANG QING.

By employing the tactic of mobile, rural-based guerrilla warfare, Mao's communists successfully resisted the Japanese between 1937 and 1945, and on their collapse issued forth to shatter the Nationalist regime of Chiang Kai-shek and proclaim the People's Republic of China in Beijing in 1949, with Mao as chairman. Mao resigned the chairmanship of the Republic in 1959, but remained chairman of the CCP's politburo until his death.

During the early 1960s, an ideological rift developed between Mao and KHRUSHCHEV, with Mao opposing the latter's policy of peaceful co-existence with the West and the USSR's volte-face during the Cuban missile crisis (1962). This developed into a formal split in 1962 when the Soviet Union supplied fighter aircraft to India during the brief Sino-Indian border war of that year. In China, Mao's influence waned during the early 1960s as a result of the failure of the 1958–60 'Great Leap Forward' experiment of rapid agricultural and industrial advance through the establishment of massive communes. However, Mao re-established his dominance by implementing the 1966–69 'Cultural Revolution', a campaign of rectification directed against liberal, revisionist forces. This was the period of the Red Guard excesses, following which Mao, working closely with ZHOU ENLAI, oversaw a period of reconstruction from 1970.

During his final years, he was beset by deteriorating health, and his political grip weakened. Mao's writings and thoughts, set out in *New Democracy* (1940) and, most popularly, in his *Little Red Book*, dominated the functioning of the People's Republic between 1949 and 1976. He stressed the need for reducing rural–urban differences and for 'perpetual revolution' to prevent the emergence of new élites. Overseas, after precipitating the Sino-Soviet split of 1960–62, Mao became a firm advocate of a non-aligned 'Third World' strategy.

On his death at the age of 83, there followed a power struggle that was briefly won by the so-called 'Gang of Four', who included Mao's widow, Jiang Qing. After 1978, the new Chinese leadership of DENG XIAOPING began to re-interpret Maoism and criticized its policy excesses. However, many of Mao's ideas remain influential in contemporary China.

📖 Jung Chang and Jon Halliday, *Mao: The Unknown Story* (2005)

> 'Politics is war without bloodshed; war is politics with bloodshed.'
>
> – From a speech, 1938.

Mapplethorpe, Robert 1946–89
US photographer
Born in Floral Park, New York, he studied fine art at the Pratt Institute but from the early 1970s concentrated increasingly on photography. A close friendship with PATTI SMITH led to a renowned series of portraits and the cover of her acclaimed album *Horses* (1975), and he began to photograph other friends, acquaintances and lovers in the New York underground scene. His explicit photographs of gay sadomasochistic practices and his homoerotic nude studies lent him a provocative, transgressive allure and ensured his notoriety, but he also executed flawless portraits and floral still lifes that belied his demonic reputation; his immaculate black and white photographs employ shadow and light in a stylized and formally perfect manner. He continued his unflinching series of self-portraits even while gravely ill from an AIDS-related illness.
📖 Patricia Morrisroe, *Mapplethorpe: A Biography* (1990)

Mar, John Erskine, 6th or **11th Earl of** 1675–1732
Scottish Jacobite
He was born in Alloa, Clackmannanshire. He began public life as a Whig, but his frequent changes of side earned him the nickname of 'Bobbing John'. He headed the Jacobite rebellion of 1715, was defeated at Sheriffmuir, and died in exile at Aix-la-Chapelle. His *Legacy* was published by the Scottish History Society in 1896.

Maradona, Diego 1960–
Argentine footballer
Born in Lanús, he played in the 1982 World Cup in Spain, but was sent off in the second-phase defeat to Brazil. He soon joined Barcelona from his home-country club, Boca Juniors, but injury and illness kept him out of top-class football for two seasons. He then moved for $4.68 million to Napoli, playing for the team from 1984 and helping them to their first-ever Italian championship in 1987. He captained the Argentine side to World Cup victory in Mexico in 1986. His performance in the quarter-final against England summed up this flawed genius: he illegally punched the ball into the net for his first goal, an action which he subsequently attributed to 'the hand of God', and then went on to score one of the greatest goals of all time, beating five England players in a dribble from the halfway line. With his speed, phenomenal strength and balance, he was one of the greatest players of his generation, but in later years his career was marred by repeated suspensions for drug use. He left Napoli in 1991 after being suspended for 15 months following a positive drugs test, and in 1993 he returned to Argentina after being released by his club, Sevilla. He was again suspended after failing a drugs test at the 1994 World Cup, and subsequently played only intermittently.

Maragall i Gorina, Joan 1860–1911
Catalan poet and essayist
He was born in Barcelona and worked throughout his career as a journalist, contributing essays and articles to the *Barcelona Daily* newspaper, at the same time publishing lyric poetry regarded by many as the first stirrings of Catalan modernism. Collections include *Visions and Songs* (1900), which draws on Catalan folk tales, and *Següencies* (1911), which contains his most celebrated poem, *Cant espíritual*.

Marais, Marin 1656–1728
French composer and viol player
Born in Paris, he was in the Sainte Chapelle choir as a boy. A bass violist in the Royal Band and in the orchestra of the Paris Opera, he was appointed joint conductor of the Paris Opera. He studied with JEAN BAPTISTE LULLY, and wrote several operas, the most famous of which was *Alcyone* (1705), but his posthumous and growing reputation is based on his music for the viol.

Marat, Jean Paul 1743–93
French revolutionary, physician and journalist
Born in Boudry near Neuchâtel, Switzerland, he studied medicine and practised in London in the 1770s and in Paris from 1777. He was brevet-physician to the guards of the Comte d'Artois (afterwards CHARLES X) until 1786, and during that time worked in optics and electricity, and produced several scientific works. He became a member of the Cordeliers' Club, and in 1789 he established the radical paper, *L'Ami du Peuple*, inciting the 'sans-culottes' to violence. The hatred he inspired forced him into hiding several times, once in the sewers of Paris. His consequent loathing of constituted authority influenced the September Massacres. In 1792 he was elected to the Convention, and with ROBESPIERRE and DANTON he overthrew the Girondins. A skin disease contracted in the sewers meant he could only write sitting in his bath, and on the evening of 13 July he was assassinated there by CHARLOTTE CORDAY, a member of the Girondins.

Maratti, Carlo 1625–1713
Italian painter
Born in Camerano, as a leader of the 17th-century Baroque school he painted many notable canvases and frescoes in Rome, and several portraits.

Marbeck or **Merbecke, John** d.c.1585
English musician and theologian
Organist of St George's Chapel, Windsor, he was condemned to the stake in 1544 as a reformer, but pardoned by Bishop GARDINER. In 1550 he published his famous *Boke of Common Praier Noted*, an adaptation of the plainchant to the first prayer book of EDWARD VI. He prepared the earliest concordance to the whole English Bible, and wrote several theological works.

Marc, Franz 1880–1916
German artist
Born in Munich, with WASSILY KANDINSKY he founded the Blaue Reiter Expressionist group in Munich in 1911. Most of his paintings were of animals (eg *Tower of the Blue Horses*, 1911 and *The Fate of the Animals*, 1913), portrayed in forceful colours, with a well-defined pictorial rhythm. He was killed in World War I at Verdun.

Marcantonio, *in full* **Marcantonio Raimondi** c.1488–1534
Italian engraver
Born in Bologna, he began as a goldsmith, but moved to Rome in 1510 and became an engraver of other artists' works, especially those of RAPHAEL and MICHELANGELO. The capture of Rome by CHARLES BOURBON in 1527 drove him back to Bologna.

Marceau, Marcel, *originally* **Marcel Mangel** 1923–
French mime artist
He was born in Strasbourg, and studied at the École des Beaux-Arts in Paris. In 1948 he founded and directed (1948–64) the Compagnie de Mime Marcel Marceau, specializing in and developing the art of mime, of which he has become the leading exponent. His white-faced character 'Bip' became famous worldwide from his appearances on stage and television. Among the many original performances he has devised are the mime-drama *Don Juan* (1964) and the ballet *Candide* (1971). He became head of the École Mimodrame Marcel Marceau in 1978. He is recipient of several awards, including being created an Officer of the Legion of Honour. In 1999, he revived his solo show in the USA. He continues to produce work with his company, including *Le Chapeau Melon* ('The Bowler Hat', 1997) and *Les Contes Fantastiques* ('Fantastic Tales', 2003). In 2002 he was appointed Goodwill Ambassador for the United Nations Second World Assembly on Ageing. 🕮 Ben Martin, *Marcel Marceau: Master of Mime* (1978)

Marcel, Gabriel Honoré 1889–1973
French existentialist philosopher and dramatist
Born in Paris, he was a Red Cross worker in World War I but made his living thereafter as a freelance writer, teacher, editor and critic. In 1929 he became a Catholic and came reluctantly to accept the label 'Christian Existentialist', partly in order to contrast his views with those of JEAN-PAUL SARTRE. He emphasized the importance and possibility of 'communication' between individuals, as well as between the individual and God, but was suspicious of all philosophical abstractions and generalizations which misrepresented the freedom, uniqueness and particularity of each person. He was not himself a system-builder and his philosophical works tend to have a personal, meditative character, as in *Journal métaphysique* (1927, Eng trans *Metaphysical Journal*, 1952), *Être et avoir* (1935, Eng trans *Being and Having*, 1949), *Le Mystère de l'être* (1951, Eng trans *The Mystery of Being*, 1951), *Les Hommes contre l'humain* (1951, Eng trans *Men Against Humanity*, 1952) and *L'Homme problématique* (1955, Eng trans *Problematic Man*, 1967). His plays include *Un Homme de Dieu* (1925, 'A Man of God'), *Le Monde cassé* (1933, 'The Broken World'), *Ariadne: Le Chemin de Crête* (1936, Eng trans *Ariadne*, 1952) and *La Dimension Florestan* (1956, 'The Florestan Dimension'). 🕮 S Keen, *Gabriel Marcel* (1967)

Marcello, Benedetto 1686–1739
Italian composer
Born in Venice, he is remembered for his *Estro poetico armonico* (1724–27), an eight-volume collection of 50 settings in cantata style of the Psalms of David, for his oratorio *Le Quattro Stagioni* (1731), and for his keyboard and instrumental sonatas. He also wrote the satirical *Il Teatro alla moda* (1720). A judge of the Venetian republic, he was a member of the Council of Forty, and afterwards held offices at Pola and Brescia. His brother Alessandro (c.1684–c.1750), philosopher and mathematician as well as composer, published a number of cantatas, sonatas and concertos under the pseudonym 'Eterico Stinfalico'.

Marcellus, Marcus Claudius, *known as* **the Sword of Rome** c.268–208 BC
Roman general
His main exploits were the defeat of the Insubrian Gauls (222 BC) and the capture of Syracuse (212 BC). During the Second Punic War (218–201 BC) he stopped HANNIBAL at Nola (216 BC).

Marcellus, Marcus Claudius 42–23 BC
Roman nobleman
He was a son of OCTAVIA, the sister of the Emperor AUGUSTUS, and married his 14-year-old cousin JULIA in 25 BC. That same year Augustus adopted Marcellus, who served under him in Spain, and named him his first successor; his early death was widely regarded as a national calamity and was lamented by VIRGIL in the *Aeneid* (vi. 861–87).

March, Ausiàs 1397–1459
Catalan poet
Born in Valencia, he was a pioneer of the trend away from the lyricism of the troubadours towards a more metaphysical approach. Influenced by Italian models, he wrote chiefly on the themes of love and death. 🕮 A Pagès, *Auziàs March et ses prédécesseurs* (1912)

March, Francis Andrew 1825–1911
US philologist
Born in Millbury, Massachusetts, he was educated at Amherst College, studied law in New York and was admitted to the Bar in 1850. After some years of teaching, he became professor of English language and comparative philology at Lafayette College, Easton, Pennsylvania (1857–1906), and came to be regarded as the founder of comparative Anglo-Saxon linguistics. Among his publications were the monumental *Comparative Grammar of the Anglo-Saxon Language* (1870) and *An Anglo-Saxon Reader* (1870). From 1879 to 1882 he was director of the American readers for the *New English Dictionary* (later named the *Oxford English Dictionary*).

March, Fredric, *originally* **Frederick Ernest McIntyre Bickel** 1897–1975
US actor
Born in Racine, Wisconsin, he served as an artillery lieutenant in World War I. He turned to acting in 1920, becoming an extra in silent films and working extensively on stage. Under contract to Paramount he proved a versatile and subtle screen performer, whose work ranged from costume drama to screwball comedies. He won Best Actor Academy Awards for *Dr Jekyll and Mr Hyde* (1931) and as the homecoming veteran in *The Best Years of Our Lives* (1946). Other films in a long and distinguished career included *Les Misérables* (1935), *A Star Is Born* (1937), *Death of a Salesman* (1952) and *The Iceman Cometh* (1973). His many stage appearances included *The Skin of Our Teeth* (1942) and *Long Day's Journey Into Night* (1956). He was married to actress Florence Eldridge (1901–88) from 1927.

Marchais, Georges 1920–97
French Communist politician
Born in La Hoguette, Calvados, the son of a miner, he became a metalworker, and joined the French Communist Party (PCF) in 1947, becoming its Secretary-General in 1972. Under his leadership the PCF pledged its commitment to the transition to socialism by democratic means, and joined the Socialist Party (PS) in a new 'Union of the Left'. This union was, however, severed by Marchais in 1977 and the party returned to an orthodox Moscow line, although PCF ministers participated in the MITTERRAND government (1981–84). He unsuccessfully contested the 1981 presidential election and stepped down as PCF leader in 1994.

Marchand, Jean-Baptiste 1863–1934
French soldier and explorer
He joined the army at 20, explored the Niger, western Sudan and the Ivory Coast, and caused a Franco-British crisis by hoisting the tricolour at Fashoda in 1898. As a general he distinguished himself in World War I.

Marciano, Rocky, *originally* **Rocco Francis Marchegiano** 1923–69
US boxer
Born in Brockton, Massachusetts, he first took up boxing as a serviceman in Great Britain during World War II, and turned professional in 1947. He made his name in 1951 when he defeated the former world champion JOE LOUIS, who had been knocked out only once. He won the world title from Jersey Joe Walcott the following year, and when he retired in 1956 was undefeated as world champion with a professional record of 49 bouts and 49 victories. He resisted all attempts to talk him into a comeback, and died in an aircrash. 🕮 Everett Skehan, *Rocky Marciano* (1977)

Marconi, Guglielmo, Marchese 1874–1937
Italian physicist, inventor and Nobel Prize winner

Marconi was born in Bologna into a wealthy family, of an Italian father and Irish mother. He was educated for a short time at the Technical Institute of Livorno, but mainly by private tutors, and started experimenting with a device to convert electromagnetic waves (recently discovered by HEINRICH HERTZ) into electricity. His first successful experiments in wireless telegraphy were made at Bologna in 1895, and in 1898 he transmitted signals across the English Channel.

In 1899 he erected a wireless station at La Spezia, but failed to win the support of the Italian government and decided to establish the Marconi Telegraph Co in London. In 1901 he succeeded in sending signals in Morse code across the Atlantic, from Cornwall, England, to St John's, Newfoundland, and the following year he patented the magnetic detector. He later developed short-wave radio equipment, and established a worldwide radio telegraph network for the British government. From 1921 he lived on his yacht, the *Elettra*, and in the 1930s he was a strong supporter of the Italian Fascist leader MUSSOLINI.

Marconi shared the 1909 Nobel Prize in physics with FERDINAND BRAUN.

🕮 W P Jolly, *Marconi* (1972); W J Baker, *A History of the Marconi Company* (1970); Orrin E Dunlap, *Marconi: The Man and His Wireless* (1937).

Marcion c.100–c.165 AD
Italian Christian Gnostic
A wealthy shipowner of Sinope in Pontus, in about AD 140 he went to Rome, and founded the quasi-Gnostic Marcionites (AD 144), which soon had churches in many eastern countries.

Marconi, Guglielmo, Marchese *See panel above*

Marco Polo *See* POLO, MARCO

Marcos, Ferdinand Edralin 1917–89
Philippine politician
He was born in Ilocos Norte, and educated at the University of the Philippines. He was accused, in 1939, while a law student, of murdering a political opponent of his father, but secured his own acquittal. During World War II he served in a Philippines army unit (but his claims of being a resistance fighter against the Japanese were later proved to be false). After the war he sat in the Philippines' House of Representatives (1949–59) and Senate (1959–66) for the Liberal Party and then the Nationalist Party. Promising a new programme of industrial development, he was elected president. His regime as president (1965–86) was marked by increasing repression, misuse of foreign financial aid and political murders, such as that of BENIGNO AQUINO (1983). With a declining economy, and faced with a growing communist insurgency, he declared martial law in 1972 and began to rule by decree. He was eventually overthrown in 1986 by a popular 'People's Power' front led by CORY AQUINO. The ailing Marcos and his influential wife IMELDA MARCOS fled into exile in Hawaii. After his death his wife faced charges of fraud and corruption in the US courts. 🕮 Raymond Bonner, *Waltzing With a Dictator* (rev edn 1988)

Marcos, Imelda Romualdez c.1929–
Philippine politician
She was born in Manila, and after her businessman father went bankrupt, was raised in conditions of extreme poverty. In 1954 she married a young politician, FERDINAND MARCOS, who was elected to the Senate and became president in 1965. Known to her fellow countrymen as the 'Iron Butterfly', she used her husband's power and position to build an extravagant financial empire, and served as governor of Metropolitan Manila (1975–86) and Minister of Human Settlements and Ecology (1979–86). To maintain his rule Marcos turned his country into a dictatorship, but in 1986 he was deposed and fled with his wife into exile in Hawaii. In 1988 they were indicted in New York on corruption charges but she was acquitted in 1990. In 1989 Marcos died and she returned to the Philippines where in 1992 she was an unsuccessful presidential candidate. She also ran in 1998, but pulled out and supported JOSEPH ESTRADA.🕮 Sterling Seagrave, *The Marcos Dynasty* (1989)

Marcus Aurelius *See panel p1039*

Marcus Cocceius Nerva *See* NERVA, MARCUS COCCEIUS

Marcus, George E 1946–
US cultural anthropologist
He was born in Brownsville, Pennsylvania, and studied at both Yale and Harvard. In 1979 he joined the department of anthropology at Rice University, Houston, where he remained for 25 years and is now emeritus professor. From 1986 to 1991 he was editor of the journal *Cultural Anthropology*. His most influential work to date is *Writing Culture: The Poetics and Politics of Ethnography*, edited with James Clifford (1945–), in which he raises post-modernist concerns relating to ethnographic authority and the problems of cultural representation in the contemporary world. Publications on these and related topics include *Anthropology as Cultural Critique* (with Michael Fischer, 1986), and *Rereading Cultural Anthropology* (1992).

Marcus, Rudolph Arthur 1923–
US physical chemist and Nobel Prize winner
Born in Montreal, Canada, where he studied chemistry at McGill University, he joined the chemistry faculty of the Polytechnic Institute of Brooklyn, New York, advancing from assistant professor to professor between 1951 and 1964. From 1964 to 1978 he worked at the University of Illinois, and in 1978 he became professor of chemistry at the California Institute of Technology. He is celebrated for the 'Marcus theory' of electron transfer reactions, which considers in detail the role of solvent molecules and leads to quantitative expressions for rate coefficients. The theory is of importance in inorganic chemistry, organic chemistry and biochemistry. Marcus has also extended the theoretical treatment of unimolecular gas reactions in terms of molecular vibrations. He received the Nobel Prize in chemistry in 1992, having earlier won the Wolf Prize (1985) and the National Medal of Science (1989). In 1987 he was elected a Foreign Member of the Royal Society and in 1991 he became an honorary Fellow of the Royal Society of Chemistry.

Marcuse, Herbert 1898–1979
US Marxist philosopher
Born in Berlin, Germany, and educated at the universities of Berlin and Freiburg, he became an influential figure in the Frankfurt Institute of Social Research (the so-called 'Frankfurt School') along with THEODOR ADORNO and MAX HORKHEIMER. After the Nazis closed the Institute (1933) he fled to Geneva and thence to the USA (1934), where the Institute was re-established in New York. He served as an intelligence officer for the US army during World War II, and when the Institute moved back to Europe in the early 1950s he remained in the USA as a naturalized citizen, taking a series of teaching posts at Columbia (1951), Harvard (1952), Brandeis (1954) and California, San Diego (1965–76). He had published *Eros and Civilization* in 1955, offering a Freudian analysis of the repressions imposed by the unconscious mind, but became a celebrity at the age of 66 with the publication of *One Dimensional Man* (1964), condemning the 'repressive tolerance' of modern industrial society which both stimulated and satisfied the superficial material desires of the masses at the cost of more fundamental needs and freedoms. He looked to students as the alienated élite who would initiate revolutionary change, but his hopes did not really survive the student riots of the 1960s at Berkeley and Paris. He expressed an equal hostility to bureaucratic communism in his *Soviet Marxism* (1958). 🕮 Peter Lind, *Marcuse and Freedom* (1985)

Marden, Brice 1938–
US painter
Born in Bronxville, New York, he studied at Boston University and Yale before settling in New York in 1963. By 1965 he was producing Minimalist, uniformly coloured canvases of horizontal and vertical formats. From 1968 he made two- and three-panel canvases, each of contrasting monochromatic colour, such as *Vertical Horizontal* (1973, Stedelijk, Amsterdam). His paintings of the 1980s moved away from Minimalism, and involved crossing diagonal and vertical lines, and the use of bright colour, as in the 18-panel work *Thira* (1980, Pompidou Centre, Paris) with its explicit reference to ancient architecture. Later he returned to single-panel works. The influence of a new-found interest in Chinese calligraphy is felt in the interlaced lines of his later prints.

Marcus Aurelius, *surnamed* **Antoninus**, *originally* **Marcus Annius Verus** AD 121–80
Roman emperor and philosopher

Marcus Aurelius was born in Rome, the son of M Annius Verus, a member of a consular family, and Domita Calvilla. At the age of 17 he was adopted by ANTONINUS PIUS, who had in turn been adopted by HADRIAN; Marcus Aurelius married Antoninus's daughter Faustina in 145. From 140, when he was made consul, until the death of Antoninus in 161, he discharged his public duties conscientiously, and maintained good relations with the emperor. At the same time he devoted himself to the study of law and philosophy, especially Stoicism; one of his teachers was the Stoic Apollonius of Chalcedon.

On his accession, he voluntarily shared the throne with his brother by adoption, Lucius Aurelius Verus, who in 161 was sent to take command against the Parthians. Despite the self-indulgence and dilatoriness of Verus, the generals were victorious, but the army brought back from the East a plague that ravaged the empire. Peaceful by temperament, Marcus Aurelius was nevertheless destined to suffer from constant wars throughout his reign, and although in Asia, Britain, and on the Rhine the invaders were checked, permanent peace was never secured. Rome was suffering from pestilence, earthquakes and inundations when the imperial colleagues led the Roman armies against the northern barbarians on the Danube. Verus died in 169; the Marcomanni were subdued in 168 and 173; and the Quadi in 174.

Marcus Aurelius was next called to the East by a rebellion of the governor, Avidius Cassius (175), who was assassinated before Aurelius arrived. On his way home, he visited lower Egypt and Greece. At Athens he founded chairs of philosophy for each of the chief schools: Platonic, Stoic, Peripatetic, and Epicurean. Towards the end of 176 he reached Italy, and the following autumn he departed for Germany, where fresh disturbances had broken out. He was victorious once more, but died in 180 in Pannonia.

One of the few Roman emperors whose writings have survived, Marcus Aurelius wrote twelve books of *Meditationes* which record his innermost thoughts and form a unique document. They show his loneliness, but also that he did not allow himself to be embittered by his experiences of life. They were written during the military campaigns of the last ten years of his life, and were published unedited only after his death.

He was retrospectively idealized as the model of the perfect emperor, whose reign and style of rule contrasted with the disastrous period that began with the accession of his son COMMODUS, the disturbed age of the Severan emperors, and the imperial anarchy that followed in the 3rd century.

📖 A R Birley, *Marcus Aurelius* (1987).

> 'Nowhere can a man find a quieter or more untroubled retreat than in his own soul.'

Mare, Walter de la *See* DE LA MARE, WALTER

Maréchal, (Robert Gaston) André 1918–
French optical physicist
Born in La Garenne and educated at the University of Paris and the Institute of Optics, he became assistant professor at the university and institute in 1943, lecturer in 1950 and full professor in 1955. From 1968 to 1984 he was also director of the institute. He served as a member of the French National Committee for Scientific Research (1961–88), and was president of the International Commission of Optics (1962–65). His distinguished contributions to optics have included work on the diffraction theory of imaging systems, on geometrical optics, and on imagery in partially coherent light. He was awarded the Thomas Young Medal of the UK Institute of Physics in 1965 and the C K Mees Medal of the Optical Society of America in 1977. He is an Officer of the Legion of Honour.

Marets, Jean Nicolas, Baron de Corvisart des *See* CORVISART-DESMARETS, JEAN NICOLAS, BARON DE

Marett, Robert Ranulph 1866–1943
British anthropologist
After studying classics and philosophy at Oxford and German philosophy at Berlin, he was admitted to the Bar in Jersey (1891). However, he decided to pursue his developing interest in anthropology; by 1910 he was Reader in Anthropology at Oxford, where he founded the department of anthropology. He wrote a number of influential books, including *The Threshold of Religion* (1909), *The Birth of Humility* (1910), *Anthropology* (1912), *Psychology and Folklore* (1920), *Man in the Making* (1928), *The Raw Material of Religion* (1929), *Faith, Hope and Charity in Primitive Religion* (1932), *Sacraments of Simple Folk* (1933), *Head, Heart and Hands in Human Evolution* (1935) and *Tylor* (1936). He became famous for his theory of pre-animism or dynamism in which he went beyond EDWARD TYLOR's theory of animism and J G FRAZER 's theory of magic, arguing that religion begins with a sense of awe in the face of a religious force that is felt and experienced rather than reasoned out. Thus religion starts with a supernatural stage, and Marett used the Melanesian term *mana* to describe the religious force at work.

Marey, Etienne-Jules 1830–1904
French physiologist
Born in Beaune, he developed ingenious mechanical devices, and used his skill to study and measure heart action. From the 1860s he introduced scientific photography, devising by 1881 a cine camera to analyse rapid movements through 'slow motion', and using time-lapse to speed up slow changes.

Margai, Sir Albert Michael 1910–80
Sierra Leone politician
The son of a trader and the brother of Sir MILTON MARGAI, he was educated in Roman Catholic schools before becoming a nurse and pharmacist. He studied law in London (1944–47) and was elected a member of Legco in 1951, when he was appointed Minister of Education, Welfare and Local Government. A member of the Sierra Leone People's Party from 1951–58, he helped found the People's National Party and became Minister of Finance on independence (1961). When his brother died, he succeeded him as party leader and prime minister (1964–67). Following the disputed election of 1967 and the military coup led by SIAKA STEVENS in 1968, he went into exile in London.

Margai, Sir Milton A S 1895–1964
Sierra Leone nationalist leader and politician
The elder brother of Sir ALBERT MARGAI, he was educated in Roman Catholic mission schools, Fourah Bay College and in the UK, where he qualified as a doctor. Appointed a member of the Protectorate Assembly in 1940, he was elected to Legco in 1951, when he helped found the Sierra Leone People's Party and played a major role in pressing for independence. He was Chief Minister (1954–58) and, on independence (1961), prime minister until his death.

Margaret, St c.1046–1093
Queen of Scotland
Born in Hungary, where her father EDWARD THE ÆTHELING was in exile, she later went to England, but fled to Scotland after the Norman Conquest with her brother, EDGAR THE ÆTHELING. The Scottish king, MALCOLM III CANMORE, married her at Dunfermline (c.1070). Much of her reputation comes from her confessor and biographer, Turgot. She refined and anglicized the court, brought Benedictine monks to Dunfermline, stimulated change in usages in the Celtic Church, but institutional change and the real influx of new orders were initiated by her sons. Canonized by INNOCENT IV (1251), she remains the only Scottish royal saint. Her feast day is 16 November. 📖 Mary Clayton and Hugh Magennis, *The Old English Lives of St Margaret* (1994)

Margaret, Maid of Norway 1283–90
Queen of Scotland
The granddaughter of ALEXANDER III of Scotland, she was the only child of King Erik II of Norway. When Alexander III died (1286), she was the only direct survivor of the Scottish royal line. In 1289 she was betrothed to the infant Prince Edward (the future EDWARD II of England), son of EDWARD I, but she died at sea in Orkney the following year on her way from Norway to England.

Margaret (Rose), Princess 1930–2002
British princess
Born at Glamis Castle, Scotland, the younger daughter of King GEORGE VI and only sister of Queen ELIZABETH II, she was the first scion of the royal house in the direct line of succession to be born in Scotland for more than three centuries. In 1955 she rejected a possible marriage to Group Captain Peter Townsend, on advice from the Church and the establishment, because his previous marriage had been dissolved. In 1960

she married Antony Armstrong-Jones, a photographer, who was created Earl of SNOWDON in 1961. Their children are David, Viscount Linley (1961–), and Lady Sarah Armstrong-Jones (1964–). The marriage was dissolved in 1978. 🕮 Theo Aronson, *Princess Margaret* (1997); Nigel Dempster, *H R H the Princess Margaret* (1981)

Margaret (Marguerite) of Angoulême, *also known as* **Margaret of Navarre** 1492–1549
Queen of Navarre, and writer
The sister of FRANCIS I of France, she married first the Duke of Alençon (d.1525) and then (1527) Henry d'Albret (titular King of Navarre), to whom she bore Jeanne d'Albret (1528–72), mother of HENRY IV of France. With a strong interest in Renaissance learning, Margaret also became influenced by ERASMUS and the religious reformers of the Meaux circle, who looked to her for patronage and protection. Although she remained a Roman Catholic, she was also influenced by the writings of MARTIN LUTHER, with which she had a certain sympathy. One of the most brilliant women of her age, she encouraged agriculture, learning and the arts, and her court was the most intellectual in Europe. The patron of men of letters, including the heretical poet CLÉMENT MAROT, and RABELAIS, she herself was a prolific writer. Her works included long devotional poems published as *Le Miroir de l'âme pécheresse* (1531, 'The Mirror of a Sinner's Soul') and her most celebrated work was *Heptaméron*, a collection of stories on the theme of love, modelled upon the *Decameron* of BOCCACCIO.

Margaret of Anjou 1430–82
Queen of England
The daughter of René of Anjou, she was married to HENRY VI of England in 1445, but because of his madness she became involved in government, acting as virtual sovereign, and she was held responsible for the war of 1449, in which Normandy was lost. During the Wars of the Roses, Margaret was a leading Lancastrian, and after a brave struggle of nearly 20 years, was finally defeated at Tewkesbury (1471). She was imprisoned in the Tower of London for four years, until she was ransomed by LOUIS XI. She then retired to France. 🕮 J J Bagley, *Margaret of Anjou, Queen of England* (1948)

Margaret of Austria 1480–1530
Duchess of Savoy and Regent of the Netherlands
The daughter of Emperor MAXIMILIAN I and Mary of Burgundy, she was born in Brussels, and married first (1497) the Infante Juan of Spain, who died within a few months, then (1501) Philibert II, Duke of Savoy (d.1504). Her father appointed her Regent of the Netherlands (1507–15) and guardian of her nephew, the future Emperor CHARLES V. In 1519 she was again appointed regent by Charles V (until 1530), and proved herself a wise and capable stateswoman. Under her the Netherlands were heavily taxed to finance HABSBURG military activity elsewhere.

Margaret of Navarre *See* MARGARET OF ANGOULÊME

Margaret of Parma 1522–86
Regent of the Netherlands
She was born in Oudenarde, the illegitimate daughter of Emperor CHARLES V. She married first (1536) Alessandro de' Medici and second (1538) Ottavio Farnese, later Duke of Parma, to whom she bore ALESSANDRO FARNESE (also later Duke of Parma) in 1546. As Regent of the Netherlands (1559–67), she proved herself masterful, able, and a staunch Catholic. In 1567 she suppressed a Calvinist revolt, but was replaced by the Duke of ALVA. When her son Alessandro became governor of the Netherlands (1578–86), ruling as regent for PHILIP II of Spain, Margaret returned with him as head of the civil administration for a time, finally retiring to Italy in 1583.

Margaret of Valois 1553–1615
Queen of Navarre
Born at St Germain-en-Laye, she was the daughter of HENRY II of France and CATHERINE DE MÉDICIS, and sister of FRANCIS II, CHARLES IX and HENRY III. Noted for her beauty, learning and licentiousness, in 1572 she married Henry of Navarre (later HENRY IV). The marriage was childless, and was dissolved by the pope (1599) in order to allow Henry to marry MARIE DE MÉDICIS. She became famous for her *Mémoires*, published in 1628.

Margaret Tudor 1489–1541
Queen of Scotland
Born in London, the eldest daughter of HENRY VII of England, she married JAMES IV of Scotland (1503), Archibald Douglas, the 6th Earl of Angus (1514), and, having divorced him, Henry Stewart, later Lord Methven (1527). She had a significant, enigmatic role in the conflict between pro-French and pro-English factions during the minority of her son, JAMES V of Scotland, for whom she acted as regent. Her great-grandson, JAMES VI of Scotland, inherited the English throne (1603). 🕮 Patricia Hill Buchanan, *Margaret Tudor Queen of Scots* (1985)

Marggraf, Andreas Sigismund 1709–82
German chemist and agricultural scientist
He was born in Berlin and studied there and at several other German universities. He was elected to the Royal Prussian Academy in 1738 and became director of its laboratory (1753). In 1747 he extracted the juice from beet and, using a microscope, showed that the crystals which formed in the juice were identical to cane sugar. This discovery laid the basis for the sugar beet industry. Marggraf also used flame tests to distinguish between sodium and potassium and showed that magnesium salts burn with a green flame. He also isolated zinc from calamine and carried out valuable investigations of the alkaline earths.

Margolyes, Miriam 1941–
English actress
Born in Oxford, she studied at Newnham College, Cambridge, and the Guildhall School of Music and Drama. She often appears in comic roles as a fussy matriarch, and her film work has included *Yentl* (1983), *Little Dorrit* (1988), *The Age of Innocence* (1993; BAFTA award for Best Supporting Actress), *William Shakespeare's Romeo and Juliet* (1996) and *Cold Comfort Farm* (1997). Her television appearances have included *Blackadder* (1983) and *Vanity Fair* (1998), and she has performed widely on radio. She was awarded an OBE in 2002.

Margrethe I, *also called* **Margareta** or **Margaret** 1353–1412
Queen of Denmark, of Norway and of Sweden
Born in Søborg, Denmark, she was married to King Haakon VI of Norway (1363) at the age of ten. She became Queen of Denmark (1375) on the death of her father, Valdemar IV Atterdag, holding the Crown in trust for her five-year-old son Olav, for whom she acted as regent. By Haakon's death (1380), she also became regent of Norway for Olav, who died suddenly (1387), leaving her sole ruler of Denmark–Norway. In 1388 the Swedish nobles rose against their German king, Albert of Mecklenburg, and offered her his Crown, whereupon she invaded Sweden, took Albert prisoner, and became Queen of Sweden (1389). She had her seven-year-old great-nephew, ERIK VII, adopted as her successor to the three Scandinavian kingdoms, and his coronation (1397) as king of all three kingdoms effected the Union of Kalmar, whereby the kingdoms should remain for ever under one ruler, each retaining its separate laws. Nominally governed by Erik (as Erik VII), Margaret remained the ruler of Scandinavia until her death, recovering Crown land, and gaining Gotland and much of Schleswig. 🕮 Kristian Erslev, *Dronning Margrethe og Kalmarunionens Grundlaeggelse* (1882)

Margrethe II, *in full* **Margrethe Alexandrine Thorhildur Ingrid** 1940–
Queen of Denmark
Born in Copenhagen, she was the daughter of FREDERICK IX, whom she succeeded in 1972, and she became the first reigning queen in Denmark for nearly 600 years. She was educated at the universities of Copenhagen, Aarhus and Cambridge, the Sorbonne, Paris, and the London School of Economics and became an archaeologist. In 1967 she married a French diplomat, Count Henri de Laborde de Monpezat, now Prince Henrik of Denmark. Their children are the heir apparent, Crown Prince Frederick (1968–) and Prince Joachim (1969–). She has published several books which include, in translation, *All Men Are Mortal* (1981, co-written with Prince Henrik) and *The Forest* (1989). She is also a talented artist whose works range from embroidered ecclesiastical vestments to book illustrations. 🕮 Anne Wolden-Raethinge, *Dronning i Danmark: Margrethe den Anden fortaeller om sit liv* (1989)

Margulis, Lynn, *née* **Alexander** 1938–
US biologist
Born in Chicago, she was educated at the universities of Chicago, Wisconsin and California, then lectured in biology at Brandeis University (1963–65) and Boston University (1966–88), and later in botany and geosciences at the University of Massachusetts (1988–). Her most important work deals with the origin of eukaryotic cells (cells with nuclei) and the role of symbiosis in cell evolution, and she has written numerous popular science books on the origin of life, the development of sex, and global ecology, many with her son Dorion Sagan, including 2002's *Acquiring the Genome: the Theory of the Origins of the Species*. She collaborated with JAMES LOVELOCK on the Gaia

hypothesis. In 1999 she was awarded the National Medal of Science. She was formerly married to the astronomer CARL SAGAN.

Maria II, *known as* **Maria Da Glória** 1819–53
Queen of Portugal
Born in Rio de Janeiro, Brazil, the daughter of Peter I of Brazil and IV of Portugal, she became queen under a regency in 1834 following the renunciation by her father of his rights on the death of her grandfather, JOHN IV. She was overthrown in 1828 by her uncle, Michael, and fled to England and Brazil. A civil war between Liberals and Absolutists ensued, which returned Maria to the throne in 1834. In 1836 she tried to engineer a coup d'état against a leftist government. Similarly, the civil war of 1846–47 was caused by Maria's imposition of the conservative Saldanha as prime minister. Although Maria was forced to abdicate, the English and Spanish enforced the Peace of Gramido (1847), which restored her to power until her death in childbirth. Through both her interference and her favouritism, she undoubtedly exacerbated the political instability of the years 1836–51.

Maria Theresa 1717–80
Holy Roman Empress, Archduchess of Austria, and Queen of Hungary and Bohemia
The daughter of the Emperor Charles VI, she was born in Vienna. By the Pragmatic Sanction, her father appointed her heir to his hereditary thrones. In 1736 she married Francis Stephen, Duke of Lorraine (afterwards Grand Duke of Tuscany (1737–65) and Holy Roman Emperor (1745–65) as FRANCIS I), and at her father's death (1740) she became Queen of Hungary and of Bohemia, and Archduchess of Austria. Her claim to the hereditary HABSBURG lands led to the War of the Austrian Succession (1740–48) when she lost Silesia to Prussia, and some lands in Italy, but her husband was recognized as Emperor Francis I. Aided by Haugwitz, she instituted financial reforms, fostered agriculture, manufactures and commerce, and nearly doubled the national revenues, while decreasing taxation. Marshal Daun reorganized her armies. With Prince von KAUNITZ-RIETBERG as her Foreign Minister and France as an ally, she renewed the contest with the Prussian King, FREDERICK II, THE GREAT, but the Seven Years War (1756–63) confirmed Frederick in his possession of Silesia. After the peace she carried out a series of reforms: peasant serfdom was reduced, as was the power of the Church, law reform continued, and she set up the best educational system in Europe. After the death of her husband (1765), her son Joseph (Emperor JOSEPH II) co-operated with her in the government. She joined with Russia and Prussia in the first partition of Poland (1772), securing Galicia. Warm, friendly and spirited, she tempered her idealism with earthy common sense and won the affection and admiration of her subjects. Of her ten surviving children, the eldest son, Joseph II, succeeded her, and Leopold, Grand Duke of Tuscany, succeeded him as LEOPOLD II, Ferdinand became Duke of Modena, and MARIE ANTOINETTE married LOUIS XVI of France. 🕮 Robert Pick, *Empress Maria Theresa* (1966)

Marianus Scotus d.c.1088
Irish monk and calligrapher
Born in Ireland, he went to Bamberg in 1067, became a Benedictine, and was founder and abbot of the monastery of St Peter's in Ratisbon (now Regensburg). He was a prolific calligrapher, copied the Bible many times, and left commentaries on PAUL's Epistles and on the Psalms.

Maricourt, Peter the Pilgrim *See* PEREGRINUS, PETRUS

Marie Antoinette, *in full* **Josèphe Jeanne Marie Antoinette** 1755–93
Queen of France
Born in Vienna, Austria, she was the fourth daughter of the Empress MARIA THERESA and the Emperor FRANCIS I, and in 1770 was married to the Dauphin of France, afterwards LOUIS XVI (from 1774). Young and inexperienced, she aroused criticism by her frivolity, extravagance and disregard for conventions, her devotion to the interests of Austria, and her opposition to all the measures devised by TURGOT and NECKER for relieving the financial distress of the country. The miseries of France became identified with her extravagance. She opposed all new ideas, and prompted Louis into a retrograde policy to his own undoing. She was, however, also capable of strength rising to the heroic, and possessed the power of inspiring enthusiasm. Amid the horrors of the march of women on Versailles (1789) she alone maintained her courage, but she consistently failed to understand the troubled times of the Revolution, and the indecision of Louis and his dread of civil war hampered her plans. She had an instinctive abhorrence of the liberal nobles such as the Marquis de LAFAYETTE and the Comte de MIRABEAU, and although she finally reached agreement with Mirabeau (July 1790) she was too independent to follow his advice, and his death in April 1791 removed the last hope of saving the monarchy. She and Louis tried to escape to the frontier, but were intercepted at Varennes. The storming of the Tuileries and slaughter of the Swiss guards, and the trial and execution of Louis (21 January 1793) quickly followed, and soon she herself was sent to the Conciergerie (2 August 1793). After eight weeks the 'Widow Capet' was herself arraigned before the Revolutionary Tribunal, where she bore herself with dignity and resignation. After two days and nights of questioning came the inevitable sentence, and she was guillotined on the same day, 16 October 1793. 🕮 Antonia Fraser, *Marie Antoinette: The Journey* (2001)

Marie de France fl.c.1160–c.1190
French poet
Born in Normandy, she spent much of her life in England. The *Lais* (sometime before 1167), her most important work, are dedicated to 'a noble king', probably HENRY II of England, and comprise 14 romantic narratives in octosyllabic verse based on Celtic material. A landmark in French literature, they influenced a number of later writers. She also wrote *Fables* (sometime after 1170) and translated into French the *Tractatus de Purgatorio Sancti Patricii* (c.1190, 'St Patricius's Treatise on Purgatory'). 🕮 H Hoepffner, *Les lais de Marie de France* (1935)

Marie de Médicis, *Italian* **Maria de' Medici** 1573–1642
Queen of France
Born in Florence, she was the daughter of FRANCIS I, Grand Duke of Tuscany, second wife of HENRY IV from 1600, and mother of LOUIS XIII. After Henry's assassination (1610), she became regent (1610–17) for her nine-year-old son. Squandering state revenues and adopting a pro-Spanish foreign policy, she dismissed her husband's Minister, the Duc de SULLY, and relied on a circle of unscrupulous favourites, especially her Italian lover Concini, and his wife. At the Estates General (1614), she received support from the young RICHELIEU, Bishop of Luçon, who was in charge of foreign affairs from 1616. In 1615 she had arranged a marriage for her son Louis with the Infanta ANNE OF AUSTRIA (daughter of PHILIP III of Spain), and for her eldest daughter Elizabeth to the heir to the Spanish throne (the future PHILIP IV), thus bringing an end to the war with the HABSBURGS. In 1617 Louis assumed royal power, arranged for the assassination of Concini, and exiled his mother to the provinces. With Richelieu's mediation she was reconciled to her son (1620), was readmitted to the council (1622), and persuaded Louis to make Richelieu his Chief Minister. She plotted tirelessly against her former protégé, Richelieu, but he broke her power on the Day of Dupes (1630) and she went into exile in Brussels. Her lasting achievement was the building of the Luxembourg Palace in Paris, whose galleries were decorated by RUBENS. 🕮 Louis Batiffol, *Marie de Medicis and the French Court in the Seventeenth Century* (1908)

Marie Louise 1791–1847
Empress of France
Born in Vienna, Austria, she was the daughter of Francis I of Austria. She married NAPOLEON I in 1810 (after his divorce from JOSÉPHINE), and bore him a son (1811), who was created King of Rome and became NAPOLEON II. On Napoleon's abdication (1814) she returned to Austria, and was awarded the duchy of Parma. In 1822 she contracted a morganatic marriage with Count von Neipperg (c.1829) and another with the Count of Bombelles (1834). 🕮 Patrick Turnbull, *Napoleon's Second Empress* (1974)

Mariette, Auguste Édouard 1821–81
French Egyptologist
He was born in Boulogne, where he was made professor in 1841. In 1849 he joined the staff of the Louvre, Paris, and in 1850 was dispatched to Egypt, where he brought to light important monuments and inscriptions in Memphis, Sakkara and Giza. In 1858 he was appointed keeper of monuments to the Egyptian government, and excavated the Sphinx, the temples of Dendera and Edfu, and made many other discoveries. He was made a pasha in 1879. He died of diabetes and was buried at the door of his museum at Bulaq, Cairo.

Marillac, Ste Louise de 1591–1660
French Catholic co-founder of the Sisters of Charity
Born in Ferrières-en-Brie, near Meaux, she lost both of her parents by the age of 15, and after marrying Antony Le Gras, was widowed in 1625. She took VINCENT DE PAUL as her spiritual director, who saw her as the right person to train girls and widows to help the sick and the poor. In 1633 four girls started work in her

Paris home. From this modest beginning sprang the Sisters of Charity, who ministered in hospitals, orphanages and schools in Paris and beyond. They did not take vows until 1642, and then only for a year at a time, a practice that continues today. Louise de Marillac was canonized in 1934 and named the patron of Christian social work in 1960. Her feast day is 15 March.

Marin, John 1872–1953
US artist
Born in Rutherford, New Jersey, he trained and worked as an architect before studying art at Pennsylvania Academy and at the Art Students League. From 1905 to 1910 he travelled in Europe. When he returned to New York he came into contact with avant-garde movements at the gallery of the STIEGLITZ circle. He became well known for his watercolours and etchings executed in an extremely individual style. His early work was in the manner of JAMES MCNEILL WHISTLER, but his later works are more expressive in style and draw on Cubist concepts.

Marin, Maguy 1951–
French dancer and choreographer
Born in Toulouse, she studied dance as a child and first worked with the Strasbourg Opera Ballet before continuing to train at the Mudra school in Brussels. This led to her joining MAURICE BÉJART's Ballet of the 20th Century in the mid-1970s. In 1978 she won first prize at the Bagnolet international choreographic competition and that same year founded her own troupe, which in 1981 became the resident company of Créteil, a Paris suburb, and in 1998 moved to the National Choreography Centre near Lyons. She has choreographed for major European companies including Paris Opera Ballet, Dutch National Ballet and, most notably, a 1985 version of *Cinderella* for Lyons Opera Ballet, in a style that encompasses theatre as much as dance.

Marinetti, Emilio Filippo Tommaso 1876–1944
Italian writer
He was born in Alexandria, Egypt, and studied in Paris and Genoa. One of the founders of Futurism, he published the original Futurist manifesto in *Figaro* in 1909. In his writings he glorified war, the machine age, speed and 'dynamism', and in 1919 he became a fascist. His publications include *Le Futurisme* (1911), *Teatro sintetico futuristo* (1916, 'The Synthetic Futurist Theatre') and *Manifesti del Futurismo* (4 vols, 1920, 'Manifesto of Futurism'). He condemned all traditional forms of literature and art, and his ideas were applied to painting by UMBERTO BOCCIONI, GIACOMO BALLA and others. 🕮 W Vaccari, *Vita e tumulti di Filippo Tommaso Marinetti* (1959)

Marini, Giambattista 1569–1625
Italian poet
Born in Naples, he was ducal secretary at Turin, and wrote his main work, the *Adone* (1622), at the court of France. His florid hyperbole and overstrained imagery were copied by the Marinist school.

Marini, Marino 1901–80
Italian sculptor and painter
Born in Pistoia, he studied in Florence, and from 1929 to 1940 taught at the Scuola d'Arte di Villa Reale, Monza, before moving to Milan, where he was professor at Brera Academy (1940–70). Never part of any modern movement, he remained an individual. His work was figurative and his best-known theme the horse and rider, which he explored in many versions over the years. He liked to combine different techniques, including colour, for example *Dancer* (1949–54), and executed portraits of IGOR STRAVINSKY, MARC CHAGALL, HENRY MILLER and others. He won many prizes, including the Venice Biennale (1952). 🕮 Alberto Busignani, *Marini* (1971)

Marino, Dan 1961–
US footballer
Born in Pittsburgh, he played as quarterback with the Miami Dolphins, and in the 1984 season he gained 5,084 yards passing to create a National Football League record. He completed a record 29 passes in the 1985 Super Bowl, and in 1986 established a record for the most passes completed in a season (378). He also set a record of 61,361 for total passing yards, and another record of 420 touchdown passes. He retired in 2000.

Marion, Frances, *originally* **Frances Marion Owens** 1887–1973
US screenwriter and novelist
She was born in San Francisco. A reporter with the *San Francisco Examiner*, she had worked as a commercial artist and model before arriving in Hollywood in 1913 as the protégée of director Lois Weber. A prolific screenwriter during the silent era, she was associated with actress MARY PICKFORD on such films as *Rebecca Of Sunnybrook Farm* (1918) and *Pollyanna* (1920). She was also one of the first female war correspondents during the latter stages of World War I. She later wrote star vehicles for the likes of GRETA GARBO and JEAN HARLOW and received Academy Awards for *The Big House* (1930) and *The Champ* (1931). She retired from screenwriting in 1940 and subsequently wrote novels, including *Westward the Dream* (1948) and *The Powder Keg* (1954). 🕮 *Off With Their Heads!* (1972)

Marion, Francis, *known as* **the Swamp Fox** c.1732–1795
American Revolutionary general
Born in Winyah, South Carolina, he first saw action against the Cherokee in 1759, and he joined the Revolutionary army in 1776. After American forces were defeated at Charleston and Camden, South Carolina, the state was almost entirely in British hands, but Marion gathered a rough militia (1780) and led a series of guerrilla attacks on British troops. His nickname referred to his skill in retreating to seemingly impassable swamps where the British could not follow. He was promoted to brigadier-general in 1781, and in September of that year he won an important victory at Eutaw Springs.

Mariotte, Edmé c.1620–1684
French physicist and physiologist
Born probably in Chazeuil, Burgundy, he was prior of Saint-Martin-de-Beaumont-sur-Vingeanne and moved from Dijon to Paris in the early 1670s. Elected to the Paris Academy of Sciences (1666), he attracted attention as a physiologist, studied pendulums and falling bodies (1667–68), and published an exposition of the laws of elastic and inelastic collisions (1673). In 1679 he restated the law bearing his name in France (elsewhere attributed to ROBERT BOYLE) and used it to estimate the height of the atmosphere. He also discussed scientific methodology, hydrology, optics (including the rainbow), astronomy and the strength of materials.

Maris
Dutch family of artists
There were three brothers, all painters, notably Jacob (1837–99), a landscape and genre painter, born in The Hague. He studied there, in Antwerp, and in Paris (1866–71), coming under the influence of DÍAZ DE LA PEÑA, CAMILLE COROT and JEAN FRANÇOIS MILLET. Matthijs (1839–1917) and Willem (1843–1910) Maris were also famous and worked chiefly in London.

Maritain, Jacques 1882–1973
French philosopher
Born in Paris and brought up a Protestant, he was educated in Paris and Heidelberg, and converted to Catholicism (1906). He was professor at the Institut Catholique in Paris (1914–40) and then taught mainly in North America, at Toronto, Columbia, Chicago and Princeton (1948–60). He was also French ambassador to the Vatican (1945–48) and later a strong opponent of the Vatican Council and the neo-Modernist movement. His best-known works are *Les Degrés du savoir* (1932, Eng trans *The Degrees of Knowledge*, 1937), in which he applied THOMAS AQUINAS's thought to contemporary philosophical canons in the theory of knowledge, and various writings on art and politics including *Art et scolastique* (1920, Eng trans *Art and Scholasticism*, 1930) and *Humanisme intégral* (1936), which were better known abroad than in France.

Marius, Gaius 157–86 BC
Roman general and politician
He was born in Arpinum, and was consul seven times. He reformed the Roman army and had victories over JUGURTHA of Numidia (105 BC) in Africa, the Teutones (102 BC) in Gaul, and the Cimbri (101 BC) in north Italy. His final years were dominated by rivalry with the Roman dictator SULLA over the command against Mithridates. Civil war followed, and Marius was forced to flee to Africa. He returned to capture Rome for the Roman politician CINNA from the forces backing Sulla (87 BC) but died soon after.

Marius, Simon, *German surname* **Mayr** 1570–1624
German astronomer
A pupil of TYCHO BRAHE, in 1609 he claimed to have discovered the four satellites of Jupiter independently of GALILEO. He named them Io, Europa, Ganymede and Callisto, but other astronomers merely numbered them as they did not recognize his claim to discovery. He was one of the earliest users of a telescope and the first to observe by this means the Andromeda nebula (1612).

Marivaux, Pierre Carlet de Chamblain de 1688–1763
French playwright and novelist
Born in Paris, he published *L'Homère travesti* ('Homer Burlesqued'), a burlesque of the *Iliad*, in 1716, and from then on wrote

several comedies, of which his best is *Le Jeu de l'amour et du hasard* (1730, Eng trans *Love in Livery*, 1907). His best-known novel, *La Vie de Marianne* (1731–41, Eng trans *The Life of Marianne*, 1736–42), was never finished. It is marked by an affected, 'precious' style ('Marivaudage'). His other romances, *Pharsamon* (1737, Eng trans *Pharsamond*, 1750) and *Le Paysan parvenu* (1735–36, Eng trans *The Fortunate Villager*, 1765) are considerably inferior. 🕮 E J H Greene, *Marivaux* (1965)

Mark, St, *also called* **John Mark** 1st century AD
New Testament evangelist
Born probably in Jerusalem, he is described as 'John whose surname was Mark' (Acts 12.12, 25), and commended in Colossians 4.10 and 2 Timothy 4.11. He helped the Apostles Barnabas and PAUL during their first missionary journey, but caused a split between them over the question of his loyalty. Traditionally the author of the second Gospel, he was also described as the 'disciple and interpreter' of Peter in Rome. In medieval art, Mark is symbolized by the lion. His feast day is 25 April.

Mark, Mary Ellen 1940–
US photojournalist
Born in Philadelphia, she studied painting and art history at the University of Pennsylvania. A freelance photojournalist since the 1960s, and member of Magnum Photos (1977–81), she has become known for her photographs of the dispossessed, the marginalized and those on the fringes of society, both in the USA and worldwide: prostitutes, street children, drug addicts, the mentally ill and those affected by famine or disease. She has also produced acclaimed series of the circus and of twins. Her work is characterized by humanity, intimacy and empathy with her subjects; it has been widely published in magazines including *Life* and *The New Yorker*, for whom she is a contributing photographer, and collected in publications including *Exposure* (2005).

Markham, Beryl 1902–86
English–African aviator
Born in England, she moved with her father to East Africa in 1906, and she grew up playing with Murani children, learning Masai and Swahili. She apprenticed with her father as a horse trainer and breeder, until he left Africa for Peru in 1919. She decided to remain in her adopted homeland and later turned to aviation. From 1931 to 1936 she carried mail, passengers and supplies in her small plane to remote corners of Africa, including the Sudan, Tanganyika (now Tanzania), Kenya and Rhodesia (now Zimbabwe). In 1936 she became the first person to fly solo across the Atlantic from east to west, taking off in England and crash-landing in Nova Scotia 21 hours and 25 minutes later. Her autobiography *West With the Night* (1942) contains reflections on Africa and flying.

Markham, Sir Clements Robert 1830–1916
English geographer
Born in Stillingfleet, near York, he was educated at Westminster. He served in the Royal Navy (1844–51), and took part in the expedition that located the records of Sir JOHN FRANKLIN. He explored Peru (1852–54), introduced cinchona-bark culture from South America into India (1860), and was geographer to the Abyssinian expedition of 1867–68. As president of the Royal Geographical Society (1893–1905), he appointed Captain ROBERT FALCON SCOTT to lead his first Antarctic expedition. He wrote travel books and biographies and edited the *Geographical Magazine* from 1872 to 1878.

Markievicz, Constance Georgine, Countess, *née* **Gore-Booth** 1868–1927
Irish nationalist and first British woman MP
Born in London, daughter of Sir Henry Gore-Booth of County Sligo, she was a society beauty, who studied art at the Slade School in London and in Paris, where she met and married (1900) Count Casimir Markievicz. They settled in Dublin in 1903, and in 1908 she joined Sinn Féin and became a friend of MAUD GONNE. Her husband left in 1913 for the Ukraine and never returned. She fought in the Easter Rising in Dublin (1916) and was sentenced to death, but reprieved in the general amnesty of 1917. In 1918 she was elected Sinn Féin MP for the St Patrick's division of Dublin – the first British woman MP – but refused to take her seat. She was elected to the first Dáil Éireann in 1919 and became Minister for Labour, but was imprisoned twice. After the Civil War she was a member of the Dáil from 1923.

Markov, Andrei Andreyevich 1856–1922
Russian mathematician
Born in Ryazan, he studied at St Petersburg University, where he was professor from 1893 to 1905, before going into self-imposed exile in the town of Zaraisk. A student of PAFNUTII CHEBYSHEV, he worked on number theory, continued fractions, the moment problem, and the law of large numbers in probability theory, but his name is best known for the concept of Markov chain, a series of events in which the probability of a given event occurring depends only on the immediately previous event. This concept has since found many applications in physics and biology.

Markova, Dame Alicia, *stage name of* **Lilian Alicia Marks** 1910–2004
English ballerina
Born in London, she joined SERGEI DIAGHILEV's Ballets Russes (1924–29), then returned to Britain to the Vic-Wells (later Sadler's Wells and Royal) Ballet. A period of partnership with ANTON DOLIN led to their establishment of The Markova-Dolin Company in 1935. As well as performing Dolin's choreography in the joint company they also made guest appearances together around the world and were famed for their interpretations of *Giselle*. Their touring group developed into the London Festival Ballet (1949) which became English National Ballet in 1988. She was created DBE in 1963, was a director of the Metropolitan Opera Ballet (1963–69), a governor of the Royal Ballet (1973–2004) and president of the London Festival (now English National) Ballet (1986–2004). Her books include *Markova Remembers* (1986). 🕮 Maurice Leonard, *Markova, the Legend* (1995); Cyril W Beaumont, *Alicia Markova* (1935)

Marković, Ante 1924–
Yugoslav politician
He joined the Communist Youth Movement in Yugoslavia in 1940 and fought in TITO's partisans, becoming a member of the Communist League of Yugoslavia in 1943. He was a member of the Central Committee of the League of Communists of Croatia (1982–86) and, as prime minister of the Socialist Federal Republic of Croatia, introduced a programme of economic reform. A member of the Central Committee of the League of Communists of Yugoslavia since 1986, he succeeded Branko Mikulić as prime minister of Yugoslavia (1989). A liberal and pro-Western, he was hailed as 'man of the year' by the popular Croatian magazine *Danas* (1990). After six months of civil war between the Serbs and Croats, he announced his resignation as prime minister of Yugoslavia (1991).

Markowitz, Harry M(ax) 1927–
US economist and Nobel Prize winner
Born in Chicago and educated at the University of Chicago, he became a professor at the University of California, Los Angeles, in 1968 and subsequently held a variety of posts as a financial researcher, consultant and teacher. He shared the 1990 Nobel Prize in economics with WILLIAM F SHARPE and MERTON H MILLER for their work in providing new ways of judging the risks and rewards of investments and valuing corporate stocks and bonds. In 1994 he became a professor of economics at the University of California, San Diego.

Marks (of Broughton), Simon Marks, Baron 1888–1964
English businessman
Born in Leeds, he was educated at Manchester Grammar School. In 1907 he inherited the 60 Marks and Spencer 'penny bazaars', which his father Michael Marks and Thomas Spencer had built up from 1884. In collaboration with ISRAEL (later Lord) SIEFF, his schoolfriend and brother-in-law, Marks expanded Marks and Spencer from a company with the policy of 'Don't ask the price – it's a penny' to a major retail chain. 'Marks and Sparks', as it became known, used their considerable purchasing power to encourage British clothing manufacturers to achieve demanding standards. The 'St Michael®' brand label became a guarantee of high quality at a reasonable price.

Marlborough, Duchess of *See* CHURCHILL, SARAH

Marlborough, John Churchill, 1st Duke of 1650–1722
English soldier
Born in Ashe, Devon, he was the son of Sir Winston Churchill, an impoverished Devonshire Royalist. His first post was as page to the Duke of York (the future JAMES VII AND II). The patronage of BARBARA VILLIERS (Duchess of Cleveland) enriched him, and brought him an ensigncy in the Guards (1667). Service in Tangier and the Netherlands, combined with the influence of his sister Arabella, mistress of the Duke of York, brought him promotion to colonel. His prospects were further enhanced by his secret marriage in 1677, to Sarah Jennings (see SARAH CHURCHILL), an attendant to, and close friend of, the Princess, later Queen ANNE. In 1678 his discreet handling of a confidential mission to William of Orange (WILLIAM III) led to his ennoblement

Marley, Bob (Robert Nesta) 1945–81
Jamaican singer, guitarist and composer of reggae music

Bob Marley was born in the rural parish of St Ann. He moved to Kingston at the age of 14, made his first record at 19, and in 1965, with Peter Tosh (originally Winston Hubert MacIntosh) and Bunny Wailer (originally Neville O'Reilly Livingston), formed the vocal trio The Wailers. Their first recording with Coxsone Dodd's Studio One was 'Simmer Down' (1963), a song with roots in the Kingston shantytown where Marley had grown up, which became an island-wide smash hit.

The Wailers became the first reggae artists to gain international success; Marley continued to build on this through a series of world tours after the departure of his original collaborators. By the 1970s, both through his music and his religious and political views (which made him, at one point, the victim of an assassination attempt), he became a national hero, and in 1978 he staged the famous 'One Love' concert to try to broker a deal between Jamaica's warring political parties. In 1980, as the international voice of political and cultural emancipation, he performed at the ceremonies marking independence for Zimbabwe. A devout Rastafarian, Marley made reggae popular with white audiences through his warm, expressive voice, his willingness to embrace rock styles and techniques, and his memorable compositions – from the lyrical 'No Woman, No Cry' to the fiercely political 'Exodus' and 'I Shot the Sheriff' (covered by ERIC CLAPTON in 1974). Although he suffered from cancer in his last years, his output was undiminished and he remained a major force in popular music. A posthumous release collecting his major work, *Legend* (1984), became the bestselling reggae album ever.

♫ Major recordings include *Catch a Fire* (1972), *Natty Dread* (1974), *Rastaman Vibration* (1976), *Exodus* (1977), *Kaya* (1978), *Survival* (1979), *Uprising* (1980).

> 'Won't you help to sing
> These songs of freedom
> Cause all I ever had –
> Redemption songs.'
>
> – From 'Redemption Song' (1980).

as Baron Churchill of Eyemouth (1682), and his wife was made Lady of the Bedchamber to Anne. In 1685 he crushed the rebellion led by the Duke of MONMOUTH, and was rewarded with an English barony. When William landed, Churchill pledged his support to his cause. The value of his defection was recognized by his elevation to the earldom of Marlborough. Yet by 1692, despite his brilliant service in William's Irish campaign, the suspicion that he was still sympathetic to the Jacobites brought him into temporary disfavour, though Sarah maintained her close friendship with Anne, who succeeded as queen in 1702. In the War of the Spanish Succession (1701–14) Marlborough was given supreme command of the British and Dutch forces. His march to the Danube brought him the vital co-operation of Prince EUGÈNE OF SAVOY, and ended in the victory of Donauworth and the costly but unequivocal triumph of Blenheim (1704), which earned him a palatial residence at Woodstock. He defeated LOUIS XIV in the campaign of 1706 at Ramillies and foiled the Duc de VENDÔME's 1708 attempt to recover Flanders, which led to the surrender of Lille and Ghent. With their superior manpower, the French recovered from their failure of 1709 at Malplaquet; however, in 1711 Marlborough displayed his military flair when he forced the Duc de VILLARS' 'impregnable' lines and went on to capture Bouchain. But in England ROBERT HARLEY and the Tories had been conspiring for a compromise peace – the Treaty of Utrecht (1713), which sacrificed virtually everything for which the war had been fought – and for Marlborough's public overthrow, while Queen Anne had transferred her friendship from Sarah to ABIGAIL MASHAM. In 1711 Marlborough, charged with embezzlement, was dismissed and then went abroad (1712). With the accession of GEORGE I (1714), however, he was restored to his honours, his advice being sought at the time of the Jacobite rebellion in 1715. 🕮 Winston Churchill, *Marlborough: His Life and Times* (6 vols, 1933–38)

Marley, Bob *See panel above*

Marlowe, Christopher 1564–93
English dramatist
He was born in Canterbury, a shoemaker's son, and educated at King's School and Benet (Corpus Christi) College, Cambridge. His *Tamburlaine the Great*, in two parts, was first printed in 1590, and probably produced in 1587. In spite of its bombast and violence it was infinitely superior to any tragedy that had yet appeared on the English stage. Earlier dramatists had used blank verse, but Marlowe was the first to discover its strength and variety. *The Tragical History of Dr Faustus* was probably produced soon after *Tamburlaine*; the earliest edition is dated 1604. *Faustus* is rather a series of detached scenes than a finished drama and some of the scenes are evidently not by Marlowe. *The Jew of Malta*, produced after 1588 and first published in 1633, is very uneven. *Edward II*, produced about 1590, is the most mature of his plays. It does not have the impressive poetry of *Faustus* and the first two acts of *The Jew of Malta*, but it is planned and executed with more firmness and solidity. *The Massacre at Paris*, his weakest play, survives in a mutilated state. It was written after the assassination of HENRY III of France (1589) and was probably one of the latest plays. *The Tragedy of Dido* (1594), left probably in a fragmentary state by Marlowe and finished by THOMAS NASHE, is of slight value. Marlowe doubtless contributed to the three parts of SHAKESPEARE's *Henry VI*, and probably to *Titus Andronicus*. A wild, shapeless tragedy, *Lust's Dominion* (1657) may have been adapted from one of Marlowe's lost plays. The unfinished poem, *Hero and Leander*, composed in heroic couplets, was first published in 1598; a second edition, with Chapman's continuation, followed the same year. Marlowe's translations of OVID's *Amores* and of the first book of LUCAN's *Pharsalia* add nothing to his fame. The pastoral ditty, 'Come, live with me and be my love', to which Sir WALTER RALEIGH wrote an Answer, was imitated, but not equalled, by ROBERT HERRICK, JOHN DONNE and others. It was first printed in *The Passionate Pilgrim* (1599), without the fourth and sixth stanzas. Another anthology, Allot's *England's Parnassus* (1600), preserves a fragment by Marlowe, beginning 'I walked along a stream for pureness rare'. He led an irregular life, kept dubious company, and was on the point of being arrested when he was fatally stabbed in a tavern brawl. In tragedy he prepared the way for Shakespeare, on whose early work his influence is evident. 🕮 H Levin, *The Over-Reacher* (1954); F S Boas, *Christopher Marlowe* (1940)

Marmion, Simon 1425–89
French manuscript illuminator, and painter
Born probably in Amiens, he worked there and in Tournai and Valenciennes. His illuminations are among the finest in 15th-century manuscript art.

Marmont, Auguste Frédéric Louis Viesse de 1774–1852
French soldier
He went with NAPOLEON I to Italy, and fought at Lodi, in Egypt, and at Marengo (1800). He was sent to Dalmatia in 1805, defeated the Russians there, and was made Duke of Ragusa. He was governor of the Illyrian Provinces, and in 1811 succeeded ANDRÉ MASSÉNA in Portugal. In 1813 he fought at Lützen, Bautzen and Dresden. In 1814 he deserted to the Allies, compelling Napoleon to abdicate, and earned the title of traitor from the Bonapartists. In the July Revolution of 1830 he tried to reduce Paris to submission but failed, and finally retreating with a few faithful battalions, conducted CHARLES X across the frontier. Accused of treachery and forced into exile, he spent much of his later years writing his *Mémoires*, published posthumously in 1856–57.

Marmontel, Jean François 1723–99
French writer
Born in Bort, Limousin, he studied at a Jesuit college, settled in Paris in 1745 on the advice of VOLTAIRE, and in 1753 got a secretaryship at Versailles through Madame de POMPADOUR. He wrote successful tragedies and operas, ran the official journal, *Le Mercure*, and was the main contributor on literature to the *Encyclopédie* (35 vols, 1751–80). He became secretary of the Académie Française in 1783, and was appointed royal historian of France. His most celebrated work was *Bélisaire* (1766, 'Belisarius'), a dull and wordy political romance, containing a chapter on toleration which excited furious hostility. 🕮 S Lenel, *Jean François Marmontel* (1902)

Marmora, Alfonso Ferrero La *See* LA MARMORA, ALFONSO FERRERO

Marnix, Philips van, Heer (Lord) van Sint Aldegonde 1538–98
Flemish statesman
Born in Brussels, he was active in the Reformation, and in 1566 in the revolt against Spain. An intimate friend of WILLIAM I, THE SILENT, he represented him at the first meeting of the Estates of the United Provinces, held at Dort in 1572, and was sent on special missions to the courts of France and England. As burgomaster of Antwerp he defended the city for 13 months against the Spaniards, but after having surrendered he incurred so much ill-will that he retired from public life. He wrote the patriotic 'Wilhelmus' song, the prose satire *Den byencorf der H. Roomsche Kercke* (1569, 'The Roman Beehive'), a metrical translation of the Psalms (1580) and part of a prose translation of the Bible.

Marochetti, Carlo, Baron 1805–67
Italian sculptor
He was born in Turin, and trained in Rome, and in Paris where he later settled. At the Revolution of 1848 he went to London, where he produced many dramatic statues, such as the equestrian figures of Queen VICTORIA and Prince ALBERT (1849, Glasgow), and RICHARD I, Cœur-de-Lion (1860) outside the House of Lords. Highly regarded by Prince Albert and Queen Victoria, he was commissioned to execute the statue of Prince Albert for the Albert Memorial and produced the first full-size model in 1867, but died unexpectedly.

Marot, Clément c.1497–1544
French poet
Born in Cahors, he entered the service of the Queen of Navarre, MARGARET OF ANGOULÊME. He was wounded at the Battle of Pavia in 1525, and soon after imprisoned for a few months on a charge of heresy. In 1535 he fled first to the court of the Queen of Navarre, and later to that of the Duchess of Ferrara, and returned to Paris in 1536, where he began to translate the Psalms into French in 1538. He had to flee again in 1543 when accused of heresy by the Sorbonne. He made his way to Geneva, but left under a cloud (he is said to have played backgammon on a Sunday), and went to Turin. His poems consist of elegies, epistles, rondeaux, ballads, sonnets, madrigals, epigrams, nonsense verses and longer pieces. 🕮 C A Mayer, *Marot* (1969)

Marozia d.938
Roman noblewoman
Of infamous reputation, she was married three times, was the mistress of Pope Sergius III, mother of Pope John XI, and grandmother of Pope JOHN XII. She had sufficient influence to arrange the deposition of Pope John X, her mother's lover, and the election of her own son, John XI. She died in prison in Rome.

Marquand, John P(hillips) 1893–1960
US novelist
Born in Wilmington, Delaware, he was educated at Newbury Port High School, Massachusetts, and at Harvard University. He served with the military, was a war correspondent and wrote advertising copy. He started as a writer of popular stories for magazines, featuring the Japanese detective Mr Moto, and went on to produce a series of notable novels gently satirizing affluent middle-class US life, in a vein similar to SINCLAIR LEWIS, whom he admired. Key titles are *The Late George Apley* (1937), *Wickford Point* (1939) and *Point of No Return* (1949). 🕮 M Bell, *John P Marquand: An American Life* (1979)

Marquet, (Pierre) Albert 1875–1947
French artist
Born in Bordeaux, he studied under GUSTAVE MOREAU and was one of the original Fauves. After initial hardships he became primarily an Impressionist landscape painter and travelled widely, painting many pictures of the Seine (eg *Pont neuf*), Le Havre and Algiers in a cool restrained style. In his swift sketches he showed himself a master of line.

Marquette, Jacques 1637–75
French Jesuit missionary and explorer
Born in Laon, he was sent in 1666 to North America, where he took Christianity to the Ottawans living around Lake Superior, and went on the expedition which discovered and explored the Mississippi (1673).

Márquez, Gabriel García 1928–
Colombian novelist and Nobel Prize winner
Born in Aracataca, he was educated at a Jesuit school, and studied law and journalism at the National University of Colombia, Bogotá. He worked as a journalist from 1950 to 1965, when he devoted himself to fiction writing. One of Latin America's most formidable writers, he is a master of 'magic realism', the practice of representing possible events as if they were wonders and impossible events as if they were commonplace. His best-known work is *Cien años de soledad* (1967, Eng trans *One Hundred Years of Solitude*, 1970), a vast, referential 'total' novel charting the history of a family, a house and a town from Edenic, mythic genesis through the history of wars, politics, and economic exploitation to annihilation at a moment of apocalyptic revelation. Many of his other novels have been translated, including *El otoño del patriarca* (1975, Eng trans *The Autumn of the Patriarch*, 1976), *Crónica de una muerte anunciada* (1981, Eng trans *Chronicle of a Death Foretold*, 1982), *El amor en los tiempos del colera* (1985, Eng trans *Love in the Time of Cholera*, 1988), *Del amor y otros demonios* (1994, Eng trans *Of Love and Other Demons*, 1995) and *Memoria de mis putas tristes* (2004, Eng trans *Memories of My Melancholy Whores*, 2005). The first volume of his memoirs, *Vivir para contarla* (Eng trans *Living to Tell the Tale*, 2003), appeared in 2002. He was awarded the Nobel Prize in literature in 1982. 🕮 Rubén Pelayo, *Gabriel García Márquez: A Critical Companion* (2001)

Marquis, Don(ald Robert Perry) 1878–1937
US novelist, playwright and poet
Born in Walnut, Illinois, he abandoned formal education at 15 and worked at various jobs before studying art for a spell. He had a varied career as a journalist and wrote serious plays and poems, but he became a celebrity as a comic writer with *The Old Soak's History of the World* (1924). *archy and mehitabel* (1927) and *archys life of mehitabel* (1933) follow the fortunes of Archy the cockroach who cannot reach the typewriter's shift key (hence the lower-case titles) and Mehitabel, an alley cat. 🕮 E Antony, *O Rare Don Marquis* (1962)

Marr, Andrew William Stevenson 1959–
Scottish journalist
He was born in Glasgow and attended Cambridge University. He joined *The Scotsman* as a trainee in 1982, and went on to become parliamentary correspondent. In 1986 he moved to *The Independent* and – following a brief return to *The Scotsman* and three years at *The Economist* – returned there in 1992, becoming editor in 1996. In 1998, following mixed success in reinvigorating the paper, he was fired, then reinstated; soon afterwards, he resigned. He became the BBC's political editor in 2000, and moved on in 2005 to host the interview programme *Sunday AM*. His books include *My Trade* (2004), a study of journalism.

Marriner, Sir Neville 1924–
English conductor and violinist
He was born in Lincoln, and studied at the Royal College of Music. He was a violinist in the Philharmonia Orchestra and the London Symphony Orchestra (1956–68), and in 1958 founded his own chamber orchestra, the Academy of St Martin-in-the-Fields, which he directed until 1978. He has also conducted the Los Angeles Chamber Orchestra and the Minnesota Orchestra (1979–86). Although principally associated with baroque and rococo music for small orchestra, he has also performed 20th-century music and opera. He was knighted in 1985.

Marryat, Frederick, *known as* **Captain Marryat** 1792–1848
English naval officer and novelist
Born in London, the son of an MP, he sailed as midshipman under Lord COCHRANE in 1806, and after service in the West Indies took command of a sloop cruising off St Helena to guard against the escape of NAPOLEON I. He also worked to suppress the Channel smugglers, and served in Burma. On his return to England (1826) he was given the command of the *Ariadne* (1828), but he resigned in 1830 to lead the life of a writer. He was the author of a series of novels on sea life, including *Frank Mildmay* (1829), *Peter Simple* (1833), *Jacob Faithful* (1834) and *Mr Midshipman Easy* (1834). In 1837 he set out for a tour through the USA, where he wrote *The Phantom Ship* (1839). Although it was a financial success, he was extravagant and unlucky in money matters, and eventually retired to his small farm of Langham, Norfolk, in 1843 and wrote the stories for children for which he is best remembered, including the once very popular *Children of the New Forest* (1847). 🕮 O Warner, *Captain Marryat* (1953)

Mars, Anne Françoise Boutet Monvel, *known as* **Mademoiselle Mars** 1779–1847
French actress
She starred at the Comédie-Française from 1799, excelling in the plays of MOLIÈRE and BEAUMARCHAIS, and retired in 1841. She published her autobiographical *Mémoires* (2 vols, 1849) and *Confidences* (3 vols, 1855).

Marsalis, Wynton 1961–
US trumpeter and composer
He was born in New Orleans. His father Ellis Marsalis, Jnr is a distinguished jazz pianist and teacher, and his brothers Branford, Delfayeo and Jason all became musicians. He learned to play from the age of eight, and is unusual in his dual achievement in both classical and jazz music. He performed the first of many engagements as a classical virtuoso aged 14, but his major achievements have been in jazz. He played with ART BLAKEY's Jazz Messengers (along with Branford Marsalis, tenor and soprano saxophones) from 1980–82, before forming the first of many ensembles under his own leadership. He became the figurehead of the neo-bop jazz renaissance of the 1980s, and went on to absorb wider aspects of the jazz tradition, including the early New Orleans, blues and gospel styles, within modern treatments in a range of recordings and performance projects. These have included large-scale works at the Lincoln Center in New York, where he directs the jazz orchestra and the jazz programme in the purpose-built Frederick P Rose Hall (opened 2004). In 1983 he released *Think of One* (jazz) and *Trumpet Concertos* (classical), becoming the first musician to win (or even be nominated for) Grammy awards in both categories. In 1997 he was awarded the Pulitzer Prize for music for *Blood on the Fields*. *All Rise* (1999) was even more ambitious in scale. He was named a UN Messenger of Peace in 2001.

Marschner, Heinrich 1795–1861
German composer of operas
Born in Zittau, he was successively music director at Dresden, Leipzig and Hanover, and is remembered mainly for his opera *Hans Heiling* (1833).

Marsden, Samuel 1764–1838
Australian clergyman, magistrate and farmer
Born in Farsley, Yorkshire, England, he arrived in New South Wales as assistant chaplain in 1794. The chaplain to the colony, Richard Johnson, was at that time the only minister in New South Wales. Marsden farmed land at Parramatta, New South Wales, where he was also appointed magistrate. His harsh measures as magistrate, particularly in regard to the rising by Irish convicts in 1800, earned him the title 'The Flogging Parson'. However, he received praise for his farming skills and was a pioneer breeder of sheep for wool production. In 1807 he took to England the first commercial consignment of Australian wool. He made seven missionary journeys to New Zealand on behalf of the Church Missionary Society, and conducted New Zealand's first Christian service at Rangihoua, Bay of Islands, in 1814.

Marsé, Juan, *originally* **Juan Fonseca** 1933–
Spanish novelist
He was born in Barcelona and his mother died at his birth, so he was adopted by the Marsé family. After publishing his first novel, *Encerrados con un solo juguete* (1961, 'Locked in with a Single Toy'), as an opponent of the FRANCO regime he exiled himself to Paris, where he knew other exiles such as JUAN GOYTISOLO. Later he went into the cinema business. He began to make a reputation as an ironic critic of society with his novel *Últimas tardes con Teresa* (1965, 'Last Evenings with Teresa'), which shows the influence of the techniques of RAMÓN VALLE-INCLÁN, the Catalan Josep Pla and the Castilian LUIS MARTÍN-SANTOS. Like Martín-Santos, Marsé flayed the submissiveness of post-Civil War Spanish society, exploring it further in *Si te dicen que caí* (1973, Eng trans *The Fallen*, 1979). *La muchacha de las bragas de oro* (1978, Eng trans *Golden Girl*, 1981) mercilessly burlesques the memoirs of the Falangist Rector of Madrid University, Pedro Laín Entralgo. Later works include *El amante bilingüe* (1990, 'The Bilingual Lover'), *El embrujo de Shangai* (1993, 'The Shanghai Spell'), *Rabos de lagartija* (2000, 'Lizard Tails') and *La gran desilusión* (2004, 'The Big Disappointment').

Marsh, George Perkins 1801–82
US diplomat and philologist
Born in Woodstock, Vermont, he studied and practised law and was elected to Congress in 1842. He was US Minister to Turkey (1849–53) and to Italy (1861–82), where he died. His chief linguistic works are *A Compendious Grammar of the Old Northern or Icelandic Language* (1838), *Lectures on the English Language* (1861) and *The Origin and History of the English Language* (1862). Among his other writings are a treatise on the camel, one on saints and miracles, and *Man and Nature* (1864; rewritten and reissued as *The Earth as Modified by Human Action*, 1874).

Marsh, James 1789–1846
English chemist
Born in London, he worked at the Royal Arsenal in Woolwich and was subsequently assistant to MICHAEL FARADAY at the Royal Military Academy. His most significant work was on poisons; he is best known for devising a sensitive test for arsenic (the Marsh test) which was published in 1836. He also wrote on electromagnetism and invented a percussion tube for ship's cannon made from quills.

Marsh, Dame (Edith) Ngaio 1899–1982
New Zealand detective novelist and theatre director
Born in Christchurch, she had brief careers on stage and as an interior decorator, then introduced her detective hero Roderick Alleyn in her first novel *A Man Lay Dead* (1934), which was followed by 30 more stories ending with *Light Thickens* (1982). In theatre, she toured with the Wilkie company during the early 1920s, and during the 1940s and 1950s devoted much time to theatrical production in New Zealand, founding the Little Theatre in Christchurch. She wrote on art, theatre, and crime fiction, and a libretto for the fantasy opera *A Unicorn for Christmas* (1962), with music by New Zealand composer David Farquhar. Her autobiography, *Black Beech and Honeydew*, was published in 1966. She was made DBE in 1948.

Marsh, O(thniel) C(harles) 1831–99
US palaeontologist
Born in Lockport, New York, and wealthy by inheritance, he studied at Yale, at New Haven, and in Germany, and became first professor of palaeontology at Yale in 1866, without a salary or classes to teach. From 1870 to 1873 he led a series of expeditions through the western territories making spectacular discoveries of vertebrate fossils; this led him into bitter clashes with EDWARD DRINKER COPE, who organized rival dinosaur collecting expeditions. Marsh discovered (mainly in the Rocky Mountains) over a thousand species of extinct American vertebrates, including dinosaurs and the mammals uintatheres and brontotheres. By 1874 he was able to establish an evolutionary lineage for horses using the fossil remains which he had assembled. He also contributed to the documentation of evolutionary changes with his discovery of Cretaceous birds with teeth. His major contribution to stratigraphic palaeontology was an early discussion of the Miocene–Pliocene boundary. Marsh was the first vertebrate palaeontologist of the US Geological Survey (1882–92). He published over 300 papers, including *Odontornites: a Monograph on the Extinct Toothed Birds of North America* (1880) and *Dinosaurs of North America* (1896).

Marsh, Reginald 1898–1954
US painter
Born in Paris, the son of American artists, he studied at Yale and at the Art Students League in New York. He supported himself as a newspaper and magazine illustrator in the 1920s and was an original staff member of *The New Yorker*. With egg tempera he was able to paint in the rapid, graphic style that came naturally to him, and he became known for his lively, humorous paintings of New York life, which often focused on subways, elevated trains, burlesque houses, and other crowded locales, celebrating the tawdry vitality of the city. Among his works are '*Why Not Use the 'L'?*' (1930, Whitney Museum, New York) and *Tattoo and Haircut* (1932, Art Institute of Chicago).

Marsh, Rodney William 1947–
Australian cricketer
Born in Armadale, Perth, Western Australia, he established his reputation as a wicketkeeper playing for Western Australia, often in close collaboration with legendary fast bowler DENNIS LILLEE. He made his debut as wicketkeeper for Australia in 1970 and continued in the role for 14 years, making a record total of 355 dismissals. He was also highly effective as a batsman. Since retiring as a player in 1984 he has had a number of senior coaching roles, including head of the Australian Cricket Academy and, between 2001 and 2005, director of the England and Wales Cricket Board national academy.

Marshal, William, 1st Earl of Pembroke and Strigul c.1146–1219
English nobleman, Regent of England
The nephew of the Earl of Salisbury, he supported HENRY II against RICHARD I, Cœur de Lion. Pardoned by Richard, he married (1189) the heiress of Strongbow, which brought him his earldom. He became a marshal of England and after Richard died supported the new king, JOHN. He advised John in his conflicts with the pope and his barons, and brought peace and prosperity to Ireland (1207–13). After John's death he was appointed regent (1216–19) for the nine-year-old HENRY III, and concluded a peace treaty with the French.

Marshall, Barry James 1951–
Australian microbiologist and Nobel Prize winner
Born in Kalgoorlie, Western Australia, he studied medicine at the University of Western Australia, Perth. In the early 1980s, working at the Royal Perth Hospital, he began collaborating with J ROBIN WARREN on the causes of stomach inflammation and ulcers. Over the next five years, the two discovered that these were caused by a bacterium, *Helicobacter pylori*, and that they could be cured by a simple course of antibiotics. Marshall famously demonstrated this by infecting himself with the bacterium, becoming sick and curing himself. Marshall and Warren shared the 2005 Nobel Prize in physiology or medicine. He now works at the University of Western Australia.

Marshall, George Catlett 1880–1959
US soldier, politician, and Nobel Prize winner
He was born in Uniontown, Pennsylvania. He was commissioned in 1901, and as Chief of Staff (1939–45) he directed the US army throughout World War II. After two years in China as special representative of the president he became Secretary of State (1947–49) and originated the Marshall Aid plan for the post-war reconstruction of Europe (ERP). In 1950 he was made Secretary of Defense by President TRUMAN. He was awarded the Nobel Peace Prize in 1953. 🕮 Forrest C Pogue, *Organizer of Victory, 1943–45* (1973); *Ordeal and Hope, 1939–42* (1966); *Education of a General, 1880–1939* (1963)

Marshall, John 1755–1835
US jurist
Born near Germantown, Virginia, he served (1775–79) in the Continental army during the American Revolution and afterwards studied law and became active in Virginia state politics. He was a special envoy to France during the XYZ affair (1797–98), and he served briefly in Congress and as Secretary of State under President JOHN ADAMS before being appointed by Adams as Chief Justice of the Supreme Court in 1801. During his 34-year tenure, he established the power and independence of the Supreme Court as well as the fundamental principles of constitutional law. He ended the practice by which each justice wrote a separate opinion, instead producing a single majority opinion that stood as the verdict of the Court. His most important decision was in the case of *Marbury* v. *Madison* (1803), which established the principle of judicial review, asserting the Court's authority to determine the constitutionality of legislation. He also wrote majority opinions in decisions that upheld the inviolability of contracts with states and the superiority of federal over state authority. He is the single most influential figure in US legal history. 🕮 Albert J Beveridge, *The Life of John Marshall* (4 vols, 1916–19)

Marshall, Sir John Hubert 1876–1958
English archaeologist and administrator
Born in Chester, he studied classics at Cambridge and excavated in Greece before being appointed director-general of archaeology in India (1902–31). He reorganized the Indian Archaeological Survey, recruiting Indians for the first time, established an ambitious programme for the listing and preservation of monuments, expanded museum services, and excavated widely on early historic sites. The city of Taxila in the Himalayan foothills (occupied 420 BC–AD 500) was the subject of a 20-year campaign (1913–33), and he worked also at the Buddhist religious centres of Sanchi in Madhya Pradesh and Sarnath near Benares. Prehistoric research was established on an equal footing in the 1920s with extensive excavation at Mohenjo Daro and Harappa, the chief cities of the Indus civilization which flourished in the north-west of the subcontinent c.2300–1750 BC. This revealed for the first time the unsuspected antiquity of Indian civilization. His publications included *Mohenjo Daro and the Indus Valley Civilization* (3 vols, 1931), *The Monuments of Sanchi* (3 vols, 1939) and *Taxila* (1951).

Marshall, Paule, *originally* **Valenza Pauline Burke** 1929–
US writer
She was born in Brooklyn, New York City, to parents who had emigrated from Barbados during World War I. She grew up during the Depression, and in 1948 enrolled at Hunter College, New York City, but she left prematurely because of illness. Later she graduated from Brooklyn College and worked for *Our World Magazine*. *Brown Girl, Brownstones* (1959), her first novel, is regarded as a classic of African-American literature, telling the story of the coming of age of Seling Boyce, the daughter of Barbadian immigrants living through the Depression and World War II. Later works include *The Chosen Place, the Timeless People* (1969), *Praisesong for the Widow* (1983), *Daughters* (1992) and *The Fisher King* (2000).

Marshall, Penny, *originally* **Carole Penny Marscharelli** 1942–
US film director and comedienne
Born in the Bronx, New York, she established her reputation as a comedy actress in television shows like *The Odd Couple* (1971–75) and *Laverne and Shirley* (1976–83). She made her debut as a film director with *Jumpin' Jack Flash* (1986) and scored a box office success with *Big* (1988). Her other films include *Awakenings* (1990), *A League of Their Own* (1992), *The Preacher's Wife* (1996) and *Riding in Cars with Boys* (2001). Her brother is the director and producer Garry Marshall (1934–).

Marshall, Peter 1902–49
US Presbyterian clergyman
Born in Coatbridge, Scotland, and educated at the technical school and mining college there, he served in the navy before finding himself called to the ministry. Entry to a regular course of training in Scotland seemed barred because of his inadequate qualifications, so he went to the USA, graduated from Columbia Theological Seminary, Decatur, Georgia, and served pastorates in the South before his appointment in 1937 to the historic New York Avenue Presbyterian Church in Washington, DC. In 1948 he became chaplain to the US Senate. He was much in demand as a speaker, and a collection of his sermons, *Mr Jones, Meet the Master*, edited by his wife Catherine (*née* Wood, 1914–83), was published in 1949. After his premature death he was himself the subject of a film, *A Man Called Peter*, based on his wife's 1951 biography of him.

Marshall, Thurgood 1908–93
US jurist
Born in Baltimore, Maryland, and educated at Lincoln and Howard universities, he joined the legal staff of the National Association for the Advancement of Colored People, and argued many important civil rights cases. He served as a judge of the US Court of Appeals (1961–65), and as Solicitor-General of the United States (1965–67), before becoming the first black Justice of the US Supreme Court (1967–91).

Marshall, William 1748–1833
Scottish fiddler and composer
Born in Fochabers, Moray, he was considered by ROBERT BURNS 'the first composer of strathspeys of the age'. He set new standards of technical accomplishment in fiddle music and proudly claimed that he did not write for 'bunglers'. His two principal collections of compositions were published in 1781 and 1822, and among the many Marshall tunes that are still played are 'The Marquis of Huntly's Farewell' and 'Craigellachie Brig'.

Marshall, William Calder 1813–94
Scottish sculptor
He was born in Edinburgh, and trained in London at the Royal Academy Schools under Sir FRANCIS CHANTREY. As well as memorial statues, busts, etc, he did the group *Agriculture* on the Albert Memorial, London.

Marsilius of Padua c.1275–c.1342
Italian political theorist and philosopher
Born in Padua, he was Rector of the University of Paris from 1313. In 1324 he completed *Defensor Pacis*, a political treatise much influenced by ARISTOTLE's *Politics*, which argued against the power of clergy and pope and developed a secular theory of the state based on popular consultation and consent and on natural rights. When the authorship of the work became known he was forced to flee Paris (1326). Excommunicated by Pope JOHN XXII, he took refuge at the court of Louis of Bavaria in Munich, and remained there for the rest of his life.

Marston, John 1576–1634
English dramatist and satirist
Born in Wardington, Oxfordshire, the son of a Shropshire lawyer and an Italian mother, he attended Brasenose College, Oxford, and then studied law at the Middle Temple. His first work was *The Metamorphosis of Pigmalion's Image: and Certaine Satyres* (1598), a licentious poem which was condemned by Archbishop WHITGIFT. He began to write for the theatre in 1599, and in 1602 published *Antonio and Mellida* and *Antonio's Revenge*, two gloomy and ill-constructed tragedies, partially redeemed by some strikingly powerful passages. A comedy, *The Malcontent* (1604), more skilfully constructed, was dedicated to BEN JONSON, with whom he had many quarrels and reconciliations, and with Jonson and GEORGE CHAPMAN he wrote the comedy *Eastward Ho* (1605), for which, due to some reflections on the Scots, the authors were imprisoned. Other plays include *The Dutch Courtesan* (1605, a comedy), *Parasitaster, or the Fawn* (1606), *Sophonisba* (1606, a tragedy) and

What You Will (1607). He gave up play-writing, and took orders in 1609, and (1616–31) was a clergyman at Christchurch, Hampshire. The rich and graceful poetry of *The Insatiate Countess* (1613) is unlike anything else in Marston's work, suggesting the play may have been completed by another hand. 🕮 A F Caputi, *John Marston, Satirist* (1961)

Marston, Philip Bourke 1850–87
English poet
He was born in London, the son of dramatic poet John Westland Marston (1819–90), and became blind at the age of three. He was grief-stricken at the death of his fiancée and then of his sisters, and his friends Oliver Madox Brown and DANTE GABRIEL ROSSETTI. He is remembered for his friendship with Rossetti, THEODORE WATTS-DUNTON and ALGERNON SWINBURNE rather than for his sonnets and lyrics. *Songtide, All in All* and *Wind Voices* were the three volumes of poetry he published between 1870 and 1883. A collection of his short stories appeared posthumously in 1887. 🕮 C C Osborne, *Philip Bourke Marston* (1926)

Martel, Charles *See* CHARLES MARTEL

Martel, Sir Giffard le Quesne 1889–1958
English soldier
During World War I he aided in the development of the first tanks, and in 1925 was responsible for the construction of the first one-man tank. In 1940 he commanded the Royal Armoured Corps and in 1943 headed the British military mission in Moscow.

Martell, Yann 1963–
Canadian novelist
Born in Salamanca, Spain, to Canadian parents, he grew up in Costa Rica, France, Spain and Mexico, and studied philosophy at Trent University, Ontario. *The Facts Behind the Helsinki Roccamatios* (1993), a collection of short stories, was followed by a novel, *Self* (1996), a tale of sexual identity, orientation and transformation. *Life of Pi* (2002), an epic survival story with an overarching religious theme, won the 2002 Man Booker Prize and has been translated into some 30 languages. It was followed by another collection, *We Ate the Children Last* (2004).

Martens, Conrad 1801–78
Australian landscape painter
Born in Crutched Friars, London, England, where his father was consul for Austria, he studied in London under the celebrated watercolourist Copley Fielding, and in 1833 was appointed by the commander of *The Beagle* as a topographer for the voyage with CHARLES DARWIN from Rio de Janeiro to Valparaiso. The scientific interests of these two men greatly influenced Martens's future work, especially in the accurate depiction of natural detail. In 1835 he arrived, by way of Tahiti, in Sydney, where he set up a studio and began teaching. He travelled widely through New South Wales and southern Queensland, but his favourite subject was Sydney harbour, and a set of lithographs, *Sketches of Sydney*, was published in 1850 and 1851. In 1863 he obtained a post in the parliamentary library where he remained for the rest of his life.

Martens, Wilfried 1936–
Belgian statesman
Educated at Louvain University, he was adviser to two governments, in 1965 and 1966, before becoming Minister for Community Problems in 1968. He was president of the Flemish-speaking Social Christian Party (CVP) from 1972 to 1979, when he became prime minister at the head of a coalition. He continued in office until 1992, apart from a brief break in 1981, serving as prime minister in no fewer than nine coalition governments. He was succeeded by JEAN-LUC DEHAENE.

Martha 1st century AD
Biblical character
From Bethany, near Jerusalem, she was possibly the wife or widow of Simon the Leper. She was devoted to JESUS CHRIST, like her sister (purportedly Mary who anointed him) and brother, the Lazarus whom he raised from the dead (John 11). Perhaps unfairly, she is remembered for when Jesus rebuked her for fussing over domestic arrangements and being irked that Mary just sat listening to him (Luke 10.39–42). In later Christian tradition Mary and Martha have been taken as symbols for the two paths of contemplative and active spirituality and used in arguments about the superiority of one over the other.

Martí, José 1853–95
Cuban writer and patriot
Born in Havana, he was exiled at the age of 16 for associating with activists for Cuban independence from Spain. He lived in Mexico, Guatemala, Spain and the USA, and gained a reputation as a distinguished author and poet. His poetry is more direct in its expression of feelings than that of his contemporaries, and his prose contains many correct prophecies about race and integration. One of his poems was set to music as *Guantanamera*. In the USA, he organized a new revolutionary movement and abandoned his career as a writer to take part in the 1895 uprising, but within weeks was killed at the Battle of Dos Rios. 🕮 I A Schulman, *Símbolo y color en la obra de José Martí* (1960)

Martial, *properly* **Marcus Valerius Martialis** c.40–c.104 AD
Roman poet and epigrammatist
Born in Bilbilis, Spain, he went to Rome in AD 64 and became a client of the influential Spanish house of the SENECAS, through which he found a patron in Calpurnius Piso. The failure of the Pisonian plot to assassinate CICERO lost Martial his closest friends – LUCAN and Seneca. When the Emperor TITUS dedicated the Colosseum in AD 80, Martial's epigrams in *Liber Spectaculorum* ('Book of Spectacles') brought him equestrian rank. In AD 86 appeared the first twelve books of the *Epigrams*, satirical comments on contemporary events and society. His admirers included PLINY, the Younger, from whom he borrowed the means of returning to Bilbilis. 🕮 P Nixon, *Martial and the Modern Epigram* (1927)

Martin, St c.316–c.400 AD
French churchman, and a patron saint of France
Born in Savaria, Pannonia, he was educated at Pavia, serving in the army under CONSTANTINE I, THE GREAT, and JULIAN. He became a disciple of ST HILARY of Poitiers, and, returning to Pannonia, was forced, because of persecution by the Arian party, to go to Gaul, where he founded a monastery at Ligugé near Poitiers (c.360 AD), the first in France. In AD 371–72 he was made Bishop of Tours. The fame of his good works and his reputation as a worker of miracles attracted crowds of visitors. To avoid distraction he established the monastery of Marmoutier near Tours, in which he himself lived. His military cloak, which he gave to a beggar, has become the symbol of charity, and he is the patron saint of publicans and innkeepers.

Martin I, St d.655
Italian pope
Born in Tuscany, he held the first Lateran Council (against the Monothelites) in the first year of his reign (649), and was banished by CONSTANS II in 654 to the Crimea.

Martin V, *originally* **Oddone Colonna** 1368–1431
Italian pope
Born in Genazzano, Papal States, he was elected during the Council of Constance in 1417. With this event, the Great Schism, which had begun in 1378, was finally ended. He died in Rome, just after calling the Council of Basle.

Martin, Agnes 1912–2004
Canadian painter
Born in Maklin, Saskatchewan, she studied at Columbia University in the 1940s. She lived in New Mexico from 1956 to 1957, and in 1959 began painting the barely visible grids of vertical and horizontal lines on pale monochrome backgrounds which characterize her work and demand quiet concentration from the viewer, as in *Water Flower* (1963, National Gallery of Art, Washington, DC). In 1967 she left New York and settled permanently in New Mexico, ceasing to paint for several years while she built a small adobe house and wrestled with a spiritual crisis, but she later returned to her former themes. The Whitney Museum of American Art, New York, held a retrospective of her work in 1992, and she was awarded the Golden Lion at the Venice Biennale of 1997.

Martin, Archer John Porter 1910–2002
English biochemist and Nobel Prize winner
Born in London, he trained at Cambridge and then at the Lister Institute where he studied the vitamin deficiency disease pellagra (1937–38) and the significance of B vitamins. Martin then moved to the Wool Industry Research Association in Leeds (1938–46) where, with RICHARD SYNGE, he developed the technique of partition chromatography (the use of silica gel to separate amino acid derivatives from protein compounds) in the analysis of protein structure. Their technique revolutionized analytical biochemistry, and it earned him the 1952 Nobel Prize in chemistry, shared with Synge. From 1953 he worked on analysis by gas-liquid chromatography. He joined the staff of the Medical Research Council (1948–52), and became director of the Abbotsbury Laboratories (1959–70) and a consultant to the Wellcome Research Laboratories (1970–73). He then became professorial fellow at the University of Sussex (1973–78) and Robert A Welch Professor of Chemistry at the

University of Houston, Texas (1974–79). He was elected FRS in 1950 and awarded the CBE in 1960.

Martin, Chris(topher) Anthony John 1977–
English pop singer, guitarist and pianist
He was born in Devon and studied classics at University College London, where he met the friends with whom he would form the band Coldplay in 1996. Martin's gentle, melodic songs and trademark use of falsetto contrasted with the indie rock style dominating the charts at that time, and the hit song *Yellow* (2000) established the band; they went on to achieve international success, playing to stadiums around the world. A committed supporter of fair trade initiatives and an outspoken critic of the invasion of Iraq, he is married to GWYNETH PALTROW.

Martin, Dean, *originally* **Dino Paul Crocetti** 1917–95
US entertainer
Born in Steubenville, Ohio, he worked in a steel mill and boxed as a welterweight before starting to earn a living as a nightclub crooner. Teamed with comedian JERRY LEWIS in 1945, he became part of one of the most successful double acts in entertainment history, enjoying spectacular success as a nightclub attraction and in such films as *My Friend Irma* (1949), *The Stooge* (1953) and *Hollywood or Bust* (1956). A solo performer from 1956, he displayed his dramatic abilities and comic touch in films like *The Young Lions* (1958), *Rio Bravo* (1959) and *Kiss Me Stupid* (1964). He found enduring popularity as a booze-loving, mellow-voiced singer whose casual, lighthearted manner belied his consummate professionalism. He enjoyed chart success with songs like 'Volare', 'That's Amore' and his signature tune 'Everybody Needs Somebody', which was a number one hit in 1964. Part of the FRANK SINATRA Rat Pack, he starred in the long-running television series *The Dean Martin Show* (1965–74). Later film appearances include *Airport* (1969) and his last in *Cannonball Run II* (1983).

Martin, Frank 1890–1974
Swiss composer and pianist
Born in Geneva, he studied at the Conservatory there, and in 1928 was appointed a professor at the Jaques-Dalcroze Institute in Geneva. His works are refined and precise in style, and include the oratorios *Golgotha* (1945–48) and *In Terra Pax* (1944, 'On Earth Peace'), a mass and the cantata *Le Vin herbé* (1938–41), based upon the legend of Tristan and Isolde, as well as incidental music and works for orchestra and chamber combinations.

Martin, Sir George 1926–
English record producer, composer and arranger
Born in London, he studied at the Guildhall School of Music before joining record company Parlophone in 1950. He produced orchestras and dance bands, and carved a niche for the label with recordings of British comedians and jazz bands. In 1962 he signed THE BEATLES, with whom he formed a close working relationship. His sympathetic orchestral arrangements and innovative use of studio technology spurred their creativity to such an extent that he is sometimes referred to as 'the fifth Beatle'. He retired in 1998 after a career producing over 700 recordings, including 30 British number one singles and 19 such albums; in 2006, with his son Giles (1969–), he produced an album of remixed Beatles songs to accompany the Cirque du Soleil show *Love*. He was awarded the CBE in 1988, and knighted in 1996.

Martin, Glenn Luther 1886–1955
US aircraft manufacturer
He was born in Macksburg, Iowa, and educated at Kansas Wesleyan University in Salina. Influenced as a boy by the flights of the WRIGHT brothers, he built his first glider in California in 1905, and by 1909 had built and flown his first powered aircraft. In 1912 he flew a Martin-built seaplane from near Los Angeles to Catalina Island and back (32 miles, 51.5km). He invented a bomb sight and a free-fall parachute in 1913 and produced his MB-1 bomber at a factory in Cleveland in 1918. In 1929 he moved to Baltimore, producing such famous aircraft as the B-10 bomber and the China Clipper flying boat. In World War II his factory created the B-26 Marauder, Mariner and Mars flying boats.

Martin, Homer Dodge 1836–97
US painter
He was born in Albany, New York, and his early work was in the style of the Hudson River School, emphasizing the grandeur of the landscape. During a stay in France (1882–86), he was influenced by French Impressionism. Despite failing eyesight his later years were a time of creative flowering, and the contemplative, often melancholy paintings he made in the late 1880s and 1890s, including *Westchester Hills*, *The Sun Worshippers*, and *Adirondack Scenery*, are his finest work.

Martin, John 1789–1854
English painter
He was born in Haydon Bridge, Northumberland. After a youth spent struggling in London (from 1806) as a heraldic and enamel painter, in 1812 he exhibited at the Royal Academy the first of his 16 grandiose biblical paintings which included *The Fall of Babylon* (1819), *Belshazzar's Feast* (1821) and *The Deluge* (1826).

Martin, Kenneth 1905–84
English painter and sculptor
Born in Sheffield, he trained at Sheffield School of Art and the Royal College of Art. From abstract paintings he turned to kinetic constructions ('screw mobiles') in 1951, and through his teaching at Goldsmiths College (1946–67) he pioneered Constructivism in Great Britain. Commissions included the Peter Stuyvesant project in Sheffield (1972), the steel fountain in Gorinchem, the Netherlands (1974), and the Kinetic Monument in Swansea. He was married to MARY MARTIN.

Martin, (Basil) Kingsley 1897–1969
English journalist
Born in London, he was educated at Mill Hill School and Cambridge, and also studied at Princeton, USA. After teaching at the London School of Economics (1923–27), he joined the *Manchester Guardian* (1927–31). As editor of the *New Statesman and Nation* (1932–62), he transformed it into a self-assured weekly journal of socialist opinion. He kept up socialist pressure on Labour under CLEMENT ATTLEE and in the late 1950s KHRUSHCHEV and JOHN FOSTER DULLES replied in its columns to an open letter it had published from BERTRAND RUSSELL on the Cold War. His books include *The Triumph of Lord Palmerston* (1924), *French Liberal Thought in the Eighteenth Century* (1929), a memoir of HAROLD LASKI, *Critic's London Diary* (1960, a selection from his *New Statesman* column) and two autobiographical works, *Father Figures* (1966) and *Editor* (1968). 🕮 C H Rolph, *Kingsley: The Life, Letters and Diaries of Kingsley Martin* (1973)

Martin, Mary, *née* **Balmford** 1907–69
English painter and sculptor
Born in Folkestone, she trained at Goldsmiths College and the Royal College of Art. From rug design and abstract painting, she turned to construction in 1951. In 1969 she did the Wall Construction for Stirling University and won first prize (with RICHARD HAMILTON) in the John Moores Liverpool exhibition. She was the wife of KENNETH MARTIN.

Martin, Michael John 1945–
Scottish Labour politician
Born in poverty in Glasgow, he was a sheet metal worker and trade union official before entering local government. He became MP for Glasgow Springburn (now Glasgow North East) in 1979. He chaired several important committees as one of the Speaker's Panel of Chairmen over some ten years. In 2000 he was elected Speaker of the House of Commons, becoming the first Roman Catholic to hold the office since the Reformation.

Martin, Paul 1864–1942
French photographer
Born in Herbenville, France, he went to England in 1872, but remained a French citizen throughout his life. First employed as a wood engraver on magazine illustrations, he was an amateur photographer who made good use of a disguised camera (with glass plates). With this, he recorded working people in the streets of London and on holiday at the seaside (1888–98), perhaps the first use of 'candid camera' as a long-term social record. He turned professional in 1899 but produced no further work of significance. His *London by Gaslight* (1896) was recognized by the Royal Photographic Society and by ALFRED STIEGLITZ, and his records have been much used to represent the realities of late Victorian everyday life.

Martin, Paul Edgar Philip 1938–
Canadian Liberal politician
Born in Windsor, Ontario, he was the son of a Liberal cabinet minister. He graduated from the University of Toronto, and made his fortune as CEO of Canada Steamship Lines. He entered politics in 1988 as MP for LaSalle–Émard, became Minister of Finance in the Liberal administration of JEAN CHRÉTIEN and delivered a series of balanced budgets at the expense of social programmes. In 2003, he became leader of the Liberal Party and prime minister. 🕮 John Gray, *Paul Martin: the Politics of Ambition* (2003)

Martin, Pierre Émile 1824–1915
French metallurgist
Born in Bourges, he devised an improved bulk steelmaking method in 1864. The open-hearth (or Siemens–Martin) process derived its name from the fact that molten metal lay in a comparatively shallow pool on the furnace hearth. The products of the process won a gold medal at the Paris Exhibition of 1867, and by World War I the open-hearth furnace had taken over from the BESSEMER converter as the major source of the world's steel. Martin himself was crippled financially by unsuccessful litigation and spent his later years in poverty while others profited from his process, until in 1907 an international benefit fund restored his finances.

Martin, Richard 1754–1834
Irish lawyer and humanitarian
Born in Dublin, he was dubbed 'Humanity Martin' by GEORGE IV, who was his friend. He was educated at Harrow and Trinity College, Cambridge. As MP for Galway (1801–26) he sponsored a bill in 1822 to make the cruel treatment of cattle illegal, the first legislation of its kind. Through his efforts the Royal Society for the Prevention of Cruelty to Animals was formed. 🕮 Shevawn Lynam, *Humanity Dick: A Biography of Richard Martin, MP, 1754–1834* (1975)

Martin, Steve 1945–
US film actor
Born in Waco, Texas, he began performing stand-up comedy as a student, when audiences witnessed the verbal dexterity and manic inventiveness that would eventually make him a star. As a comedy writer, he won an Emmy award for *The Smithers Brothers Comedy Hour* (1968) for television, and he was awarded Grammys for his bestselling albums *Let's Get Small* (1977) and *Wild and Crazy* (1978). He made his big screen debut in the short *The Absent-Minded Waiter* (1977) and took the title role in the juvenile comedy *The Jerk* (1979). His numerous films include the dramatic musical *Pennies From Heaven* (1981), *Dead Men Don't Wear Plaid* (1982), *The Man with Two Brains* (1983), *All of Me* (1984), *Dirty Rotten Scoundrels* (1988), the witty contemporary reinterpretation of *Cyrano de Bergerac* entitled *Roxanne* (1987), *Parenthood* (1989), *Father of the Bride* (1991) and *The Pink Panther* (2006). A frequent contributor to magazines, he has written a book of comic essays, *Pure Drivel* (1999), and the novels *Shopgirl* (2000) and *The Pleasure of My Company* (2003).

Martin, Sir Theodore 1816–1909
Scottish writer and biographer
He was born in Edinburgh. His series of poetic parodies, the *Bon Gaultier Ballads* (1855), written in conjunction with WILLIAM AYTOUN, were followed by verse translations from GOETHE, HORACE, CATULLUS, DANTE and HEINRICH HEINE. He was requested by Queen VICTORIA to write the life of Prince ALBERT (5 vols, 1874–80), and he also wrote biographies of Aytoun (1867), Lord Lyndhurst (1883) and the Princess Alice (1885).

Martin, Valerie, *née* **Metcalf** 1948–
US writer and educator
Born in Sedalia, Missouri, she was educated at the University of New Orleans and the University of Massachusetts, Amherst. She has taught at Mount Holyoke College, the University of New Orleans, the University of Alabama and Sarah Lawrence College, among other institutions. Through her writing she has attempted to reconcile, in her words, 'a full blown, lyrical, pantheistic Romanticism with a terse, godless and chilly Realism'. She is the author of numerous novels and short stories, including *Mary Reilly* (1990), which was adapted into a film by Stephen Frears, and *Property* (2003), which won the Orange Prize.

Martin du Gard, Roger 1881–1958
French novelist and Nobel Prize winner
He was born in Neuilly-sur-Seine. After studying history, he qualified as an archivist before turning to writing, publishing his first novel, *Devenir* ('Becoming'), in 1909. In that same year the *Nouvelle revue française*, with which he had a long and fruitful association, was founded. After serving in World War I he lived as a recluse and devoted himself to writing in various forms, including novels, plays and memoirs. His novels include *Jean Barois* (1913, Eng trans 1949), which deals, among other matters, with the DREYFUS affair, and *Vieille France* (1933, Eng trans *The Postman*, 1954), a study of a less-than-idyllic rural life. He is best known, however, for his eight-novel series *Les Thibault* (1922–40, Eng trans *The Thibaults*, 1939–41) dealing with family life during the first decades of the 20th century. He was awarded the Nobel Prize in literature in 1937. The correspondence (1913–51) between him and GIDE was published in 1968. 🕮 D L Schak, *Martin du Gard* (1967)

Martineau, Harriet 1802–76
English writer
She was born in Norwich, Norfolk, the daughter of a textile manufacturer of Huguenot descent. Her first article, for the (Unitarian) *Monthly Repository* (1821) was followed by the books *Devotional Exercises for the Use of Young Persons* and *Addresses for the Use of Families* (both 1826), and short stories about machinery and wages. A failed investment obliged her to earn her living from 1829. She became a successful author through her *Illustrations of Political Economy* and *Poor Laws and Paupers Illustrated* (1833–34), and settled in London. After a visit to the USA (1834–36) she published *Society in America* and the novels *Deerbrook* (1839), and *The Hour and the Man* (1840), about TOUSSAINT LOUVERTURE. From 1839 to 1844 she was an invalid, suffering from heart disease and lack of hearing at Tynemouth, but she recovered after mesmerism (a type of hypnotism), her subsequent belief in which alienated many friends. She visited Egypt and Palestine, and wrote *Eastern Life* (1848). In 1851, in conjunction with H G Atkinson, she published *Letters on the Laws of Man's Social Nature*, which was so agnostic that it gave much offence, and in 1853 she translated and condensed AUGUSTE COMTE's *Philosophie positive*. She also wrote much for the daily and weekly press and the larger reviews. Her *Autobiographical Memoir* was published posthumously in 1877. She was the sister of JAMES MARTINEAU. 🕮 V Wheatley, *Life and Work of Harriet Martineau* (1957)

Martineau, James 1805–1900
English Unitarian theologian
Born in Norwich, and educated there and at Bristol, he became a Unitarian minister at Dublin and Liverpool, until 1841, when he was appointed professor of mental and moral philosophy at Manchester New College. He left for London in 1857, after that institution had been transferred there, becoming also a pastor in Little Portland Street Chapel, and later principal of the College (1869–85). One of the profoundest thinkers and most effective writers of his day, he wrote *Endeavours after the Christian Life* (1843–47), *A Study of Spinoza* (1882), *Types of Ethical Theory* (1885), *A Study of Religion* (1888) and *The Seat of Authority in Religion* (1890). He was the brother of HARRIET MARTINEAU.

Martinelli, Giovanni 1885–1969
Italian tenor
He was born in Montagnana where he played clarinet in the town band and occasionally sang in concerts. The bandmaster was impressed by his voice and he was sent to Rome to study singing. In 1910 in Milan, he sang in ROSSINI's *Stabat Mater*. The performance was heard by PUCCINI who asked him to take the role of Dick Johnson in the European première of *La Fanciulla del West* ('The Girl of the Golden West') in 1911. Martinelli made his Covent Garden debut in 1912 in *Tosca*, and his US debut, also in *Tosca*, in Philadelphia in 1913. He continued singing in opera, mostly at the New York Metropolitan Opera, until 1946. He then taught voice in New York, where he gave a guest performance in *Turandot* at the age of 82.

Martinet, Jean d.1672
French army officer
He won renown as a military engineer and tactician, devising forms of battle manoeuvre, pontoon bridges, and a type of copper assault boat used in LOUIS XIV's Dutch campaign. He also achieved notoriety for his stringent and brutal forms of discipline, and was 'accidentally' killed by his troops at the siege of Duisberg.

Martini, Simone c.1284–1344
Italian painter
Born in Siena, he was a pupil of DUCCIO DI BUONINSEGNA. He was one of the major artists of the 14th-century Sienese school, notable for his grace of line and exquisite colour. He worked in Assisi from 1333 to 1339 and at the papal court at Avignon from 1339 to 1344. His works include the *Annunciation* (a collaboration with his brother-in-law, Lippo Memmi; 1333, Uffizi, Florence), and *Christ Reproved by his Parents* (1342, Walker Art Gallery, Liverpool).

Martins, Peter 1946–
Danish dancer
Born in Copenhagen, he trained at the Royal Danish Ballet School from the age of eight. Unusually tall for a dancer at 6ft 2in (1.88m), he made his debut in Edinburgh with New York City Ballet (NYCB) (1967). He joined the company two years later and created roles for GEORGE BALANCHINE. His partnership with NYCB's Kay Mezzo was to prove highly successful. In the late 1970s he returned to the Royal Danish Ballet, retiring from

performance in 1983. In the same year, Balanchine died and Martins stepped into his place, sharing the directorship of the NYCB with JEROME ROBBINS until Robbins' departure in 1990 when Martins assumed sole directorship. His autobiography, *Far From Denmark*, was published in 1982.

Martín-Santos, Luis 1924–64
Spanish novelist
Born in Larache, Morocco, he helped to revolutionize the form of the novel in his country during the Francoist period. He was a psychiatrist by profession and his first writings were technical. His only finished and influential novel, *Tiempo de silencio* (1962, Eng trans *Time of Silence*, 1965), deals with a man's unfulfilled life in the sick and submissive society of Madrid in 1949 and shows the influence of the psychology of Karl Jaspers in its attempt to reconcile subjectivity with objectivity. Aesthetic innovations in his work combine with his wish to understand and relieve mental illness. His stories were collected in *Apólogos* (1970, 'Apologues'), and an attempt has been made to reconstruct his unfinished and pessimistic novel about a law student, *Tiempo de destrucción* (1975, 'Time of Destruction'). 🕮 J C Mainer (ed), Introduction to *Tiempo de destrucción* (1975)

Martinson, Harry Edmund 1904–78
Swedish poet, novelist and Nobel Prize winner
He was born in Jäshög, Blekinge, and after a harsh childhood as a parish orphan he went to sea as a stoker (1919), travelling worldwide. He made his poetic debut in 1929, and soon found an individual voice, particularly as a nature poet with such volumes as *Nomad* (1931) and *Natur* (1934) which established his reputation. During the 1930s he was married to the writer Moa Martinson (1890–1963). His masterpiece, the poetic space epic *Aniara* (1956), questions whether man possesses sufficient ethical maturity to control his own technological inventions, and was set to music as an opera by KARL-BIRGER BLOMDAHL. *Nässlorna blomma* (1935, 'Flowering Nettle') and *Vägen ut* (1936, 'The Way Out'), moving accounts of his childhood and youth, and his 'tramp' novel *Vägen till Klockrike* (1948, 'The Road to Klockrike'), contributed to the growing genre of working-class autobiographical novels in Sweden. He shared the 1974 Nobel Prize in literature with the Swedish novelist EYVIND JOHNSON, and a Harry Martinson Society was founded in 1984. 🕮 I Holm, *Harry Martinson* (1960)

Martinu, Bohuslav 1890–1959
Czech composer
Born in Policka, he began to compose at the age of 10, and in 1906 was sent by a group of fellow townsmen to the Prague Conservatory, where disciplinary regulations and the routine course of studies irritated him. Expelled from there, he played the violin in the Czech Philharmonic Orchestra, and in 1920 attracted attention with his ballet *Ishtar*. Readmitted to the Conservatory, he studied under JOSEPH SUK until interest in the French Impressionist composers led him to work in Paris. In 1941 he escaped from Occupied France to the USA, where he produced a number of important works, including his 1st Symphony, commissioned by SERGE KOUSSEVITZKY for the Boston Symphony Orchestra (1942). A prolific composer, he ranges from orchestral works in 18th-century style, including a harpsichord concerto, to modern programme pieces evoked by unusual stimuli such as football (*Half Time*, 1925) or aeroplanes (*Thunderbolt P.47*). His operas include the miniature *Comedy on a Bridge* (1935), written for radio and successfully adapted for television and stage.

Marty, Martin Emil 1928–
US church historian
Born in West Point, Nebraska, he had an extensive theological training before taking a PhD at Chicago University. Ordained in the Lutheran Church in 1952, he ministered in Illinois, then was appointed professor of the history of modern Christianity at Chicago (1963–98, then emeritus). A versatile scholar, he was also one of the editors of the liberal *Christian Century* (1956–85), and a welcome lecturer in Roman Catholic and moderate evangelical circles. Among his many books are *A Short History of Christianity* (1959), *Second Chance for American Protestants* (1963), *Righteous Empire* (1970), *Protestantism in the United States* (1985), the five-volume *Fundamentalism Project* with R Scott Appleby (1991–95) and *Martin Luther* (2004).

Martyn, Henry 1781–1812
English missionary
Born in Truro, Cornwall, he graduated from St John's College, Cambridge, and in 1802 became a Fellow. Through the influence of CHARLES SIMEON he sailed for India in 1805 as a chaplain with the East India Company. He translated the New Testament into Hindustani, Hindi and Persian, as well as the prayer book into Hindustani and the Psalms into Persian.

Marvell, Andrew 1621–78
English metaphysical poet
Born in Winestead, Yorkshire, he was educated at Hull Grammar School and Trinity College, Cambridge. He travelled (1642–46) in the Netherlands, France, Italy and Spain. After a period as tutor to Lord FAIRFAX's daughter, when he wrote his pastoral and garden poems, he was appointed tutor to CROMWELL's ward, William Dutton. In 1657 he became MILTON's assistant and two years later, MP for Hull. In 1663–65 he accompanied Lord Carlisle as secretary to the embassy to Muscovy, Sweden and Denmark, but the rest of his life was devoted to his parliamentary duties, fighting against intolerance and arbitrary government. Marvell's works are divided by the Restoration into two very distinct groups. After 1660 he concentrated on politics – his last satires are a call to arms against monarchy – except when he produced the lines which prefixed the second edition of Milton's *Paradise Lost*. He wrote *The Rehearsal Transpos'd* (1672–73), against religious intolerance, and in 1677 his most important tract, the *Account of the Growth of Popery and Arbitrary Government*, was published anonymously. As a poet, he belongs to the pre-Restoration period, although most of his poetry was not published until 1681 as *Miscellaneous Poetry*. A subsequent volume was entitled *Poems on Affairs of State* (1689–97). 🕮 J B Leishman, *The Art of Marvell's Poetry* (1966); P Legouis, *Andrew Marvell, poète, puritain, patriote* (1928)

Marx, Karl *See panel p1052*

Marx Brothers
US family of film comedians
They were born in New York City, the sons of German immigrants, and were called Julius Henry (Groucho, 1890–1977), Leonard (Chico, 1886–1961), Adolph Arthur (Harpo, 1888–1964) and Herbert (Zeppo, 1901–1979). They began their stage career in vaudeville in a team called the Six Musical Mascots that included their mother, Minnie (d.1929), and an aunt; another brother, Milton (Gummo, 1892–1977), left the act early on. They later appeared as the Four Nightingales and finally as the Marx Brothers. They appeared in musical comedy, but their main reputation was made in films such as *Animal Crackers, Monkey Business* (both 1932), *Horse Feathers* and *Duck Soup* (both 1933). Herbert retired from films in 1935 but the others scored further successes in *A Night at the Opera* (1935), *A Day at the Races* (1937), *A Day at the Circus* (1939), *Go West* (1940) and *The Big Store* (1941). *Love Happy* (1950) was the team's last film before they broke up to lead individual careers. Each had a well-defined role: Groucho with his oversized moustache and wisecracks, Chico, the pianist with an individual technique, and Harpo, the dumb clown and harp maestro. Groucho Marx wrote *Many Happy Returns*, his autobiography, *Groucho and Me* (1959) and a serious study of American income tax. Harpo's autobiography, *Harpo Speaks!*, was published in 1961. 🕮 Joe Adamson, *Groucho, Harpo, Chico and Sometimes Zeppo* (1973)

Mary, Mother of Jesus, *also entitled* **the Blessed Virgin Mary** d.c.63 AD
Mother of Jesus Christ
The New Testament records the Annunciation, the conception of JESUS by the Holy Spirit (Matthew 1.18), her betrothal to JOSEPH, and the birth of Jesus. She only occasionally appears in Christ's ministry, but in John 19.25 she is at the Cross and is committed to the care of one of the Disciples. She has become a subject of devotion in her own right, especially in Roman Catholic doctrine and worship. The belief that her body ascended into heaven is celebrated in the festival of the Assumption, defined as Roman Catholic dogma in 1950. The Immaculate Conception has been a dogma since 1854. Belief in the appearances of the Virgin in such places as Lourdes, Fatima, and Medjugorje attracts many thousands of pilgrims each year. In Roman Catholic and Orthodox Christianity, she holds a special place as an intermediary between God and humanity.

Mary Magdalene, St, *also called* **Mary of Magdala** 1st century BC–1st century AD
Early follower of Jesus Christ
Mary Magdalene was born probably in Magdala on the west coast of the sea of Galilee, hence her name. Luke 8.2 reports that JESUS exorcized seven evil spirits from her, and throughout the Church's history she has epitomized the archetypal repentant sinner. She features also in the narratives of Jesus's passion

Marx, Karl 1818–83
German social, political and economic theorist

Karl Marx was born in Trier and brought up in a Jewish family which converted to Protestantism in order to escape anti-Semitism. He studied at the universities of Bonn (1835–36) and Berlin (1836–41), where he associated with the radical followers of HEGEL, 'the young Hegelians', who were concerned particularly with the critique of religion.

In 1842 he worked for the liberal Cologne paper *Rheinische Zeitung*, until it was suppressed by the government the following year. Marx then emigrated to Paris, where he became a communist and first stated his belief that the proletariat must itself be the agent of revolutionary change in society. In Paris he wrote his first long critique of capitalism, usually called *Economic and Philosophical Manuscripts of 1844* (not published until 1932), which developed the important Marxist notion of the alienation of man under capitalism, and also in Paris he began his lifelong friendship with FRIEDRICH ENGELS.

Under political pressure he moved on to Brussels in 1845, and in collaboration with Engels wrote the posthumously published *German Ideology*, a full statement of his materialist conception of history, and the famous *Communist Manifesto* (1848), a masterpiece of political propaganda which ends with the celebrated rallying-cry: 'The workers have nothing to lose but their chains. They have a world to win. Workers of all lands, unite!' With Engels he also reorganized the Communist League, which met in London in 1847.

After the 1848 Paris revolution, he returned to Cologne as editor of the radical *Neue Rheinische Zeitung*, but when that folded in 1849 he temporarily abandoned his political activism and took refuge with his family in London. They lived in some poverty, but in the reading room of the British Museum he began the researches which culminated in the publication of his major works of economic and political analysis, *Grundrisse der Kritik der politischen Ökonomie* (1857–58, published in Moscow 1939–41), *Zur Kritik der politischen Ökonomie* (1859) and, most notably, his magnum opus *Das Kapital* (Vol 1 1867, Vols 2 & 3 posthumously 1884, 1894), one of the most influential works of the 19th century. In this last work, which remained unfinished at his death, he developed his mature doctrines of the theory of surplus value, class conflict and the exploitation of the working class, and predicted the victory of socialism over capitalism and the ultimate withering away of the state as the classless society of communism was achieved. Marx was supported in his research over these years by his collaborator, Engels, and he eked out his income by journalistic work from 1825 to 1862 as European correspondent for the *New York Daily Tribune*.

He later revived his political involvement and was a leading figure in the First International (Working-Men's Association) from 1864 until its effective demise in 1872, when the anarchist followers of MIKHAIL BAKUNIN broke away. The last decade of his life was marked by increasing ill health. He died in 1883 and was buried in Highgate cemetery, London. Despite the apparent failure of Marxian principles as practised in communist Europe, his theories still exert an enormous influence on social science, and his secular adherents continue to outnumber the followers of many other religious or political creeds.

> 'The philosophers have only interpreted the world in various ways; our task is to change it.'
>
> – *Theses on Feuerbach*, no.11 (1845).

and resurrection as, seemingly with other women, she was present at the Cross and later at the empty tomb. Most memorably, as related in John 20 and Mark 16, she was the first to encounter the risen Lord, who appeared to her in the garden of his burial; blinded by her tears, she at first supposed him to be the gardener. Her cult was influenced greatly by her identification with Mary the sister of MARTHA (John 11–12) and also with the woman in Luke 7 who anointed Jesus's feet and dried them with her hair. However, nowadays these are thought to be three separate people. One tradition holds that she accompanied St JOHN the Evangelist to Ephesus where she later died and was buried. Her feast day is 22 July.

Mary I, Tudor 1516–58
Queen of England and Ireland
She was born in Greenwich, near London, the daughter of HENRY VIII and his first wife, CATHERINE OF ARAGON. She was well-educated, a good linguist, fond of music and devoted to her mother and the Catholic Church. After her mother's divorce, Henry forced her to sign a declaration that her mother's marriage had been unlawful. During the reign of her half-brother EDWARD VI she lived in retirement, refusing to conform to the new religion. On his death (1553), being entitled to the Crown by her father's testament and the parliamentary settlement, she became queen. She upset the Duke of Northumberland's (Sir Thomas PERCY) conspiracy to set Henry's will aside in favour of his daughter-in-law Lady JANE GREY, and, with the support of the whole country, entered London in triumph. Northumberland and two others were executed, but Lady Jane and her husband were, for the present, spared. Mary proceeded very cautiously to bring back Catholicism, reinstated the Catholic bishops and imprisoned some of the leading reformers, but dared not restore the pope's supremacy. In spite of national protests, she determined to marry PHILIP II, King of Spain. The unpopularity of the proposal brought about Sir THOMAS WYATT's rebellion (1554), quelled mainly through Mary's courage and coolness. Lady Jane, her husband and father were executed, and the Princess Elizabeth (later ELIZABETH I), suspected of complicity, was committed to the Tower of London. Ecclesiastical laws were restored to their state under Henry VIII. In 1554 Philip was married to Mary; Cardinal POLE entered England as papal legate, parliament petitioned for reconciliation to the Holy See, and the realm was absolved from the papal censures. Soon after, the persecution of Protestant opposition which gave Mary the name of 'Bloody Mary' began. In 1555 NICHOLAS RIDLEY and HUGH LATIMER were brought to the stake, THOMAS CRANMER followed the next year, and Pole, now Archbishop of Canterbury, was left supreme in the councils of the queen. How far Mary herself was responsible for the cruelties practised is doubtful, but during the last three years of her reign 300 victims were burned. She died childless. 📖 H F M Prescott, *Mary Tudor* (1940)

Mary II 1662–94
Stuart Queen of Great Britain and Ireland
Born at St James's Palace, London, she was the daughter of the Catholic Duke of York (later JAMES VII AND II) and his first wife, Anne Hyde (1638–71), but was brought up a Protestant. She was married (1677) to her first cousin, William of Orange, Stadtholder of the Netherlands, who in 1688 landed in Torbay with an Anglo-Dutch army in response to an invitation from seven Whig peers hostile to the arbitrary rule of James II. When James fled to France, Mary went to London from Holland and was proclaimed queen (1689), sharing the throne with her husband, who became King WILLIAM III. Mary left executive authority with William (except when regent during his frequent absences abroad), but she was largely responsible for raising the moral standard of court life, and she took great interest in church appointments. Naturally kind, gracious and sincere, she died, childless, of smallpox.

Mary, Queen of Scots *See panel p1053*

Mary of Guise, *also called* **Mary of Lorraine** 1515–60
French noblewoman and Scottish queen
The daughter of Claude of Lorraine, 1st Duke of GUISE, she married Louis d'Orléans, Duke of Longueville (1534), and JAMES V of Scotland (1538), at whose death (1542) she was left with one child, MARY, QUEEN OF SCOTS. During the troubled years that followed, she acted with wisdom and moderation, but after she was made Regent of Scotland (1554) she campaigned against Protestantism and allowed the Guises so much influence that the Protestant nobles raised a rebellion (1559), which continued until her death at Edinburgh Castle.

Mary of Hungary 1505–58
Queen of Hungary and Bohemia
The daughter of PHILIP I, the Handsome of Castile and JUANA the Mad, she married Louis II of Hungary and Bohemia (ruled 1516–26) in January 1522, a month after he was declared of age. Their life of debauchery soon disqualified the king from affairs of state, and he is said to have drowned whilst fleeing from a battle in which his forces were routed by marauding Ottoman Turks. Hungary then became divided between the Turks and the

Mary, Queen of Scots 1542–87
Queen of Scotland 1542–67

Mary was the daughter of JAMES V of Scotland by his second wife, MARY OF GUISE. She was born at Linlithgow, while her father lay on his deathbed at Falkland. She became queen when she was a week old, and was promised in marriage by the regent JAMES HAMILTON, 2nd Earl of Arran, to Prince EDWARD of England, son of HENRY VIII, but the Scottish parliament declared the promise null. War with England followed, which resulted in defeat at Pinkie (1547), and Mary was sent to France to be betrothed to the dauphin (later FRANCIS II) at St Germain.

Her next ten years were spent in the splendour of the French court, where she was given a thorough French education. She was brought up as a member of the large, young family of HENRY II; her special friend was Elizabeth of Valois, later the wife of PHILIP II of Spain. In 1558 she was married to the dauphin; the marriage treaty contained a secret clause by which, if she died childless, both her Scottish realm and her right of succession to the English Crown (as great-granddaughter of HENRY VII) would pass to France.

In 1559 the dauphin succeeded to the throne as FRANCIS II, but he died the following year, and power then shifted towards CATHERINE DE MÉDICIS, acting as regent for her son CHARLES IX. Mary became a dowager queen of France, with her own estates and a large income. Meanwhile her presence was increasingly needed in Scotland, where the death of her mother in 1560 had left a highly unstable situation. Effective power lay in the hands of the Protestant Lords of the Congregation, who had held an illegal parliament in 1560 to implement a Reformation and negate the authority of the pope.

On Mary's arrival, a Protestant riot threatened the first mass held in her private chapel at Holyrood and within days a proclamation issued by her privy council imposed a religious standstill, which in effect banned the mass to all but the queen and her household. Her chief advisers were Protestant, the talented diplomat, WILLIAM MAITLAND of Lethington, and her illegitimate brother, James Stewart, Earl of MORAY.

The question of Mary's remarriage arose, and a series of candidates was proposed (1562–65) including Robert Dudley, Earl of LEICESTER, but Mary decided unexpectedly on her cousin, Henry Stewart, Lord DARNLEY, who was a son of Lady Margaret Douglas, a granddaughter of HENRY VII; Darnley therefore might strengthen her descendants' claim to the English throne. The immediate effect of the marriage was to cool relations with England and to undermine the position of MORAY and the Hamilton family.

Darnley led a debauched life which soon appalled Mary. Eventually he became involved with WILLIAM RUTHVEN, JAMES MORTON and other Protestant lords in a conspiracy that led to the murder of the queen's Italian private secretary, DAVID RIZZIO, in the queen's antechamber at the Palace of Holyroodhouse (1566). As a result, Darnley became an object of mingled abhorrence and contempt. Shortly before the birth of their son, the future JAMES VI AND I (June 1566), the queen's affection for her husband seemed briefly to revive, but Darnley refused to attend the child's Catholic baptism at Stirling Castle. Divorce was openly discussed, and Darnley spoke of leaving the country, but he was mysteriously killed

cont

Austrian Habsburgs. In 1531 Mary's brother, Emperor CHARLES V, asked her to act as regent in his Low Countries possessions, which she did from 1531 to 1555. Mary's rule subjugated the interests of the Netherlands provinces to those of Spain and the empire, which helped lay the ground for the Eighty Years War (1568–1648) by the Low Countries against Habsburg rule.

Mary of Lorraine *See* MARY OF GUISE

Mary of Magdala *See* MARY MAGDALENE, ST

Mary of Modena, *née* **d'Este** 1658–1718
Queen of Great Britain and Ireland
Born in Modena, the only daughter of Alfonso IV, Duke of Modena, she married James, Duke of York (1672), later JAMES VII AND II. Proud, dignified and devout, after losing five children in infancy, she gave birth in 1688 to JAMES FRANCIS EDWARD STUART (the future Old Pretender). This was received with scepticism, and the 'warming pan' legend was born. When William of Orange (the future WILLIAM III) landed in England later that year, she escaped to France with her infant son, to be joined there later by her deposed husband. She spent the rest of her life at St Germain.

Mary of Teck 1867–1953
Queen of Great Britain and Northern Ireland
Born at Kensington Palace, London, she was the only daughter of Francis, Duke of Teck, and Princess Mary Adelaide of Cambridge, and a granddaughter of GEORGE III. Princess May (as she was known) accepted a marriage proposal (1891) from the eldest son of the Prince of Wales, the Duke of Clarence, who within six weeks died from pneumonia. She then became engaged to his brother, the Duke of York, marrying him in 1893. After his accession (as GEORGE V) in 1910, Queen Mary accompanied him to Delhi as Empress of India for the historically unique Coronation Durbar (1911). Although by nature stiff and reserved, Mary was more sympathetic to changing habits than her husband, whom she helped to mould into a 'people's king'. After the abdication of her eldest son, EDWARD VIII, she applied her wide experience to strengthening once again the popular appeal of the monarchy throughout the reign of her second son, GEORGE VI, whom she survived by 13 months. She died at Marlborough House, London, less than three months before the coronation of her granddaughter, ELIZABETH II. 🕮 S W Jackman, *The People's Princess: A Portrait of H R H Princess Mary, Duchess of Teck* (1984)

Masaccio, *properly* **Tommaso de Giovanni di Simone Guidi** 1401–c.1428
Italian painter of the Florentine school
In his short life he brought about a revolution in the dramatic and realistic representation of biblical events which was recognized by his contemporaries and had a great influence on MICHELANGELO and, through him, on the entire 16th century. In many ways Masaccio began where GIOTTO left off. He stripped away all the decorative affectations of the International Gothic style and concentrated on the dráma of the situation. Line was not allowed to meander into graceful arabesques, but instead, the gestures and groupings of the figures were used to describe the action. His greatest work is the fresco cycle in the Brancacci Chapel of the church of S Maria del Carmine in Florence (1424–27). MASOLINO DA PANICALE, an inferior painter with whom Masaccio is associated, also worked there, as did FILIPPINO LIPPI.

Masaniello, *properly* **Tommaso Aniello** 1623–47
Neapolitan patriot
A fisherman from Amalfi, he led the successful revolt of the Neapolitans against their Spanish oppressors in July 1647, but the revolt deteriorated into murder and massacre, and he was assassinated by agents of the Spanish viceroy.

Masaoka Shiki 1867–1902
Japanese poet
He came from Ehime but lived in Tokyo. He worked with the traditional poetic forms, especially *waka* and *haiku*, refining them and devising new ways of seeing them, to the extent that there is good reason to think of him as the originator of the modern haiku (as a concise, beautiful and above all self-sufficient expression of some idea or feeling). Some of his most beautiful and poignant verse was written in the final stages of his drawn-out and agonizing death from spinal tuberculosis. His famous poem *Drop of Ink* was composed when he was totally paralysed. 🕮 'Masaoka Shiki and Tanka Reform' in D Shively (ed), *Tradition and Modernisation in Japanese Culture* (1971)

Masaryk, Jan 1886–1948
Czechoslovak diplomat and politician
Born in Prague, the son of TOMÁŠ MASARYK, after a youth of travelling and developing a variety of skills, he entered the diplomatic service in 1918, and from 1925 to 1938 was Czechoslovak ambassador in London. There, his fluent English and personal charm won him many friends, but proved inadequate to prevent NEVILLE CHAMBERLAIN imposing the Munich Agreement on his country. He became a popular broadcaster to his home country during World War II. In July 1941 he was appointed Foreign Minister of the Czechoslovak government-in-exile, returning with President EDUARD BENEŠ to Prague in 1945 and remaining in office in the hope of bridging the growing gap between East and West in the developing Cold War. On 10 March 1948, following the Communist takeover of power in Czechoslovakia, his body was found beneath the open window

Mary, Queen of Scots *cont*

while recovering from a bout of smallpox at Kirk o'Field, Edinburgh in January 1567, when the house was blown up by gunpowder.

The chief culprit in this incident was probably the Earl of BOTHWELL, who had recently enjoyed the queen's favour; and there were suspicions that the queen herself was not wholly ignorant of the plot. Bothwell was given a mock trial and acquitted; shortly after this he intercepted the queen on her way from Linlithgow to Edinburgh, and carried her, with scarcely a show of resistance, to Dunbar. Mary publicly pardoned his seizure of her, and created him Duke of Orkney; then, three months after her husband's murder, she married the man who was widely regarded as his murderer.

This fatal step united her nobles in arms against her. Her army melted away without striking a blow on the field of Carberry (15 June 1567); after that Mary had no choice but to surrender to the confederate lords. They led her to Edinburgh, where she suffered the insults of the mob. At Lochleven, she was compelled to sign an act of abdication in favour of her son, who within days was crowned as James VI at Stirling.

After escaping and suffering a further defeat, Mary crossed the Solway, and threw herself on the protection of Queen ELIZABETH I of England, only to find herself a permanent prisoner in a succession of strongholds, ending up at Fotheringhay. The presence of Mary in England was a constant source of disquiet to Elizabeth and her advisers, both as a descendant of Henry VII and because a significant minority naturally looked to her as the likely restorer of Catholicism. Her position, as guest or prisoner, was always ambiguous. A series of plots came to light, including the Ridolfi plot (1571), but Mary's complicity could not easily be established.

Finally, in 1586, the queen's secretary of state, FRANCIS WALSINGHAM, got wind of a plot by ANTONY BABINGTON, and contrived to implicate Mary. Letters apparently from her and seeming to approve of Elizabeth's death passed along a postal route to which Walsingham himself had access. Mary was brought to trial in 1586 and sentenced to death, although it was not until February 1587 that Elizabeth signed the warrant of execution. It was carried into effect a few days later, and she was buried at Peterborough. In 1612 her body was moved to Henry VII's chapel at Westminster, where it still lies.

Mary enjoyed great beauty and personal accomplishments, including a knowledge of six languages, a good singing voice, and an ability with various musical instruments. By 1567 she possessed a library of over 300 books, which included the largest collection of Italian and French poetry in Scotland. She is known to have been reponsible for a significant revival of Scots vernacular poetry, including the important collection, *The Bannatyne Manuscript*. The portraits and defences of her after 1571 largely fall into one of two moulds – Catholic martyr or papist plotter – making all the more difficult a proper assessment of Mary as Queen of Scots.

📖 I B Cowan, *Mary, Queen of Scots* (Saltire Society pamphlets, new series, no. 9, 1987); A Fraser, *Mary, Queen of Scots* (1969).

En ma fin git mon commencement.

'In my end is my beginning.'

– Mary's embroidered motto.

of the Foreign Ministry in Prague, and it was assumed that he killed himself in protest at the Stalinization of his homeland.

Masaryk, Tomáš Garrigue 1850–1937
Czechoslovak statesman
Born in Hodonín in Moravia, the son of a coachman, half Czech and half Slovak, he received his university education in Vienna and Leipzig, read and travelled widely, and married Charlotte Garrigue, from Boston, USA, before becoming professor of philosophy at the newly authorized Czech University of Prague in 1882. Entering politics in the nationalistic atmosphere of the 1880s and 1890s, he made his name as an independent of courage and common sense through his many writings and his intervention in several fraught disputes. A deputy in the Czech and Austrian Imperial parliaments off and on after 1891, he was variously a 'realist' and a 'progressive', but his main political contribution came after 1914 when he travelled abroad to France, Britain, Russia and the USA to win support and recognition for an independent state, first Czech, then Czechoslovak. He became its first president in 1918 and was regularly re-elected until he retired in 1935 in favour of his right-hand man, EDUARD BENEŠ. 📖 Emil Ludwig, *Gespräche mit Masaryk: Denker und Staatsman* (1935, *Defender of the Democracy: Masaryk of Czechoslovakia*, 1936)

Mascagni, Pietro 1863–1945
Italian composer
Born in Livorno, he produced the highly successful one-act opera *Cavalleria Rusticana* ('Rustic Chivalry') in 1890, now frequently performed with LEONCAVALLO's *I Pagliacci* (1892). His many later operas failed to repeat this success, though arias and intermezzi from them are still performed. These include *L'Amico Fritz* (1891), *Guglielmo Ratcliffe* (1895), *Le Maschere* (1901) and *Londoletta* (1917). 📖 David Stivender (ed), *Mascagni* (1988)

Mascall, Eric Lionel 1905–93
English Anglo-Catholic theologian, and author
He read mathematics for four years at Cambridge, but his interest in philosophy led him to theology, and he was ordained priest in 1932. After a few years in parish work he was appointed sub-warden of Lincoln Theological College, where he remained for eight years. He then became tutor in theology and university lecturer in the philosophy of religion at Christ Church, Oxford (1946–62), and professor of historical theology at London University (1962–73). His books *He Who Is* (1943) and *Existence and Analogy* (1949) have become standard texts on natural theology. His other works include *Christian Theology and Natural Science* (Oxford Bampton Lectures, 1956) on the relations of theology and science, the ecumenical *The Recovery of Unity* (1958), *The Christian Universe* (1966), *Nature and Supernature* (1976), *Whatever Happened to the Human Mind* (1980) and *The Triune God* (1986).

Masefield, John Edward 1878–1967
English poet and novelist
Born in Ledbury, Herefordshire, and educated at the King's School, Warwickshire, he joined the merchant navy, then served his apprenticeship on a windjammer. Ill health drove him ashore, and after three years in New York he returned to England to become a writer in 1897, first making his mark as a journalist. His sea poetry includes *Salt Water Ballads* (1902) and *Dauber* (1913), and his best-known narrative poem is *Reynard the Fox* (1919). Other works are *The Everlasting Mercy* (1911), *The Widow in the Bye-Street* (1912), *Shakespeare* (1911) and *Gallipoli* (1916). He also wrote novels such as *Sard Harker* (1924), *Odtaa* (1926) and *The Hawbucks* (1929), and plays including *The Trial of Jesus* (1925) and *The Coming of Christ* (1928). He became Poet Laureate in 1930 and his final work was *Grace before Ploughing* (1966). 📖 *So Long to Learn* (1952)

Masham, Lady Abigail, *née* **Hill** d.1734
English courtier
She was a cousin of SARAH CHURCHILL, Duchess of Marlborough, through whose influence she entered the household of Queen ANNE. In 1707 she married Samuel (later Baron) Masham. A Tory and a subtle intriguer, she gradually turned the queen against the Marlboroughs, and superseded her cousin (1710) as the queen's confidante and the power behind the throne. On Anne's death (1714) she withdrew into obscurity.

Masina, Giulietta, *originally* **Giulia Anna Masina** 1920–94
Italian actress
Born near Bologna, she met FEDERICO FELLINI whilst both were students in Rome, and they married in 1943. She made her film debut in ROBERTO ROSSELLINI's *Paisà* (1946, *Paisan*), then worked briefly on the stage, but her reputation rests on her work with Fellini. As Italy's leading director, he regarded her as an inspiration, and together they created a number of memorable roles in films like *Giulietta degli Spiriti* (1965, *Juliet of the Spirits*), and *Ginger e Fred* (1986, *Fred and Ginger*).

Masinissa 238–149 BC
King of Numidia
He helped the Carthaginians to subdue the Massaesylli or Western Numidians. He accompanied his allies to Spain, and fought valiantly against the Romans but, going over to them (206 BC), he received as his reward Western Numidia and large portions of Carthaginian territory.

Masire, Sir Quett Ketumile Joni 1925–
Botswana statesman
He began a journalistic career before entering politics, through the Bangwaketse Tribal Council and then the Legislative Council. In 1962, with SERETSE KHAMA, he was a founder member of the Botswana Democratic Party (BDP) and in 1965 became deputy prime minister. When Bechuanaland became the Republic of Botswana within the Commonwealth and full independence was achieved in 1966, Masire became vice-president and, on Seretse Khama's death in 1980, president. He continued his predecessor's policy of non-alignment and helped Botswana become one of the most politically stable nations in Africa. Re-elected several times, he served until his retirement in 1998. He was actively involved in negotiating the 2002 ceasefire in the Congo, and has served as chairperson for the Organization of African Unity's committee investigating the 1994 Rwandan genocide. He was knighted in 1991. 🕮 *Memoirs of an African Democrat: Very Brave or Very Foolish?* (2007)

Maskell, Dan(iel) 1908–92
English tennis player and commentator
Born in London, he began his tennis career as a ball-boy at the Queen's Club, London. He captained Britain's Davis Cup, and was one of the leading professional players of the 1930s, winning 16 titles. He was also a coach, before becoming a television commentator on the sport in 1950. Working until 1991, he became one of Britain's best-loved broadcasters.

Maskelyne, Nevil 1732–1811
English astronomer
Born in London, after being educated at Westminster School he went on to study divinity at Trinity College, Cambridge. He joined the Royal Greenwich Observatory in 1755. In 1763 he produced the *British Mariner's Guide* and went to Barbados to test chronometers. In 1765 he was appointed Astronomer Royal. He improved methods and instruments of observation, invented the prismatic micrometer and made important observations. He went to St Helena to observe the transit of Venus, the aim being to make better estimates of the Earth–Sun distance. In 1767 he founded the *Nautical Almanac*. He also measured the Earth's density from the deflection of the plumb-line at Schiehallion in Perthshire (1774), obtaining a value between 4.56 and 4.87 times that of water. An ordained minister, he was rector from 1775 of Shrawardine, Shropshire, and from 1782 of North Runcton, Norfolk.

Maskelyne, (John) Nevil 1839–1917
English magician
Born in Wiltshire, he became a watchmaker, and built magic boxes, and automata which he used in his entertainments. He joined forces with George Cooke (d.1904) and they appeared together, first at Cheltenham and then at the Crystal Palace, London, in 1865. In 1873 they leased the Egyptian Hall for three months, but their tenancy lasted for 31 years. Maskelyne then moved his 'Home of Magic' to the St George's Hall in 1905 with David Devant as his partner. He devoted much energy to exposing spiritualistic frauds.

Masodi or **Mas'udi, Abu al-Hasan Ali al-** d.957
Arab traveller
Born in Baghdad, he became one of the most important writers on history and geography in the medieval world. He travelled extensively in Egypt, Palestine, the Caspian, India, Ceylon (Sri Lanka), Madagascar, and perhaps even China. He wrote a (lost) 30-volume work, *Reports of the Age*.

Maso di Banco fl.1325–50
Italian painter
He is recorded as working in Florence between 1343 and 1350. Although few works are ascribed to him, he was held in great esteem by later Italian artists, due to his realistic style in the manner of his famous predecessor GIOTTO. His best-known work is a fresco, in S Croce, Florence, of the legend of St Silvester who quelled a dragon which, by its foul breath, had terrorized Rome.

Masolino da Panicale, *properly* **Thommaso di Cristoforo Fini** c.1383–1447
Florentine painter
He is usually associated with MASACCIO because of his work with him in the Brancacci Chapel of the church of S Maria del Carmine in Florence. Sixteenth-century sources say he was Masaccio's master but this seems unlikely (in the Brancacci Chapel the influence seems to be the other way around). Masolino was, however, a much older artist, trained in the International Gothic style in the GHIBERTI and Starnina workshops. The strongest early influence on him was GENTILE DA FABRIANO. Masolino's greatest work is the fresco cycle in the Baptistery and Collegiata of Castiglione d'Olona near Como (1430s). His influence is clear in the work of DOMENICO VENEZIANO and PAOLO UCCELLO.

Mason, Alfred Edward Woodley 1865–1948
English novelist
Born in Dulwich, London, and educated at Oxford, he became a successful actor, and subsequently combined writing with politics, as Liberal MP for Coventry (1906–10). His first published novel was *A Romance of Wastdale* (1895). The adventure novel *Four Feathers* (1902) captured the popular imagination and *The Broken Road* (1907) cemented his success. With *At the Villa Rose* (1910) he started writing detective novels and introduced his ingenious 'Inspector Hanaud'. From then on he alternated historical adventure and detective fiction. Several of his books have been filmed. 🕮 R L Green, *Alfred Mason: The Adventures of a Story-teller* (1952)

Mason, Charles 1730–87
English astronomer
As an assistant at Greenwich Observatory, with the English surveyor Jeremiah Dixon, he observed the transit of Venus at the Cape of Good Hope in 1761. From 1763 to 1767 Mason and Dixon were engaged to survey the boundary between Maryland and Pennsylvania and end an 80-year-old dispute. They reached a point 224 miles west of the Delaware River, but were prevented from further work by Native Americans. The survey was completed by others, but the boundary was given the name 'Mason and Dixon Line'.

Mason, George 1725–92
American Revolutionary statesman
Born in Fairfax County, Virginia, he belonged to the wealthy planter class and was a neighbour to GEORGE WASHINGTON, whom he joined in opposition to the Stamp Act and the Townshend duties. He wrote the Virginia Declaration of Rights (1776), which was one of THOMAS JEFFERSON's models for the Declaration of Independence. He helped draft the Constitution (1787) but opposed its ratification because it permitted slavery and failed to define the rights of citizens. The first ten amendments to the Constitution were in part based on the bill of rights he advocated, and after their passage in 1791 he gave his support to the government but declined a seat in the Senate on the plea of ill health.

Mason, James 1909–84
English actor
Born in Huddersfield, West Yorkshire, he made his stage debut in *The Rascal* (1931) at Aldershot and appeared at the Old Vic, London, and with the Gate Company in Dublin before making his film debut in the 'quota quickie' *Late Extra* (1935). He attained stardom with his suave, saturnine villainy in costume dramas like *The Man in Grey* (1943), *Fanny By Gaslight* (1944) and *The Seventh Veil* (1945). Moving to Hollywood (1947), he became one of the most prolific, distinguished and reliable of cinema actors. He was nominated for an Academy Award for *A Star is Born* (1954), *Georgy Girl* (1966) and *The Verdict* (1982). Other respected performances from more than 100 films include *Odd Man Out* (1946), *Lolita* (1962) and *The Shooting Party* (1984). His autobiography, *Before I Forget*, was published in 1982.

Mason, Sir (Basil) John 1923–
English physicist and meteorologist
Born in Docking, Norfolk, he graduated from Nottingham University in 1948, and moved to Imperial College, London, where he set up his own section on cloud physics. He worked on the study of rainmaking processes, electrification in thunderstorms, ice nucleation and other aspects of cloud physics. His book, *The Physics of Clouds* (1957), is a classic. Elected FRS in 1965, he became director-general of the Meteorological Office (1965–83), where he directed the first operational numerical weather predictions, and research on stratospheric gases using meteorological radar. From 1983 to 1989 he organized a thorough interdisciplinary study of acid rain which finally established the facts. He was also chairman of the Global Atlantic Tropical Experiment 1978 and chairman of the Joint Organising Committee of the World Climate Research Programme. From 1994 to 1996 he was Chancellor of the Institute of Science and Technology at Manchester University. Knighted in 1979, he received many awards including the royal medal of the Royal Society (1991). His published works include *Acid Rain* (1992). An endowment by him in 2006 funds the Royal Meteorological Society's Mason Gold Medal.

Mason, Sir Josiah 1795–1881
English philanthropist and pen manufacturer
Born in Kidderminster, he was a hawker, but after 1822 manufactured split rings. In 1829 he began to make pens for Perry & Co, and soon became the greatest penmaker in the world. He was a partner with his cousin GEORGE ELKINGTON in electroplating (1842–65), and had smelting works for copper and nickel. He endowed almshouses and an orphanage at Erdington at a cost of £260,000, and gave £180,000 to found the Mason College (now Birmingham University).

Mason, Lowell 1792–1872
US musician
Born in Medfield, Massachusetts, he was organist of a Presbyterian church in Savannah, Georgia, where he compiled a book of hymns, taking melodies from the works of HANDEL, MOZART and BEETHOVEN. The success of this work led him to produce similar volumes for school use, and additional hymn books. In 1832 he founded the Boston Academy of Music, with the aim of giving free instruction to children, which he later extended to adults. The most famous of his compositions is probably the hymn tune 'From Greenland's icy mountains'.

Maspero, Sir Gaston 1846–1916
French Egyptologist
Born in Paris, of Italian parents, he became professor of Egyptology at the Collège de France in 1874, and from 1881 to 1886 and 1899 to 1914 was keeper of the Būlāq Museum, Cairo, and director of explorations in Egypt, making valuable discoveries at Sakkara, Dahshūr, and Ekhmim. He wrote many works on Egyptology.

Masséna, André 1758–1817
French general
The greatest of NAPOLEON I's marshals, he served for 14 years in the Sardinian army, and in the French Revolution rose rapidly in rank, becoming in 1793 a general of division. He fought in the campaigns in Upper Italy, defeating Count SUVOROV's Russians at Zurich (1799), and became Marshal of the Empire in 1804. In Italy he kept the Archduke Charles in check, crushed him at Caldiero, and overran Naples. In 1807 he commanded the right wing, and was created Duke of Rivoli. In the campaign of 1809 against Austria he earned the title of Prince of Essling. In 1810 he compelled WELLINGTON to fall back upon his impregnable lines at Torres Vedras, was forced to retreat after five months by lack of supplies, but was recalled. At the Restoration (1814) he adhered to the BOURBONS and on Napoleon's return from Elba, Masséna refused to follow him. 🕮 James Marshall-Cornwall, *André Masséna* (1965)

Massenet, Jules Emile Frédéric 1842–1912
French composer
Born near St Étienne, he studied at the Paris Conservatoire, where he became a professor (1878–96). He made his name with the comic opera *Don César de Bazan* (1872). Other operas are *Hérodiade* (1884), *Manon* (1884), *Le Cid* (1885), *Werther* (1892) and *Thaïs* (1894), and among his other works are oratorios, orchestral suites, music for piano and songs. He wrote *Mes Souvenirs* (1912, Eng trans, 1919).

Massey, Gerald 1828–1907
English mystic and poet
Born near Tring, Hertfordshire, he became a Christian Socialist, edited a journal, lectured, and between 1851 and 1869 published several volumes of poetry, including *Babe Christabel and other Poems* and *Craigcrook Castle*. He also wrote mystical and speculative theological or cosmogenic works, and claimed to have discovered a 'Secret Drama' in SHAKESPEARE's sonnets.

Massey, (Charles) Vincent 1887–1967
Canadian politician and diplomat
Born in Toronto, he joined the Canadian Cabinet after World War I. In 1925 MACKENZIE KING invited him to join his Cabinet but he failed to win a seat in 1926 and he was appointed instead as Canada's first Minister to the USA. He was High Commissioner in London (1935–46) and chairman of the 1949 Royal Commission on National Development in Arts, Letters and the Sciences and the first Canadian Governor-General of Canada (1952–59).

Massey, William Ferguson 1856–1925
New Zealand statesman
Born in Ireland, he emigrated to New Zealand where he became a farmer. Elected to the House of Representatives (1894) he became leader of the opposition (1903) and, in 1912, prime minister, which office he held until his death. During World War I, he formed a coalition government (1915–19) with Sir JOSEPH WARD.

Massie, Allan Johnstone 1938–
Scottish novelist, critic and journalist
Born in Singapore and brought up in Aberdeenshire, he was educated at Glenalmond and Cambridge. He was a teacher in a private school before going to Italy, where he taught English as a foreign language. His first two novels, *Change and Decay In All Around I See* (1978) and *The Last Peacock* (1980), show a native sensibility and can be compared to the work of EVELYN WAUGH. In *The Death of Men* (1981) he turned to Italy, while *Augustus* (1986), *Tiberius* (1990), *Caesar* (1993) and *Caligula* (2004) draw on his knowledge of the ancient world. Other novels include *A Question of Loyalties* (1989), *The Sins of the Father* (1991), *These Enchanted Woods* (1993), *King David* (1995), *Shadows of Empire* (1997), *Nero's Heirs* (1999) and *Arthur the King* (2003). As well as being a prolific novelist, Massie has written books on MURIEL SPARK, the Caesars and Lord BYRON, and his other non-fiction publications include *Edinburgh* (1994). He is also a respected reviewer and a columnist, with trenchant political views.

Massine, Léonide, *originally* **Leonid Fyodorovich Myassin** 1896–1979
Russian dancer and choreographer
Born in Moscow, he trained with the Imperial Ballet School at St Petersburg, becoming principal dancer and choreographer with SERGEI DIAGHILEV (1914–21, 1925–28) and developing his interests in choreography with ballets like *Parade* (1917) and *La Boutique fantastique* (1919), with music by ERIK SATIE and design by PICASSO. He choreographed some controversial 'symphonic ballets', such as *Choreartium* (1933), which was danced to Brahms's 4th Symphony, and became principal dancer and choreographer for the Ballets Russes de Monte Carlo (1938–43). Though he worked periodically in the USA, Massine settled in Europe working freelance for companies like Sadler's Wells and Ballets des Champs Elysées. He appeared in the ballet films *The Red Shoes* (1948) and *The Tales of Hoffmann* (1950).

Massinger, Philip 1583–1640
English dramatist
He was born in Salisbury, Wiltshire, the son of a retainer of the Earl of Pembroke. After leaving Oxford without a degree he became a playwright and was associated with PHILIP HENSLOWE, who died in 1616. In later years he wrote many plays on his own, but much of his work was done in collaboration with others, particularly JOHN FLETCHER. Probably the earliest of Massinger's extant plays is *The Unnatural Combat*, printed in 1639. The first in order of publication is *The Virgin Martyr* (1622), partly written by THOMAS DEKKER. In 1623 *The Duke of Milan* was published, a fine tragedy, but too rhetorical. Other plays include *The Great Duke of Florence* (1627) and *The Emperor of the East* (1631). NATHAN FIELD joined Massinger in writing *The Fatal Dowry* (1632). *The City Madam* (licensed 1632), and *A New Way to Pay Old Debts* (1633), are Massinger's most masterly comedies – brilliant satirical studies, though without warmth or geniality. It is difficult to assess his contribution to the plays which appeared under the names of FRANCIS BEAUMONT and Fletcher. 🕮 A Dunn, *Massinger: The Man and the Playwright* (1957)

Massio, Niccolò di Giovanni di *See* FABRIANO, GENTILE DA

Massys *See* MATSYS

Master of Flémalle *See* CAMPIN, ROBERT

Masters, Edgar Lee 1869–1950
US writer
Born in Garnett, Kansas, he was a successful lawyer in Chicago, then turned to writing poetry. He became famous with the satirical *Spoon River Anthology* (1915), a book of epitaphs in free verse about lives of people in Illinois. He published several more collections and some novels, and returned to his first success with *The New Spoon River* (1924), attacking the new style of urban life. *Across Spoon River* (1936) is an autobiography. 🕮 H W Masters, *Edgar Lee Masters: A Biographical Sketchbook* (1978)

Masters, William Howell 1915–2001
US gynaecologist and sexologist
Born in Cleveland, Ohio, he received his MD from Rochester University in 1943. He joined the faculty of the Washington University School of Medicine (St Louis) in 1947, where his studies in the psychology and physiology of sexual intercourse were carried out using volunteer subjects under laboratory conditions. Much of his work was done in collaboration with VIRGINIA JOHNSON, whom he married in 1971, and with whom he

published *Human Sexual Response* in 1966, which became an international bestseller. They also wrote *On Sex and Human Loving* (1986). They were divorced in 1993.

Mastroianni, Marcello 1923–96
Italian actor
Born in Fontana Liri, the son of a carpenter, he trained as a draughtsman, survived a wartime Nazi labour camp, and became a cashier in post-war Rome, pursuing amateur dramatics as a hobby. He made his film debut in *I Miserabili* (1947) and, from 1948, was employed by LUCHINO VISCONTI's theatrical troupe in productions including *A Streetcar Named Desire* and *Death of a Salesman*. *Peccato che sia una Canaglia* (1955, *Too Bad She's Bad*) began an enduring film partnership with SOPHIA LOREN, while his performances in Visconti's *Le Notte Bianchi* (1957, *White Nights*) and FEDERICO FELLINI's *La Dolce Vita* (1960, *The Sweet Life*) established him as an international star. Stereotypically perceived as a 'Latin lover', in his prolific career he encompassed a wide variety of roles and worked with some of the most distinguished European film directors. He received Academy Award nominations for *Divorzio all'Italiano* (1961, *Divorce Italian Style*), *Una Giornata Particolare* (1977, *A Special Day*) and *Oci Ciornie* (1987, *Dark Eyes*). Other films include Fellini's *8½* (1962), *Città Delle Donne* (1979, *City of Women*) and *Intervista* (1987, *Interview*). He appeared in well over 100 films, making a belated American debut in *Used People* (1992).

Mas'udi, Abu al-Hasan Ali al- *See* MASODI, ABU AL-HASAN ALI AL-

Masur, Kurt 1927–
German conductor
Born in Brieg, Silesia, he studied in Breslau and at the Leipzig Conservatory. Early appointments with the Dresden Philharmonic (1955–58, 1965–72) and the Komische Oper (1960–64) led to international fame in 1970, when he became the conductor of the Leipzig Gewandhaus Orchestra. He was a leader in public protests in Leipzig which helped to bring down the Communist government of East Germany in 1989. He was musical director of the New York Philharmonic Orchestra (1991–2002) and principal conductor of the London Philharmonic Orchestra (2000–07).

Masursky, Harold 1922–90
US geologist
Born in Fort Wayne, Indiana, after graduating from Yale he joined the US Geological Survey, and later began working for NASA. His main work involved the surveying of lunar and planetary surfaces to select landing sites for space missions. He worked on the *Ranger 9* programme, the first to obtain close-up images of the lunar surface, progressed to the *Lunar Orbiter* and *Apollo* programmes, and also participated in the 1971 *Mariner Orbiter* and 1975 *Viking Lander* explorations of Mars. In 1978 Masursky joined the *Venus Orbiter* Imaging Radar Science Group and was one of the chief scientists associated with the *Voyager* missions to the outer planets.

Mata Hari, *stage name of* **Margaretha Gertruida MacLeod**, *née* **Zelle** 1876–1917
Alleged Dutch spy
Born in Leeuwarden, she married a Scottish officer in the Dutch army in 1895 and travelled around with him before they separated in 1905 and she became a dancer in France. She was a beautiful woman with apparently few qualms about near-nudity on stage, and had many lovers, several in high military and governmental positions (on both sides before and during World War I); found guilty of espionage for the Germans, she was shot in Paris.

Mather, Cotton 1662–1728
American clergyman
Born in Boston, the son of INCREASE MATHER, he studied at Harvard, and became the most prominent Puritan minister of his time in New England. A polymath, he reported on American botany, and was one of the earliest New England historians. However, his reputation was irrevocably harmed by his involvement in the Salem witchcraft trials of 1692. He published 382 books, including *Memorable Providences relating to Witchcraft and Possessions* (1685), *Wonders of the Invisible World* (1692) and *Christian Philosopher* (1721). He supported smallpox inoculation and other progressive ideas.

Mather, Increase 1639–1723
American theologian
Born in Dorchester, Massachusetts, he graduated at Harvard in 1656, and again at Trinity College, Dublin, in 1658. His first charge was Great Torrington in Devon, but in 1661, finding it impossible to conform, he returned to the USA, and from 1664 till his death was pastor of the Second Church, Boston. From 1685 to 1701 he was also president of Harvard. Sent to England in 1689 to lay colonial grievances before the king, he obtained a new charter from WILLIAM III. He published 136 works, including *Remarkable Providences* (1684) and a *History of the War with the Indians* (1676), and his *Cases of Conscience Concerning Evil Spirits* (1693) helped to calm the atmosphere during the witch hunts of 1692.

Mather, John Cromwell 1946–
US astrophysicist and Nobel Prize winner
Born in Roanoke, Virginia, he studied physics at Swarthmore College, Pennsylvania, and the University of California, Berkeley. From 1974 he co-ordinated the COBE (Cosmic Background Explorer) project, which used a satellite (launched in 1989) to carry out research into cosmic microwave background radiation. This radiation was thought to have emanated from the big bang, and the COBE experiments were able to confirm that this was indeed the way the universe began. In 2006 he shared the Nobel Prize in physics with his COBE colleague GEORGE SMOOT. He is currently Senior Astrophysicist at the NASA Goddard Space Flight Center in Maryland. 🕮 J C Mather and J Boslough, *The Very First Light* (1996)

Mathew, Theobald, *known as* **Father Mathew** 1790–1856
Irish temperance reformer
Born in Thomastown, Tipperary, he joined the Capuchin order in 1814, and became provincial of the Capuchins at Cork (1822–51). In 1838 he became an ardent advocate of total abstinence. He carried out crusades in Ireland, England and Scotland, and later in the USA (1849–51).

Mathews, Charles 1776–1835
English comedian
He made his debut as an actor at Richmond in 1793, but left the 'legitimate' stage in 1818 and achieved great success as an entertainer, visiting the USA twice. He was the father of CHARLES JAMES MATHEWS.

Mathews, Charles James 1803–78
English comedian
His light style of comedy was considered graceful and delicate. In 1838 he married LUCIA VESTRIS. He was the son of CHARLES MATHEWS.

Mathews, Harry Burchell 1930–
US writer
He was born in New York City and educated at Harvard and at the École Normale de Musique in Paris. In 1952 he moved to Europe, and began writing highly literary fiction; he has lived there, mainly in France, ever since. He is a member of the hermetic Ouvroir de Littérature Potentielle (Oulipo), which explores the use of formal constraints in writing. In 1960, he joined JOHN ASHBERY, Kenneth Koch and James Schuyler in founding the influential magazine *Locus Solus*, based in France. His fictional writing, characterized by improbable narratives and formal invention, includes *The Conversions* (1962), *Tlooth* (1966) and *The Sinking of the Odradek Stadium* (1971–75), which concerns the correspondence between a librarian and his Thai wife. Later work includes *Cigarettes* (1987), *The Journalist* (1994) and *My Life in the CIA* (2005). His collected verse was published as *A Mid-Season Sky* (1992).

Mathias, William 1934–92
Welsh composer and pianist
He was born in Whitland, Carmarthenshire, and studied at the University College of Wales, Aberystwyth, and the Royal College of Music, London. He held several academic posts, including a professorship at the University College of North Wales from 1970. His music includes an opera, *The Servants* (1980), concertos for piano, harp and organ, orchestral and chamber music, and sacred music. He wrote within the bardic and mythic traditions of ancient Wales and Cornwall, and he was influenced by the work of Bartók, as is reflected in the titles of some of his works, including the *Concerto for Orchestra* (1966). He wrote an anthem for the wedding of the Prince and Princess of Wales in 1981.

Mathieu, Georges, *in full* **Georges Victor Adolphe Mathieu d'Escaudœuvres** 1921–
French painter
Born in Boulogne, he took a degree in literature, but began to paint in 1937 in a calligraphic style, using rapid strokes. He settled in Paris in 1947, exhibiting there and in New York. He has perfected a form of lyric, non-geometrical abstraction, in close sympathy with the US neo-Expressionists, such as JACKSON

POLLOCK, as in his *Battle of Bouvines* (1954). In 1956 he painted a 12ft (3.66m) canvas in the presence of an audience, anticipating the 'happenings' of US artists in the 1960s, and in 1974 he designed the new 10-franc coin. A retrospective of his work was held at the Jeu de Paume in Paris in 2002.

Matilda, *called* **the Empress Maud** 1102–67
English princess
The only daughter of HENRY I, she was born in London and married (1114) Emperor HENRY V. She returned to England as Empress Maud after his death (1125) and was acknowledged as the heir to the English throne. In 1128 she married Geoffrey Plantagenet of Anjou, by whom she had a son, Henry 'FitzEmpress', the future HENRY II of England. When Henry I died (1135), his nephew STEPHEN of Blois seized the throne and Matilda invaded England from Anjou (1139) with her half-brother, Robert, Earl of GLOUCESTER. After capturing Stephen, she was acknowledged as 'Lady of the English', but was never crowned. Lacking in judgement, she lost potential allies, especially the city of London, through her financial impositions. Stephen regained control, while Matilda left England (1148) and returned to her son in Normandy, where she exerted influence over his continental territories.

Matilda of Tuscany, *known as* **the Great Countess of Tuscany** c.1046–1115
Italian noblewoman
The daughter of the Margrave Boniface II of Canossa, she was intelligent, well-educated and determined. She inherited much of northern Italy and married first Godfrey the Hunchback, Duke of Upper Lorraine (d.1076), and later, Welf V of Bavaria. She supported the papacy, particularly Pope GREGORY VII (Hildebrand). It was at her stronghold of Canossa that the Emperor HENRY IV did barefoot penance to the pope (1077). After Gregory's death in 1085 her lands were ravaged by Henry's allies, but she refused to make peace or recognize the antipope Clement III, supporting Pope URBAN II until his death (1099). She died at the Benedictine monastery of Polirone, near Mantua. Her remains were reburied in St Peter's, Rome (1634), so high was the regard for her of succeeding popes.

Matilda, Anna *See* COWLEY, HANNAH

Matisse, Henri (Emile Benoît) 1869–1954
French painter
Born in Le Cateau-Cambrésis, he studied law in Paris and then worked as a lawyer's clerk in St Quentin. In 1892 he began studying art seriously in Paris, first under ADOLPHE BOUGUEREAU at the Académie Julian and then under GUSTAVE MOREAU at the École des Beaux-Arts, where he met GEORGES ROUAULT. Between 1899 and 1900 he was working at the Académie Carrière, where he met ANDRÉ DERAIN. In the 1890s he came under the influence of Impressionism and Neo-Impressionism and, in particular, of the Divisionism developed by GEORGES SEURAT and PAUL SIGNAC, but this was eclipsed for a time by his admiration for CÉZANNE. Although poverty-stricken, he managed to buy Cézanne's small *Bathers* from the dealer Ambroise Vollard (1865–1939). In 1904 he returned to his Divisionist technique while working in the brilliant light of St Tropez and started using high-pitched colour, as in his celebrated *Woman with the Hat* (1905). From this departure grew the movement irreverently dubbed the Fauves (Wild Beasts) by critics. Matisse was the leader of this group, which also included Derain, MAURICE VLAMINCK, RAOUL DUFY and Rouault. His most characteristic paintings display a bold use of luminous areas of primary colour, organized within a two-dimensional rhythmic design. The purity of his line drawing is seen in his many sketchbooks and book illustrations. Resident in Nice from 1914, he designed some ballet sets for SERGEI DIAGHILEV. The art of Matisse owes a great deal to oriental influences and his sensuous art has been as influential in the 20th century as more cerebral movements such as Cubism. In his later years he began working with large paper cut-outs, creating abstract designs. He also designed the stained glass for the Dominican Chapelle du Rosaire at Vence, Alpes-Maritimes. His works include *Bonheur de vivre* (1906), *L'Escargot* (1953), and *La Liseuse* (1894, 'Woman Reading'). He also produced sculpture, and his works in this field include the bronze *The Back I–IV* (1909–30).

Matsuhisa, Nobuyuki c.1947–
Japanese chef
Born in Saitama, he began seven years' training as a sushi chef at the age of 18. He worked in Peru and in Argentina before eventually moving to Los Angeles, where he opened Matsuhisa, a restaurant and sushi bar, in 1987. He later formed a partnership with ROBERT DE NIRO, with whom he opened the first Nobu restaurant in New York City in 1994. It quickly became fashionable, and further branches, notably in London, Tokyo and Milan, followed. He is known for taking an innovative approach to Japanese cuisine, sometimes incorporating typically South American ingredients into traditional Japanese dishes.

Matsuoka Yosuke 1880–1946
Japanese diplomat and politician
After studying in the USA, he joined the diplomatic service (1904) and attended the Paris Peace Conference (1919) as a member of the Japanese delegation. As vice-president, and later president, of the South Manchuria Railway, he supported the expansion of Japan's interests in Manchuria. He led the withdrawal of the Japanese delegation from the League of Nations in 1933 in response to the League's adoption of the Lytton Commission report, which had criticized the actions of the Japanese military in Manchuria. As Foreign Minister (1940–41), Matsuoka sought to strengthen Japan's position in the Far East and counter US hostility to its war in China by concluding the Tripartite Pact with Germany and Italy (1940) and signing a neutrality pact with the USSR (1941). Matsuoka's grand scheme ultimately failed since HITLER's invasion of the USSR brought the latter into the allied camp, while US hostility to Japan's war in China (1937–45) merely intensified. In 1946 he was indicted as a class-A war criminal, but died before the trial was concluded.

Matsys or **Massys, Jan** 1509–75
Flemish painter
An imitator of his father, QUENTIN MATSYS, he worked in Antwerp. His brother, Cornelius (1513–79), was also a painter.

Matsys or **Massys, Quentin** c.1466–c.1531
Flemish painter
Born in Louvain, according to legend he was a blacksmith. In 1491 he joined the painters' guild of St Luke in Antwerp. His paintings are mostly religious and genre pictures, treated with a reverent spirit, but with decided touches of realism (as in *The Banker and His Wife*) and exquisite finish. He also ranks high as a portrait-painter, notably for his portrait of ERASMUS.

Matteotti, Giacomo 1885–1924
Italian politician
He was born in Fratta Polesine. A member of the Italian Chamber of Deputies, in 1921 he began to organize the United Socialist Party on a constitutional basis in opposition to MUSSOLINI's Fascists. Matteotti's courageous protests against Fascist outrages led to his murder in 1924, which resulted in widespread hostility and disgust towards Mussolini and a wave of anti-fascist feeling, which briefly threatened to bring an end to his rule. 🕮 Carlo Carini, *Giacomo Matteotti: idee giuridiche e azione politica* (1984)

Matthau, Walter, *originally surnamed* **Matthow** 1920–2000
US actor
Born in New York City, he was a radioman-gunner on army airforce bombers before studying at the New School's Dramatic Workshop. He made his Broadway debut in *Anne of a Thousand Days* (1948) and appeared in such productions as *Will Success Spoil Rock Hunter?* (1955) and *A Shot in The Dark* (1961–62) before winning a Tony award for his role as the slobbish Oscar in *The Odd Couple* (1964–65), a part he recreated on film in 1968. He made his film debut in *The Kentuckian* (1955) and spent a decade as a valuable supporting actor before winning an Academy Award for *The Fortune Cookie* (1966) which began a long association with co-star JACK LEMMON. They subsequently appeared together in films like *The Front Page* (1974), *Buddy, Buddy* (1981) and *Grumpy Old Men* (1993). They also appeared on stage in *Juno and The Paycock* (1974) and Lemmon directed him in the film *Kotch* (1971). An unlikely star with a lugubrious manner and a sure comic touch, he has appeared in other films including *The Sunshine Boys* (1975), *The Bad News Bears* (1976) and *House Calls* (1978). Enjoying renewed popularity in the 1990s, he acted on television in *The Incident* (1990) and its two sequels, and in such cinema films as *I.Q.* (1994) and *I'm Not Rappaport* (1996). His son Charles (1964–), a film-maker, directed him in *The Grass Harp* (1996).

Matthay, Tobias 1858–1945
English pianist and teacher
Born in London, he was professor of pianoforte at the Royal Academy of Music from 1880 to 1925, when he resigned to devote himself to his own school, which he had founded in 1900. His method of piano playing was described in *The Act of Touch* (1903) and in his subsequent publications.

Matthew, St 1st century AD
One of the twelve Apostles of Jesus Christ
He was a tax collector before his conversion, and he is called Levi (his name may have been Matthew the Levite) in Mark 2.14 and Luke 5.27. According to tradition, he was the author of the first Gospel, was a missionary to the Hebrews, and was martyred. His feast day is 21 September (West) or 16 November (East).

Matthews, Alfred Edward 1869–1960
English actor
Born in Bridlington, Yorkshire, he began his career in 1887, and played innumerable comedy roles from *Charley's Aunt* to *Quiet Weekend*. He was still a popular favourite at 90. He published his autobiography in 1952.

Matthews, Drummond H(oyle) 1931–97
English geologist and geophysicist
He was educated at Cambridge, and started his professional career as a geologist with the Falkland Islands Dependencies Survey (1955–57) before returning to Cambridge, where he became assistant director of research in the department of geophysics in 1966. He became Reader in Geology in 1971 and subsequently published many important papers in the realm of marine geophysics. He was elected FRS in 1974. He predicted in 1963 that HARRY HESS's 'sea-floor spreading' theory should produce strips of normally and reversely magnetized oceanic crust on either side of the mid-ocean ridges, due to the periodic polarity changes of the Earth's magnetic field. By 1966 the accumulation of sufficient magnetic survey data yielded striking proof of the theory, causing a paradigm shift in geological thinking and the widespread acceptance of continental drift and the development of plate tectonic theory. From 1982 to 1990 he was scientific director of the British Institutions Reflection Profiling Syndicate at Cambridge University.

Matthews, Jessie 1907–81
English actress
Born in London, of a poor family, she made her stage debut at the age of ten, and danced in chorus lines as a teenager. She became a hugely popular star in musical revues in the 1920s, and in the 1930s made a successful transition into film roles. These films were largely undistinguished, but her appeal transcended their limitations. She chose to remain in Britain rather than enhance her career in Hollywood, and worked only sporadically after World War II. She directed the short film *Victory Wedding* in 1944.

Matthews, Sir Stanley 1915–2000
English footballer
Born in Hanley, he was the son of a notable featherweight boxer, Jack Matthews. He started his sporting career as a sprinter, but soon switched to football, and joined Stoke City as a winger in 1931. First picked for England at the age of 20, he won 54 international caps, spread over 22 years. He played for Blackpool from 1947 to 1961, winning an FA Cup Winner's medal in 1953 at the age of 38. He returned to Stoke in 1961, and continued to play First Division football until after the age of 50. He played for England 54 times, was twice the Footballer of the Year (1948, 1963), and was the inaugural winner of the European Footballer of the Year award in 1956. He was knighted in 1965. He later managed Port Vale, and became president of Stoke City Football Club in 1990. His autobiography was published in 1960 entitled *The Stanley Matthews Story*.

Matthias 1557–1619
King of Bohemia and of Hungary, and Holy Roman Emperor
Born in Vienna, the third son of Emperor MAXIMILIAN II, he was tolerant in religious matters, favouring a policy of moderation towards German Protestants, although, as governor of Austria, he suppressed risings of Protestant peasants (1595–97). He ruled Bohemia (1611–17) and Hungary (1608–18), and after being elected emperor on the death of his brother RUDOLF II (1612), he continued to pursue a conciliatory policy which aroused the antagonism of other Catholic princes, including his nephew and heir, Ferdinand (later FERDINAND II). An asthmatic, he increasingly withdrew from public life, leaving government to his minister Khlesh.

Matthias I Hunyadi, *called* **Corvinus** c.1440–90
King of Hungary
Born in Transylvania, the second son of JÁNOS HUNYADI, he was elected king in 1458. He drove back the Turks, and made himself master of Bosnia (1462), Moldavia and Wallachia (1467), Moravia, Silesia, and Lusatia (1478), Vienna, and a large part of Austria proper (1485). He greatly encouraged the arts and letters, founded the Corvina Library and the Pozsony Academy (university), promoted industry, and reformed finances and the system of justice. However, his rule was arbitrary and his taxes heavy, and in the end he had to compromise with the nobility who feared for the loss of their privileges. He failed in his aim of becoming Holy Roman Emperor, and many of his achievements did not survive his death.

Matthias, Bernd Teo 1918–80
US physicist
Born in Frankfurt am Main, Germany, he studied at Rome University and the Federal Institute of Technology, Zurich, before moving to the USA in 1947, becoming a naturalized citizen in 1951. After a period with Bell Telephone Laboratories he was appointed professor of physics at the University of California, San Diego, in 1961. He worked on ferroelectricity, measuring many ferroelectric materials and discovering some new ones. By the early 1950s he was also working on superconductivity, discovering that alloys of metals with five or seven valence electrons were the most effective superconductors. Higher temperature superconducting metal alloys discovered as a result of this work were used until superseded by ceramic materials in the late 1980s.

Matthiessen, F(rancis) O(tto) 1902–50
US literary critic
Born near Pasadena, California, and raised in Illinois, he espoused socialism, despite his wealthy background, due to his Christian ideals. He studied at Yale, Harvard and was a Rhodes Scholar at Oxford. His studies of HENRY JAMES (1944) and T S ELIOT (1935, rev edn 1947) are direct and perceptive. Joining the faculty at Harvard, he supported civil liberties causes and trade unionism, and in *American Renaissance* (1941) argued that individualism was the bane of US life and culture. At the end of World War II, he became involved in Henry Wallace's Progressive third party movement and was widely reviled from left and right for either closet communism or 'accommodationism'. His journal *From the Heart of Europe* (1948) suggested growing introspection, and two years later, he threw himself from a hotel room window. He bequeathed his inheritance to the struggling journal *Monthly Review*. 🕮 W Cain, *F O Matthiessen and the Politics of Criticism* (1988)

Matthiessen, Peter 1927–
US novelist, travel writer, naturalist and explorer
Born in New York City, he studied at the Sorbonne and at the University of Paris. He has made anthropological and natural history expeditions to Alaska, the Canadian Northwest Territories, Peru, New Guinea, Africa, Nicaragua and Nepal, out of which has come a number of eloquent ecological and natural history studies, which reflect the concerns of his cultish novel *At Play in the Fields of the Lord* (1965). He won the National Book Award with the bestselling *The Snow Leopard* (1978), one man's inner story of a mystical trek across the Tibetan plateau to the Crystal Mountain. Other novels include *Race Rock* (1954), *Far Tortuga* (1975), *Killing Mister Watson* (1990) and *Bone by Bone* (1999). In later years, he took up the cause of Native Americans, writing *In the Spirit of Crazy Horse* (1983), an account of a 1975 shoot-out with the FBI, the publication of which was delayed by litigation. His later non-fiction works include *Baikal: Sacred Sea of Siberia* (1992), *East of Lo Monthang: In the Land of Mustang* (1995) and *End of the Earth: Voyaging to Antarctica* (2003).

Maturin, Charles Robert 1782–1824
Irish dramatist and novelist
He was born in Dublin, and educated at Trinity College there, and became a curate in Loughrea and Dublin. He made his name with a series of extravagant novels in macabre vein that rivalled those of ANN RADCLIFFE. These include *The Fatal Revenge* (1807), *Melmoth the Wanderer* (1820), which influenced HONORÉ DE BALZAC, and *The Albigenses* (1824). His tragedy *Bertram* had a warm reception at Drury Lane, London, in 1816, but its successors, *Manuel* (1817) and *Fredolpho* (1819), were failures. 🕮 W Scholten, *Charles Robert Maturin: The Terror Novelist* (1933)

Matuyama, Motonori 1884–1958
Japanese geophysicist
Born in Oita Prefecture, he graduated in physics from Kyoto University (1911), where he subsequently became an instructor and then assistant professor (1916). At the University of Chicago (1919) he studied the physics of ice movement before returning to Japan as professor of theoretical geology at the Imperial University (1921). From 1926 he worked on the magnetism of basalts from Japan and Manchuria, and made the first successful link of magnetic reversals with the

geological timescale. In 1934 he initiated a marine gravity survey of the Japan trench. He published numerous papers on the physics of the lithosphere and interior of the Earth, seismology and magnetism, and conducted research into physical methods of locating underground resources.

Matzinger, Polly Celine Eveline 1947–
US immunologist
She was born in La Seyne, France. After dropping out of high school, she worked as a jazz musician, dog trainer and Playboy bunny while intermittently attending college. Waitressing in Davis, California, she met two professors from the University of California who encouraged her to take a science degree at the university. While working towards her PhD (1979), she began to challenge the conventional 'self/non-self' model of tolerance and immunity. Her alternative 'danger hypothesis' instead suggests that immunity is controlled by the presence or absence of signs of tissue damage. She has made a number of films to aid public understanding of the theory.

Mauchly, John W(illiam) 1907–80
US physicist and inventor
He was born in Cincinnati, Ohio, and graduated in physics at Johns Hopkins University. After a few years schoolteaching, he joined JOHN ECKERT in 1943 at the University of Pennsylvania, where they developed the ENIAC (Electronic Numerical Integrator and Computer). This giant military calculator led to the pair's major contribution to computing: the design of a stored-program machine, the EDVAC (Electronic Discrete Variable Computer), which played a large part in launching the computer revolution in the second half of the 20th century. They founded in 1948 the Eckert–Mauchly Computer Corporation, but it was not a commercial success and had to be sold in 1950. Following EDVAC, they built UNIVAC, the Universal Automatic Computer, first used in 1951 by the US Census Bureau. Although Mauchly and Eckert relied to a certain extent on the work of others, notably JOHN VINCENT ATANASOFF (who later was awarded priority by the courts for inventing the computer) and JOHN VON NEUMANN, it was their conviction that computers had a commercial market that launched the modern data-processing industry in the USA.

Maud, Empress *See* MATILDA

Maude, Clementina, Lady Hawarden 1822–65
Scottish amateur photographer
She was born at Cumbernauld House, the daughter of the Hon Charles Elphinstone-Fleming (MP for Stirlingshire). Married in 1845 to Cornwallis Maude, 4th Viscount Hawarden, she spent the rest of her life in England, much of it in London. In 1864 she met and became a close friend of Charles Dodgson (LEWIS CARROLL). Her photographs, apparently made over relatively few years in the late 1850s and early 1860s, are mainly of women in country-house interiors. Romantic and sensuous, they are often conspiratorial in feeling, and are unusually light in comparison with the ponderous seriousness of much contemporary work.

Maude, Francis Anthony Aylmer 1953–
English politician
Born in Oxford, he studied at Corpus Christi College, Cambridge, and became Conservative MP for Warwickshire North (1983–92) and later Horsham (1997–). He held several senior offices in the 1980s, including Minister of State at the Foreign and Commonwealth Office (1989–90) and Financial Secretary to the Treasury (1990–92). In 1998 he became shadow Chancellor, in 2000 shadow Foreign Secretary and in 2005 chairman of the Conservative Party.

Maudling, Reginald 1917–79
English Conservative politician
Born in London, he was educated at Merchant Taylors' and Merton College, Oxford, and was called to the Bar. He served in the air force during World War II and in 1945 became one of R A BUTLER's 'backroom boys' in the Conservative central office. He was elected MP in 1950 and after two junior ministerial posts, became Minister of Supply (1953–57), Paymaster-General (1957–59), president of the Board of Trade (1959–61), Colonial Secretary (1961–62), Chancellor of the Exchequer (1962–64), and deputy leader of the opposition in 1964. In 1970 he became Home Secretary in the HEATH government but resigned in 1972, when he became implicated in the bankruptcy proceedings of architect John Poulson. He published his memoirs in 1978. 🕮 Michael Gillard, *A Little Pot of Money: The Story of Reginald Maudling and the Real Estate Fund of America* (1974)

Maudslay, Henry 1771–1831
English engineer and inventor
Born in Woolwich, Kent, he was apprenticed to JOSEPH BRAMAH, then set up on his own in 1797 and invented various types of machinery, including a screw-cutting lathe. He also invented a slide rule, and a method of desalinating sea water. With Joshua Field (1757–1863) he began producing marine engines and started the firm of Maudslay, Sons and Field (1810).

Maudsley, Henry 1835–1918
English psychiatrist
Born near Giggleswick, Yorkshire, he was physician to the Manchester Asylum, and professor of medical jurisprudence at University College (1869–79). The Maudsley Hospital, Denmark Hill, London, is named after him. 🕮 Michael Collie, *Henry Maudsley Victorian Psychiatrist* (1988)

Mauger, Ivan Gerald 1939–
New Zealand speedway rider
Born in Christchurch, he rode for Wimbledon, Rye House, Eastbourne, Newcastle, Belle Vue, Exeter, and Hull between 1957 and 1982, and won the world individual title a record six times (1968–70, 1972, 1977, 1979). He also won two pairs world titles, four team titles, and the world long-track title twice.

Maugham, W(illiam) Somerset 1874–1965
British writer
Born in Paris, France, of Irish origin, he was educated at King's School, Canterbury, and read philosophy and literature at Heidelberg in Germany. He qualified as a surgeon at St Thomas's Hospital, London, and a year's medical practice in the London slums gave him the material for his first novel, the lurid *Liza of Lambeth* (1897), and the magnificent autobiographical novel, *Of Human Bondage*, eventually published in 1915. Initial attempts to have his plays accepted failed, but four of them ran simultaneously in London in 1908. In 1914 he served first with a Red Cross unit in France, then as a secret agent in Geneva and finally in Petrograd (St Petersburg), attempting to prevent the outbreak of the Russian Revolution. *Ashenden* (1928) is based on these experiences. He also visited Tahiti and the Far East, which inspired *The Moon and Sixpence* (1919) and such plays as *East of Suez* (1922). In 1928 he settled in the south of France, where he wrote his astringent, satirical masterpiece, *Cakes and Ale* (1930). A British agent again in World War II, he fled to the USA (1940–46), where he ventured into mysticism with *The Razor's Edge* (1945). He is best known for his short stories – several of which were filmed, including *Quartet* (1949) – although his sparse, careful prose has sometimes unjustly been mistaken for superficiality. Other works include essays on GOETHE, CHEKHOV, HENRY JAMES and KATHERINE MANSFIELD in *Points of View* (1958). 🕮 R Calder, *Willie: The Life of Maugham* (1989); *Strictly Personal* (1941); *Summing Up* (1938)

Maunder, Edward Walter 1851–1924
English astronomer
He was born and educated in London, and in 1873 he became assistant for photography and spectroscopy at the Royal Greenwich Observatory, a post which he held for 40 years. One of his duties was daily photography of the sun and the recording of sunspot numbers, from which data he established the pattern of latitude drift in sunspots, demonstrated in his well-known 'butterfly diagram'. He also worked on correlations between solar and geomagnetic activity, and studied historical records of the low-sunspot period in the 16th century, the 'Maunder minimum'. He took part in several eclipse expeditions to photograph the solar corona. In 1890 he founded the still-flourishing British Astronomical Association for amateur astronomers.

Maundeville, Jehan de *See* MANDEVILLE, JEHAN DE

Maung, Shu *See* NE WIN, U

Maupassant, Guy de 1850–93
French novelist
Born in the Norman château of Miromesnil, near Dieppe, he was educated at Rouen and spent his life in Normandy. After a short spell as a soldier in the Franco-Prussian War he became a government clerk, but encouraged by GUSTAVE FLAUBERT, a friend of his mother's, he took to writing and mingled with ZOLA and other disciples of Naturalism. Free from sentimentality or idealism, his stories lay bare with minute and merciless observation the pretentiousness and vulgarity of the middle class of the period and the cunning and traditional meanness of the Norman peasant. He first achieved success with *Boule de suif* (1880, 'Ball of Tallow'), which exposes the hypocrisy, prudery and ingratitude of the bourgeois in the face of a heroic

gesture by a prostitute, and went on to write nearly 300 short stories. *Le Horla* (1887, Eng trans 1890) and *La Peur* (posthumous 1925, 'The Fear') describe madness and fear with a horrifying accuracy, foreshadowing the insanity which beset Maupassant in 1892 and finally precipitated his death. He also wrote several full-length novels, including *Une Vie* (1883, Eng trans *A Woman's Life*, 1888) and *Bel-Ami* (1885, Eng trans 1891). 🕮 F Steegmuller, *Maupassant* (1950)

Maupertuis, Pierre Louis Moreau de 1698–1759
French mathematician
Born in St Malo, he headed a group of French academicians sent to Lapland in 1736–37 to measure a degree of the meridian. FREDERICK II, THE GREAT made him president of the Berlin Academy in 1746. He formulated the principle of least action in mechanics, which states that a mechanical system evolves in such a way that its action is as small as possible. Maupertuis also formed a theory of heredity which was a century ahead of its time.

Maura, Carmen García 1945–
Spanish actress
Born in Madrid, her family were very conservative, and her decision to give up teaching in favour of acting caused a serious rift. She made slow progress at first, but became nationally known as the host of the television show *Esta Noche (Tonight)* in the 1970s. Her career took off internationally in the 1980s through her collaboration with PEDRO ALMODÓVAR, winning the Best Actress Award at the European Film Awards in 1988 for her performance in his *Women on the Verge of a Nervous Breakdown*. Subsequent films include *¡Ay, Carmela!* (1990), *Le Bonheur (est dans le pré)* (1995) and *La Comunidad* (2000). She and Almodóvar reunited in 2006 for *Volver*.

Mauriac, François 1885–1970
French novelist and Nobel Prize winner
Born in Bordeaux, he was educated at the University of Bordeaux, then the École Nationale des Chartes in Paris in 1906, but left to become a poet, publishing his first volume of verse in 1909. He was of Roman Catholic parentage, and came to be regarded as the leading novelist of that faith. In his novels, his treatment of the themes of temptation, sin and redemption, set in the brooding Bordeaux countryside, show his art as cathartic, exploring the universal problems of sinful, yet aspiring, man. Major titles are *Le Baiser au lépreux* (1922, Eng trans *The Kiss to the Leper*, 1923), *Génitrix* (1923, Eng trans 1930), *Thérèse Desqueyroux* (1927, Eng trans 1928), and *Le nœud de vipères* (1932, Eng trans *Vipers' Tangle*, 1933). Also important is his play *Asmodée* (1938, Eng trans 1939). He was awarded the 1952 Nobel Prize in literature. 🕮 M Alyn, *François Mauriac* (1960)

Maurice 1567–1625
Count of Nassau, Prince of Orange
Born in Dillenburg, Nassau, the second son of WILLIAM I, THE SILENT, he was appointed stadtholder by the States General of the United Provinces upon his father's murder (1584), and took command of the republic's army in its struggle for independence from Spain. A master of siege warfare, with English aid he inflicted a series of defeats on the Spanish in the 1590s, leading to the Twelve Years' Truce (1609). His military reforms made the Dutch army the most advanced in Europe. He became Prince of Orange in 1618 on the death of his elder brother William and, after the execution of his rival, the veteran statesman Oldenbarnevelt (the only blot on his character), he established a virtually monarchical authority over the state, but left the constitution unchanged on his death. He died unmarried and was succeeded by his brother, Frederick Henry.

Maurice, (John) Frederick Denison 1805–72
English theologian and writer
He was born in Normanston, Suffolk, and attended Trinity College and Trinity Hall, Cambridge, but as a Dissenter, left in 1827 without a degree, and began a literary career in London. Influenced by COLERIDGE, he took orders in the Church of England, became chaplain to Guy's Hospital (1837) and to Lincoln's Inn (1841–60). In 1840 he became professor of literature at King's College London, where he was also professor of theology (1846–53), and from 1866 he was professor of moral philosophy at Cambridge. The publication in 1853 of his *Theological Essays*, dealing with atonement and eternal life, lost him his professorship of theology. With THOMAS HUGHES and CHARLES KINGSLEY he founded the Christian socialism movement (1848). He also was the founder and first Principal of the Working Man's College (1854) and of the Queen's College for Women. His other books include *Moral and Metaphysical Philosophy* (1850–62), *The Conscience* (1868) and *Social Morality* (1869).

Maurier, Daphne du *See* DU MAURIER, DAME DAPHNE

Maurier, George du *See* DU MAURIER, GEORGE

Maurier, Sir Gerald du *See* DU MAURIER, SIR GERALD

Maurois, André, *pseudonym of* **Émile Herzog** 1885–1967
French novelist and biographer
He was born in Elbeuf, one of a family of Jewish industrialists from Alsace who settled in Normandy after 1870. During World War I he was a liaison officer with the British army, and he began his literary career with two books of shrewd and affectionate observation of British character, *Les Silences du Colonel Bramble* (1918, 'The Silences of Colonel Bramble') and *Les Discours du Docteur O'Grady* (1920, 'The Speeches of Dr O'Grady'). His large output includes such distinguished biographies as *Ariel* (1923, on SHELLEY), *Disraeli* (1927), *Voltaire* (1935), *À la recherche de Marcel Proust* (1949, 'In Search of Marcel Proust'), and *La vie de Sir Alexander Fleming* (1959, Eng trans *The Life of Sir Alexander Fleming*, 1959). He also wrote several novels, fantasies, tales for children, and critical and philosophical essays. 🕮 J Suffel, *André Maurois* (1963)

Mauroy, Pierre 1928–
French statesman
He was a teacher before becoming involved with trade unionism and socialist politics. He was prominent in the creation of a new French Socialist Party in 1971 and in the subsequent unification of the left. He became Mayor of Lille in 1973, the same year that he was first elected to the National Assembly, and has presided over a period of urban regeneration and success. President FRANÇOIS MITTERRAND made him prime minister in 1981. He oversaw the introduction of a radical, but unsuccessful, reflationary programme and was replaced as prime minister by LAURENT FABIUS in 1984 when a major switch in policy became essential. A representative of the traditional left faction, he was First Secretary of the Socialist Party from 1988 until 1992 and president of the Socialist International from 1992 until 1999.

Maurras, Charles 1868–1952
French royalist journalist and political theorist
He was early influenced by the ideas of AUGUSTE COMTE. By 1894 he was established as an avant-garde journalist and a proponent of monarchism. From 1908, in the newspaper *Action française*, his articles wielded a powerful influence on the youth of the country. In 1936 he was imprisoned for violent attacks on the government. At the fall of France (1940), he supported the Vichy government. He was sentenced to life imprisonment in 1945, but was released on medical grounds in 1952. 🕮 M Mourre, *Charles Maurras* (1958); C H Sisson, *The Avoidance of Literature* (1986)

Maury, Matthew Fontaine 1806–73
US hydrographer
Born in Spotsylvania, Virginia, he entered the US navy in 1825, and during a voyage round the world (1826–30) commenced his well-known *Navigation* (1834). Lamed for life in 1839, he was appointed superintendent in 1842 of the hydrographical office at Washington, and in 1844 of the observatory. There he wrote his *Physical Geography of the Sea* (1856), and his works on the Gulf Stream, ocean currents, and Great Circle sailing. He became an officer of the Confederate navy, and later professor of physics at Lexington University.

Mauser, Peter Paul von 1838–1914
German firearm inventor
He was born in Oberndorf, Neckar. With his brother Wilhelm (1834–82) he was responsible for the improved needle-gun (adopted by the German army in 1871) and for the improved breech-loading cannon. He produced the 'Mauser' magazine rifle in 1897.

Mauss, Marcel 1872–1950
French sociologist and anthropologist
Born in Épinal, he studied philosophy under his uncle ÉMILE DURKHEIM at Bordeaux, and the history of religion at Paris. In 1901 he became professor in the philosophy and religion of 'non-civilized' peoples, and in 1925 was co-founder of the Institute of Ethnology at Paris University. From 1931 to 1939 he was at the Collège de France. Before World War I, he collaborated closely with Durkheim and other members of the *Année sociologique* school on studies of sacrifice, magic, collective representations and social morphology. After World War I, he edited the work of the *Année* school and produced his best-known work, *Essai sur le don* (1925), in which he demonstrated the importance of gift exchange in primitive social organization.

His last significant work, a lecture on the concept of the person, appeared in 1938.

Mauve, Anton 1838–88
Dutch painter
Born in Zaandam, he was one of the greatest landscapists of his time. He was influenced by CAMILLE COROT and JEAN FRANÇOIS MILLET. From 1878 he lived in Laren, gathering other painters round him in a kind of Netherlandish Barbizon school.

Mawhinney (of Peterborough), Brian Stanley Mawhinney, Baron 1940–
English Conservative politician
Born in Belfast, he was educated at Queen's University there, and at the universities of Michigan and London, and became assistant professor of radiation research at the University of Iowa (1968–70). He lectured at the Royal Free Hospital School of Medicine from 1970 to 1984, and was elected MP for Peterborough in 1979 (Cambridgeshire North West from 1997). His government posts included under-secretary of state for Northern Ireland (1986–90), minister of state in the Northern Ireland Office (1990–92) and secretary of state for transport (1994–95) before he became the blunt, no-nonsense chairman of the Conservative Party (1995–97). Following the 1997 election defeat, he served as shadow Home Secretary under WILLIAM HAGUE, and retired from the House of Commons in 2005. He was knighted in 1997, and created a life peer in 2005.

Mawlana *See* JALAL AD-DIN AR-RUMI

Mawlay Isma'il 1672–1727
Sultan of Maghrib (Morocco)
He consolidated the authority of the state and took control of piracy, which he turned into a state enterprise. He also established an élite corps of black slaves (*abid al-Bukhari*).

Mawson, Sir Douglas 1882–1958
Australian explorer and geologist
Born in Bradford, Yorkshire, England, he was educated at Sydney University. In 1907 he joined the scientific staff of ERNEST SHACKLETON's Antarctic expedition and discovered the South Magnetic Pole. From 1911 to 1914 he was leader of the Australasian Antarctic expedition, which charted 2,000 miles (3,220km) of coast. He was knighted on his return. In 1929–31 he led the Australian-British-New Zealand expedition to the Antarctic.

Max, Adolphe 1869–1939
Belgian politician and patriot
Born in Brussels, he was first a journalist and then an accountant. He became Burgomaster of Brussels in 1909, and when German troops approached Brussels in August 1914, he boldly drove to meet them and opened negotiations. He defended the rights of the Belgian population against the invaders, and was imprisoned by the Germans, later refusing an offer of freedom on condition that he went to Switzerland and desisted from anti-German agitation. In November 1918 he returned to Belgium, was elected to the House of Representatives, and became a Minister of State.

Maxim, Sir Hiram Stevens 1840–1916
British inventor and engineer
Born in Sangersville, Maine, USA, he became a coachbuilder in an engineering works in Fitchburg, Massachusetts in 1865, and from 1867 took out patents for gas apparatus and electric lamps, among other devices. He emigrated to England in 1881, where he perfected his 'Maxim' machinegun in 1883. He also invented a pneumatic gun, a smokeless powder, a mousetrap, carbon filaments for light bulbs, and a flying machine (1894). He became a naturalized British citizen in 1900, and was knighted in 1901. 🕮 P F Mottelay, *The Life and Work of H S Maxim* (1920)

Maximilian I 1459–1519
Holy Roman Emperor
He was born Archduke of Austria in Weiner Neustadt, the eldest son of FREDERICK III, OF GERMANY and Eleanor of Portugal, and by his marriage with Mary, heiress of CHARLES THE BOLD (1477), he acquired Burgundy and Flanders. This involved him in war with LOUIS XI of France, and he was forced to give Artois and Burgundy to Louis (1482). Elected King of the Romans (1486), he drove out the Hungarians (1490) who, under MATTHIAS I HUNYADI (Corvinus), had seized much of Austria. At Villach (1492) he defeated the Turks, and in 1493 he became Holy Roman Emperor. Having next married a daughter of the Duke of Milan (1494), he turned his ambition towards Italy, but after years of war he had to cede Milan to LOUIS XII (1504) and despite the League of Cambrai (1508), he was defeated by the Venetians, and the Swiss broke away from the German Empire. The peaceful acquisition of the Tyrol, however, increased his territory, and the marriage of his son Philip to the Infanta JUANA united the Houses of Spain and Habsburg, Philip becoming PHILIP I, THE HANDSOME of Spain. The marriage of his grandson Ferdinand to the daughter of Ladislas of Hungary and Bohemia brought both these kingdoms to Austria. Although full of wild schemes which he could not finance, he was genial, energetic and popular. He improved the administration of justice, greatly encouraged the arts and learning, and caused to be written both *Theuerdank* in verse and *Weisskunig* in prose, of both of which he himself is the hero, and probably part-author. He left his extended empire to his grandson CHARLES V. 🕮 R W Setson-Watson, *Maximilian I, Holy Roman Emperor* (1902)

Maximilian II 1527–76
Holy Roman Emperor
Born in Vienna, the eldest son of Emperor FERDINAND I and Anne of Bohemia and Hungary, he became King of Bohemia (1548), King of Hungary (1563) and Holy Roman Emperor (1564). An intelligent, tolerant and cultivated man who considered himself 'neither Catholic nor Protestant but a Christian', he embarrassed his family by his Protestant leanings and was obliged (1562) to swear to live and die within the Catholic Church. As emperor he secured considerable religious freedom for Austrian Lutherans and deplored the intolerance of the Catholic reaction in Spain and France. Abroad, he fought unsuccessfully against the Turks, and continued to pay them tribute. A patron of the arts and sciences, he set out to make Vienna a centre of European intellectual life.

Maximilian I 1573–1651
Duke and Elector of Bavaria
The son of Duke William V, he was born in Munich and educated at the Jesuit college at Ingolstadt. From 1597 he instituted reforms of the country's legal system, army, inefficient bureaucracy and disordered finances. He placed himself at the head of the Catholic League (1609) and supported Emperor FERDINAND II in the Thirty Years War, obtaining as a reward the confiscated lands of FREDERICK V of the Palatinate. By the Peace of Westphalia (1648), the Lower Palatinate was returned to Frederick's heir, Charles Louis, but Maximilian retained the electoral title. Patient and worldly-wise, he was a keen defender of German liberties and resisted imperial attempts to turn the empire into a centralized Habsburg monarchy.

Maximilian II Emmanuel 1662–1726
Elector of Bavaria
Elector from 1679 to 1726, he was a military leader and distinguished himself at the capture of Belgrade (1688). He was governor of the Spanish Netherlands (1692) while fighting for the HABSBURGS against LOUIS XIV of France. He supported the French in the War of the Spanish Succession and lost his lands as a result (after Blenheim). He was restored to his former possessions after the Peace of Utrecht (1713).

Maximilian, Ferdinand Joseph 1832–67
Emperor of Mexico and Archduke of Austria
He was born in Vienna, the younger brother of Emperor Francis Joseph I. He married Carlota, daughter of LEOPOLD I, King of the Belgians. He accepted the offer of the Crown of Mexico (1863), supported by France, and was crowned emperor (1864). He attempted liberal reforms, largely in the interest of the Indian peasants, but when NAPOLEON III withdrew his troops, he refused to abdicate, made a brave defence at Querétaro against BENITO JUÁREZ, and was betrayed and executed.

Maxton, James 1885–1946
Scottish politician
Born in Glasgow, he was educated at the university there and became a teacher in the east end of the city, where the poverty he witnessed converted him to socialism. A supporter of the Independent Labour Party, he became its chairman in 1926. He was MP for Glasgow Bridgeton from 1922 until his death. A man of strong convictions, he was a staunch pacificist, and suffered imprisonment for attempting to foment a strike of shipyard workers during World War I, in which he was a conscientious objector. One of the most turbulent 'Red Clydesiders', he was expelled from the House of Commons in 1923 for calling a minister a murderer. As chairman of the Independent Labour Party (1926–40), he led its secession from the Labour Party in 1932, and became increasingly isolated from mainstream Labour politics. His extreme views won few supporters, but his sincerity won the respect of all.

Maxwell, Gavin 1914–69
Scottish naturalist and writer
Born in Elrig, Wigtownshire, he had a reclusive upbringing in the country following the death of his father in World War I,

and developed a love of nature. He was educated at Hertford College, Oxford, and went on to work as a journalist; he then joined the Scots Guards during World War II, and attempted to found a shark fishery, before finally turning to writing. His most celebrated book, the bestselling *Ring of Bright Water* (1962), describes his relationships with a number of otters, one of which, a hitherto unknown subspecies, was named after him. It was followed by two autobiographical sequels, which together constitute the 'Camusfearna' trilogy. He also wrote several non-fiction works, including *Lords of the Atlas* (1966) and *Seals of the World* (1967). Among numerous honours, he was a fellow of the Royal Society for Literature, the Royal Geographic Society, the Zoological Society and the American Geographical Society. 🕮 Richard Frere, *Maxwell's Ghost: An Epilogue to Gavin Maxwell's Camusfearna* (1976)

Maxwell, James Clerk, *surname also* **Clerk-Maxwell** 1831–79
Scottish physicist
Born in Edinburgh, at the age of 15 he devised a method for drawing oval curves which was published by the Royal Society of Edinburgh. He studied mathematics, physics and moral philosophy at Edinburgh University, and later graduated from Cambridge as Second Wrangler. He was appointed professor of natural philosophy at Marischal College, Aberdeen University (1856) and King's College London (1860). In 1871 he was appointed the first Cavendish Professor of Experimental Physics at Cambridge, where he organized the Cavendish Laboratory. He published papers on the kinetic theory of gases, theoretically established the nature of Saturn's rings (1857), investigated colour perception and demonstrated colour photography with a picture of tartan ribbon (1861). He worked on the theory of electromagnetic radiation, and his *Treatise on Electricity and Magnetism* (1873) treated mathematically MICHAEL FARADAY's theory of electrical and magnetic forces and provided the first conclusive evidence that light consisted of electromagnetic waves. He suggested that electromagnetic waves could be generated in a laboratory – as HEINRICH HERTZ was to demonstrate in 1887. His work is considered to have paved the way for ALBERT EINSTEIN and MAX PLANCK. He was one of the greatest theoretical physicists the world has known. 🕮 Ivan Tolstoy, *James Clerk Maxwell* (1982)

Maxwell, John 1905–62
Scottish painter
Born in Dalbeattie, Kirkcudbrightshire, he trained at Edinburgh College of Art (1921–26), then travelled to France and attended the Académie Moderne under AMÉDÉE OZENFANT and FERNAND LÉGER. Contrary to the strict order evident in these artists' work, Maxwell developed a more loosely painted dreamlike style, composed of freely associated figures and objects. He taught at Edinburgh College of Art for most of the period 1929–61.

Maxwell, (Ian) Robert, *originally* **Jan Ludvik Hoch** 1923–91
British publisher and politician
Born in Czechoslovakia and self-educated, he served in World War II (1940–45) before founding the Pergamon Press, a publishing company specializing in scientific journals and one of the first to use computerization. A former Labour MP (1964–70), Maxwell, who had many business interests including film production, rescued the large British Printing Corporation from financial collapse in 1980 and rapidly transformed it into the successful British Printing and Communications Corporation, which became the Maxwell Communication Corporation in 1985 and of which he became joint managing director in 1988. Despite a 1973 declaration by the Department of Trade and Industry that Maxwell was unreliable in handling money, by 1991 he was head of a considerable empire. However, he was later revealed to have been involved in questionable transactions using money taken from the pension funds of some of his companies to buy shares in others to prop them up. The cause of his mysterious death when at sea on his luxury yacht has never quite been ascertained. 🕮 Joe Haines, *Maxwell* (1988)

Maxwell, William Keepers, Jnr 1908–2000
US novelist and editor
Born in Lincoln, Illinois, he was educated at the University of Illinois and at Harvard. He is best known as an influential fiction editor at *The New Yorker*, where he helped to develop that magazine's characteristic styles; he worked with many notable authors, including VLADIMIR NABOKOV, JOHN O'HARA, J D SALINGER, JOHN UPDIKE, SYLVIA TOWNSEND WARNER and JOHN CHEEVER. He also authored some 20 books, including novels, stories, children's fantasy and family history. Although he spent most of his life in New York City, he often fictionalized small-town life in the Midwest, and many of his novels contain some autobiographical elements. 🕮 Barbara Burkhardt, *William Maxwell: A Literary Life* (2005)

Maxwell Davies, Sir Peter 1934–
English composer
Born in Manchester, he studied in Manchester and Rome. Whilst a student at the Royal Northern College, Manchester, he was part of the Manchester School, or New Manchester Group, along with Sir HARRISON BIRTWISTLE, ALEXANDER GOEHR, JOHN OGDON and Elgar Howarth (1935–). After three years as director of music at Cirencester Grammar School he went to Princeton University in 1962 for further study. He has lectured in Europe, Australia and New Zealand, and was composer-in-residence at the University of Adelaide in 1966. The Fires of London, a group founded by him (1970), is particularly associated with his work. He has a keen interest in early English music, in particular the 16th-century composer JOHN TAVERNER, the subject of his opera *Taverner* (1972), and has always experimented with different orchestral combinations. In later works he introduced stereo tape and electronic sounds. The scoring of one of the parts in *Vesalii Icones* (1970) for a dancer-pianist exemplifies his idea of 'music theatre', with no artificial division between the forms of expression. His works include *Prolation* (1959), *Revelation and Fall* (1965), two *Fantasias on an In Nomine of John Taverner* (1962, 1964), *Eight Songs for a Mad King* (1969), *Our Lady's Juggler* (1978, *Le Jongleur de Notre Dame*), and a number of symphonies, operas and ballets. Since 1970 Maxwell Davies has done most of his work in Orkney, frequently using Orcadian or Scottish subject matter. He directed the St Magnus Festival (1977–86), and in 1988 received a commission of ten concertos for the Scottish Chamber Orchestra, for which he was associate conductor and composer from 1985 to 1994, and then Composer Laureate (1994–). He worked as composer with the BBC Philharmonic Orchestra from 1992 to 2000, and also works with the Royal Philharmonic Orchestra. In 2004, he was appointed Master of the Queen's Music. 🕮 Paul Griffiths, *Peter Maxwell Davies* (1981)

May, Elaine, *originally* **Elaine Berlin** 1932–
US screenwriter and film director
Born in Philadelphia, the daughter of a well-known Yiddish actor, Jack Berlin, she was a child actress, then met Mike Nicols while studying at the University of Chicago. They developed a successful writing partnership for the stage until their break-up in 1961. She continued to write for both stage and film, and shared an Academy Award nomination for Best Screenplay with WARREN BEATTY for *Heaven Can Wait* (1978). Later screenplays include *The Birdcage* (1996) and *Primary Colors* (1998), for which she received an Academy Award nomination and won a BAFTA award. Her work as a film director includes *A New Leaf* (1971) and the notorious failure *Ishtar* (1987).

May, Phil(ip William) 1864–1903
English caricaturist
Born in Wortley, near Leeds, he was orphaned at the age of nine and endured years of poverty before he became poster artist and cartoonist of the *St Stephen's Review*. He went to Australia and on his return in 1890 established himself by his *Annual*, and contributions to *Punch* and other periodicals. He cleverly depicted East London types and brought a new simplicity of line to popular cartooning.

May (of Oxford), Sir Robert McCredie May, Baron 1936–
Australian physicist and ecologist
Born in Sydney, he studied physics at the university there, taught mathematics at Harvard (1959–61) and theoretical physics at Sydney University, where he held a personal chair (1961–73). He was professor of biology at Princeton University from 1973 to 1988 and subsequently Royal Society Research Professor at Oxford. He has worked on the dynamics of animal populations and has applied non-linear models to explain fluctuations in animal numbers. His realization of the widespread relevance of deterministic chaos has opened up fruitful areas of research. His investigations into the abundance and diversity of species have covered parasite–host relationships and the ways in which infectious diseases control the natural populations of animals and plants. He wrote *Stability and Complexity in Model Ecosystems* (1973) and *Infectious Diseases of Humans: Transmission and Control* (1991). He was Chief Scientific Advisor to the Government and head of the Office of Science and Technology from 1995 to 2000. Elected FRS in 1979, he was president of the Royal Society from 2000 until 2005. He was knighted in 1996 and made a Companion of the Order of

Australia in 1998. In 2001 he was created a life peer, and in 2002 was made a member of the Order of Merit.

May, Sir Thomas Erskine, 1st Baron Farnborough 1815–86
English constitutional jurist
He was educated at Bedford School, became Assistant Librarian of the House of Commons in 1831, Clerk-Assistant in 1856, and Clerk of the House in 1871. He was created a baron in 1881 on his retirement, and his *Treatise on the Law, Privileges, Proceedings, and Usage of Parliament* (1844) has been translated into various languages and remains a standard work. He also wrote *Constitutional History of England 1760–1860* (1861–63).

Mayakovsky, Vladimir Vladimirovich 1894–1930
Russian poet and playwright
Born in Bagdadi (Mayakovsky), Georgia, he was involved in the Social Democratic movement during his youth, but when imprisoned for eleven months he renounced politics for art. Writing was his first love, however. He was an enthusiastic supporter of the 1917 Revolution, and both his play *Misteriya-Buff* (1918, Eng trans *Mystery-Bouffe*, 1968) and the long poem *150,000,000* (1919–20) are well-known works of the period. The advent of the new conservative leaders in 1921 led him to write *Pro eto* (1923, 'About This'), poems pre-Revolution in sentiment, and satirical plays like *Klop* (1929, Eng trans *The Bedbug*, 1960) and *Banya* (1930, Eng trans *The Bath-House*, 1968). *Vladimir Ilyich Lenin* (1924), *Khorosho!* (1927, 'Good!') and the unfinished *Vo ves golos* (1929–30, translated into Scots by EDWIN MORGAN, 1972), made him famous in the former USSR. Towards the end of his life he was severely castigated by more orthodox Soviet writers and critics for his outspoken criticism of the bureaucracy and his unconventional opinions on art, and he committed suicide. 🕮 E Brown, *Mayakovsky: A Poet in the Revolution* (1973)

Mayall, Nicholas Ulrich 1906–93
US astrophysicist
Born in Moline, Illinois, and educated at the University of California, he worked at the Massachusetts Institute of Technology's Radiation Laboratory (1942–43) and the California Institute of Technology (1943–45), and in 1960 was appointed director of Kitt Peak Observatory in Arizona. Mayall's principal researches were in the field of optical observations of galaxies. In the early 1930s he collaborated with EDWIN HUBBLE to study the galactic distribution in space, and later work included optical radial velocity measurements of the Andromeda galaxy, and the development of a system of classifying galaxies from their composite spectra (1957). In 1961 Mayall oversaw the building of a 4-metre telescope named the Mayall telescope.

Mayall, Rik (Richard Michael) 1958–
English comedian, actor and writer
Born in Harlow, Essex, he studied at the University of Manchester. He became well known as a television comedy actor and writer with series such as *The Young Ones* (1982–84), in which he played the unlovely Rick, and its follow-up, *Bottom* (1990–2003). He has also co-written and appeared in many of the comedy films made under the banner *The Comic Strip Presents...* (1982–). He starred as Alan B'Stard in the political sitcom *The New Statesman* (1987–94; BAFTA Best New Comedy 1990) and revived the character in a stage show, *The Blair B'Stard Project*, which toured the UK in 2006. He has worked widely in theatre and stand-up comedy, and made film appearances including *Kevin of the North* (2001). Mayall has worked for many years with the writer and comedian Adrian Edmondson (1957–)

Maybach, Wilhelm 1846–1929
German inventor and car manufacturer
Born in Heilbronn, he joined GOTTLIEB DAIMLER in 1869 as a draughtsman, and became his partner in 1882 when he established a factory at Cannstatt near Stuttgart. He devised the float-feed carburettor (1893), which was crucial to the development of high-speed petrol engines suitable for motor cars. He also made improvements in timing, gearing and steering, all of which played their part in the success of the Daimler car that won the first international road race in 1894. He left the Daimler firm in 1907 and set up his own works at Friedrichshafen (1909), where he made engines for ZEPPELIN airships, and (1922–39) luxury 'Maybach' cars.

Mayer, Louis B(urt), *originally* **Eliezer Mayer** 1885–1957
US film producer
Born in Minsk, Russia, his family emigrated to Canada when he was three. He was working as a scrap-metal dealer at the age of eight and later expanded his activities to ship salvaging. In 1907 he bought a house in Haverhill in Massachusetts, refurbished it as a nickelodeon and opened one of the earliest custom-designed cinemas. He subsequently acquired a chain of movie theatres in New England and bought the regional rights to such popular attractions as *Birth of a Nation* (1915). He set up a film production company in Los Angeles in 1919, and in 1924 became vice-president of the newly merged group, Loew's Metro-Goldwyn-Mayer. He was instrumental in the creation of Hollywood as a dream factory and the establishment of the star system, wielding enormous power for more than two decades. He oversaw such successes as *Ben Hur* (1926), *Grand Hotel* (1932), the Andy Hardy series, *Ninotchka* (1939) and countless others. He was also involved in setting up the Academy of Motion Picture Arts and Sciences (1927), from whom he received an honorary Academy Award in 1950, before he retired in 1951.

Mayer, (Julius) Robert von 1814–78
German physician and physicist
Born in Heilbronn, Baden-Württemberg, he enrolled at the University of Tübingen in 1832 and received his medical doctorate in 1838. In 1842 physiological considerations convinced him that heat and motion were different manifestations of a single force. He estimated the mechanical equivalent of heat by examining the difference in the two principal specific heats of a gas, and enunciated a general principle of conservation for biological, magnetic, electrical and chemical processes (now interpreted as the conservation of energy), which led to a dispute with JAMES JOULE over priority. Mayer initially gained little recognition and became depressed; he attempted suicide in 1850 and spent years in asylums.

Mayhew, Henry 1812–87
English writer
Born in London, he ran away from Westminster School, and collaborated with his brother Augustus (1826–75) in writing numerous successful novels such as *The Good Genius that Turns Everything to Gold* (1847) and *Whom to Marry* (1848). Of his other works the best-known is the classic social survey, *London Labour and the London Poor* (1851–62). He was a co-founder and first joint editor of *Punch* (1841), with MARK LEMON. 🕮 G S Jones, *Outcast London* (1971)

Mayhew (of Twysden), Patrick Barnabas Burke Mayhew, Baron 1929–
English Conservative politician
He was born in Cookham, Berkshire, and educated at Tonbridge School and Balliol College, Oxford. After National Service in the 4th/7th Royal Dragoon Guards he trained as a barrister and was appointed QC in 1972. In 1974 he became Conservative MP for Royal Tunbridge Wells (1974–97). Knighted in 1983, he served as Solicitor-General (1983–87), then Attorney-General (1987–92), and Secretary of State for Northern Ireland (1992–97); it was a time of hope for a peaceful solution to the province's political troubles. He proved to be a firm and resolute leader, capable of balancing the opposing unionist and nationalist interests, and was awarded a life peerage in 1997.

Mayhew Jonas, Dame Judith 1948–
New Zealand lawyer and administrator
Born in Dunedin, she studied law at Otago University before moving to England to teach law at the universities of Southampton and London. She is best known as chairman of the Policy and Resources Committee of the City of London (1996–2003), a role which earned her a reputation as the most powerful woman in the City of London. She was created DBE in 2002, and was the first woman to chair the Royal Opera House (2003) and to become Provost of King's College, Cambridge (2004–06).

Mayling Soong *See* CHIANG KAI-SHEK

Maynard Smith, John 1920–2004
English geneticist and evolutionary biologist
He was born in London, and educated at Eton and Cambridge, where he graduated as an aeronautical engineer (1941), and at University College London, where he received a degree in zoology in 1951. He taught at University College London (1952–65) before being appointed professor of biology at the University of Sussex (1965–85, now emeritus). After early work in collaboration with J B S HALDANE, he went on to develop a new phase of the mathematical understanding of evolutionary processes, in particular the application of game theory to behavioural ecology (*Evolution and the Theory of Games*, 1983) where his development of the fitness concept of WILLIAM DONALD

HAMILTON has been immensely fruitful. Later research has focused on mutations and recombination in human mitochondrial DNA. His popular book *The Theory of Evolution* (1958) was widely influential. Other publications include *Evolutionary Genetics* (1989), *The Major Transitions in Evolution* (1995, with E Szathmáry) and *Animal Signals* (2003, with David Harper). He was elected FRS in 1977 and his honours include the Linnaean Medal of the Linnaean Society (1995), the Royal Society's Royal Medal (1997) and the Kyoto Prize (2001).

Mayo, Charles Horace 1865–1939
US surgeon
Born in Rochester, Minnesota, the son of a doctor, he studied medicine at Chicago Medical College, and joined with his father William Worrall Mayo (1819–1911) and his brother WILLIAM JAMES MAYO to establish the clinic in St Mary's Hospital, Rochester, which was to become the Mayo Clinic in 1905. A specialist in the treatment of goitre, he co-founded the Mayo Foundation for Medical Education and Research in 1915. 🕮 Helen B Clapesattle, *The Doctors Mayo* (2nd edn 1954)

Mayo, Katherine 1868–1940
US journalist
Born in Ridgeway, Pennsylvania, she is remembered for her books exposing social evils, especially *Isles of Fear* (1925), condemning US administration of the Philippines, and *Mother India* (1927), a forthright indictment of child marriage and other customs.

Mayo, Richard Southwell Bourke, Earl of 1822–72
Irish politician and administrator
Born in Dublin, he was educated at Trinity College. He entered the House of Commons as a Conservative in 1847, and was appointed Chief-Secretary of Ireland by Lord DERBY in 1852, 1858 and 1866. Sent out in 1868 to succeed Lord LAWRENCE, he was eminently successful as Viceroy of India, but was fatally stabbed by a convict while inspecting the settlement at Port Blair on the Andaman Islands.

Mayo, William James 1861–1939
US surgeon
He was born in Le Sueur, Minnesota. A specialist in stomach surgery, with his brother CHARLES HORACE MAYO and his father William Worrall Mayo (1819–1911) he established the clinic, in St Mary's Hospital, Rochester, Minnesota, which was to become the Mayo Clinic in 1905. He also helped Charles in 1915 to set up the Mayo Foundation for Medical Education and Research.

Mayow, John 1640–79
English chemist and physiologist
Born in Bray, Cornwall, he studied medicine at Oxford and thereafter practised as a physician. He noted the similarities between combustion and respiration, in particular that both use up only a small proportion of the available air. He also noted that the remainder of the air does not support life, extinguishes a lighted candle and is insoluble in water. He also suggested that respiration is the source of animal heat and pointed out that the foetus breathes through the placenta. Mayow's originality and the extent of his influence, if any, on ANTOINE LAVOISIER, are the subject of debate.

Mayr, Ernst Walter 1904–2005
US zoologist
Born in Kempten, Germany, he studied at Berlin University and emigrated to the USA in 1932, serving as professor of zoology at Harvard from 1953 to 1975. His early work was on the ornithology of the Pacific Ocean, leading three scientific expeditions to New Guinea and the Solomon Islands (1928–30), but in his later career he became one of the most important proponents of the neo-Darwinian concepts of evolution. Mayr was also first to propose the 'founder effect', describing the genetic bottleneck of a population 'founded' by a few individuals. The author of one of the key works on synthesis, *Systematics and the Origin of Species* (1942), he also wrote an influential history of biology, *The Growth of Biological Thought* (1982), complemented by *Towards a New Philosophy of Biology* (1988), followed by *One Long Argument* (1991). At the age of 100 he published his 25th book, *What Makes Biology Unique? Considerations on the Autonomy of a Scientific Discipline*. He won the Japan Prize in 1994 and the Crafoord Prize in 1999.

Mayr, Simon *See* MARIUS, SIMON

Mays, Willie Howard, Jnr 1931–
US baseball player
Born in Fairfield, Alabama, he played for the New York Giants (1951–57), who moved to San Francisco (1958–72), and the New York Mets (1972–73). A magnificent fielder, batter and baserunner, only he and HANK AARON have performed the baseball double of more than 3,000 hits and 600 home runs. He was voted the Most Valuable Player (MVP) in 1954 and 1965, and was voted the Baseball Player of the Decade (1960–69). 🕮 J Grabowski, *Willie Mays* (1990)

Mazarin, Jules, *originally* **Giulio Mazarini** 1602–61
French cleric, diplomat and politician
Born in Pescina, Italy, he studied under the Jesuits in Rome, and at Alcalá in Spain. He was Papal Nuncio to the French court (1634–36) and entered the service of LOUIS XIII in 1639, having become a naturalized Frenchman. Through the influence of Cardinal RICHELIEU he was elevated to cardinal, succeeding him as Chief Minister in 1642. After Louis's death (1643), he retained his authority under the Queen Regent, ANNE OF AUSTRIA, to whom it is said he was married. Blamed by many for the civil disturbances of the Frondes, he twice fled France, and returned to Paris in 1653 after the nobles' revolt had been suppressed. His foreign policy was more fruitful: he gained the alliance of CROMWELL at the price of Dunkirk, concluded the Peace of Westphalia (1648), whose terms increased French prestige, and negotiated the Treaty of the Pyrenees (1659), ending the prolonged Franco-Spanish conflict. His impressive library was bequeathed to the Collège Mazarin, and his name is borne by the rare 'Mazarin Bible'. 🕮 Arthur Hassall, *Mazarin* (1903)

Mazeppa, Ivan Stepanovich c.1644–1709
Russian nobleman, and hetman of the Cossacks
He became a page at the court of Poland, but was dismissed after an intrigue with a nobleman's wife. He joined the Cossacks, and was elected hetman of the Ukraine (1687). PETER I, THE GREAT, made him Prince of the Ukraine, but when Peter curtailed the freedom of the Cossacks, Mazeppa entered into negotiations with CHARLES XII of Sweden. After the disaster of Poltava (1709), he fled with Charles to Bender in Turkey, where he died. His story is the theme of poems (notably that by BYRON), plays, novels, opera and paintings.

Mazor, Stanley 1941–
US computer scientist
Born in Chicago, Illinois, he studied mathematics at San Francisco State College. He joined Intel Corporation in 1969, where with TED HOFF and FEDERICO FAGGIN he pioneered the design of the world's first microprocessor, the 4004, which had processing power equal to the 1940s room-sized ENIAC (Electronic Numerical Integrator and Calculator) computer. He has since been director of training for a number of start-up companies including BEA, Cadabra and Numerical Technologies. In 2003 he published an architectural handbook, *Design an Expandable House*. With Faggin, Hoff and Masatoshi Shima (1943–), he was awarded the Kyoto Prize in 1997.

Mazzini, Giuseppe 1805–72
Italian patriot and political leader
Born in Genoa, he was initiated into the Carbonari as a young man. He was arrested by the Piedmontese police and exiled to France, where in 1833 he founded his own movement, Young Italy. Expelled from France, he travelled widely in Europe, calling for republican insurrection. During the Revolution of 1848 he took part first in the Lombard revolt against Austrian rule and, subsequently, in the governing triumvirate of the Roman Republic established after PIUS IX fled the city. A number of abortive Mazzinian insurrections during the 1850s (notably that of Pisacane) and a growing support for the moderate views embodied by the Italian National Society largely discredited him. In the final decade of his life he continued to preach republicanism and women's emancipation and played a small part in the establishment of the First International, but never managed to reconcile his ideas to those of socialism.

Mazzola, Girolamo Francesco Maria *See* PARMIGIANO

M'Ba, Leon 1902–67
Gabon statesman
Educated in Catholic schools, he was in turn accountant, journalist and administrator. He was elected for the Rassemblement Démocratique Africain (RDA) to the Gabon Assembly in 1952 and, in the French tradition, used the mayoral position (of Libreville) to enhance his political ambitions. He was head of government (1957–60) and president from Gabon's independence (1960) until his death.

Mbande, Jinga, *also known as* **Nzinga** c.1582–1663
Angolan queen
Born in the West African kingdom of Kongo and Ndongo, the daughter of the King of Ndongo, she was committed to the

struggle against the Portuguese who in 1576 had founded Luanda, beginning a lucrative trade exporting slaves to Brazil. In 1622 she entered into negotiations for Ndongo's independence from the Portuguese on behalf of her brother Ngola, apparently converting to Christianity to strengthen her cause. On Ngola's death (by murder or suicide), Jinga renounced her Christianity, seized power, and declared war on the Portuguese. Ousted from her country, she travelled east and conquered the kingdom of Matamba. She continued debilitating raids on the Portuguese until 1643, when they imprisoned her sister and recaptured Luanda. After hiding in the Matamba hills, she negotiated a peaceful settlement (1656) with the Portuguese, exchanging her sister for 130 slaves along with military protection when she required it. She returned to ruling the Jaga, converting them to Christianity.

Mbeki, Thabo Mvuyelwa 1942–
South African politician
He was born in Idutywa, the son of Govan Mbeki (1910–2001). After serving as a youth organizer for the African National Congress (ANC) he was briefly imprisoned and subsequently left South Africa to live and campaign in London (1967–70). He received military training in the Soviet Union (1970) and began representing the ANC at a high level in Swaziland (1975–76) and Nigeria (1976–78). In 1989 he was the head of the ANC delegation in talks with the South African government that led to the unbanning of the ANC and the release of prisoners including NELSON MANDELA, and in 1993 he was elected chair of the ANC. He succeeded Nelson Mandela as president of South Africa in 1999, and was re-elected in 2004. 🕮 Raymond Parsons, *The Mbeki Inheritance* (2000)

Mbiti, John Samuel 1931–
Kenyan theologian
He was born in Kitui, and taught theology and comparative religion at Makere University College, Uganda, before becoming director of the World Council of Churches Ecumenical Institute, Bossey, Switzerland (1972–80). He then taught Christianity and African religions at Berne University and was a pastor in Burgdorf, Switzerland (1981–96). His books, which include *African Religions and Philosophy* (1969), *Concepts of God in Africa* (1970), *The Prayers of African Reltgion* (1975) and *Bible and Theology in African Christianity* (1987), maintain that the African is naturally religious and that the Christian message should be seen as a fulfilment of traditional African beliefs rather than a rejection of them.

Mboya, Tom (Thomas Joseph) 1930–69
Kenyan trade unionist and politician
Born on a sisal estate in the white highlands of Kenya, he was educated at Holy Ghost College, Mangu and Ruskin College, Oxford. He was an employee of the Nairobi City Council when he became Treasurer of the Kenyan African Union in 1953. He was elected Secretary-General of the Kenyan Federation of Labour in 1955 and a member of Legco in 1957. He was a founder member, and Secretary-General (1960–69), of the Kenyan African National Union (KANU). His reformist instincts brought him into conflict with his fellow Luo, OGINGA ODINGA, but he eventually won out, forcing Odinga out of KANU after the party's conference at Limuru (1966), thus binding himself closer to JOMO KENYATTA. He was Minister of Labour (1962–63), Minister of Justice and Constitutional Affairs (1963–64), and Minister for Economic Planning and Development (1964–69), when his essentially Fabian philosophy established the 'free enterprise with state regulation' economic system which Kenya epitomizes. He was assassinated in 1969.

Mead, George Herbert 1863–1931
US social psychologist
Born in South Hadley, Massachusetts, he studied at Oberlin College, then at Harvard and the universities of Leipzig and Berlin. He taught at Michigan from 1891 to 1894 before moving to the philosophy department at Chicago (1894–1931). His main interest lay in the theory of the mind, and he was particularly concerned with the notion of the self, and how this is developed through communication with others. His work gave rise to symbolic interactionism, a social science tradition which is concerned with the meanings that people give to the world, and how these are worked out through interpersonal interaction. His books include *The Philosophy of the Present* (1932) and *Mind, Self and Society* (1934, based on his lecture courses).

Mead, Margaret 1901–78
US anthropologist
Born in Philadelphia, she studied with FRANZ BOAS and RUTH BENEDICT at the graduate school of Columbia University from 1923, gaining her PhD in 1929. She was appointed assistant curator of ethnology at the American Museum of Natural History, New York City, in 1926, associate curator from 1942, and curator from 1964. After expeditions to Samoa and New Guinea, where she studied sexual behaviour and the rites of adolescence among primitive peoples, she wrote *Coming of Age in Samoa* (1928) and *Growing Up in New Guinea* (1930). In later books such as *Male and Female* (1949) and *Growth and Culture* (1951), she argued that personality characteristics, especially as they differ between men and women, are shaped by cultural conditioning rather than heredity. Her work often focused on the relativity of values from culture to culture and implicitly suggested the need to question social standards in the USA and other 'civilized' nations. Her writings proved very popular and made anthropology accessible to a wide public. She was accused of making colossal errors by Derek Freeman in *Margaret Mead and Samoa, The Making and Unmaking of an Anthropological Myth* (1983). 🕮 Jane Howard, *Margaret Mead: A Life* (1984)

Meade, George Gordon 1815–72
US soldier
Born in Cadiz, Spain, he trained at West Point and served against the Seminoles and in the Mexican War (1846–48). In the American Civil War he fought at Bull Run and Antietam, after which he was promoted to major-general of volunteers. He led troops at Fredericksburg and at Chancellorsville, and in 1863 he was given command of the Army of the Potomac. He defeated ROBERT E LEE at Gettysburg but was criticized for failing to press his advantage.

Meade, James Edward 1907–95
English economist and Nobel Prize winner
Born in Swanage, Dorset, he worked for the League of Nations in the 1930s. He was a member (latterly director) of the economic section of the Cabinet Office (1940–46), then professor of economics at the London School of Economics (1947–57) and of political economics at Cambridge (1957–68) where he remained a resident Fellow until 1974. A prolific writer, his principal contributions have been in the area of international trade, including *The Theory of International Economic Policy* (2 vols, 1951–55), *Principles of Political Economy* (4 vols, 1965–76) and *The Intelligent Radical's Guide to Economic Policy* (1975). He shared the 1977 Nobel Prize in economics with BERTIL OHLIN. In the 1980s he was an adviser to the Social Democratic Party (SDP).

Meade, Richard (John Hannay) 1938–
British three-day eventer
Born in Chepstow, Gwent, Wales, he won three Olympic gold medals: the Three Day Event team golds in 1968 and 1972, and the individual title in 1972, on Laurieston. He also won at Burghley (1964) and Badminton (1970, 1982), and won world championship team gold medals (1970, 1982) and European championship team gold medals (1967, 1971, 1981). He published *Fit for Riding* in 1984.

Meagher, Thomas Francis 1822–67
Irish nationalist and US politician
Born in Waterford, he became a prominent member of the Young Ireland Party and a founder member (1847) of the Irish Federation, and in 1848 was transported for life to Van Diemen's Land (Tasmania) after an abortive rising. He made his escape in 1852, and made his way to the USA, where he studied law and became a journalist. At the outbreak of the Civil War in 1861 he organized the 'Irish brigade' for the Federals, and fought at Richmond and elsewhere. While secretary of Montana territory he was drowned in the Missouri River.

Meale, Richard Graham 1932–
Australian composer, conductor and teacher
Born in Sydney, he studied at the New South Wales State Conservatorium for Music, and later at the University of California in Los Angeles (1960) where he researched the music of Japan, Java and Bali. Returning to Australia, he made an immediate impact with his compositions *Las Alboradas* (1963) and *Homage to Garcia Lorca* (1964). The influence of Japanese music on him is apparent in *Images: Nagauta* (1966) and *Clouds Now and Then* (1969). Later works, such as *Viridian* (1979) and his second string quartet reflect DEBUSSY. His first opera *Voss* (1982, with a libretto by DAVID MALOUF based on the novel by PATRICK WHITE) demonstrates the strength of his orchestral and vocal writing. From 1969 to 1988 he was Reader in Music at Adelaide University.

Meany, George 1894–1980
US labour leader
Born in New York City, he followed his father into the plumbing trade and rose through union ranks to become head of the

American Federation of Labor in 1952. He worked to heal the breach with the Congress of Industrial Organizations, and when the two groups merged, he served as the first president (1955–79) of the new federation (the AFL-CIO). Under his leadership, and goaded by the Republican-controlled Congress's passage of the Taft-Hartley Act in 1947, the AFL-CIO abandoned the AFL's policy of political neutrality and made an alliance with the Democratic Party. Meany became an influential figure on the national political scene, supporting civil rights and the Great Society legislation, as well as, to the dismay of liberals, the Vietnam War. In his administration of the AFL-CIO he was notable for preferring arbitration and lobbying to strikes and picket lines and for his efforts to end corruption among member unions, which led to the expulsion of the Teamsters in 1957.

Mears, Rick 1951–
US professional car racer
Born in Wichita, Kansas, he is four times winner of the Indianapolis 500 (1979, 1984, 1988, 1991), and winner of the Indy Car national championship three times (1979, 1981, 1982). In the 1984 Indy 500 he set a record average speed of 163.612mph (263.301kph). He retired in 1992 with almost 30 Indy car victories and career earnings in excess of $11 million.

Mechnikov, Ilya Ilyich or **Elie** *See* METCHNIKOFF, ELIE

Medawar, Sir Peter Brian 1915–87
British zoologist, pioneering immunologist and Nobel Prize winner
Born in Rio de Janeiro of English-Lebanese parents, he was educated in zoology at Magdalen College, Oxford. During World War II he studied skin grafting for burn victims, where he realized that rejection of a graft occurred by the same immunological mechanism as the response to foreign bodies. He was appointed professor of zoology at Birmingham University (1947–51), Jodrell Professor of Comparative Anatomy at University College London (1951–62), and director of the National Institute for Medical Research at Mill Hill from 1962. He investigated the problems of tissue rejection in transplant operations. In 1960 he shared the Nobel Prize in physiology or medicine with Sir MACFARLANE BURNET, for researches into immunological tolerance. They showed that prenatal injection of tissues from one individual to another resulted in the acceptance of the donor's tissues. His writings include *The Uniqueness of the Individual* (1957), *The Art of the Soluble* (1967) and *Pluto's Republic* (1982). He was elected FRS in 1949 and knighted in 1965. 🕮 Jean Medawar, *A Very Decided Preference: Life with Peter Medawar* (1990)

Medici
Florentine banking family
During the 14th and 15th centuries, starting with Giovanni di Bicci de Médicis (1360–1429), they became public benefactors and patrons of the arts. The Medici remained rulers of Tuscany until its cession to Austria in 1737, but achieved little after COSIMO I, THE GREAT. Francis I (1541–87) began work on what is today the Uffizi gallery. Ferdinand I (1549–1609) developed the port of Livorno, and his daughter MARIE DE MÉDICIS married HENRY IV of France, while his son and successor Cosimo II (1590–1621) was the patron of GALILEO. Both he and his sons, Ferdinand and Leopold, maintained Florence's reputation throughout the first half of the 17th century as a centre for art and learning.

Medici, Caterina de' *See* CATHERINE DE MÉDICIS

Medici, Cosimo de' 1389–1464
Florentine financier, statesman and philanthropist
His father, Giovanni de' Bicci Medici, appears to have created the Medici wealth, and Cosimo was to use it to fuel the machine of his own power in Florence. He was exiled by the ascendant Albizzi faction in 1433, having opposed the imposition of taxes for what proved a disastrous war. He returned in 1434 and stifled family faction while maintaining the façade of republican government with a mixture of ruthlessness and urbanity. He employed some of his wealth in patronage of the arts, including Europe's first public library, and made the city the centre of the new learning. He was posthumously commemorated as 'Pater Patriae'.

Medici, Cosimo I de', *called* **the Great** 1519–74
Florentine politician
Duke of Florence from 1537 and Grand Duke of Tuscany from 1569, he possessed the astuteness of his greater predecessors, but was cruel and relentless, though one of the ablest rulers of his century. A skilled soldier, he annexed the republic of Siena in 1555 and doubled the territory of Tuscany during his rule. He devoted his energies to developing the trade, agriculture and economic infrastructure of Tuscany, and to building up its armed forces. At the same time, he was a notable patron of artists and a great collector of Etruscan antiquities.

Medici, Giovanni Angelo de' *See* PIUS IV

Medici, Lorenzo de', *called* **the Magnificent** 1449–92
Florentine ruler
The son of Piero I de' Medici and grandson of COSIMO DE' MEDICI, he succeeded as head of the family upon the death of his father (1469), and was an able, if autocratic, ruler who made Florence the leading state in Italy. In 1478 he showed courage and judgement in thwarting an attempt by the malcontent Pazzi, rival bankers, to overthrow the Medici, with the encouragement of Pope SIXTUS IV, although the rising led to the assassination of Lorenzo's brother, Giuliano (1453–78). Lorenzo was a distinguished lyric poet as well as being, in the words of MACHIAVELLI, 'the greatest patron of literature and art that any prince has ever been'. He aroused the criticism of SAVONAROLA for his secular tastes during his later years.

Medici, Maria de' *See* MARIE DE MÉDICIS

Medici, Piero de', *called* **the Unfortunate** 1471–1503
Florentine ruler
The eldest son of LORENZO DE' MEDICI, he succeeded his father (1492), but his disregard of republican forms made him unpopular. With the invasion of Italy by CHARLES VIII of France (1494), Piero was obliged to surrender key Florentine forces to the aggressor, a step strongly resented by the civic authorities, who banished the Medici from the state, placed a price on Piero's head and permitted the plundering of the Medici palace. Piero died fighting against the French. The Medici did not return to Florence until 1512, when the head of the family was Piero's brother, GIOVANNI DE' MEDICI.

Medina, Sir John Baptist de 1659–1710
Flemish-born Spanish portrait painter
Of Spanish extraction, he was born in Brussels. In about 1686 he moved to London, where he opened a portrait studio, painting in the manner of SIR GODFREY KNELLER. Many of his sitters were members of the Scottish nobility and, encouraged by them, he set up practice in Edinburgh. Faced with little competition, he became very successful, depicting many eminent Scottish citizens in his restrained Baroque style and producing a set of over 30 portraits for the Royal College of Surgeons of Edinburgh. In 1706 he was knighted by the last Scottish parliament before the Act of Union.

Medina-Sidonia, Alonso Pérez de Guzmán, Duque de 1550–1619
Spanish seaman
Captain-general of Andalusia and one of the wealthiest and most influential men in Spain, he was involved in the conquest of Portugal as well as being an important administrator. Appointed to command the Great Armada in the Enterprise of England on the death of the Marquis of Santa Cruz (1588), he led the Armada successfully up the English Channel to rendezvous with Parma off the Dutch coast, but was thwarted by the latter's failure to break out, by the action of the English fleet as well as by adverse weather.

Medlicott, William Norton 1900–87
English diplomatic historian
Born in Wandsworth, London, he was known especially for his studies of the BISMARCK period in international relations, and British diplomacy in the 20th century. Educated at Aske's School, Hatcham, and University College London, he was professor (later principal) of history at Exeter University (1939–53) and Stevenson Professor of International History at the London School of Economics (1953–67). Amongst his many publications were *The Congress of Berlin and After* (1938), *British Foreign Policy since Versailles* (1940) and *Bismarck, Gladstone and the Concert of Europe* (1956), as well as a history of British economic warfare against Germany, *The Economic Blockade* (2 vols, 1952–59). He also edited eleven volumes of the multi-volume *Documents on British Foreign Policy, 1919–1939*. The Norton Medlicott Medal, awarded by The Historical Association, was instituted in his honour (1984).

Medtner, Nikolai 1880–1951
Russian composer and pianist
Born in Moscow, he went to live in western Europe in 1922. His classical-romantic compositions included three piano concertos, songs and much piano music.

Medvedev, Roy Aleksandrovich 1925–
Russian historian, dissident and politician
He was born in Tbilisi, Georgia and educated in Leningrad and Moscow before becoming a history teacher. His father died in a labour camp in 1941. Although he remained a Marxist, he was highly critical of STALIN and other communist leaders. In 1968 he was expelled from the Communist Party and denied employment in academic bodies. However, he continued writing as a private individual, helping to sustain ideological criticism of LEONID BREZHNEV's regime. Under MIKHAIL GORBACHEV he was readmitted to the party and elected to the Congress and the Supreme Soviet in 1989, serving until 1991. His best book is considered to be *Let History Judge* (1971). He published *Brezhnev: A Political Biography* in 1991. His twin brother, scientist Zhores Medvedev, also suffered as a critic of Brezhnev.

Medwall, Henry 1462–c.1505
English dramatist
He wrote *Fulgens and Lucrece*, the earliest extant English secular play written before 1500. Little is known of his life, but he was a chaplain to Cardinal Morton, and held various livings. His only other extant work is a morality play, *Nature*, printed in 1530. 🕮 P Hogrefe, *The Thomas More Circle* (1959)

Mee, Arthur 1875–1943
English journalist, editor and writer
Born in Stapleford, Nottingham, he is best known for his *Children's Encyclopaedia* of 1908, which continued as a monthly for 25 years under the name *My Magazine*. He also produced a *Self-Educator* (1906), a *History of the World* (1907), both with Sir John Hammerton (1871–1949), a *Popular Science* (1912), a *Children's Shakespeare* (1926), and *The King's England* (1936–53), a series of topographical books describing the English counties.

Mee, Margaret Ursula 1909–88
English botanical artist and traveller
Born in Chesham, Buckinghamshire, she trained at the Camberwell School of Art, London, and first visited the Amazon forests when she was 47. Ten years later, having settled in Brazil, she began her impressive career as a botanical artist, travelling extensively in the Brazilian Amazonia and collecting new species and painting many others, some of which have since become extinct. She was well known for her outspoken anger at the destruction of the Amazon, which she called 'a valley of death'. The Margaret Mee Amazon trust was set up in 1988 to draw attention to the area's ecological crisis.

Meegeren, Han or **Henricus van** 1889–1947
Dutch artist and forger
Born in Deventer, in 1945 he was accused of selling art treasures to the Germans. To clear himself he confessed to having forged the pictures, and also the famous *Supper at Emmaus*, 'discovered' in 1937 and accepted by the majority of experts as by JAN VERMEER. His fakes were subjected to a detailed scientific examination, and in 1947 their maker was sentenced to twelve months' imprisonment for forgery. He died a few weeks later, a popular hero.

Meehan, Patrick Connolly 1927–94
Scottish criminal
Born in the Gorbals, Glasgow, he spent most of his teenage life in approved schools and in Borstal, for theft. In December 1947 he was arrested and charged with blowing up a safe. He was convicted and sentenced to three years' imprisonment in 1948. Other prison sentences followed. On 14 July 1969, after a routine interview with police in which Meehan admitted that he had been in Ayr on 6 July, two men, who called each other 'Jim' and 'Pat' broke into the Ayr home of Abraham and Rachel Ross. They assaulted the Rosses, and Rachel Ross died of her injuries shortly after. Ross identified Meehan's voice and Meehan was charged. Meanwhile, James Griffiths, a friend of Meehan, who had been on the run, was shot dead by the police, having killed one person and wounded others. Suspicions arose about some of the police evidence, but Meehan was nonetheless found guilty on 24 October. After years of failed appeals, new evidence, confessions from the real killer, and the publication of LUDOVIC KENNEDY's book *A Presumption of Innocence* (1976), Meehan was pardoned.

Meek, Joe, *originally* **Robert George Meek** 1929–67
English record producer
Born in Gloucestershire, he followed National Military Service as a radar technician with civilian work as a sound engineer. By 1960 he was an independent producer with a home-made recording studio in his flat, experimenting with electronic effects and altering tape speed and direction. Such innovations bore fruit in The Tornados' 1962 US and UK number one hit 'Telstar', but Meek's pioneering manipulation of technology was soon eclipsed by the 'beat boom' of the 1960s. He became increasingly reliant on drugs, and eventually, haunted by his professional decline as well as by the social and legal pressures he faced as a gay man, he shot and killed his landlady before committing suicide. 🕮 John Repsch, *The Legendary Joe Meek: The Telstar Man* (1989)

Meer, Simon van der *See* VAN DER MEER, SIMON

Megasthenes fl.300 BC
Greek historian
He was ambassador (306–298 BC) at the Indian court of Sandrakottos or CHANDRAGUPTA, where he gathered materials for his *Indica*, from which ARRIAN, STRABO and others borrowed.

Mège Mouriés, Hippolyte 1817–80
French chemist and inventor
He was born in Draguignan, and patented margarine in its original form in 1869 after several years of research into the food value of various animal fats. The French government had offered a prize for a satisfactory and economic substitute for butter, which had become very difficult to supply in adequate quantities to the rapidly increasing urban populations and armed forces. Mège Mouriés' margarine was manufactured from tallow, and although he was awarded the prize it was not until F Boudet patented a process for emulsifying it with skimmed milk and water in 1872 that it could be made sufficiently palatable to be a commercial success.

Mehemet 'Ali, *also known as* **Muhammad 'Ali** c.1769–1849
Viceroy of Egypt
An Albanian military officer, he was sent to Egypt (1801) with a Turkish-Albanian force to counter the French invasion. After the departure of the French, he supported the Egyptian rulers in their struggles with the Mamluks and had himself proclaimed Viceroy by his Albanians (1805). He formed a regular army, improved irrigation, and introduced elements of European civilization. He reduced part of Arabia (1816), annexed Nubia and part of the Sudan (1820), and occupied various points in the Morea and Crete (1821–28) to aid the Turks in their war with the Greeks. His fleet was defeated at Navarino (1827), but in 1831 the conquest of Syria was begun, and the Ottoman army was defeated at Konya (1832), after which he was given Syria on condition of tribute. The victory at Nezib (1839) might have elevated him to the throne of Constantinople (Istanbul); but the Quadruple Alliance (1840), the fall of Acre to the British, and the consequent evacuation of Syria, compelled him to limit his ambition to Egypt. In 1848 he became insane and was succeeded, for two months, by his son Ibrahim Pasha (1789–1848).

Mehmet I c.1387–1421
Sultan of Turkey
The youngest son of BAYEZIT I, his short reign (from 1413) marks the beginning of the recovery from the devastating effects of the conquests of TIMUR. He made gains in Albania, re-established control over western Anatolia, and put down a religious revolt. He was the father of Sultan Murad II.

Mehmet II, the Conqueror, *also called* **Mohammed** 1432–81
Sultan of Turkey and founder of the Ottoman Empire
Born in Adrianople (Edirne), he succeeded his father, Murad II, in 1451, and took Constantinople (1453), rebuilding it into a prosperous Ottoman capital, popularly known as Istanbul, and thus extinguishing the Byzantine Empire and giving the Turks their commanding position on the Bosphorus. Checked by JÁNOS HUNYADI at Belgrade (1456), he nevertheless annexed most of Serbia, all of Greece, and most of the Aegean Islands, threatened Venetian territory, was repelled from Rhodes by the Knights of St John (1479), took Otranto (1480) and died in a campaign against Persia (Iran).

Mehmet III 1566–1603
Sultan of Turkey
The son of Murad III, he was born in Manisa, and on his succession in 1595 he invoked the law of fratricide by which the sultan could have his brothers put to death. All 19, of whom the eldest was aged 11, were executed by strangulation. His reign involved wars with Austria and Russia, and revolts in Anatolia.

Mehmet IV 1642–93
Sultan of Turkey
Born in Constantinople (Istanbul), he succeeded his deposed father, Ibrahim I, as a child in 1648, during a war with Venice

(1645–64). Anarchy was quelled by the grand viziers, Mohammed Kiuprili (1656) and his son Ahmed (1661). The Turks were defeated by the Austrians under Count Montecucculi at the Battle of St Gotthard (1664), and in a war with Poland (1672–76) they were twice defeated by King JOHN III SOBIESKI, but gained Polish Ukraine, which they lost to Russia (1681). In 1683 under the Grand Vizier Kara Mustafa, they besieged Vienna, which was relieved by John Sobieski. After defeat at the second Battle of Mohacs (1687), Mehmet was deposed, and replaced by SÜLEYMAN II.

Mehmet VI 1861–1926
Sultan of Turkey
The brother of Mehmet V, he was the last Ottoman sultan (1918–22). Although clever and perceptive, he was unsuccessful in suppressing the nationalists led by Mustafa Kemal (KEMAL ATATÜRK), who abolished the sultanate (1922). Mehmet fled to Malta, and after abortive attempts to become ruler in the Hejaz, he died in exile.

Mehta, Ved Parkash 1934–
US writer
He was born in Lahore, Pakistan. Blind from the age of eight, he went to the USA for his education when he was 15 and attended the Arkansas School for the Blind at Little Rock and Pomona College, before going on to Oxford and Harvard universities. While at Pomona he published his first book, the autobiography *Face to Face* (1957). He has had a distinguished career as a journalist, contributing chiefly to *The New Yorker*. Employing amanuenses, he has written biographies (*Mahatma Gandhi and His Apostles*, 1977, and *Rajiv Gandhi and Rama's Kingdom*, 1995), stories, essays and portraits of India. His enduring achievement, however, is *Continents of Exile*, an acclaimed series of autobiographical books, which includes *Daddyji* (1972), *Mamaji* (1979), *Vedi* (1982), *Sound-Shadows of the New World* (1986), *The Stolen Light* (1989), *Up at Oxford* (1993), *All for Love* (2001) and *The Red Letter* (2004). He became a naturalized US citizen in 1975.

Mehta, Zubin 1936–
US conductor
Born into a Parsi family in Bombay, he was taught music by his father, a violinist and conductor of modest pretensions, and later studied at the Vienna Academy of Music, graduating in 1957. After conducting in Liverpool and Montreal, he became musical director of the Los Angeles Philharmonic (1962–78) and the New York Philharmonic (1978–91). Since 1968 he has also served as music director of the Israel Philharmonic, and in 1981 he was named its music director for life. In 1998 he also became general music director of the Bavarian State Opera, a position he held until 2006. He specializes in late Romantic and early modern music and is known for his flamboyant style and strong technique.

Méhul, Étienne Nicolas 1763–1817
French composer of operas
Born in Givet, he became a professor of the Paris Conservatoire in 1795. Of his numerous operas, *Joseph* (1807) is his most impressive.

Meidner, Ludwig 1884–1966
German painter and lithographer
Born in Bernstadt, Silesia, he moved to Berlin in 1905, and in 1906 visited Paris, where he first saw the work of VANGOGH, which impressed him deeply. Although he did not belong to any of the major artistic movements, most of his work has strong links with Expressionism in style and subject matter. Shortly before the outbreak of World War I he produced a series of apocalyptic visions – scenes of disaster and chaos which were remarkable prefigurations of the horrors to come.

Meidre, Bryan Mac Giolla *See* MERRIMAN, BRYAN

Meier, Richard Alan 1934–
US architect
Born in Newark, New Jersey, he was educated at Cornell University and founded his own practice in 1963. A prominent figure of the 'New York Five' group who attracted attention in the 1970s, he won acclaim for his striking design style, which explored the use of enamelled panels and glass and the linear relationships of handrails and ramps. His most important works include the High Museum of Art in Atlanta, Georgia (1983), the Museum of Contemporary Art in Barcelona (1995), the City Hall and Central Library in The Hague (1996) and the J Paul Getty Center in Los Angeles (1997). Recent work includes the Ara Pacis Museum, Rome (2006).

Meighen, Arthur 1874–1960
Canadian politician
Born in Anderson, Ontario, he became a lawyer and sat in the Canadian House of Commons as a liberal Conservative (1908–26). In 1913 he became Solicitor-General in ROBERT BORDEN's Union government and was the architect of much of its strategy during World War I: railway nationalization, conscription and the deeply resented Wartime Elections Act. It was Meighen who also orchestrated the government's draconian response to the Winnipeg General Strike (1919), insisting that organized labour was revolutionary. Both the Immigration Act and the criminal code were amended so that strike leaders would face either deportation or long prison sentences. In 1920 Meighen succeeded Borden as prime minister and his high tariff policy was a major factor in the defeat of the Conservative Party in 1921. He became prime minister again in 1925 but when the Progressives deserted him, the Governor-General allowed him to dissolve parliament, a mechanism which had not been afforded to MACKENZIE KING in a similar situation. King won the election by promising to prevent such imperial intervention. Meighen then resigned as Conservative leader a few months later, and was replaced by RICHARD BENNETT. In 1940 the Conservatives invited him to lead the party again but he failed to win a seat and retired from politics.

Meikle, Andrew 1719–1811
Scottish millwright and inventor
Born at Houston Mill, near Dunbar, he inherited his father's mill and showed a keen interest and considerable talent in devising improvements to its machinery. He also turned his attention to the design of windmills, inventing the fantail which kept the sails rotating at right angles to the direction of the wind (1750), a machine for dressing grain (1768), and the 'spring' sail which counteracted the effect of sudden gusts of wind (1772). His most significant invention was a drum threshing machine which could be worked by wind, watér, horse or (some years later) steam power. He obtained a patent in 1788 and built a factory to produce them, but as with all his other inventions he made very little profit, and in his old age £1,500 was raised by his friends to alleviate his poverty.

Mei Lanfang 1894–1961
Chinese opera singer and actor
He was born in Yanzhou, Jiangsu (Kiangsu), the son of an actor. He made his stage debut in Beijing (Peking) at the age of ten, and went on to study at the Xi Liancheng Dramatic Training School before forming a professional troupe, and establishing his reputation in 1913 in Shanghai as a gifted performer of the 'dan' (female) role. He was the first Chinese actor to perform outside his own country when he appeared to great acclaim in Tokyo (1919), and following this travelled widely abroad. He made his first colour film *Sheng-si-gen* ('The Wedding is a Dream') in 1947, and from 1949 held various prestigious cultural posts. Best known for his female roles in opera, he became China's supreme theatrical performer in the first half of the 20th century and played a major role in preserving the essential heritage of Chinese dramatic art.

Meilhac, Henri 1831–97
French playwright
He was born in Paris, and from 1855 produced a long series of light comedies – some in conjunction with LUDOVIC HALÉVY, and some, including *La Belle Hélène* (1864), well known through JACQUES OFFENBACH's music. His masterpiece is *Frou-Frou* (1869). He also collaborated with Ludovic Halévy and Gille respectively on the libretti of the operas *Carmen* (1875) and *Manon* (1884). 🕮 F Gaiffe, *Le rire et la scène française* (1932)

Meillet, Antoine 1866–1936
French philologist
Born in Moulins, he was a great authority on Indo-European languages, and was professor at the École des Hautes Études (1891–1906) and at the Collège de France from 1906. He wrote standard works on Old Slavonic, Greek, Armenian, Old Persian, etc, and on comparative Indo-European grammar and linguistic theory.

Meinhof, Ulrike Marie 1934–76
West German terrorist
Born in Oldenburg, the daughter of a museum director, she campaigned for the creation of a neutral, nuclear-free 'Greater Germany' while studying at Marburg University, and subsequently became a respected left-wing journalist. In 1961 she married the Communist activist, Klaus Rainer Röhl (divorced 1968), by whom she had twin daughters. After an interview with the imprisoned arsonist, ANDREAS BAADER, she became committed

Melba, Dame Nellie, *née* **Helen Porter Mitchell** 1861–1931
Australian operatic soprano and pioneer recording artist

Dame Nellie Melba was born in Richmond, a suburb of Melbourne, Victoria. Her father, David Mitchell (1829–1916), was a building contractor, born the son of a tenant farmer in Forfarshire, Scotland. Helen, as she was called then, studied singing and piano under Madame Ellen Christian, a pupil of MANUEL GARCÍA, but after her mother's death the family moved to Queensland where Helen met and married Captain Charles Armstrong, the younger son of a baronet. A boy was born, but Helen grew bored with provincial domesticity and in 1884 she returned to Melbourne to study under Pietro Cecchi (c.1831–1897). She made her professional debut at Melbourne Town Hall in May of that year.

After a visit to London, Helen had an audition in Paris with Madame Mathilde Marchesi (1826–1913), the leading vocal teacher of her time, and took her stage name from her native city. Marchesi added the polish to the fine instrument Cecchi had trained, and tutored Melba in the social graces, removing the Australian rough edges – though Melba retained her forthrightness and earthy speech.

She made her operatic debut at the Théâtre Royal de la Monnaie in Brussels in October 1887 as Gilda in VERDI's *Rigoletto*. Her Covent Garden debut was in May 1888, in the title role of DONIZETTI's *Lucia di Lammermoor*. That opera's famous 'Mad Scene' was to become one of her popular successes, but her first appearance in London left the critics indifferent.

Her return to Covent Garden the following year was a different story. Under the patronage of society hostess Lady de Grey, Melba was idolized. Covent Garden was in its heyday and Melba sang alongside other great singers such as the Italian tenor ENRICO CARUSO. Melba was a welcome guest in the royal palaces of Europe, and had a brief relationship with the young Duke of Orléans, son of the Pretender to the French throne. Her international career was on its way.

With Caruso, she was one of the artists who made the recording industry, and who were made by it. She recorded on some early cylinders, but her first standard (78rpm) records were issued in 1904, on a special purple label, at the price of 21 shillings. She made her last recordings, in the new electrical process, at her Covent Garden farewell in 1926. Sustained by her strong physique and excellent early training, Melba's numerous 'Farewell' performances were often the cause of amusement.

📖 Melba's memoirs, *Melodies and Memories* (1925, reprinted Melbourne 1980) were ghost-written by the young Beverley Nichols, who later wrote the novel *Evensong* (1932) on the declining years of a prima donna, generally supposed to be based on Melba's career. See also Agnes G Murphy's *Melba, a biography*, with chapters by Madame Melba: 'The Selection of Music as a Profession' and 'The Science of Singing' (1909, reprinted New York 1977). The best modern biography is John Hetherington's *Melba, a biography* (1967).

> 'If you wish to understand me at all ... you must understand first and foremost that I am an Australian.'
>
> – From *Melodies and Memories*, Ch 1.

In 1901, on the eve of her first tour of Australia, the contralto Dame CLARA BUTT asked Melba's advice on appropriate repertoire. 'All I can say is, sing 'em muck!', Melba is reported to have replied, 'It's all they can understand'. This account was later repudiated by Melba, and became the cause of legal dispute.

to the use of violence to secure radical social change. In May 1970, she helped free Baader and they both then headed an underground urban guerrilla organization, the Red Army Faction, which conducted brutal terrorist attacks against the post-war West German 'materialist order'. As the Faction's chief ideologist, she was arrested in 1972, and in 1974 was sentenced to eight years' imprisonment. She committed suicide in Stammheim high-security prison.

Meinong, Alexius von 1853–1920
Austrian philosopher and psychologist
He was born in Lemberg, Galicia (Ukraine). A disciple of FRANZ BRENTANO in Vienna, he became professor at Graz in 1882 and founded there in 1894 Austria's first institute of experimental psychology. His main works were *Über Annahmen* (1902, 'On Assumptions') and *Untersuchungen zur Gegenstandstheorie und Psychologie* (1904, 'Investigation into the theory of objects and psychology'). In the latter he distinguishes sharply between the content and the objects of thoughts and makes further distinctions between different kinds of objects, to the point of paradox if not absurdity – as BERTRAND RUSSELL devastatingly demonstrated, wielding 'OCCAM's razor'.

Meir, Golda, *née* **Goldie Mabovich**, *later* **Goldie Myerson** 1898–1978
Israeli politician
She was born in Kiev, and her family emigrated to Milwaukee, USA, when she was eight years old. She married in 1917 and settled in Palestine in 1921, where she took up social work and became a leading figure in the Labour movement. She was Israeli ambassador to the Soviet Union (1948–49), Minister of Labour (1949–56), and Foreign Minister (1956–66). She was elected prime minister in 1969, but her efforts for peace in the Middle East were halted by the fourth Arab–Israeli War (1973) and she resigned in 1974.

Mei Sheng d.140 BC
Chinese poet
He is often credited with the introduction of the five-character line. For this reason he is sometimes called 'the father of modern Chinese poetry'. 📖 E von Zach, *Die chinesische Anthologie* (1958)

Meissonier, (Jean Louis) Ernest 1815–91
French painter
Born in Lyons, he specialized in small genre and military scenes of the Napoleonic campaign, eg *Campagne de France 1814* (1864) and *Le Siège de Paris* (1870), both in the Musée d'Orsay, Paris, and *Napoleon and his Staff* (1868, Wallace Collection, London).

Meitner, Lise 1878–1968
Austrian physicist
Born in Vienna and educated at the University of Vienna, she became professor at Berlin University (1926–38) and a member of the Kaiser Wilhelm Institute for Chemistry (1907–38), where she set up a nuclear physics laboratory with OTTO HAHN, with whom she had discovered the radioactive element protactinium in 1917. In 1938 she fled to Sweden to escape the Nazis, and shortly afterwards Hahn wrote to Meitner concerning his discovery of radioactive barium. With her nephew OTTO FRISCH, she proposed that the production of barium was the result of nuclear fission, later verified by Frisch. Meitner worked in Sweden until retiring to England in 1960. Nuclear physicists recently named the element of atomic number 109 after her. 📖 Deborah Crawford, *Lise Meitner, Atomic Pioneer* (1969)

Mela, Pomponius fl.40 AD
Latin geographer
Born in Tingentera, southern Spain, he lived during the reign of the Emperor CLAUDIUS I. He was the author of an unsystematic compendium entitled *De Situ Orbis* (3 vols, 'A Description of the World').

Melanchthon, Philipp, *Greek surname for original name* **Schwartzerd ('Black Earth')** 1497–1560
German Protestant reformer
Born in Bretten, in the Palatinate, he studied at Heidelberg (1509–11), then Tübingen (1512–14) universities. Appointed professor of Greek at Wittenberg in 1516, he became MARTIN LUTHER's fellow worker. The Augsburg Confession (1530) was composed by him. After Luther's death he succeeded to the leadership of the German Reformation movement but lost the confidence of some Protestants by concessions to the Catholics. His conditional consent to the introduction of the stringent Augsburg Interim (1549) in Saxony led to painful controversies. His *Loci Communes* (1521) is the first great Protestant work on dogmatic theology.

Melba, Dame Nellie *See panel above*

Melbourne, William Lamb, 2nd Viscount 1779–1848
English statesman
Born in London and educated at Eton, Trinity College, Cambridge, and Glasgow, he became Whig MP for Leominster in

1805, but in 1827 accepted the chief-secretaryship of Ireland in GEORGE CANNING's government, and retained it under Viscount GODERICH (the Earl of Ripon) and WELLINGTON. Succeeding as second viscount (1828), he returned to the Whigs, became Home Secretary (1830) and then premier (1834, 1835–41). He was still in office at the accession of Queen VICTORIA (1837). In 1841 he passed the seals of office to PEEL, and after that took little part in public affairs. His wife, a daughter of the Earl of Bessborough, wrote novels as Lady CAROLINE LAMB, and was notorious for her nine months' devotion (1812–13) to Lord BYRON. 🕮 Bertram Newman, *Lord Melbourne* (1930)

Melchett, 1st Baron *See* MOND, ALFRED MORITZ

Melchior, Lauritz Lebrecht Hommel 1890–1973
US tenor
Born in Copenhagen, Denmark, his career began as a baritone in *Pagliacci* ('Clowns') in 1913. From 1918 he appeared as a tenor, making his Covent Garden, London debut in 1924. One of the foremost Wagnerian singers of the century, he sang at Bayreuth (1924–31) and regularly at the New York Metropolitan (1926–50). He became a US citizen in 1947.

Meleager c.140–c.70 BC
Greek poet and epigrammatist
From Gadara, Syria, he was the author of 128 exquisite short poems and epigrams included in his *Stephanos* ('Garland'), the first large anthology of epigrams. 🕮 C Redinger, *Meleagros von Gadara* (1895)

Meléndez Valdés, Juan 1754–1817
Spanish poet
Born near Badajoz, he became a professor of classics at the University of Salamanca, fought for NAPOLEON I in the War of Independence, and held political office in Madrid. Considered the greatest Spanish poet of his time, he is remembered for his odes, ballads and romantic verses. 🕮 R Froldi, *Un poeta iluminista* (1967)

Melgund, Viscount *See* MINTO, GILBERT JOHN MURRAY KYNYNMOND-ELLIOT, 4TH EARL OF

Méliès, (Marie-)Georges(-Jean) 1861–1938
French film pioneer
Born in Paris, he was a keen amateur magician who bought a theatre in 1888 in order to present magic-lantern shows. Inspired by the success of the LUMIÈRE brothers, he branched into film, constructing his own equipment in order to make an estimated 520 short films. A key pioneer of early cinema, he used experimental camera effects, dissolves, double exposures and tracking shots to bring a sense of illusion to fantasy stories such as *Voyage to the Moon* (*Le Voyage dans la lune*, 1902). He also expanded the narrative structure of films, from single shots to a series of tableaux scenes edited together and filmed on specially built sets. He stopped making films in 1912. 🕮 David Robinson, *Georges Méliès: Father of Film Fantasy* (1993)

Melissus 5th century BC
Greek philosopher and politician
He commanded the Samian fleet which defeated the Athenians under PERICLES in a battle in 441 BC. He was probably a pupil of PARMENIDES OF ELEA and wrote a book entitled *On Nature* which elaborated Parmenides' views on the properties of reality and which most influenced the atomists, DEMOCRITUS and LEUCIPPUS, in their response to Eleatic doctrines.

Mellanby, Sir Edward 1884–1955
English pharmacologist
Born in West Hartlepool, he was educated at Cambridge, and in 1907 moved to London to complete his clinical studies at St Thomas's Hospital Medical School, where he became a demonstrator in physiology. In 1913 he was appointed professor of physiology at King's College for women, and seven years later became professor of pharmacology at Sheffield University and Honorary Physician. He was elected FRS in 1925. He worked on several important biochemical aspects of nutrition at a time when the concept of vitamins was still not universally accepted. He identified vitamin D deficiency as a cause of rickets, and his advocacy of cod-liver oil as a sound source of the vitamin was soon applied, helping to eliminate the then prevalent disease. His studies revealed that lack of vitamin A during embryonic development could result in serious nerve and bone malformation. He was appointed secretary of the Medical Research Council (1933–49), and with his scientist wife MAY MELLANBY he continued his laboratory research during and after this administrative period of his life.

Mellanby, Kenneth 1908–1993
Scottish entomologist and environmentalist
Born in Barrhead, Renfrewshire, and educated at King's College, Cambridge, he researched medical entomology at the London School of Hygiene and Tropical Medicine. During World War II he worked on the transmission of diseases spread in humans by parasitic mites, defending the use of human guinea pigs by both UK and German scientists. From 1947 to 1953 he was the first Principal of University College, Ibadan, Nigeria, returning to the UK to head the department of entomology at Rothamstead (1955–61) and to become the first director of the Nature Conservancy's Monks Wood Experimental Station (1961–74). There he worked mainly on the problems concerned with the effects of agriculture and industry on the environment, particularly the role of pesticides such as DDT. His publications on this topic include *The Biology of Pollution* (1972) and *Waste and Pollution* (1991). He was awarded the CBE in 1954.

Mellanby, Lady May, *née* **Tweedy** 1882–1978
English nutritional scientist
She was born in London and after spending her early years in Imperial Russia, where her father worked in the oil industry, she entered Girton College, Cambridge, in 1902, and was permitted to attend several lectures not normally open to women. She was awarded the equivalent of a second class honours degree in 1906 and became a lecturer in physiology at Bedford College for women in London. In 1914 she married EDWARD MELLANBY, and collaborated with him on several nutritional researches. She also developed an important research line on dental development, showing from animal experiments that vitamins A and D were essential for the proper development of teeth. She was the first woman to present a paper to the British Orthodontics Society (1919). She travelled widely, examining the teeth of adults and children and authored important special reports for the Medical Research Council on the relationship between diet, and dental structure and disease.

Mellis, Margaret 1914–
Scottish painter and constructivist artist
Born in China of Scottish parents, she studied at Edinburgh College of Art under SAMUEL JOHN PEPLOE and won several awards, including a travelling scholarship that enabled her to visit Spain, France and Italy. Before World War II she studied in London with the Euston Road School. She moved to Cornwall in 1939, and was friendly with the artists BEN NICHOLSON, NAUM GABO and BARBARA HEPWORTH. Originally a painter, she also created constructivist collage (a work pieced together rather than moulded, cast or carved) and relief carving. In 1976 she moved to Southwold, Suffolk, where she collects driftwood to make the assemblages for which she is well known.

Mello, Craig Cameron 1960–
US molecular biologist and Nobel Prize winner
Born in New Haven, Connecticut, he studied at Brown University, Rhode Island, and Harvard, before carrying out research at the University of Massachusetts Medical School. In 2006 he shared the Nobel Prize in physiology or medicine with ANDREW FIRE for their work on RNA interference (RNAi), first published in 1998. Their discovery that some RNA molecules can be used to 'switch off' specific genes has been hailed as revolutionary, with huge potential benefits for the fight against disease. Mello is currently professor of molecular medicine at the University of Massachusetts.

Mellon, Andrew W(illiam) 1855–1937
US financier, philanthropist and politician
Born in Pittsburgh, Pennsylvania, he trained as a lawyer and entered his father's banking house in 1874. He took over in 1882, soon establishing himself as a banker and industrial magnate. Entering politics, he was Secretary of the Treasury from 1921 to 1932 under presidents WARREN G HARDING, CALVIN COOLIDGE and HERBERT HOOVER and made controversial fiscal reforms, drastically reducing taxation of the wealthy. He was ambassador to the UK from 1932 to 1933. He endowed the National Gallery of Art at Washington, DC. 🕮 David Cannadine, *Mellon: An American Life* (2006)

Mellon, Harriot c.1777–1837
English actress
She was born in London and appeared at Drury Lane in 1795. In 1815 she married her elderly protector, THOMAS COUTTS, who left her all his money when he died (1822). In 1827 she married the Duke of St Albans.

Melly, (Alan) George (Heywood) 1926–
English jazz singer
Born in Liverpool, he was educated at Stowe School and served in the Royal Navy before singing with the Mick Mulligan jazz band (1951–62) and also working as a journalist and comic strip cartoonist. Subsequently he established a lasting relationship as singer with John Chilton's Feetwarmers. An admirer of the jazz singer BESSIE SMITH, he became a familiar face on British television, becoming well known for his flamboyant dress and skills as a raconteur, and also appearing as an art critic. His writings have included film scripts, social commentary, art history and the autobiographical trilogy *Owning Up* (1965), *Rum, Bum and Concertina* (1977) and *Scouse Mouse* (1985).

Melo, Francisco Manuel de 1608–66
Portuguese writer
Born in Lisbon, he had an arduous and hazardous life as soldier, political prisoner, and exile in Brazil, whence he returned in 1657. He wrote in both Spanish and Portuguese, and is better remembered for his critical works and his history of the Catalan Wars than for his voluminous poetry. 🕮 E Prestage, *Don Francisco Manuel de Melo* (1922)

Melvill, Thomas 1726–53
Scottish scientist
He was probably born in Glasgow and studied theology at Glasgow University. His detection of the yellow line of sodium when salt and sal ammoniac were introduced into burning alcohol made no impact on the scientific community, and no other serious investigations were carried out until WILLIAM WOLLASTON discovered the dark lines in the Sun's spectrum in 1802. Melvill also attempted to explain why different colours of light bend by different amounts when passing from one medium to another, suggesting that they travel at different speeds. His early death at the age of 27 may explain his lack of influence.

Melville, Andrew, *nicknamed* **the Blast** 1545–c.1622
Scottish Presbyterian reformer
Born in Baldowie, Angus, he was educated at St Andrews and Paris. In 1568 he became professor of humanity at Geneva. On his return to Scotland he was appointed Principal of Glasgow University (1574–80), and did much to reorganize university education, introducing Greek for the first time to a Scottish university. He also had an important share in drawing up the *Second Book of Discipline* (1579). Chosen Principal of St Mary's College in St Andrews in 1580, he taught Hebrew, Chaldee and Syriac besides lecturing on theology. In 1582 he preached boldly against absolute authority before the General Assembly and advocated a presbyterial system of church government, and in 1584, to escape imprisonment, he went to London. He was repeatedly Moderator of the General Assembly of the Church of Scotland. In 1596 he headed a deputation to 'remonstrate' with King James VI (JAMES VI AND I), and in 1606, with seven other ministers, was called to England to confer with him. Having ridiculed the service in the Chapel Royal in a Latin epigram, he was summoned before the English Privy Council, and sent to the Tower. In 1611 he was released through the intercession of the Duke of Bouillon, who wanted his services as professor of theology in his university at Sedan. His nickname stems from his religious fervour.

Melville, 1st Viscount *See* DUNDAS, HENRY

Melville, George John Whyte *See* WHYTE-MELVILLE, GEORGE JOHN

Melville, Herman 1819–91
US novelist, short-story writer and poet
Born in New York City, he became a bank clerk but, in search of adventure, joined a whaling ship bound for the South Seas. His adventures in the Marquesas and Tahiti inspired his first two books, *Typee* (1846) and *Omoo* (1847). *White Jacket* (1850) drew on his experiences as a seaman on the man-of-war which eventually brought him home. He married in 1847, and after three years in New York took a farm near Pittsfield, Massachusetts, where NATHANIEL HAWTHORNE was his neighbour and friend. It was during this period that he wrote his masterpiece, *Moby-Dick* (1851), a novel of the whaling industry, of extraordinary vigour and colour. Later novels include *Pierre* (1852), in a symbolic vein which was not appreciated by his readers, and *The Confidence Man* (1857). Melville also wrote short stories, most notably 'Benito Cereno' and 'Bartleby the Scrivener', which were collected, with others, in *The Piazza Tales* (1856). Now regarded as one of the USA's greatest novelists, he was not so successful during his life. Exhausted and disillusioned, he wrote only poetry after 1857, and from 1866 he was obliged to work as a New York customs official. Near the end of his life he returned tentatively to fiction with *Billy Budd* (1924), an unfinished but brilliant novella published posthumously. Recognition did not come until some 30 years after his death. 🕮 E H Miller, *Herman Melville* (1975); C Olson, *Call Me Ishmael* (1947)

Memlinc or **Memling, Hans** c.1440–1494
Flemish religious painter
Born in Seligenstadt, Germany, of Dutch parents, he lived mostly in Bruges. A pupil of ROGIER VAN DER WEYDEN, he repeated the types of his master. The triptych of the *Madonna Enthroned* at Chatsworth (1468), the *Marriage of St Catherine* (1479) and the *Shrine of St Ursula* (1489), both at Bruges, are among his best works. He was also an original and creative portrait painter.

Menaechmus 4th century BC
Greek mathematician
One of the tutors of ALEXANDER THE GREAT, he was the first to investigate conics as sections of a cone.

Menander c.343–c.291 BC
Greek comic dramatist and poet
He was born in Athens. His comedies were more successful with cultured than with popular audiences, but QUINTILIAN praised him, and TERENCE imitated him closely. The greatest writer of Attic New Comedy, he wrote more than a hundred plays, but only a few fragments of his work were known until 1906, when Lefebvre discovered in Egypt a papyrus containing 1,328 lines from four different plays. In 1957, however, the complete text of the comedy *Dyskolos* (Eng trans 1960) was brought to light in Geneva. 🕮 O Veh, *Beiträge zu Menander Protektor* (1955)

Menchu, Rigoberta Tum 1959–
Guatemalan activist and Nobel Prize winner
Born near San Marcos, she has worked as a domestic servant and as a cotton-field labourer. Her campaign for human rights began when she was a teenager and later she had to flee to Mexico when her brother and parents were killed by security forces in 1980. In 1983 her book *I Rigoberta Menchu* was published and her cause was taken up by Madame Danielle Mitterrand, wife of President MITTERRAND of France. In 1986 Menchu narrated the film *When the Mountains Tremble*, which portrays the difficulties experienced by the native Quiche people. In 1992 she helped to organize opposition to the 500th anniversary of the arrival of CHRISTOPHER COLUMBUS in America and that same year was awarded the Nobel Peace Prize. She has been a Goodwill Ambassador for UNESCO since 1996. In 1999 it was revealed that elements of her autobiography had been fictionalized.

Mencius, *properly* **Mengzi** or **Meng-tzu** c.372–c.289 BC
Chinese philosopher and sage
Born in Shandong (Shantung), he helped to develop and popularize Confucian ideas and founded a school to promote their study. For over 20 years he travelled China searching for a princely ruler who would put into practice his system of social and political reform. The search was unsuccessful but his conversations with rulers, disciples and others are recorded in a book of sayings which his pupils compiled after his death as the *Book of Mengzi*. His ethical system was based on the belief that human beings were innately and instinctively good but required the proper conditions and support for moral growth. Like CONFUCIUS he emphasized the cardinal virtues of magnanimity (*ren*), sense of duty (*yi*), politeness (*li*) and wisdom (*zhi*), and his detailed proposals included practical recommendations about taxes, road maintenance and poor law. 🕮 W A Dobson, *Mencius* (1963)

Mencken, H(enry) L(ouis) 1880–1956
US journalist, editor, critic and historian of language
Born in Baltimore, Maryland, he became editor of the *Baltimore Herald*, then joined the *Sunpapers* in 1906. From 1908 to 1923 he worked with the *Smart Set*, and in 1924 he and GEORGE JEAN NATHAN founded the *American Mercury*. He attacked what he called the 'boo-joy' (bourgeois), became a major influence on the US literary scene of the 1920s and supported many writers such as THEODORE DREISER and SHERWOOD ANDERSON. His main work is *The American Language* (1919). *The Vintage Mencken*, edited by ALISTAIR COOKE, appeared in 1955. 🕮 Carl Bode, *Mencken* (1969)

Mendel, Gregor Johann 1822–84
Austrian botanist
Born near Udrau, he was ordained a priest in 1847, and after studying science at Vienna University (1851–53), he became an abbot in 1868. In the experimental garden of the monastery, he researched the inheritance characteristics of plants between 1856 and 1863. He crossed species that produced tall and short

plants, and the resulting numbers of tall and short plants in subsequent generations led him to suggest that each plant received one character from each of its parents, tallness being 'dominant', and shortness being 'recessive' or hidden, appearing only in later generations. His experiments led to the formulation of 'Mendel's law of segregation' and his 'law of independent assortment'. His concepts have become the basis of modern genetics. 🕮 H Iltis, *Gregor Mendel: Leben, Werk und Wirkung* (1924, Eng trans *Life of Mendel*, 1932)

Mendel, Lafayette Benedict 1872–1935
US chemist
Born in Delhi, New York, he was professor at Yale (1897–1935) and did much original work on nutrition, discovering vitamin A (1913) and the function of vitamin C.

Mendeleev, Dmitri Ivanovich 1834–1907
Russian chemist
He was born in Tobolsk, Siberia, and studied at St Petersburg and Heidelberg, Germany, where he collaborated briefly with ROBERT WILHELM BUNSEN and investigated the behaviour of gases, formulating the idea of critical temperature. He was appointed professor at the St Petersburg Technical Institute in 1863 and at the University of St Petersburg in 1866. In 1869 he tabulated the elements in ascending order of their atomic weight and found that chemically similar elements tended to fall into the same columns. Several attempts had already been made to group the elements by their chemical properties and to relate chemical behaviour to atomic weight but Mendeleev's great achievement was to realize that certain elements still had to be discovered and to leave gaps in the table where he predicted they would fall. At first the periodic table was largely rejected by the scientific world, but as each new element that was subsequently discovered fitted into it perfectly, scepticism turned to enthusiasm. However, the underlying reason for the periodicity of the elements remained unexplained until the structure of the atom came to be understood. Mendeleev continued to refine the table for the next 20 years while also continuing his work on gases, studying solutions and taking up aeronautical research (he made a solo ascent in a balloon in 1887). The transuranic element mendelevium (atomic number 101) is named in his honour. 🕮 Daniel Q Posin, *Mendeleyev: The Story of a Great Scientist* (1948)

Mendelsohn, Erich 1887–1953
US architect
Born in Allenstein, Germany (Olszlyn, Poland), he was a leading exponent of functionalism. He designed the Einstein Tower in Potsdam (1919–21) and various factories and department stores. He fled to England in 1933, and designed hospitals. He also designed the Hebrew University at Jerusalem. He emigrated to the USA in 1941, where he designed synagogues and hospitals.

Mendelssohn (-Bartholdy), (Jakob Ludwig) Felix 1809–47
German composer
Born in Hamburg, he made his first public appearance as a pianist at the age of ten. Within the next few years he formed the acquaintance of GOETHE, CARL WEBER and IGNAZ MOSCHELES, and composed his Symphony in C minor (1824) and the B minor Quartet (1824–25). His *Midsummer Night's Dream* overture (1826) was an early success, and a tour of Scotland in the summer of 1829 inspired the *Hebrides* overture (1830) and the 'Scotch' Symphony. He settled in Berlin in 1841 when the King of Prussia asked him to co-found an Academy of Arts, and in 1843 his new music school at Leipzig was opened, with SCHUMANN and the violinist Ferdinand David among his associates. He produced his *Elijah* in Birmingham in 1846, one of ten visits to England. His sister's death in 1847 affected him profoundly, and he never recovered. The grandson of MOSES MENDELSSOHN, his father added the name Bartholdy.

Mendelssohn, Moses 1729–86
German Jewish philosopher and biblical scholar
Born in Dessau, he studied in Berlin and went on to become the partner to a silk manufacturer. He is an important figure in the history of Jewish philosophy and in the Enlightenment. His most important works, which reflect his commitment both to Judaism and rationalism, include *Phädon* (1767), an argument for the immortality of the soul, based on PLATO's *Phaedo*; *Jerusalem* (1783), which advocates Judaism as the religion of reason; and *Morgenstunden* (1785, 'Morning Hours') which argues for the rationality of belief in the existence of God. He was a friend of GOTTHOLD LESSING and the prototype of his *Nathan*. He was the grandfather of FELIX MENDELSSOHN.

Menderes, Adnan 1899–1961
Turkish statesman
He was born near Aydin. Though trained as a lawyer, he became a farmer, then entered politics in 1932, at first in opposition, then with the party in power under KEMAL ATATÜRK. In 1945 he became one of the leaders of the new Democratic Party and was made prime minister when it came to power in 1950. Re-elected in 1954 and 1957, in 1960 he was deposed and superseded by General Cemal Gursel following an army coup. He was put on trial, and hanged.

Mendès, Catulle 1841–1909
French writer
He was born in Bordeaux, of Jewish parentage. One of the Parnassians, a group of French poets advocating an austere and objective poetry, he founded the *Revue fantaisiste* (1859), and later recorded the history of the movement in *La légende du Parnasse contemporain* (1884, 'The Legend of *Le Parnasse contemporain*'). He subsequently turned to Romanticism and wrote poems, novels, dramas and libretti as well as articles and criticism. 🕮 A Bertrand, *Catulle Mendès, une biographie critique* (1908)

Mendes, Sam(uel) Alexander 1965–
English theatre and film director
Born in Reading, Berkshire, he studied at Peterhouse, Cambridge. He began his career as artistic director at the Minerva Studio Theatre, Chichester (1989–92), and later at the Donmar Warehouse, London (1992–2002), where his productions included a revival of *Cabaret* (1994, Broadway run from 1998) and he directed NICOLE KIDMAN in *The Blue Room* (1998). During the 1990s he also worked as a freelance director for the Royal Shakespeare Company and Royal National Theatre in productions such as *Troilus and Cressida* (1990), *The Rise and Fall of Little Voice* (1992) and *The Birthday Party* (1994). In 1999 he made his debut film *American Beauty*, an engaging take on US suburban ennui, which won an Academy Award for Best Director. His subsequent films include *Road to Perdition* (2002) and *Jarhead* (2005). He was appointed a CBE in 2000, and is married to KATE WINSLET. 🕮 Matt Wolf, *Stepping into Freedom: Sam Mendes at the Donmar* (2003)

Mendès-France, Pierre 1907–82
French statesman
Born in Paris, he entered parliament in 1932 as a Radical. In 1941 he made a daring escape from imprisonment in Vichy France and went to England to join the Free French forces. He was Minister for National Economy under DE GAULLE in 1945, then opposed him as a prominent member of the Radical Party, and succeeded M Laniel as prime minister (1954–55). At a troubled period he handled France's foreign affairs with firmness and decision, but his government was defeated on its North African policy, and he resigned in 1955. A firm critic of de Gaulle, he lost his seat in the 1958 election. He returned to the Assembly in 1967, but retired due to ill health in 1973, later giving much attention to Israeli affairs. 🕮 Jean Lacouture, *Pierre Mendès-France* (1981)

Mendoza, Daniel 1764–1836
English boxer
Born in London, he was the first Jewish boxer in Britain to become a champion. Relatively short, he developed 'scientific' defensive tactics such as sidestepping and use of the guard, which he explained in his 1789 treatise *The Art of Boxing*. Such was his skill that, despite his small stature, he managed to become England's heavyweight champion from 1792–95. He made his last public appearance as a boxer in 1820.

Mendoza, Iñigo López de *See* SANTILLANA, IÑIGO LÓPEZ DE MENDOZA, MARQUÉS DE

Menelik II, *originally* **Sahle Miriam** or **Sahle Mariam** 1844–1913
Emperor of Ethiopia
Born in Ankober, Shoa, he became King of Shoa (1865–89) and succeeded John IV as Emperor of Ethiopia (1889). He greatly expanded the Ethiopian empire. He signed the Treaty of Wachile or Uccialli (1889) with the Italians, who interpreted it as giving them a protectorate over Ethiopia. However, Menelik defeated them at the Battle of Adowa (1896), perhaps the greatest success of Africans against Europeans in the Partition of Africa. From c.1906 Menelik suffered strokes, and power passed eventually to his grandson, Lij Iyasu.

Menem, Carlos Saúl 1935–
Argentine statesman
Born in Anillaco, Argentina, the son of Muslim Syrian immigrants, he earned a law degree from Córdoba University in 1958.

A follower of JUAN PERÓN, he was a provincial governor from 1973 and was imprisoned for five years after the military coup in 1976. Elected president in 1989, he addressed Argentina's economic crisis by introducing free-market policies and privatizing state-owned industries. He stabilized the economy and reduced inflation, and was re-elected in 1995, serving until 1999. His attempt to run again in the next election was ruled unconstitutional, although he did run in 2003, withdrawing when he failed to gain an overall majority. In 2001 he was indicted in connection with an arms trading scandal and, although he denied the charges, he moved to Chile. He returned to Argentina in 2004 after warrants for his arrest were cancelled.

Mengistu, Haile Mariam 1941–
Ethiopian soldier and politician
He was born in Addis Ababa and trained at Guenet Military Academy. He took part in the attempted coup against Emperor HAILE SELASSIE in 1960, but was not put on trial, and became one of the leaders of the bloody coup that successfully deposed the emperor in 1974 and later abolished the monarchy. He manipulated himself into the chairmanship of the Provisional Military Administrative Council (Dergue) and became undisputed leader and head of state in 1977. Allying himself with the USSR and modelling himself upon Cuba's FIDEL CASTRO, he sought to create a Socialist state in Ethiopia, while retaining its territorial borders intact. Civilian rule was formally established in 1987, when he became Ethiopia's first president, but mismanagement, drought and civil war weakened his hold on the country and in 1991 he was overthrown by the Ethiopian People's Revolutionary Democratic Front (EPRDF). He resigned and fled to Zimbabwe, where he was offered political asylum and now has permanent residency. His trial *in absentia* in Ethiopia for genocide and war crimes lasted from 1994 until 2006, when he was convicted. He was sentenced to life imprisonment in 2007.

Mengs, Anton Raphael 1728–79
German painter
Born in Aussig in Bohemia, the son of a Danish artist, he eventually settled at Rome, turned Catholic and directed a school of painting. A close friend of JOHANN WINCKELMANN, he became the most famous of the early neoclassical painters. In Madrid (1761–70 and 1773–76) he decorated the dome of the grand salon in the royal palace with the *Apotheosis of the Emperor Trajan*.

Mengzi *See* MENCIUS

Menken, Adah Isaacs, *née* **Adah Bertha Theodore** c.1835–1868
US actress
She was born near New Orleans and appeared on stage in New York in 1859. She later appeared in *Mazeppa* with immense success in Albany (1861), New York, London (1864) and elsewhere. She had many husbands, and many literary friends, including DICKENS. No reports of her acting ability are extant and her reputation rests, apparently, on her stage appearance in *Mazeppa*, in a state of virtual nudity and bound to the back of a wild horse.

Mennin, Peter 1923–83
US composer
Born in Erie, Pennsylvania, he studied at the Eastman College of Music and rapidly established himself as a composer of large-scale works. He composed nine symphonies, including *The Cycle*, for which he wrote the text, concertos, choral and chamber music.

Menninger, Karl Augustus 1893–1990
US psychiatrist
He was born in Topeka, Kansas, where he and his father, Charles Frederick (1862–1953), founded the Menninger Clinic for psychiatric research and therapy in 1920. His brother, William Claire (1899–1966), joined the clinic in 1926, and it soon became one of the major psychiatric centres in the USA. The Menninger Foundation was established in 1941 to fund clinics and sponsor public education in psychiatry.

Menno Simons 1496–1561
Dutch Anabaptist leader, and founder of the Mennonite sect
Born in Friesland, and ordained a Catholic priest (1524), he left the Church after being influenced by the ideas of MARTIN LUTHER (1536). He was made an elder at Groningen (1537), and organized Anabaptist groups in northern Europe that were persecuted by Catholics and Protestants alike. Mainly resident in the USA, the evangelical Mennonite sect named after him practises adult baptism, excommunication, close adherence to the New Testament, restriction of marriage to members of the group, and refusal to hold civic office.

Menon, V(engalil) K(rishnan) Krishna *See* KRISHNA MENON, V(ENGALIL) K(RISHNAN)

Menotti, Gian-Carlo 1911–2007
US composer
Born in Milan, he settled in the USA at the age of 17, achieving international fame with a series of operas that began with *Amelia goes to the Ball*, produced in 1937 at Philadelphia, where he was a student. He writes his own libretti, and his other works, including *The Medium* (1946), *The Consul* (1950, Pulitzer Prize), *Amahl and the Night Visitors* (1951), composed for television performance, *The Saint of Bleecker Street* (1954, Pulitzer Prize), *Maria Golovin* (1958) and *The Most Important Man* (1971) have great theatrical effectiveness, with a musical style derived from a wide variety of models. In 1958 he founded the Festival of Two Worlds in Spoleto, Italy. 🕮 John Gruen, *Menotti: A Biography* (1978)

Menshikov, Aleksandr Danilovich c.1660–1729
Russian field marshal and statesman
Born of poor parents in Moscow, he entered the army, and accompanied PETER I, THE GREAT, in his travels. He played an important part during the war with Sweden (1702–13), and at the capture of Marienburg found and introduced to the tsar the girl who became CATHERINE I. Menshikov lost favour towards the end of Peter's reign, but when Peter died he secured the succession of Catherine, and during her reign and that of her young successor, PETER II, he governed Russia with almost absolute authority. He was about to marry his daughter to the young tsar when the jealousy of the old nobility led to his banishment to Siberia and the confiscation of his estates.

Menshikov, Aleksandr Sergeyevich 1789–1869
Russian general
The great-grandson of ALEKSANDR DANILOVICH MENSHIKOV, he rose to the rank of general in the Napoleonic campaigns of 1812–15. Seriously wounded at Varna in the Turkish campaign of 1828, he was made head of the Russian navy. His overbearing behaviour and incompetent diplomacy as ambassador at Constantinople (Istanbul) contributed greatly to the outbreak of the Crimean War (1854–56). He commanded at Alma and Inkerman, and defended Sebastopol, but in 1855 was recalled because of illness.

Menuhin, Yehudi Menuhin, Baron 1916–99
British violinist
Born in New York, USA, he appeared as a soloist with the San Francisco Symphony Orchestra at the age of seven. In 1932 he recorded ELGAR's Violin Concerto, conducted by the composer, and subsequently appeared all over the world. After 18 months' retirement for study he continued his career as a virtuoso, gaining an international reputation. During World War II he gave concerts to the troops, and after the war settled in England, beginning to conduct in 1957. In the same year, he set up the Gstaad Festival, and in 1963 he founded the Yehudi Menuhin School of Music for musically talented children. Noted also for raising the profile of Indian music in the West, he was awarded an honorary KBE in 1965 and Order of Merit in 1987. He published his autobiography in 1977. He took British citizenship in 1985 and was made a life peer in 1993. His sister Hephzibah (1920–81) was a gifted pianist. 🕮 Robert Magidoff, *Yehudi Menuhin* (1955)

Menzel, Donald Howard 1901–76
US astrophysicist
Born in Florence, Colorado, and educated at the universities of Denver and Princeton, he joined the staff of the Lick Observatory in California and was appointed director of the Harvard College Observatory (1954–66). He did valuable work on planetary atmospheres and on the composition of the Sun.

Menzel, Wolfgang 1798–1873
German critic and historian
Born in Waldenburg, Silesia, he studied at Jena and Bonn, but from 1825 lived mainly in Stuttgart. He edited magazines, and wrote poems, novels, histories of German literature and poetry, a history of the world, literary criticism and polemics.

Menzies, John Ross 1852–1935
Scottish wholesale publisher and distributor
Born in Edinburgh, he joined his father's business in Princes Street, Edinburgh, and with his brother pushed the firm westwards, opening a branch in Glasgow in 1868. This was followed by establishing bookstalls in almost all towns of

significance. He directed the creation of a huge network of railway station bookstalls, a lucrative development that raised the firm to a position second only to W H Smith in size. By the time of his death he had built up Scotland's leading organization in the book, periodical and newspaper retailing and wholesale trade, becoming, in the process, a household name.

Menzies, Sir Robert Gordon 1894–1978
Australian statesman
Born in Jeparit, Victoria, he practised as a barrister before entering politics, becoming a member of the Victoria parliament in 1928. He went to the Federal House of Representatives in 1934, sitting as MP for Kooyang. He was Commonwealth Attorney-General (1935–39), prime minister (1939–41), and leader of the opposition (1943–49), when he again took office as premier of the coalition government. He continued as prime minister, exploiting the factionalism of his Labor opponents, and held office for a record 16 years, during which time Australia's economy grew and prospered. In 1956 he headed the Five Nations Committee which sought to settle the Suez question with GAMAL NASSER. His final years were marked by Australia's entry into the Vietnam War. A powerful orator and declared Anglophile, he succeeded WINSTON CHURCHILL as Lord Warden of the Cinque Ports (1965), and retired from parliament in 1966.

Merbecke, John *See* MARBECK, JOHN

Mercator, Gerardus, *originally* **Gerhard Kremer** 1512–94
Flemish geographer and map-maker
Born in Rupelmonde, Flanders, he graduated at Louvain in philosophy and theology. He studied mathematics, astronomy and engraving, and produced a terrestrial globe (1536) and a map of the Holy Land (1537). In 1544 he was imprisoned for heresy, but released for lack of evidence. In 1552 he settled at Duisburg in Germany, becoming cosmographer to the Duke of Cleves, and produced maps of many parts of Europe, including Great Britain. To aid navigators, in 1569 he introduced a map projection (Mercator's map projection), in which the path of a ship steering on a constant bearing is represented by a straight line on the map; it has been used for nautical charts ever since. In 1585 he published the first part of an 'Atlas' of Europe, said to be the first use of the word to describe a book of maps. It was completed by his son in 1595. On the cover was a drawing of Atlas holding a globe on his shoulders, hence 'atlas' became applied to any book of maps. 🕮 A S Osley, *Mercator* (1969)

Mercator, Nicolaus, *German* **Kaufmann** c.1620–1687
German mathematician and astronomer
As an engineer he planned the fountains at Versailles and as a mathematician he was one of the discoverers of the series for $\log(1+x)$. From 1660 he lived in England.

Mercer, David 1928–80
English dramatist
He was born in Wakefield, Yorkshire, and after studying painting at King's College, Newcastle, he moved to Europe and began to write. His first television play, *Where the Difference Begins* (1961), signalled his interest in fusing the personal and the political in work that challenged the conventions of television drama. Further plays, like *A Climate of Fear* (1962), *A Suitable Case for Treatment* (1962) and *In Two Minds* (1967), explored his fascination with mental health, psychiatry and his struggle to reconcile a belief in socialism with the repression he saw in Eastern Europe. His stage work includes *Ride A Cock Horse* (1965), *Flint* (1970) and *Cousin Vladimir* (1978). His film scripts include *Morgan* (1965) and *Providence* (1977). He continued to address issues of personal alienation and the class system in later television plays like *Huggy Bear* (1976), *The Ragazza* (1978) and *Rod of Iron* (1980). 🕮 Paul Madden (ed), *Where the Difference Began* (1981)

Mercer, John 1791–1866
English dye chemist
He was born in Blackburn, Lancashire. Self-educated, he became a partner in a dye-works at the age of 16 and was subsequently employed in the colour shop of Fort Brothers printworks at Oakenshaw. In 1813 he discovered how to make a good orange dye for calico, using antimony, and he went on to develop or improve a number of other dyes. He became a partner in Fort Brothers and when the printworks was sold profitably, he devoted himself to research. He is chiefly known for inventing the process, named 'mercerization', which gives cotton a lustre resembling silk. It was patented in 1850, and in 1852 Mercer was elected FRS.

Merchant, Ismail, *originally* **Ismail Noormohamed Abdul Rehman** 1936–2005
Indian film producer
Born in Bombay (Mumbai), he studied there at St Xavier's College and earned a master's degree in business administration at New York University. He co-produced the short film *The Creation of Woman* (1960) and in 1961 teamed with director JAMES IVORY to make a series of feature films reflecting aspects of Indian culture and the legacy of colonial rule. These include *Shakespeare Wallah* (1965), *Bombay Talkie* (1970) and *The Autobiography of a Princess* (1975). One of the most successful and enduring independent production units, Merchant–Ivory became synonymous with sensitive literary adaptations and costume dramas like *A Room With a View* (1985), *Howards End* (1992) and *The Remains of the Day* (1993). He collaborated with RUTH PRAWER JHABVALA on these and other films, including later works such as *Jefferson in Paris* (1995) and *The Golden Bowl* (2000). Merchant also published cookbooks and an autobiography, *My Passage from India* (2002), and directed feature films, including *In Custody* (1993) and *The Proprietor* (1996).

Merckx, Eddy, *known as* **the Cannibal** 1945–
Belgian racing cyclist
He was born in Woluwe St Pierre, near Brussels. In the 1969 Tour de France he won the major prizes in all three sections: overall, points classification and King of the Mountains. He won the Tour de France five times (1969–72, and 1974), a total only surpassed by LANCE ARMSTRONG's seven wins. He also won the Tour of Italy five times, and all the major classics, including the Milan–San Remo race seven times. He was the world professional road race champion three times and finished his career in 1978 with 525 wins from 1,582 road races.

Mercouri, Melina, *originally* **Anna Amalia Mercouri** 1923–94
Greek film actress and politician
Born in Athens, she began her film career in 1955, and found fame in 1960 with *Never on Sunday*. Always politically involved, she was exiled from Greece (1967–74), so she played in British and US productions, such as *Topkapi* (1964) and *Gaily, Gaily* (1969). She returned to be elected to parliament in 1977, and was Minister of Culture and Sciences (1981–85) and of Culture, Youth, and Sports (1985–90).

Mercury, Freddie, *originally* **Farookh Bulsara** 1946–92
British pop singer
Born in Zanzibar, he became a naturalized British citizen. With guitarist Brian May (1947–), bassist John Deacon (1951–) and drummer Roger Taylor (originally Roger Meddows-Taylor, 1949–), he formed the group Queen. A darling of the fans yet seldom of the critics, Mercury developed an increasingly camp stage presence (ermine robes and crown, tight trousers) that obscured the forcefulness of his vocal delivery. The formula was successful first in the song 'Seven Seas of Rhye' on their second album *Queen II* (1974), and then on the number-two hit 'Killer Queen' (1974). 'Bohemian Rhapsody' (1975), a bizarre six-minute epic embracing opera, heavy metal and four-part harmony, has a permanent place in rock history, and started the pop video boom. Later work includes 'We Are the Champions' (1977) and 'Radio Gaga' (1984). Mercury disappeared from view in the early 1990s, eventually succumbing to AIDS.

Meredith, George 1828–1909
English novelist
Born in Portsmouth, Hampshire, he was educated privately in Germany. In London, after being articled to a solicitor, he turned to journalism and letters, his first venture appearing in *Chambers's Journal* in 1849, the year in which he married Mary Ellen Nicolls, daughter of THOMAS LOVE PEACOCK. This disastrous marriage gave him an insight into relations between the sexes, which appear as largely in his work as his other great interest, natural selection as Nature's way of perfecting man. His writing did not bring him much financial reward and he had to rely on his articles in *The Fortnightly* and his work as a reader in the publishing house of Chapman and Hall. His prose works started with a burlesque Oriental fantasy, *The Shaving of Shagpat* (1855), followed in 1859 by *The Ordeal of Richard Feverel*, but he did not achieve general popularity as a novelist until *Diana of the Crossways* appeared in 1885. Other popular titles include *Evan Harrington* (1860), *Harry Richmond* (1871), and best of all, *Beauchamp's Career* (1875), which poses the question of class and party and is well constructed and clearly written. This cannot be said of his later major novels, *The Egoist* (1879), a study of refined selfishness, and *The Amazing Marriage* (1895). These two powerful works are marred by the artificiality and forced wit which occurs in so much of his poetry. His main

poetic work is *Modern Love* (1862), a novelette in pseudo-sonnet sequence form, based partly on his first marriage. *Poems and Lyrics of the Joy of Earth* (1883) again discussed his master themes – the 'reading of earth' and the sex duel. *A Reading of Life* (1901) adds little to the record. The modern revaluation of the Victorians has enhanced the fame of this very cerebral poet. 🕮 L Stevenson, *The Ordeal of Meredith* (1954)

Meredith, James Howard 1933–
US civil rights advocate
Born in Kosciusko, Mississippi, he served in the air force (1951–60) and began his undergraduate studies at Jackson State College, a black institution. After being rejected by the University of Mississippi, which had admitted only whites during its 114-year history, he filed a lawsuit against them with the aid of the NAACP (National Association for the Advancement of Colored People) and won admission for his senior year in the fall of 1962. His appearance on campus provoked rioting, but he completed the year under federal guard and became the university's first African-American graduate in 1963. He wrote about his student experiences in *Three Years in Mississippi* (1966). In 1989, he joined the staff of right-wing senator JESSE HELMS.

Meredith, Owen *See* LYTTON, (EDWARD) ROBERT BULWER-LYTTON, 1ST EARL OF

Merezhkovsky, Dmitri Sergeyevich 1865–1941
Russian novelist, critic and poet
He was born in St Petersburg, and studied philology and history at the university there before turning to writing. He wrote a collection of poetry (1888), a historical trilogy *Khristos i Antikhrist* (1896–1905, 'Christ and Antichrist') and books on TOLSTOY, IBSEN, and NIKOLAI GOGOL. He opposed the Revolution in 1917 and fled to Paris in 1919, where he continued to write historical novels, including one on Jesus (1932–33) and another on DANTE (1939). His wife was ZINAIDA GIPPIUS. 🕮 C Bedford, *Dmitri Sergeyevich Merezhkovski and the Silver Age* (1975)

Mergenthaler, Ottmar 1854–99
US inventor
Born in Hachtel, Germany, he was a watchmaker's apprentice at the age of 14 and attended technical school in the evenings. He went to the USA in 1872 and became a US citizen in 1878. He invented the Linotype typesetting machine (patented in 1884).

Merikanto, Aarre 1893–1958
Finnish composer
Born in Helsinki, he was the son of the notable song-composer Oskar Merikanto (1868–1924). He studied in Helsinki, with MAX REGER in Leipzig, and in Moscow (where ALEKSANDR SCRIABIN's music influenced him). His compositions of the 1920s display great individuality, but they were largely unrecognized in his lifetime. His major work, the opera *Juha* (1922), was premiered only in 1963. From 1936 till his death he was an influential teacher at the Sibelius Academy.

Mérimée, Prosper 1803–70
French novelist
Born in Paris, the son of a painter, he studied law, visited Spain in 1830, and held posts under the ministries of the Navy, Commerce and the Interior. He was appointed Inspector-General of historical remains in France in 1833, and became a senator in 1853. He wrote novels, short stories, archaeological and historical dissertations, and travel stories, all of which display exact learning, keen observation, real humour, and an exquisite style. Among his novels are *Colomba* (1841, Eng trans 1856), *L'Abbé Aubain* (1846, Eng trans *The Abbé Aubain*, 1903), *Carmen* (1847, Eng trans 1878), *Arsène Guillot* (1852) and *La Chambre bleue* (1866, 'The Blue Room'). His letters include the famous *Lettres à une inconnue* (1873, 'Letters to an Unknown Woman'), the *Lettres à une autre inconnue* (1875, 'Letters to Another Unknown Woman') and the letters to the bibliographer ANTHONY PANIZZI (1881). He also wrote some plays. His last years were clouded by ill health and melancholy, and the downfall of the Second Empire hastened his death. 🕮 P Léon, *Mérimée et son temps* (1962)

Merkel, Angela Dorothea, *née* **Kasner** 1954–
German politician
Born in Hamburg, she grew up in her father's Lutheran parish in East Germany. She gained a PhD in physics from the University of Leipzig in 1978, then worked at the Central Institute for Physical Chemistry. In 1989 she became involved in the democracy movement. After the fall of the Berlin Wall, she joined the Christian Democratic Union (CDU) in 1990 and became a minister in HELMUT KOHL's government. In 2000 she was elected party leader, and five years later she became Germany's first woman chancellor, the youngest to hold the post since 1945 and the first East German to lead the reunified country.

Merle, Jean Henri d'Aubigné 1794–1872
Swiss historian
Born in Eaux-Vives, near Geneva, he studied at Berlin under the German historian and theologian Johann Neander (1789–1850), and in 1818 became pastor of the French Protestant church in Hamburg. In 1823 he was appointed court preacher at Brussels. Returning to Geneva, he took part in the institution of the new Evangelical Church, and held its chair of church history until his sudden death. His works include *Histoire de la Réformation du XVIe siècle* (1835–53), *Germany, England and Scotland* (1848), a vindication of CROMWELL (1848), *Trois siècles de lutte en Écosse* (1849) and *Histoire de la Réformation en Europe au temps de Calvin* (1863–78).

Merleau-Ponty, Maurice 1908–61
French phenomenological philosopher
Born in Rochefort-sur-Mer, Charente-Maritime, he studied in Paris, taught in various lycées, served as an army officer in World War II, and then held professorships at Lyons (1948) and the Sorbonne, Paris (from 1949). With JEAN-PAUL SARTRE and SIMONE DE BEAUVOIR he helped found the journal *Les Temps modernes* (1945), and he travelled with Sartre in the Communist Party during the early post-war years, becoming disillusioned and more detached after the Korean War. His philosophical works include *La Structure du comportement* (1942, 'The Structure of Behaviour') and *Phénoménologie de la perception* (1945, 'The Phenomenology of Perception'). They investigate the nature of consciousness, and reject the extremes of both behaviouristic psychology and subjectivist accounts; the world is neither wholly 'given' nor wholly 'constructed' for the perceiving subject, but is essentially ambiguous and enigmatic. 🕮 Albert Rabil, *Merleau-Ponty: Existentialist of the Social World* (1967)

Merman, Ethel Agnes, *née* **Zimmerman** 1909–84
US actress and singer
Born in Astoria, New York, she had no formal musical training, but her powerful, brassy voice and energy as a performer won her immediate success when she made her Broadway debut in GEORGE GERSHWIN's *Girl Crazy* in 1930, and she was a musical comedy star for the next three decades. She appeared in several COLE PORTER shows, including *Anything Goes* (1934), and *Du Barry Was a Lady* (1939). She also starred in *Annie Get Your Gun* (1946), introducing the song 'There's No Business Like Show Business', which became her trademark, and won praise as the indomitable stage mother in *Gypsy* (1959).

Merovech or **Merovius** 5th century AD
Frankish ruler
The grandfather of CLOVIS, he fought against ATTILA the Hun and gave his name to the Merovingian dynasty.

Merovius *See* MEROVECH

Merriam, Clinton Hart 1855–1942
US naturalist, zoologist and conservationist
Born in New York City, he was a physician by training, but became interested in natural history and travelled with the Hayden Geological Surveys (1872–76). From 1885 to 1910 he was the first chief of the Division of Economic Ornithology and Mammology (later renamed the Bureau of Biological Survey) in the Department of Agriculture. He is best known for devising a scheme of distinct life zones based upon temperature differences, which is described in *Life Zones and Crop Zones of the United States* (1898). He latterly joined the staff of the Smithsonian Institution (1919–37) and collected ethnographic data on Native American tribes.

Merrick, Joseph Carey 1862–90
Englishman known as 'the Elephant Man'
Born in Leicester, he began at the age of five to develop the disease now thought to be the very rare Proteus syndrome, which caused irregular skin growths on much of his body, bone deformation and grotesque enlargement of the head. He entered a workhouse aged 17 and in 1883 joined a freak show, from which he was rescued by the surgeon FREDERICK TREVES and given a place at the London Hospital. He died of accidental suffocation aged 27. The film *The Elephant Man*, based on his life, appeared in 1980. 🕮 Michael Howell and Peter Ford, *The True History of the Elephant Man* (1980)

Merrifield, (Robert) Bruce 1921–2006
US chemist and Nobel Prize winner
Born in Fort Worth, Texas, he obtained both his BA (1943) and PhD (1949) from the University of California at Los Angeles. He joined the Rockefeller Institute for Medical Research in 1949, and was appointed assistant professor at Rockefeller University in New York in 1957, full professor in 1966 and John D Rockefeller, Jnr Professor in 1984. He devised (1959–62) the important 'solid-phase' method for synthesizing peptides and proteins from amino acids. This process has now been automated and computer controlled, allowing the ready synthesis of small quantities of quite large proteins. He was awarded the Nobel Prize in chemistry for this work in 1984. He published his autobiography, *Life During a Golden Age of Peptide Chemistry*, in 1993.

Merrill, James Ingram 1926–95
US poet
Born into the upper class in New York (his father was a partner in a wealthy brokerage firm), he was raised in Greenwich Village and attended Amherst College. Though he wrote two plays and two novels, he is best known for his poetry – metrically inventive meditations on memory and lost time, in which his own urbane and witty voice can be distinctly heard. His later work reflects his sometimes playful, sometimes genuine interest in the occult, which led him to use a Ouija board to communicate with the poets of the past. His collections include *Nights and Days* (1966), *Divine Comedies* (1976, Pulitzer Prize), and *The Changing Light at Sandover* (1982, revised 1992), an epic poem in three parts which records his interest in the spirit world. His book of memoirs, *A Different Person*, was published in 1993.

Merrill, Stuart Fitzrandolph 1863–1915
US Symbolist poet
Born in Hempstead, Long Island, New York, he was educated in Paris, where he lived from 1889. His French poems *Les gammes* (1895), *Les quatre saisons* (1900), and others developed the musical conception of poetry, and made full use of alliteration. *Une voix dans la Foule* (1909) espouses a strongly democratic sympathy which is unmistakably American. 🕮 M L Henry, *Stuart Merrill* (1927)

Merriman, Bryan, *English name of* **Bryan Mac Giolla Meidre** 1747–1805
Irish Gaelic poet
Born in Ennistymon, County Clare, he became a schoolteacher and small farmer in Feakle, later settling in Limerick as a mathematics teacher. His reputation depends on a 1,000-line mock-heroic epic, traditional in its use of dream-vision, but satirical and feminist in content: *Cúirt an Mheáin Oidhche* (c.1786, Eng trans *The Midnight Court* by FRANK O'CONNOR in the *Penguin Book of Irish Verse*, 1970). It is an attack on Irish Catholic puritanism, greatly praised by O'Connor, one of its many translators. The poem was banned in all English translations after Irish independence, but the Irish language itself was deemed incapable of being a corrupting influence. Liberal Irish intellectuals have established an annual Merriman Summer School, convening in August in Clare.

Merritt, William H 1793–1862
Canadian entrepreneur
He built the Welland Canal, bypassing the Niagara cataract, to provide a major route for exports and imports into the American–Canadian interior. The canal was completed by 1829 but essential improvements were not completed until 1848, when the US railways provided a satisfactory alternative which Canadians were ready to use. Merritt was also one of the foremost proponents of reciprocity.

Mersenne, Marin 1588–1648
French mathematician and scientist
Born in Oize, Maine, he became a Minim Friar in 1611, and lived in Paris. Devoting himself to science, he corresponded with all the leading scientists of his day including DESCARTES, PIERRE DE FERMAT, PASCAL and THOMAS HOBBES, acting as a clearing house for scientific information. He experimented with the pendulum and found the law relating its length and period of oscillation, studied the acoustics of vibrating strings and organ pipes and measured the speed of sound. He also wrote on music, mathematics, optics and philosophy.

Merton, Robert C 1944–
US economist and Nobel Prize winner
Born in New York City, he was educated at Columbia University, at the California Institute of Technology and at the Massachusetts Institute of Technology, where he became an instructor in economics in 1969. He moved to Harvard in 1988, becoming University Professor there in 1998. He shared the 1997 Nobel Prize in economics with MYRON S SCHOLES for their work in developing a formula to determine the value of stock options and other derivatives.

Merton, Robert King 1910–2003
US sociologist
Born in Philadelphia, he was educated at Temple and Harvard universities. He taught at Harvard (1934–39) and Tulane University (1939–41), before joining the department of sociology at Columbia University (1941–79). He was also associate director of the Bureau of Applied Social Research, collaborating with PAUL LAZARSFELD. His work emphasized the connections between theory and empirical evidence, and he is regarded as the founder of the sociology of science in its modern form. His works include *Social Theory and Social Structure* (1949), *On Theoretical Sociology* (1967), *Science, Technology and Society in Seventeenth-Century England* (1938, 1970), *The Sociology of Science* (1973) and *The Sociology of Science in Europe* (1977). He was awarded the National Medal of Science in 1994.

Merton, Thomas 1915–68
US Cistercian monk
Born in Prades, France, of a New Zealand father and a US mother, he studied and taught English at Columbia, but in 1938 he became a convert to Roman Catholicism and in 1941 joined the Trappist order at Our Lady of Gethsemane Abbey, Kentucky. His bestselling autobiography, *The Seven Storey Mountain* (1946), prompted many to become monks, but Merton himself was to discover intense tensions between his hermitic inclinations and community living. However, ways were found for him to follow his vocation and at the same time keep up a voluminous correspondence and write many books, ranging from personal journals and poetry to social criticism, and some of the best popular books on Zen Buddhism. As a poet he is respected as a minor practitioner in the tradition of THOMAS TRAHERNE and GERARD MANLEY HOPKINS. He was electrocuted in an accident.

Merton, Walter de d.1277
English prelate
Born probably in Surrey, he founded Merton College, Oxford (1264), the prototype of the collegiate system in English universities. He was Bishop of Rochester from 1274.

Mesdag, Hendrik Willem 1831–1915
Dutch marine painter
Born in Groningen, he settled at The Hague, where his personal collection is housed in the Mesdag Museum.

Meselson, Matthew Stanley 1930–
US molecular biologist
Born in Denver, Colorado, he studied chemistry at the California Institute of Technology (Caltech) and was professor of biology at Harvard from 1964. He is currently Thomas Dudley Cabot Professor of the Natural Sciences there. With F W Stahl in 1957 he carried out some ingenious experiments which both verified JAMES DEWEY WATSON and FRANCIS CRICK's ideas on the way the double helix of the DNA molecule carries genetic information, and gave new information on the details of replication and recombination. His later research focuses on sexual reproduction in evolution, notably by studying microscopic aquatic animals called bdelloids, which appear to reproduce without sex and comprise only females. He has also been an active adviser since 1963 on chemical and biological weapons disarmament. In 2004 he was awarded the Lasker Prize for special achievement in medical science.

Mesić, Stipe (Stjepan) 1934–
Croatian politician
Born in Orahovica, Yugoslavia, he studied law at Zagreb University before returning to his home town and becoming mayor. He was imprisoned in 1971 as a counter-revolutionary and was a political outcast until 1989, when he became Secretary of the nationalist Croatian Democratic Union (HDZ). He served as the last president of the Yugoslav Federation (1990–91) and on the creation of independent Croatia became president of the parliament, but subsequently left the HDZ and joined the Croatian National Party (HNS) in 1997. In 1999 the HNS defeated the HDZ and Mesić became president of Croatia, promising to fight corruption and integrate Croatia into Europe and NATO. He was re-elected in 2005.

Mesmer, Franz Anton 1734–1815
Austrian physician and founder of mesmerism
Born near Constance, he studied medicine at Vienna, and about 1772 claimed that there exists a power, which he called 'magnetism', that could be used to cure diseases. His treatment, activated by a magnetized object, aimed to facilitate the flow of an invisible fluid around the body; known as 'mesmerism', it was the forerunner of hypnotism. In 1778 he was accused of fraud and went to Paris, where he created a sensation. However, in 1785 a learned commission appointed by King LOUIS XVI reported unfavourably, and he retired into obscurity in Switzerland. 🕮 Vincent Buranelli, *The Wizard From Vienna* (1976)

Messager, André Charles Prosper 1853–1929
French composer
Born in Montluçon, he composed largely operettas, of which *La Basoche* (1890) was his best. His works also, however, include several ballets and piano pieces. He was artistic director of Covent Garden Theatre, London (1901–07) and director of the Opéra Comique, Paris (1898–1903, 1919–20).

Messalina, Valeria c.25–c.48 AD
Roman matron
She was the third wife of the Emperor CLAUDIUS I, whom she married at the age of 14. She bore him two children, Octavia (the wife of NERO) and BRITANNICUS. Her name became a byword for avarice, lust and cruelty, to which only Claudius was blind. In the emperor's absence she publicly married one of her favourites, the consul-designate Silius, and the emperor had her executed.

Messerer, Asaf Mikhailovich 1903–92
Russian dancer, teacher and choreographer
Born in Vilnius, into a ballet family, he studied with MIKHAIL MORDKIN and Gorsky at the Bolshoi Ballet School, graduating in 1921 to join the company. A versatile principal, he retired from dancing in 1954 to concentrate on teaching, the element of his work for which he is best known. His choreography includes *Football Player* (1924) and *Ballet School* (1962).

Messerschmitt, Willy (Wilhelm) 1898–1978
German aviation designer and engineer
Born in Frankfurt am Main, he studied at the Munich Institute of Technology, and in 1923 established the Messerschmitt aircraft manufacturing works. His ME-109 set a world speed record in 1939, and during World War II he supplied the Luftwaffe with its foremost types of combat aircraft. In 1944 he produced the ME-262 fighter, the first jetplane flown in combat. From 1955 he continued his activities with the revived Lufthansa and later also entered the car industry. 🕮 Anthony Pritchard, *Messerschmitt* (1974)

Messiaen, Olivier Eugène Prosper Charles 1908–92
French composer and organist
Born in Avignon, he studied under MARCEL DUPRÉ and PAUL DUKAS, and taught at the Schola Cantorum (from 1936). In 1941 he became professor of harmony at the Paris Conservatoire. He composed extensively for organ, orchestra, voice and piano, and made frequent use of new instruments such as the Ondes Martenot. He is best known outside France for the two-and-a-half-hour piano work, *Vingt regards sur l'enfant Jésus* (1944, '20 Looks at the Child Jesus'), and the *Turangalila* Symphony (1946–48), which makes use of Indian themes and rhythms. His music, which evolved new methods of pitch organization and intricate mathematical rhythmic systems, was often inspired by religious mysticism. His interest in birdsong provided the stimulus for several works including the *Catalogue d'oiseaux* for piano (1956–58). Other works include an oratorio *La Transfiguration de Notre Seigneur Jésus-Christ* (1965–69), an opera *St François d'Assise* (1975–83) and *Technique de mon langage musical* (2 vols, 1944, Eng trans 1957).

Messier, Charles 1730–1817
French astronomer
Born in Badonville, Lorraine, he began his life as an astronomer in 1751 in Paris. He observed the return of Halley's comet in 1759 and from that time onwards was an avid searcher of comets, discovering independently a total of 13 of them. He mapped the faint unmoving nebulous objects in the sky which he could discard in comet-searching, and drew up a catalogue of 103 entries (1781) by which his name is perpetuated in astronomy. Messier's objects, known by the prefix M and their catalogue number, comprise nebulae, galaxies and star clusters. The 'ferret of comets', as he was nicknamed by LOUIS XV, was elected to the Royal Society (1764) and the Paris Academy of Sciences (1770).

Messmer, Otto 1894–1985
US animator
Born in New Jersey, he contributed joke cartoons to *Life* magazine (1914) and entered animation in 1916, scripting and animating many films including the *Charlie Chaplin* cartoons (1917). In 1920 he created *Feline Follies*, the first Felix the Cat cartoon, and Felix was the first cartoon film star to win international fame. One of the many spin-offs was a comic strip for newspaper syndication (1923) which he drew in his spare time. Felix failed to make the transition to sound, but Messmer continued the strip until 1954.

Messner, Reinhold 1944–
Austrian mountaineer
Born in the South Tyrol, he became one of the world's foremost solo climbers. He pursued the goal of becoming the first person to climb all the world's 14 peaks over 8,000 metres, and realized his dream in 1986, but not without cost. In 1970 he had joined an expedition to Nanga Parbat, in northern Pakistan, where his brother died in an avalanche. In 1978 Messner and his partner Peter Habelar became the first people to climb Everest without bottled oxygen and Messner later climbed Everest alone by the North Col route without oxygen or support. He also made the first crossing of Antarctica on foot since Sir ERNEST SHACKLETON. He has published several books and was a member of the European Parliament for the Italian Green Party between 1999 and 2004.

Meštrović, Ivan 1883–1962
US sculptor
He was born in Vrpolje, Slavonia (in Austria-Hungary, later part of Yugoslavia). A shepherd boy, he was taught stone-cutting and woodcarving by his father, later studying in Vienna and Paris, where he became a friend of AUGUSTE RODIN. He designed the national temple at Kossovo (1907–12), and the colossal *Monument to the Unknown Soldier* in Belgrade (1934). He lived in England during World War II and executed many portrait busts, including that of Sir THOMAS BEECHAM. After the war he emigrated to the USA, and from 1955 was professor of sculpture at the University of Notre Dame, Indiana. His work is naturalistic, emotionally intense and is characterized by an impressive simplicity.

Mesurier, John Le *See* LE MESURIER, JOHN

Metastasio, Pietro, *originally* **Pietro (Armando Domenico) Trapassi** 1698–1782
Italian poet
Born in Rome, he had a gift for versifying which gained him a patron who educated him and left him a fortune (1718). He acquired his reputation with his masque, *The Garden of Hesperides* (1722), wrote the libretti for 27 operas, including MOZART's *La Clemenza di Tito* (libretto Eng trans *The Clemency of Titus*, 1828), and became court poet at Vienna in 1729. 🕮 C Burney, *Life and Letters of Metastasio* (1796)

Metaxas, Yanni 1870–1941
Greek politician
He was born in Ithaka. He fought in the Thessalian campaign against the Turks in 1897, and helped reorganize the Greek army before the 1912–13 Balkan Wars, when he became Chief of the General Staff. A Royalist rival of the Republican ELEUTHERIOS VENIZELOS, he opposed Greek intervention in World War I. On King CONSTANTINE I's fall he fled to Italy, but returned with him in 1921. In 1923 he founded the Party of Free Opinion. In 1935 he became deputy prime minister after the failure of the Venizelist coup, and in April 1936 became prime minister, in August establishing an authoritarian government with a Cabinet of specialist and retired service officers. His work of reorganizing Greece economically and militarily bore fruit in the tenacious Greek resistance to the Italian invasion of 1940–41.

Metcalf, John, *known as* **Blind Jack of Knaresborough** 1717–1810
English engineer
He lost his sight at the age of six, but became an outstanding athlete and horseman. During the 1745 Jacobite rising he fought at Falkirk and Culloden (1746), set up a stagecoach between York and Knaresborough, and from 1765 constructed 185 miles (296km) of road and numerous bridges in Lancashire and Yorkshire.

Metchnikoff, Elie, *Russian* **Ilya Ilyich Mechnikov** 1845–1916
Russian embryologist, immunologist and Nobel Prize winner
Born in Ivanovka, Ukraine, he graduated from the University of Kharkov in 1864, and studied invertebrate and fish embryology at several European centres. After spells of teaching

and research at the universities of St Petersburg and Odessa, he took a research post at the University of Messina, Italy, where he began his immunological studies. Studying how mobile cells in starfish larvae attack foreign bodies, he called these cells phagocytes, and hypothesized that their role in vertebrate blood is to fight invasion by bacteria. In 1886 he became director of the Bacteriological Institute in Odessa, where he studied the action of phagocytes in animal infections, and in 1888 LOUIS PASTEUR offered him a post at the Pasteur Institute in Paris. As the role of phagocytes became accepted, Metchnikoff turned to other problems, such as investigating aging and death. He was awarded the 1908 Nobel Prize in physiology or medicine jointly with PAUL EHRLICH.

Metford, William Ellis 1824–99
English engineer and inventor
He was born in Taunton, Somerset. Having invented an explosive rifle bullet which was outlawed by the St Petersburg Convention of 1869, he turned to the design of a breech-loading rifle (1871). It was adapted by JAMES PARIS LEE as the 'Lee–Metford' rifle, and adopted by the British War Office in 1888.

Methuen, Sir Algernon Methuen Marshall, *originally* **Algernon Stedman** 1856–1924
English publisher
He was born in London. A teacher of Classics and French (1880–95), he began publishing as a sideline with Methuen & Co in 1889 to market his own textbooks. His first publishing success was RUDYARD KIPLING's *Barrack-Room Ballads* (1892), and, amongst others, he published works of HILAIRE BELLOC, G K CHESTERTON, JOSEPH CONRAD, JOHN MASEFIELD, ROBERT LOUIS STEVENSON and OSCAR WILDE.

Métraux, Albert 1902–63
US cultural anthropologist
Born in Lausanne, Switzerland, he spent much of his childhood in Mendoza, Argentina, returning to Europe to complete his education in Lausanne, Paris and Gothenburg. In 1928 he founded and directed the Institute of Ethnology at the University of Tucumán, Argentina, relinquishing his post in 1934 to join a Franco-Belgian expedition to Easter Island. In 1938–39 and 1940–41 he was visiting professor at Yale, and in the intervening year conducted field research in Argentina and Bolivia. After field studies in Haiti in 1941, he joined the Bureau of American Ethnology, Smithsonian Institution (1941–45), returning to Europe as part of the US Bombing Survey to investigate German responses to military defeat. From 1947 to 1962 he worked under the auspices of UNESCO, taking part in the Hylean Amazon project (1947–48), an education survey in Haiti (1948–50) and migration studies of the Aymara and Quechua Indians in Peru and Bolivia (1954). Métraux was the foremost expert on South American Indians of his day, a prolific scholar with around 250 titles to his credit, and an exemplary figure in the fields of historical ethnology and applied anthropology. His books include *Ethnology of Easter Island* (1940), *The Native Tribes of Eastern Bolivia and Western Mato Grosso* (1942) and *Voodoo in Haiti* (1959).

Metsu, Gabriel 1630–67
Dutch painter
Born in Leyden, he settled in Amsterdam in 1650, and is known for his religious and domestic genre works.

Metternich, Prince Clemens Lothar Wenzel 1773–1859
Austrian politician
Born in Coblenz, Germany, he studied at Strasbourg and Mainz, was attached to the Austrian embassy at The Hague, and at 28 was Austrian Minister at Dresden, two years later at Berlin, and in 1805 (after Austerlitz) at Paris. In 1807 he concluded the Treaty of Fontainebleau. In 1809 he was appointed Austrian Foreign Minister, and as such negotiated the marriage between NAPOLEON I and MARIE LOUISE. In 1812–13 he maintained a temporizing policy at first, but at last declared war against France. The Grand Alliance was signed at Teplitz, and he was made a Prince of the Empire. He took a prominent part at the Congress of Vienna, rearranging a German confederation and guarding Austria's interests in Italy. As the main supporter of autocracy and police despotism at home and abroad he was largely responsible for the tension that led to the upheaval of 1848. The French revolution of that year, which overturned for a time half the thrones of Europe, was felt in Vienna, and the government fell. Metternich fled to England, and in 1851 retired to his castle of Johannesberg on the Rhine. He was a brilliant diplomat and a man of iron nerve and will. 🕮 Alan W Palmer, *Metternich* (1972)

Mettrie, Julien Offray de la *See* LA METTRIE, JULIEN OFFROY DE

Meung, Jean de, *also called* **Jean Clopinel** c.1250–1305
French poet and satirist
He flourished in Paris under PHILIP IV, THE FAIR. He translated many books into French, and left a witty *Testament*. His major work is his lengthy continuation (18,000 lines) of the *Roman de la Rose* by GUILLAUME DE LORRIS, which substituted for allegory his own satirical pictures of actual life and an encyclopedic discussion of contemporary learning.

Mew, Charlotte Mary 1869–1928
English poet and short-story writer
Born in London, she was essentially self-educated and her work largely concerned the problems of women in a society that provided few reliable terms of reference or role models for female individuality. Her most famous poem is 'The Farmer's Bride' (1915), a vigorous narrative about an emotionally restricted life. Her reputation has been sustained by the critical support of those such as WALTER DE LA MARE and THOMAS HARDY, who predeceased her only briefly; the circumstances of Mew's suicide, following the death of her sister, has fostered a certain romantic cult around her. In the late 1970s, she was rediscovered by the feminist movement; her collected verse and prose, reissued by Virago Press, made a significant impact on a revisionist awareness of post-Victorian social and cultural attitudes. 🕮 P Fitzgerald, *Charlotte Mew and her Friends* (1984)

Meyer, Adolf 1866–1950
US psychiatrist
He was born in Niederweingen, Switzerland. After medical and psychiatric training in Zurich and elsewhere, he emigrated to the USA in 1892, where he held posts in a number of universities and psychiatric hospitals, especially Johns Hopkins Medical School (1910–41). He was an eclectic at a time when psychoanalytical concepts dominated US psychiatry. Through his notion of 'psychobiology' he sought to integrate psychiatry and medicine, seeing mental disorder as the consequence of unsuccessful adjustment patterns. He also tried to improve the standards of patient record-keeping and long-term follow-up care in psychiatry, and lent his considerable prestige to the mental hygiene movement of Clifford Beers. His *Collected Papers* (1950–52) were published after his death. 🕮 Annemarie Jaeggi, *Adolf Meyer, der zweite Mann* (1994)

Meyer, Conrad Ferdinand 1825–98
Swiss poet and novelist
He was born in Zurich and studied in Lausanne, Paris and Italy, but due to severe depression, spent time in an asylum throughout his adult life. After a period during which he concentrated mainly on ballads and verse romances, he composed the epic poem *Huttens Letzte Tage* (1871, 'Hutten's Final Days') and a number of historical novels such as *Jürg Jenatsch* (1876) and *Der Heilige* (1880, 'The Saint'), in which he excels in subtle and intricate psychological situations and in complex characters. 🕮 H Mayne, *Conrad Ferdinand Meyer und sein Werk* (1925)

Meyer, Julius Lothar von 1830–95
German chemist
Born in Varel, Oldenburg, he qualified in medicine at Zurich and subsequently studied and taught at several German universities. In 1876 he was appointed the first professor of chemistry at Tübingen. He studied the physiology of respiration and by 1857 had recognized that oxygen combines chemically with haemoglobin in the blood. Independently of DMITRI MENDELEEV, he examined the relationship between the chemical reactivities of the elements and their atomic weights. In 1864 he showed that atomic volume is a function of atomic weight. Meyer was also a considerable organic chemist and made the revolutionary suggestion that the carbon atoms in benzene might be in the form of a ring; he missed only the fact that the ring contains double bonds.

Meyer, Viktor 1848–97
German chemist
Born in Berlin, he studied under ROBERT BUNSEN in Heidelberg and Berlin, and was professor successively at Zurich, Göttingen and Heidelberg. He discovered a method for determining vapour densities and the apparatus he designed became standard laboratory equipment. He developed a method of synthesizing aromatic acids and investigated the nitroparaffins and their derivatives. He also discovered several new types of organic nitrogen compounds. He discovered oximes, studied their isomerism and introduced the term 'stereochemistry' for the study of molecular shapes.

Meyerbeer, Giacomo, *originally* **Jakob Liebmann Meyer Beer** 1791–1864
German composer of operas
Born in Berlin, he played MOZART's D-minor Piano Concerto in public at seven. His earlier works were unsuccessful, but in Vienna he attracted attention as a pianist. After three years' study in Italy he produced operas in the new (ROSSINI's) style, which were immediately well received. After a careful study of French opera, he wrote the popular *Robert le Diable* (1831, libretto by EUGÈNE SCRIBE), and followed it in 1836 by the even more successful *Huguenots*. Appointed kapellmeister at Berlin, he composed several more well-received works, but was severely condemned by SCHUMANN and RICHARD WAGNER on the ground that he made everything subsidiary to theatrical effect.

Meyerhof, Otto Fritz 1884–1951
US biochemist and Nobel Prize winner
Born in Hanover, Germany, and trained in medicine at the University of Heidelberg, he was appointed to a position in clinical psychiatry at the Heidelberg Clinic in 1910, where OTTO WARBURG's work on chemical reactions in living cells inspired Meyerhof to change direction and study biochemical mechanisms. He moved to the department of physiology at the University of Kiel and was then appointed director of the physiology department at the Kaiser Wilhelm Institute for Biology in Berlin (1924–29). He then moved to a similar position at the Kaiser Wilhelm Institute for Medical Research in Heidelberg (1929–38). His biochemical research was primarily on muscle contraction, and its related metabolic pathways, and he shared the 1922 Nobel Prize in physiology or medicine with A V HILL for this work. In 1938 he left Nazi Germany, first continuing his work in France, then briefly in Spain, and in 1940 he reached the USA, where he was professor at the University of Pennsylvania.

Meyerhold, Vsevolod Yemilevich 1874–c.1940
Russian actor and director
Born in Penza, he joined the Moscow Art Theatre when it opened in 1898. From 1902 to 1905 he toured Russia with his own company, the Society of New Drama, both acting and directing, and was appointed by STANISLAVSKY as the director of the new Studio on Povarskaya Street (1905). Later he founded his own studio in Moscow, where he developed his theories of a director's theatre, with the actor subservient to the director's vision. He became an ardent Bolshevik, and directed the first Soviet play, VLADIMIR MAYAKOVSKY's *Mystery-Bouffe* (1918). In 1920 he was provided with the former Sohn Theatre in Moscow in which to work (it was later renamed the Meyerhold Theatre). He was director of the Theatre of the Revolution (1922–24) and of the Meyerhold Theatre (1923–38). He directed several new and revolutionary works, including two more Mayakovsky plays, *The Bedbug* (1929) and *The Bath House* (1930). During the 1930s, when Socialist Realism was decreed the official art form, he fell from favour. His theatre was closed in 1938 and he was arrested, and disappeared in prison.

Meynell, Alice Christiana Gertrude, *née* **Thompson** 1847–1922
English essayist and poet
Born in Barnes, London, she spent her childhood on the Continent, and converted to Catholicism. Her volumes of essays include *The Rhythm of Life* (1893), *The Colour of Life* (1896) and *Hearts of Controversy* (1917). She published several collections of her own poems, starting in 1875 with *Preludes*, and anthologies of COVENTRY PATMORE, of lyric poetry, and of poems for children. In 1877 she married Wilfrid Meynell (1852–1948), author and journalist, with whom she edited several periodicals. 🕮 A K Tuell, *Mrs Meynell* (1925)

Miall, Edward 1809–81
English clergyman
Born in Portsmouth, Hampshire, he was an Independent minister at Ware and Leicester, and a lifelong advocate of disestablishment of the Church of England. In 1841 he founded the weekly *Nonconformist* newspaper, and in 1842 tried to amalgamate with the Chartists. Later he was MP for Rochdale (1852–57) and Bradford (1869–74).

Miandad, Javed 1957–
Pakistani cricketer
Born in Karachi, he is considered the finest batsman ever produced by Pakistan. As well as playing for Karachi, Sindh, Sussex and Glamorgan, he excelled as a Test player, making his debut for Pakistan in 1975 and going on to amass 8,832 runs in Tests and 7,381 runs in one-day internationals (often as captain). He took part in six Cricket World Cups, winning the title with Pakistan in 1992 and becoming the first man to score 1,000 runs in World Cup matches. He played his last Test match in 1993 and made his last international appearance in 1996, subsequently coaching Pakistan in three separate spells.

Micah 735–665 BC
Old Testament minor prophet
He was born in Moresheth Gath, in south-west Judah. He prophesied during the reigns of Jotham, Ahaz and Hezekiah, being a younger contemporary of ISAIAH, Hosea and AMOS.

Michael I 1921–
King of Romania
The son of the future CAROL II, he was born in Sinaira, and first succeeded to the throne (1927) on the death of his grandfather Ferdinand I, his father having renounced his own claims (1925). In 1930 he was supplanted by Carol, but was again made king (1940) when the Germans gained control of Romania. In 1944 he played a considerable part in the overthrow of the dictatorship of ION ANTONESCU. He announced the acceptance of the Allied peace terms, and declared war on Germany. His attempts after the war to establish a broader system of government were foiled by the progressive Communization of Romania. In 1947 he was forced to abdicate and lived in exile, finally in Switzerland. Although deported from Romania when he first attempted to return in 1990, he regained his Romanian citizenship in 1997 and has since made several visits and reclaimed some property there.

Michael VIII Palaeologus c.1224–1282
Byzantine emperor
He was born into the Greek nobility and became a general in the empire of Nicaea. In 1258 he became regent and co-ruler with the eight-year-old emperor, John IV Lascaris, whom he later had blinded and imprisoned. Resourceful and a master of intrigue, he conquered Constantinople (Istanbul) in 1261, extinguishing the empire of BALDWIN II, and was crowned sole emperor, thus founding the Palaeologan dynasty. The papacy and CHARLES OF ANJOU, who aimed to re-establish the Latin Empire, opposed Michael, and Byzantium survived only by his diplomatic skill. By reuniting the Orthodox Church with Rome he aroused discontent among his subjects but warded off attacks until 1281 when Pope Martin IV proclaimed a crusade against him. Michael prevented this by encouraging the Aragonese to invade Sicily. Although his concentration on Europe tended to ignore the Ottoman threat to the east, he helped prolong Byzantine independence for another two centuries, and presided over the beginnings of a revival of learning.

Michael Romanov 1596–1645
Tsar of Russia
The great-nephew of IVAN IV, the Terrible, he was the founder of the Romanov dynasty, which ruled Russia until the Revolution of 1917. He was elected tsar (1613–45) by the boyars after a successful revolt against the Poles, when Russia was threatened with invasion from Sweden, and he brought an end to the Time of Troubles (1605–13). He concluded peace with Sweden (1617) and Poland (1618). He left government to his father, the patriarch Filaret, who reorganized the army and industry, improved finances, consolidated the system of serfdom, and increased contacts with western Europe. Michael was succeeded by his son Alexis.

Michael, George, *originally* **Georgios Kyriacos Panayiotou** 1963–
English pop singer and songwriter
Born in Finchley, London, he became a teen idol alongside Andrew Ridgeley as the pop duo Wham! Such soul-influenced singles as 'Young Guns (Go For It)' (1982), 'Club Tropicana' (1983) and 'Wake Me Up Before You Go-Go' (1984) did well on both sides of the Atlantic. In 1984 Michael enjoyed his first solo success with 'Careless Whisper' and also sang on a Band Aid charity single. After Wham! split in 1986 Michael continued as a solo artist with the albums *Faith* (1987), *Listen Without Prejudice* (1990), *Older* (1996) and *Patience* (2004) all topping the UK charts. Only his covers collection *Songs from the Last Century* (2000) stalled at number two. His career began to falter in the mid-2000s, when he struggled to maintain his musical relevance amidst accusations of complacency.

Michaelis, Leonor 1875–1949
US biochemist
Born in Berlin, Germany, he became professor at Berlin University (1908–22) and the Nagoya Medical School in Japan (1922–26), before settling in the USA at the Johns Hopkins (1926–29) and Rockefeller (1929–40) institutes. He studied the

Michelangelo, *in full* **Michelangelo di Lodovico Buonarroti** 1475–1564
Italian sculptor, painter and poet

Michelangelo was born in Caprese in Tuscany, where his father Lodovico was mayor. He was brought up in Florence and placed in the care of a stonemason and his wife at Settignano, where Lodovico owned a small farm and marble quarry. At school he devoted his energies more to drawing than to his studies. In 1488, against his father's wishes, he was apprenticed for three years to DOMENICO GHIRLANDAIO. He was recommended by Ghirlandaio to LORENZO DE' MEDICI, and entered the school for which Lorenzo had gathered together a priceless collection of antiques (1490–92). To this period belong two interesting reliefs. In the *Battle of the Centaurs* the Classical influence of Lorenzo's garden is strikingly apparent, though the straining muscles and contorted limbs, which mark the artist's mature work, are already visible. A marvellous contrast to the *Centaurs* is the *Madonna of the Steps*, conceived and executed in the spirit of DONATELLO.

After Lorenzo's death in 1492, PIERO DE' MEDICI, his son and successor, is said to have treated the artist with scant courtesy; and Michelangelo fled to Bologna for three years, returning to Florence in 1495. During this time he made a marble *Cupid*, which was bought by Cardinal San Giorgio who recognized the talent of the sculptor and summoned him to Rome in 1496. The influence of Rome and the antique is easily discernible in the *Bacchus*, now in the National Museum in Florence. The *Pieta* (1497), now in St Peter's, shows a realism wholly at variance with the antique ideal. For four years the sculptor remained in Rome and then, returning to Florence, fashioned his *David* out of a colossal block of marble. *David* is the Gothic treatment of a classical theme; in pose and composition there is a stately grandeur, a dignified solemnity.

During the same period he painted the *Holy Family of the Tribune* and the *Madonna* now in the National Gallery in London, proving that he had not wholly neglected the art of painting. His genius, however, was essentially plastic, and he had more interest in form than in colour. In 1503 the new pope, JULIUS II, summoned Michelangelo back to Rome, where their dealings were continually interrupted by bitter quarrels and recriminations. The pope commissioned the sculptor to design his tomb, and for 40 years Michelangelo clung to the hope that he would yet complete the great monument; but other demands were continually made upon him, and the sublime statue of MOSES is the best fragment that is left to us of the tomb of Julius.

Instead of being allowed to devote himself to the monument, he was instructed, despite Michelangelo's urgings to consider RAPHAEL, to decorate the ceiling of the Sistine Chapel with paintings (1508–12). In the event, Michelangelo achieved a masterpiece of decorative design, depicting the Creation, the Fall and the Flood. Almost superhuman invention, and a miraculous variety of attitude and gesture, place this work among the greatest achievements of human energy. No sooner had he finished his work in the Sistine Chapel than he returned with eagerness to the tomb. But in 1513 Pope Julius II died, and the cardinals, his executors, demanded a more modest design.

Then Pope LEO X, of the Medici family, commissioned Michelangelo to rebuild the façade of the church of San Lorenzo in Florence and enrich it with sculptured figures. He reluctantly complied, and set out for Carrara to quarry marble; from 1514 to 1522 his artistic record is a blank, as the elaborate scheme was ultimately given up, although Michelangelo remained in Florence. In 1528–29 he devoted his energies to improving the fortifications of Florence, now under siege. After the surrender he completed the monuments to Giuliano and Lorenzo de' Medici, which are considered to be among the greatest of his works.

In 1533 yet another compact was entered into concerning Pope Julius's ill-fated sepulchre; Michelangelo was once again commissioned to adorn the Sistine Chapel with frescoes. After some years he began in 1537 to paint *The Last Judgement*. In 1547 he was appointed architect of St Peter's, and devoted himself to the work with loyalty until his death.

Michelangelo is by far the most brilliant representative of the Italian Renaissance. He was not only supreme in the arts of sculpture and painting, in which grandeur and sublimity rather than beauty was his aim, but was versed in all the learning of his age, and wrote copious poetry.

📖 Sidney Alexander, *Michelangelo the Florentine* (1985); Linda Murray, *Michelangelo: His Life, Work and Times* (1984); Robert J Clements (ed), *Michelangelo: A Self-Portrait* (1968); Gilbert Creighton, *Michelangelo* (1967).

> 'The marble not yet carved can hold the form / Of every thought the greatest artist has.'
>
> – From Sonnet 15 (translated by Elizabeth Jennings)

physical properties of enzymes and proteins, but is best remembered for the Michaelis–Menten equation, which defines the role played by enzyme concentration in enzyme-catalyzed reactions. Michaelis also contributed over 80 papers on the measurement of pH and electrolytic dissociation.

Michaelson, Sidney 1925–91
English computer scientist
Born in London and educated at the Imperial College there, from 1949 to 1963 he lectured at the College, pioneering the design of digital computers and the principles of microprogramming. In 1963 he moved to Edinburgh University, where he founded the department and held the chair of computer science (1966–91). There he initiated work to provide interactive, multiple-user access to computers, and led a range of research activities, from computational theory to VLSI (very large scale integration) design. A leader in the field of stylometry, the science of computer-based analysis of literary texts, he fought to promote the professional recognition of computer scientists.

Michel, Claude, *pseudonym* **Clodion** 1738–1814
French sculptor
He was born at Nancy. Perhaps the greatest sculptor of the Napoleonic era, he is famous for his small terracotta figures of classical subjects such as fauns, satyrs and nymphs. A fine example of his work is a vase in the Wallace Collection, London, of white marble carved with relief.

Michel, Hartmut 1948–
German biochemist and Nobel Prize winner
Born in Ludwigsburg, West Germany, he studied at the universities of Tübingen, Würzburg, Munich and at the Max Planck Institute of Biochemistry, and was appointed director of the Max Planck Institute of Biophysics in Frankfurt in 1987. In 1988 he became professor of biochemistry at Johann Wolfgang Goethe University in the city. In 1981 he produced a crystal of the membrane-bound, photosynthetic reaction centre of the bacterium *Rhodopseudomonas viridis*, and collaborated with ROBERT HUBER and JOHANN DEISENHOFER to determine its structure by X-ray crystallography. By 1985 they were able to report the complete structure, which confirmed and elaborated predictions about how the energy transfer process in photosynthesis operates. For this discovery Michel shared the 1988 Nobel Prize in chemistry with Huber and Deisenhofer. He is a foreign member of both the Royal Society and the National Academy of Sciences of the USA. He published *Crystallization of Membrane Proteins* in 1990.

Michelangeli, Arturo Benedetti 1920–95
Italian pianist
Born in Brescia, he studied there and in Milan, and won the Geneva International Music Competition in 1939. After war service in the Italian air force, he acquired a considerable reputation as a virtuoso, which was enhanced by the rarity of his public performances. He became a noted teacher and founded and directed the International Pianists Academy in Brescia (1964–69).

Michelangelo *See panel above*

Michelet, Jules 1798–1874
French historian
Born in Paris, he lectured on history at the École Normale, assisted FRANÇOIS GUIZOT at the Sorbonne, worked at the Record Office, and was appointed professor of history at the Collège de France (1838–51). The greatest of his many historical works are his monumental *Histoire de France* (24 vols, 1833–67) and his

Histoire de la Révolution (7 vols, 1847–53). By refusing to swear allegiance to LOUIS NAPOLEON he lost his appointments, and henceforth worked mostly in Brittany and the Riviera. His second wife, Adèle Mialaret, collaborated with him on several nature books, including *L'Oiseau* (1856), *L'Insecte* (1857) and *La Mer* (1861). In his last years he set himself to complete his great *Histoire*, but lived to finish only three volumes (1872–75).

Michelin, André 1853–1931
French tyre manufacturer
Born in Paris, he established the Michelin tyre company in 1888 with his younger brother Édouard (1859–1940). They were the first to use demountable pneumatic tyres on motor cars, and became known for their road maps and Michelin guides. The guides were introduced by André Michelin to promote tourism by car and the first Red Guide, showing restaurant ratings, was published in 1900.

Michell, John 1724–93
English geologist and astronomer
Born in Nottinghamshire, he was a fellow of Queen's College, Cambridge and professor of geology (1762–64), and became rector of Thornhill, Yorkshire (1767), where WILLIAM HERSCHEL was a regular guest. He published an important work on artificial magnets (1750), but is best known as the founder of seismology. He invented a torsion balance, a device to measure the strength of small forces, and with it intended to measure the value of the gravitational constant. However, he died before he had the opportunity – it was HENRY CAVENDISH who finally carried this out in the famous 'Cavendish experiment' and derived from it the mean density of the Earth. Michell also made important contributions to astronomy: he demonstrated that many double stars must exist as binary systems and devised a method of calculating stellar distances.

Michelozzi, Michelozzo di Bartolommeo 1396–1472
Italian architect and sculptor
Born in Florence, he was associated with LORENZO GHIBERTI on his famous bronze doors for the baptistery there, and collaborated with DONATELLO in several major sculpture groups, including monuments to (the antipope) Pope John XXIII and Cardinal Brancacci (1427). He was court architect to COSIMO DE' MEDICI, with whom he was in exile at Venice, where he designed a number of buildings. One of his finest works is the Ricardi Palace in Florence.

Michelson, Albert Abraham 1852–1931
US physicist and Nobel Prize winner
Born in Strzelno, Poland, he emigrated with his family to the USA and graduated from the US Naval Academy in 1873. After teaching at the Academy, the Case School of Applied Science in Cleveland and Clarke University, he became professor of physics at Chicago University in 1892. His lifelong passion was precision measurement in experimental physics, and he is chiefly remembered for the Michelson–MORLEY experiment to determine ether drift, the negative result of which set ALBERT EINSTEIN on the road to the theory of relativity. The interferometer which he invented for this experiment was developed subsequently for spectroscopic studies, and he also developed a stellar interferometer for measuring the sizes and separations of celestial bodies. In 1898 he invented the echelon grating, an ultra-high-resolution device for the study and measurement of hyperfine spectra. Michelson became the first US scientist to win a Nobel Prize when he was awarded the Nobel Prize in physics in 1907. A member (1888) and president (1923–27) of the US National Academy of Sciences, his many honours included foreign membership of the Royal Society (1902), and the award of the Society's Copley Medal (1907). 🕮 Dorothy Michelson Livingston, *The Master of Light* (1973)

Michener, James A(lbert) 1907–97
US author
He was born in New York City and educated at Swarthmore College, Pennsylvania. His short-story collection *Tales of the South Pacific* (1947) won the Pulitzer Prize and was adapted to make the Rodgers and Hammerstein musical *South Pacific* (1948). His later novels often have a panoramic historical or geographical perspective and include *Hawaii* (1959), *Centennial* (1974), *Chesapeake* (1980), *Texas* (1985), *Caribbean* (1989) and *Recessional* (1994). 🕮 John P Hayes, *James A. Michener: A Biography* (1984)

Michie, Donald 1923–
British specialist in artificial intelligence
He was born in Rangoon, Burma (Myanmar), and educated at Balliol College, Oxford. His work during World War II on the Colossus code-breaking project acquainted him with computer pioneers such as ALAN TURING, with whom he discussed the mechanization of thought processes. After a biological career in experimental genetics, he developed the study of machine intelligence at Edinburgh University as director of experimental programming (1963–66) and professor of machine intelligence (1967–84, now emeritus). He is editor-in-chief of the *Machine Intelligence* series, and was chief scientist at the Turing Institute from 1986 to 1992, which he founded in Glasgow in 1984. In publications such as *The Creative Computer* (1984) and *On Machine Intelligence* (1974), he has argued that computer systems are able to generate new knowledge. His research in the 2000s tests the hypothesis that much conversation is contextually intuitive rather than reasoned, by using an intelligent machine called SOPHIE as a 'conversation agent'. Early results were reported in his 2001 paper 'Return of the Imitation Game'.

Michurin, Ivan Vladimirovich 1855–1935
Russian horticulturist
He was born in Koslov. At his private orchard there, which became a state institution, he developed many new varieties of fruit and berries. His theory of crossbreeding ('Michurinism'), which postulated the idea that acquired characteristics were heritable, became state doctrine and influenced the pernicious anti-Mendelian doctrines of TROFIM LYSENKO. Koslov was renamed Michurinsk after him.

Mickelson, Philip Alfred 1970–
US golfer
Born in San Diego, he won his first PGA Tour event in 1991 as an amateur. Despite his powerful drive and skilful short game, he was saddled with the title of 'best player never to have won a major' for the first part of his career, until his win at the 2004 Masters. In 2005 he won another major at the USPGA Championship, and a year later brought the total to three by winning the 2006 Masters. His fierce rivalry with TIGER WOODS has enlivened golf; their unlikely partnership at the 2004 Ryder Cup was unsuccessful, the pairing losing twice in one day.

Mickiewicz, Adam Bernard 1798–1855
Polish poet
Born near Navahrudak, Russia (now in Belarus), he was educated in Vilna and published his first poems in 1822. He was arrested for his revolutionary activities, and after the failure of the Polish revolt (1830–31) he had to flee to the West. After travelling in Germany, France and Italy he wrote his epic *Pan Tadeusz* (1834, Eng trans *Thaddeus*, 1886), about Lithuania. He taught at Lausanne and was Slavonic professor at Paris (1840). Generally he tried to keep the Polish spirit alive through his writings, and in 1852 LOUIS NAPOLEON appointed him librarian in the Paris Arsenal. He is considered the national poet of Poland. 🕮 K Pruszynski, *Adam Mickiewicz: The Life Story of the Greatest Polish Poet* (1950)

Mickle, William Julius 1735–88
Scottish poet
Born in Langholm, Dumfriesshire, and educated at Edinburgh High School, he failed as a brewer, and became an author in London. In 1765 he published a poem, *The Concubine* (or *Syr Martyn*), and from 1771 to 1775 he wrote a version of the *Lusiad* of LUIS DE CAMOËNS. In 1779 he went to Lisbon as secretary to Commodore Johnstone, but his last years were spent in London. His ballad of *Cumnor Hall* (which suggested *Kenilworth* to Sir WALTER SCOTT), and 'There's nae luck aboot the hoose' ensured his immortality, even if its authorship has been challenged.

Midas 8th century BC
King of Phrygia
He is mentioned in Assyrian records, and was the first non-Greek ruler to have made a dedication to the Oracle of Apollo at Delphi, thus anticipating GYGES of Lydia. Many stories were told about him (or about a namesake), notably that, in gratitude for his hospitality to the satyr Silenus, the god Dionysus gave him the power to turn to gold anything he touched. On discovering that this included food, he was relieved of the gift by washing in the Pactolus River.

Middleton, Thomas c.1580–1627
English dramatist
Born in Newington Butts, Surrey, the son of a bricklayer, he is first mentioned in PHILIP HENSLOWE's *Diary* in 1602, when he was engaged with Anthony Munday, MICHAEL DRAYTON and JOHN WEBSTER on a lost play, *Cæsar's Fall. Father Hubbard's Tale* and *The Black Book*, exposing London rogues, were published in 1604, to which year belongs the first part of *The Honest Whore* (mainly written by THOMAS DEKKER, partly by Middleton). Other early

works include *A Mad World, My Masters* (1608), from which APHRA BEHN pilfered freely in *The City Heiress. The Roaring Girl* (1611, written with Dekker) idealizes the character of a noted cutpurse and virago. Middleton was repeatedly employed to write the Lord Mayor's pageant. *A Chaste Maid in Cheapside* was probably produced in 1613, as was *No Wit, No Help like a Woman's. A Fair Quarrel* (1617) and *The World Lost at Tennis* (1620) were written in conjunction with WILLIAM ROWLEY. In 1620 Middleton was appointed city chronologer, and a manuscript Chronicle by him was extant in the 18th century. *A Game of Chess*, a curious and skilful play, was acted in 1624. Three posthumously published plays, *The Changeling*, *The Spanish Gypsy* and *Women Beware Women*, include some of his best writing. *The Widow*, published in 1652, was mainly by Middleton, and he was also concerned in the authorship of some of the plays included in the works of FRANCIS BEAUMONT and JOHN FLETCHER. 🕮 R H Barker, *Thomas Middleton* (1958)

Midgley, Thomas, Jnr 1889–1944
US engineer and inventor
Born in Beaver Falls, Pennsylvania, he graduated in mechanical engineering at Cornell University in 1911. During World War I, on the staff of the Dayton (Ohio) Engineering Laboratories (1916–23), he worked on the problem of 'knocking' in petrol engines, and by 1921 found tetraethyl lead to be effective as an additive to petrol, used with 1,2-dibromoethane to reduce lead oxide deposits in the engine. He also devised the octane number method of rating petrol quality. As president of the Ethyl Corporation from 1923, he also introduced Freon 12 as a non-toxic non-inflammable agent for domestic refrigerators. Since 1980, however, there has been rising concern about the pollutant effects of both the lead emitted in vehicle exhausts, and of chlorofluorocarbons (CFCs), such as Freon. Midgley was a polio victim, and died by accidental strangulation through the failure of a harness he used to help him rise in the morning.

Midler, Bette 1945–
US comedienne, actress and singer
Born in Honolulu, Hawaii, she studied drama at the University of Hawaii, then was hired as an extra in the film *Hawaii* (1966). Moving to New York, she made her stage debut in *Miss Nefertiti Regrets* (1966). She then developed a popular but bawdy nightclub act. Her album *The Divine Miss M* (1972) won her the first of four Grammy awards, and two years later she received a Tony award for her record-breaking Broadway show. Midler's performance in the film *The Rose* (1979) earned her an Academy Award nomination and she has continued to enjoy commercial success in a series of films including *Down and Out in Beverly Hills* (1986), *Ruthless People* (1986), *Outrageous Fortune* (1987), *Big Business* (1988), *Beaches* (1988), *Stella* (1990), *Scenes from a Mall* (1991), *For the Boys* (1991, Academy Award nomination), *Hocus Pocus* (1993) and *The First Wives Club* (1996). As a singer, her hit singles include 'The Rose' and 'Wind Beneath My Wings', while her albums have sold in excess of 14 million copies. Her autobiography *A View from A Broad* was published in 1980.

Mieris, Frans van 1635–81
Dutch painter
Born in Leyden, he excelled in small-scale, exquisitely finished genre paintings in the style of his teacher GERARD DOU and GERARD TERBORCH. His sons Jan (1660–90) and Willem (1662–1747) followed his example. Willem's son Frans (1689–1773) was less successful as a painter, but made his name as a writer of antiquarian works.

Mies van der Rohe, Ludwig 1886–1969
US architect
Born in Aachen, Germany, the son of a mason, he studied design under PETER BEHRENS and became a pioneer of glass skyscrapers. In pre-war Berlin he designed high-rise flats for the Weissenhof Exhibition (1927), and the German Pavilion for the Barcelona International Exposition in 1929. He also designed tubular-steel furniture, particularly the 'Barcelona chair'. He was director of the Bauhaus in Dessau (1930–33), and emigrated to the USA in 1937, where he became professor of architecture at the Armour (now Illinois) Institute of Technology in Chicago. He designed two glass apartment towers on Lake Shore Drive in Chicago and collaborated with PHILIP JOHNSON on the Seagram Building in New York (1956–58). His other works include the Public Library in Washington, DC (1967), and two art galleries in Berlin (1968). He was a major figure in 20th-century architecture and a founder of the modern style. 🕮 Arthur Drexler, *Ludwig Mies van der Rohe* (1960)

Mifsud Bonnici, Carmelo 1933–
Maltese statesman
A graduate of Malta University, he lectured in law at University College London and then in Malta. In 1969 he became legal consultant to the General Workers' Union and then moved more openly into politics, becoming deputy leader of the Malta Labour Party (MLP) in 1980, under DOM MINTOFF, and then leader, and prime minister, on Mintoff's retirement in 1984. In the 1987 general election the MLP won 34 seats to the Nationalist Party's 31, but because they had won a larger share of the vote the Nationalists were, under the terms of the constitution, awarded four more seats, and Mifsud Bonnici left office. He served as leader of the opposition until 1992, but resigned after his unsuccessful election campaign that year. He has opposed Malta's entry into the European Union, a position not shared by the MLP.

Mifune, Toshirô 1920–97
Japanese actor
Born in Tsingtao, China, to Japanese parents, he served in the Aerial Photography Unit during World War II and made his film debut in *Snow Trail* (1947). *Drunken Angel* (1948) marked the first of 16 films he made with AKIRA KUROSAWA, forming one of the greatest actor–director partnerships in screen history. Noted for the vitality of his acting style and his imposing screen presence, he appeared in Kurosawa's *Rashomon* (1950), *Seven Samurai* (1954) and *Yojimbo* (1961). Of his English-language works, only *Hell in the Pacific* (1968) is worthy of his dramatic range. 🕮 Stuart Galbraith IV, *The Emperor and the Wolf* (2001)

Mignard, Pierre 1612–95
French painter
Born in Troyes, after studying under SIMON VOUET he worked in Rome from 1636 to 1657, where he developed a classicizing style much influenced by NICOLAS POUSSIN. He was summoned to Paris by LOUIS XIV and became a successful court portraitist and favourite of the king. Upon the death of his great rival CHARLES LE BRUN, the king appointed him *premier peintre* as well as director and chancellor of the Académie. His brother, Nicolas (1608–68), was also a painter.

Mignault, Pierre-Basile 1854–1945
Canadian text-writer and judge
He taught civil law at McGill University, Montreal, before serving as a judge (1918–29) of the Supreme Court of Canada. He was a prolific writer, and his *Le droit civil canadien* (9 vols, 1895–1916, 'Canadian Civil Law') is still an important work. Through his writings and judgements he defended the integrity and distinction of Quebec civil law in the Canadian Supreme Court.

Miguel, *properly* **Miguel Maria Evaristo de Bragança** 1802–66
King of Portugal
Born in Lisbon, the third son of King John VI, he plotted (1824) to overthrow the constitutional government established by his father, but was banished with his mother, his chief abettor. His elder brother, PEDRO I, resigned the throne to his daughter Maria, making him regent; but he summoned a *Cortes* (1828), which proclaimed him king. In 1832 Oporto and Lisbon were captured, and CHARLES NAPIER destroyed his fleet off Cape St Vincent (1833). Maria was restored in 1834, and he withdrew to Italy.

Mihailovich, Draza 1893–1946
Serbian soldier
After distinguished service in World War I, he rose to the rank of colonel in the Yugoslav army, and following the German occupation in 1941, headed the Chetniks mountain guerrilla movement. In exile from 1943, he was appointed Minister of War, but when TITO's Communist Partisans' resistance developed, Mihailovich allied himself with the Germans and then with the Italians in order to fight the communists. After the war he was captured and executed by the Tito government for collaboration with the occupying powers. 🕮 Nikola Milovanovic, *Kontrarevolucionarni pokret Draze Mihailovica* (1984)

Mikan, George Lawrence 1924–2005
US basketball player
Born in Joliet, Illinois, he graduated from DePaul University, Chicago, in 1946 and played with Minneapolis in the National Basketball Association (NBA) from 1948 to 1956, winning the championship five times. He led the NBA in points-scoring three times. A trendsetter, he helped launch basketball into a new era and at 6ft 10in tall (2.08m), he set the stage for the big men who now dominate the sport.

Mikkola, Hannu 1942–
Finnish rally driver
Born on the eastern borders of Finland, he launched himself and the Ford Escort to popular status when he won a hat trick of

rallies in 1970: the 16,000-mile London–Mexico rally, the Arctic and the 1,000 Lakes. His immense versatility was proved through a career of 19 wins (1970–94) in cars that included Ford, Mercedes and Audi, and in rallies as varied as the Safari (winner 1972, with Gunnar Palm) to the Lombard RAC rally, which Mikkola won four times. He won the world championship title only once, in 1983.

Mikoyan, Anastas Ivanovich 1895–1978
Soviet politician
Born in Sanain, Armenia, of poor parents, the brother of ARTEM MIKOYAN, he studied theology and became a fanatical revolutionary. Taken prisoner in the fighting at Baku, he escaped and made his way to Moscow, where he met LENIN and STALIN. A member of the Central Committee in 1922, he supported Stalin against TROTSKY, and in 1926 became Minister of Trade, in which capacity he did much to improve Soviet standards of living. He showed himself willing to learn from the West, for example, in the manufacture of canned goods and throughout the food industry generally. While other politicians came and went, Mikoyan's genius for survival enabled him to become a first vice-chairman of the Council of Ministers (1955–64), and president of the Presidium of the Supreme Soviet from 1964.

Mikoyan, Artem Ivanovich 1905–70
Soviet aircraft designer
Born in Sanain, Armenia, he worked as a metalworker in Rostov-on-Don and Moscow and served in the Red Army before graduating from the NE Zhukovsky Air Force Academy (1936). His career began as an engineer at the NN Polikarpov Design Bureau where he worked on refinements to the I-16 monoplane and the development of the I-153 ('Seagull') fighter. He was best known for the fighter aircraft produced by the design bureau he headed with MIKHAIL GUREVICH, the MiG (Mikoyan and Gurevich) series. The most notable of this series include: the MiG-1 (1940), and the MiG-3 (1941), both used in World War II, the MiG-9 (1946), one of the Soviet Union's first jet fighters, the MiG-15 and the MiG-17, which were deployed in the Korean War, the MiG-21 (1967) single-turbojet Mach 2 fighter-interceptor, on which design the world's first supersonic passenger aircraft, the Tu-144, was based, and the MiG-25 (1971) single-turbojet reconnaissance fighter. He was the brother of ANASTAS MIKOYAN.

Milankovitch, Milutin 1879–1958
Yugoslav geophysicist
Born in Dalj, he was educated at the Institute of Technology in Vienna, and then moved to the University of Belgrade, where he remained for the rest of his career. Studying the possible astronomical cycles which produce climatic variations, he realized that the key to past climates was the amount of solar radiation received by the Earth, which varies according to latitude and depends upon the Earth's orbit and the tilt of the Earth's rotational axis, both of which change over a long time period. Using this data he reconstructed the classic theoretical radiation curves for the past 650,000 years. These are known as the Milankovitch cycles and are still in use.

Milburn, Alan 1958–
English politician
He was born in Birmingham and educated at Lancaster University, becoming Labour MP for Darlington in 1992. In the New Labour government of 1997 he was appointed Minister of State for Health and subsequently Chief Secretary to the Treasury, and in 1999 became Secretary of State for Health. After resigning in 2003, he returned to government in 2004 as Chancellor of the Duchy of Lancaster. He later led the Labour Party's 2005 election campaign.

Miles, Bernard James Miles, Baron 1907–91
English actor, stage director and founder of the Mermaid Theatre
Born in Uxbridge, London, he made his London debut as an actor in 1930, and worked in several repertory theatres as a designer, scene-painter, carpenter, property manager and character actor before touring with the Old Vic company as Iago in *Othello* (1941). He later rejoined the company (1947–48), and went onto the music-hall stage, including the London Palladium (1950). Wanting to rid the theatre of snobbery and class distinctions, he founded the Mermaid Theatre (1951) as a small private theatre in the grounds of his home in St John's Wood, London. In 1953 the Mermaid was rebuilt in the City of London, and in 1959 a permanent, professional Mermaid Theatre, financed by public subscription, was built at Puddle Dock, Blackfriars; it was seen as the model of many theatres during the next two decades.

Milgram, Stanley 1933–84
US psychologist
Born in New York City, he was educated at Harvard, spending 1959–60 at the Institute for Advanced Study at Princeton. He was professor at Yale (1960–63) and later became professor of psychology at the City University of New York (1967–84). Like many other post-war social psychologists, he became concerned to understand how apparently ordinary people in Nazi Germany had committed the atrocities of the Holocaust against the Jews and other minority groups. In his most famous research programme, published in *Obedience to Authority: An Experimental View* (1974), he set out to examine what factors would influence the tendency of ordinary people to 'obey orders' in an artificial situation where they were given to believe (wrongly) that they were administering electric shocks to other experimental subjects. The most striking result of this controversial study was that the vast majority of people were apparently prepared to give huge shocks in the cause of 'science' when authorized to do so by an apparently respectable academic scientist.

Milhaud, Darius 1892–1974
French composer
Born in Aix-en-Provence, he studied under VINCENT D'INDY. He frequently collaborated with the playwright PAUL CLAUDEL, as on the opera *Christopher Columbus* (1928). For a time he was a member of the group of young French composers known as Les Six. In 1940 he went to the USA, where he was made professor of music at Mills College, California (1940–47). He was one of the most prolific of modern composers, his work including several operas, much incidental music for plays, ballets (including the jazz ballet *La Création du monde*, 1923, 'The Creation of the World'), symphonies and orchestral, choral and chamber works. He wrote an autobiography, *Notes sans musique* (1948, Eng trans *Notes without Music*, 1952).

Milk, Harvey 1931–78
US politician and gay rights activist
Born in Woodmere, New York, he settled in California and became an outspoken advocate of gay rights in an era when homosexuality was rarely acknowledged in public. After being elected to the San Francisco Board of Supervisors in 1977, he was assassinated (along with Mayor George Moscone) by a former city supervisor. He is a figure often invoked by the US gay rights movement.

Mill, Harriet Taylor, *née* **Hardy** 1807–58
English feminist philosopher, essayist and political theorist
She was born in London, but little else is known of her early life. She was one of the first writers in England to press for women's rights and suffrage, writing essays in the 1850s that authoritatively rejected the legal and political traditions subordinating women. Her suggested remedies for the improvement of women's position lay in education, law and politics. Advocating women's suffrage as early as 1851, she claimed full legal and political citizenship for women, and promoted equality in higher education. Unable to remain politically active due to bad health, she was able to pursue her cause through the activities of her second husband, the philosopher JOHN STUART MILL. She collaborated with him in particular on his classic expression of feminist thought, *The Subjection of Women* (1869). Among her works are the important *Essays on Sex Equality*.

Mill, James 1773–1836
Scottish philosopher, historian and economist
Born in Northwater Bridge, Logiepert, Tayside, he studied for the ministry at Edinburgh and was ordained in 1798. He moved to London (1802) and supported himself through journalism and editorial work for periodicals such as the *Edinburgh Review* and *St James's Chronicle*. He became a disciple and friend of JEREMY BENTHAM, an enthusiastic proponent of utilitarianism, and a prominent member of the circle of 'Philosophical Radicals' which included GEORGE GROTE, DAVID RICARDO, JOHN AUSTIN and in due course his eldest son JOHN STUART MILL. The group was active in social and educational causes and James Mill took a leading part in the founding of University College London (1825). His first major publication was the *History of British India* (1817–18) on which he had worked for eleven years and which led to a permanent position with the East India Company, where he rose to become head of the Examiner's Office (1830). He continued writing utilitarian essays for publications like the *Westminster Review* and the *Encyclopaedia Britannica*, and published three further important books: *Elements of Political Economy* (1821), which derived from Ricardo and was an important influence on KARL MARX; *Analysis of the Phenomenon of the Human Mind* (1829), his main philosophical work, which

Mill, John Stuart 1806–73
English philosopher and social reformer

John Stuart Mill was born in London, the son of the Scottish philosopher JAMES MILL, who was wholly responsible for his son's remarkable and rigorous education. He taught him Greek at the age of three, Latin and arithmetic at eight, logic at twelve, and political economy at 13. He was shielded from association with other boys of his age, his only recreation being a daily walk with his father, during which he was tested with oral examinations. After a visit to France in 1820 he broadened his studies into history, law and philosophy and in 1823 began a career under his father at the India Office, where he advanced to become head of his department.

This forced education gave him an advantage, as he put it, of a quarter of a century over his contemporaries, and he began enthusiastically to fulfil the ambitions his father had for him to become the leader and prophet of the Benthamite utilitarian movement. He began publishing in the newspaper *The Traveller* in 1822; he helped form the Utilitarian Society, which met for reading and discussion in JEREMY BENTHAM's house (1823–26), and with Bentham he helped found University College London in 1825; he was a major contributor to the *Westminster Review* and a regular performer in the London Debating Society; and he corresponded with THOMAS CARLYLE and met FREDERICK MAURICE. He espoused Malthusian doctrines, and was arrested in 1824 for distributing birth control literature to the poor in London.

In 1826 he suffered a mental crisis which he describes in his autobiography, and which has usually been seen as a result of his precocious but emotionally restricted development. For a while he was in 'a dull state of nerves', but the depression passed and he recovered, with his sympathies broadened and his intellectual position importantly modified, as his reviews of TENNYSON (1835), CARLYLE (1837), BENTHAM (1838) and COLERIDGE (1840) indicate. He effectively humanized utilitarianism by his recognition of the differences in the quality as well as the quantity of pleasures thereby restoring the importance of cultural and idealistic values.

In 1830 he had met Harriet Taylor, the bluestocking wife of a wealthy London merchant, and after a long, intense but apparently chaste romance he married her in 1851, two years after her husband's death. She took an active interest in his writing and contributed significantly to his essay *On Liberty* (1859), the most popular of all his works, which eloquently defines and defends the freedoms of the individual against social and political control. Her views on marriage and the status of women helped inspire *The Subjection of Women* (1869), which provoked great antagonism.

Remaining politically active in later life, he was elected to parliament in 1865. He campaigned for women's suffrage and generally supported the Advanced Liberals. In 1872 he became godfather, 'in a secular sense', to Lord Amberley's second son, BERTRAND RUSSELL. His last years were spent in France and he died in Avignon.

📖 Mill's major work, *A System of Logic* (1843), ran through many editions, establishing his philosophical reputation and greatly influencing JOHN VENN, John Neville Keynes, GOTTLOB FREGE and BERTRAND RUSSELL, particularly in its treatment of induction. His other works include *Principles of Political Economy* (1848), *Considerations on Representative Government* (1861), *Utilitarianism* (1863), *Examination of Sir William Hamilton's Philosophy* (1865), *Auguste Comte and Positivism* (1873) and *Three Essays on Religion* (1874). His *Autobiography* was published in 1873. See also A Ryan, *J. S. Mill* (1974).

> 'The only purpose for which power can be rightfully exercised over any member of a civilized community, against his will, is to prevent harm to others.'
>
> –From *On Liberty*, ch.1.

provides a psychological basis for utilitarianism; and *A Fragment on MacKintosh* (1835), which argues that morality is based on utility.

Mill, John Stuart *See panel above*

Millais, Sir John Everett 1829–96
English painter
Born in Southampton, he became the youngest ever student at the Royal Academy in 1840, and in 1846 exhibited his *Pizarro Seizing the Inca of Peru*. Along with DANTE GABRIEL ROSSETTI and HOLMAN HUNT he was a founder member of the Pre-Raphaelite Brotherhood, and was markedly influenced by them and by JOHN RUSKIN. His first Pre-Raphaelite picture, the banquet scene from *Isabella* by KEATS, figured in the Academy in 1849, where it was followed in 1850 by *Christ in the House of His Parents*, which met the full force of the anti-Pre-Raphaelite reaction. The exquisite *Gambler's Wife* (1869) and *The Boyhood of Raleigh* (1870) mark the transition of his art into its final phase, displaying brilliant and effective colouring, effortless power of brushwork and delicacy of flesh-painting. The interest and value of his later works, largely portraits, lie mainly in their splendid technical qualities. A late painting, *Bubbles* (1886), achieved huge popularity. Millais executed a few etchings, and his illustrations in *Good Words*, *Once a Week*, *The Cornhill*, etc (1857–64) place him in the first rank of woodcut designers. He was buried in St Paul's Cathedral, London. 📖 Geoffroy Millais, *Sir John Everett Millais* (1979)

Millan, Bruce 1927–
Scottish Labour politician
Born in Dundee and educated at the Harris Academy, he qualified as a chartered accountant. MP for Glasgow Craigton (1959–83) and for Govan (1983–88), he held junior ministerial appointments (1964–70, 1974–76), mainly in the Scottish Office. Appointed Secretary of State for Scotland (1976–79), he proved a competent administrator in a period dominated by devolution legislation, sharply rising unemployment, and a weakening Scottish economy. He left parliament to become European Community Commissioner (1989–95), with responsibility for regional development. He was elected a Fellow of the Royal Society of Edinburgh in 1995. From 1999 to 2001 he chaired the Millan Committee, which reviewed mental health care provision in Scotland.

Milland, Ray, *originally* **Reginald Truscott-Jones** 1905–86
Welsh actor
Born in Neath, Glamorganshire, he was a member of the Household Cavalry before turning to acting. He performed in a dance team with ANNA NEAGLE and made several modest film appearances in 1929. Venturing to Hollywood, he built a substantial career as a leading man in light comedies and adventure yarns like *Easy Living* (1937), *Beau Geste* (1939) and *Reap the Wild Wind* (1942). Cast against type as the chronic alcoholic in *The Lost Weekend* (1945), he won a Best Actor Academy Award and explored the darker side of his character further in *Alias Nick Beal* (1949) and *Dial M for Murder* (1954). He also proved an able director of off-beat subjects like the western *A Man Alone* (1955) and *Panic in Year Zero* (1962). He made a further career as cantankerous older figures after playing the role of the father in the phenomenally popular *Love Story* (1970). *Wide-Eyed in Babylon* (1976) is his autobiography.

Millar, John 1735–1801
Scottish jurist
He was born in Shotts, Lanarkshire, and educated at Hamilton Grammar School and Glasgow University. He became professor of law at Glasgow (1761). A friend of ADAM SMITH and Lord KAMES, he had a distinguished reputation as a law teacher and a leading liberal. His main works are the *Origin of the Distinction of Ranks* (1771), a pioneer work on sociology; and *An Historical View of the English Government* (1787), the first constitutional history of Great Britain or England, and a work with many new and original insights. Both books were widely influential. An ardent Whig, he was regarded at the time as a radical, even a near-revolutionary.

Millay, Edna St Vincent 1892–1950
US poet
Born in Rockland, Maine, she published her first volume of poetry, *Renaissance and Other Poems*, on graduating from Vassar College in 1917. Moving to Greenwich Village, a popular meeting place for artists and writers, she published *A Few Figs from Thistles* (1920), which celebrated Bohemian life. In 1923 came *The Harp Weaver and Other Poems*, for which she was awarded the 1923 Pulitzer Prize. The popularity she enjoyed during her own time waned after her death, and she was dismissed as petulant and artificial, but the admiration of writers like MAYA ANGELOU has caused her to be re-evaluated.

📖 Nancy Milford, *Savage Beauty: The Life of Edna St Vincent Milley* (2001)

Mille, Agnes de *See* DE MILLE, AGNES

Mille, Cecil B de *See* DE MILLE, CECIL B(LOUNT)

Miller, Arthur (Asher) 1915–2005
US playwright
Born in New York City, he graduated from the University of Michigan in 1938. His first successful play, *All My Sons* (1947), focused on the family of an arms manufacturer and reflected the preoccupation with moral issues that was to characterize his work. His tragedy, *Death of a Salesman* (1949), won the Pulitzer Prize and brought him international recognition. However, *The Crucible* (1953) may be his most lasting work, since its theme stands out of time. It uses the persecution of 'witches' in 17th-century New England as a metaphor for political persecution in the USA of the 1950s – from which Miller suffered, though not as severely as many of his contemporaries. Other works include *A View from the Bridge* (1955), the film script of *The Misfits* (1960), *After the Fall* (1963), *Incident at Vichy* (1964), *The Creation of the World and Other Business* (1972), *Playing for Time* (1981), *Danger: Memory!* (1987), *The Ride Down Mount Morgan* (1991), *The Last Yankee* (1992), *Broken Glass* (1994) and *Mr Peter's Connections* (1998). His marriage to MARILYN MONROE in 1956 (divorced 1961) brought him considerable publicity. His final play, *Finishing the Picture* (2004), is a frank exposé of their failing marriage, an episode he had previously been reluctant to discuss. From 1962 he was married to the photographer INGE MORATH. Since the 1980s, Miller's plays have received major productions in the UK, but the relative lack of enthusiasm for serious work on Broadway has made it difficult for his voice to be heard in the USA. He is nonetheless regarded as the pre-eminent US playwright of the 20th century. 📖 *Timebends: A Life* (1987); N Carson, *Arthur Miller* (1982)

Miller, Cheryl 1964–
US basketball player
Born in Riverside, California, she is noted as the first woman to 'dunk' a basketball in regulation play (ie to score by thrusting the ball downward through the basket). She set California Interscholastic Federation records for the most career points and the most points scored in one season. At the University of Southern California, she won nearly every major basketball award, including the Naismith Trophy (1984, 1985, 1986), the Broderick award as college player of the year (1984, 1985), and the Women's Basketball Coaches' Association Player of the Year (1985, 1986). Her number was retired by the university in 1986, marking the first time a basketball player had been so honoured.

Miller, Sir (Ian) Douglas 1900–96
Australian neurosurgeon
He was born in Melbourne and after graduating from Sydney University he worked at St Vincent's Hospital in Sydney. In 1934 he went to England to study the then new practice of neurosurgery, returning to St Vincent's in 1939. In World War II he went to the Western Desert and in 1942 took charge of the AIF (Australian Imperial Force) neurological centre in Cairo. Afterwards he worked in Asia, training surgeons in Singapore, Malaysia, Thailand and India. He founded the neurological centre at St Vincent's in 1939. Honorary neurosurgeon there until 1960, he became a member of the Board in 1954 and served as chairman until 1973, establishing 'Vinnie's' as one of the leading hospitals in Australia. 📖 *A Surgeon's Story* (1985)

Miller, (Alton) Glenn 1904–44
US trombonist and bandleader
He was born in Clarinda, Iowa, and educated at the University of Colorado, but before completing his studies he joined the Ben Pollack Band (1924), moving to New York in 1928 and working as a freelance musician and arranger. From 1937 he led a succession of popular dance orchestras and joined the US air force in 1942, forming another orchestra – the Glenn Miller Army Air Force Band – to entertain the troops. While they were stationed in Europe, Miller was a passenger in a small aircraft lost without trace over the English Channel. His music has continued to be performed since his death by orchestras rehearsed in his distinctive style. 📖 G T Simon, *Glenn Miller and His Orchestra* (1980)

Miller, Henry Valentine 1891–1980
US writer
He was born in New York, to German–American parents, and brought up in Brooklyn. With money from his father which was intended to finance him through Cornell University, he travelled in the south-west and Alaska. He then went to work in his father's tailor shop, left after trying to unionize the workforce, became employment manager for the Western Union Telegraph Co (1920), and ran a speakeasy in Greenwich Village (1927). From 1930 he spent nine years in France, during which time he published *Tropic of Cancer* (1934) and *Tropic of Capricorn* (1938), as well as *Black Spring* (1936). He returned to the USA in 1940 but travelled extensively both at home and abroad before settling in Big Sur, California. Much of his fiction is autobiographical and explicitly sexual, and he had to overcome many impecunious years and rebuffs from state censors. (US editions of the *Tropics* were not published until 1961 and 1962 respectively.) In his time, however, he became one of the most read US authors, solipsistic, surrealistic and blackly comic, empathizing with the outcast: prostitutes, hobos and artists. Important books are *The Colossus of Maroussi* (1941), a dithyrambic travel book, *The Air-Conditioned Nightmare* (1945), a bleak essay on contemporary USA, and *The Rosy Crucifixion* trilogy of novels: *Sexus* (1949), *Plexus* (1953) and *Nexus* (1960). A guru of the sexually liberated 1960s, he fell foul of feminist critics in the 1970s. 📖 J Martin, *Always Merry and Bright: The Life of Henry Miller* (1978)

Miller, Hugh 1802–56
Scottish geologist and writer
Born in Cromarty, he was apprenticed to a stonemason at 16 and developed an interest in fossils and devoted his winter months to reading, writing and natural history. He became a bank accountant for a time (1834–39) and later became involved in the controversy over church appointments that led to the Disruption of the Church of Scotland (1843). At the same time he wrote a series of geological articles in the Scottish 'Evangelist' newspaper *The Witness*, later collected as *The Old Red Sandstone* (1841). He made important discoveries of fossil fish from the Devonian rocks of Scotland. Also a pioneer of popular science books, he combated Darwinian evolutionary theory with *Footprints of the Creator* (1850), *The Testimony of the Rocks* (1857) and *Sketchbook of Popular Geology* (published posthumously in 1859).

Miller, Jacques Francis Albert Pierre 1931–
Australian immunologist
Born in Nice, France, he graduated in medicine from the University of Sydney in 1955, before working in London at the Chester Beatty Research Institute (1958–65). He studied the development of leukaemia in mice, and in 1960 obtained his PhD in experimental pathology. Miller played a major part in discovering the function of the thymus gland, which had been removed from animals in previous experiments with no apparent effect. However, when he tried removing the thymus from newborn mice, he found that they failed to develop properly and died within a few months. He showed that these animals would accept skin grafts from unrelated mice and even rats, and concluded that the thymus gland is an important organ in the control of the immunity system. He went back to Australia in 1966 to become head of the experimental pathology (later thymus biology) unit of the Walter and Eliza Hall Institute, Melbourne where he worked until 1996, and was also professor of experimental immunology at the University of Melbourne (1990–97). He was elected FRS in 1970. He has been honoured with the Florey Medal (2000) and the Copley Medal (2001). In 2003 he was presented with the prime minister's Prize for Science of the Australian government and elevated to Companion of the Order of Australia (of which he had been an Officer since 1981).

Miller, Joaquin, *pseudonym of* **Cincinnatus Heine Miller** 1839–1913
US poet
Born in Liberty, Indiana, he became a miner in California, and fought in the Indian wars. After practising law in Oregon, he edited a paper suppressed for showing Confederate sympathies. He was a county judge in Oregon (1866–70) and, after a spell as a Washington journalist, he settled in California as a fruitgrower in 1877. His poems include *Songs of the Sierras* (1871). He also wrote a successful play, *The Danites of the Sierras* (1877), and his autobiography: *My Life among the Modocs* (1873) and *My Own Story* (new edition 1891). 📖 M M Marberry, *Splendid Poseur: Joaquin Miller, American Poet* (1953)

Miller, Jonathan Wolfe 1934–
English theatre director and author
Born in London, he qualified as a doctor at Cambridge, and co-wrote and performed in the revue *Beyond the Fringe* at the 1960

Edinburgh Festival. He made his directorial debut with *Under Plain Cover* (1962), a play by JOHN OSBORNE, at the Royal Court Theatre, and was editor and presenter of the BBC Television arts programme *Monitor* (1964–65). He has been responsible for many memorable productions, and from 1974 has also specialized in opera productions for the English National Opera and other major companies. He has written and presented two BBC television series related to the world of medicine, *The Body in Question* (1977) and *States of Mind* (1982). In 1985 he became Research Fellow in Neuropsychology at Sussex University. One of the most original of directors, he has written several books, including *Subsequent Performances* (1986), an illuminating and invigorating discussion of his views on the theatre and directing plays and operas. He was artistic director of the Old Vic (1988–90) and in his first season staged RACINE's *Andromache* and an 'anticolonialist' version of *The Tempest* with MAX VON SYDOW as Prospero, and directed *King Lear* the following year. Later projects include the television series *Opera Works* (1997) and a production of *As You Like It* in Dublin in 2000. He also acted as curator of an exhibition, *Mirror Image: Jonathan Miller on Reflection*, at the National Gallery in 1998. A declared atheist, he wrote and presented the BBC television series *A Brief History of Disbelief* (2004). His many books include *Acting in Opera* (1990). He was made a CBE in 1983. 🕮 Ronald Bergan, *Beyond the Fringe ... and Beyond: A Critical Biography of Alan Bennett, Peter Cook, Jonathan Miller, Dudley Moore* (1990)

Miller, Keith Ross 1919–2004
Australian cricketer
Born in Melbourne, he established himself as the world's leading all-rounder of the time, playing in the great DON BRADMAN Test side of 1948. His early career was interrupted by World War II, a conflict in which he served with distinction as a fighter-bomber pilot in Europe. Miller scored 2,598 runs in 55 Test matches including seven centuries, and took 170 wickets. A sporting all-rounder, he also played Australian Rules football for St Kilda.

Miller, Lee 1907–77
US photographer
Born in Poughkeepsie, New York, she studied in Paris (1925) and at the Art Students League, New York (1927–29), during which time she also modelled for EDWARD STEICHEN. She studied with MAN RAY in Paris (1929–32) before returning to the USA to run her own photography studio in New York. In 1947 she married the painter ROLAND PENROSE in England, with whom she had a son, Anthony (b.1947), who was later to write her biography, *The Lives of Lee Miller* (1985). She was a photographer in London for *Vogue* from 1940, and in 1942 became official war correspondent for the US forces. She then returned to *Vogue* as a freelance journalist and photographer (1946–54). Retrospective exhibitions of her work were held at the Stately-Wise Gallery in New York (1985), the Photographers' Gallery, London (1986), and the San Francisco Museum of Modern Art (1987). Her publications include *Grim Glory: Pictures of Britain under Fire* (1941, with E Carter).

Miller, Max, *originally* **Thomas Henry Sargent** 1895–1963
English music-hall comedian
Born in Brighton, he worked with the original Billy Smart's Circus and army concert parties during World War I. He subsequently pursued a solo career as a stand-up comedian, touring throughout Britain before making his London debut in 1922. By 1926 he was top of the bill at the Holborn Empire, a position he maintained for three decades. Traditionally attired in white trilby, two-tone shoes, kipper tie and rainbow-coloured plus-four suit, he turned innuendo into an art form, earning the nickname the 'Cheeky Chappie'. He made his film debut in *The Good Companions* (1933) and appeared in a host of modest British comedies during the next ten years but remained at his best as a live performer – the highest paid variety artist in Britain – whose superb timing and raucous vulgarity reduced loyal audiences to helpless laughter.

Miller, Merton H(oward) 1923–2000
US economist and Nobel Prize winner
Born in Boston, he was educated at Harvard and Johns Hopkins universities and became a professor at the University of Chicago in 1961. He shared the 1990 Nobel Prize in economics with HARRY M MARKOWITZ and WILLIAM F SHARPE for their investigations into new methods of assessing valuations and risks and rewards in the investment market. His publications include *Theory of Finance* (1972) and *Financial Innovation and Market Volatility* (1991).

Miller, Stanley Lloyd 1930–
US chemist
Born in Oakland, California, he studied at California University and taught there from 1960. His best-known work was carried out in Chicago in 1953 and concerned the possible origins of life on Earth. Inspired by the theories of ALEKSANDR OPARIN and J B S HALDANE, with HAROLD CLAYTON UREY, he passed electric discharges (simulating thunderstorms) through mixtures containing reducing gases (hydrogen, methane, ammonia and water) which Haldane had suggested were likely to have formed the early planetary atmosphere. The formation of the Oparin–Haldane 'primeval soup' is now accepted as the most plausible theory for the generation of complex organic molecules on Earth, although the probable subsequent path from these chemicals to a living system is still hotly debated.

Miller, William 1782–1849
US religious leader
Born in Pittsfield, Massachusetts, he became a farmer and underwent a religious conversion in c.1816. Believing that the Second Coming of Christ was imminent, he began preaching in 1831 and founded the religious sect of Second Adventists or Millerites. He attracted tens of thousands of converts, many of whom fell away when the event did not occur as predicted in 1843 or 1844. His remaining followers continued to meet and organized the Seventh Day Adventist Church in 1863.

Miller, William, *known as* **the Laureate of the Nursery** 1810–72
Scottish poet
Born in Glasgow, he was a woodturner by profession, having relinquished a medical career through ill health. In 1863, encouraged by his friends, he published a collection of poems which brought him some fame. Today, however, he is remembered only as the author of 'Wee Willie Winkie', one of his numerous dialect poems about children and childhood.

Milles, Carl Vilhelm Emil 1875–1955
US sculptor
Born near Uppsala, Sweden, he executed numerous monumental works, such as the STEN STURE monument near Uppsala and the GUSTAV I VASA statue, and was especially renowned as a designer of fountains. Much of his work is in Sweden and the USA, where he settled in 1931, noteworthy examples being *Wedding of the Rivers* (1940) in St Louis, and *St Martin of Tours* (1955) in Kansas City, his last work.

Millet, Jean François 1814–75
French painter
Born in Grouchy near Gréville, he worked on the farm with his father, a peasant, but, showing a talent for art, he was placed under a painter at Cherbourg in 1832. In 1837 he went to Paris and worked under PAUL DELAROCHE, achieving recognition in 1844 at the Salon. The 1848 revolution and poverty drove him from Paris, and he settled with his wife and children at Barbizon, near the forest of Fontainebleau, living much like the peasants around him, and painting the rustic life of France with sympathetic power. His famous *Sower* was completed in 1850. His *Peasants Grafting* (1855) was followed by *The Gleaners* (1857), *The Angelus* (1859) and other masterpieces. He also produced many charcoal drawings of high quality, and etched a few plates. He received little public notice, and was never well off, but following the Great Exhibition of 1867 at Paris, in which nine of his best works were on show, he was awarded the Legion of Honour. 🕮 Julia M Ady, *Jean François Millet: His Life and Letters* (1896)

Millett, Kate (Katherine) Murray 1934–
US feminist, writer and sculptor
Born in St Paul, she was educated at the University of Minnesota, St Hilda's College, Oxford, and at Columbia University, New York. Her PhD thesis became the bestseller and feminist classic, *Sexual Politics* (1970). Early in her career as a sculptor she spent some time in Tokyo (1961–63), and has exhibited in Tokyo, New York, Los Angeles and Berlin. She also founded the Women's Art Colony Farm at Poughkeepsie, New York State. Her other publications include *The Prostitution Papers* (1973), the autobiographical *Flying* (1974), *Going to Iran* (1982), *The Loony Bin Trip* (1990) and *The Politics of Cruelty* (1994).

Milligan, Spike (Terence Alan) 1918–2002
Irish humorist
Born in Ahmadnagar, India, he was a singer and trumpeter before doing war service. He made his radio debut in *Opportunity Knocks* (1949) and, along with PETER SELLERS, HARRY SECOMBE and MICHAEL BENTINE, co-wrote and performed in the *Goon*

Show (1951–60). His unusual perspective on the world, allied to his sense of the ridiculous and the surreal, has had a great influence on British humour. On stage, he appeared in *Treasure Island* (1961, 1973, 1974, 1975) and *The Bed-Sitting Room* (1963, 1967) which he also co-wrote. His many television programmes include *Paging You* (1947), *Idiot Weekly, Price 2d* (1956), *A Show Called Fred* (1956), *Son of Fred* (1956), *The World of Beachcomber* (1968–69) and the *Q* series (1969–80). He appeared in films such as *The Bed Sitting Room* (1969), *The Magic Christian* (1969) and *Digby – The Biggest Dog in the World* (1973). He published a variety of children's books, poetry, autobiography and comic novels including *Puckoon* (1963), *Adolf Hitler, My Part in His Downfall* (1971), *Where Have All the Bullets Gone?* (1985), *The Looney: An Irish Fantasy* (1987) and *Peacework* (1991). In later years he published a number of humorous reworkings of classic works of literature in the ... *According to Spike Milligan* series, such as *Wuthering Heights According to Spike Milligan* (1995). He was awarded an honorary knighthood in 2000. 🕮 Pauline Scudamore, *Spike Milligan* (1985)

Millikan, Robert Andrews 1868–1953
US physicist and Nobel Prize winner
He was born in Illinois, and studied at Oberlin College and Columbia University, where he received his PhD in 1895. After working at the universities of Berlin and Göttingen, he became ALBERT MICHELSON's assistant at the University of Chicago, where he was appointed professor in 1910. In 1921 he moved to the California Institute of Technology (Caltech) where he established the experimental physics laboratory. At Chicago he refined J J THOMSON's oil drop technique, and was able to show that the charge on each droplet was always a multiple of the same basic unit – the charge on the electron – which he measured very precisely. In studies of the photoelectric effect he confirmed ALBERT EINSTEIN's theoretical equations and gave an accurate value for PLANCK's constant. For all these achievements he was awarded the 1923 Nobel Prize in physics. He also investigated cosmic rays, a term that he coined in 1925. 🕮 Robert H Kargon, *The Rise of Robert Millikan: Portrait of a Life in American Science* (1982)

Mills, Dame Barbara Jean Lyon 1940–
English lawyer
Born in Chorleywood, Hertfordshire, and educated at St Helen's School, Northwood, and Lady Margaret Hall, Oxford, she was called to the Bar in 1963. She became a recorder of the Crown Court in 1982, and a QC in 1986. She was made director of the Serious Fraud Office in 1990, and in 1992 became the first woman to be head of the Department of Public Prosecutions, at a time when its activities were under scrutiny following damaging revelations of earlier miscarriages of justice. She resigned in 1998, and since 1999 has been the Adjudicator, acting as impartial referee in complaints about the Inland Revenue. She was made DBE in 1997.

Mills, C(harles) Wright 1916–62
US sociologist and academic
Born in Waco, Texas, he was educated at the universities of Texas and Wisconsin. He taught at Wisconsin and Maryland, and became professor at Columbia (1946–62). His two main contributions to social understanding were *White Collar* (1951), a critical account of the 'new' post-war middle classes, and *The Power Elite* (1956), a darker and more pessimistic study of social control by the military, politicians and corporate money. *The Causes of World War Three* (1958) had an important impact on the New Left in the USA; his last book was the highly prescient *Listen Yankee: The Revolution in Cuba* (1960). 🕮 J Eldridge, *C Wright Mills* (1983)

Mills, Sir John Lewis Ernest Watts 1908–2005
English actor
Born in Norfolk and raised in Felixstowe, Suffolk, he took an early interest in amateur dramatics which led to his London stage debut as a chorus boy in *The Five O'Clock Revue* (1927). More prestigious theatre work followed in *Cavalcade* (1931) and *Words and Music* (1932) before his film debut in *The Midshipmaid* (1932). He established himself as one of the hardest-working mainstays of the British film industry, portraying typically English roles in such films as *In Which We Serve* (1942), *Scott of the Antarctic* (1948) and *The Colditz Story* (1954). As a character actor his many credits include *Great Expectations* (1946) and *The History of Mr Polly* (1949). Later films include *Ryan's Daughter* (1970, Academy Award), *Gandhi* (1982) and *A Woman of Substance* (1986). Active in the theatre and on television, he also directed the film *Sky West and Crooked* (1965). Knighted in 1976 and awarded a BAFTA Fellowship in 2002, he published his autobiography, *Up in the Clouds, Gentlemen Please*, in 1980, and published a photographic autobiography, *Still Memories*, in 2000. Married to the playwright Mary Hayley Bell since 1941, both his daughters Juliet (1941–) and Hayley (1946–) are actresses. 🕮 Robert Tanitch, *John Mills* (1993)

Mills, Robert 1781–1855
US architect
He was born in Charleston, South Carolina, and studied under important US architects such as THOMAS JEFFERSON and BENJAMIN LATROBE, who taught him to look to classical models for inspiration. He became a leading exponent of the Greek revival, and in 1836 President ANDREW JACKSON appointed him architect of public buildings in Washington, DC. His major works there include the Treasury Building (1836–42), the Patent Office (1836–40), and the Post Office (begun 1839). He also designed the Washington Monument in 1836, but it was not begun until 1848 (completed 1884).

Miln, James 1819–81
Scottish antiquary
A former naval officer and merchant in China and India, he made excavations on a Roman site at Carnac, Brittany, and published the results in *Excavations at Carnac* (1877 and 1881). Miln Museum, Carnac, contains his collection.

Miln, Walter *See* MYLNE, WALTER

Milne, A(lan) A(lexander) 1882–1956
English writer
Born in St John's Wood, London, he was educated at Westminster and Trinity College, Cambridge. He joined the staff of *Punch* as assistant editor, and became well known for his light essays and his comedies, notably *Wurzel-Flummery* (1917), *Mr Pim Passes By* (1919) and *The Dover Road* (1922). In 1924 he achieved world fame with his book of children's verse, *When We were Very Young*, written for his own son, Christopher Robin (1920–96). Further children's classics include the enchantingly whimsical *Winnie-the-Pooh* (1926), *Now We are Six* (1927) and *The House at Pooh Corner* (1928), memorably illustrated by E H SHEPARD. He wrote an autobiography, *It's Too Late Now* (1939). 🕮 A Thwaite, *A. A. Milne* (1990)

Milne, Edward Arthur 1896–1950
English astrophysicist
Born in Hull, he was educated at Hymer's College, Hull and at Trinity College, Cambridge. He became assistant director of the Cambridge Solar Physics Observatory (1920–24), and then professor of mathematics at Manchester (1924–28) and Oxford (from 1928), making notable contributions to the study of cosmic dynamics. In 1923, with the English mathematician and physicist Ralph Fowler (1889–1944), he studied the ionization, temperature and energy flux of stellar surface material and was the first to estimate the electron pressure in a stellar atmosphere. He noticed that a decrease in luminosity might cause the collapse of the star, which could lead to the production of a nova. In 1932 he began to develop his theory of 'kinematic relativity'. One outcome of this was the prediction that the universe is 10,000 million years old.

Milne, John 1859–1913
English seismologist
Born in Liverpool, he was educated at King's College and the Royal School of Mines, London. He began his career as a mining engineer in the UK and Germany, then spent two years in Newfoundland, and travelled in Egypt, Arabia and Siberia. Always a keen traveller, he joined an expedition in 1874 to locate Mount Sinai and on being appointed professor of geology in Tokyo (1875–94), travelled there by camel across Mongolia. In Japan he took up an interest in earthquakes, becoming a supreme authority, for which he was awarded the Order of the Rising Sun. He pioneered modern seismology and introduced precise physical measurements. In 1892, with colleagues, he developed a seismometer to record horizontal components of ground motion which became used on a worldwide basis. Milne devised methods of locating distant earthquakes and early traveltime curves for seismic wave arrivals, initiated experiments using explosives, and compiled *A Catalogue of Destructive (Japanese) Earthquakes AD 7–AD 1899* (1912). On his retirement to the Isle of Wight (1895) he ran a private seismological observatory, regularly issuing a bulletin summarizing data from a worldwide network of seismological stations which he set up with his own instruments, a forerunner of the International Seismological Summary. A prolific writer, he published *Earthquakes and other Earth Movements* (1886) and *Seismology* (1898).

Milner (of St James's and Cape Town), Alfred Milner, 1st Viscount 1854–1925
English politician and colonial administrator
Born in Bonn, Germany, son of a university lecturer in English at Tübingen, and educated at Oxford, he established his reputation in Egypt and was appointed governor of the Cape and High Commissioner in South Africa (1897). There he became convinced that the British position was endangered by the South African Republic (Transvaal), and set about the political rationalization of the region through the Boer Wars. He hoped to encourage sufficient English-speaking immigration to outnumber the Boers in a South African dominion. He additionally became governor of the Transvaal and Orange River Colony in 1901, but was forced to resign in 1905 as a result of irregularities over Chinese labour he had introduced for the Rand gold mines. He was Secretary for War (1916–19) and Colonial Secretary (1919–21).

Milner, Brenda Atkinson, *née* **Langford** 1918–
Canadian psychologist
She studied at Cambridge and at McGill University, Montreal, then worked at the Ministry of Supply in England (1941–44) before emigrating to Canada. She taught at the University of Montreal (1944–1952), leaving to join McGill University in 1952, where she became professor of psychology in 1970. She became head of the Neuropsychology Research Unit at the Montreal Neurological Institute (1970–91), where she has also been a professor since 1993. Her contributions to neuropsychology have been mainly empirical, the best-known being a series of investigations of a man rendered profoundly amnesic following a radical brain operation for the relief of epilepsy. This work has formed the basis for a large body of subsequent research that has improved our understanding of the brain structures implicated in laying down a new memory, and their mode of function. Other important research by Milner has concerned the asymmetrical activities of the two sides of the brain, particularly in relation to the temporal and the frontal lobes, and has been used in the development of the surgical treatment of temporal-lobe epilepsy. In the 2000s she used MRI scanning to explore the cognitive and linguistic functions of the frontal and temporal lobes. One of the most significant figures in the growth of neuropsychology, she won the Distinguished Scientific Contribution award of the American Psychological Association (1973), the Ralph W Gerard prize of the Society for Neuroscience (1987) and the Donald Hebb Award of the Canadian Society for Brain, Behaviour and Cognitive Science (2001). She was made a Companion of the Order of Canada in 2004.

Milner, Robin 1934–
English computer scientist
Born in Plymouth, he received scholarships to Eton and King's College, Cambridge. He worked in the Artificial Intelligence Laboratory at Stanford University, and taught at the University of Edinburgh before becoming professor of computer science at the University of Cambridge (1995). His major contributions to computer science include the proof-checking program LCF (Logic of Computable Functions), the programming language ML (metalanguage), CCS (Calculus of Communicating Systems), a theoretical framework for analyzing concurrent systems, and its successor, the pi-calculus. For his achievements he received the Turing Award in 1991. 🕮 Gordon Plotkin, Colin Stirling, Mads Tofte (eds), *Proof, Language, and Interaction: Essays in Honour of Robin Milner* (2000)

Milnes, Richard Monckton, 1st Baron Houghton 1809–85
English politician and writer
Born in London, he was a member of the Apostles Club at Cambridge along with TENNYSON and THACKERAY. He was MP for Pontefract from 1837 until he entered the House of Lords in 1863. A patron of young writers, he befriended DAVID GRAY, was one of the first to recognize ALGERNON CHARLES SWINBURNE's genius, and secured the poet laureateship for Tennyson (1850). He was the 'Mr Vavasour' of DISRAELI's novel *Tancred*. A traveller, a philanthropist and an unrivalled after-dinner speaker, he went up in a balloon and down in a diving bell. He was the first publishing Englishman who gained access to the harems of the East, he championed oppressed peoples and the rights of women, and carried a bill for establishing reformatories (1846). In addition to his poetry and essays he published *Life, Letters and Remains of Keats* (1848). 🕮 J Pope-Hennessey, *Monckton Milnes* (1950–52)

Milnor, John W(illard) 1931–
US mathematician
He was born in Orange, New Jersey, and educated at Princeton University, where he taught for most of his career until he moved to SUNY-Stony Brook in 1988. Chiefly a topologist, he discovered that familiar objects can be described in unfamiliar ways, so that, for example, functions on higher dimensional spheres are differentiable in one description but not in another. For this highly unintuitive result and others, he was awarded the Fields Medal (the mathematical equivalent of the Nobel Prize) in 1962. He has also worked on the topology of higher dimensional manifolds. Many of his books, including *Dynamics in One Complex Variable* (3rd ed, 2006) have provided introductions to current research, and he stimulated William Thurston to win the Fields Medal in 1978 for his work on three-dimensional manifolds. Subsequent honours include the Wolf Prize in mathematics (1989) and the Leroy P Steele Prize, twice (1982 for seminal contribution to research, 2004 for mathematical exposition).

Milo of Croton 6th century BC
Semi-legendary Greek wrestler
From the Greek colony of Croton in southern Italy, he was the best-known Greek athlete of ancient times. He won the wrestling contest at five successive Olympic Games and swept the board at all other festivals. A man of huge stature, he boasted that no one had ever brought him to his knees, and it is said that he carried a live ox upon his shoulders through the stadium at Olympia and then ate it all in a single day. He played a leading part in the military defeat of Sybaris in 511 BC. Tradition has it that in his old age he tried to split a tree which closed upon his hands and held him fast until he was devoured by wolves.

Milošević, Slobodan 1941–2006
Serbian politician
He was born in Pozarevac and educated at Belgrade University. He joined the Communist League in 1959, was active in student affairs, and entered government sérvice as an economic adviser to the Mayor of Belgrade in 1966. From 1969 to 1983 he held senior posts in the state gas and banking industries. He became president of the Serbian League of Communists in 1984, and president of Serbia in 1988. As a hardline party leader in the pre-perestroika mould, he won immediate popularity by disenfranchising the Albanian majority in Kosovo province, and survived the republic's 1990 multiparty elections that removed the communist leadership in Croatia and Slovenia. However, his continued efforts to dominate the affairs of the more liberal republics, his initial refusal to accept a Croat, STIPE MESIĆ, as president of Yugoslavia, and his action in appropriating $875 million of Yugoslav federal reserves to buttress Serbia's ailing economy without the consent of any of them, prompted Croatia and Slovenia to declare their independence in 1991. Bitterly opposed to the break-up of Yugoslavia, he agitated for the Yugoslav federal army to be sent into Slovenia and Croatia and later (1992) into Bosnia-Herzegovina. An unrepentant champion of a 'Greater Serbia', he did nothing to prevent the fighting in Bosnia led by avowedly 'independent' Serbian militias bent on joining the greater part of the newly independent Republic of Bosnia to the Republic of Serbia and eliminating all non-Serb residents through 'ethnic cleansing'. In 1995 he played a key role in the release of UN hostages who had been captured by Bosnian Serbs. Later that year at the peace talks in Dayton, Ohio, despite having instigated the conflict, he became the guarantor for the peace settlement in Bosnia. A treaty was signed and US sanctions against the country were lifted. In 1996 Milošević was re-elected amidst furious accusations of electoral rigging and from 1998 onwards oversaw Serb military incursions into the province of Kosovo, which was demanding autonomy from the Belgrade government for its Albanian majority. This led to NATO air strikes and the establishment of a NATO-led peacekeeping force in the province, forcing a Serb withdrawal. The loss of Kosovo was a severe political blow to Milošević and he was defeated at the polls in 2000 by opposition candidate VOJISLAV KOSTUNICA. He subsequently became the first European head of state to be indicted for crimes against humanity by the International Criminal Tribunal in The Hague, and was arrested in 2001 to face trial. His trial began the following year, and was inevitably controversial: the prosecution took two years to present its case, and Milošević called 1,200 defence witnesses, of whom only five would testify, before dismissing his defence counsel. His legacy was to leave Serbia and the Serbian national cause in ruins. 🕮 Lenard J Cohen, *Serpent in the Bosom: The Rise and Fall of Slobodan Milošević* (2000)

Milosz, Czeslaw 1911–2004
US poet, novelist and essayist, and Nobel Prize winner
Born in Seteiniai, Lithuania, his parents settled in what was then Poland, and he later worked for the Resistance in Warsaw during World War II. He eventually became professor of Slavic

Milton, John 1608–74
English poet

John Milton was born in Bread Street, Cheapside, the son of a scrivener and composer. He was educated at St Paul's School and Christ's College, Cambridge. His apprentice work at Cambridge includes the 'Nativity Ode', an epitaph on SHAKESPEARE and 'At a Solemn Music'. In 1635 his father moved to Horton in Buckinghamshire; there Milton wrote *L'Allegro* and *Il Penseroso, Comus* and the pastoral elegy *Lycidas* (1637). For the next two years Milton visited Italy (1638–39). The fame of his Latin poems had preceded him and he was received in the academies with distinction.

His Italian tour was interrupted by news of the imminent outbreak of Civil War in England. This event, into which he threw himself with revolutionary ardour, silenced his poetic output for 20 years except for some Latin and Italian pieces and occasional sonnets, most of which were published in a volume of *Poems* in 1645. Two of these stand out: the noble 'On His Blindness' and 'On the Late Massacre in Piedmont'.

During the years after his return to London in 1639, he devoted himself to the cause of the revolution with political activity and a series of pamphlets defending civil and religious liberties. These included five pamphlets against episcopacy, including *Apology for Smectymnuus* (1642, *Smectymnuus* was an attack on episcopacy by five Presbyterians). In 1642 Milton married Mary Powell, the daughter of a Royalist; when she failed to return to him after a visit to her parents in Oxford, Milton published *The Doctrine and Discipline of Divorce* (1643), followed by three supplementary pamphlets against the opponents of his views; these occasioned a threat of prosecution by a parliamentary committee dominated by the Presbyterians, who were now to be reckoned his chief enemies after the episcopacy pamphlets. *Areopagitica, A Speech for the Liberty of Unlicensed Printing* (1644) was the famous vindication which is still quoted when the press finds itself in danger.

Meanwhile, in 1645 his wife returned to him, accompanied by her whole family as refugees after the Battle of Naseby, and two years later Milton inherited sufficient money to give up his schoolteaching. The execution of CHARLES I launched him on his third public controversy, now addressed, however, to the conscience of Europe. As Latin secretary to the new council of state to which he was appointed immediately after his defence of the republicans (*The Tenure of Kings and Magistrates*, 1649), he became official apologist for the Commonwealth. As such he wrote *Eikonoklastes* and two *Defensiones*, the first, *Pro Populo Anglicano Defensio* (1650), addressed to the celebrated humanist CLAUDIUS SALMASIUS. The second, also in Latin, *Defensio Secunda* (1654), contains autobiographical matter and so supplements the personal matter in the *Apology for Smectymnuus*.

Meanwhile, his wife had died in 1652, leaving three daughters, and he now married Catherine Woodcock, whose death two years later is the theme of his beautiful sonnet 'Methought I saw my late espoused Saint'. Although blind from 1652 onwards, he retained his Latin secretaryship until the Restoration (1660), which he roused himself to resist in a last despairing effort as pamphleteer. But the fire had gone out of him, and *The Readie and Easie Way*, which pointed to dictatorship, became the target of the Royalist wits. After the Restoration, Milton went into hiding for a short period, and then after the Act of Oblivion (August 1660) he devoted himself wholly to poetry with the exception of his prose *De Doctrina Christiana* (which did not appear until 1823).

He married his third wife, Elizabeth Minshull, in 1662. This was the period of his most famous works, beginning with *Paradise Lost* (completed 1665, published 1667), the theme of which had been in Milton's mind since 1641. It was originally to be a sacred drama; but when in 1658 his official duties were lightened so as to allow him to write, he chose the epic form. The first three books reflect the triumph of the godly, so soon to be reversed; the last books, written in 1663, are tinged with despair. God's kingdom is not of this world. Man's intractable nature frustrates the planning of the wise. In *Paradise Regained* (1671), the tone is more of resignation, and the theme is the triumph of reason over passion. *Samson Agonistes*, published with it in 1671, shows the reviving spirit of rebellion, due perhaps to the rise of Whig opposition about 1670. The parallel of his own fortunes, both in the private and the public sphere, with those of SAMSON made Milton pour out his spirit into this Greek play, which also formed the libretto of HANDEL's oratorio.

His last years were spent in sociable comfort in Cripplegate, where he was buried next to his father in St Giles' Churchyard.

📖 A N Wilson, *The Life of John Milton* (1983); C Hill, *Milton and the Puritan Revolution* (1977).

> 'Lords and Commons of England, consider what nation it is whereof ye are, and whereof ye are the governors: a nation not slow and dull, but of a quick, ingenious, and piercing spirit, acute to invent, subtle and sinewy to discourse, not beneath the reach of any point the highest that human capacity can soar to.'
>
> – From *Areopagitica*.

languages and literature at Berkeley in California (1961–78). He established a reputation with his first two volumes of poetry, *Poemat o czasie zastyglym* (1933, 'Poem on Time Frozen') and *Trzy zimy* (1936, 'Three Winters'). In 1945 he published *Ocalenie* ('Rescue'), a collection primarily of war poems. After World War II he collaborated with the Communist authorities, who gave him diplomatic posts in Washington, DC and Paris. He defected in 1951, the year which saw the publication of *Zniewolony umysl* (1951, Eng trans *The Captive Mind*, 1953), which documented the difficulties of intellectuals under Stalin. He spent three decades in exile, first in Paris, then in California, and his works were banned in Poland for many years as a result. Many of his works were thereafter published in English as well as Polish, including *Hymn of the Pearl* (1982), *The Unattainable Earth* (1986), *Provinces* (1991), *A Year of the Hunter* (1994) and *Facing the River* (1995). His *New and Collected Poems 1931–2001* were published in 2001, and *New Poems* in 2004. He was awarded the Nobel Prize in literature in 1980. He became a US citizen in 1970, returning to Poland briefly in 1981 before eventually settling there, in Cracow.

Milstein, Cesar 1927–2002
British molecular biologist, immunologist and Nobel Prize winner
Born in Bahía Blanca, Argentina, he graduated in chemistry from Buenos Aires University in 1945, and worked on enzymes at Cambridge (1958–61), where he obtained a PhD in 1960. In 1961 he returned to Argentina to become head of the division of Molecular Biology at the National Institute of Microbiology, but following a military coup, he returned to Cambridge, where he joined the staff of the Medical Research Council at the laboratory of Molecular Biology (1963–95) and was Fellow of Darwin College (1981–95). He conducted important research into antibodies, developing the technique of 'monoclonal antibodies' by fusing together different cells to maintain antibody production. This technique has become widespread in the commercial development of new drugs and diagnostic tests, and in 1984 it won Milstein the Nobel Prize in physiology or medicine, shared with GEORGES KÖHLER and NIELS JERNE. Much honoured, he was elected an FRS (1975), won the Wolf Prize for medicine (1980) and was awarded the Royal Society's Royal Medal (1982) and Copley Medal (1989). He became a Companion of Honour in 1995.

Milstein, Nathan Mironovich 1904–92
US violinist
Born in Odessa, Russia, he began his concert career there in 1919, soon playing with VLADIMIR HOROWITZ and GREGOR PIATIGORSKY. He left the USSR in 1925, gave recitals in Paris, and made his US debut under LEOPOLD STOKOWSKI in 1929. He became a US citizen in 1942 and toured annually into his 80s. He received the Kennedy Center award for Lifetime Achievement in 1987 and published his memoirs *From Russia to the West* in 1990.

Miltiades, the Younger c.550–489 BC
Athenian general and politician
He became a vassal of DARIUS I of Persia and accompanied him on his Scythian expedition (c.514 BC). He returned to Athens in 493, and was the chief strategist in the Greek victory against the Persians at Marathon (490 BC). The following year he attacked the island of Paros, but failed and was impeached, and died in prison. He was the father of CIMON, also an Athenian hero.

Milton, John *See panel above*

Min 1851–95
Queen of Korea
The leader of a powerful faction at court, mainly comprising members of her own family, she was strongly opposed to increased Japanese influence in Korea. Though her husband Kojong (or I T'aewang) was king from 1864–1907, she was the real holder of the ruling power. She struggled for power with her father-in-law Hungson (or Tai Wen Kun) who was official regent (1864–73) and remained a dominant political figure until his death (1898). Min was assassinated in a palace coup instigated by the Japanese Minister to Korea, Miura Goro, in an attempt to secure Japanese control over the Korean king. The plot misfired, however, as Miura was cashiered by his own government while King Kojong increasingly looked to China for protection.

Mindszenty, József 1892–1975
Hungarian Roman Catholic primate
Born in Mindszent, Vas, he became a priest in 1915, Archbishop of Esztergom and primate in 1945, and cardinal in 1946. He then acquired international fame in 1948 when he was charged with treason by the Communist government in Budapest. He was sentenced to life imprisonment the following year, but in 1955 was released on condition that he did not leave Hungary. At the end of the Hungarian Uprising in 1956 he was granted asylum in the US legation, where he remained as a voluntary prisoner until 1971, when conditions in Hungary eased and he was allowed to go abroad. He spent his last years in a Hungarian religious community in Vienna. 🕮 J Vecsey and P Schlafly, *Mindszenty the Man* (1972)

Minette *See* HENRIETTA ANNE, DUCHESSE D'ORLÉANS

Minghella, Anthony 1954–
English director and playwright
Born in Ryde, Isle of Wight, he studied at Hull University and taught drama there from 1976 to 1981. He began writing and directing for the theatre in the early 1980s with plays such as *Two Planks and a Passion* (1983) and *Made in Bangkok* (1986), later working as a television scriptwriter and director with various episodes of *Inspector Morse* and films such as *Truly, Madly, Deeply* (1991, BAFTA Award for Best Original Screenplay). His work for cinema includes *The English Patient* (1997, BAFTA Award for Best Adapted Screenplay and Academy Award for Best Director), *The Talented Mr Ripley* (2000) and *Cold Mountain* (2003). He has also written widely for radio. He was appointed a CBE in 2001 and became the chairman of the British Film Institute the following year.

Mingus, Charles 1922–79
US jazz bassist, composer and bandleader
He was born in Nogales, Arizona, and brought up in Los Angeles. He was taught to play the cello at school, eventually performing with the LA Junior Philharmonic, but contact with jazz musicians led him to take up the double bass. His first professional work as a bassist was with traditional-style bands. As a child, he had sung gospel music at the Holiness Church, and he drew on this background in his mature music, but in the context of modern and avant-garde ideas. He worked with big bands led by LOUIS ARMSTRONG and LIONEL HAMPTON in the 1940s, before moving to New York, where he played in smaller groups, notably with vibraphonist Red Norvo (1908–99). He was recognized as a leading figure on his instrument, but his ambitions lay in composition. He launched a record label, Debut, in 1953, and became involved with the experimental Jazz Composers Workshop, before forming his own Jazz Workshop in 1955. Recordings like *Pithecanthropus Erectus* (1956) and *The Black Saint and the Sinner Lady* (1964) attempted to stretch and redefine the boundaries of jazz and the relationship of composition to improvisation within it, and his huge musical legacy is among the most important in jazz. He wrote an inchoate, unfinished, semi-fictional 'autobiography', *Beneath The Underdog*, and was an emotional campaigner for black rights. He was crippled by sclerosis in 1978. His massive work *Epitaph*, for 31 instruments, was performed in complete form for the first time in 1989, under the supervision of GUNTHER SCHULLER. 🕮 B Priestley, *Mingus* (1982)

Minkowski, Hermann 1864–1909
German mathematician
He was born near Kovno, Russia, and educated at the University of Königsberg. Appointed professor there (1895), he later became professor at the universities of Zurich (1896) and Göttingen (1902). He discovered a new branch of number theory, the geometry of numbers, and in his most important work he gave a precise mathematical description of space–time as it appears in EINSTEIN's relativity theory. This four-dimensional 'Minkowski space' was described in *Space and Time* (1907).

Minnelli, Liza May 1946–
US singer and actress
Born in Los Angeles, the daughter of director Vincente Minnelli (1910–86) and JUDY GARLAND, she first appeared on screen in her mother's film *In The Good Old Summertime* (1949) and acted in a school production of *The Diary of Anne Frank* (1960). She made her off-Broadway debut in *Best Foot Forward* (1963) and became the youngest actress to win a Tony award, for *Flora, the Red Menace* (1965). Seen on television and in cabaret, her vibrant voice and emotionally charged renditions brought comparisons with Garland. Roles in films like *Charlie Bubbles* (1967), *The Sterile Cuckoo* (1969) and *Tell Me That You Love Me, Junie Moon* (1970) revealed her dramatic skills. She won an Academy Award for *Cabaret* (1972), and a television special, *Liza with a Z* (1972), confirmed her versatility. Subsequent dramatic appearances include *New York, New York* (1977), the television film *A Time to Live* (1985) and *Victor-Victoria* on Broadway in 1997. Her private life has often seemed as volatile as her mother's, but she remains a potent attraction as a recording artist and concert performer.

Minogue, Kylie Ann 1968–
Australian pop singer and actress
Born in Melbourne, she began as a child actress in the Australian television series *The Sullivans* before achieving international stardom as Charlene in the soap opera *Neighbours* from 1986. She released her debut single 'Locomotion' in 1988 and subsequently concentrated on pop music. Such singles as 'I Should Be So Lucky' (1988) and 'Hand on Your Heart' (1989) established her as a favourite in pop charts across the world. In the 1990s she exchanged her wholesome pop image for a more mature, sexually alluring persona, and enjoyed renewed success with such releases as *Kylie Minogue* (1994), *Light Years* (2000) and *Body Language* (2003) as well as with the chart-topping single 'Can't Get You out of My Head' (2001). Her treatment for breast cancer in 2005 interrupted a lengthy world tour whose sales and theatrical staging rivalled MADONNA's. Her sister Dannii (1971–) is also a pop singer and actress.

Minot, George Richards 1885–1950
US physician and Nobel Prize winner
He was born in Boston, and educated at Harvard College and Medical School with which, except for three postdoctoral years at Johns Hopkins, he was associated all his working life. Using special staining techniques on blood smears, he studied anaemia, and from 1925, working with WILLIAM MURPHY, he examined clinically GEORGE WHIPPLE's observation that dogs made anaemic through repeated bleedings improved significantly when fed liver. Minot and Murphy established the importance of a liver diet for patients suffering from pernicious anaemia, at that time a fatal disease, and shared with Whipple the 1934 Nobel Prize in physiology or medicine. Minot, a diabetic, was one of the earliest patients to benefit from insulin therapy.

Minto, Gilbert John Murray Kynynmond-Elliot, 4th Earl of, *also called* **Viscount Melgund** 1845–1914
Scottish politician and colonial administrator
He was born in London and educated at Eton and Cambridge. He led an adventurous life as a soldier and journalist (including service in the Afghan Wars and a period as war correspondent for the *Morning Post*) before being appointed Governor-General of Canada (1898–1904). During this period he helped raise Canadian troops for the Boer War and settled a dispute over Alaska with the USA. As Viceroy of India (1905–10) he dealt with border friction with Russia over Persia (Iran), Tibet and Afghanistan. Within India he sternly repressed extremist nationalist elements after an attempt on his life in 1909. Simultaneously, together with Secretary of State JOHN MORLEY, he attempted to secure better representation of important Indian interests and the enlargement of the powers of the existing legislative councils. The Indian Councils Act, the core of what are generally known as the Morley–Minto Reforms, became law in 1909. As a result of a campaign by a Muslim delegation for representation of Muslim interests through special constituencies this law introduced the principle of communal representation. Six special Muslim constituencies of landholders were created for the Imperial Legislative Council, and others in some other provinces. This measure is considered as the official germ of Pakistan.

Mintoff, Dom(inic) 1916–
Maltese Labour statesman
Born in Cospicua, he was educated at the University of Malta and won a Rhodes Scholarship to Hertford College, Oxford, afterwards becoming a civil engineer. In 1947 he joined the Malta Labour Party and in the first Malta Labour government that year he became Minister of Works and deputy prime minister. He became prime minister in 1955 and in 1956–57 undertook negotiations with Britain to integrate Malta more closely with the former. These broke down in 1958, when his demands for independence and political agitation over the transfer of the naval dockyard to a commercial concern led directly to the suspension of Malta's constitution in January 1959. Having resigned in 1958 to lead the Malta Liberation Movement, he became leader of the opposition in 1962. The country was granted full independence two years later, and Mintoff became prime minister in 1971. Three years later Malta became a republic within the Commonwealth. He continued as prime minister until 1984, and followed a policy of moving away from British influence. He later campaigned unsuccessfully against Malta's membership of the European Union.

Minton, (Francis) John 1917–57
English artist
Born in Cambridge, he studied in London and Paris, and from 1943 to 1956 taught at various London art schools. He was noted for his book illustrations and watercolours, and also as a designer of textiles and wallpaper.

Minton, Thomas 1765–1836
English pottery and china manufacturer
Born in Shrewsbury, Shropshire, he originally trained as a transfer-print engraver, working for JOSIAH SPODE for a time, but in 1789 he set up the firm which bears his name in Stoke-on-Trent, producing copperplates for transfer-printing in blue underglaze. He is reputed to have invented the willow pattern (for which an original copperplate engraved by him is in the British Museum). In 1793 he built a pottery works at Stoke, where he very soon produced a fine bone china (approximating to hard paste) for which the best period is 1798–1810. Much of it was tableware, decorated with finely painted flowers and fruit. His son, Herbert (his partner from 1817 to 1836), took over the firm at his death.

Minton, Yvonne Fay 1938–
Australian mezzo-soprano
Born in Earlwood, Sydney, she studied at the New South Wales Conservatorium of Music, and after winning a scholarship and the Shell aria contest, went to London where in 1961 she won the Kathleen Ferrier prize. She made her operatic debut in 1964 at the Royal Opera House, Covent Garden, London, where she became a resident artist. Minton has also been a guest member of the Cologne Opera since 1969, and a guest artist with the New York Metropolitan, the Chicago, Paris and Australian opera companies. She is noted for her Octavian in RICHARD STRAUSS's *Der Rosenkavalier*, and for Wagnerian roles, to which her voice is well suited.

Minuit, Peter 1580–1638
Dutch colonial official
Born in Wesel, Rhenish Prussia (now in Germany), probably to Dutch parents, he was sent to America by the Dutch West India Company to become the first director-general of New Netherland, and he bought (1626) Manhattan Island from Native Americans for trinkets worth $24. He later headed the colonists who founded (1638) New Sweden in present-day Delaware.

Mira Bai c.1498–1546
Indian bhakti poet and mystic, devoted to Krishna
She was born a Rajput princess, and was duly married to a prince before she was 20. However, even then she had already surrendered herself to Krishna and neglected her husband as a result. She constantly fought against the traditional roles ascribed to women in society, the crisis coming on the death of her husband when her father-in-law insisted that she become a suttee. She escaped to a community of bhakti devotees who supported her, eventually becoming a wandering ascetic attached to a temple in the holy city of Dwarka. Her poetry reflects her deep love for Krishna, especially in her use of the romantic symbolism of the 'mystical marriage' between herself and her Lord. Her notion of Krishna encompasses both his mythological and transcendent natures. As a result she is able to identify herself with him on the personal level and by seeing herself as being absorbed in him, which helps to explain her wide appeal.

Mirabeau, Honoré Gabriel Riqueti, Comte de 1749–91
French revolutionary politician and orator
Born in Bignon, he was dismissed from the cavalry for his disorderly behaviour, and wrote *Essai sur le despotisme* in hiding in Amsterdam, having eloped with a young married woman. In May 1777 he was imprisoned for three and a half years, during which he wrote *Erotica biblion*, *Ma conversion*, and his famous *Essai sur les lettres de cachet* (2 vols, 1782). In 1786 he was sent on a secret mission to Berlin, and there obtained the materials for his work *Sur la monarchie prussienne sous Frédéric le Grand* (4 vols, 1787). In 1789 he was elected to the States General by the Third Estate for both Marseilles and Aix. When the Third Estate constituted itself the National Assembly, Mirabeau's political acumen made him a great force, while his audacity and volcanic eloquence endeared him to the people. He advocated a constitutional monarchy on the English model but was distrusted both by the court and the extremists. Nonetheless he was elected president of the Assembly in January 1791, but died soon afterwards.

Miralles, Enric 1955–2000
Spanish architect
Born in Barcelona, he studied architecture at the School of Architecture there. He won awards working with the Piñon-Viaplana group (1973–85) and formed his own practice in partnership with Benedetta Tagliabue in 1992. He produced innovative, highly sculptural designs for a variety of buildings, ranging from houses and office buildings to industrial facilities, civic centres and sports halls. His most important projects include the 'Icaria Pergolas' street sunshades in Barcelona (1992), the entrance to the railway station in Takaoka, Japan (1993), the Park-Cemetery in Igualada, Barcelona (1995), considered his greatest achievement, and designs for the new Scottish Parliament in Edinburgh, which was well on its way to completion at the time of his premature death.

Miranda, Carmen, *professional name of* **Maria do Carmo Miranda Da Cunha**, *also known as* **the Brazilian Bombshell** 1909–55
Brazilian singer and actress
Born near Lisbon and raised in Rio de Janeiro, she became a film and radio personality before being taken to the USA by LEE SHUBERT in 1939. She became known as the 'Brazilian Bombshell', and made fun of her diminutive stature by wearing platform shoes and towering hats of fruits and flowers. Her US debut was in the Broadway show *The Streets of Paris* (1939) with GEORGE ABBOTT and Tom Costello. She went on to star in *Down Argentine Way* (1941) and *The Gang's All Here* (1943), which included the song 'The Lady in the Tutti Frutti Hat'. She died suddenly while preparing a television special with Jimmy Durante.

Miranda, Francisco de 1750–1816
Venezuelan revolutionary
Born in Caracas, Venezuela, he served in the Spanish army and the French Revolutionary Wars, then became a leader in the revolution against Spanish rule in Venezuela (1810). He ruled Venezuela briefly as dictator, but a royalist counter-attack prompted him to sign an armistice (1812) yielding the country to the Spanish. He was arrested and sent to Spain, where he died in prison.

Mirandola, Giovanni *See* PICO DELLA MIRANDOLA, COMTE

Mirbeau, Octave 1850–1917
French dramatist, novelist and journalist
Born in Trévières (Calvados), he was a radical, and attracted attention by the violence of his writings. His play *Les Affaires sont les affaires* (1903, 'Business is Business') was adapted by Sidney Grundy (1905). Other works include *Le Jardin des supplices* (1898, Eng trans *Torture Garden*, 1931) and *Le Journal d'une femme de chambre* (1900, Eng trans *A Chambermaid's Diary*, 1934). 🕮 M Renan, *Octave Mirbeau* (1924)

Miró, Joán 1893–1983
Spanish artist
Born in Montroig, he studied in Paris and Barcelona and exhibited with the Surrealists in 1925. In his early years he had great admiration for primitive Catalan art and the Art Nouveau forms of ANTONI GAUDÍ's architecture. Before World War I he painted in Cézannesque and Fauve styles but in 1920 he settled in Paris and came into contact with PICASSO and JUAN GRIS. Seduced by Surrealism he invented a manner of painting using curvilinear, fantastical forms which suggest all kinds of of dreamlike situations. Eventually, these pictures became almost entirely abstract and had a great influence on American Abstract Expressionist artists such as ARSHILE GORKY in the late 1940s and 1950s. His works include *Catalan Landscape* (1923–

24, New York) and *Maternity* (1924). He also designed ballet sets, sculptures, murals, and tapestries.

Miró, Dr José Cardona 1903–74
Cuban politician
He was born in Havana and studied at Havana and Rome universities. He was among the academics who in exile engineered the movement against FULGENCIO BATISTA's ruthless military dictatorship and his eventual downfall in 1958. He was the first prime minister of FIDEL CASTRO's revolutionary government, but Castro stripped him of the premiership after only 45 days, appointing him ambassador to Spain and then to Washington. Instead of taking up the latter post, Miró found political asylum in the Argentine embassy in Havana, and then formed the Cuban National Revolutionary Council (CNRC) in exile in Miami, calling for an uprising against Castro and his replacement by an elected government with himself as provisional president. In the Bay of Pigs fiasco (1961), he felt that President KENNEDY had betrayed his support by not committing sufficient forces to the adventure and failing to order a second invasion. He subsequently resigned his leadership of the CNRC and moved to Puerto Rico, where he worked as a professor of law until his death.

Miron, Gaston 1928–96
French–Canadian poet
Born in Saint-Agathe-des-Montes, Quebec, in the 1950s and 1960s he became a legendary personality in Quebec and Montreal, the author of long poems which he did not care if he published or not, and with a dramatically separatist stance. The best known of these poems was 'La Vie agonique' ('The Anguished Life'). He reached the status of 'Miron le magnifique' with the publication of *L'Homme rapaillé* (1970), a collection of 57 poems on the theme of 'the present impossibility of writing a book'. Some of his poems are translated into English in *The Poetry of French Canada in Translation* (1970, ed John Glassco). 🕮 J Brault, *Miron le magnifique* (1966, in French)

Mirren, Dame Helen, *originally* **Ilyena Vasilievna Mironov** 1945–
English actress
Born to a Russian family in Hammersmith, West London, she was a member of the National Youth Theatre and joined the Royal Shakespeare Company in 1967, where her performances included Ophelia in *Hamlet* (1970), the title role in *Miss Julie* (1971) and Lady Macbeth in *Macbeth* (1974–75). She made her film debut in *Herostratus* (1967) and won acclaim for her roles in *The Long Good Friday* (1979) and *Cal* (1984). Her subsequent pictures include *The Mosquito Coast* (1986), *The Cook The Thief His Wife & Her Lover* (1989), *Where Angels Fear to Tread* (1991), *The Madness of King George* (1994, Academy Award nomination), *Gosford Park* (2001, Academy Award nomination) and *Calendar Girls* (2003). On television, she is best known as policewoman Jane Tennison in *Prime Suspect* (1991–2006). Her other stage plays include a Broadway production of *A Month in the Country* (1995) and *Antony and Cleopatra* at the Royal National Theatre in 1998. She played the title role in the television mini-series *Elizabeth I* (2005) and played ELIZABETH II in the film *The Queen* (2006, Academy Award). She declined a CBE in 1996, but was made a DBE in 2003.

Mirrlees, Sir James Alexander 1936–
Scottish economist and Nobel Prize winner
Born in Minnigaff, Dumfries and Galloway, he studied mathematics at Edinburgh and Cambridge before he became an adviser at the Massachusetts Institute of Technology Center for International Studies on the India Project, New Delhi (1962–63). He was a lecturer then a Fellow of Trinity College, Cambridge, from 1963 to 1968, when he became Edgeworth Professor of Economics at Oxford (1968–95). In 1995 he became professor of political economy at Cambridge. His work in the 1960s concentrated on welfare economics under the assumption that no government can be certain of the future economic climate. For this work he was the joint recipient of the 1996 Nobel Prize in economics with WILLIAM VICKREY, whose economic theories were similar. Mirrlees's later work has focused more on the economies of developing countries. His publications include *Models of Economic Growth* (with N H Stern, 1973) and *Project Appraisal and Planning for Developing Countries* (with I M D Little, 1974). He was knighted in 1997.

Mises, Richard von 1883–1953
US mathematician and philosopher
Born in Austria, he was professor at the universities of Dresden (1919), Berlin (1920–33), Istanbul, and from 1939 at Harvard. An authority in aerodynamics and hydrodynamics, he set out in *Wahrscheinlichkeit, Statistik und Wahrheit* (1928, 'Probability, Statistics and Truth') a frequency theory of probability which has had a wide influence, even though not generally accepted.

Mishima Yukio, *pseudonym of* **Hiraoka Kimitake** 1925–70
Japanese writer
Born in Tokyo, he attended Tokyo University before becoming a civil servant and embarking on a prolific writing career which, as well as 40 novels, produced poetry, essays and modern Kabuki and Nō drama. His first major work was *Kamen no Kokuhaku* (1949, Eng trans *Confessions of a Mask*, 1958) which dealt with his discovery of his own homosexuality and the ways in which he attempted to conceal it. His great tetralogy, *Hojo no umi* (1965–70, Eng trans *The Sea of Fertility*, 1972–74), has a central theme of reincarnation, and spans Japanese life and events in the 20th century. Passionately interested in the chivalrous traditions of Imperial Japan, he believed implicitly in the ideal of a heroic destiny, the pursuit of an absolute ideal of beauty, and the concept of a glorious and honourable death in battle. He became an expert in martial arts, and in 1968 founded the Shield Society, a group of 100 youths dedicated to a revival of *Bushido*, the Samurai knightly code of honour. The most extreme expression of his élitist right-wing views was in an essay *Taiyo to tetsu* (1968, Eng trans *Sun and Steel*, 1970), and in the same year he committed suicide by performing *seppuku* following a carefully staged token attempt to rouse the nation to a return to pre-war nationalist ideals. 🕮 H S Stokes, *The Life and Death of Yukio Mishima* (1975)

Missoni, (Tai) Ottavio 1921–
Italian knitwear designer
He was born in Yugoslavia, the son of an Italian father and a Serbian mother. A former athlete, he founded the Missoni company in Milan with his wife, Rosita, in 1953. At first manufacturing knitwear to be sold under other labels, they later created, under their own label, innovative knitwear notable for its sophistication and distinctive colours and patterns.

Mistinguett, *stage name of* **Jeanne Marie Bourgeois** 1874–1956
French dancer and actress
Born in a suburb of Paris, she was given her stage name by friends who thought that 'Miss' characterized her 'English' looks. She made her debut in 1895 and reached the height of her success with MAURICE CHEVALIER at the Folies Bergère. A highly popular music-hall artiste for the next 30 years, she had a vivacious stage personality and made up for her weak voice by her remarkable versatility and originality in comedy. She also distinguished herself as a straight actress in *Madame Sans-Gène* and *Les Misérables*. Among her most famous songs are 'Mon Homme' and 'J'en ai marre'. She published her memoirs, *Toute ma vie* (*Mistinguett, Queen of the Paris Night*), in 1954.

Mistral, Frédéric 1830–1914
French poet and Nobel Prize winner
Born in Maillane, near Avignon, he studied law at Avignon, then returned home to work on the land and write poetry. He helped to found the Provençal renaissance movement (Félibrige school). In 1859 his epic *Mirèio* (Eng trans 1890) gained him the poet's prize of the Académie Française and the Legion of Honour. He was awarded the Nobel Prize in literature in 1904. Other works are an epic, *Calendau* (1861), poems *Lis Isclo d'or* (1876), a tragedy *La Reino Jano* (1890), and a Provençal–French dictionary (1878–86). 🕮 L Larguier, *Mistral* (1930, in French)

Mistral, Gabriela, *pseudonym of* **Lucila Godoy de Alcayaga** 1889–1957
Chilean poet, diplomat and teacher, and Nobel Prize winner
Born in Vicuña, as a teacher she won a poetry prize with her *Sonetos de la muerte* (1914, 'Sonnets of Death') at Santiago in 1915. She taught at Columbia University, Vassar and in Puerto Rico, and was formerly consul at Madrid and elsewhere. The cost of publication of her first book, *Desolación* (1922, 'Desolation'), was paid by the teachers of New York. Her work is inspired by religious sentiments and a preoccupation with sorrow and death. Her career as a teacher led her to write for children, notably the songs in *Ternura* (1924); much of her children's writing is translated in *Crickets and Frogs* (1972). She was awarded the Nobel Prize in literature in 1945. 🕮 M Arce de Vázquez, *Gabriela Mistral: the poet and her work* (1964)

Mitchel, John 1815–75
Irish patriot
Born near Dungiven, County Derry, the son of a Presbyterian minister, he studied at Trinity College, Dublin, practised as an

attorney, and became assistant editor of the *Nation*. Starting the *United Irishman* (1848), he was tried for his articles on a charge of 'treason-felony' and sentenced to 14 years' transportation, but in 1853 he escaped from Van Diemen's Land (Tasmania) to the USA, and published his *Jail Journal* (1854). Returning in 1874 to Ireland, he was the next year elected to parliament for Tipperary, declared ineligible and re-elected, but died the same month.

Mitchell, Adrian, *also known as* **Volcano Jones, Apeman Mudgeon** and **Gerald Stimpson** 1932–
English poet and playwright
Born in London, he was educated at Oxford, where he was literary editor of *Isis* magazine. In the 1960s he gained attention as a performance poet, his idealistic socialism infusing his work with pacifism and an interest in connecting with mass audiences. In *The Apeman Cometh: Poems* (1975), he began to turn his attention to children's poems. As a dramatist, both for adults and children, he has created original plays and adaptations, including works based on IBSEN, CALDERÓN and DICKENS; with director PETER BROOK, he adapted PETER WEISS's *Marat/Sade* (1964) and penned the lyrics to the influential anti-war piece *US* (1966). Combining elements of pantomime and music hall, his plays are characterized by their informal, sometimes surrealist structure. He has also written for film, television and radio, published four novels, edited and translated poetry volumes and contributed to various newspapers and magazines. A multi-award winner and fellow of the Royal Society of Literature, he has been a resident writer and fellow at schools, universities and theatres.

Mitchell, Arthur 1934–
US dancer, choreographer and director
Born in New York City, he studied at the High School for Performing Arts and the School of American Ballet. In 1956 he joined New York City Ballet and created roles in GEORGE BALANCHINE's *Agon* (1957) and *A Midsummer Night's Dream* (1962). He was the first African-American principal dancer to join that company, and his dream, following the assassination of MARTIN LUTHER KING in 1968, was to found his own group in order to develop opportunities for fellow black dancers. He immediately began laying foundations, and Dance Theatre of Harlem made its highly successful debut in New York in 1971. Quickly growing from a school in a garage, Dance Theatre of Harlem has become a company of international standing. He was awarded the National Medal of Arts in 1995.

Mitchell, David 1969–
English novelist
Born in Southport, Lancashire, he was educated at the University of Kent. His first novel, *Ghostwritten* (1999), which won the Mail on Sunday/John Llewellyn Rhys Prize, features nine intersecting but distinct tales, establishing the heterogeneous style for which he is known. Both *number9dream* (2001) and *Cloud Atlas* (2004), which again features a series of seemingly disconnected narratives, were short-listed for the Man Booker Prize. *Black Swan Green* (2006) is a semi-autobiographical *Bildungsroman* told from the perspective of a 13-year-old boy.

Mitchell, George John 1933–
US Democrat politician
Born in Waterville, Maine, he worked part-time to gain his education as a lawyer and was called to the US Bar in 1960. In 1962 he became a special adviser to Senator EDMUND MUSKIE and began his own political career. An attempt to run for governor of Maine failed in 1974 and he returned to private legal practice, but in 1980 he was elected Senator of Maine in succession to Muskie. In 1995, with the Democrats in power, he was appointed Special Adviser to President CLINTON for Economic Initiatives in Ireland. The son of an Irishman, Mitchell had an interest in the country that led to his appointment as chairman of the Northern Ireland peace talks (1995–98). In 1999 he became Chancellor of Queen's University, Belfast, and was awarded the Presidential Medal of Freedom the same year. In 2001 he produced the Mitchell Report on the Israeli-Palestinian conflict. He published *Making Peace* in 1999.

Mitchell, Sir James FitzAllen 1931–
St Vincent and the Grenadines statesman
He trained and worked as an agronomist (1958–65) and then bought and managed a hotel in Bequia, St Vincent. He entered politics through the St Vincent Labour Party (SVLP) and in the pre-independence period served as Minister of Trade (1967–72). He was then premier (1972–74), heading the People's Political Party (PPP). In 1975 he founded the New Democratic Party (NDP) and, as its leader, became prime minister in 1984, winning a historic fourth term in 1998. He resigned in 2000. He received a knighthood in 1995.

Mitchell, John Newton 1913–88
US Attorney-General
Born in Detroit, he was a law partner of RICHARD M NIXON in New York City, and he managed Nixon's successful presidential campaign in 1968. As Attorney-General (1969–72), he ordered wiretaps without court authorization and prosecuted antiwar protesters. He was chosen to run Nixon's 1972 re-election campaign but resigned at the outset of the Watergate affair, and in 1975 he was convicted of conspiracy, obstruction of justice, and perjury. After serving 19 months in prison he was released in 1979.

Mitchell, Joni (Roberta Joan), *née* **Anderson** 1943–
Canadian singer and songwriter
Born in McLeod, Alberta, she studied commercial art for a time, then turned to folk music as a teenager. A short-lived marriage to folk singer Chuck Mitchell in 1965 took her to the USA, where she made her first album, *Song of a Seagull* (1967). The original imagery of her songs established her as an important bridge between folk and pop, and she cut several highly regarded, and often highly confessional, albums. Her music became increasingly complex and jazz-influenced on later recordings like *The Hissing of Summer Lawns* (1975), culminating in her misjudged but sincere tribute *Mingus* (1979). She has continued to make intelligent pop music, but has also devoted increasing amounts of time and creative energy to her painting. She resumed touring after a twelve-year gap in 1994, in support of her *Turbulent Indigo* album. In 1997 she was reunited with the daughter she had given up for adoption in 1965. Following 2002's *Travelogue*, on which she reworked songs from her back catalogue, she announced her disaffection with the record industry and retirement from it. The same year, she received a Grammy for lifetime achievement and was made a Companion of the Order of Canada. 🕮 Karen O'Brien, *Joni Mitchell: Shadows and Light – The Definitive Biography* (2002)

Mitchell, Juliet 1934–
British feminist and writer
Born in New Zealand, she moved to Britain with her family in 1944 and was educated at King Alfred School, Hampstead, London, and at St Anne's College, Oxford. After studying for a DPhil at Oxford, she subsequently lectured at the University of Leeds (1962–63) and at the University of Reading (1965–70). From 1971 she worked as a psychotherapist and psychoanalyst, also working as a freelance writer and broadcaster. She has also lectured on psychoanalysis throughout the world and has continued to hold further visiting professional appointments in Europe and the USA since joining the University of Cambridge in 1996. Her publications include *Women's Estate* (1972), *Psychoanalysis and Feminism* (1974) and *Women: The Longest Revolution* (1966). She has also co-authored *The Rights and Wrongs of Women* (1976) and co-edited *What is Feminism* (1986), both with ANN OAKLEY.

Mitchell, Margaret 1900–49
US novelist
Born in Atlanta, Georgia, she studied at Smith College, Northampton, Massachusetts, for a medical career, but turned to journalism. After her marriage in 1925, she began the ten-year task of writing her only novel, *Gone with the Wind* (1936), which won the Pulitzer Prize, sold over 25 million copies, was translated into 30 languages and was the subject of a celebrated film in 1939. 🕮 A Edwards, *The Road to Tara* (1983)

Mitchell, Maria 1818–89
US astronomer
Born in Nantucket, Massachusetts, she worked as a librarian on the island while observing the skies at night. Upon discovering a new comet in 1847, she became the first woman to be elected to the American Academy of Arts and Sciences. Her first professional commission was the computing of tables of the planet Venus for the American Ephemerides and Nautical Almanac, a duty she performed for 20 years (1849–68). From 1865 to 1888 she was professor of astronomy at Vassar College in Poughkeepsie, New York.

Mitchell, Sir Peter Chalmers 1864–1945
Scottish zoologist and journalist
Born in Dunfermline, Fife, he began his career as a lecturer at the universities of Oxford and London, where he taught comparative anatomy. In 1903 he was elected secretary of the Zoological Society and inaugurated a period of prosperity at the London Zoo, being responsible for the Mappin terraces,

Whipsnade, the Aquarium and other improvements. His books on zoology included *The Nature of Man* (1904) and *Materialism and Vitalism in Biology* (1930). He was elected FRS in 1906, and knighted in 1929.

Mitchell, Peter Dennis 1920–92
English biochemist and Nobel Prize winner
Born in Mitcham, Surrey, he graduated from Cambridge and taught there (1943–55) and at Edinburgh University (1955–63) before founding his own research institute, the Glynn Research Laboratories at Bodmin in Cornwall (1964), to extend his studies of energy generation in cells at the molecular level. In the 1960s he proposed a new theory of energy generation, in which electron transport causes the formation of a proton gradient, which alters molecular structures and releases energy. Although at first greeted with scepticism, his views became widely accepted, and his theory was formally acknowledged when he was awarded the Nobel Prize in chemistry in 1978.

Mitchell, Reginald Joseph 1895–1937
English aircraft designer
Trained as an engineer, he was led by his interest in aircraft to join the Vickers Armstrong Supermarine Co in 1916, where he soon became chief designer. He designed world-beating seaplanes for the Schneider trophy races (1922–31) and later the famous Spitfire, the triumph of which he did not live to see.

Mitchell, Silas Weir 1829–1914
US physician and writer
Born in Philadelphia, he was a surgeon in the Union army in the American Civil War. He specialized in nervous diseases and was a pioneer in the application of psychology to medicine. As well as a host of historical novels and poems he wrote medical texts, including *Injuries of Nerves* (1872) and *Fat and Blood* (1877).

Mitchell, Sir Thomas Livingstone 1792–1855
Scottish explorer
Born in Craigend, Stirlingshire, he served in the Peninsular War, and from 1828 was surveyor-general of New South Wales in Australia. In four expeditions (1831, 1835, 1836, 1845–47) he did much to explore Eastern Australia ('Australia Felix') and Tropical Australia, especially the Murray, Glenelg and Barcoo rivers.

Mitchell, Warren, *originally* **Warren Misel** 1926–
English actor
Born in London, he studied at Oxford and RADA and made his first appearance at the Finsbury Park Open Air Theatre (1950). His interpretation of Willy Loman in ARTHUR MILLER's *Death of a Salesman* at the National Theatre (1979) was highly praised, as was his performance in Miller's *The Price* (2003, Olivier award). He is best known for playing Alf Garnett, a garrulous, foul-mouthed, right-wing Cockney in the television series *Till Death Us Do Part* (1966–78). The character returned in two films, *Till Death Us Do Part* (1968) and *The Alf Garnet Saga* (1972), a stage show, *The Thoughts of Chairman Alf* (1976), and a further television series, *In Sickness and In Health* (1985–92). Mitchell has also appeared in the series *So You Think You've Got Troubles* (1991) and the mini-series *Jackaroo* (1993). His many films include *Carry On Cleo* (1964), *The Spy Who Came in from the Cold* (1965), *Help!* (1965) and JACK ROSENTHAL's *The Chain* (1985).

Mitchell, William 1879–1936
US soldier and aviation pioneer
Beginning his army career in the signal service, he successfully commanded the US air forces in World War I, reaching the rank of brigadier-general by 1918. He foresaw the development and importance of air power in warfare, but his outspoken criticism of those who did not share his convictions resulted in a court martial (1925) which suspended him from duty. After his resignation he lectured and wrote in support of his ideas. He was posthumously promoted and decorated.

Mitchison, Naomi Margaret, *née* **Haldane** 1897–1999
Scottish writer
Born in Edinburgh, the daughter of the physiologist JOHN SCOTT HALDANE, and educated at the Dragon School, Oxford, she won instant attention with her brilliant and personal evocations of Greece and Sparta in a series of novels including *The Conquered* (1923), *Cloud Cuckoo Land* (1925) and *Black Sparta* (1928). The erudite *The Corn King and the Spring Queen* (1931) brought to life the civilizations of ancient Egypt, Scythia and the Middle East. She travelled widely, and in 1963 was made tribal adviser and 'mother' to the Bakgatla of Botswana. She wrote more than 70 books, among them her memoirs *Small Talk* (1973), *All Change Here* (1975) and *You May Well Ask* (1979). She married the Labour MP Gilbert Richard Mitchison (1890–1970, created life peer in 1964) in 1916, and from 1937 lived in Carradale on the Mull of Kintyre, Scotland. Later publications include *A Girl Must Live* (1990) and *The Oathtakers* (1991). 🕮 J Benton, *A Century of Experiment* (1990)

Mitchison, Rosalind Mary, *née* **Wrong** 1919–2002
English historian
Born in Manchester, she was educated at Channing School, Highgate, London, and Lady Margaret Hall, Oxford, and became assistant lecturer in history first at Manchester University (1943–46), then at Edinburgh (1954–57). In 1970 she published *A History of Scotland*, which was notable for its forthright language and integration of economic and social history with political history, and became a standard text for the next 20 years. She was professor of social history at Edinburgh (1981–86), and her many works include *British Population Change Since 1869* (1977), *Lordship and Patronage: Scotland 1603–1745* (1983) and *People and Society in Scotland, 1760–1830* (1988). A vigorous and inspirational lecturer and teacher, she was the foremost authority on the Scottish poor law.

Mitchum, Robert 1917–97
US film actor
Born in Bridgeport, Connecticut, a youth spent as a travelling labourer, vagrant and professional boxer took him to Hollywood where he began his career in 1943. He was nominated for an Academy Award for his performance in *The Story of G.I. Joe* (1945) and became a prolific leading man especially noted for his association with the post-war film noir thriller. His laconic, heavy-lidded manner was deceptively casual, disguising a potent screen presence and thorough professionalism that enlivened many routine assignments. His many notable films include *Out of the Past* (1947), *The Night of the Hunter* (1955), *The Sundowners* (1960), *Ryan's Daughter* (1970), *The Friends of Eddie Coyle* (1973) and *Farewell My Lovely* (1975). His television performances include the epic mini-series *The Winds of War* (1983) and its sequel *War and Remembrance* (1989).

Mitford, Jessica Lucy 1917–96
English writer
She was born in Burford, Oxfordshire, the fifth of the six daughters of the second Baron Redesdale, and sister of DIANA MOSLEY, NANCY MITFORD and UNITY MITFORD. She went to the USA in 1939 and joined the US Communist Party, her experiences of which were the subject for *A Fine Old Conflict* (1977). Her observation of various aspects of American society provided material for her works, such as her bestselling *The American Way of Death* (1963), an exposé of the funeral industry's unethical practices, a new edition of which she was working upon when she died. *The Trial of Dr Spock* (1970), based on the trials of anti-Vietnam War activists, was inspired by her interest in civil-rights cases. Other works include *Hons and Rebels* (1960), which is her autobiography and the story of the unconventional Mitford childhood, and *The Making of a Muckraker* (1979). 🕮 Peter Y Sussman (ed), *Decca: The Letters of Jessica Mitford* (2006)

Mitford, Mary Russell 1786–1855
English novelist and dramatist
Born in Alresford, Hampshire, she won £20,000 in a lottery at the age of ten and attended school in Chelsea. However, her father was a spendthrift, and as the family became more and more impoverished she had to write to earn money. She produced several plays, but her gift was for sketches of country manners, scenery and character, which after appearing in magazines were collected as *Our Village* (5 vols, 1824–32). She received a civil list pension in 1837 which was increased on her father's death from subscriptions raised to pay his debts. In 1852 she published her *Recollections of a Literary Life*. 🕮 V Watson, *Mary Russell Mitford* (1949)

Mitford, Nancy Freeman 1904–73
English writer
Born in London, daughter of the second Baron Redesdale, and educated at home, she established a reputation with her witty novels such as *The Pursuit of Love* (1945) and *Love in a Cold Climate* (1949), followed by *The Blessing* (1951) and *Don't Tell Alfred* (1960). After World War II she settled in France and wrote her major biographies *Madame de Pompadour* (1953), *Voltaire in Love* (1957), *The Sun King* (1966) and *Frederick the Great* (1970). As one of the essayists in *Noblesse Oblige*, edited by herself (1956), she helped to originate the famous 'U', or upper-class, and 'non-U' classification of linguistic usage and behaviour. She was the elder sister of DIANA MOSLEY, UNITY MITFORD and JESSICA MITFORD. 🕮 Charlotte Mosley (ed), *The Letters of*

Nancy Mitford and Evelyn Waugh (1996); Selina Hastings, *Nancy Mitford* (1985)

Mitford, Unity Valkyrie 1914–48
English socialite
The daughter of the second Baron Redesdale and sister of DIANA MOSLEY, JESSICA MITFORD and NANCY MITFORD, she was notorious for her attempted suicide on the outbreak of World War II and for her associations with leading Nazis in Germany, including HITLER. She returned to Great Britain in 1940, suffering from a gunshot wound.

Mithridates VI, *surnamed* **Eupator**, *called* **the Great** c.132–63 BC
King of Pontus
He succeeded to the throne (c.120 BC) as a boy, but soon subdued the tribes who bordered on the Euxine as far as the Crimea, and made an incursion into Cappadocia and Bithynia, then Roman. In the First Mithridatic War (88 BC), Mithridates, initially successful, was compelled to make peace with SULLA (85 BC), relinquishing all his conquests in Asia. The aggressions of the Roman legate led to the Second Mithridatic War (83–81 BC), which Mithridates won. In the Third Mithridatic War (74 BC) he prospered with some Roman support until LUCULLUS compelled him to take refuge with his son-in-law, Tigranes I of Armenia (72 BC), and defeated both of them at Artaxata (68 BC). In 66 BC POMPEY defeated Mithridates on the Euphrates, and his son's rebellion caused him to kill himself. He was cruel and sensual but energetic and determined, and his political skill enabled him to pose a serious threat to Rome; he was unlucky to meet able Roman generals.

Mitre, Bartolomé 1821–1906
Argentine politician
Exiled by General JUAN MANUEL DE ROSAS, he returned to the country as a follower of General Justo José de Urquiza after the Battle of Monte Caseros, which brought about Rosas's downfall. He became governor of Buenos Aires in 1860. As president (1862–68), he created a national administrative structure in Buenos Aires, set about the construction of railroads and encouraged immigration. He was defeated by DOMINGO SARMIENTO in the 1868 presidential elections. In 1870 he founded the newspaper *La Nación*, and in 1874 attempted a coup against Sarmiento's choice for president, Nicolas Avellanada. Mitre failed, however, to rally support among the estancieros (ranch owners), and was jailed. He made another bid for the presidency in 1891 as the candidate for the Unión Cívica, but withdrew in favour of the Conservative candidate.

Mitropoulos, Dimitri 1896–1960
US conductor and pianist
He was born in Athens and studied at the Athens Conservatory and under FERRUCCIO BUSONI in Berlin. After working in Berlin and Paris, he went to the USA where he made his debut with the Boston Symphony Orchestra in 1937. He became a US citizen in 1946. He conducted the Minneapolis Symphony Orchestra (1937–49) and the New York Philharmonic Orchestra (1949–58), and conducted the first performance of SAMUEL BARBER's opera *Vanessa*. He was renowned as an exponent of contemporary music, notably that of SHOSTAKOVICH.

Mitscherlich, Eilhard 1794–1863
German physical and organic chemist
Born in Neuende, near Jeve, he studied Persian at Heidelberg and Paris, medicine at Göttingen, and geology, mineralogy, chemistry and physics in Berlin and in Stockholm under JÖNS JACOB BERZELIUS. He became professor of chemistry at the Friedrich Wilhelm Institute in Berlin, and was elected to the Berlin Academy of Sciences in 1852. He contributed to many branches of chemistry, but is best known for his work in crystallography. He identified isomorphism and diamorphism in crystals. While visiting Paris (1823–24) he and AUGUSTIN JEAN FRESNEL discovered that the optical axes of a biaxial crystal change with a change in temperature. Mitscherlich also investigated the decomposition products of benzaldehyde and benzoin, synthesized artificial minerals by fusing silica with various metallic oxides and wrote a number of successful textbooks.

Mitsugu, Akimoto *See* CHIYONFUJI

Mitterrand, François Maurice Marie 1916–96
French statesman
Born in Jarnac in south-west France, the fifth child of a stationmaster, he attended the University of Paris during the mid-1930s, studying law and politics and immersing himself in French literature. During World War II he served with the French forces (1939–40), was wounded and captured, but escaped (on the third attempt) in December 1941 from a prison camp in Germany and became a network commander in the French Resistance. He was awarded the Legion of Honour, the Croix de Guerre and the Rosette de la Résistance. He was a Deputy in the French National Assembly almost continuously from 1946, representing the constituency of Nièvre (near Dijon), and held ministerial posts in eleven centrist governments between 1947 and 1958. A firm believer in the democratic traditions of Republican France, he opposed CHARLES DE GAULLE's creation of the Fifth Republic in 1953 and, as a result, lost his Assembly seat in the 1958 election. He became radicalized, left the Catholic Church during the early 1960s, and began building up a strong new, left-of-centre anti-Gaullist alliance, the 'Federation of the Left'. After returning to the National Assembly in 1962, he performed creditably as the Federation's candidate in the 1965 presidential election against de Gaulle and in 1971 became leader of the new Socialist Party (PS). He embarked on a successful strategy of electoral union with the (then important) Communist Party, bringing major gains for the Socialists, establishing them as the single most popular party in France by 1978 and in 1981 was elected president, defeating VALÉRY GISCARD D'ESTAING. As president, Mitterrand initially introduced a series of radical economic and political reforms, including programmes of nationalization and decentralization. However, deteriorating economic conditions after 1983 forced a policy U-turn and in the 1986 election the Socialists lost their National Assembly majority, compelling him to work with a prime minister, JACQUES CHIRAC, from the opposition 'right coalition'. Despite being forced to concede considerable executive authority to Chirac in this unique 'cohabitation' experiment, Mitterrand, nicknamed 'the fox', outmanoeuvred his younger rival, and comfortably defeated him in the presidential election of 1988. Following fresh National Assembly elections in which the conservative parties lost their majority, the moderate socialist, MICHEL ROCARD, was appointed prime minister in a new left-of-centre administration. During the Gulf crisis of 1990 Mitterrand tried to find a diplomatic settlement but when this failed he demonstrated his commitment to the Atlantic alliance by sending French troops to the area. In 1992 the Socialist Party suffered a crushing defeat, with the right-wing parties winning 484 seats to the left's 92. Despite Mitterrand's peacemaking efforts in Bosnia the same year, the combination of France's recession and unemployment situation and the scandals which plagued the Socialists proved too much and in 1995 he lost the presidency to Jacques Chirac. 🕮 Alan Clark (ed), *Anthologie Mitterrand* (1986); Denis MacShane, *François Mitterrand: A Political Odyssey* (1982)

Mivart, St George Jackson 1827–1900
English biologist
Born in London, although educated in law he devoted himself to zoological research. He became professor of zoology and biology at the Roman Catholic University College in Kensington (1874–84) and in 1890 accepted a chair of philosophy of natural history at Leuven University. Although he supported the theory of evolution, he rejected natural selection as its mechanism and proposed in its place the idea of an innate plasticity which he called individuation, publishing books in support of his views such as *The Genesis of Species* (1871), *Nature and Thought* (1883) and *The Origin of Human Reason* (1889).

Miyake, Issey 1938–
Japanese fashion designer
He was born in Hiroshima, studied at Tama Art University in Tokyo, and spent six years in Paris and New York fashion houses. Although he showed his first collection in Tokyo in 1963, he founded his studio there only in 1971. His first subsequent show was in New York the same year, followed by a show in Paris in 1973. His distinctive style combines eastern and western influences in garments which have an almost theatrical quality. Loose-fitting but with dramatic often asymmetric outline, his clothes achieve richness by varied textures, weaves and patterns rather than by colour which is often subdued.

Mizoguchi, Kenji 1898–1956
Japanese film director
Born in Tokyo into a poor family, he left school at 13 and worked in a number of jobs before becoming an actor in 1918. He made his debut as screen director two years later, and in a career lasting 34 years made more than 80 films, many exploring the place of women in Japanese society. Among his masterpieces are *The Life of Oharu* (1952) and *Ugetsu* (1953). 🕮 Donald Kirihara, *Patterns of Time: Mizoguchi and the 1930s* (1992)

Mlynar, Zdenek 1930–97
Czechoslovak politician
He was born in Vysoke Myto, Bohemia. Coming of age in Communist Czechoslovakia, educated in law in Moscow in the last years of STALIN and the first years of KHRUSHCHEV, and then observing the slow stagnation of the NOVOTNÝ years in Czechoslovakia, he became a reformer through disillusionment. However, during the period of the Prague Spring (1968), when he became a secretary of the purged Communist Party Central Committee, he made a major contribution to ALEXANDER DUBČEK's action programme and was one of the leaders abducted to Moscow following the Soviet invasion. Released with the others, he quickly lost his party function and eventually, when he signed Charter '77 (1977), he went to Austria and taught politics at Innsbruck. He returned to Czech politics in the 1990s as a member of the reform Communist group Left Bloc.

Mnemon *See* ARTAXERXES II

Mnouchkine, Ariane 1938–
French stage director and dramatist
She studied in Paris and London and set up the Association Théâtrale des Étudiants de Paris with fellow students of the Sorbonne (1959), putting on plays, organizing workshops and lectures. In 1962 she travelled to Cambodia and Japan and on her return founded the Théâtre du Soleil as a theatre co-operative (1963). The early productions were influenced by the teachings of STANISLAVSKY, and their first major success came with a production of ARNOLD WESKER's *The Kitchen* (1967). After the student uprising of May 1968, the company performed a series of collective improvisations based on techniques of collage, circus and continuous and discontinuous narrative. One of the company's best-known works is *1789*, first produced in 1970. Her biographical film *Molière* (1978) was nominated for several awards. With the feminist poet and philosopher HÉLÈNE CIXOUS she created the television films *La Nuit miraculeuse* ('The Night of Miracles', 1989) and *Tambours sur la digue* ('Drums on the Dyke', 2003).

Moberg, (Carl Artur) Vilhelm 1898–1973
Swedish writer
Born in Algutsboda, Småland, he came from a family of crofters and enlisted soldiers and remained loyal to his background in his writing. His best-known work is the series of novels that discuss with documentary accuracy the 19th-century mass migration of Swedes to the USA: *Utvandrarna* (1949, Eng trans *The Emigrants*, 1951), *Invandrarna* (1952, Eng trans *Unto a Good Land*, 1957), *Nybyggarna* (1956, 'The Settlers') and *Sista brevet till Sverige* (1959, 'Last Letter to Sweden'). His unfinished *Min svenska historia 1–2* (1970–71, 'My Swedish History') looks at history from the viewpoint of the common people. He was a popular dramatist and several of his novels, notably *The Emigrants*, have been filmed. 🕮 P Holmes, *Vilhelm Moberg* (1980)

Möbius, August Ferdinand 1790–1868
German mathematician
Born in Schulpforta, he was professor at Leipzig University, where he worked on analytical geometry, statics, topology and theoretical astronomy. He extended Cartesian coordinate methods to projective geometry, and gave a straightforward algebraic account of statics, using vectorial quantities before vectors as such entered mathematics. In topology he investigated which surfaces can exist, and became one of the discoverers of the 'Möbius strip' (a one-sided surface formed by giving a rectangular strip a half-twist and then joining the ends together). He also examined in detail the possible types of three-dimensional spaces which can be created by similar gluing constructions. 🕮 John Fauvell, Raymond Flood and Robin Wilson (eds), *Möbius and His Band: Mathematics and Astronomy in Nineteenth-Century Germany* (1993)

Mobutu Sese Seko Kuku Ngbendu Wa Za Banga, *originally* **Joseph-Désiré Mobutu** 1930–97
Zairean soldier and politician
Born into a poor family in Lisala, he undertook army training and a period of study in Brussels, before joining the Force Publique in 1949. By 1956 he was a colonel. He joined PATRICE LUMUMBA's Mouvement National Congolais in 1958 and was Chief of Staff in 1960 at the time of independence. The indecisiveness of government in Leopoldville led him to take over the government to deal with the problem of Katanga's secession but he handed power back to civilians within five months. After the 1963–65 civil war, he intervened again, this time permanently. He renamed the country Zaire in place of the Belgian Congo and imposed a degree of stability on to the country which had hitherto been unknown. Backed by US money and the power of the army, his regime became increasingly unpopular. By 1993 Zaire (now renamed the Democratic Republic of Congo) was in a state of financial collapse; meanwhile, Mobutu lived in splendour, having amassed a fortune of over $6 billion from his country's resources. He was forced to abandon democratic elections and ruled through a military council. In May 1997, LAURENT KABILA's army forced him into exile and brought his dictatorship to an end. His health already failing, Mobutu died four months later in Rabat, Morocco. 🕮 Kari i Bond Nguza, *Mobutu, ou L'Incarnation du mal Zairois* (1982)

Model, Lisette, *née* **Elise Amelie Felicie Stern** 1901–83
US photographer
Born in Vienna of Austrian-Italian and French parentage, she studied music with composer ARNOLD SCHOENBERG (1918–20), and in Paris (1922). She began to paint in 1932 and to photograph in 1937, both for pleasure and in the hope of employment as a darkroom technician. Moving to New York in 1938, she worked as a freelance photographer for *Harper's Bazaar* and other publications (1941–57). She also taught photography at the New School for Social Research, New York (1951–82), where DIANE ARBUS was among her students. Her work was first exhibited in 1940 in the exhibition 'Sixty Photographs: A Survey of Camera Aesthetics' at the Museum of Modern Art, New York. Retrospectives were held at the New Orleans Museum of Art (1981) and the National Gallery of Canada, Ottawa (1990).

Modersohn-Becker, Paula, *née* **Becker** 1876–1907
German painter
Born in Dresden, she joined an artists' colony at the village of Worpswede, and married a fellow artist, Otto Modersohn. She made several trips to Paris between 1900 and 1906 where she came under the influence of avant-garde painters such as PAUL GAUGUIN and CÉZANNE. Her subsequent paintings, in which personal response in the form of simple forms and strong colour takes precedence over realistic portrayal, place her at the beginning of the German Expressionist movement.

Modigliani, Amedeo 1884–1920
Italian painter and sculptor
He was born in Livorno, Tuscany. His early work was influenced by the painters of the Italian Renaissance, particularly the primitives, and in 1906 he moved to Paris, where he was further influenced by TOULOUSE-LAUTREC and 'les Fauves'. In 1909, impressed by the Romanian sculptor CONSTANTINE BRANCUSI, he took to sculpture and produced a number of elongated stone heads in African style. He continued to use this style when he later resumed painting, with a series of richly coloured, elongated portraits – a feature characterizing all his later work. In 1918 in Paris he held one of his first one-man shows, which included some very frank nudes; the exhibition was closed for indecency on the first day. It was only after his death from tuberculosis that he obtained recognition and the prices of his paintings soared. 🕮 William Fifield, *Modigliani* (1976)

Modigliani, Franco 1918–2003
US economist and Nobel Prize winner
Born in Rome, he took a law degree in Rome in 1939, then emigrated to the USA. After teaching at a number of smaller institutions, he held professorships at Illinois (1949–52), Carnegie-Mellon (1952–60) and Northwestern (1960–62) universities, and at Massachusetts Institute of Technology (1962–88). He was awarded the 1985 Nobel Prize in economics for his work on two fundamental theories: personal saving and corporate finance.

Modjeska, Helena 1844–1909
Polish actress
Born in Kraków, she began to act in 1861, and became well known in her native city. She then became the leading actress in Warsaw (1868–76). After learning English, however, she achieved her greatest triumphs in the USA and Great Britain, in such roles as Juliet, Rosalind, and Beatrice, and in *La Dame aux camélias* ('The Lady with the Camellias'). She wrote *Memories and Impressions* (1910).

Modotti Mondini, Tina (Assunta Adelaide Luigia) 1896–1942
Mexican photographer, model and revolutionary
Born in Udine, Italy, she worked in a textile factory there before emigrating to San Francisco in 1913. In 1918 she went to Hollywood and became an actress. She met photographer EDWARD WESTON around 1920 and, living with him in Mexico (1923–26), modelled for him and the muralists DIEGO RIVERA and JOSÉ OROZCO. Learning photography there she became Weston's partner in a

photographic studio, working on illustrations for books, newspapers and magazines. In 1927 she joined the Communist Party in Mexico and became increasingly involved with revolutionary politics, forming liaisons with the Cuban revolutionary Julio Antonio Mella (1928) and with the communist Vittorio Vidali (from c.1933). Deported from Mexico in 1929, she moved to Berlin, then Moscow (1931–34) and Spain (1935–38), where she worked for the relief organization Red Aid. She returned with Vidali to Mexico in 1939, where she died.

Modrow, Hans 1928–
German politician
He was born in Jasenitz (now in Poland) and after serving his apprenticeship as a locksmith, served in the German army from 1942 until the end of World War II. From 1949 he was active in the Socialist Unity Party (SED), taking office as a member of East Berlin city committee (1953–61) and city council (1953–71). A member of the Volkskammer from 1958 to 1990, in 1967–71 he was head of Agitprop. In 1973 he was elected First Secretary for Dresden, and elected to the party's Central Committee. In 1989, as demonstrations for a more liberal regime and the exodus to West Berlin continued, his reputation as a liberal and his personal popular support brought his appointment as prime minister of a new East German government pledged to reform and free elections. Shortly after his meeting with West Germany's Chancellor KOHL in 1989, Modrow announced a four-point plan to reunify Germany, and within months, hardliners such as ERICH HONECKER, EGON KRENZ and Willi Stoph (1914–99) had resigned or been arrested. He headed the new GDR coalition formed in April 1990, and following unification of the two Germanys in October 1990, was one of five prominent former East German politicians who were sworn in as Ministers without Portfolio of the new federal government. In 1993 he was tried and found guilty of vote-rigging. He became a member of the European Parliament in 1999.

Moe, Jørgen Engebretsen 1813–82
Norwegian folklorist and poet
With PETER CHRISTIAN ASBJØRNSEN he collected and edited *Norske Folkeeventyr* (1841–44, Eng trans *Norwegian Folk Stories*, 1859). He also published a book of Romantic verse (1850), and a children's classic, *I brønden og i kjærnet* (1851). From 1875 to 1881 he was Bishop of Christiansand. 🕮 P C Asbjørnsen, *Mannen og livsverket* (1947)

Moeran, Ernest John 1894–1950
English composer
Born in Middlesex, he was a pupil at the Royal College of Music and, after service in World War I, studied under JOHN IRELAND. He first emerged as a composer in 1923, but left London to live in Herefordshire, where he worked prolifically in all forms. As well as a large number of songs, he composed a symphony and concertos for violin, piano and cello.

Moffat, Robert 1795–1883
Scottish missionary
Born in Ormiston, East Lothian, he turned from gardening to the mission field in 1815, and began his work in Great Namaqualand in 1818. He finally settled at Kuruman in Bechuanaland (1826–70), which soon became, through his efforts, a centre of Christianity and civilization. He printed both New (1840) and Old (1857) Testaments in Sechwana and published *Missionary Labours and Scenes in Southern Africa* (1842). DAVID LIVINGSTONE married his daughter, Mary.

Moffatt, James 1870–1944
US theologian
Born in Glasgow, Scotland, he was ordained a minister of the Free Church of Scotland in 1896, then became professor at Mansfield College, Oxford (1911–14), and at the United Free Church College, Glasgow, (1914–27). In 1927 he went to the USA and became professor of church history at Union Theological Seminary, New York (1927–39). His most famous work is the translation of the Bible into modern English: his New Testament was published in 1913 and his Old Testament in 1924. He also wrote theological works, including *Presbyterianism* (1928).

Mogae, Festus Gontebanye 1939–
Botswana politician
He was born in Serowe and educated in Botswana and England at the universities of Sussex and Oxford. His early career was in development planning and finance, and he became Minister of Finance from 1989 to 1998, vice-president of Botswana in 1992 and president in 1998. In 2000 he called for initiatives to fight the spread of HIV/AIDS in Botswana, which according to UN figures had the highest infection rate worldwide, with more than one third of the country's adults infected with HIV. He was re-elected in 2004 with a mandate to tackle poverty and unemployment, and pledged to make Botswana AIDS-free by 2016.

Mohammad 'Ali *See* MEHEMET 'ALI

Mohammad Reza Pahlavi *See* PAHLAVI, MUHAMMAD REZA

Mohammed (Prophet) *See* MUHAMMAD

Mohammed *See* MEHMET II, THE CONQUEROR

Mohammed, Hanif 1934–
Pakistan cricketer
Born in Junagadh, and a member of the great cricketing family which produced two other Test players (his brothers Mushtaq and Sadiq), he made the first of his 55 appearances when only 17. In his Test career he scored twelve centuries, including two in the match against England at Dacca in 1961–62. A natural stroke-maker, he holds the world's second-highest score, with 499 runs for Karachi against Bahawalpur in 1958–59 (BRIAN LARA broke his record in 1994 with 501).

Mohammed Nadir Shah c.1880–1933
King of Afghanistan
The brother of Dost Mohammed, as commander-in-chief to AMANULLAH KHAN (ruler and later King of Afghanistan from 1926) he played a prominent role in the 1919 Afghan War against Great Britain which secured the country's full independence (1922). He subsequently fell into disfavour and was forced to live in exile in France. In 1929, with British diplomatic support, he returned to Kabul and seized the throne, immediately embarking on a programme of economic and social modernization. These reforms, however, alienated the Muslim clergy and in 1933 he was assassinated. He was succeeded by his son, Mohammed Zahir Shah.

Mohl, Hugo von 1805–72
German botanist
Born in Stuttgart, he was professor of physiology at Bern University (1832–35) and professor of botany at Tübingen (1835–72). His most lasting researches lay in the field of plant cell structure and physiology, where his meticulous observations were the first attempts at cytochemistry. He differentiated the cell membrane, nucleus, cellular fluid and utricle, and was the first to use the term protoplasm in plant cell biology. He was also the first to clearly explain osmosis, and discovered that the secondary walls of plant cells are fibrous.

Moholy-Nagy, László 1895–1946
US artist and photographer
Born in Bucsborsod, Hungary, he trained in law in Budapest, and painted with Dada and Constructionist groups in Vienna and Berlin (1919–23). He produced his first 'photograms' (non-representational photographic images made directly without a camera) in 1923 and joined the Bauhaus under WALTER GROPIUS in 1925. There he began to use a camera and was quickly recognized as a leading avant-garde artist in the New Photographers movement in Europe (1925–35), his work including film-making and typography integrated with photographic illustration. He left Germany in 1935 and after working as a designer in Amsterdam and London was invited to the USA in 1937 to head the new Bauhaus school in Chicago, later the Institute of Design. He taught photography there, and became a US citizen shortly before his death.

Mohorovičić, Andrija 1857–1936
Yugoslav seismologist and meteorologist
Born in Volosko, Croatia, he was educated in physics and mathematics at the University of Prague. He was later appointed to the Royal Nautical School at Bakar, where he taught meteorology and oceanography, and in 1887 founded the meteorological station at Bakar. Appointed as professor and director at the Zagreb Technical School (1891–1921), he campaigned for the independence of Zagreb Observatory from government control, making it a recognized centre for meteorology and geodynamics. Investigating the Croatian earthquake of 1909 in the Kulpa valley, he observed from some distance two distinct seismic wave arrivals. He deduced that the slower of the two arrivals followed the direct route from the earthquake focus to the observation point, while the faster wave is refracted from a discontinuity. From this he concluded that the Earth's crust must overlie a denser mantle and he calculated the depth to this transition. The sharp discontinuity was subsequently found to exist worldwide, and became known as the Mohorovičić discontinuity or 'Moho'.

Mohs, Friedrich 1773–1839
German mineralogist
Born in Gernrode, Sachsen-Anhalt, and educated at the University of Halle, he became professor at Graz (1812), at Freiburg as successor to ABRAHAM WERNER (1818), and at Vienna (1826). He developed a mineralogical classification system based on a variety of mineral characters, rather than adopting the traditional purely chemical system. The Mohs scale of hardness which he introduced is still in use. Around 1820, he arrived at the concept of the six crystal systems; this approach to mineral classification was based on the different orientation of crystallographic axes, but the names which he applied were not widely used. His publications included *The Natural History System of Mineralogy* (1821) and *Treatise on Mineralogy* (3 vols, 1825).

Moi, Daniel arap 1924–
Kenyan statesman
Born in Rift Valley Province, the son of a poor farmer, he was educated at the Mission School, Kabartonjo, and at the Government African School in Kapsabet. After entering the House of Representatives in 1963, he served as Minister for Local Government (1963–64), and for Home Affairs (1964–67). In 1967 he was appointed vice-president by JOMO KENYATTA as his nominated successor. He was provincial president of the Kenyan African National Union (KANU) from 1966, and after becoming KANU president and head of state on Kenyatta's death in 1978, he purged the army, launched an ambitious plan to develop Kenya's economy and infrastructure, and pre-empted political opposition by proclaiming KANU as the country's only legal party. He was re-elected head of state in 1983 and 1988. In 1992 he held multiparty elections and won amid controversy about the conduct of the elections, winning re-election again in 1997. He stepped down in 2002 and retired from politics, but has retained considerable influence over popular opinion in Kenya.

Moinaux, Georges *See* COURTELINE, GEORGES

Moir, John William b.1851 and **Frederick Lewis Maitland** b.1852
Scottish explorers and traders
Brothers, they were born in Edinburgh and studied botany and natural history at the university there before training as chartered accountants. In 1878 they founded the African Lakes Company which pioneered the trade route from the east coast to Lakes Nyasa and Tanganyika. To exploit natural waterways, they had steamers built in sections to be carried overland. The *Lady Nyasa* was the first to ply the Zambezi and Shire rivers. Establishing an anti-slaving mission and trading post near Balantyre, they waged a two-year private war against Arab slave traders, which ended in 1889. This victory opened up an area which subsequently came under British rule as the Nyasaland Protectorate and Northern Rhodesia.

Moiseiwitsch, Benno 1890–1963
British pianist
Born in Odessa, Russia, he studied at the Imperial Academy of Music there, and won the RUBINSTEIN prize at the age of nine. He subsequently worked in Vienna under Leschetizky, and rapidly became known as an exponent of the music of the Romantic composers. He first appeared in Great Britain in 1908, and took British nationality in 1937.

Moiseyev, Igor Aleksandrovich 1906–
Russian dancer, choreographer and ballet director
Born in Kiev, he studied privately and at the Bolshoi Ballet School, graduating in 1924 into the main company where he remained, as character soloist and choreographer, until 1939. Always interested in folk dance, he accepted an appointment in 1936 as director of the new Dance Department of the Moscow Theatre for Folk Art. He formed a professional folk dance company the following year, developing simple steps and primitive patterns into full theatrical expression. This ensemble has toured the world, including all 15 republics of the former USSR, meanwhile gathering a substantial repertoire of dances from other nations. As a choreographer, his greatest strength is creating scenes from daily life and genre pieces. In 1967 he founded the State Ensemble of Classical Ballet. He was awarded the USSR State Prize in 1942, 1947, 1952 and 1985, and the Russian Federation State Prize in 1996.

Moissan, (Ferdinand Frédéric) Henri 1852–1907
French chemist and Nobel Prize winner
Born in Paris, he studied chemistry and pharmacy in Paris and qualified as a pharmacist in 1879. He taught at the School of Pharmacy in Paris, becoming professor of toxicology and inorganic chemistry in 1886 and moving to the chair of inorganic chemistry at the University of Paris in 1900. He was noted for his teaching and experimental work. He was the first to isolate fluorine (1886). In 1892 he invented the electric arc furnace and, with the high temperatures that could be reached for the first time, he reduced the oxides of uranium and tungsten, prepared carbides, borides and hydrides, and synthesized rubies. Moissan is regarded as the founder of high-temperature chemistry, and both his furnace and his discoveries were soon shown to have many industrial applications. For his work on fluorine he was awarded the Nobel Prize in chemistry in 1906.

Moivre, Abraham de 1667–1754
French mathematician
Born in Vitry, Champagne, he left France for religious reasons and went to England around 1686, supporting himself by teaching. ISAAC NEWTON's *Principia* whetted his devotion to mathematics and he became known to the leading mathematicians of his time. Elected FRS in 1697, he helped the Royal Society to decide the famous contest between Newton and GOTTFRIED LEIBNIZ on the origins of the calculus. His principal work was *The Doctrine of Chances* (1718) on probability theory, but he is best remembered for the fundamental formula on complex numbers, known as de Moivre's theorem, that relates the exponential and trigonometric functions.

Mokanna, al-, *properly* **Hakim ben Atta** c.778
Arab prophet
He was the founder of a sect in the Persian province of Khorasan. Ostensibly to protect onlookers from being dazzled by his divine countenance, but actually to conceal the loss of an eye, he wore a veil ('Mokanna' means 'the Veiled One'). Claiming he was a reincarnation of God, he gathered enough followers to seize several fortified places, but the Caliph Almahdi, son of AL-MANSUR, eventually took his stronghold of Kash, when Mokanna took poison. His story is the subject of one of THOMAS MOORE's poems in *Lalla Rookh*.

Molenaer, Jan Miense c.1610–1668
Dutch painter
Born in Haarlem, he was active there and in Amsterdam. In 1636 he married the painter JUDITH LEYSTER, and their work is similar. They probably trained together in the studio of FRANS HALS, and later collaborated. Molenaer excelled at musical and peasant scenes, such as *A Young Man and Woman Making Music* (National Gallery, London), *Children Making Music* (National Gallery) and *Dutch Merrymaking* (Royal Collection, Hampton Court). He also painted portraits and religious pictures.

Molière *See panel p1100*

Molina, Luis de 1535–1600
Spanish Jesuit theologian
Born in Cuenca, he studied at Coimbra, and was professor of theology at Evora for 20 years. His views on predestination were seen as a revival of Pelagianism provoking the dispute between Molinists and Thomists. A papal decree in 1607 permitted both opinions. His principal writings are a commentary on the *Summa* of THOMAS AQUINAS (1593); a treatise, *De Justitia et Jure* (1592, 'On Law and Justice'); and the celebrated treatise on grace and free will, *Concordia Liberi Arbitrii cum Gratiae Donis* (1588, 'The Harmony of Free Will with Gifts of Grace').

Molina, Mario José 1943–
Mexican scientist and Nobel Prize winner
Born in Mexico City, he studied at the universities of Mexico, Freiburg and California. Following work at the University of California he became senior research scientist at the Jet Propulsion Laboratory, California (1983–89) and professor of earth, atmospheric and planetary sciences and chemistry at the Massachusetts Institute of Technology (1989–2004). In 2004 he was appointed to the department of chemistry and biochemistry at University of California San Diego, and to the Center for Atmospheric Studies at the Scripps Institution for Oceanography. His many honours and awards include the Max Planck research award (1994–96) and the Nobel Prize in chemistry (1995; with PAUL J CRUTZEN and FRANK SHERWOOD ROWLAND) for work on the role of CFCs in the catalytic destruction of atmospheric ozone. His recent research has been directed at air pollution, particularly in rapidly expanding urban environments.

Moll Cutpurse *See* FRITH, MARY

Möller, Poul Martin 1794–1838
Danish writer
Born in Uldum, he graduated in theology at Copenhagen and later became a professor of philosophy, in Oslo, and then in

Molière, *pseudonym of* **Jean Baptiste Poquelin** 1622–73
French playwright

Molière was born in Paris, the son of a wealthy upholsterer. He studied with the Jesuits at the Collège de Clermont, and may have been called to the Bar. His mother died when he was young, and when he came of age he inherited some of her fortune. Instead of following his father's business, he embarked on a theatrical venture (1643) under the title of L'Illustre Théâtre, which lasted for over three years in Paris. The company then moved to the provinces from Lyons to Rouen, and had sufficient success to keep going from 1646 to 1658, eventually obtaining the patronage of the king's brother, PHILIPPE D'ORLÉANS.

In 1658 he played before the king, and organized a regular theatre, first in the Petit Bourbon, and later in the Palais Royal. As a theatre manager he had to perform tragedy as well as comedy, but he had little success with either CORNEILLE's *Nicomède* or with the works of RACINE, despite their personal friendship. Molière soon realized his own considerable resources as a comic writer. *Les Précieuses ridicules* was published in November 1659, and every year until his death he produced at least one of his comic masterpieces, including *Tartuffe* in 1667, *Le Misanthrope* in 1666, *Amphitryon* in 1668, and *Le Bourgeois gentilhomme* in 1671.

In the spring of 1662 he married Armande Béjart, a young actress in his own company and the sister of Madeleine, with whom Molière is said to have had a love affair. In August 1665 the king adopted Molière's troupe as his own servants. In 1667 symptoms of lung disease were apparent. He died in his home in the Rue de Richelieu the night after having acted as the *Malade* in the seventh representation of his last play, *Le Malade imaginaire*.

📖 Molière's most important plays (with the conventional English titles) appeared as follows: in 1658 *L'Étourdi* (The Blunderers) and *Le Dépit amoureux* (The Amorous Quarrel, 1656 in the provinces); in 1659 *Les Précieuses ridicules* (The Conceited Young Ladies); in 1660 *Sganarelle* (The Picture); in 1661 *Don Garcie de Navarre* (Don Garcia of Navarre); in 1662 *L'Ecole des maris* (The School for Husbands), *Les Fâcheux* (The Impertinents) and *L'École des femmes* (The School for Wives); in 1663 *La Critique de l'école des femmes* (School for Wives Criticised) and *Impromptu de Versailles* (The Impromptu of Versailles); in 1664 *Le Mariage forcé* (The Forced Marriage), *La Princesse d'Élide* (The Universal Passion) and *Tartuffe* (in part); in 1665 *L'Amour médecin* (The Quacks); *Le Misanthrope* (The Misanthrope); in 1666 *Le Médecin malgré lui* (The Dumb Lady); in 1667 *Tartuffe*; in 1668 *Amphitryon*, *George Dandin* and *L'Avare* (The Miser); in 1669 *Monsieur de Pourceaugnac*; in 1671 *Le Bourgeois gentilhomme* (The Citizen turned Gentleman) and *Les Fourberies de Scapin* (The Cheats of Scapin); in 1672 *Les Femmes savantes* (The Female Virtuosos); and in 1673 *Le Malade imaginaire* (The Imaginary Invalid). He collaborated with Philippe Quinault and PIERRE CORNEILLE to write *Psyché* (1671), and wrote farces, a few court masques, and some miscellaneous poems.

📖 F Lawrence, *Molière: The Comedy of Unreason* (1968).

On ne meurt qu'une fois et c'est pour si longtemps!

'We only die once; and it's for such a long time!'

– From *Le Dépit amoureux*, act 5, scene 3.

Copenhagen. His chief work, *En dansk Students Eventyr* ('Adventures of a Danish Student'), which he finished in 1824, but which was published posthumously, is a light-hearted account of undergraduate life in Copenhagen. *Sceneri Rosenborg Slotshave* (1819–21, 'Scenes from the Garden at Rosenberg Castle') is a representative work, showing how he avoids the abstract and metaphysical, for his credo was 'all poetry that does not come from life is a lie'. He made the first Danish translation of *The Odyssey*, wrote philosophical essays and was a coiner of aphorisms. 📖 F Nielson, *Om Poul Möller* (1961)

Mollet, Guy Alcide 1905–75
French socialist politician
Born in Flers, Normandy, of working-class parentage, he joined the Socialist Party in 1923 and shortly afterwards became English master at the Arras Grammar School. In World War II he was a captain in the secret Resistance army. In 1946 he became Mayor of Arras, an MP, Secretary-General of the Socialist Party and a Cabinet Minister in the BLUM government. A keen supporter of a Western European Federation, he was a delegate to the Consultative Assembly of the Council of Europe (1949) and was its president in 1955. He became prime minister in 1956. He survived the international crisis over the Anglo-French intervention in Suez later that year, but lost office in 1957 after staying in power longer than any French premier since the war. In 1959 he was elected a senator of the French Community.

Mollison, James Allan 1905–59
Scottish aviator
Born in Glasgow, he became a consultant engineer. He was commissioned into the RAF in 1923, and won fame for his record flight, Australia–England in 1931 in 8 days 19 hours and 28 minutes. He made the first solo east–west crossing of the North Atlantic in 1932, and in February 1933 the first England–South America flight. With his wife AMY JOHNSON he made the first flight across the Atlantic to the USA in 1933, and to India in 1934. He was awarded the Britannia Trophy in 1933.

Molnár, Ferenc, *originally* **Ferenc Neumann** 1878–1952
Hungarian playwright and novelist
He was born in Budapest, and changed his name to Molnár in 1896. He wrote 36 plays, mainly fantasies and romantic comedies, and there is probably no other Hungarian playwright more translated and performed outside his own country. Several light farces were followed in 1907 by *Az Ördg*, a variation on the *Faust* theme. As *The Devil*, this play opened in two rival productions on the same night in New York in 1908. *Liliom* (1909) later became the basis for the RODGERS and HAMMERSTEIN musical *Carousel* (1945). Subsequent plays include *A fehlér felho* (1916, 'The White Cloud') and *A hattyú* (1920, 'The Swan'). *Jéték a Kastélyban* (1926), a sophisticated social comedy, was translated by P G WODEHOUSE as *The Play's the Thing* for the New York production in 1927, and by TOM STOPPARD as *Rough Crossing* for the National Theatre, London, in 1985. *Olimpia* (1928, 'Olympia') is a similarly well-made play, peopled by amiable, well-to-do hedonists, and recalling a more comfortable, elegant world. Molnár emigrated to the USA in 1940, becoming a US citizen seven years later. 📖 I Vécsei, *Molnár Ferenc* (1966)

Molotov, Vyacheslav Mikhailovich, *originally* **Vyacheslav Mikhailovich Skriabin** 1890–1986
Soviet politician
Born in Kukaida, Vyatka, he was educated at Kazan High School and Polytechnic. In the 1905 revolution he joined the Bolshevik section of LENIN's Social Democratic Workers' Party and in 1912 became the staunch disciple of STALIN when *Pravda* was launched. During the March 1917 revolution he was a member of the military revolutionary committee which directed the coup against ALEKSANDR KERENSKY. In 1921 he became secretary of the Central Committee of the Russian Communist Party and the youngest candidate-member of the politburo. In 1928 his appointment to the key position of secretary of the Moscow committee of the all-Union Party marked the launching of the first Five-Year Plan. As chairman of the Council of People's Commissars (1930–41), he became an international figure in 1939 when he took on the extra post of Commissar for Foreign Affairs, shaping the policy which led to the non-aggression pact with Nazi Germany. In 1942 he signed the 20 years' Treaty of Alliance with Britain. He was Stalin's chief adviser at Teheran and Yalta and represented the Soviet Union at the 1945 founding conference of the United Nations at San Francisco and at the Potsdam Conference. After the war Molotov, who negotiated the pacts binding the satellite states to the Soviet Union, emerged as the uncompromising champion of world Sovietism. His '*niet*' at meetings of the United Nations and in the councils of foreign ministers became a byword. His attitude led to the prolongation of the Cold War and the division of Germany into two conflicting states. In 1949 he resigned as Foreign Minister but resumed the post in 1953. He resigned in 1956 and was appointed Minister of State Control. In 1957 NIKITA KHRUSHCHEV called him a 'saboteur of peace', accused him of policy failures and appointed him ambassador to Outer Mongolia until 1960. He was expelled from the Communist Party in 1962 but reinstated in 1984. 📖 Bernard Bromage, *Molotov: The Story of an Era* (1956)

Moltke, Helmuth 1848–1916
German soldier
He was a nephew of Count HELMUTH VON MOLTKE. Like his uncle, he rose to be Chief of the General Staff (1906), but in World War I, after losing the Battle of the Marne in September 1914, was superseded by ERICH VON FALKENHAYN.

Moltke, Helmuth, Count von, *known as* **the Silent** 1800–91
Prussian soldier
In 1819 he became lieutenant in a Danish regiment, but in 1822 entered Prussian service. In 1832 he was appointed to the staff, and in 1835 obtained leave to travel. Asked by the Sultan to remodel the Turkish army, he did not return to Berlin until 1839. From 1858 to 1888 he was Chief of the General Staff in Berlin and reorganized the Prussian army. His strategical skill was displayed in the successful wars with Denmark in 1863–64, with Austria in 1866, and with France in 1870–71. 🕮 F E Whitton, *Moltke* (1921)

Moltmann, Jürgen 1926–
German Reformed theologian
He was born in Hamburg. A professor at Wuppertal (1958–63), Bonn (1963–67) and Tübingen (1967–94, now emeritus), he is best known for his influential trilogies, *Theology of Hope* (1967), *The Crucified God* (1974) and *The Church in the Power of the Spirit* (1977), for *The Trinity and the Kingdom of God* (1981), and for the Gifford lectures *God in Creation* (1985) and *The Way of Jesus Christ* (1990). Probably the most significant Protestant theologian of the 20th century since KARL BARTH, he espoused a theology of hope which marked a reaction against the individualistic existential approach of RUDOLF BULTMANN, and a revival in Protestant theology of concern for the social nature of Christian faith in the modern world. He also wrote *Hope and Planning* (1971), *On Human Dignity* (1984) and *Creating a Just Future* (1989).

Molyneaux (of Killead), James Henry Molyneaux, Baron 1920–
Northern Ireland politician
Born in Seacash, Killead, County Antrim, and educated at Aldergrove School, County Antrim, he served in the RAF from 1941 to 1946, and was a vice-chairman of hospital and mental-health management committees before becoming active in politics as Secretary of the South Antrim Unionist Association (1964–70) and vice-president of the Ulster Unionist Council from 1974. In 1970 he entered the House of Commons as an Ulster Unionist MP, and from 1974 to 1977 served as leader of the Ulster coalition there. He was a member of the Northern Ireland assembly from 1982 to 1986. As deputy Grand Master of the Orange Order and a close political ally of IAN PAISLEY, he played a leading role in the 1991 efforts by Northern Ireland Secretary PETER BROOKE to initiate new negotiations between loyalist leaders and the British and Irish governments to bring peace to the Province. He resigned in 1995 as leader of the Ulster Unionist Party after 16 years in the post, but remains a significant voice on the Northern Irish political scene. He received a knighthood in 1996 and a life peerage in 1997.

Molyneux, Edward Henry 1891–1974
English fashion designer
He was born in London, studied art, and worked for Lucile in London and abroad. After service as a captain in the British Army in World War I, in which he lost an eye, he opened his own couture house in Paris in 1919 with branches in London, Monte Carlo, Cannes and Biarritz, and became famous for the elegant simplicity of his tailored suits with pleated skirts, and his evening wear. He closed his salons in 1950 and retired to Jamaica. He reopened in 1965 but soon retired again.

Mommsen, (Christian Matthias) Theodor 1817–1903
German historian and Nobel Prize winner
Born in Garding, Schleswig-Holstein, he studied at Kiel for three years, examined Roman inscriptions in France and Italy for the Berlin Academy (1844–47), and in 1848 was appointed to a chair of law at Leipzig, of which he was deprived two years later for the part he took in politics. In 1852 he became professor of Roman law at Zurich, and in 1854 at Breslau, and in 1858 professor of ancient history at Berlin. He edited the monumental *Corpus Inscriptionum Latinarum*, helped to edit the *Monumenta Germaniae Historica*, and from 1873 to 1895 was permanent secretary of the Academy. In 1882 he was tried and acquitted on a charge of slandering BISMARCK in an election speech. His greatest works include *Römische Geschichte* (3 vols, 1854–55, Eng trans *The History of Rome*). He abandoned the fourth volume, but the fifth was translated as *The Provinces of the Roman Empire* (1885). He was awarded the Nobel Prize in literature in 1902. Amongst his 920 separate publications were works on the Italic dialects (1845, 1850), Neapolitan inscriptions (1857), Roman coins (1850), Roman constitutional law (1871), and an edition of the Pandects (1866–70). 🕮 Wickert, *Theodor Mommsen: Eine Biographie* (3 vols, 1959–80)

Momoh, Joseph Saidu 1937–2003
Sierra Leone soldier and statesman
Born in Binkolo, in the Northern Province, he was trained at military schools in Ghana, Great Britain and Nigeria before being commissioned in the Sierra Leone army in 1963. By 1983 he was an army commander and a major-general. In 1985 President SIAKA STEVENS announced his retirement at the age of 80, and Momoh was endorsed by Sierra Leone's only political party, the All-People's Congress (APC), as the sole presidential candidate. After taking office he disassociated himself from the policies of his predecessor and pledged to fight corruption and improve the economy, but he was deposed in 1992. He died in exile in Guinea.

Mompesson, William 1639–1709
English clergyman
He was rector of Eyam, Derbyshire, when in 1665–66 the plague (brought from London in a box of infected cloths) killed 267 of his 350 parishioners. He persuaded his people to confine themselves entirely to the parish, and the disease was not spread. In 1669 he became rector of Eakring, Nottinghamshire, and in 1676 was made a prebendary of Southwell.

Monash, Sir John 1865–1931
Australian soldier
He was born in Melbourne of German parentage. He practised as a civil engineer and also held a commission in the Australian Citizen Force (1887). He commanded the 4th Australian Brigade at Gallipoli (1914–15), the 3rd Australian Division in France (1916), and the Australian Corps as Lieutenant-General (1918). Recognized as one of the outstanding generals of World War I, he was noted for the meticulous preparation and planning of his operations. He retired in 1930 with the rank of general.

Monbiot, George Joshua 1963–
English author and journalist
Son of the businessman Raymond Geoffrey Monbiot, he was educated in Buckinghamshire and at Oxford University. He was a BBC radio producer from 1985–87, winning a Sony Award in 1987. From that year, he worked internationally as an investigative journalist, surviving hazards including bullets, cerebral malaria and a potentially lethal hornet attack. He has held visiting professorships at universities including Bristol, Keele, East London and Oxford Brookes. A UN award-winning commentator on environmental politics, he has published a number of books on the subject, including *Amazon Watershed* (1991) and *Heat* (2006). Since 1995, he has contributed regularly to *The Guardian*.

Monboddo, James Burnett, Lord 1714–99
Scottish judge and pioneer anthropologist
Born at Monboddo House, Kincardineshire, and educated at Aberdeen, Edinburgh and Gröningen, he was called to the Scottish Bar, and in 1767 was raised to the bench as Lord Monboddo. Highly respected as a judge, he nevertheless held a variety of bizarre views, for example, that babies are born with tails which are cut off by midwives before anyone has a chance to see them. He had a strong aversion to anything modern, such as sedan chairs, and an ardent devotion to the ways of the ancient Greeks, whose simple lifestyle he tried to emulate. His *Of the Origin and Progress of Language* (6 vols, 1773–92) is learned but idiosyncratic, but his theory of human affinity with monkeys anticipated CHARLES DARWIN and the modern science of anthropology. He also published, anonymously, *Antient Metaphysics* (6 vols, 1779–99).

Monck, George *See* MONK, GEORGE

Monckton, Lionel 1861–1924
English composer
He was born in London. Prominent as an amateur actor while at Oxford, he turned to composition and contributed songs to many of the shows of GEORGE EDWARDES, at the Gaiety Theatre and elsewhere in London. His musical comedies *The Country Girl* (1902) and *The Quaker Girl* (1910) were very popular.

Monckton (of Brenchley), Walter Turner Monckton, 1st Viscount 1891–1965
English lawyer and politician
Born in Plaxtol, Kent, and educated at Harrow and Balliol College, Oxford, he was called to the Bar in 1919. He became

Monet, Claude 1840–1926
French Impressionist painter

Claude Monet was born in Paris. He spent his youth in Le Havre, where he met EUGÈNE BOUDIN, who encouraged him to work in the open air, then an uncommon artistic practice. After military service in Algeria he moved to Paris, associating with PIERRE AUGUSTE RENOIR, CAMILLE PISSARRO and ALFRED SISLEY, and developing his plein-air style under the influence of Japanese prints, with their flat colours and casual notation of objects. The 1860s were financially precarious years during which he sold very little, although he had work accepted by the salons; in the early 1870s, however, he was introduced, with Pissarro, to the dealer Paul Durand-Ruel, who was instrumental in turning his fortunes around. In 1874 he exhibited at the first Impressionist Exhibition, and one of his works at this exhibition, *Impression: soleil levant*, gave its name to the movement. Later he worked much at Argenteuil. Along with Pissarro, Monet is recognized as one of the creators of Impressionism, and he was one of its most consistent exponents. He visited and painted extensively in England, Holland and Venice, and spent his career in an attempt to capture the most subtle nuances of colour, atmosphere and light in landscape. Apart from many sea and river scenes, he also executed several series of paintings of subjects under different aspects of light, such as *Haystacks* (1890-91) and *Rouen Cathedral* (1892–95). In 1883 he and his mistress, Alice Hoschedé, as well as her children and Monet's own sons, Jean and Michel, bought a farmhouse at the hamlet of Giverny, 40 miles outside Paris. He lived and painted there as a comparative recluse until his death, and it was there that he produced the *Waterlilies* series (1899–1906) that is probably his best-known contribution to the Impressionist idiom.

📖 William C Seitz, *Claude Monet* (1960).

> 'Color is my day-long obsession, joy and torment. To such an extent indeed that one day, finding myself at the deathbed of a woman who had been and still was very dear to me, I caught myself in the act of focusing on her temples and automatically analyzing the succession of appropriately graded colors which death was imposing on her motionless face.'
>
> – Quoted in Georges Clemenceau, *Les Nymphéas* (1928).

Attorney-General to the Prince of Wales in 1932, in which capacity he was adviser to him (as EDWARD VIII) in the abdication crisis of 1936. He held many legal offices, and in World War II was Director-General of the Ministry of Information; in the 1945 caretaker government he was Solicitor-General. MP for Bristol West from 1951 until his elevation to the peerage in 1957, he was Minister of Labour (1951–55), of Defence (1955–56) and Paymaster-General (1956–57).

Mond, Alfred Moritz, 1st Baron Melchett 1868–1930
British industrialist and politician
Born in Farnworth, Cheshire, the son of LUDWIG MOND, after some years in industry and as chairman of the Mond Nickel Co, he became a Liberal MP (1906–28). He was the first Commissioner of Works (1916–21) and was Minister of Health (1922). In 1926 he helped to form ICI (Imperial Chemical Industries Ltd), of which he became chairman. A powerful advocate of industrial co-operation, in 1927 he instituted the Mond–Turner conference with the TUC which suggested the formation of a national industrial council.

Mond, Ludwig 1839–1909
British chemist
Born in Kassel, Germany, he studied chemistry at Marburg and then under ROBERT WILHELM BUNSEN at Heidelberg. He settled in Great Britain in 1862, and, while working for John Hutchinson at Widnes, developed a process to retrieve sulphur from the waste products of the Leblanc process. In 1873 he joined John Brunner in setting up a factory at Winnington, Cheshire, to manufacture soda by the new ammonia process invented by ERNEST SOLVAY. Brunner–Mond & Co eventually grew to be the largest soda plant in the world. Mond also developed a new fuel, producer gas. He is perhaps best known for the process he invented for purifying nickel. He noticed that nickel valves in a manufacturing plant were corroded by carbon monoxide and discovered that a compound new to science, nickel carbonyl, had been formed, and that it would yield pure nickel on further heating. He put this reaction to use on an industrial scale (the Mond process). He was succeeded in business by his son Robert (later Sir Robert) Mond (1867–1938). 📖 J M Cohen, *The Life of Ludwig Mond* (1956)

Mondale, Walter F(rederick) 1928–
US politician and lawyer
Born in the small town of Ceylon, Minnesota, he was the son of a Methodist preacher of Norwegian extract. After graduating from the University of Minnesota Law School, he made his reputation as a local Democrat 'machine politician' in his home state, before serving in the US Senate between 1964 and 1976. He was selected as JIMMY CARTER's running mate in the 1976 presidential election and served as an active vice-president between 1977 and 1980. In 1984 he was the Democratic presidential nominee, but was crushingly defeated by the Republican candidate, RONALD REAGAN. Following this reverse, Mondale resumed his law practice, but in 1993 he was appointed US ambassador to Japan, serving until 1996. He ran unsuccessfully for the Senate in 2002. 📖 Finlay Lewis, *Mondale: Portrait of an American Politician* (1980)

Mondlane, Eduardo 1920–69
Mozambique nationalist leader
Educated in mission schools, he furthered his training at Fort Hare College and Lisbon University and developed into a respected sociologist with research posts in the USA and with the UN. He returned to Mozambique in 1961 to form Frelimo (Mozambique Liberation Front) and launched the guerrilla war against Portuguese colonialism in 1964. He was murdered by a parcel bomb in Dar es Salaam.

Mondrian, Piet, *properly* **Pieter Cornelis Mondriaan** 1872–1944
Dutch artist
Born in Amersfoort, he was associated with THEO VAN DOESBURG in founding the De Stijl movement in architecture and painting. He began by painting landscape in a traditional sombre Dutch manner, but after moving to Paris in 1909 he came under the influence of HENRI MATISSE and Cubism. He then began painting still lifes – his early work included a series of abstracts, *Trees* – which are analysed in terms of the relationship between the outlines and the planes. In the hands of Mondrian these became increasingly abstract, so that eventually the patterns made become more important than the subject itself. During World War I he discarded the subject altogether and concentrated on constructing grids of simple black lines filled in with primary colours. These rectilinear compositions depend for their beauty on the simple relationships between the coloured areas. He was a great theoretician and published the pamphlet *Neo-Plasticism* in 1920, which inspired the Dutch philosopher Schoenmaekers. He went to London in 1938, and from 1940 lived in New York City. Later works include more colourful abstracts (eg *Broadway Boogie-Woogie*, 1942–43, New York). His work has been a major influence on all purely abstract painters.

Monet, Claude *See panel above*

Monge, Gaspard 1746–1818
French mathematician and physicist
Born in Beaune, Burgundy, he became professor of mathematics at Mézières in 1768, and in 1780 professor of hydraulics at the Lycée in Paris. In 1783, independently of JAMES WATT or HENRY CAVENDISH, he discovered that water resulted from an electrical explosion of oxygen and hydrogen. He helped to found (1794) the École Polytechnique, and became professor of mathematics there. In 1795 his *Leçons de géométrie descriptive* stated his principles regarding the general application of geometry to the arts of construction (descriptive geometry). In 1805 he was made a senator and Count of Pelusium, but lost both dignities on the restoration of the BOURBONS. 📖 René Taton, *Gaspard Monge* (1950)

Moniz, António Egas *See* EGAS MONIZ, ANTÓNIO

Monk or **Monck, George, 1st Duke of Albemarle** 1608–70
English soldier
The second son of a Devonshire baronet of Loyalist sympathies, he was a volunteer in the *Ile de Rhé* expedition of 1628. He campaigned for ten years in the Low Countries (1629–38). In

the Civil War (1642–51) he was at first a Royalist and fought in Ireland (1642–43), but he was captured at the Battle of Nantwich (1644). Following a two-year imprisonment in the Tower he supported the Commonwealth cause. His successful activities in Ireland brought him to the notice of CROMWELL. He defeated the Scots at Dunbar in 1650, and was successful in pacifying Scotland. In the First Dutch War he speedily adapted his talents to sea fighting, and played a major part in the 1653 victory over MAARTEN TROMP off the Gabbard. Instrumental in bringing about the restoration of CHARLES II, he was rewarded with the dukedom of Albermarle, and was appointed lieutenant-general of the forces. He played a conspicuous and useful part in the Second Dutch War, defeating the Dutch at St James's Fight in 1666. In 1667, with MICHIEL DE RUYTER raiding the Medway virtually unopposed, Monk took command of the defences. Thereafter he retired more and more into private life. He was buried in Westminster Abbey, London.

Monk, Maria 1816–49
Canadian impostor
Born in Saint-Jean-sur-Richelieu, Quebec, she became slightly brain-damaged after sticking a slate pencil in her ear. She turned to prostitution but was institutionalized in 1834, then escaped to New York and pretended not only to have witnessed cruel treatment in a nunnery at Montreal, but also to have become pregnant by a monk. She published *Awful Disclosures of Maria Monk* (1836) and *Further Disclosures* (1837) before being exposed as a fake.

Monk, Meredith Jane 1943–
US dancer, choreographer and musician
Born in Lima, Peru, she was the daughter of a professional singer. She took dance classes as a child and began composing music as a teenager. Briefly associated with the experimental Judson Dance Theater in the mid-1960s, she broke away to develop multimedia music/theatre/dance events of her own. These are either solos or inventive group performances featuring her own company, The House (formed in 1968). Her works are frequently performed in unconventional venues (eg churches, museums, car parks) and utilize film, props, sound, gestures and other movement, public history and personal myth.

Monk, Thelonious Sphere 1917–82
US jazz pianist and composer
He was born in Rocky Mount, North Carolina, and brought up in New York. After childhood piano lessons, he began to perform at 'rent parties' in Harlem and to play in church. While in his twenties, he worked as a freelance musician and studied briefly at the Juilliard School of Music. Between 1939 and 1945 he worked under a succession of leaders in New York, including Kenny Clarke, Lucky Millinder, Cootie Williams and Kermit Scott. Monk first recorded while with the COLEMAN HAWKINS Sextet in 1944. During this period the bebop style was causing a ferment among young jazz musicians in New York, and Monk was a key figure in these experiments at Minton's Playhouse. He joined DIZZY GILLESPIE's first big band in 1946, formed specifically to perform bebop-style arrangements. Monk formed his own small group in 1947, and from that time his performing and recording was done largely with small groups, latterly with a quartet using such tenor saxophone players as JOHN COLTRANE, Johnny Griffin and (for eleven years) Charlie Rouse. World tours from the 1960s brought wide recognition for Monk's percussive and harmonically iconoclastic style. He played little after the mid-1970s but many of his compositions, such as 'Round Midnight' and 'Straight No Chaser', are frequently performed.

Monmouth, James Scott, Duke of 1649–85
English claimant to the throne
Born in The Hague (or Rotterdam), the illegitimate son of CHARLES II and LUCY WALTER, he was committed by Charles to the care of Lord Crofts. In 1662 he went to England and was created Duke of Monmouth (1663), was wedded to a rich heiress, Anne, Countess of Buccleuch, and became captain-general (1670). Handsome, athletic, but a brainless libertine, he was popular because of his humanity towards the Scottish Covenanters at Bothwell Brig (1679), the Popish Plot and the Exclusion Bill, and his two semi-royal progresses (1680–82). The first Earl of SHAFTESBURY pitted the protestant Duke against the popish heir-presumptive (later JAMES VII AND II), and involved him in the Rye House Plot (1683), after which Monmouth fled to the Low Countries. At Charles's death, he landed at Lyme Regis, quickly raised 4,000 troops, branded James as a popish usurper, and asserted his own right to the Crown. At Taunton he was proclaimed King James II, and he attempted to surprise the king's forces at Sedgemoor. He was defeated and fled, but was captured and beheaded. His followers were persecuted in the 'Bloody Assizes' of Judge JEFFREYS. 🕮 Bryan Bevan, *James, Duke of Monmouth* (1973)

Monnet, Jean 1888–1979
French political economist and diplomat
Born in Cognac, he was educated locally, and in 1914 entered the Ministry of Commerce. A distinguished economist and expert in financial affairs, he became in 1947 Commissioner-General of the 'Plan de modernisation et d'équipement de la France' (Monnet plan). He was awarded the Prix Wateler de la Paix (1951), and he was president of the European Coal and Steel High Authority (1952–55). In 1956 he became president of the Action Committee for the United States of Europe.

Monod, Jacques Lucien 1910–76
French biochemist and Nobel Prize winner
Born in Paris, he graduated from the university there (1931), and then left to work at Columbia University. He returned to France and received his PhD from the Sorbonne for his thesis on bacterial growth. After World War II he began work at the Pasteur Institute in Paris, becoming head of the cellular biochemistry department in 1954 and director in 1971. From 1967, he was also professor of molecular biology at the Collège de France. Monod worked closely with FRANÇOIS JACOB on genetic control mechanisms, developing the theory of the operon system, whereby a regulator gene controls other genes by binding to a specific section of the DNA strand. In 1965 Monod and Jacob shared the Nobel Prize in physiology or medicine with ANDRÉ LWOFF. He published *Chance and Necessity* in 1970, a biologically based philosophy of life.

Monod, Théodore André 1902–2000
French naturalist and explorer
Born in Rouen, he was educated at the Sorbonne, and went on to make extensive botanical and geological studies of remote regions of the Sahara. His most memorable trans-Saharan crossing, of 560 miles (902km), was by camel from Wadan, Mauritania to Arawan, Mali, made by laying down advance depots of food and water. He subsequently became director of the Institut Français d'Afrique Noiré (1938–64), and dean of the faculty of sciences of Dakar University, Senegal.

Monophthalmos *See* ANTIGONUS

Monro, Alexander, *known as* **Monro Primus** 1697–1767
Scottish anatomist
Born in London, he studied there, in Paris, and in Leyden (under HERMANN BOERHAAVE). From 1719 he lectured at Edinburgh on anatomy and surgery, serving as professor from 1725 to 1759. He played a key part in founding the Edinburgh Royal Infirmary, and his energetic and well-organized teaching expedited the rise of Edinburgh as a popular centre for medical training. He founded a three-generation dynasty of anatomy professors that dominated anatomy teaching there for 126 years. His works include *Osteology* (1726), *Essay on Comparative Anatomy* (1744), *Observations Anatomical and Physiological* (1758) and *Account of the Success of Inoculation of Smallpox in Scotland* (1765), and it was partly through the orientation of his interests that the Edinburgh ideal of the practitioner integrated the physician and the surgeon.

Monro, Alexander, *known as* **Monro Secundus** 1733–1817
Scottish anatomist
The son of ALEXANDER MONRO, 'Monro Primus', he was educated at Edinburgh University, and groomed by his father to succeed him in the chair of Anatomy, which he formally did at the age of 21 in 1754, though his father continued to teach. Monro pursued his studies in London, under WILLIAM HUNTER, and in Paris, and in 1757 published his *De Venis Lymphaticis Valvulosis*, which demonstrated that the lymphatics were absorbents and quite separate from the circulatory system, and sparked a vitriolic priority dispute with Hunter. An energetic researcher, Monro made public some of his most important findings in *Observations on the Structure and Functions of the Nervous System* (1783). He is said to have taught 13,404 students, and he also built up a large anatomical and pathological collection which he bequeathed to the university.

Monro, Harold (Edward) 1879–1932
English poet and anthologist
Born in Brussels, he was educated at Cambridge. He subsequently travelled abroad and was involved with various progressive communities before taking up the promotion of English poetry. He founded the influential *Poetry Review* in 1912 and the Poetry Bookshop in London the following year. Generous to other poets, he published the Georgians and the

Monroe, Marilyn, *originally* **Norma Jean Mortenson** 1926–62
US film actress

Marilyn Monroe was born in Los Angeles. She had a disturbed childhood spent largely in foster homes on account of the mental illness suffered by her mother, Gladys Pearl Baker (*née* Monroe). She was married for the first time at the age of 16, and went on to have two more husbands: the baseball star JOE DIMAGGIO, and the playwright ARTHUR MILLER. She became a photographer's model in 1946, and after several small film parts and a very high-powered studio publicity campaign, she starred as a sexy, beautiful dumb blonde in *How to Marry a Millionaire* and *Gentlemen Prefer Blondes* (both in 1953). She developed her flair for light comedy in BILLY WILDER's *The Seven Year Itch* (1955) and *Some Like It Hot* (1959).

Wanting more serious roles, she studied at LEE STRASBERG's Actors' Studio and appeared to critical acclaim in *Bus Stop* (1956) and *The Misfits* (1961), her last film, written for her by Arthur Miller. She came to London to make *The Prince and the Showgirl* (1957) with Sir LAURENCE OLIVIER, returning after two years to Hollywood. She was divorced from Arthur Miller in 1961, and the following year died of an overdose of sleeping pills. She had a close relationship with JOHN F KENNEDY and ROBERT F KENNEDY, and famously sang 'Happy Birthday Mr President' in 1961. Since her death, she has become a symbol of Hollywood's ruthless exploitation of beauty and youth. Some accounts maintain that she was murdered, possibly for political motives, but these views remain unsubstantiated.

📖 Her autobiography, *My Story*, was published in 1974. See also D Spoto, *Marilyn Monroe: The Biography* (1993); Norman Mailer, *Marilyn* (1973).

'He's not a director, he's a dictator.'

– Attributed remark about Billy Wilder, after making *Some Like it Hot* (1959).

'He's the only person I know who's in worse shape than I am.'

– On MONTGOMERY CLIFT, her co-star in *The Misfits* (1961).

'Marilyn Monroe was a legend. In her own lifetime she created a myth of what a poor girl from a deprived background could attain. For the entire world she became a symbol of the eternal feminine.'

– Lee Strasberg, at her funeral. Quoted in Ephraim Katz, *The Macmillan International Film Encyclopedia* (1994).

Imagists; some of his own work is close to the former, including such popular pieces as the closely observed 'Milk for the Cat' (1914), but his best, least romantic and most original poems, mainly written in his later years, are bitter in tone, reflecting a loneliness related to his alcoholism and bisexuality. These include 'Strange Meetings' (1917), 'The One, Faithful ...' (1933) and 'Bitter Sanctuary' (1933). His *Collected Poems* (1933) were edited by his second wife, Alida. 📖 J Grant, *Harold Monro and the Poetry Bookshop* (1967)

Monroe, Bill (William Smith) 1911–96
US singer and mandolin player
Born on a farm near Rosine, Kentucky, he took up the mandolin in order to accompany his two older brothers, who were fiddlers, and performed with them before starting his own band, the Blue Grass Boys, in 1938. They first performed on the *Grand Ole Opry* radio show in Nashville in 1939, and continued to perform on it for more than half a century, in addition to touring widely. Monroe's syncopated rhythms, complex harmonies and tenor verging on falsetto (which he called his 'high, lonesome sound') inspired the genre of bluegrass music, and his group's combination of mandolin, fiddle, guitar, banjo and bass established its standard instruments. In 1951 he founded the Bean Blossom festival, a bluegrass festival in Indiana that still continues. Regarded as the 'father of bluegrass music', he continued to look for new ways to develop the music, and was still performing in the mid-1990s. 📖 N Rosenberg, *Bill Monroe and His Blue Grass Boys* (1974)

Monroe, Harriet 1860–1936
US poet and critic
Born in Chicago, she founded (1912) the magazine *Poetry*, which was influential in publicizing the work of T S ELIOT, VACHEL LINDSAY, EZRA POUND and ROBERT FROST, among others. She wrote the 'Columbian Ode' for the Chicago World's Columbian Exposition (1892), celebrating the 400th anniversary of the West's 'discovery' of the USA. In 1917 she edited the influential free-verse anthology, *The New Poetry*. Her own work was collected in *Chosen Poems* (1935). 📖 *A Poet's Life* (1937)

Monroe, James 1758–1831
5th president of the USA
Born in Westmoreland County, Virginia, he served in the American Revolution, and was elected to the assembly of Virginia and in 1783 to Congress, where he sat for three years. As a member of the US Senate (1790–94) he opposed WASHINGTON and the Federalists; the government recalled him in 1796 from the post of Minister to France. He was governor of Virginia (1799–1802), and in 1803 helped to negotiate the Louisiana Purchase. The next four years were spent in less successful diplomacy at London and Madrid. In 1811 he was again governor of Virginia, from 1811 to 1817 Secretary of State, and from 1814 to 1815 also Secretary of War. In 1816 he was elected president of the USA, and in 1820 was re-elected overwhelmingly. His administration (1817–25) was a time of peaceful prosperity that became known as the 'era of good feeling'. He signed the Missouri Compromise of 1820, recognized the Spanish American republics and promulgated in a message to Congress (1823), the 'Monroe Doctrine', embodying the principle that 'the American continents ... are henceforth not to be considered as subjects for future colonization by any European power', though existing colonies were not to be interfered with. 📖 William P Cresson, *James Monroe* (1973)

Monroe, Marilyn *See panel above*

Monsarrat, Nicholas John Turney 1910–79
English novelist
Born in Liverpool, and educated at Trinity College, Cambridge, he abandoned law for literature and wrote three quite successful novels, and a play, *The Visitors*, which reached the London stage. During World War II he served in the navy, and out of his experiences emerged his bestselling novel *The Cruel Sea* (1951), which was subsequently filmed. *The Story of Esther Costello* (1953) repeated that success, followed by *The Tribe That Lost Its Head* (1956) and *The Pillow Fight* (1965). He settled in Canada as director of the UK Information Office (1953–56) after holding a similar post in South Africa (1946–52).

Monson, Sir William 1569–1643
English naval commander
Born in South Carlton, Lincolnshire, he served at sea against the Spaniards (1585–1602), was taken prisoner and sentenced to the galleys (1591) but returned to active service with Lord ESSEX. He distinguished himself in the Cadiz expedition of 1596. He was imprisoned briefly on charges of treason and corruption, but was released and became Admiral of the Narrow Seas (1604–16). He wrote *Naval Tracts* which are partly autobiographical (5 vols, 1902–14, edited by M Oppenheim).

Montagna, Bartolomeo c.1450–1523
Italian painter
A native of Brescia, he probably studied at Venice under GIOVANNI BELLINI and VITTORE CARPACCIO. He founded a school of painting at Vicenza and also worked in Verona and other places.

Montagnier, Luc 1932–
French molecular biologist
He was educated at the University of Poitiers and the University of Paris, became laboratory head of the Radium Institute (1965–71) in Paris, and from 1972 worked at the Pasteur Institute, as head of the Viral Oncology Unit (from 1972), professor (from 1985) and head of the department of AIDS and retroviruses (from 1990). In 1974 he also became director of research at the National Centre for Scientific Research, and since 1997 he has been director of the Center for Molecular and Cellular Biology at Queen's College, City University of New York. Montagnier has published widely in molecular biology and virology, and is now credited with the discovery of the HIV virus. He and his team first isolated the HIV virus in 1983, although it was only around ten years later, when the US scientist Robert Gallo's (1937–) claim to have discovered the virus was discredited,

that Montagnier's achievement was recognized. In 2002 Gallo and Montagnier united to co-direct UNESCO's Program for International Viral Collaboration in the search for an AIDS vaccine. Montagnier holds the controversial view that mycoplasms (bacteria-like organisms) might play a crucial part in the progression from HIV infection to symptomatic AIDS. His work has been widely honoured, by the Lasker Prize (1986), the Kapan prize (1988) and many others. He was made a Commander of the Legion of Honour in 1993.

Montagu, Ashley, *originally* **Israel Ehrenberg** 1905–99
US anthropologist
Born in London, England, he studied at London and Florence universities, and gained his PhD under FRANZ BOAS in 1937 at Columbia University, New York City. Throughout his work on human biosocial evolution he argued strongly against the view that cultural phenomena are genetically determined. His many influential publications, both scholarly and popular, include *Coming Into Being among the Australian Aborigines* (1937), *The Natural Superiority of Women* (1953), *Man's Most Dangerous Myth: The Fallacy of Race* (1964), *The Elephant Man* (1971), *The Nature of Human Aggression* (1976), *The Dehumanization of Man* (1983), *The Peace of the World* (1986) and *What We Know About Race* (1987). He held posts at numerous universities, including the New School for Social Research, Rutgers University, New Jersey, and Princeton University.

Montagu, Edward *See* MANCHESTER, 2ND EARL OF

Montagu, Elizabeth, *née* **Robinson** 1720–1800
English writer and society leader
In 1742 she married Edward Montagu, grandson of the 1st Earl of Sandwich and cousin of Edward Wortley Montagu (husband of Lady MARY WORTLEY MONTAGU). The first of the bluestockings, with £10,000 a year, she established a salon in Mayfair which became the heart of London social and literary life for people like Dr JOHNSON, DAVID GARRICK, JOSHUA REYNOLDS and many others. She wrote an essay on SHAKESPEARE (1768).

Montagu, George 1753–1815
English naturalist and soldier
Born in Wiltshire, after a failed career in the army and a disastrous marriage that led to the loss of his estates, he turned his attention to ornithology. He moved to Devon, where he produced his notable *Ornithological Dictionary; or Alphabetical Synopsis of British Birds* (2 vols, 1802). Montagu's Harrier is named after him.

Montagu, Lady Mary Wortley 1689–1762
English writer
A colourful, eccentric feminist, the eldest daughter of the 5th Earl (later Duke) of Kingston, she was a well-known society hostess, who had a celebrated quarrel with ALEXANDER POPE. From 1716 to 1718 her husband was ambassador in Constantinople (Istanbul) and her letters from there and from Vienna were the basis of her contemporary reputation. After seeing it in Turkey, she was instrumental in introducing vaccination against smallpox into Great Britain.

Montague, Charles Edward 1867–1928
English novelist and essayist
He was of Irish parentage, and studied at Balliol College, Oxford. From 1890 to 1925 he was on the staff of the *Manchester Guardian*. His numerous writings include the novels *A Hind Let Loose* (1910), *Rough Justice* (1926) and *Disenchantment* (1922), an account of his experiences as a soldier in World War I.

Montaigne, Michel Eyquem de 1533–92
French essayist
He was born at the Château de Montaigne, Périgord, the third son of the Seigneur de Montaigne. As an experiment in humanist upbringing, he spoke no language but Latin until he was six. He then spent seven years at the Collège de Guienne in Bordeaux, boarding in the rooms of his famous teachers, GEORGE BUCHANAN and Marc-Antoine de Muret. He subsequently studied law, obtained a post in connection with the Parlement of Bordeaux, and for 13 years was a city counsellor. A translation (1569) of the *Natural Theology* of a 15th-century professor at Toulouse supplied the text for his *Apologie de Raymon Sebond* ('Apologia for Raymond Sebond'), in which he exhibited the full scope of his own sceptical philosophy. In 1571 he succeeded to the family estate at Château de Montaigne, and adopted the life of a country gentleman, varied only by visits to Paris and a tour in Germany, Switzerland and Italy. He also began his *Essais* (1572–80 and 1588, Eng trans *Essays*, 1603) on the ideas and personalities of the time, which introduced a new literary genre and provided a major contribution to literary history. Unanimously elected Mayor of Bordeaux (against his wishes), he performed his duties to the satisfaction of the citizens, serving two terms of office (1581–85). He was a fearless and all-questioning critic, seemingly inspired by the mere caprice of the moment, but highly original and capable of embracing and realizing the largest experience of life. PASCAL among others acknowledged a debt to him. 🕮 D M Frame, *Montaigne* (1965)

Montale, Eugenio 1896–1981
Italian poet and Nobel Prize winner
Born in Genoa, he worked as a journalist and critic, and was an early opponent of fascism. World War I left him with a pessimism which permeates his writing. He was the leading poet of the modern Italian 'Hermetic' school, and his primary concern was with language and meaning. His works include *Ossi di Seppia* (1925, 'The Cuttlefish Bones'), *Le occasioni* (1939, 'Opportunities'), *Finisterre* (1943, 'Finistère'), *La bufera e altro* (1956, 'The Storm and Other Things'), *Satura* (1962, Eng trans *Satura: Five Poems*, 1969) and *Xenia* (1966, Eng trans 1970). He was awarded the Nobel Prize in literature in 1975. 🕮 S Ramat, *Eugenio Montale* (1965)

Montalembert, Charles René Forbes de, Comte de 1810–70
French historian and politician
Born in London, the eldest son of a noble French émigré and his English wife, he was educated at Fulham and the Collège Ste Barbe. In 1830 he eagerly joined the Abbé LAMENNAIS and Henri Lacordaire in *L'Avenir*, a Catholic liberal newspaper. He pleaded the cause of religious liberty, in spite of the papal condemnation of *L'Avenir*. His great speech (1848) on Switzerland is a famous protest against tyranny. After the February Revolution (1848) he was elected a member of the National Assembly, and supported Louis Napoleon (NAPOLEON III) until the confiscation of the Orléans property, when he became a determined opponent of the imperial regime. He visited England in 1855, and wrote *De l'Avenir politique de l'Angleterre* (1856, 'The Political Future of England'), and many other works on medieval church history and contemporary political topics *in an attempt to reconcile Catholicism and liberalism.*

Montana, Joe 1956–
US football player
Born in New Eagle, Pennsylvania, he joined the San Francisco 49ers in 1979, and played in their winning Super Bowl teams in 1982, 1985, 1989, and 1990. He won the Super Bowl Most Valuable Player award in 1982, 1985, and 1990. He joined the Kansas City Chiefs in 1993, after being unable to play for two years because of injury, and stayed until his retirement in 1995. In 1989 he co-authored *Cool Under Fire* with Alan Steinberg.

Montand, Yves, *originally* **Ivo Livi** 1921–91
French actor and singer
Born in Monsummano in Tuscany, Italy, he worked at a variety of jobs before performing as a singer and impressionist in Marseilles and Paris. A protégé of EDITH PIAF, he made his film debut with her in *Étoile sans lumière* (1946, *Star without Light*). He was a star attraction with his one-man show, and his film career temporarily blossomed with *Le Salaire de la peur* (1953, *The Wages of Fear*). An international cabaret star, he also appeared on stage in *The Crucible* (1954) and ventured abroad for films like *Let's Make Love* (1960). His acting reputation was enhanced by an association with the director Costa-Gavras and films such as *Z* (1968) and *L'Aveu* (1970, *The Confession*), which also reflected his sympathy for a variety of left-wing causes. Married to actress SIMONE SIGNORET from 1951 until her death in 1985, he became a distinguished elder statesman of the French film industry, in productions including *Jean de Florette* (1986), *Manon des Sources* (1986) and *IP5* (1991).

Montano *See* ARIAS, BENITO

Montcalm, Louis Joseph, Marquis de Montcalm Gezan de Saint Véran 1712–59
French soldier
He was born near Nîmes. A soldier at 15, in the Seven Years War (1756–63) he commanded the French troops in North America in 1756, and captured the British post of Oswego, and also Fort William Henry, where the prisoners (men, women, and children) were massacred by the Native American allies. In 1758 he successfully defended Ticonderoga with a small force, won Louisburg and Fort Duquesne, and moved to defend Quebec against a British attack. In 1759 General WOLFE ascended the St Lawrence, and finally, in a battle on the Plains of Abraham, drove the French in retreat from the city. Montcalm tried to rally his force, but was mortally wounded.

Montefiore, Sir Moses Haim 1784–1885
British philanthropist
Born in Livorno, Italy, he retired with a fortune from stockbroking in 1824, and from 1829 was prominent in the struggle for removing discrimination against Jews. After a long exclusion and repeated re-election, he was made Sheriff of London in 1837. Between 1827 and 1875 he made seven journeys to Palestine in the interests of his oppressed co-religionists in Poland, Russia, Romania and Damascus. He endowed a hospital in Jerusalem in 1855 and a Jewish college in Ramsgate in 1865. 🕮 Paul Goodman, *Montefiore* (1925)

Montemayor, Jorge de c.1515–1561
Portuguese novelist and poet
Born in Montemoro-Velho, Coimbra, he wrote, in Castilian, the (unfinished) pastoral romance *Diana* (1559), which influenced Sir PHILIP SIDNEY and SHAKESPEARE. He was also a musician and singer. 🕮 J B Auraille-Arce, *La novela pastoril española* (1959)

Montesi, Wilma 1932–53
Italian model
She was the daughter of a middle-class carpenter from Rome. The finding of her body on the beach near Ostia in April 1953 led to sensational allegations of drug and sex orgies in Roman society, and four years of debate, scandal, arrests, re-arrests and libel suits, culminating in the Venice trial in 1957 of three suspects, the son of a former Italian foreign minister, a self-styled marquis and a former Rome police chief, for complicity in her death. They were acquitted after many conflicts of evidence, but the trial exposed corruption in high public places and helped to bring about the downfall of the Scelba government in 1955.

Montespan, Françoise Athénaïs, Marquise de, *known as* **Madame de Montespan** 1641–1707
French courtier
Born in Tonnay-Charente, the daughter of the Duc de Mortemart, she married the Marquis de Montespan (1663), and became attached to the household of the queen. In c.1668 she became the mistress of LOUIS XIV. The marquis was exiled to Guyenne, and his marriage was annulled (1676). The Marquise de Montespan reigned supreme until 1682, and bore the king seven children, who were legitimized, but she was then replaced by Madame DE MAINTENON, the governess of her children. In 1691 she left the court, and retired to a convent. 🕮 Jean Christian Petitfils, *Madame de Montespan* (1988)

Montesquieu, Charles-Louis de Secondat, Baron de la Brède et de 1689–1755
French philosopher and jurist
Born at the Château de la Brède, near Bordeaux, he became counsellor of the *Parlement* of Bordeaux (1714), and its president (1716). He discharged the duties of his office faithfully, but until his poor eyesight hindered him, preferred scientific research. His first great literary success was the *Lettres persanes* (1721, 'Persian Letters'), a satirical description of French society. Weary of routine work, he sold his office (1726) and moved to Paris. For three years he travelled extensively in order to study political and social institutions. In England (1729–31), he mixed in society, visited the Houses of Parliament, studied the political writings of JOHN LOCKE, and analysed the English constitution. *Causes de la grandeur des Romains et de leur décadence* (1734, 'Causes of the Greatness and Decadence of the Romans') is one of his best works. His best-known work, the monumental *De l'esprit des lois* (1748, Eng trans *The Spirit of Laws*, 1750), a dialogue on despotism, was published anonymously and put on the Index of prohibited books, but went through 22 editions in less than two years. A comparative study of legal and political issues, it had an immense influence. Other works include *Lysimaque* (1748) and *Arsace et Isménie* (Eng trans 1927), a romance, and an essay on taste (*Goût*) in the *Encyclopédie* (1751–80). A member of the Académie Française from 1728, he died totally blind. 🕮 J Starobinksi, *Montesquieu par lui-même* (1953)

Montessori, Maria 1870–1952
Italian physician and educationalist
Born in Rome, the first woman in Italy to receive a medical degree (1894), she founded a school for children with learning disabilities (1899–1901), and developed a system of education for children of three to six based on spontaneity of expression and freedom from restraint. The system was later worked out for older children, and applied in Montessori schools throughout the world. She opened the first Montessori school for children in the slums of Rome in 1907. 🕮 E Mortimer Standing, *Maria Montessori, Her Life and Work* (1957)

Monteux, Pierre 1875–1964
US conductor
Born in Paris, he trained at the Paris Conservatoire, where he began his career as a viola player. From 1911 to 1914, and in 1917, he conducted SERGEI DIAGHILEV's Ballets Russes in Paris, leading the world premières of IGOR STRAVINSKY's *Petrushka* (1911) and *The Rite of Spring* (1913, *Vesna Svyashchennaya*) and MAURICE RAVEL's *Daphnis and Chloé* (1912). In 1914 he organized the 'Concerts Monteux' whose programmes gave prominence to new French and Russian music. After serving in the army in World War I he went to the USA where he conducted in New York and Boston before returning to Europe in 1924 to the Amsterdam Concertgebouw Orkest. After founding and directing the Orchestre Symphonique de Paris between 1929 and 1938, he took over the newly organized San Francisco Symphony Orchestra in 1936, and in 1941 established a summer school for student conductors at Hanover, New Hampshire. From 1960 until his death he was principal conductor of the London Symphony Orchestra, and was one of the 20th century's leading conductors, his interpretations equally admired in ballet, opera and symphonic music. He became a US citizen in 1942.

Monteverdi, Claudio 1567–1643
Italian composer
Born in Cremona, he became a proficient violist and learned the art of composition, publishing a set of three-part choral pieces, *Cantiunculae Sacrae*, at the age of 15. In about 1590 he was appointed court musician to the Duke of Mantua, who appointed him maestro di capella in 1602. In 1613 he took a similar post at St Mark's, Venice, where he remained until his death. By his efforts the musical reputation of that church, which had declined since the days of the GABRIELIS, was restored to its former high position. Monteverdi left no purely instrumental compositions. His eight books of madrigals (1587–1638) contain some boldly experimental harmonies which brought criticism from academic quarters but underlined the composer's originality. His first opera, *Orfeo* (1607), with its programmatic use of orchestral sonorities, its dramatic continuity and the obbligato character of the accompaniment, marked a considerable advance in the evolution of the genre. The two surviving operas of his later period, *Il Ritorno d'Ulisse in patria* (1641, 'Ulysses's Return to his Native Land') and *L'Incoronazione di Poppea* (1642, 'The Coronation of Poppea'), both written when he was in his seventies, show further development towards the baroque style and foreshadow the use of the leitmotif. His greatest contribution to church music is the *Mass* and *Vespers* of the Virgin (1610), another innovative work. Other new features which he introduced were the orchestral ritornello, and the use of tremolo and pizzicato. 🕮 Denis Arnold, *Monteverdi* (1975, rev edn)

Montez, Lola, *originally* **Maria Délores Gilbert** 1821–61
US dancer
Born in Limerick, Ireland, she became a dancer in London in 1843. While touring Europe, she went to Munich (1846), where she had an affair with the eccentric artist-king, LUDWIG I of Bavaria, a great boost to her career as a dancer. After a tour of the USA (1848) she decided to settle in California.

Montezuma II or **Moctezuma** 1466–1520
Aztec emperor
The ninth Aztec emperor to rule Mexico before the Spanish invasion, and a distinguished warrior and legislator, he succeeded to the title (1502) and became absolute monarch of a vast empire. When the Spanish conquistadors arrived under the leadership of HERNÁN CORTÉS, he gave them rich gifts in the belief that they might be incarnations of the white god Quetzalcoatl and reluctantly received them in his palace at Tenochtitlán. They, in turn, imprisoned him and made themselves rulers instead. He died before their conquest of Mexico was complete. One of his descendants was Viceroy of Mexico (1697–1701). The last, banished from Spain for liberalism, died in New Orleans (1836). 🕮 C A Burland, *Montezuma, Lord of the Aztecs* (1973)

Montfaucon, Bernard de 1655–1741
French scholar and monk
Born in Soulage, near Brioude, he became a Benedictine monk at Saint-Maur in 1676. He went to Paris to edit the Latin works of the Greek fathers of the church, and published *Palaeographia graeca* (1708, 'Greek Palaeography'), the first work to be based on a study of manuscript handwriting, becoming the founder of the science of palaeography. He also published editions of ATHANASIUS and St JOHN CHRYSOSTOM.

Montfort, Simon IV de, Earl of Leicester c.1160–1218
Norman crusader
He took part in the Fourth Crusade (1202–04); he also undertook a crusade against the Albigenses (1208) and fell at the Siege of Toulouse.

Montfort, Simon V de, Earl of Leicester c.1208–1265
English soldier and politician
He married (1238) HENRY III of England's youngest sister, Eleanor. In 1248, as King's Deputy in Gascony, he suppressed disaffection with a heavy hand. In 1253 he returned to England where famine and taxation had exhausted the country. Prince Edward (the future EDWARD I) intrigued with the subtenants, and the barons quarrelled among themselves until de Montfort became their leader against the king in 1261. After varying success, both sides sought an arbitrator in LOUIS IX of France, who decided for surrender to the royal authority. London and the Cinque Ports repudiated the agreement, and de Montfort defeated the king's army at Lewes (1264). De Montfort, the Earl of GLOUCESTER, and the bishop of Hereford, were appointed to preside over a parliament in 1265. This, the Model Parliament, held the germ of modern parliaments. But the barons soon grew dissatisfied with the rule of 'Simon the Righteous' and Prince Edward combined with Gloucester to defeat Simon at Evesham, where he was killed. His father was SIMON IV DE MONTFORT. 🕮 M W Labarge, *Simon de Montfort* (1962)

Montgolfier, Joseph Michel 1740–1810 and **Jacques Étienne** 1745–99
French aeronautical inventors
Brothers, they were born in Annonay, near Lyons, the sons of a paper manufacturer. Joseph developed an early interest in science, while his younger brother became a successful architect before joining the family firm. After some preliminary model experiments, they constructed a balloon (1782) whose bag was lifted by lighting a cauldron of paper beneath it, thus heating and rarifying the air it contained. The world's first manned balloon flight, of 7½ miles (12.1km) in less than half an hour, at a height of 3,000 feet (915m), carrying Pilatre de Rozier and the Marquis d'Arlandes, took place in November 1783. Their achievement created great public interest, and many other inventors attempted to follow their example, not always with equal success. Further experiments were frustrated by the outbreak of the French Revolution, Étienne being proscribed, and his brother returning to his paper factory. Joseph later became interested in other applications of science, inventing a type of parachute, a calorimeter and the widely used hydraulic ram, a device for raising small quantities of water to a considerable height. He was subsequently elected to the French Academy of Sciences and created a Chevalier of the Legion of Honour by NAPOLEON I. 🕮 Léon Ronstaing, *La Famille de Montgolfier, ses alliances, ses descendants* (1910)

Montgomerie, Alexander c.1545–c.1611
Scottish poet
Born probably at Hessilhead Castle near Beith, Ayrshire, he was 'maister poet' to JAMES VI AND I. He was detained in a continental prison and was embittered by the failure of a lawsuit involving loss of a pension. His pro-Catholic sympathies led to his being denounced as a traitor in 1597, and he went into exile. His fame rests on *The Cherrie and the Slae*, published twice in 1597, and his love lyrics, especially 'To his Mistress'. 🕮 R D S Jack, *Montgomerie* (1985)

Montgomerie, Colin Stuart 1963–
Scottish golfer
Born in Glasgow and raised near Troon, he turned professional in 1988 after an amateur career that included two Walker Cup appearances (1985, 1987), and victories in the 1985 Scottish Strokeplay Championship and the 1987 Scottish Amateur Championship. He topped the European Tour Order of Merit from 1993 to 1999 inclusive and again in 2005. He has come close to winning a major on numerous occasions. His Ryder Cup record is outstanding, however, and he is undefeated in singles matches in the eight consecutive Ryder Cups he played between 1991 and 2006. He was awarded the OBE in 2004.

Montgomery (of Alamein), Bernard Law Montgomery, 1st Viscount 1887–1976
English soldier
He was born in London, the son of Bishop Montgomery, and was educated at St Paul's School and the Royal Military College, Sandhurst. He served with the Royal Warwickshire Regiment in World War I. In World War II he commanded the 3rd Division, with which he shared the retreat to Dunkirk. In North Africa in 1941 he commanded the 8th Army, restoring their bruised confidence and the will to win. Conforming to General HAROLD ALEXANDER's strategic plans, he defeated ERWIN ROMMEL at the Battle of El Alamein (October 1942). This was followed up by a series of victories that eventually drove the Axis forces back to Tunis. His subsequent activities in Sicily and Italy were solid if somewhat pedestrian. Appointed Commander for the Ground Forces for the Normandy invasion in 1944, his strategy was characterized by wariness and unflagging tenacity. By deliberately attracting the main weight of the German counter-offensive to the British flank, he freed the US armoured formations to inaugurate the joint drive across France and Belgium. His attempt to roll up the German right flank by way of Arnhem (September 1944) lacked co-ordination and the deployment of the proper means to ensure success and ended in disaster, but his timely intervention helped materially to frustrate KARL VON RUNDSTEDT's surprise offensive of December 1944. He accepted the German capitulation on Lüneburg Heath, and was commander of the British occupied zone in Germany (1945–46) and Chief of the Imperial General Staff (CIGS) in 1946–48. He was deputy Supreme Commander of NATO forces (1951–58). His publications include *Normandy to the Baltic* (1947), his controversial *Memoirs* (1958), *The Path to Leadership* (1961) and *History of Warfare* (1968). Controversial and outspoken, he was known as a 'soldier's general' and is regarded by some as the best British field commander since the Duke of WELLINGTON. 🕮 R W Thompson, *The Montgomery Legend* (1967)

Montgomery, L(ucy) M(aud) 1874–1942
Canadian novelist
She was born in Clifton, Prince Edward Island, and qualified as a schoolteacher from Prince of Wales College, Charlottetown. After studying at Dalhousie College, Halifax, Nova Scotia, she returned to Cavendish to spend the next 13 years caring for her grandmother. Her first book was the phenomenally successful *Anne of Green Gables* (1908), the story of an orphan girl adopted in error for a boy by an elderly brother and sister. She followed it with several sequels, of which *Rilla of Ingleside* (1921) is an invaluable description of the impact of World War I on the island community. She married the Rev Ewan MacDonald in 1911, and moved to his manse at Leaskdale, Ontario. Her works are sometimes highly satirical, and at her best she captures memorably the mysteries and terrors of early childhood, as in *Magic for Marigold* (1929), while her later writing shows qualities which recall the work of GUY DE MAUPASSANT. 🕮 H M Ridley, *The Story of Lucy Montgomery* (1956)

Montgomery, Wes (John Leslie) 1923–68
US jazz guitarist
Born in Indianapolis into a musical family, he performed with LIONEL HAMPTON in 1948, and in several groups with his brothers Monk and Buddy in the 1950s. Initially influenced by CHARLIE CHRISTIAN, he took jazz on electric guitar to a new level, using a distinctive style of picking with his thumb rather than finger or plectrum. A series of acclaimed recordings for the New York-based Riverside Records from 1959 established him as a major star, and he went on to have success in the mid-1960s with a more populist crossover style, which dented his jazz credibility but won him an expanded audience. 🕮 Adrian Ingram, *Wes Montgomery* (1985)

Montherlant, Henri Millon de 1896–1972
French novelist and playwright
Born in Neuilly-sur-Seine, he was severely wounded in World War I, after which he travelled in Spain, Africa and Italy. A man of athletic interests, he advocates, in both his plays and novels, the overcoming of the conflicts of life by vigorous action, and disdains the consolation of bourgeois sentiment. His stylish novels include the largely autobiographical *La Relève du matin* (1920, 'The Morning Relief'), *Les Bestiaires* (1926, Eng trans *The Bullfighters*, 1927), *Les Jeunes filles* (1935–39, 'The Young Girls') and *L'Histoire d'amour de la rose de sable* (1954, 'The Love Story of the Sandflower'). Among his plays are *Malatesta* (1946), *Don Juan* (1958) and *Le Cardinal d'Espagne* (1960, 'The Cardinal of Spain'). 🕮 H Perruchot, *Henri de Montherlant* (1959)

Montholon, Charles Tristan, Marquis de 1783–1853
French general and diplomat
Born in Paris, he served in the navy and cavalry, was wounded at Wagram (1809), and in 1809 was made NAPOLEON I's chamberlain. He was promoted general in 1811, and was Napoleon's aide-de-camp at Waterloo (1815). He accompanied him to St Helena, and published *Mémoires pour servir à l'histoire de France sous Napoléon, écrits sous sa dictée* (8 vols, 1822–25, 'Reports to be Used in the Writing of the History of France During Napoleon's Reign as Dictated by him'). Condemned in

1840 to 20 years' imprisonment for helping Louis Napoleon's (NAPOLEON III) attempted seizure of power, he was liberated in 1848, having in 1846 published *Récits de la captivité de Napoléon à Ste Hélène* ('Accounts of Napoleon's Captivity in St Helena').

Montmorency, Anne, 1st Duc de 1493–1567
French soldier
He distinguished himself under his childhood friend FRANCIS I at Marignano (1515), Mézières and Bicocca, was taken prisoner along with Francis at Pavia (1525), defeated CHARLES V at Susa (1536), and became Constable of France in 1538. Suspected by the king of siding with the Dauphin, he was banished from court in 1541. He was restored by HENRY II (1547), commanded at the disaster of St Quentin (1557), and was taken prisoner by the Spaniards. He opposed the influence of CATHERINE DE MÉDICIS, commanded against the Huguenots led by the Prince de CONDÉ at Dreux (1562), and was taken prisoner a third time. In 1563 he drove the English out of Le Havre. He again engaged Condé at St Denis (1567), where he was fatally wounded.

Montpensier, Anne Marie Louise d'Orléans, Duchesse de, *known as* **La Grande Mademoiselle** 1627–93
French noblewoman
The niece of LOUIS XIII, she was born in Paris, and supported her father and the Prince de CONDÉ in the second Fronde (1651–52), where she commanded an army that occupied Orleans and later the Bastille. After a period in exile she returned to the court and wished to marry M. de Lauzun, but the king refused his consent until 1670. Her marriage in the end was not successful and her last years were spent in religious duties. She wrote two novels and some literary portraits.

Montrose, James Graham, Marquis of 1612–50
Scottish general
After travelling in Italy, France and the Low Countries, he returned in the year (1637) of the 'Service-book tumults' in Edinburgh (see JENNY GEDDES), and was one of the four noblemen who drew up the National Covenant in support of Presbyterianism. In 1638 he was dispatched to Aberdeen, which he occupied for the Covenanters. When CHARLES I invited several Covenanting nobles to meet him in Berwick, Montrose was among them, and the Presbyterians dated his 'apostasy' from that interview. In the General Assembly of 1639 he expressed misgivings about the Covenant. It leaked out that he had been communicating with the king; he was cited before a committee of the Scottish parliament, and in the next year was confined in Edinburgh Castle. In 1644 he made his way into Perthshire as lieutenant-general and Marquis of Montrose. At Blair Atholl he met 1,200 Scoto-Irish auxiliaries, and routed the Covenanters under Lord Elcho at Tippermuir, near Perth. Next he took Aberdeen, then laid waste the estates of the Covenanting nobles, devastated the Campbell country, and drove Argyll himself from his castle at Inveraray. The 'Estates' placed a fresh army under William Baillie of Letham, who was to take Montrose in front, while Argyll should fall on his rear; but Montrose instead surprised Argyll at Inverlochy (1645). Finally escaping into the Grampians, in July 1645 he marched southward with over 5,000 men. Baillie, following, was defeated with a loss of 6,000 at Kilsyth; this, the most notable of Montrose's six victories, seemed to lay Scotland at his feet. Entering the Border country with depleted forces, on 13 September he was surprised and routed by 6,000 troopers under David Leslie at Philiphaugh, near Selkirk. Escaping to Atholl, he sailed for Norway on 3 September 1646, and thence travelled to Paris, Germany and the Low Countries. When news of Charles's execution reached him, he swore to avenge it; he lost most of his army by shipwreck, but reached the borders of Ross-shire, where his dispirited remnant was defeated on 27 April 1650. He nearly starved to death in the wilds of Sutherland, was captured and taken to Edinburgh, where he was hanged in the High Street on 21 May 1650. Eleven years afterwards his mangled remains were collected and buried in St Giles' Cathedral, and a monument was erected to him there in 1888. Montrose's few passionately loyal poems are little known, save the one stanza beginning, 'He either fears his fate too much'; even its ascription to Montrose (first made in 1711) is doubtful.
📖 John Buchan, *Montrose* (1928)

Monts, Pierre du Gua, Sieur de c.1560–c.1630
French explorer and colonist
He was made lieutenant-general of Acadia (French America) by HENRY IV in 1603, and with SAMUEL DE CHAMPLAIN he explored the coasts of New Brunswick and New England. In 1605 they founded Port Royal, the first French colony in Canada.

Moodie, Susanna 1803–85
English novelist and poet
Born in Bungay, Suffolk, she married and emigrated to Canada, where her husband took up farming with limited success. She began writing partly in order to contribute to the family income, publishing a collection of verse, *Enthusiasm and Other Poems*, in 1831. Her novels, sentimental in style, include *Mark Hurdlestone and the Gold Worshipper* (1853) and *Flora Lyndsay* (1854). Her most popular non-fiction books, *Roughing It in the Bush, or Life in Canada* (1852) and *Life in the Clearings Versus the Bush* (1853), are loosely based upon her own experiences.

Moody, Dwight L(yman) 1837–99
US evangelist
Born in Northfield, Massachusetts, he was a shoe salesman in Boston and in 1856 went to Chicago, where he gave up his job to engage in missionary work, and organized the North Market Sabbath School. In 1870 he was joined by Ira David Sankey (1840–1908), who was born in Edinburgh, Pennsylvania. In 1873 and 1883 they visited Great Britain as evangelists, Moody preaching and Sankey singing; afterwards they worked together in the USA. They published the *Sankey and Moody Hymn Book* (1873) and *Gospel Hymns* (1875). In 1899 he founded the Moody Bible Institute in Chicago. 📖 James F Findlay, Jnr, *Dwight L Moody, American Evangelist: 1837–1899* (1969)

Moody, Harold Arundel 1882–1947
British physician and civil rights leader
Born in Kingston, Jamaica, he came to London in 1904 to study medicine and was a prize-winning student, qualifying in 1910. Unable to find work in hospitals because of his race, he instead established a successful private practice. A devout Christian, he was involved with the Colonial Missionary Society and the London Christian Endeavour Federation, but is best remembered for establishing (with Quaker support) the League of Coloured Peoples in 1931. The League's aim was to fight discrimination and to improve the conditions and opportunities for students and workers from the Caribbean and Africa.

Moody, William Vaughn 1869–1910
US dramatist and poet
He was born in Indiana. In his plays, he was among the first to move from popular adaptations of French farce in order to deal realistically with wholly US subject matter and themes. *The Great Divide* (1906, originally *A Sabine Woman*), uses the story of a woman's abduction from Massachusetts by a man from Arizona, their tempestuous association and eventual marriage, to reflect the cultural differences between a settled, inflexible society on the one hand and the wild spirit of the frontier on the other. Moody also wrote an incomplete trilogy in verse, and several volumes of poems of which *Poems* (1901), containing the much-anthologized 'Gloucester Moors', is perhaps the most representative.

Moog, Robert Arthur 1934–2005
US inventor
He was born in New York City, and built his first theremin at the age of 14. Five years later, he was selling the instruments in kit form. In 1964 he launched the Moog synthesizer, the first relatively small electronic musical instrument with a traditional keyboard interface. Innovation-hungry musicians seized on the new sound, and Wendy Carlos's album *Switched-On Bach* (1968) introduced it to a mass audience. In 1970 Moog introduced the more portable Minimoog, which proved popular as a touring instrument with musicians such as Keith Emerson and Rick Wakeman. Moog's inventions transformed the sound of popular music and paved the way for digital audio technology. 📖 Trevor Pinch and Frank Trocco, *Analog Days: The Invention and Impact of the Moog Synthesizer* (2002)

Moon, Sun Myung 1920–
South Korean religious leader
In 1954 he founded the Unification Church, an amalgam of Christianity and the teachings of its self-declared prophet, Moon. In 1973 he moved its headquarters from South Korea to Tarrytown, New Jersey, and the organization now has branches and properties worldwide. In 1982 he founded the conservative newspaper *The Washington Times*. Known for holding mass weddings, he and his followers have been accused of brainwashing converts and of financial misdealings, and in 1984 Moon was convicted of tax evasion under US law and was sentenced to 18 months in prison.

Moon, William 1818–94
English inventor
He was born in Kent. Partially blind from the age of four, he became totally blind in 1840 and began to teach blind children.

Dissatisfied with existing systems of embossed type, he invented (in 1845) a system based on Roman capitals, and he later invented a stereotype plate for use with it. Although requiring more space, his type is easier to learn than BRAILLE and is still widely used.

Mooney, Ria 1903–73
Irish actress and teacher
Born in Dublin, she began acting at the age of six, and first appeared at the Abbey Theatre in Dublin in 1924. She attracted significant attention in SEAN O'CASEY's *The Plough and The Stars* (1926), and made her US debut in 1927. After a short spell at the Gate Theatre in Dublin, she returned to the Abbey (1935), and was placed in charge of their experimental Peacock Theatre in 1937, where she directed her first play. In 1948 she became the first woman director of the Abbey Theatre, and served with distinction until her retirement in 1963.

Moorcock, Michael John 1939–
English novelist
Born in Mitcham, Surrey, he became, at 17, editor of *Tarzan Adventures* and was a regular contributor to the *Sexton Blake Library*. From the mid-1960s onwards, he was editor (1964–71), then publisher, of the influential science fiction series *New Worlds*. He also wrote comic strips. Much of his fiction has been organized in cycles. The 'Elric' novels began with *Stormbringer* in 1965. Perhaps his best-known sequence, starring the morally and sexually ambiguous 'Jerry Cornelius', started with *The Final Programme* (1968). He introduced 'Karl Glogauer' in *Behold the Man* (1969), a controversial reworking of the Crucifixion. A further enormous mythic cycle began with *The Eternal Champion* in 1970 and then a complex, emotionally demanding cycle, beginning with *Byzantium Endures* (1981). He has also written in non-sci-fi mode, including the sprawling, Dickensian *Mother London* (1988). Later works include *Tales from the Texas Woods* (1997), *The Dreamthief's Daughter* (2001) and *The Vengeance of Rome* (2006). 🕮 With C Greenland, *Michael Moorcock: Death is no Obstacle* (1991)

Moorcroft, William 1872–1945
English potter
Born in Staffordshire, he set up his own firm in 1913 in Burslem, producing a range of white-bodied ceramics decorated with stylized flowers and leaves, titled Florian ware. His Hazledene ware (landscape and trees) and Claremont ware (toadstools) were more colourful. His main interest, however, was the flambé glazes, and he won many prizes for his work in Paris, Brussels and the USA. In 1928 he was appointed potter to the Crown.

Moore, Albert Joseph 1841–93
English painter
The son of WILLIAM MOORE, and brother of the painter HENRY MOORE, he is best known for his Hellenic decorative paintings.

Moore, Archie, *originally* **Archibald Lee Wright** 1913–98
US boxer
Born in Benoit, Wisconsin, he became a professional boxer in 1936, and eventually, in 1952, won the world light-heavyweight title by defeating Joey Maxim. He held the title for ten years (1952–62), when he retired at the age of 49. He also challenged for the heavyweight title, despite a lack of weight and height, and in 1955 gave ROCKY MARCIANO a hard fight before being knocked out. He also fought Floyd Patterson for the title in 1956. Of his 229 fights he won more than half inside the distance, and ranks high in any list of the world's greatest-ever fighters.

Moore, Bernard 1850–1935
English potter
Born in Staffordshire, he joined Moore Brothers, where he traded with his brother until the sale of the business in 1905. That year he set up his own business where he was joined by his son in 1906. As a chemist he was particularly interested in glazes and his experiments led him to produce a series of red flambés, turquoise, sang-de-bœuf, crystalline and aventurine glazes, as well as fine lustres. He worked as a consultant with many British, European and US companies, assisting them with problems relating to technical production. He was greatly concerned with health risks to pottery workers and delivered an influential paper to the Ceramic Society in 1932 suggesting changes in production to minimalize lung disease.

Moore, Bobby (Robert) 1941–93
English footballer
Born in Barking, Essex, in a long career with West Ham (1958–74) and later Fulham (1974–77), he played 1,000 matches at senior level, winning an FA Cup-winner's medal in 1964 and a European Cup-winner's medal in 1965. He was capped 108 times (107 in succession), 90 of them as captain. He played in the World Cup finals in Chile in 1962, captained the victorious England side in the 1966 World Cup, and led the team with some success in Mexico in 1970 despite being the victim of a trumped-up charge of theft in Bogotá in the run-up to the finals. He was sports editor for the *Sunday Sport* from 1986 to 1990, when he became a commentator. He died following a two-year-long battle against cancer. 🕮 Jeff Powell, *Bobby Moore: The Life and Times of a Sporting Hero* (1993)

Moore, Brian 1921–99
Canadian novelist
He was born in Belfast, Northern Ireland, and served with the British Ministry of War Transport during the latter stages of World War II. After the war he worked for the United Nations in Europe before emigrating to Canada in 1948, where he became a journalist and adopted Canadian citizenship. He spent time in New York before moving to California. Though he wrote thrillers under the pseudonym Michael Bryan, he is best known for novels like *The Feast of Lupercal* (1957), *The Luck of Ginger Coffey* (1960), *Catholics* (1972) and *The Temptation of Eileen Hughes* (1981). Particularly admired for his portrayal of women, he won the Author's Club First Novel award with *The Lonely Passion of Judith Hearne* (1955), though it was not, strictly speaking, his first novel. *The Great Victorian Collection* (1975) was awarded the James Tait Black Memorial Prize, and both *The Doctor's Wife* (1976) and *Black Robe* (1985, filmed 1991) were shortlisted for the Booker Prize. Later works include *No Other Life* (1993) and *The Statement* (1996). 🕮 H Dahlie, *Brian Moore* (1981)

Moore, Christy 1945–
Irish folk singer
Born in Dublin, he began as a solo singer, working the folk clubs and pubs between bouts of manual labouring in both Ireland and England. He was a co-founder of Planxty in 1971, and then Moving Hearts in 1981, two of the most influential groups in Irish music, but on each occasion eventually chafed against the group setting, and returned to solo performance. He has taken a high-profile campaigning stance on controversial issues like nuclear power and the political situation in Northern Ireland (and elsewhere) in his music, mixed with a great deal of sometimes surreal humour. He is an imposing live performer, with a level of genuine artistry rare in the folk field, and which has proved difficult to capture fully on recordings. His younger brother Barry (1955–) is the singer Luka Bloom.

Moore, Clement Clarke 1779–1863
US poet
Born in New York City, he attended Columbia College and became a Hebrew scholar and a professor of Oriental and Greek literature. He is now best remembered for his poem 'A Visit from St. Nicholas' (1823), popularly known as "'Twas the Night Before Christmas'.

Moore, Demi, *originally* **Demetria Gene Guynes** 1962–
US actress
Born in Roswell, New Mexico, she started her career in modelling and small television roles. Her screen career began in the early 1980s with films such as *Blame It On Rio* (1984) and the 'Brat Pack' drama *St Elmo's Fire* (1985), but it was with blockbusters such as *Ghost* (1990), *Indecent Proposal* (1993) and *Disclosure* (1994) that she achieved international stardom, becoming Hollywood's highest-paid actress in 1996 with her $12 million role in *Striptease*. Famously photographed naked and pregnant for a *Vanity Fair* cover in 1991, she has been married to the actors BRUCE WILLIS and Ashton Kutcher (1978–). 🕮 Nigel Goodall, *Demi Moore* (2000)

Moore, Dudley Stuart John 1935–2002
English actor
Born in Dagenham, Essex, he studied music at Oxford. In 1960, he joined fellow Oxbridge graduates in *Beyond the Fringe* at the Edinburgh Festival, then in London and on Broadway. He formed a satirical comedy partnership with PETER COOK that flourished on television in *Not Only... But Also* (1965–71) and in such films as *The Wrong Box* (1966) and *Bedazzled* (1967). He eventually went his own way and enjoyed belated Hollywood success as the middle-aged hero of comedies such as *'10'* (1979) and *Arthur* (1980). An acclaimed pianist and jazz performer, he also composed the music score for a number of films and performed with some of the world's leading classical orchestras. On television, he presented the series *Concerto!* (1993). His career was curtailed in later years after he was diagnosed with the degenerative disease progressive supranuclear palsy.

Moore, Henry Spencer 1898–1986
English sculptor

Henry Moore was born in Castleford, Yorkshire, the son of a coalminer. He studied at Leeds and at the Royal College of Art, London, where he taught sculpture (1924–31); from 1931 to 1939 he taught at the Chelsea School of Art. He travelled in France, Italy, Spain, USA and Greece, and was an official war artist from 1940 to 1942. During this time he produced a famous series of drawings of air-raid shelter scenes. In 1948 he won the International Sculpture prize at the Venice Biennale.

He is recognized as one of the most original and powerful modern sculptors, producing figures and groups in a semi-abstract style based on the organic forms and undulating rhythms found in landscape and natural rocks, and influenced by primitive African and Mexican art. His interest lay in the spatial, three-dimensional quality of sculpture, an effect he achieved by the piercing of his figures. His principal commissions included the *Madonna and Child* in St Matthew's Church, Northampton (1943–44), the decorative frieze (1952) on the Time-Life building in London, and the massive reclining figures for the UNESCO building in Paris (1958) and the Lincoln Center in New York (1965).

📖 W Packer, *Henry Moore* (1985).

> 'Sculpture in stone should look honestly like stone... To make it look like flesh and blood, hair and dimples is coming down to the level of the stage conjuror.'
>
> – From an article in *Architectural Association Journal* (1930).

He was awarded the CBE in 2001. 📖 Barbra Paskin, *Dudley Moore* (1997)

Moore, Edward 1712–57
English dramatist
Born in Abingdon, Berkshire, he became a draper in London, and took to writing plays to avoid going bankrupt. The comedy *Gil Blas* (1751), based on that of ALAIN RENÉ LESAGE, and the prose tragedy *The Gamester* (1753), are his best-known productions. He also edited the weekly journal *The World* (1753–57). 📖 J M Caskey, *The Life and Works of Edward Moore* (1927)

Moore, Francis 1657–1715
English astrologer
Born in Bridgnorth, Shropshire, he practised medicine in London, and in 1700 started 'Old Moore's' astrological almanac.

Moore, George Augustus 1852–1933
Irish writer
Born in Ballyglass, County Mayo, the son of a landed gentleman, he was educated at Oscott College, Birmingham, and intended for the army, but soon became an agnostic, abandoned a military career and lived a bohemian life in London and Paris, until ZOLA's example revealed to him his true métier as a novelist of the Realist school. Moore has been credited with introducing this type of fiction into Great Britain with his novels of low life, *A Modern Lover* (1883), *A Mummer's Wife* (1885), and others. During the Boer War he sought exile in Ireland where he wrote *Evelyn Innes* (1898) and *Sister Teresa* (1901), which reflect his increasing interest in love, theology and the arts, and the stories in *An Untilled Field* (1903), which mark a move away from his earlier 'sordid' realism. He returned to England early in the century and published his confessions, *Memoirs of My Dead Life* (1906) and the trilogy *Hail and Farewell – Ave* (1911), *Salve* (1912) and *Vale* (1914) – in which he wrote about his friends and his associates in setting up the Abbey Theatre in Dublin, particularly W B YEATS. His other later works include *The Brook Kerith* (1916), which relates an apocryphal story of PAUL and JESUS CHRIST among the Essenes, and the mythical *Aphrodite in Aulis* (1930). 📖 J Hone, *The Life of George Moore* (1936)

Moore, G(eorge) E(dward) 1873–1958
English empiricist philosopher
Born in London, he was educated at Dulwich College and Trinity College, Cambridge, where a fellow student, BERTRAND RUSSELL, helped persuade him to switch from classics to philosophy. After some years of private study in Edinburgh and London he returned to Cambridge to teach philosophy (1911) and became professor of mental philosophy and logic (1925–39). After a brief, early infatuation with the prevailing Hegelian idealism of JOHN M'TAGGART and others, in 1903 he published an article 'The Refutation of Idealism' (in the journal *Mind*), and a book, the celebrated *Principia Ethica* ('Ethical Principles'). These marked an important change of direction and the effective revival, in a new form, of a British empiricist philosophical tradition, emphasizing in particular the intellectual virtues of clarity, precision and honesty, and identifying as a principal task of philosophy the analysis of ordinary concepts and arguments. Moore and Russell, and later their student LUDWIG WITTGENSTEIN, were the dominant figures in this tradition in the interwar years. *Principia Ethica* analysed the moral concept of goodness and commended the value of friendship and aesthetic experience; it was a major influence on the Bloomsbury Group, which included LEONARD WOOLF, Lowes Dickinson, JOHN MAYNARD KEYNES and E M FORSTER. Other works include *Ethics* (1916), an elaboration and restatement of these views, and three important collections of his influential articles and papers: *Philosophical Studies* (1922), *Some Main Problems of Philosophy* (1953) and *Philosophical Papers* (1959). He also edited the journal *Mind* (1921–47) and made it the major English-language journal in the field. 📖 D Rohatyn, *The Reluctant Naturalist* (1987)

Moore, Gerald 1899–1987
English piano accompanist
Born in Watford, Hertfordshire, he studied music at Toronto, Canada, and established himself as a skilful accompanist of the world's leading singers and instrumentalists. A constant performer at international music festivals, he was also a notable lecturer and television broadcaster on music. He wrote an engaging and instructive account of his art and experiences in *The Unashamed Accompanist* (1943, new edn 1959).

Moore, Henry 1831–95
English painter
He was the son of WILLIAM MOORE and brother of ALBERT JOSEPH MOORE. Starting as a landscape painter, he later achieved great success as a sea painter.

Moore, Henry Spencer *See panel above*

Moore, Sir (John) Jeremy 1928–
English soldier
He joined the Royal Marines (RM) at the age of 19 and saw service in Great Britain, Brunei and Australia in a variety of roles, including that of commandant of the RM School of Music. He had reached the rank of major-general in the commando forces by 1979, and in 1982, when the decision was taken to recapture the Falkland Islands from Argentina, he was made Commander of Land Forces. His success in the brief campaign brought him unexpected fame as well as a knighthood. He retired from the forces in 1983.

Moore, Sir John 1761–1809
Scottish soldier
Born in Glasgow, he served in the American Revolution from 1779 to 1783, the Revolutionary War in France, the West Indies (1796), Ireland (1798) and the Netherlands (1799). He was in Egypt in 1801, and in 1802 served in Sicily and Sweden. In 1808 he was sent to strengthen the English army in the Peninsula. In October he received instructions to co-operate with the Spanish forces in the expulsion of the French, and moved his army from Lisbon towards Valladolid; but Spanish apathy, French successes elsewhere and the intrigues of his own countrymen soon placed him in a critical position. When news reached him that Madrid had fallen, and that NAPOLEON I was marching to crush him, he was forced to retreat. In December he began a disastrous march from Astorga to Coruña. His army reached Corunna (La Coruña) in a lamentable state, and NICOLAS SOULT was waiting to attack as soon as the embarkation should begin. In a desperate battle on 19 January 1809, the French were defeated with the loss of 2,000 men. Moore himself was mortally wounded in the moment of victory, and his burial was immortalised in CHARLES WOLFE's poem 'The Burial of Sir John Moore'.

Moore, John Bassett 1860–1947
US lawyer and judge
Born in Smyrna, Delaware, he was educated at the University of Virginia. He served as a law clerk in the Department of State (1885–86), was Assistant Secretary of State (1886–91), and

became professor of international law at Columbia (1891–1924). The author of a comprehensive *History and Digest of International Arbitrations* (6 vols, 1898), a *Digest of International Law* (8 vols, 1906), *International Adjudications* (7 vols, 1929–36) and other works on international law, he also served as a judge of the Permanent Court of International Justice (1921–28).

Moore, Julianne, *originally* **Julie Anne Smith** 1960–
US actress
Born in Fayetteville, North Carolina, she studied at Boston University. She began her career on the stage in the late 1980s and moved to film in the early 1990s, appearing in *The Hand That Rocks the Cradle* (1992), *Short Cuts* (1993), *Safe* (1995), *Boogie Nights* (1997), *The End of the Affair* (1999) and *Hannibal* (2000), in which she took over the role of FBI Agent Clarice Starling from JODIE FOSTER. She has been nominated for an Academy Award four times, including twice in 2003 for *Far from Heaven* (2002) and *The Hours* (2002).

Moore, Marianne Craig 1887–1972
US poet
Born in St Louis, Missouri, she was educated at Bryn Mawr College, and Carlisle Commercial College in Pennsylvania. She taught commercial studies at Carlisle, tutored privately, and was a branch librarian in New York (1921–25). She contributed to the Imagist magazine, *The Egoist*, from 1915, and edited *The Dial* from 1926 until its demise in 1929. She was acquainted with seminal modernists like EZRA POUND and T S ELIOT, but New York was her milieu, not Paris, and she associated with the Greenwich Village group including WILLIAM CARLOS WILLIAMS and WALLACE STEVENS. She has supplied a much-quoted definition of the creative ideal as 'imaginary gardens with real toads in them'. Her first book, *Poems*, was published by friends in London in 1921. Idiosyncratic, a consummate stylist and unmistakably modern, she ranks high among the US poets of the 20th century. Other volumes include *Collected Poems* (1951, Pulitzer Prize) and *The Complete Poems* (1967). She also published *Predilections*, a collection of essays, in 1955. 🕮 E P Sheehy and K A Lohf, *The Achievement of Moore, 1907–1957* (1958)

Moore, Mary Tyler 1936–
US actress
Born in Brooklyn, New York City, she trained as a dancer, and her first professional job was as the Happy Hotpoint Pixie in a series of television commercials in 1955. Small acting roles followed, and she was seen in the series *Richard Diamond, Private Eye* (1957–59) and *The Dick Van Dyke Show* (1961–66) which won her Emmy awards in 1964 and 1966. She starred on Broadway in *Breakfast at Tiffanys* (1966) but returned to television with the long-running *The Mary Tyler Moore Show* (1970–77). The series won her Emmy awards in 1973, 1974 and 1976. She went on to win a Tony Award for *Whose Life Is It Anyway?* (1980), an Academy Award nomination for the film *Ordinary People* (1980) and an Emmy for *Stolen Babies* (1993). Seldom offered good film roles, she had a rare chance to display her comic gifts on the large screen in *Flirting with Disaster* (1996).

Moore, Michael Francis 1954–
US documentary film-maker, writer and broadcaster
He was born in Flint, Michigan, and studied journalism at the University of Michigan. The closure of the General Motors plant in his home town provided the subject for his first documentary, *Roger & Me* (1989). His television series *TV Nation* (1994–95) and *The Awful Truth* (1999–2000) established his politically provocative but entertainingly populist style. The Oscar-winning feature documentary *Bowling for Columbine* (2002) focused on US gun laws, while *Fahrenheit 9/11* (2004), winner of the Palme d'Or at Cannes, attacked GEORGE W BUSH's administration for its handling of the aftermath of the terrorist attacks in New York City on 11 September 2001. His book *Stupid White Men* was the bestselling non-fiction title of 2002 in the USA.

Moore, Sir Patrick Alfred Caldwell 1923–
English astronomer, author and broadcaster
Born in Pinner, Middlesex, and educated privately owing to illness, he served in the RAF during World War II as a navigator in Bomber Command (1940–45). He began his perennially popular television series, *The Sky at Night*, in April 1957, and has presented it every month since then. He was director of Armagh Planetarium (1965–68) and has written more than 60 books, including *Atlas of the Universe* (1970, revised 1995), *Guide to the Planets* (1976), *Guide to the Moon* (1976), *TV Astronomer* (1987), *A Passion for Astronomy* (1991), *The Starry Sky* (1994), *Teach Yourself Astronomy* (1995), *Sun in Eclipse* (1999) and *The Wondering Astronomer* (2000). He published his autobiography in 2005, and co-authored *Bang! A Complete History of the Universe* (2006) with the amateur astronomer and professional rock guitarist Brian May. Moore is an accomplished xylophone player, and in 1940 accompanied violinist ALBERT EINSTEIN on the piano. He was made an Honorary Fellow of the Royal Society and knighted in 2001. In 2004 he received an Orrery Award from the British Astronomical Association.

Moore, Sir Roger George 1927–
English actor
Born in London, he studied painting before making his film debut as an extra in *Perfect Strangers* (1945). He appeared in small roles on stage and in films prior to National Service in the army. Subsequently performing in the USA, he appeared on Broadway in *A Pin to See the Peepshow* (1953) and in the Hollywood film *The Last Time I Saw Paris* (1954). On television his boyish good looks, smooth manner and athletic prowess won him stardom as the action-man hero of such series as *Ivanhoe* (1957), *The Alaskans* (1959–60), *The Persuaders* (1971–72) and most especially, *The Saint* (1962–68). His own wittiest critic, he brought a lightweight insouciance to the role of James Bond in seven films between *Live and Let Die* (1973) and *A View to a Kill* (1985). Now a goodwill ambassador for UNICEF, he was awarded the CBE in 1999 and knighted in 2003.

Moore, Stanford 1913–82
US biochemist and Nobel Prize winner
Born in Chicago, he studied chemistry at Vanderbilt University and the University of Wisconsin, and spent his career at the Rockefeller Institute (1939–82). He is best known for inventing, with WILLIAM STEIN, a chromatographic method for the identification and quantification of amino acids in mixtures of proteins or from physiological tissues (1950). By 1958 they had also developed an ingenious automated analyser to carry out all the steps of the analysis of the structure of RNA on a small sample. In a study of streptococcus, Moore and Stein found the first example of convergent evolution at the molecular level – two enzymes of similar function arising by different evolutionary paths. They also complemented the structural studies of CHRISTIAN ANFINSEN (1954–56), and all three shared the Nobel Prize in chemistry in 1972.

Moore, Thomas 1779–1852
Irish poet and composer
Born in Dublin, he was educated at Whyte's School and Trinity College, Dublin, and became a lawyer. His translation of ANACREON (1800) proved a great success, followed by *Poems* (1801). In 1803, after being appointed registrar of the Admiralty Court in Bermuda, he arranged for a deputy, and returned and settled in Wiltshire. Meanwhile he had published the earlier of the *Irish Melodies* (1807–34) and *The Twopenny Postbag* (1812), and in 1817 *Lalla Rookh* appeared. His Bermuda deputy embezzled £6,000, and in 1819, to avoid arrest, Moore went to Italy and then to Paris. He returned in 1822 to Wiltshire, and published *The Loves of the Angels* (1823) and a novel, *The Epicurean* (1827), and wrote biographies of RICHARD BRINSLEY SHERIDAN and BYRON. 🕮 T de Vere White, *Tom Moore, the Irish Poet* (1977)

Moore, Thomas Sturge 1870–1944
English poet, critic and wood engraver
Born in Hastings, Sussex, he was the brother of the philosopher G E MOORE. He is known for his classical verse style, beginning with *The Vinedresser* (1899), his verse dramas, works on ALBRECHT DÜRER and other artists, and as a distinguished designer of bookplates, including those of his friend W B YEATS. His *Collected Poems* appeared in four volumes between 1931 and 1933. 🕮 F C Gwynn, *Moore and the Life of Art* (1951)

Moore, William 1790–1851
English painter
A well-known portrait painter in York, he was the father of 13 sons, several of whom also became well-known artists.

Moore Sitterly, Charlotte 1898–1990
US astronomer and spectroscopist
Born in Enciltoun, Pennsylvania, she graduated from Swarthmore College in 1920, was assistant to HENRY RUSSELL (1920–25) at Princeton University, and moved to Mount Wilson Observatory to revise and extend the table of wavelengths in the solar spectrum. In the revised table, published in 1928, over 58,000 wavelengths were tabulated, and a second revision under her direction (1966) added 10,000 more lines. She returned to Princeton (1931–45) where she produced her famous *Multiplet Tables of Astrophysical Interest* (1945), and in 1945 joined the Bureau of Standards, Washington (1945–68), where she

published her *Ultraviolet Multiplet Tables* (1946) and *Atomic Energy Levels* (1949–58).

Mor or **More** or **Moro, Anthonis** 1519–75
Dutch portrait painter
Born in Utrecht, he entered the Antwerp guild of St Luke in 1547, visited Italy, Spain, and England, where he was knighted, and painted Queen MARY I for her bridegroom, PHILIP II of Spain. From about 1568 he lived in Antwerp.

Morales, (Juan) Evo 1959–
Bolivian politician
Born in Orinoca, he began his working life as a coca-leaf farmer. After completing his secondary education and mandatory military service, he returned to farming and became a left-wing union leader of the local *cocaleros* (coca growers). In 1997 he was elected to the Bolivian Congress. He came a surprise second in the 2002 presidential campaign, then won the 2005 elections, promising to protect coca cultivation by fighting US-led eradication plans and pledging to nationalize Bolivia's gas reserves. An Aymara Indian, he is Bolivia's first indigenous head of state in over 400 years.

Morales, Luis de, *known as* **El Divino** c.1520–c.1586
Spanish Mannerist painter
Probably born in Badajoz, he lived there most of his life. Despite this, his style and technique show Flemish and Italian influences, and he is thought to have trained in Seville with the Flemish painter Peeter Kempeneer (known in Spain as Pedro de Campaña). Morales painted highly emotional devotional works for the cathedral and for churches in Badajoz, and in nearby Evora in Portugal. There are works by him in many galleries throughout the world (eg *Virgin and Child*, National Gallery, London; *Ecce Homo*, Hispanic Society of America, New York).

Morandi, Giorgio 1890–1964
Italian painter
Born in Bologna, he studied at the Academy of Fine Arts, Bologna, where he later taught (1930–56). Although influenced (c.1918–19) by the Italian Metaphysical painters, he otherwise eschewed the changing fashions of the modern movement, concentrating on landscapes, portraits and above all still life. His arrangements of everyday objects on a table top were painted in subdued tones and with a monumental simplicity of form reminiscent of CÉZANNE. He won the Grand Prix for Painting at the Venice Biennale, 1948, and other honours followed.

Morant or **Murrant, Harry Harbord**, *originally* **Edwin Henry Murrant** 1865–1902
Australian adventurer and poet
Born probably in Bridgewater, Somerset, England, he went to northern Queensland in 1883 and the following year married Daisy May O'Dwyer, later DAISY BATES. He lived in Queensland and New South Wales, earning a living from his skills as a rider and horse-breaker. Under the pseudonym 'Breaker' he contributed ballads and bush verse to the Sydney magazine *The Bulletin*, writing some 60 poems from 1891. In 1899 he enlisted in the Australian contingent sailing for the Boer Wars. In South Africa, after the murder and mutilation by the Boers of a close friend, Morant and others of his patrol shot a number of Boers who were coming to surrender. Morant was also implicated in the murder of a British missionary who was witness to these events. After a lengthy and confused court martial, Morant was found guilty, and executed by firing squad.

Morant, Sir Robert 1863–1920
English educationalist and civil servant
Born in Hampstead, London, he was educated at Winchester and New College, Oxford, and became tutor to the Crown Prince of Siam and laid the foundation of public education there (1886–94). He joined the Department of Education in England in 1895, and became Permanent Secretary to the Board of Education in 1902, and First Secretary at the Ministry of Health (1919). He remodelled the English educational machinery and constructed the Ministry of Health. He devised the Balfour Education Act of 1902 which made county and county borough councils the local education authorities in place of the school boards, and brought voluntary schools under the new authorities. The act led to the development of the county grammar schools, but caused relentless political disputation for several years. His *Regulations for Secondary Schools* (1904), by ignoring the practical and quasi-vocational curriculums developed in the Higher Grade Schools of the School Board era, are now thought to have inhibited the development of vocational education in secondary schools.

Morata, Olympia 1526–55
Italian humanist scholar and poet
She was the daughter of the poet and scholar, Pellegrino Morato. She gave public lectures when 15, but, having married a German physician, Andreas Grundler, in 1548, she followed him to Germany, became a Protestant, and died penniless, leaving numerous Latin and Greek poems, a treatise on CICERO, dialogues and letters.

Morath, Inge(borg) 1923–2002
US photojournalist
Born in Graz, Austria, she studied languages at Berlin University and worked as a translator and journalist before joining Magnum Photos as an editor and researcher. Having trained as a photographer in London, she worked as an assistant to HENRI CARTIER-BRESSON in Paris (1953–54) before joining Magnum in her own right (1955), after which she travelled widely. Her reportages from around the world, whether published in magazines such as *Life* or in her own collections, were characterized by dignity and an intuitive understanding of the people and places featured. While on assignment to photograph MARILYN MONROE on the set of *The Misfits* (1960) she met ARTHUR MILLER, whom she married in 1962.

Moratín, Leandro de 1760–1828
Spanish dramatist and poet
Born in Madrid, he began as a designer of jewellery, and later held official and ecclesiastical positions. He wrote a number of successful comedies influenced by French ideas and especially by MOLIÈRE, and translated *Hamlet*. He also wrote poetry, and a history of Spanish literature. His acceptance of the post of librarian to JOSEPH BONAPARTE resulted in his exile to Paris in 1814.

Moravia, Alberto, *pseudonym of* **Alberto Pincherle** 1907–90
Italian novelist and short-story writer
He was born in Rome, of middle-class parents, and spent some years in a sanatorium as a result of a tubercular infection. Before the outbreak of World War II he travelled extensively and lived for a time in the USA when out of favour with the fascist government. His first novel, *Gli indifferenti* (1929, Eng trans *The Indifferent Ones*, 1932), which achieved popular success, contains many of the ingredients of his later novels and short stories. Without making an explicit moral judgement, he analyses the decadent bourgeois society of Rome, portraying their preoccupation with sex and money, their apathy, their lack of communication, and the total incapability of action of even the intellectuals who acknowledge the corruption but cannot break away from it. *La romana* (1947, Eng trans *The Woman of Rome*, 1949) also encompasses socio-economic problems of the working class, and in *Raconti romani* (1954, Eng trans *Roman Tales*, 1956) he turns his critical eye to the corruption of the lower middle class. His later works include *L'attenzione* (1965, Eng trans *The Lie*, 1966), *La vita interiore* (1978, Eng trans *Time of Desecration*, 1980) and *L'uomo che guarda* (1985, Eng trans *The Voyeur*, 1986). 🕮 K Longobardi, *Alberto Moravia* (1970)

Moray, James Stewart, 1st Earl of 1531–70
Regent of Scotland
The second illegitimate son of JAMES V of Scotland and Lady Margaret Douglas, he was made Prior *in commendam* of St Andrews (1538), and was educated at the university there. He emerged as one of the leaders of the Protestant Lords of the Congregation whose revolt produced the Scottish Reformation of 1560. In 1561 he visited his half-sister, MARY, QUEEN OF SCOTS, in France and after she returned to Scotland he defended her right to attend mass in her private chapel, and fended off the protests of JOHN KNOX. He was granted the earldoms of Mar and Moray (1562), which resulted in the revolt of the Catholic dissident, the 4th Earl of Huntly. He remained the queen's chief adviser until her marriage to Lord DARNLEY (1565), which triggered an abortive coup by him and the HAMILTONS and his flight to England. He returned to Edinburgh on the day after DAVID RIZZIO's murder (1566) and was rehabilitated. His foreknowledge of the plot to murder Darnley (1567) induced another diplomatic absence, and he was in France when Mary was overthrown and imprisoned at Lochleven. He returned to become regent for Mary's infant son, JAMES VI. His regency was chequered: it saw for the first time a Protestant government, but little was done by it to advance the Reformation of the Church; the civil war continued, and he had few supporters and many influential enemies in Scotland. He was shot as he rode through Linlithgow by James Hamilton of Bothwellhaugh, and died of his wounds soon after. One of the few Protestant nobles who acted consistently for religious motives, it was he as much as any of the ministers, including Knox, who helped give a Calvinist tone

to the Scottish Reformation. His reputation has ironically been obscured by the brilliance of the case put in his defence in the writings of GEORGE BUCHANAN. 🕮 Maurice Lee, *James Stewart, Earl of Moray* (1953)

Mordaunt, Charles *See* PETERBOROUGH, 3RD EARL OF

Mordecai c.5th century BC
Biblical character
He is described in the Book of Esther as a Jew in exile in Persia (Iran), who cared for his orphaned cousin Esther and gained the favour of King XERXES I after uncovering a plot against him. He used his subsequent influence to protect Jews from an edict issued against them, an event commemorated by the annual Jewish feast of Purim.

Mordkin, Mikhail 1880–1944
US dancer, teacher and director
Born in Moscow, he graduated from the Bolshoi Ballet School in 1899, becoming first soloist with, and then ballet master of the company. His career in the West was launched with his appearance in SERGEI DIAGHILEV's 1909 Paris season, from which he went on to work with ANNA PAVLOVA. After touring the USA, he went back to the Bolshoi (1912), becoming director in 1917. The October Revolution that year forced his return to the USA, where he settled, becoming a pioneer of US ballet. He twice attempted to establish his own company, but these efforts were short-lived. Latterly he was best known for his teaching, with JUDY GARLAND and KATHARINE HEPBURN among his pupils.

More, Hannah 1745–1833
English playwright and religious writer
Born in Fishponds, near Bristol, she was educated at the boarding school in Bristol run by her elder sisters. She was engaged in 1767 to a Mr Turner, who eventually settled £200 a year on her and left her. In 1773 she published *The Search after Happiness*, a pastoral drama for schools. The following year she went to London, where she joined the 'Blue Stocking' coterie of ELIZABETH MONTAGU and her friends, and wrote two tragedies for DAVID GARRICK, *Percy* (1777) and *The Fatal Secret* (1779). Led by her religious views to withdraw from society, she retired to Cowslip Green near Bristol, where she did much to help the poor. She published *Sacred Dramas* (1782) and *Estimate on the Religion of the Fashionable World* (1790), and her moral tracts for the poor, such as *Village Politics by Will Chip* (1793), led to the founding of the Religious Tracts Society. She also wrote a didactic novel, *Coelebs in Search of a Wife* (1809). 🕮 M G Jones, *The Life of Hannah More* (1952)

More, Henry 1614–87
English philosopher and theologian
Born in Grantham, Lincolnshire, he was educated at Eton and Christ's College, Cambridge, where he remained all his life, becoming a leading figure in the circle of Cambridge Platonists which included BENJAMIN WHICHCOTE and RALPH CUDWORTH. He devoted himself entirely to study, despite the turbulent political times in which he lived, and developed a particular affinity for PLATO, PLOTINUS and DESCARTES, with the last of whom he corresponded enthusiastically at first, though his admiration for him later lessened as his interest in occultism and mysticism grew. His philosophy aimed to demonstrate the compatibility of reason and faith. He wrote in both prose and verse, and his best-known works were *Philosophical Poems* (1647), *An Antidote against Atheism* (1653), *The Immortality of the Soul* (1659), *Enchiridion Ethicum* (1666) and *Divine Dialogues* (1668). 🕮 Richard Ward, *The Life of the Learned and Pious Dr Henry More* (1710)

More, Kenneth Gilbert 1914–82
English actor
Born in Gerrards Cross, Buckinghamshire, he turned to performing after working as a stage hand at the Windmill Theatre, London. A naval lieutenant during World War II, he appeared in the West End in *Power Without Glory* (1947) and gained extensive television and film experience as a reliable supporting performer. After receiving acclaim for his stage performances in *The Way Things Go* (1950) and *The Deep Blue Sea* (1952), he had more cinema roles, becoming one of the most popular British film stars of the 1950s. His films include *Genevieve* (1953), *Doctor in the House* (1954) and *Reach for the Sky* (1956). His career suffered with the decline of the British film industry, but he performed on television in *The Forsyte Saga* (1967–68) and *Father Brown* (1974) and had success on stage with the likes of *The Secretary Bird* (1968) and *Getting On* (1971). His volumes of autobiography include *Happy Go Lucky* (1959) and *More or Less* (1978).

More, Sir Thomas, St 1478–1535
English politician and scholar
He was born in London, the son of a judge. Educated at Oxford under JOHN COLET and THOMAS LINACRE, he completed his legal studies at New Inn and Lincoln's Inn, was Reader for three years in Furnival's Inn, and spent the next four years in the Charterhouse in 'devotion and prayer'. During the last years of HENRY VII he became Under-Sheriff of London and a member of parliament. Introduced to HENRY VIII through THOMAS WOLSEY, he became Master of Requests (1514), Treasurer of the Exchequer (1521), and Chancellor of the Duchy of Lancaster (1525). He was Speaker of the House of Commons, and was sent on missions to the French courts of FRANCIS I and CHARLES V. On the fall of Wolsey in 1529, More, against his own strongest wish, was appointed Lord Chancellor. He executed his office with a primitive virtue and simplicity but displayed particular harshness in his sentences for religious opinions. He sympathized with John Colet and ERASMUS in their desire for a more rational theology and for radical reform in the manners of the clergy, but like them he felt no promptings to break with the historic Church. He saw with displeasure the successive steps which led Henry to the final schism from Rome. In 1532 he resigned the chancellorship. In 1534 Henry was declared head of the English Church and More's steadfast refusal to recognize any other head of the Church than the pope led to his sentence for high treason after a harsh imprisonment of over a year. Still refusing to recant, he was beheaded. By his Latin *Utopia* (1516, Eng trans 1556), More takes his place with the most eminent humanists of the Renaissance. His *History of King Richard III* (1513) 'begins modern English historical writing of distinction', although it is actually a second-hand account taken from Richard's enemy, Archbishop JOHN MORTON. From Erasmus we realize the virtues and attractions of a winning rather than an imposing figure. He was canonized in 1935. His feast day is 9 July. 🕮 R W Chambers, *Thomas More* (1935)

Moréas, Jean, *originally* **Yannis Papadiamantopoulos** 1856–1910
French poet
Born in Athens, he wrote first in Greek, then settled in Paris (1879) and became a leader of the Symbolist school, to which he gave its name in 1886. He gradually grew interested in a return to classical and traditional forms, however, and by 1891 had formed a new grouping under the name École Romane, dedicated to antiquity. His works include *Les Syrtes* (1884), *Cantilènes* (1886, 'Ballads'), *Le Pèlerin passioné* (1891, 'The Passionate Pilgrim') and *Les Stances* (1905, 'Stanzas'), the masterpiece of his classical period. 🕮 R Niklaus, *Jean Moréas, poète lyrique* (1936)

Moreau, Gustave 1826–98
French painter and teacher
Born in Paris, he studied at the École des Beaux-Arts, Paris. An eccentric Symbolist, he painted colourful but usually rather sinister scenes from ancient mythology and the Bible (eg *Salome*, 1876, which inspired JORIS HUYSMANS to write an enthusiastic description). In 1892 he was appointed professor of painting at the École des Beaux-Arts; his pupils included GEORGES ROUAULT and HENRI MATISSE.

Moreau, Jean Victor 1761–1813
French general
Born in Morlaix, he studied law, but at the Revolution in 1789 commanded the volunteers from Rennes, served under CHARLES DUMOURIEZ in 1793, and in 1794 was made a general of division. He took part, under Charles Pichegru, in reducing Belgium and the Netherlands. He drove the Austrians back to the Danube, but was forced to retreat and later deprived of his command (1797). In 1798 he took command in Italy and skilfully conducted the defeated troops to France. The party of the Abbé SIEYÈS, which overthrew the Directory, offered him the dictatorship. He declined it, but lent his assistance to NAPOLEON I in the coup d'état of 18th Brumaire. Commanding the army of the Rhine, he repeatedly defeated the Austrians in 1800, drove them back behind the Inn, and at last won the decisive Battle of Hohenlinden. Napoleon, grown jealous of Moreau, accused him of sharing in the plot of GEORGES CADOUDAL and sentenced him to two years' imprisonment (1804). The sentence was commuted to banishment, and Moreau settled in New Jersey. In 1813 he joined the Russian service and accompanied the Russian attack on Dresden, where he was fatally wounded by a French cannonball.

Moreau, Jeanne 1928–
French actress and director
Born in Paris, she studied at the Conservatoire National D'Art Dramatique. She made her Parisian stage debut with the

Comédie-Française in *A Month in the Country* (1948) and was an acclaimed theatre actress before her film debut in *Dernier Amour* (1948, 'Last Love'). An association with the directors of the French Nouvelle Vague (New Wave) brought her recognition as an intense, hypnotic film actress, capable of immersing her own personality in a succession of generally world-weary, sensual characterizations. Her most famous films include *Les Amants* (1958, *The Lovers*), *La Notte* (1961), *Jules et Jim* (1961, 'Jules and Jim'), *Le Journal d'une Femme de Chambre* (1964, *Diary of a Chambermaid*) and *Viva Maria* (1965). Occasional English-language ventures met with little acclaim but she proved herself a formidable director with *Lumière* (1976) and *L'Adolescente* (1978, 'The Adolescent'). The grande dame of French cinema, she was awarded a BAFTA Fellowship in 1996 and an Honorary Palme d'Or at the Cannes Film Festival in 2003. 🕮 Marianne Gray, *La Moreau* (1996)

Morecambe and Wise, *properly* **Eric Morecambe**, *originally* **John Eric Bartholomew** 1926–84 and **Ernie Wise**, *originally* **Ernest Wiseman** 1925–99
English comedians
Eric was born in Morecambe and, having appeared in working men's clubs since the age of eleven, teamed up in 1941 with fellow-entertainer Ernie in the touring stage 'discovery' show *Youth Takes a Bow*. They made their West End debut in the revue *Strike a New Note* in 1943. In 1947 they teamed up again and, as Morecambe and Wise, worked in music hall, summer shows, pantomimes, radio, films and television. They were the most successful double act in the history of British television, known primarily for *The Morecambe and Wise Show* (1961–83), and hugely popular Christmas specials. Their films, *The Intelligence Men* (1965), *That Riviera Touch* (1966) and *The Magnificent Two* (1967), were not successful. The pair's autobiography, *Eric and Ernie*, was published in 1973. Despite Eric's death in 1984, Ernie acted in the West End stage shows *The Mystery of Edwin Drood* and *Run for Your Wife*, and the US television comedy series *Too Close for Comfort*. His own autobiography, *Still on My Way to Hollywood*, was published in 1990.

Morel *See* DESCHAMPS, EUSTACHE

Morelli, Giovanni 1816–91
Italian art critic
He was born in Verona. After studying natural philosophy and medicine at Munich University, he returned to Italy in 1846 and became active in the Italian liberation movement against Austrian rule. In 1861 he became a deputy for Bergamo in the first free Italian Parliament and later, in 1873, a senator. From that year he began writing art criticism and, in 1880, published *Die Werke Italienischer Meister in den Galerien von München, Dresden und Berlin* (Eng trans *Italian Masters in German Galleries*, 1883). This was followed, from 1890 to 1893, by *Kunstkritische Studien über Italienische Maler* (Eng trans *Critical Studies of Italian Painters*). His criticism concentrated on attribution, which he claimed to have reduced to scientific principles by close analysis of the artist's depiction of details such as eyes, hands and ears – the so-called 'Morellian method'. He also promoted an Act, named after him, which gave state protection to important works of art.

Morelos (y Pavón), José María 1765–1815
Mexican revolutionary
Born in Michoacán, New Spain, he was a mestizo and spent his early life as a muleteer before entering the priesthood. He then joined MIGUEL HIDALGO in the struggle for Mexican independence, becoming the leader in the south and reorganizing the insurgents (1810–13). A brilliant guerrilla leader, he regrouped opposition to Spanish rule in 1811 under a supreme junta. In opposition to the Spanish Constitution of Cadiz, he convened a 'sovereign congress' at Chilpancingo which declared independence at Apatzingán (October 1814). This first Mexican constitution was republican, and abolished the fuero and slavery. Isolated and trapped by royalist forces under Viceroy Felix Calleja, he was captured and executed in Mexico City. He was one of the founders of the radical liberal tradition of Mexican politics.

Moresby, John 1830–1922
English naval commander and explorer
He was born in Allerton, Somerset. He conducted exploration and survey work in New Guinea, where he discovered the natural harbour now fronted by Port Moresby, which was named after him.

Moretto da Brescia, *properly* **Alessandro Bonvicino** 1498–1554
Italian painter
Born in Brescia, he painted for several churches there, and also became a fine portrait painter.

Morey, Samuel 1762–1843
US inventor
Born in Hebron, Connecticut, he built up a successful business in timber and sawmills, and acted as local consulting engineer for the construction of locks on the Bellows Falls Canal. After 1790 he and his older brother became interested in steam navigation and built a series of paddle-wheel steamboats, but in spite of financial support from Robert R LIVINGSTON none of them was commercially successful. Samuel took out more than 20 patents in all, some of them many years ahead of their time, such as his American Water Burner (1817–18) which was ridiculed when it appeared but was a precursor of the water-gas process widely used half a century later. His triple-pipe steam boiler of 1818 and a gasoline-powered internal combustion engine patented in 1826 likewise pointed to future technological developments.

Morgagni, Giovanni Battista 1682–1771
Italian physician
Born in Forli, he graduated in Bologna, and taught anatomy there and later in Padua. His great work *De Sedibus et Causis Morborum per Anatomen Indagatis* (1761, 'The Seats and Causes of Diseases Investigated by Anatomy') was not published until he was 80. It was based on over 600 post mortems, and written in the form of 70 letters to an anonymous medical colleague. Case by case, Morgagni described the clinical aspects of illness during the patient's life then detailed the post-mortem findings, aiming to relate the course of the illness to the findings of the autopsy. The book may be seen as a crucial stimulus to the rise of morbid anatomy. Furthermore, Morgagni was the first to delineate syphilitic tumours of the brain and tuberculosis of the kidney. He grasped that where only one side of the body is stricken with paralysis, the lesion lies on the opposite side of the brain. His explorations of the female genitals, of the glands of the trachea, and of the male urethra also broke new ground.

Morgan, Augustus De *See* DE MORGAN, AUGUSTUS

Morgan, Barbara Brooks, *née* **Johnson** 1900–92
US photographer and writer
Born in Buffalo, Kansas, she studied art at the University of California, Los Angeles (UCLA). She then painted and taught art in San Fernando (1923–24) and at UCLA (1925–30). In 1930 she moved to New York City with her photographer husband Willard D Morgan. From 1935 she worked mainly in photography, setting up a studio in Scarsdale, New York, in 1941. She was co-owner of the publishing company Morgan and Morgan. She is best known for vibrant black-and-white photographs of dancers, especially MARTHA GRAHAM and MERCE CUNNINGHAM (1935–40), for experimental photomontages and light abstractions, and for portraits and photographs of children. Her publications include *Martha Graham: Sixteen Dances in Photographs* (1941) and *Barbara Morgan: Photomontage* (1980).

Morgan, Charles Langbridge 1894–1958
English writer
Born in Kent, the son of a civil engineer, he served in Atlantic and China waters as a midshipman (1911–13), but finding it uncongenial, resigned. He rejoined the navy in 1914 and was later interned in the Netherlands until 1917. On repatriation he went to Oxford University, where he published *The Gunroom* (1919) on his early experiences, and became a well-known personality. In 1921, he joined the editorial staff of *The Times*, and he was their principal drama critic from 1926 to 1939. Under the pen name of 'Menander' he also wrote for the *Times Literary Supplement* critical essays called *Reflections in a Mirror*, which were later (1944–45) collected in two series. His novels and plays show high professional competence, but lack vividness and urgency. *Portrait in a Mirror* (1929), which won the Femina Vie Heureuse prize in 1930, is his most satisfying novel. Later works seem unduly solemn, pompous and vaguely sentimental. Nonetheless, *The Fountain* (1932) won the Hawthornden prize and *The Voyage* (1940) won the James Tait Black Memorial Prize. His plays are *The Flashing Stream* (1938), *The River Line* (1952) and *The Burning Glass* (1953). 🕮 H C Duffin, *The Novels and Plays of Charles Morgan* (1959)

Morgan, Edwin George 1920–
Scottish poet and critic
Born in Glasgow, he was educated at Glasgow University and served in the Royal Army Medical Corps during World War II, an option he chose as a conscientious objector. He became assistant lecturer in English at Glasgow University (1947), rising to titular professor of English (1975–80), now emeritus. He published his first volume of poems, *The Vision of Cathkin Braes*, and a translation of *Beowulf*, in 1952. His verse from the 1950s is introspective and rather gloomy, but his later work contains optimism, and by the time of *A Second Life* (1968), he had embraced his homosexuality. An incomplete *Collected Poems* was published in 1990, followed by a collection of his influential essays and critical writings, *Crossing The Border* (1990). A skilled translator, he collected his translations of various writers, such as BORIS PASTERNAK, ALEXANDER PUSHKIN and FEDERICO GARCÍA LORCA, in *Rites of Passage* (1976). His adaptation of EDMOND ROSTAND's *Cyrano de Bergerac* into demotic Glaswegian in 1992 was highly acclaimed, as was his translation of RACINE's *Phèdre* into Scots as *Phaedra* in 2000. He was Glasgow's first Poet Laureate (1999–2005) and was appointed National Poet for Scotland in 2004. He was awarded an OBE in 1992 and the Queen's Medal for Poetry in 2000.

Morgan, Sir Henry c.1635–88
Welsh buccaneer
Born in Llanrhymney, Glamorgan, he was kidnapped as a child and shipped to Barbados, where he joined the buccaneers. His many raids against the Spanish and Dutch in the West Indies and Central America included the famous capture of Porto Bello and Panama (1671). Transported to London under arrest to placate the Spanish (1672), he was subsequently knighted (1674) on the renewal of hostilities, and died a wealthy planter and deputy governor of Jamaica.

Morgan, John Hunt 1825–64
US Civil War general
Born in Huntsville, Alabama, he grew up in Kentucky, fought in the Mexican War, and joined the Confederate army in 1861. He became famous for his daring cavalry raids behind Union lines in Tennessee and Kentucky, during which he avoided direct combat and focused on destroying telegraph and railroad lines, burning supplies, and taking prisoners. In 1862 he was promoted to brigadier-general and in 1863 he carried raids as far north as Ohio, where he was captured and briefly imprisoned before escaping from the Ohio State Penitentiary. He was killed by Union troops in Tennessee while attempting a final raid in 1864.

Morgan, J(ohn) Pierpont 1837–1913
US banker, financier and art collector
He was born in Hartford, Connecticut, the son of the financier John Spencer Morgan (1813–90), and built his father's firm into the most powerful private banking house in the USA. His house financed the Federal Reserve system in the depression of 1895, and he acquired a controlling interest in many of the country's principal railroads. In 1901 he bought out ANDREW CARNEGIE and formed the US Steel Corporation, the world's largest corporation, and in the public mind he came to represent the manipulative forces of the 'money trust'. He compiled one of the greatest private art collections of his day, which he bequeathed to the Metropolitan Museum of Art in New York. He was also noted for his extensive philanthropic benefactions. His son, John Pierpont Morgan, Jnr (1867–1943), inherited his father's firm and fortune, raised loans for Great Britain during World War I and endowed the Pierpont Morgan Library in New York. 🕮 Frederick Lewis Allen, *The Great Pierpont Morgan* (1949)

Morgan, Julia 1872–1957
US architect
She was born in San Francisco and trained in engineering at the University of California before becoming, at the age of 30, the first woman to graduate in architecture from the École des Beaux-Arts in Paris. Registered in 1904 as the first woman architect in California, she opened an office in 1906. Although a very reclusive architect, it is believed that in her career she completed 800 buildings. Her most famous works include the residences at San Simeon for WILLIAM RANDOLPH HEARST, the media magnate. A commission lasting from 1919 to 1937, it is a vast exotic complex, showing Morgan's mastery of light, space and scale. She also completed a large number of works for women's organizations, including the Berkeley Women's City Club (1930), which is still in use today.

Morgan, Lewis Henry 1818–81
US ethnologist
Born in Aurora, New York, he became a lawyer in Rochester, and served in the state assembly (1861) and senate (1868). He undertook extensive investigations of the cultures of Native Americans, publishing *The League of the Iroquois* (1851), and *Houses and House-Life of the American Aboriginees* (1881). His *Systems of Consanguinity and Affinity* (1869) laid the foundations for the modern social anthropological study of kinship, but his best-known work is *Ancient Society* (1877). A treatise on the origins and evolution of the institutions of government and property, it was hailed by MARX and ENGELS as furnishing independent confirmation for their materialist theory of history. Morgan is also remembered as the author of an authoritative study on *The American Beaver and his Works* (1868), in which he argued that animals as well as humans possess powers of rational thought.

Morgan, Piers (Stefan Pughe-) 1965–
English journalist
Born in Newick, East Sussex, he studied at Harlow Journalism College. He began his career at Surrey and South London Newspapers (1987–89), then spent five years as show-business editor of *The Sun* before becoming editor of the *News of the World* in 1994. In 1995 he was appointed editor of the *Daily Mirror*, which under his editorship was frequently criticized for intrusive reporting, particularly in coverage of the Royal Family. He was sacked in 2004 after publishing fraudulent pictures allegedly showing British troops mistreating Iraqi prisoners. In 2006, he launched *First News*, a newspaper geared to nine-to-twelve-year-old readers. His publications include *The Insider* (2005) and *Don't You Know Who I Am?* (2007).

Morgan, (Hywel) Rhodri 1939–
Welsh Labour politician
He was born in Cardiff and educated at St John's College, Oxford, and Harvard University. He became Labour MP for Cardiff West (1987–2001) and was a candidate for the post of First Minister of the Welsh Assembly following devolution of power in Wales in 1999. A disagreement arose with the Labour leadership in Westminster, whose favoured candidate was Alun Michael, but Michael was forced out in a vote of no confidence and Morgan took over the post in 2000. 🕮 Kevin Morgan and Geoff Mungham, *Redesigning Democracy: The Making of the Welsh Assembly* (2000)

Morgan, Lady Sydney, *née* **Owenson** 1783–1859
Irish novelist
She was born in Dublin. Her father, a theatrical manager, got into financial problems and she supported the family, first as a governess, then as a writer of sentimental poems and novels. In 1812 she married a surgeon, Thomas Charles Morgan (1783–1843), who was later knighted. Her works – lively novels, verse and travels – were bestsellers of their day, and include *The Wild Irish Girl* (1806), *Florence Macarthy* (1816), *The O'Briens and the O'Flahertys* (1827) and *Memoirs* (1862).

Morgan, Thomas Hunt 1866–1945
US geneticist, biologist and Nobel Prize winner
Born in Lexington, Kentucky, he graduated in zoology from Kentucky State College in 1886, and received his PhD from Johns Hopkins University in 1890. He became professor of experimental zoology at Columbia University (1904–28) and then at the California Institute of Technology (Caltech, 1928–45). In work on *Drosophila*, the fruit fly, he found that certain traits are linked, but that the traits are not always inherited together. This suggested that certain traits are carried on the X chromosome, that traits can cross over to other chromosomes, and that the rate of crossing-over could be used as a measure of distance along the chromosome. With C B Bridges he wrote *The Mechanism of Mendelian Heredity* (1915), which established the chromosome theory of inheritance in confirmation of MENDEL's work. Morgan was awarded the 1933 Nobel Prize in physiology or medicine. His many other books include *Evolution and Adaptation* (1911), *The Theory of the Gene* (1926) and *Embryology and Genetics* (1933). 🕮 Ian Shine and Sylvia Wrobel, *Thomas Hunt Morgan: Pioneer of Genetics* (1976)

Morganwg, Iolo *See* WILLIAMS, EDWARD

Mori Arinori 1847–89
Japanese politician
From a Satsuma samurai family, he studied in Great Britain and the USA and on his return in 1868 became a vigorous proponent of Westernization, advocating the abolition of traditional customs and even the replacement of the Japanese language by English. He was Japan's first envoy to the USA (1871–73) and

Vice-Foreign Minister (1878–79) before heading the newly established Education Ministry in 1885. He created a centralized and secular education system with emphasis on practical instruction and service to the state. A series of higher schools, culminating in the prestigious Tokyo Imperial University, were also founded to train a governing élite. He was assassinated by a religious fanatic on the same day the Meiji Constitution was promulgated (11 February 1889).

Mori, Yoshiro 1937–
Japanese politician
Born in Neagari, Ishikawa Prefecture, he was educated at Waseda University and worked on a national newspaper before entering politics. He was elected to the House of Representatives in 1969 and subsequently joined the Liberal Democratic Party. He was appointed Minister of Education in 1983 and also served as Minister of International Trade and Industry and as Minister of Construction. In 2000 he became prime minister, heading a three-party coalition and promising economic recovery and reform in social security and education, but resigned in 2001 with little sign of economic progress.

Moricz, Zsigmond 1879–1942
Hungarian novelist and dramatist
He was born of peasant stock. Influenced by the poetry of ENDRE ADY and by the novels of ÉMILE ZOLA, he was the first prose-writer to challenge the sentimentality of the peasant–landlord relationship, which it had suited more conservative novelists to idealize. He saw his peasants with a clear eye, and thus anticipated such writers as ROGER MARTIN DU GARD, who were also to present country people as they really are. His most powerful novel is *Legy jó mindhalálig* (1920, Eng trans *Be Faithful unto Death*, 1962), about a child who struggles against the evil adult world. *A fáklya* (1917, Eng trans *The Torch*, 1931) is about an idealistic priest whose life is shattered by his parishioners. 🕮 *American Slavic Review*, 4 (1945)

Mörike, Eduard Friedrich 1804–75
German poet and novelist
Born in Ludwigsburg, he entered the theological seminary at Tübingen in 1822 and became vicar of Kleversulzbach in 1834, retiring in 1843. He produced a minor masterpiece in *Mozart auf der Reise nach Prag* (1856, 'Mozart on the Journey to Prague') and many poems of delicacy and beauty with something of the deceptive simplicity of HEINRICH HEINE. These were published collectively in 1838. 🕮 M More, *Mörike: The Man and the Poet* (1957)

Mori Ogai (Rintaro) 1862–1922
Japanese writer, aristocrat, soldier, doctor and bureaucrat
Born into a samurai family in Shimane, Mori (whose given name was Rintaro) studied medicine, rising to become director of the Army Medical Corps and being influential in the introduction of western medicine. He started writing by translating European literature (one of the first to do so), then produced his own historical fiction in a style strongly influenced by the directness and accessibility of the Europeans (again, one of the first to do so). His style was to supplant traditional literary forms. The best example of his fiction available in English translation is *Incident at Sakai and Other Stories*. 🕮 R J Bowring, *Mori Ogai and the Modernisation of Japanese Culture* (1979)

Morihiro Hosokawa *See* HOSOKAWA MORIHIRO

Morison, Robert 1620–83
Scottish botanist
Born in Aberdeen, he graduated from the university there in 1638. A Royalist during the reign of CHARLES I, he escaped to France and studied medicine at Angers University (1648). He managed the gardens of the Duc d'Orléans, travelled throughout France collecting plants, and returned to England with CHARLES II, who appointed him senior physician, king's botanist and superintendent of the royal gardens. In 1669 he became professor of botany at Oxford, shortly after publication of his *Praeludia Botanica* which contained the basis of his classification system. In 1672 he published the pioneering *Plantarum Umbelliferarum Distributio Nova*. The rest of Morison's life was spent compiling his great *Plantarum Historiae Universalis Oxoniensis* (1680–99).

Morison, Samuel Eliot 1887–1976
US historian
Born in Boston, he studied at Harvard from 1904 and received a PhD in 1913. His *History of US Naval Operations in World War II* (15 vols, 1947–62) was commissioned by President FRANKLIN D ROOSEVELT and was based largely on first-hand observation in the Pacific theatre. His other works include *Admiral of Ocean Sea* (1942, Pulitzer Prize) and *John Paul Jones* (1959, Pulitzer Prize). He taught at Harvard for more than 35 years and wrote the university's official history (1929–36).

Morison, Stanley 1889–1967
English typographer
Born in Wanstead, Essex, he worked as a clerk in the London City Mission (1905–12), then gained typographical experience working on the periodical *The Imprint* (1912–13). He was typographical adviser to Cambridge University Press (1923–44, 1947–59) and to the Monotype Corporation from 1923. On the staff of the London *Times* from 1929, he designed the Times New Roman type, introduced in 1932. He edited *The Times Literary Supplement* (1945–47) and was the author of many works on typography and calligraphy. He also edited the history of *The Times* (1935–52). In 1961 he was appointed to the editorial board of the *Encyclopaedia Britannica*. 🕮 Nicholas Barker, *Stanley Morison* (1972)

Morisot, Berthe Marie Pauline 1841–95
French painter
The granddaughter of JEAN FRAGONARD, she painted mainly women and children, and was the leading female exponent of Impressionism. Her early work shows the influence of CAMILLE COROT, who was her friend and mentor, but her later style owes more to RENOIR. She herself exercised an influence on ÉDOUARD MANET, whose brother she married.

Morita, Akio 1921–99
Japanese businessman
Born in Nagoya, he was educated at Osaka Imperial University. After World War II he founded, with Masaru Ibuka (1908–97), the electronics firm which since 1958 has been known as Sony. He became chairman of the board in 1976 and was awarded many international honours. Like many Japanese companies, Sony has been at the forefront of technological developments and has had a strong design policy. Among its most important products have been early tape recorders for the domestic market (c.1950), advanced television equipment and (one of the best examples of miniaturization) the 'Walkman' range of radios and cassette players, first produced in 1980. His autobiography was published in 1987 entitled *Made in Japan* and he became an honorary KBE in 1992.

Moritz, Karl Philipp 1756–93
German writer
He was born in Hameln, and was a hat-maker's apprentice, an actor, then teacher and professor. Self-educated, he travelled in England and Italy and wrote *Reisen eines Deutschen in England* (1783, 'Travels of a German in England'), and *Reisen eines Deutschen in Italien* (1792–93, 'Travels of a German in Italy'). His autobiographical novel, *Anton Reiser* (1785–90), influenced GOETHE. He was a precursor of the German Romantic movement, and wrote *Versuch einer deutschen Prosodie* (1786, 'Essay on German Prosody'), which he dedicated to FREDERICK II, THE GREAT. 🕮 W Rose, *From Goethe to Byron* (1924)

Morland, George 1763–1804
English painter
Born in London, he was the eldest son and pupil of the painter Henry Morland (1712–97), who brought him up with extreme rigour. He exhibited sketches at the Royal Academy when only ten years old, but his adult life was a downward course of drunkenness and debt. In the last eight years of his life he turned out nearly 900 paintings and over 1,000 drawings, many of them inferior in quality and hastily completed to bring in money. His strength lay in country subjects, such as pigs, gypsies, and stable interiors, and his best known work is *The Interior of a Stable* (1791).

Morley, Christopher Darlington 1890–1957
US novelist and essayist
He was born in Haverford, Pennsylvania, and was a Rhodes scholar at Oxford. He joined the editorial staff of Doubleday's from 1913 to 1917 and later contributed to numerous periodicals such as *Ladies' Home Journal*, the New York *Evening Post* and the *Saturday Review of Literature*. His chief works, whimsical and urbane, include *Parnassus on Wheels* (1917) and its sequel *The Haunted Bookshop* (1919), *Thunder on the Left* (1925), *Swiss Family Manhattan* (1932), *Kitty Foyle* (1939), *The Ironing Board* (1949) and a book of poems, *The Middle Kingdom* (1944). 🕮 *John Mistletoe* (1931)

Morley, Edward Williams 1838–1923
US chemist and physicist
Born in Newark, New Jersey, he was educated at Williams College in Williamstown, Massachusetts, and from 1860 to 1864

at Andover Theological Seminary. He also continued scientific studies and when he became pastor of the Congregational Church at Twinsburg, Ohio (1868), he was invited to teach at the nearby Western Reserve College in Hudson. In 1882 this college transferred to Cleveland and became Adalbert College of Western Reserve University. He became professor of chemistry and natural history, an appointment he held until his retirement in 1906. He was awarded the Davy Medal of the Royal Society in 1907. Morley had a passionate concern for precise measurement. In Hudson he analysed the oxygen content of the atmosphere with a precision of 0.0025 per cent, and endeavoured to correlate the results for samples taken at different times and places with meteorological records. In Cleveland, he measured the atomic weight of oxygen relative to hydrogen as 15.879, with an uncertainty of only one part in 10,000. His later research interests involved collaborative studies with physicists, notably with ALBERT ABRAHAM MICHELSON on the velocity of light and the 'ether drift' problem.

Morley, Henry 1822–94
English writer and editor
Born in London, he studied medicine at King's College London, but after practising for a while he turned to journalism, and eventually became a lecturer (1857–65) and professor of English (1865–89) at London University. He was assistant editor for DICKENS's *Household Words* and *All the Year Round* (1850–65), and edited *The Examiner* (1859–65). A champion of adult education, he wrote biographical and critical works, and edited 'Morley's Universal Library' of English classics (63 vols, 1883–88), *Cassell's Library of English literature* (1875–81) and *Cassell's National Library* (214 vols, 1886–90). He also wrote the first eleven volumes of an ambitious history of English literature, *English Writers* (1864–95).

Morley, John Morley, 1st Viscount 1838–1923
English journalist, biographer, philosophical critic and statesman
Born in Blackburn, Lancashire, the son of a doctor, and educated at Cheltenham and Lincoln colleges, Oxford, he was called to the Bar, but chose literature as a profession. From 1867–82 he edited the *Fortnightly Review* and he was editor of the 'English Men of Letters' series, writing the volume on EDMUND BURKE, while for the 'English Statesmen' series he wrote *Walpole* (1889). From 1880–83 he edited the *Pall Mall Gazette*. His articles and speeches in favour of Home Rule made him GLADSTONE's most conspicuous supporter. In 1886 he was a successful Irish Secretary, and again from 1892 to 1895. He was MP for Newcastle (1883–95), and for Montrose Burghs from 1896 until his elevation to the peerage in 1908. He was Secretary for India (1905–10), repressing sedition and making the government more representative, and Lord President of the Council from 1910 until the outbreak of World War I. His other writings include a life of Gladstone (4 vols, 1903), and *Recollections* (1917).

Morley, Malcolm, *formerly* **Malcolm Evans** 1931–
English painter
Born in Highgate, London, he worked at sea and spent four years in borstal and prison, where he took a correspondence course in art. He trained at Camberwell and the Royal College of Art before emigrating to the USA in 1958, inspired by an exhibition of US art at the Tate Gallery. Working as a waiter, he met BARNET NEWMAN, and began painting in horizontal bands, using a pastry gun. In the mid-1960s he painted in a super-realist style, later incorporating 'accidents', as in *Los Angeles Yellow Pages* (1971), where the image is ripped through. By the 1980s he was painting landscapes, animals and mythological motifs, for example *Arizonac* (1981, Saatchi Collection, London) and *Macaws, Bengals, with Mullet* (1982, Saatchi). He was the first winner of the Turner Prize in 1984. Since then he has returned to his early subject matter of planes and ships, creating large-scale installations as well as semi-abstract paintings.

Morley, Robert 1908–92
English actor
Born in Semley, Wiltshire, he studied at RADA, then made his stage debut at Margate in *Dr Syn* (1928). He toured throughout Great Britain, establishing his own summer theatre in Cornwall, before a succession of London stage successes in *Oscar Wilde* (1936), *The Great Romancer* (1937) and *Pygmalion* (1937). His first film was the lavish Hollywood drama *Marie Antoinette* (1938) for which he received a Best Supporting Actor Academy Award nomination. He remained committed to the theatre, appearing in *The Man Who Came To Dinner* (1941), *Edward, My Son* (1947), which he co-wrote, and *The Little Hut* (1950). His films include *The African Queen* (1951), *Beau Brummell* (1954), *Oscar Wilde* (1960) and *Someone is Killing the Great Chefs of Europe* (1978). An entertaining wit and raconteur, he published numerous collections of droll observations including *A Musing Morley* (1974), *Robert Morley's Book of Bricks* (1978) and *The Pleasures of Ages* (1988).

Morley, Sylvanus Griswold 1883–1948
US archaeologist
Born in Baldwinville, Massachusetts, he studied civil engineering at Pennsylvania Military Academy whilst reading archaeology at Harvard. Devoting his career to the study of Maya archaeology in Central America, he became a leading figure in Mayan scholarship. Although most of his conclusions have been superseded by later work, his studies of the Mayan calendar are still cited. He directed the Carnegie Institute of Washington's vast Mayan excavation at Chichen Itza, 1924–40.

Morley, Thomas 1557–1603
English composer and organist
Born in Norwich, Norfolk, he was a pupil of WILLIAM BYRD. He became organist at St Paul's Cathedral, and from 1592 was a Gentleman of the Chapel Royal. Best known for his *A Plaine and Easie Introduction to Practicall Musicke* (1597), written in entertaining dialogue with the purpose of encouraging part-singing for pleasure, he also wrote madrigals and canzonets, which include such popular pieces as 'Now is the month of maying', 'My bonny lass she smileth' and 'It was a lover and his lass'. He was compiler of the collection, in honour of Queen ELIZABETH I, called *The Triumphes of Oriana* (1603).

Mornay, Philippe de, Seigneur du Plessis-Marly, *also called* **Philippe Duplessis-Mornay** 1549–1623
French statesman and polemicist
He was born in Buhy. Converted to Protestantism in 1560, he was nicknamed the 'Pope of the Huguenots' for his role in the Wars of Religion (1562–98). A trusted counsellor of Henry of Navarre (HENRY IV), he undertook many embassies for the Protestant cause. However, he lost the king's favour after Henry's conversion to Catholicism (1593) and played no further part in national affairs. His treatise on Christianity was translated into English in 1589 as had been requested by his dead friend, Sir PHILIP SIDNEY. 🕮 David de Liques, *Histoire de la vie de messire Philippes de Mornay, seigneur du Plessis Marly* (1647)

Morny, Charles Auguste Louis Joseph, Duc de 1811–65
French nobleman
Born in Paris, he was believed to be the son of Hortense de BEAUHARNAIS and the Comte de FLAHAUT, and so half-brother of NAPOLEON III. He was adopted by the Comte de Morny, and served in Algeria, but soon left the army, and in 1838 became a manufacturer of beet sugar. From that time he was mixed up in a variety of speculations. Chosen a deputy (1842), he quickly became prominent in financial questions. After 1848 he supported Napoleon, took a leading part in the coup d'état, and became Minister of the Interior. He was president of the *corps législatif* from 1854 to 1865, was ambassador to Russia (1856–57), and was created a duke (1862). He is the 'Duc de Mora' in LÉON DAUDET's *Nabab*.

Moro, Aldo 1916–78
Italian politician
A leading figure in the Christian Democrats (DC), he served twice as prime minister (1963–68, 1974–76) and was Foreign Minister (1970–72). During the 1970s he was one of the DC moderates who sought to co-operate with ENRICO BERLINGUER. He was one of several important figures to die at the hands of the Red Brigades.

Moro, Antonis *See* MOR, ANTHONIS

Moroni, Giovanni Battista 1525–78
Italian portrait and religious painter
Born in Bondo, near Albino, he painted altarpieces, but is best known for his portraits, especially *The Tailor* in the National Gallery, London.

Morphy, Paul Charles 1837–84
US chess player
Born in New Orleans, he had a meteoric chess career from 1857 to 1859, partly because he graduated early in law and could not practise before reaching the age of 21. During this time he won the US championship and beat the strongest masters in Europe, which established him as unofficial world champion (the championship was not instituted until 1886). Foreshadowing the career of fellow US chess genius BOBBY FISCHER, he retired from competitive chess and returned to his native New Orleans to make abortive attempts to commence his legal career. His

brilliantly conducted games, particularly his approach to attack, continued to exert a strong influence upon generations of chess players long after his death.

Morpurgo, Michael Andrew Bridge 1943–
English author
Born in St Albans, Hertfordshire, he studied at King's College, London. He began work as a primary school teacher (1967–75) and in 1976 founded Farms for City Children with his wife Clare. His many books for children include *Friend or Foe* (1978), the popular *Why the Whales Came* (1985, filmed as *When the Whales Came*, 1989), *The Wreck of the Zanzibar* (1995, Whitbread Children's Book Award), *The Butterfly Lion* (1996, Smarties Prize), *Out of the Ashes* (2001), about the foot-and-mouth outbreak, and *Private Peaceful* (2003), set during World War I. He was awarded an MBE in 1999 and an OBE in 2006. In 2003 he became the third Children's Laureate.

Morricone, Ennio 1928–
Italian composer of film music
Born in Rome, he studied at the Academy of Santa Cecilia, Rome, and established his reputation with haunting scores for more than 400 films and television programmes. He achieved international recognition with the vibrant score for SERGIO LEONE's 'spaghetti western' *A Fistful of Dollars* (1964), which was followed by a further six collaborations with Leone, including *The Good, the Bad, and the Ugly* (1966). Among his most memorable scores since then have been those for Roland Joffe's *The Mission* (1986), for Brian De Palma's *The Untouchables* (1987) and for Barry Levinson's *Bugsy* (1991) and *Disclosure* (1994).

Morris, Chris(topher) 1962–
English satirist
He was born in Bristol and read zoology at Bristol University. After a stint at Greater London Radio, he collaborated with ARMANDO IANNUCCI, STEVE COOGAN and others on the BBC's spoof current affairs shows *On the Hour* (1991–92) and *The Day Today* (1994). He also collaborated with PETER COOK on *Why Bother?* (1994). His Channel 4 series *Brass Eye* (1997 and 2001), which convinced unwitting public figures to comment on fictitious news stories, brought him some notoriety; he subsequently wrote and produced *Blue Jam* (1997–99) for Radio 1 (reinvented as *Jam* on Channel 4 the following year) and contributed a spoof column to *The Observer* (1999). He won a Bafta award for his short film *My Wrongs 8245–8249 & 117* (2003), and co-wrote the Channel 4 satire *Nathan Barley* in 2005.

Morris, Desmond John 1928–
English ethologist and writer
Born in Wiltshire, he was educated at Birmingham University and at Oxford, where he held a research post from 1954 to 1956. He was head of Granada TV and the film unit at the Zoological Society of London (1956–59), and subsequently curator of mammals at the Zoological Society (1959–67). He then became the director of the Institute of Contemporary Arts, London (1967–68), and later a Research Fellow at Wolfson College, Oxford (1973–81). He carried out important research on the ethology of several animals, but it was his interest in primate behaviour which led to his best-known work, the popular *The Naked Ape* (1967). In this he described the behaviour of humans using the approach and techniques of ethology. He used the same formula in several books such as *Manwatching: A Field Guide to Human Behaviour* (1977), which dealt with non-verbal signals, and *The Soccer Tribe* (1981), a study of crowd behaviour. Later works include *The Human Animal* (1994), which was made into a television series, and *The Nature of Happiness* (2004). His books and films have popularized sociology and zoology. He published the autobiographical *Animal Days* in 1979.

Morris (of Yardley), Estelle Morris, Baroness 1952–
English Labour politician
Born into a political family from Manchester, she worked as a teacher (1974–92) before being elected MP for Birmingham Yardley in 1992. Sharing a similar political outlook to that of Labour leader TONY BLAIR, she was appointed opposition spokesperson on education in 1995, and after the landslide Labour victory became Schools Minister (1997), Schools Standards Minister (1998) and Secretary of State for Education (2001) in succession to DAVID BLUNKETT. She resigned from the latter position in 2002; in 2003 she was made Minister for the Arts. She retired from Parliament in 2005. That year, she was created a life peer and became president of the National Children's Bureau.

Morris, George Pope 1802–64
US journalist and poet
Born in Philadelphia, he founded the *New York Mirror* in 1823 (editor 1824–42), and later edited the *Evening Mirror* and the *Home Journal* (1846–64), publishing EDGAR ALLAN POE's 'The Raven' in the former. He published many poems, including the celebrated 'Woodman, Spare that Tree!', which appeared in *The Deserted Bride* (1838).

Morris, Gouverneur 1752–1816
US politician
Born on the family estate in Morrisania, New York, he graduated from King's College (now Columbia) in 1768, and was admitted to the Bar in 1771. He lost a leg in an accident in 1780. A political moderate, he served in the Continental Congress (1777–79) and later was assistant in the finance department (1781–85) of the new government, proposing the system of decimal coinage for the national currency. As a delegate to the Constitutional Convention (1787), he advocated a strong central government and opposed slavery. He sailed for Europe in 1789 and witnessed the French Revolution in Paris, recording its progress in his diary. After spending the greater part of 1791 in England as GEORGE WASHINGTON's agent, he served as US Minister to France (1792–94). Returning to the USA in 1798, he sat in the Senate as a Federalist from 1800 to 1803.

Morris, Jan, *formerly* **James Humphrey Morris** 1926–
Welsh journalist, historian, essayist and travel writer
Born in Somerset, and educated at Lancing College and Oxford, he began his career as a young journalist on the editorial staff of *The Times* (1951–56). In 1953 he was assigned to cover the expedition to climb Mount Everest, and reported the successful ascent on the day of Queen ELIZABETH II's Coronation. He underwent a gender change in 1972 and published under the name of Jan Morris from 1973. As a freelance travel writer, she has visited almost every major city in the world and produced a prolific number of books. Among her best-known books are *Venice* (1960), *The Oxford Book of Oxford* (1978), the *Pax Britannica* trilogy, and her autobiography *Conundrum* (1974). She was made a CBE in 1999. 🕮 Paul Clements (ed), *Jan Morris: Around the World in Eighty Years – A Tribute* (2006)

Morris, Sir Lewis 1833–1907
Welsh poet and barrister
Born in Carmarthen, he was educated at the town's Queen Elizabeth Grammar School, Sherborne, and Jesus College, Oxford. His main literary works were *Songs of Two Worlds* (3 vols, 1872–75), followed in 1876 by *The Epic of Hades* and more verse and drama, largely drawing on incidents in Welsh history and mythology. In the later stages of his career he campaigned for the fostering of higher education in Wales and the establishment of a National University. In 1895 he was made knight bachelor, and thereafter had fruitless hopes of becoming Poet Laureate. 🕮 D Phillips, *Sir Lewis Morris* (1981)

Morris, Mark William 1956–
US dancer and choreographer
Born in Seattle, Washington, he trained in genres as various as ballet, flamenco and Balkan folk dance. He danced for several important modern choreographers (ELIOT FELD, LAURA DEAN, and TWYLA THARP) before making an informal New York debut with his own company, The Mark Morris Dance Company, in 1981. Within a few years he had established an impressive reputation as an innovative and skilled choreographer. He has devised many dances for his own and other companies, and for opera. From 1988 to 1991 he was director of dance for the Théâtre de la Monnaie in Brussels, and in 1990 he founded the White Oak Dance Project with MIKHAIL BARYSHNIKOV. Utterly original and profoundly unconventional, his works include *L'Allegro, Il Penseroso ed il Moderato* (1988, to HANDEL's music), *Dido and Aeneas* (1989), and an irreverent version of *The Nutcracker* entitled *The Hard Nut* (1991). In 2000 he directed and choreographed *Four Saints in Three Acts* for English National Opera; more recent new works have included *The Garden* (2001), *V* (2002), *All Fours* (2004) and *Italian Concerto* (2007).

Morris, Robert, *known as* **the financier of the American Revolution** 1734–1806
US financier and government official
Born in Liverpool, England, he emigrated from Lancashire to Philadelphia in 1747 and began working in the shipping business. A member of the Continental Congress (1775–78), he was a signatory of the Declaration of Independence. He organized the finances for GEORGE WASHINGTON's military supplies, used his personal credit to keep the Revolution afloat, and in 1782

Morris, William 1834–96
English craftsman, poet and socialist

William Morris was born in Walthamstow, near London, into a middle-class family. He was educated at Marlborough School and Exeter College, Oxford. He studied for holy orders, but renounced the Church and studied architecture, with his friends and fellow members of the Pre-Raphaelite Brotherhood, particularly the painter EDWARD BURNE-JONES. He studied architecture under GEORGE EDMUND STREET, but on the advice of DANTE GABRIEL ROSSETTI became a professional painter (1857–62).

In 1859 he married a model, Jane Burden, and moved into the Red House at Bexley Heath, which he designed and furnished with the architect PHILIP WEBB. From the ideas expressed there, and with the help of his pre-Raphaelite associates, in 1861 he founded the firm of Morris, Marshall, Faulkner and Company, which soon revolutionized the art of house decoration and furniture in England.

His literary career began with a volume of poetry and longer narrative poems including *The Earthly Paradise* (1868–70), a collection of 24 classical and medieval tales in a Chaucerian mould. He developed a passionate interest in the heroic literature of Iceland, and worked with EIRÍKUR MAGNÚSSON on a series of saga translations. He visited Iceland twice, in 1871 and 1873, and was inspired to write *Three Northern Love Songs* (1875) and a four-volume epic, *The Story of Sigurd the Volsung and the Fall of the Nibelungs* (1876), regarded as his greatest literary work.

He founded a Society for the Protection of Ancient Buildings in 1877. His experience as a master-craftsman, and his devotion to the Gothic, persuaded him that the excellence of medieval arts and crafts sprang from the joy of free craftsmen, which was destroyed by Victorian mass-production and capitalism. He joined the Social Democratic Federation in 1883; his Utopian ideals did much to develop the philosophy of socialism, and when the Social Democratic Federation suffered disruption in 1884 he formed a breakaway Socialist League.

In 1890, in a further rejection of Victorian values, he founded a publishing house, the Kelmscott Press at Hammersmith, for which he designed clear typefaces and wide ornamental borders; it produced a stream of his own works as well as reprints of English classics.

📖 Morris's other publications include a verse morality, *Love is Enough, or The Freeing of Pharamond* (1872), and translations of VIRGIL's *Aeneid* (1875) and HOMER's *Odyssey* (1887). His socialist zeal inspired two prose romances, *The Dream of John Ball* (1888) and *News from Nowhere* (1891). Further prose romances concentrated more on storytelling: *The House of the Wolfings* (1889), *The Roots of the Mountains* (1889) and *The Story of the Glittering Plain* (1891), all set in the far north. His last works were a book of verse (*Poems by the Way*, 1891), and further prose romances: *The Wood beyond the World* (1895), *The Well at the World's End* (1896), *The Water of the Wondrous Isles* and *The Story of the Sundering Flood* (published posthumously in 1897).

founded the Bank of North America. He later lost his money speculating in western lands, and he died bankrupt.

Morris, Talwin 1865–1911
English designer
Born in Winchester, Hampshire, he was educated at Lancing College and later became an architect's apprentice to his uncle, Joseph Morris of Reading. After a short spell as sub art editor for the journal *Black and White* (1891) he moved to Scotland with his wife to work as art director for the publishing firm Blackie and Sons. One of the best-known exponents of the Glasgow Style, he produced a wide range of designs in a variety of media, including bookbindings, furniture, stained glass, metalwork and jewellery, was a personal friend of Francis and Jessie Newbery of the Glasgow School of Art, and was closely associated with CHARLES RENNIE MACKINTOSH and his immediate circle. Morris's work earned regular comment in the artistic press, and the work he executed for his own home at Bowling was illustrated in *The Studio* (1897). His work was exhibited in Great Britain and abroad, and in 1902 his designs were shown at Budapest and Turin.

Morris, Thomas, *also called* **Old Tom** 1821–1908
Scottish golfer
Born in St Andrews, he served an apprenticeship as a golfball-maker there. He went to Prestwick as a greenkeeper in 1851, returning to St Andrews as a professional in 1861. He won the British championship belt four times, (1861, 1862, 1864, 1867). His son, THOMAS MORRIS ('Young Tom'), became champion after him.

Morris, Thomas, *also called* **Young Tom** 1851–75
Scottish golfer
Precociously brilliant, he won the British championship three times in succession (1868, 1869, 1870), thereby winning the championship belt outright; there was no contest in 1871, but he won it again in 1872. His early death was said to have been caused by grief at the loss of his young wife. He was the son of THOMAS MORRIS ('Old Tom').

Morris, William *See panel above*

Morrissey, *properly* **Stephen Patrick Morrissey** 1959–
Anglo-Irish pop singer and lyricist
He was born in Manchester, where in 1982 he formed The Smiths with guitarist Johnny Marr (1963–). Their distinctively witty, melodic and often melancholy songs provided an alternative to punk's extrovert, aggressive energy, and their output paved the way for the Britpop wave of increasingly thoughtful pop composition. Following the break-up of The Smiths in 1987, Morrissey struggled to find a writing partner to equal Marr, though he released a number of solo albums from 1988's *Viva Hate* onwards; 2004's *You Are the Quarry* marked a mature return to form. After living in Los Angeles for several years from the late 1990s, he moved to Rome in 2005. 📖 Mark Simpson, *Saint Morrissey* (2006)

Morrison, Arthur 1863–1945
English novelist
Born in Poplar, Kent, the son of an engine-fitter, he became clerk to the People's Palace in Mile End Road, then a journalist on the *National Observer*, for which he wrote a series of stories published as *Tales of Mean Streets* (1894). His reputation rests on his powerfully realistic novels of London life such as *A Child of the Jago* (1896) and *The Hole in the Wall* (1902). He also wrote detective stories featuring a private investigator, 'Martin Hewitt'. 📖 A Brome, *Four Realist Novelists* (1965)

Morrison (of Lambeth), Herbert Stanley Morrison, Baron 1888–1965
English politician
Born in Lambeth, London, he was educated at an elementary school and by intensive private reading. After being an errand-boy and a shop assistant, he helped to found the London Labour Party and became its secretary in 1915. Mayor of Hackney (1920–21), he entered the London County Council (1922), becoming its leader (1934). He grouped together London's passenger transport system, and much of the credit for the 'Green Belt' was due to him. He was MP for South Hackney three times between 1923 and 1945, when he was elected for East Lewisham. In CHURCHILL's War Cabinet he was Home Secretary and Minister of Home Security. He was a powerful figure in the post-war social revolution, uniting the positions of deputy prime minister, Lord President of the Council, and leader of a House of Commons which enacted the most formidable body of legislation ever entrusted to it. In 1955 he was defeated by HUGH GAITSKELL in the contest for the leadership of the Labour Party. His *Autobiography* was published in 1960.

Morrison, Jim (James Douglas), *nicknamed* **the Lizard King** 1943–71
US rock singer and poet
He was born in Melbourne, Florida. He was the lead singer of The Doors, an important Los Angeles-based rock band of the late-1960s which also included Ray Manzarek (1939–), Robbie Krieger (1946–), and John Densmore (1945–). He combined a poetic intensity with a rebellious non-conformism, but his attempts to push beyond conventional behaviour and

Morrison, Toni, *pen name of* **Chloe Anthony Morrison**, *née* **Wofford** 1931–
US novelist, winner of the Nobel Prize in literature

Toni Morrison was born in Lorain, Ohio, and educated at Howard and Cornell universities. She moved to New York in 1965 to work in publishing as a senior editor at Random House while becoming established as a fiction writer. Labelled as a black JAMES JOYCE or WILLIAM FAULKNER, she explores in rich vocabulary and cold-blooded detail the story of African-Americans in a white-dominated culture. *The Bluest Eye* (1970) focuses on an eleven-year-old black girl who feels a sense of inferiority at not having blue eyes, and suffers an incestuous rape; *Sula* (1974) again confronts a generation gap, but between a grandmother and the eponymous scapegoat; and *Song of Solomon* (1977) is a merciless study of genteel blacks. Further novels have included *Tar Baby* (1981), a story of race conflict on a Caribbean island; *Beloved* (1987), a Pulitzer Prize-winning account of a runaway slave woman who kills her baby daughter to prevent her becoming a slave; *Jazz* (1992), set in 1920s Harlem; *Paradise* (1998), an account of a black utopian experiment; and *Love* (2003), about a hotel owner and the women in his life. *Playing in the Dark: Whiteness and the Literary Imagination*, a study of African-Americans in literature, was published in 1992. Morrison taught writing at the State University of New York at Albany from 1984, and moved to Princeton University in 1989. She was awarded the Nobel Prize in literature in 1993.

📖 Linden Peach, *Toni Morrison* (2000).

> 'Oppressive language does more than represent violence, it is violence; does more than represent the limits of knowledge, it limits knowledge. Whether it is obscuring state language or the faux-language of mindless media; whether it is the proud but calcified language of the academy or the commodity-driven language of science; whether it is the malign language of law-without-ethics, or language designed for the estrangement of minorities, hiding its racist plunder in its literary cheek – it must be rejected, altered and exposed.'
>
> – From her Nobel lecture (1993).

states of consciousness brought him into conflict with the authorities, mainly over drugs, but also for outspoken political songs like 'When the Music's Over' or 'Five to One'. The band's output was uneven, but immensely powerful at its best. He died in Paris in slightly mysterious circumstances, adding fuel to a familiar rock legend, and his grave there became a shrine for fans. 📖 J Hopkins, *The Lizard King* (1993)

Morrison, Robert 1782–1834
Scottish scholar and missionary
He was born in Buller's Green, Morpeth, Northumberland, and after studying theology in his spare time was sent in 1807 to Canton by the London Missionary Society as the first Protestant missionary to China. From 1809 to 1814 he translated and printed the New Testament (1819) and, with some help, the Old Testament into Chinese. In 1823 he completed his great *Chinese Dictionary*. In 1818 he established an Anglo-Chinese College at Malacca.

Morrison, Toni *See panel above*

Morrison, Van (George Ivan) 1945–
Northern Irish rock singer and songwriter
Born in Belfast, he first came to attention as the lead singer with the Irish band Them, remembered for their epic pop hit 'Gloria' (1967). Following his first solo hit, 'Brown Eyed Girl' in 1967, he moved onto a different plane of achievement with the haunting *Astral Weeks* (1968), the prelude to a classic period of his work in the early 1970s, which includes *Moondance* (1970), *Saint Dominic's Preview* (1972), and the electrifying live recording *It's Too Late To Stop Now* (1974). His highly original fusion of soul, rhythm and blues, jazz and folk influences has resulted in peaks and troughs in his output across the ensuing decades, both in the studio and on stage, but he has continued to confound conventional expectations. He moves easily between high-energy rock and Celtic mysticism, and remains one of the most original and powerful performers and writers in rock music. He was awarded the OBE in 1996. 📖 Johnny Rogan, *Van Morrison: No Surrender* (2006)

Morse, Samuel Finley Breese 1791–1872
US artist and inventor
Born in Charlestown, Massachusetts, he graduated at Yale in 1810, and went to England to study painting. On his return he was a founder and first president of the National Academy of Design in New York (1826) and became a professor at New York University (1832). He studied chemistry and electricity, and in 1832 conceived the idea of a magnetic telegraph, which he exhibited to Congress in 1837, and attempted in vain to patent in Europe. He struggled on with little financial backing until 1843, when Congress granted him $30,000 for an experimental telegraph line between Washington and Baltimore, built by EZRA CORNELL, over which he sent the historic message, 'What hath God wrought?' on 24 May 1844. His system, widely adopted, at last brought him honours and rewards. The 'Morse code' (originally called the 'Morse alphabet') was evolved by him for use with his telegraph.

Morshead, Sir Leslie James 1889–1959
Australian soldier
He was born in Ballarat, Victoria. He commanded a company at Gallipoli, and later a batallion on the Western Front, where he won the Distinguished Service Order and the French Legion of Honour. In World War II he commanded the 18th Brigade in the Middle East and led the 9th Division at Tobruk during the siege of 1941 and at the battles of El Alamein. He returned to Australia to lead the New Guinea Force and to become general officer commanding of the First Australian Corps, ending the war in 1945 as commander of the Australian and US Task Force in Borneo.

Mort, Thomas Sutcliffe 1816–78
Australian businessman and pioneer of refrigeration
Born in Bolton, Lancashire, England, he went to Sydney in 1838 as agent for an English firm and later established his own woolbroking business, for some years the largest in Australia. In 1854 he constructed a dry dock at Balmain, Sydney, a venture in which half of the company shares were held by his employees. Shipbuilding began there in 1855 and the first Australian railway locomotive was built there in 1870. He established a scientific farm at Bodalla on the south coast of New South Wales, building a model community for his workers. His experience there in the wastage of perishable foods led to an interest in refrigeration and to a large freezing plant being built at Darling Harbour, Sydney, in 1875.

Mortara, Edgar 1852–1940
Italian monk
Born into a Jewish family, he became the unwitting principal in the celebrated 'Mortara' case. In 1858 he was carried off from his parents by the Archbishop of Bologna, on the grounds that he had been secretly baptized by a Catholic maid servant when he was a gravely ill infant. The refusal of the authorities to give him up to his parents excited much indignation in Great Britain. Eventually he was discovered in Rome in 1870, but he chose to retain his Christian faith, and became an Augustinian monk.

Mortensen, Erik 1926–98
Danish fashion designer
From 1948 he was attached to the Balmain fashion house in Paris, becoming the artistic director in 1960. He took over the management of the house after the death of PIERRE BALMAIN in 1982. He was awarded the Golden Thimble of the French Haute Couture in 1983 and 1987.

Mortimer, Sir John Clifford 1923–
English dramatist, novelist and barrister
Born in London, he was called to the Bar in 1948, participated in several celebrated civil cases, and was a constant defender of liberal values. His series of novels featuring Horace Rumpole, an amiable, late-middle-aged defence barrister and frequenter of Pomeroy's bar, has been adapted for television as *Rumpole of the Bailey*. He continues to produce Rumpole books at irregular intervals. His other novels, including *Paradise Postponed* (1985) and *Summer's Lease* (1988), are highly popular, evoking, often savagely, what Mortimer perceives as the moral decline of the English middle class. His many plays and adaptations for the stage include *The Dock Brief* (1958), *The Wrong Side of the Park* (1960), *Two Stars for Comfort* (1962) and an autobiographical play, *A Voyage round My Father* (broadcast 1963, staged 1970), which was filmed for television in 1982 with LAURENCE OLIVIER as the father. He has published three autobiographical volumes, entitled *Clinging to the Wreckage* (1982), *Murderers*

and Other Friends (1994) and *The Summer of the Dormouse* (2000). He has made notable translations, especially of GEORGES FEYDEAU, and several TV screenplays including *Brideshead Revisited* (1981), from the novel by EVELYN WAUGH, *The Ebony Tower* (1984) from the story by JOHN FOWLES, and his own *Paradise Postponed* (1986). He also wrote the screenplay for the film *Tea with Mussolini* (1999). His first wife was the novelist Penelope Mortimer (1918–99). He was made a CBE in 1986 and knighted in 1998.

Morton, H(enry) V(ollam) 1892–1979
English travel writer and journalist
He was born in Ashton-under-Lyne and educated in Birmingham, and began his career on the staff of the *Birmingham Gazette* in 1910 and became assistant editor in 1912. He was the author of many informative and informal travel books, including *The Heart of London* (1925), *In Search of Scotland* (1929), *In the Steps of the Master* (1934), *Middle East* (1941), *In Search of London* (1951) and *A Wanderer in Rome* (1957).

Morton, James Douglas, 4th Earl of c.1516–1581
Regent of Scotland
The younger son of Sir George Douglas of Pittendreich, near Edinburgh, he became Earl of Morton (1553), and although a Protestant, was made Chancellor by MARY, QUEEN OF SCOTS (1563). Involved in the murders of both DAVID RIZZIO (1566) and Lord DARNLEY (1567), he joined the Protestant nobles who defeated the Earl of BOTHWELL and Mary, Queen of Scots, at Carberry Hill (1567), 'discovered' the 'Casket Letters', led the forces at Langside (1568) and, after the brief regencies of MORAY, Lennox and Mar, took over himself as regent for JAMES VI (1572). After the end of the civil war in Scotland (1573), he increased links with England, but his high-handed attempts to control ecclesiastical appointments and to bring the Church into conformity with England brought him into sharp conflict with the radical ministers, led by ANDREW MELVILLE. His regency brought a welcome restoration of law and order, especially to the Borders, but it was achieved at the cost of a monopoly of many offices by the DOUGLAS family, which caused intense resentment. He fell briefly from power in 1578, but the arrival of the young king's cousin, Esmé Stuart, Earl of Lennox (1579) recast political expectations. His fall was engineered by Captain James Stewart, nominally for his part in Darnley's murder, and he was beheaded by the 'Maiden', a device he had himself introduced to Scotland, in Edinburgh's Grassmarket. His regency, though brief, was in many respects a turning point, not least in the beginning of the restoration of royal power which was to be continued in James VI's personal reign. 🕮 George R Hewitt, *Scotland Under Morton 1572–80* (1982)

Morton, Jelly Roll, *originally* **Ferdinand Joseph La Menthe** or **Lamothe** 1890–1941
US jazz pianist, composer and bandleader
Born into a Creole family in New Orleans, he worked as a gambler and pimp as well as a piano entertainer in 'sporting houses'. His status as a jazz pioneer comes from his recordings (1923–27) while living in Chicago, and his unaccompanied piano solos made bestsellers of such tunes as 'King Porter Stomp', 'Wolverine Blues' and 'Jelly Roll Blues'. In 1926 he formed the recording band the 'Red Hot Peppers', a collection of some of the finest New Orleans sidemen of the day, and probably the first in jazz to combine arranged ensemble passages with collective improvisation and improvised solos. In 1938 Morton made a series of recordings, including spoken recollections on his early years, for the American Library of Congress.

Morton, John c.1420–1500
English prelate and statesman
Born probably in Milborne St Andrew, Dorset, he trained as a lawyer. Faithful to HENRY VI until after the Lancastrian defeat at the Battle of Tewkesbury (1471), he made his peace with EDWARD IV, and became Master of the Rolls (1473) and Bishop of Ely (1479). RICHARD III imprisoned him (1483), but he escaped, and after the accession of HENRY VII was made Archbishop of Canterbury (1486), Chancellor (1487) and a cardinal (1493).

Morton, John Cameron Andrieu Bingham Michael 1893–1979
English author and journalist
After serving in World War I he took up writing and published many books of humour, fantasy and satire, as well as a number of historical works including several on the French Revolution. From 1924 to 1975 he wrote a regular humorous column, 'By the Way', under the name of 'Beachcomber', for the *Daily Express*.

Morton, John Maddison 1811–91
English dramatist
Born in Pangbourne, Berkshire, the son of THOMAS MORTON, he became a prolific writer of farces (mostly from French), but is best remembered as the author of *Cox and Box* (1847). The rise of burlesque was his ruin and he became a 'poor brother' of the Charterhouse. 🕮 F Wilson, *An Epistolary Remonstrance* (1887)

Morton, Lee *See* BOUCICAULT, DION(YSIUS LARDNER)

Morton, Levi Parsons 1824–1920
US banker and politician
Born in Shoreham, Vermont, he began as a country storekeeper's assistant, and in 1863 founded banking houses in New York and London. In 1878–80 he was returned to Congress as a Republican and in 1881–85 was minister to France. He was vice-president of the USA to President BENJAMIN HARRISON (1889–93), and governor of New York State (1895–97).

Morton, Thomas 1764–1838
English dramatist
He was born in Durham, and abandoned his law studies at Lincoln's Inn, London, to write plays. His works include *Speed the Plough* (1798, with its invisible 'Mrs Grundy'), *The Blind Girl* (1801), *Town and Country* (1807), *School for Grown Children* (1826), and other popular plays. He was the father of JOHN MADDISON MORTON.

Morton, William Thomas Green 1819–68
US dentist
Born in Charlton, Massachusetts, he practised in Boston from 1842. As a medical student at Harvard in 1846 he used sulphuric ether ('letheon') as an anaesthetic for the excision of a vascular malformation from a patient, and patented the process, which was hotly disputed by CRAWFORD LONG and other medical men.

Mosaddeq, Mohammad 1880–1967
Iranian statesman
Born in Teheran, he held office in Iran in the 1920s, and returned to politics in 1944. By his Oil Nationalization Act of 1951 (in which year he became prime minister), he claimed to have expropriated the Anglo-Iranian Oil Co. His government was overthrown by a royalist uprising in 1953, and he was imprisoned. He was released in 1956.

Mosby, John Singleton 1833–1916
US Confederate soldier
Born in Edgemont, Virginia, he fought at Bull Run in 1861 and served as a scout on General J E B STUART's staff during the Peninsular Campaign. From 1863 to 1865 he commanded an independent cavalry unit known as Mosby's Rangers, which attacked Union outposts in Virginia and cut communications and supply lines. Their most famous exploit was the capture of Ben E H Stoughton and his staff behind Union lines at Fairfax Court House (1863). They operated without drills or camps and with minimal discipline, and they were declared outlaws by the Union army because they often confiscated private property as well as army supplies. Initially consisting of only nine men, the Rangers had grown to eight companies at the time of Mosby's promotion to colonel in 1864. After the Civil War ended he entered politics as a Republican and was a loyal supporter of his wartime adversary, ULYSSES S GRANT.

Moscheles, Ignaz 1794–1870
Bohemian pianist and composer
Born in Prague of Jewish parents, he was by 1808 the favourite musician and music master of Vienna. From 1825 he taught in London, and from 1844 in Leipzig. He edited, in English, Anton Felix Schindler's *Life of Beethoven* (1841).

Moscíki, Igancy 1867–1946
Polish chemist and politician
Born in Mierzanów near Plock, he studied at the Polytechnical School in Riga, Latvia, and fled to Great Britain after being involved in an assassination attempt. In 1897 he was appointed professor of electrochemistry at Fribourg, Switzerland, and in 1912 became professor of electrochemistry at the Polytechnical School at Lvov, Poland. After the end of World War I he founded factories to manufacture fertilizers synthetically from nitric acid, derived from atmospheric nitrogen which had been fixed by electric arcs. In 1926, when the Polish national hero and former revolutionary JÓZEF PIŁSUDSKI overthrew the government, Moscíki supported the move and became president of the Republic, a post he retained until 1939 when he fled from the Nazis and the Russians to spend the rest of his life in Switzerland.

Moses, *Hebrew* **Môsheh** 15th–13th century BC
Old Testament Hebrew prophet and lawgiver

Moses is the principal figure dominating the Old Testament books from Exodus to Deuteronomy. The sequence begins with his birth and ends with his death, and describes him as the leader of the Israelites in their Exodus from captivity in Egypt and as receiver of the Divine Law. He was the younger son of a Levite couple, and was hidden in a basket to avoid death at the hands of the Egyptians. He was discovered by a daughter of Pharaoh and raised as her son.

After killing an Egyptian who was beating a Hebrew, Moses fled to Midian, and there married Zipporah, the daughter of a Midianite priest. According to the biblical account, God appeared to Moses in a burning bush, and ordered him to lead his people out of Egypt. He returned to Egypt with his brother AARON, and eventually persuaded Pharaoh to release the Hebrews by producing signs and visiting plagues on the country.

Moses led the Hebrews out of Egypt, pursued by Pharaoh's army, which was engulfed by the waters of the Red Sea after they had parted to allow the Hebrews through. After a long period in the wilderness, Moses took the people to Sinai, where he received the commandments from God in the mountain. On his return from the mountain, he interceded with God not to punish the Hebrews for adoring the golden calf. For 39 years Moses led his people in the wilderness, where they were fed with manna and quails. After failing to enter Canaan from the south, Moses settled the people in land north of Moab. After delivering a series of addresses, Moses died in the fortieth year after the Exodus, according to Deuteronomy (1.3).

In assessing the role of Moses in early biblical history, it should be noted that many of the stories told about him in the Pentateuch belong to a type that is also told elsewhere (for example, the threat to the child and its recovery). The pharaoh of the captivity is not named (he has commonly been identified with RAMESES II), and Moses is never mentioned in any contemporary non-biblical sources, Egyptian or otherwise. He represents the ideal leader and wise judge of his people, but it is difficult to separate legend from history in the biblical accounts that have come down to us.

📖 R de Vaux, *The Early History of Israel* (1978).

- Moses has been depicted in art with horns growing out of his head. This tradition arose from a misassociation of the Hebrew word *qaran* (usually translated 'to shine') with *qeren* meaning 'horn'. It occurs in *Exodus* (34.29): 'When he descended [from the mountain], he did not know that the skin of his face shone because he had been speaking with the Lord' (NEB).

Mosconi, Willie (William Joseph) 1913–93
US pool player
Born in Philadelphia, he took up pool as a child, and began competing seriously in 1931. He dominated the sport from the early 1940s to the mid-1950s, winning numerous world championships. A tireless promoter of the game, he was also technical adviser on the 1961 film *The Hustler*, which prompted renewed interest in the sport. The Mosconi Cup, an annual team pool event played between Europe and the USA, is named for him.

Moseley, Harry (Henry Gwyn Jeffreys) 1887–1915
English physicist
He was born in Weymouth, Dorset, and educated at Oxford, where he graduated in 1910. He then joined ERNEST RUTHERFORD in Manchester before returning to work at Oxford in 1913. He measured the X-ray spectra of over 30 different metals, and suggested that the regular variance from element to element was related to the nuclear charge, allowing the atomic numbers of elements to be calculated. Discontinuities in the spectral series made it clear that a number of elements were missing from the periodic table and allowed prediction of their properties; these elements were sought and soon discovered. Moseley's work was an important step in advancing knowledge of the nature of the atom, firmly establishing that the properties of the elements are determined by atomic number rather than atomic weight. He was killed in action at Gallipoli. 📖 J L Heilbron, *H G J Moseley: The Life and Letters of an English Physicist, 1887–1915* (1974)

Moser, George Michael 1704–83
Swiss gold chaser and enameller
Moving early to London, he became the head of his profession. A founder member of the Royal Academy, he was elected its first keeper.

Moser, Mary c.1744–1819
English flower painter
Daughter of GEORGE MICHAEL MOSER, she was one of the founder members of the Royal Academy, and an intimate friend of the royal family.

Moser-Pröll, Annemarie, *née* **Pröll** 1953–
Austrian alpine skier
Born in Kleinarl, she won a women's record 62 World Cup races (1970–79), and was overall champion (1979), downhill champion (1978, 1979), Olympic downhill champion (1980), world combined champion (1972, 1978), and world downhill champion (1974, 1978, 1980). She temporarily retired from 1975 to 1976, and finally retired after the 1980 Olympics.

Moses *See panel above*

Moses, Anna Mary, *known as* **Grandma Moses** 1860–1961
US primitive artist
Born in Washington County, New York, she was a farmer's wife in Staunton, Virginia, and in New York State, and did embroideries of country scenes. She began to paint at about the age of 75, mainly country scenes remembered from her childhood – 'old, timey things ... all from memory'. From her first show in New York in 1940, she had great popular success in the United States.

Moses, Sir Charles Joseph Alfred 1900–88
Australian broadcaster and administrator
Born in Little Hulton, Lancashire, England, he trained as a soldier at the Royal Military College, Sandhurst, then emigrated to Australia in 1922. After a number of ventures, he became an announcer with the then Australian Broadcasting Company in 1930. On the formation of the Australian Broadcasting Commission (1934), he was appointed controller of talks and school broadcasts, and in 1935 became general manager of the ABC, a position he held for the next 30 years. He pioneered broadcasting to schools and to rural areas, introduced the ABC's own independent news service and national television, and established ABC symphony orchestras in each state. He joined the Australian Imperial Forces in 1940, and escaped after the fall of Singapore in 1942 to serve in New Guinea.

Moses, Ed(win Corley) 1955–
US track athlete
He was born in Dayton, Ohio. The greatest 400-metre hurdler ever, he was unbeaten in any race in this event from August 1977 to June 1987, and as Olympic champion in 1976 and 1984 and four times world record holder, he dominated this discipline for over a decade. He would have been favourite for the gold medal in the 1980 Moscow Olympics as well, but missed them because of the US boycott. His third place in the 1988 Olympic final marked the end of a unique era but he made a comeback in 1991.

Moses, Grandma *See* MOSES, ANNA MARY

Moses, Robert 1888–1981
US public official
He was born in New Haven, Connecticut, the son of a department-store owner, and was educated at Yale, Oxford, and Columbia universities. In 1919 he became Chief of Staff of the New York state reconstruction committee, and in 1924 was appointed president of the New York state council of parks and chairman of Long Island state park commission, thus giving him almost total supervision of the state park system. In 1934 he was appointed commissioner of the city parks, and became an eminent and committed spokesman for parks and limited-access roads. Widely known for his part in the constitution of the Triborough Bridge (which gave New Yorkers access to parkland), he also has the Jones Beach development and many other projects, such as slum clearance and housing estates, to his credit. He is considered to be responsible for much of the modern appearance of New York City.

Môsheh *See* MOSES

Moshoeshoe I, *also called* **Mshweshwe** c.1786–1870
Sotho king
Born in present-day Lesotho, he succeeded his father as a chief of the Bamakoteli in 1820, and over the next 40 years united a disparate group of peoples into the Sotho. An astute military tactician, he fought off Zulu and Ndebele incursions and won his initial battles against European colonial armies. Following the establishment of the Orange Free State in 1854, he allied himself with the British after 1868 in order to safeguard his culture and keep most of his kingdom intact. The anniversary of his death is a national holiday in Lesotho.

Moshoeshoe II, Constantine Bereng Seeiso 1938–96
King of Lesotho
Educated at Oxford, England, he was installed as Paramount Chief of the Basotho people (1960) and proclaimed King of Lesotho when the country became independent (1966). His desire for political involvement led to his being twice placed under house arrest, and in 1970 an eight-month exile in Holland ended when he agreed to take no further part in the country's politics. After a military coup in 1990, he was deposed and sent into exile in Britain (1990–92) and his eldest son, Letsie III, was put on his throne. Regional leaders led by NELSON MANDELA later negotiated the restoration of constitutional rule and Moshoeshoe was returned to power in 1995. He died in a motor accident.

Mosimann, Anton 1947–
Swiss chef and restaurateur
Born in Solothurn, he studied at a private school in Switzerland and worked in hotels as an apprentice. He later became a cuisinier at a number of hotels and restaurants worldwide, becoming Maître Chef des Cuisines at the Dorchester Hotel, London (1976–88). Among his numerous television series are *Cooking with Mosimann* (1989) and *Anton Mosimann Naturally* (1991). He is the owner of Mosimann's, a private dining club, and principal of the Mosimann Academy, London (1996–). Other business interests include a party catering service and a retail range of gourmet foods.

Mosley, Diana, *née* **Mitford** 1910–2003
English socialite and fascist
Born in London, the third daughter of the second Baron Redesdale, she met her first husband Bryan Guinness (1905–92) as a debutante and married him in 1929. She left him three years later for OSWALD MOSLEY, whom she married in 1936 at the house of JOSEPH GOEBBELS, with HITLER as a guest. As fascists, the couple were imprisoned in Holloway and then kept under house arrest during World War II; Diana Mosley was described by MI5 as highly ambitious, cleverer and more dangerous than her husband. She subsequently moved to France, and remained a committed fascist throughout her life. 🕮 *A Life of Contrasts* (1977)

Mosley, Sir Oswald Ernald Mosley, 6th Baronet 1896–1980
English politician
Successively a Conservative, Independent and Labour MP, he was a member of the 1929 Labour government. He later resigned and became founder of the New Party (1931). After a visit to Italy he became founder and leader of the British Union of Fascists (1932) whose followers, the Blackshirts, provoked violent demonstrations by staging anti-Semitic marches through the traditionally Jewish east end of London. Detained under the Defence Regulations during World War II, he founded a new Union Movement in 1948. His vision of a politically and economically united Europe is embodied in his *Europe: Faith and Plan* (1958). He married Cynthia, second daughter of Earl CURZON of Kedleston, in 1920. His second wife, DIANA MOSLEY, whom he married in 1936, was the sister of JESSICA, NANCY and UNITY MITFORD.

Mosley, Walter 1952–
US novelist
Born in Los Angeles, he was educated at Johnson State College and City University, New York. He is best known for his character Easy (Ezekiel) Rawlins, who first appeared in *Devil in a Blue Dress* (1990), and later in such novels as *Black Betty* (1994), *Gone Fishin'* (1997) and *Cinnamon Kiss* (2005). His mystery novels subvert the form of the traditional white detective story by engaging with themes of race and racism, black history and culture and black urban life. Stylistically, his work attempts to incorporate oral storytelling skills learned from his father and relatives. Other series include the Fearless Jones mysteries and the Socrates Fortlow books; since 1996, he has explored other genres, including science fiction, a meditation on blues music (*RL's Dream*, 1996) and a young adult novel (*47*, 2005).

Mosquera, Tomás Cipriano de 1798–1878
Colombian politician
Born into a prominent colonial family, he served under SIMÓN BOLÍVAR as a boy and was a brigadier at the age of 30. Well-travelled and pragmatic, he was instrumental in repressing a revolt led by religious interests against constitutionalist measures (1839–42). By the time of his presidency of New Granada (1845–49), he had begun to move to the conservative camp, favouring centralist rule, supported by his brother, the Archbishop of Bogotá, and the army. Benefitting from increasing prosperity and international trade, he switched towards a conservative liberal view, becoming president of Colombia for a second time (July 1861). Architect of the anticlerical, liberal and ultra-federalist constitution of 1863, he manipulated a shifting alliance of Radicals, Liberals and Independents against the ever-present Conservatives. Elected to a further term in 1865, he assumed dictatorial powers, and was toppled and exiled in 1867.

Moss, Kate (Katherine) 1974–
English model
Born in Croydon, she began her modelling career as a teenager and soon became famous for her work on the catwalk and in high-profile advertising campaigns, notably for the Calvin Klein label. She was strongly associated with the controversial 'waif look' popularized by fashion designers in the early 1990s, and went on to front campaigns for such brands as Gucci, Chanel and Dior. Her iconic status also led to collaborations with artists including CHUCK CLOSE and LUCIEN FREUD. In 2005, tabloid allegations of cocaine use threatened her career, but a subsequent police investigation found no evidence against her. In 2006 she was named Model of the Year by the British Fashion Council.

Moss, Sir Stirling 1929–
English racing driver
Born in London, he won many major races in the 1950s, including the British Grand Prix (1955, 1957), the Mille Miglia, and the Targa Florio. Between 1951 and 1961, he won 16 races from 66 starts. He retired in 1962 after a crash at Goodwood. He then became a journalist and broadcaster, and returned to saloon car racing in 1980. His publications include *All But My Life* (1963) and *My Cars, My Career* (1987). He was knighted in 2000. 🕮 Robert Edwards, *Stirling Moss* (2001)

Mössbauer, Rudolf Ludwig 1929–
German physicist and Nobel Prize winner
Born in Munich, he was educated at the Technical University in Munich, and carried out postgraduate research at the Max Planck Institute for Medical Research in Heidelberg before receiving his PhD from the Technical University in 1958. Before completing his PhD, he observed what is known as the 'Mössbauer effect', the narrow resonance in the energy spectrum produced when the whole of the nuclear lattice, rather than just one nucleus, recoils from gamma radiation. The effect has been used to test ALBERT EINSTEIN's theory of general relativity, to study the properties of nuclei and as an analytical tool in chemistry and biology. Mössbauer shared the 1961 Nobel Prize in physics with ROBERT HOFSTADTER for research into atomic structure. He was professor of experimental physics at the Technical University from 1965 to 1971 and from 1977 to 1997 (now emeritus), and also held appointments at the Californian Institute of Technology (Caltech) from 1960 to 1964.

Mosse, Kate 1961–
English writer and broadcaster
Raised in Chichester and educated at New College, Oxford, she is the co-founder of the Orange Prize for Fiction and the Orange Award for New Writers. Her novels are *Eskimo Kissing* (1996), the thriller *Crucifix Lane* (1998) and the British Book Award winner *Labyrinth* (2005), a bestselling adventure novel which has been translated into some 37 languages. For BBC television, she presented the series *The Readers' and Writers' Roadshow* and is the book reviewer for *The Culture Show*. She is a Fellow of the Royal Society of the Arts, and won the 2000 European Woman of Achievement Award for her contribution to the arts.

Moszkowski, Moritz 1854–1925
Polish composer and pianist
Born in Breslau, Germany (now Wrocław, Poland), he taught at the Kullak Academy, Berlin, and later lived in Paris. A prolific composer for piano and orchestra, he is now remembered

almost solely for his lively *Spanish Dances* (1876, *Spanische Tänze*).

Mota, Rosa 1958–
Portuguese athlete
She was born in Foz do Douro, and competed in her first marathon in Athens in 1982, when she won the European title. She improved her time on the next seven occasions she competed. Impressive reserves of stamina helped her to win ten of her first 13 marathons. She had victories in Tokyo, Boston, Chicago, Rotterdam, London and Osaka, as well as a further two European titles, and the world championship title in 1987. In 1988, she won an Olympic gold medal, making her the first Portuguese woman to do so.

Mother Mary of the Cross *See* MCKILLOP, ST MARY HELEN

Motherwell, Robert Burns 1915–91
US painter and writer
Born in Aberdeen, Washington, he briefly attended the California School of Fine Arts in San Francisco and read philosophy at Stanford, Harvard, Grenoble and, later, Columbia. He wrote a good deal on the theory of modern art and helped found the Abstract Expressionist group in New York in the 1940s. His images often resemble semi-automatic doodles of a kind that the Surrealists had explored, but enlarged to fill huge canvases. He is best known for *Elegy to the Spanish Republic*, a series of more than a hundred paintings. He was married to the artist HELEN FRANKENTHALER from 1958 to 1971.

Motion, Andrew 1952–
English biographer and Poet Laureate
Born in London, he studied at University College, Oxford, and lectured in English at Hull University (1977–81). After working as an editor for *Poetry Review* (1981–83) and the publishers Chatto and Windus (1983–87) he became professor of creative writing at the University of East Anglia (1995–2003) and then at Royal Holloway, University of London (2003–). Among his collections of poetry are *The Pleasure Steamers* (1978), *Love in a Life* (1991) and *Salt Water* (1997). He was appointed Poet Laureate in 1999, and some Laureate poems are contained in the collection *Public Property* (2002). His highly regarded biographies include those of PHILIP LARKIN (1993, Whitbread Biography Award), JOHN KEATS (1997) and WAINEWRIGHT (*Wainewright the Poisoner*, 2000). He has published three novels, *The Pale Companion* (1989), *Famous for the Creatures* (1991) and *The Invention of Dr Cake* (2003). A memoir, *In the Blood*, appeared in 2006.

Motlana, Nthato 1925–
South African doctor and politician
Educated at Kilnerton High School and Fort Hare College where he came into contact with the ANC (African National Congress) Youth league, he qualified as a doctor at the University of the Witwatersrand. Involved in establishing a network of ANC branches on the Witwatersrand, he was banned in 1953 for five years. By the mid-1970s he had become a leading figure in Soweto and played a major role in the 1976 uprising, helping to establish the Soweto Committee of Ten, which developed into the Soweto Civil Association, of which he became chairman. One of the few figures to have lived in the townships and retained the respect of ordinary citizens, he became an articulate spokesman for black interests in the 1980s while the ANC was still banned. He sits on the board of trustees of the Nelson Mandela Foundation, and is the chairman emeritus of Medical Education for South African Blacks (MESAB–SA).

Motley, John Lothrop 1814–77
US historian and diplomat
Born in Dorchester, Massachusetts, he studied at Harvard and several German universities, and began a diplomatic career. He soon turned to literature, however, and ten years were spent on his *Rise of the Dutch Republic* (1856), which established his fame. This was enhanced by the *History of the United Netherlands* which appeared in 1860–69. He was Minister to Austria (1861–67), and to Great Britain (1869–70).

Motoda Eifu 1818–91
Japanese Confucian scholar
As tutor to the Meiji Emperor, he called for a return to traditional values during the 1880s and represented a conservative backlash against the westernizing trends of the 1870s. Appointed court adviser in 1886 and a member of the Privy Council in 1888, Motoda helped draft the Imperial Rescript on Education (1890), which emphasized the inculcation of patriotism and reverence for the emperor.

Motoori Norinaga 1730–1801
Japanese scholar
He championed the superiority of Japan's ancient culture and beliefs as a reaction against the influence of rational Chinese thought. Condemning Japan's deference to Chinese civilization, Motoori reaffirmed Shintō myths portraying Japan as the 'Land of the Gods' and highlighted the uniqueness of Japan's sacred imperial institution (an unbroken line of emperors descended from the gods) in contrast to the succession of dynasties that prevailed in China. Known as *Kokugaku* (National Learning), Motoori's ideas were to influence the imperial loyalist movement of the 19th century that overthrew the TOKUGAWA Shogunate and to provide the basis of ultra-nationalist ideology in the 1930s.

Mott, John Raleigh 1865–1955
US religious leader, social worker and Nobel Prize winner
He was born in Livingston Manor, New York. A Methodist layman, he became known the world over by his work for the Student Volunteer Movement (1888–1920), the Young Men's Christian Association (1915–31) and the World Missionary Council (1941–42). He shared the 1946 Nobel Peace Prize with EMILY BALCH.

Mott, Lucretia, *née* **Coffin** 1793–1880
US abolitionist and feminist
Born in Nantucket, Massachusetts, she was educated near Poughkeepsie, New York, where she later became a teacher. She first rose to prominence in 1817, as a speaker at Quaker meetings, and became an active campaigner for temperance, peace, women's rights and the abolition of slavery. She helped to organize the American Anti-Slavery Society (1833) and was president of the Philadelphia women's branch but was denied membership in the World Anti-Slavery Convention in London, for which DANIEL O'CONNELL denounced it. She also took an active part in the Anti-Slavery Convention of American Women (1837). She was strongly supported by her husband James Mott, and under her influence he left his commission business because of its connection with slave-produced cotton, in which he had dealt throughout the 1820s. She and ELIZABETH CADY STANTON organized the first Woman's Rights Convention in 1848. 🕮 Otelia Cromwell, *Lucretia Mott* (1958)

Mott, Sir Nevill Francis 1905–96
English physicist and Nobel Prize winner
Born in Leeds, he studied mathematics at Cambridge, where he became a lecturer and Fellow, working with ERNEST RUTHERFORD. He later became professor of theoretical physics at Bristol University, where he studied the electronic behaviour of 'Mott transitions' between metals and insulators, and in 1954 was appointed Cavendish Professor of Physics at Cambridge, decisively shaping the Cavendish Laboratory's research activities. In 1965 he retired and returned to full-time research to work on the new area of noncrystalline semiconductors. He shared the 1977 Nobel Prize in physics (with PHILIP ANDERSON and JOHN VAN VLECK) for his work on the electronic properties of disordered materials. Mott has been one of the major theoretical physicists of the 20th century, opening new and difficult areas of solid-state physics and materials science. He was knighted in 1962 and his book *Can Scientists Believe?* was published in 1991. 🕮 *A Life in Science* (1986)

Motte, Antoine Houdar de La *See* LA MOTTE, ANTOINE HOUDAR DE

Motte, Friedrich Heinrich Karl de la *See* FOUQUÉ, FRIEDRICH HEINRICH KARL DE LA MOTTE, BARON

Mottelson, Ben(jamin) Roy 1926–
Danish physicist and Nobel Prize winner
Born in Chicago, USA, he was educated at Purdue University and Harvard. From Harvard he moved to the Institute of Theoretical Physics in Copenhagen (now the Niels Bohr Institute), where he worked with AAGE BOHR on the problem of combining the two models of the atomic nuclei. They secured experimental evidence in support of JAMES RAINWATER's collective model of the atomic nuclei and Bohr, Mottelson and Rainwater shared the 1975 Nobel Prize in physics. From 1953 to 1957 Mottelson held a research position in CERN (Conseil Européen pour la Recherche Nucléaire) before returning to Copenhagen where he became professor at Nordita (Nordic Institute for Theoretical Atomic Physics). Subsequent research explored the comparable behaviours of atomic nuclei and metallic atom clusters. He took Danish nationality in 1971.

Motteux, Peter Anthony 1660–1718
British writer
Born in Rouen, France, he went to London after the revocation of the Edict of Nantes (1685) and after a time took up journalism. He edited the *Gentleman's Journal* (1691–94), but is best known for his translations of RABELAIS (1693–1708) and *Don Quixote* (1703).

Moule, Charles Francis Digby 1908–
English biblical scholar
Born in Hanchow, China, he graduated at Cambridge and was ordained into the Anglican church in 1933. After several curacies and theological appointments he returned to Cambridge as lecturer before becoming professor of divinity (1951–76). One of the most versatile scholars of his time, he has made substantial contributions to the *Encyclopaedia Britannica* and has written many books including *An Idiom Book of New Testament Greek* (1953), *The Origin of Christology* (1977), *The Holy Spirit* (1978), *The Birth of the New Testament* (1981), and *Essays in New Testament Interpretation* (1982).

Moulins, Master of c.1460–c.1529
French artist
He is so called from his principal work, the triptych in Moulins Cathedral of the *Virgin and Child*. He is regarded as the most accomplished French artist of the time. The influence of HUGO VAN DER GOES can be seen in his vividly coloured and realistic paintings, and some authorities identify him with Jean Perreal or Jean de Paris, court painter to CHARLES VIII.

Mountbatten, Edwina Cynthia Annette, *née* **Ashley, Countess** 1901–60
English philanthropist
The wife of LOUIS, EARL MOUNTBATTEN OF BURMA, whom she married in 1922, she rendered distinguished service during the London Blitz (1940–42) to the Red Cross and St John Ambulance Brigade, of which she became superintendent-in-chief in 1942. As Vicereine of India (1947), her work in social welfare brought her the friendship of MAHATMA GANDHI and JAWAHARLAL NEHRU. She died suddenly on an official tour of Borneo for the St John Ambulance Brigade.

Mountbatten, *originally* **Battenberg, Prince Louis Alexander, 1st Marquess of Milford Haven** 1854–1921
British naval commander
Born in Austria, the son of Prince Alexander of Hesse, he became a naturalized British subject and joined the Royal Navy in 1868. He served with distinction as a commodore in the Mediterranean fleet, as director of naval intelligence and senior sea commands. He was First Sea Lord at the outbreak of World War I, but was forced to resign because of anti-German prejudice. By royal command he gave up his German titles in 1917 and changed the family name from Battenberg to Mountbatten, and was created Marquess of Milford Haven. He was promoted admiral in 1919.

Mountbatten (of Burma), Louis Francis Albert Victor Nicholas Mounbatten, 1st Earl 1900–79
English naval commander and statesman
Born near Windsor, Berkshire, the younger son of Prince LOUIS MOUNTBATTEN and great-grandson of Queen VICTORIA, he was known as Prince Louis Francis of Battenberg until 1917. Educated at Osborne and Dartmouth Royal Naval Colleges (1913–16), he served at sea in World War I in HMS *Lion* and HMS *Elizabeth*. In World War II he commanded the 5th destroyer flotilla (1939–41), and became chief of Combined Operations Command (1941–43). He was Supreme Allied Commander South-East Asia from 1943 to 1945, and was then appointed the last Viceroy of India (1947) to oversee the rapid transfer of power. He returned to service at sea as Fourth Sea Lord and commander of the Mediterranean fleet (1952–55), and was appointed First Sea Lord (1955–59) and Chief of Defence Staff (1959–65). His close friends included the Duke of Windsor (formerly EDWARD VIII) and NOËL COWARD, and he was a valued confidant to Prince CHARLES. He was murdered by an IRA bomb while sailing near his holiday home in County Sligo, Ireland.

Mountcastle, Vernon Benjamin 1918–
US neurophysiologist
Born in Shelbyville, Kentucky, he received his medical training at the Johns Hopkins University School of Medicine, where he later joined the faculty (research fellow in physiology, 1946–49; assistant professor, 1949–59; professor of physiology, 1959–80). He has been University Professor of Neuroscience there since 1980 (now emeritus). His research has been concerned with central nervous mechanisms in sensation and perception, and his demonstration that cells in the cerebral cortex respond specifically to particular types of skin stimulation proved to be a major stimulus to later work on the visual system. His research has led to a better understanding of the neurophysiological basis of higher functions such as learning and memory, described in his 1978 book, *The Mindful Brain*. He received the Lasker Award for basic medical research in 1983 and the National Medal of Science in 1986. In 1993 he was awarded the Australia Prize and in 1998 the National Academy of Sciences triennial award in the neurosciences.

Mountevans, Edward Ratcliffe Garth Russell Evans, 1st Baron 1881–1957
English naval commander
Educated at Merchant Taylors' School, he joined the navy in 1897. From 1910 to 1913 he was second-in-command to Captain ROBERT SCOTT's Antarctic expedition. In World War I he fought at Jutland, and in command of HMS *Broke* he scored an impressive victory over four German destroyers. In 1929 he was appointed rear admiral commanding the Royal Australian Navy. He later was commander-in-chief of the Africa station and deputy high commissioner of the British Protectorates, where his actions against the paramount chief Tshekedi Khama of Bechuanaland were criticized. Recalled in 1939, he served in World War II as London regional commissioner. He wrote *Keeping the Seas* (1920) and *South with Scott* (1921).

Mountford, Charles Pearcy 1890–1976
Australian ethnologist, writer and film director
He was born in Hallett, South Australia. During his early years as a mechanic for the post office he was brought into contact with the Aboriginals and became an expert on their way of life, although he had no formal training. In 1937 he led an expedition in search of the lost explorer LUDWIG LEICHHARDT, and between 1938 and 1960 he led ten expeditions into central Australia. In 1948 he was leader of expeditions into Arnhem Land and to Melville Island, for the National Geographic Society of the USA. Beginning with *Brown Men and Red Sand* (1948), he wrote a series of books, illustrated with his own photographs, about the Aboriginals and their culture. He received awards for his photography and went on to direct feature films on Aboriginal life from 1950.

Mountjoy, Lord *See* BLOUNT, CHARLES

Mourinho, José, *in full* **José Mário dos Santos Mourinho Félix** 1963–
Portuguese football manager
Born in Setubal, the son of former Portugal goalkeeper Félix Mourinho, he planned a career in football from an early age but had little success as a player. After working with various clubs as a fitness trainer, in 1992 he became translator to the former England manager Bobby Robson at Sporting Lisbon. His work with Robson eventually led to coaching roles at Barcelona, Benfica and União de Leiria. In 2002 he became manager of FC Porto, guiding the team to domestic league, cup and UEFA Cup victories in 2003 and the Champions League title in 2004. He joined Chelsea FC in 2004. Widely regarded as one of Europe's best managers, he is also known for his provocative, sometimes controversial style and seemingly unshakeable self-belief.

Moussorgsky, Modest Petrovich *See* MUSSORGSKY, MODEST PETROVICH

Mowlam, Mo (Marjorie) 1949–2005
English Labour politician
Educated in Coventry, and at Durham University and the University of Iowa, she lectured at Florida State University (1977–78) and at the University of Newcastle upon Tyne (1979–83). In 1987 she was elected as MP for Redcar. Within a year she was an assistant front bench spokesperson on Northern Ireland (1988–89), then became deputy coordinator for Labour's successful European parliament campaign in 1989. Rising through the Labour Party ranks, she was the spokesperson for city and corporate affairs (1989–92), for the Citizen's Charter and women (1992–93), for national heritage (1993–94) and for Northern Ireland (1994–97), before entering TONY BLAIR's Cabinet as Secretary of State for Northern Ireland after Labour's landslide win in the 1997 general election. She became Minister for the Cabinet Office and Chancellor of the Duchy of Lancaster in 1999. A popular and forthright MP, she retired from politics at the 2001 general election.

Moyne, François Le *See* LE MOYNE, FRANÇOIS

Moynihan (of Leeds), Berkeley George Andrew Moynihan, 1st Baron 1865–1936
British surgeon
Born in Malta, he held various posts at the Leeds General Infirmary, England, specializing in the techniques of abdominal,

Mozart, Wolfgang Amadeus, *originally* **Johannes Chrysostomus Wolfgang Gottlieb Mozart** 1756–91
Austrian composer

Mozart was the son of Leopold Mozart, deputy kapellmeister to the Archbishop of Salzburg. He displayed early musical gifts, playing the keyboard confidently at the age of four, composing his first pieces for it at five, and soon mastering the violin. Leopold was keen to exhibit his son's extraordinary talents along with those of his pianist-daughter, Maria-Anna or 'Nannerl' (1751–1829), and he undertook a series of tours of the European courts with them.

In 1762 they played before the Elector of Bavaria in Munich and before Empress MARIA THERESA in Vienna. In 1763 they gave concerts in Munich, Augsburg, Mainz and Frankfurt before a five-month stay in Paris, which included a visit to the court of LOUIS XV at Versailles. They then went to London for 15 months, where a friendship was formed with J C BACH. During the next six months in the Netherlands, both children became seriously ill. In 1766 they began the homeward journey, stopping in Paris for two months, and making many appearances throughout Switzerland and Germany. Accounts of this tour mention Mozart's precocity, spirited playing and rare talent for improvisation.

In September 1767 the family went for five months to Vienna, where he wrote an opera buffa, *La finta semplice* ('The Feigned Simpleton') and a singspiel, *Bastien und Bastienne*, the latter commissioned by Dr FRANZ ANTON MESMER. On returning to Salzburg, Mozart was appointed honorary konzertmeister to the court. There followed three extended visits by father and son to Italy (1770–72). In Rome, Mozart heard the *Miserere* of Gregorio Allegri (1582–1652) and afterwards wrote out the parts from memory. His musical experiences on these tours helped mould his style, especially in dramatic music, although he was prolific also in writing sacred vocal pieces and instrumental works: by 1772 he had written about 25 symphonies (of which some are lost) and his first quartets. Further quartets and symphonies followed during and after a visit to Vienna in 1772, during which Mozart came into contact with the music of HAYDN.

The years 1775–76 saw two stage works, *La finta giardiniera* ('The Feigned Gardener Girl') and *Il rè pastore* ('The Shepherd King'), five violin concertos, the *Haffner* Serenade, and Masses for the Salzburg Court Chapel. Unhappy with the austere and unmusical Archbishop Colloredo of Salzburg, Mozart left his service in 1777 and, travelling with his mother, sought employment elsewhere. They stayed at Mannheim, and heard the orchestra there, but no post was offered. He wrote a number of piano concertos and flute quartets, and fell in love with a singer, Aloysia Weber. Then in Paris, where his mother died in July, Mozart wrote the *Paris* Symphony. His father persuaded him to return to Salzburg, and he reluctantly accepted the post of court organist. At this time he composed the Symphonies, the *Coronation Mass*, and the Sinfonia Concertante for violin and viola. In 1780 he received an important commission from the Elector of Bavaria, for the opera seria *Idomeneo, rè di Creta* ('Idomeneo, King of Crete'), produced in Munich in January 1781.

In 1781 Archbishop Colloredo summoned Mozart to Vienna for the coronation of Emperor JOSEPH II. Again, after a stormy scene, he soon left the Archbishop's service but remained in Vienna, which became home for the rest of his short, crowded life. Here his reputation as composer and pianist was to reach its peak within a few years. Aloysia Weber had married a court actor, and Mozart turned his attentions to her sister Constanze, whom he married in 1782, shortly after the first

cont

gastric and pancreatic operations, and became professor at Leeds in 1909. The driving impulse of his life was the promotion of scientific surgery, and he set out his doctrine in his *Abdominal Operations* (1905). He formed the Moynihan Chirurgical Club, and was active in starting the Association of Surgeons of Great Britain and Ireland and the *British Journal of Surgery* (1913).

Moynihan, Daniel Patrick 1927–2001
US Democratic politician
Born in Tulsa, Oklahoma but raised in New York, he was educated at the City College of New York and Tufts University, and won a Fulbright scholarship to the London School of Economics. He then taught at Syracuse, Harvard, and the Massachusetts Institute of Technology. He served in the administrations of Presidents LYNDON B JOHNSON and RICHARD NIXON, acquiring notoriety as the author of *The Negro Family: The Case for National Action* (1965). He became ambassador to India (1973–74) before his election to the US Senate as a Democrat from New York in 1976; he held his seat until 2000. Among his many publications are *On the Law of Nations* (1990) and *Pandaemonium: Ethnicity in International Politics* (1993). 🕮 Godfrey Hodgson, *The Gentleman from New York: Daniel Patrick Moynihan – A Biography* (2000)

Moynihan, Rodrigo 1910–90
English painter
Born in Santa Cruz, Tenerife, he studied at the American School in Rome, then at the Slade School of Art, London, and joined the London Group in 1933. In 1934 he organized the Objective Abstraction exhibition at the Zwemmer Gallery, London. Most of his works are of an Impressionist nature, with soft tones (eg his portrait of Queen ELIZABETH II as *Princess Elizabeth*). From 1943 to 1944 he was an official war artist, and was professor of painting at the Royal College of Art (1948–57), where he painted his *Portrait Group* (1951) of the editors of Penguin Books. In 1956 he returned to abstract painting, with a show at the Institute of Contemporary Arts. There was a major retrospective of his work at the Royal Academy in 1978. He later became best known for his still lifes and portraits, such as *Margaret Thatcher* (1985, National Portrait Gallery, London).

Mozart, Wolfgang Amadeus *See panel above*

Mravinsky, Yevgeni Aleksandrovich 1903–88
Russian conductor
Born in St Petersburg, he studied biology, but followed his considerable talent as a pianist to become a rehearsal pianist for the Imperial Ballet. He entered the Leningrad (now St Petersburg) Conservatory in 1924, and on graduating in 1931 immediately took over the Leningrad Theatre of Opera and Ballet. From 1938 until his death he was the principal conductor of the Leningrad Philharmonic Orchestra. Mravinsky believed in trying to give an audience exactly what the composer intended, and in so doing gave some electrifying performances. He gave the world premières of several symphonies by both PROKOFIEV and SHOSTAKOVICH.

M'Taggart, John M'Taggart *See entry following* MACSWINEY

Mu'Awiyah c.602–680
First Umayyad caliph
He opposed the prophet MUHAMMAD until the conquest of Mecca (630), then became his secretary. Under the 2nd caliph, OMAR, he took part in the conquest of Syria and was made governor (640). He rebelled against the 4th caliph, ALI, for the murder of his kinsman, the caliph 'UTHMAN, and fought him at the indecisive Battle of Siffin (657). With the help of AMR IBN AL-'AS he gained control of Egypt, and after the assassination of Ali (661) took over the caliphate, thus founding the Umayyad dynasty, and moved the capital to Damascus. He centralized control of the caliphate and extended it through conquests in North Africa and Afghanistan. He was succeeded by his son, Yazid (d.683).

Mubarak, (Mohammed) Hosni Said 1928–
Egyptian statesman
Born in al-Minufiyah, he served as a pilot and flying instructor and rose to become Commander of the Egyptian Air Force. He was vice-president under ANWAR SĀDĀT from 1975 until the latter's assassination in 1981. The only candidate for the presidency, Mubarak was declared president and pledged to continue Sadat's domestic and international policies, including firm treatment of Muslim extremists, and the peace process with Israel. During the 1991 Gulf War, he was the Arab leader most critical of SADDAM HUSSEIN, and reasserted his credentials with Israel by strongly denouncing the Iraqi missile attacks on Tel Aviv and Haifa. In 1995 he survived an assassination attempt by Islamic fundamentalists and was involved in the events leading to the signing of a peace accord between the Palestinian Liberation Organization (PLO) and Israel. Re-elected in 1999 and 2005, he continues to be a key figure in both the complex politics of the Middle East and on the world stage.

Mucha, Alphonse, *originally* **Alfons Maria Mucha** 1860–1939
Czech graphic artist, painter and designer
Born in Ivancise, he studied in Munich, Vienna, and at the Académie Julian and the Académie Colarossi, Paris. He designed jewellery, wallpaper and furniture, but his best-

Mozart, Wolfgang Amadeus, *originally* **Johannes Chrysostomus Wolfgang Gottlieb Mozart** *cont*

performance of his opera *Die Entführung aus dem Serail* ('The Abduction from the Seraglio').

Married life was happy, but insecure financially (they had six children, of whom two survived), and Mozart increased his meagre income by teaching. In 1784, the year he became a freemason, he produced six piano concertos; in 1785 a further three; in 1786 three more. This was the rich flowering of his maturity, along with six string quartets dedicated to Haydn (who had declared Mozart to be the greatest composer known to him), the *Linz* and *Prague* Symphonies and the three Italian comic masterpieces composed to libretti by LORENZO DA PONTE: *Le Nozze di Figaro* (1786, *The Marriage of Figaro*, after BEAUMARCHAIS), *Don Giovanni* (first performed in Prague, 1787), and *Così fan tutte* (1790, 'Women Are All Like That'). Productions of his operas were usually more successful in Prague than in Vienna. The String Quintets in C major and G minor (1787), the last three symphonies (1788), the quartets for the King of Prussia, the serenade *Eine kleine Nachtmusik*, and the Clarinet Quintet mark the peak of his output of orchestral and chamber music. In 1787, Mozart's father Leopold died in Salzburg.

The letters to fellow masons in his last three years make sad reading, reflecting countless anxieties about finance or health. He hoped for new commissions or a court post on the accession of Emperor LEOPOLD II, but none was forthcoming. In 1791 he applied unsuccessfully for the post of kapellmeister of St Stephen's Cathedral. His last works were the opera *Die Zauberflöte* (*The Magic Flute*), based on a fairy-tale with a libretto by Emanuel Schikaneder, and an opera seria, *La Clemenza di Tito* (also of 1791), a Clarinet Concerto and a Requiem. The last was written to an anonymous commission (now known to be from Count Walsegg) and was unfinished when he died on 5 December.

Mozart's apparently irresponsible way of life may have contributed to the troubles of his last years, and the childish humour exhibited in his surviving letters appears to be the antithesis of his music. For he was a universal genius of music, in its facility, grace and polish, his innate sense of phrasing and gift of melodic beauty, his mastery of form and the richness of his harmony, and his ability to portray the deepest human feelings with the most sublime and sincere musical expression.

📖 Of the many general biographies of Mozart, that by Alfred Einstein (English edition 1946) is still considered the finest. See also H C Robbins Landon, *Mozart and Vienna* (1991) and *Mozart's Last Year* (2nd edition, 1989, with further bibliography); W Hildesheimer, *Mozart* (translated by Marion Faber, 1983); H C Robbins Landon and D Mitchell, *The Mozart Companion* (1956). A documentary account is given by O E Deutsch, *Mozart: A Documentary Biography* (1965); a selection of letters in English translation is given in E Anderson, *The Letters of Mozart and His Family* (3rd edition, 1985). Mozart's works were catalogued by Ludwig von Köchel and are usually cited from this catalogue (with several revisions by Alfred Einstein and later editors, 1983) with the prefix 'K'. Eduard Mörike's novella *Mozart auf seiner Reise nach Prag* (1855, 'Mozart's Journey to Prague') is a fictional romance based on Mozart's visit to Prague for the first production there of *Don Giovanni*.

> 'Melody is the very essence of music. When I think of a good melodist I think of a fine race horse. A contrapuntist is only a post-horse.'
>
> – From a letter to Michael Kelly, 1786.

known works are his posters for SARAH BERNHARDT, in the rich curvilinear Art Nouveau style of the 1890s. He designed a shop for a jeweller in Paris in 1901, before devoting himself mainly to painting from c.1903. He returned to Prague in 1914, where he painted a series of 20 monumental pictures, *The Slav Epic*.

Muddy Waters *See* WATERS, MUDDY

Mueller, Erwin Wilhelm 1911–77
US physicist
Born in Berlin, he graduated in engineering from the Technical University in Berlin, and worked for industrial laboratories there and at the Fritz Haber Institute. In 1936 he invented the field-emission microscope, which could produce an image of up to one million times magnification, allowing the atomic structure of certain materials to be directly observed. He followed this in 1951 with the field-ion microscope, which gave the first photographs affording a direct view of individual atoms in some high-melting-point metals and alloys and some large organic heat-stable molecules. He emigrated to the USA in 1952, and joined the staff of Pennsylvania State University. He became a naturalized US citizen in 1962.

Mueller, Ferdinand Jakob Heinrich von, Freiherr *See* MÜLLER, FERDINAND JAKOB HEINRICH VON, FREIHERR

Mugabe, Robert Gabriel 1924–
Zimbabwean nationalist leader and politician
Born in Kutama, Southern Rhodesia, and educated in Catholic missions schools and Fort Hare College, he was a teacher successively in Southern Rhodesia (Zimbabwe), Northern Rhodesia (Zambia) and Ghana before returning to Southern Rhodesia in 1960 as Publicity Secretary to the National Democratic Party. He was Deputy Secretary-General of the Zimbabwe African People's Union (ZAPU) in 1961 before being detained and then imprisoned, but escaped to co-found the Zimbabwe African National Union (ZANU) in 1963. He was detained again (1964–74), during which period he replaced NDABANINGI SITHOLE as president of ZANU and qualified as a lawyer. Released in 1974, he went to Mozambique to oversee the guerrilla war against the white regime. United uncomfortably with JOSHUA NKOMO's ZAPU in the Patriotic Front to press for black majority rule, Mugabe essentially retained his independence and, to the surprise of many, led ZANU (PF), as the combined party was called, to a decisive victory in 1980; hence, he became prime minister in the first government of independent Zimbabwe. In 1987 he persuaded parliament to agree to combine the roles of head of state and head of government, and he became the country's first executive president. In 1988 ZANU and ZAPU merged to make Zimbabwe effectively a one-party state, under Mugabe's leadership. He was re-elected in the 1996 presidential election after each of his challengers had withdrawn from the running. The years that followed were marked by Mugabe's leadership of an anti-homosexuality crusade, and by his promotion of forcible land reclamation and redistribution from white farmers to his own supporters, increasing civil violence. Electoral intimidation and irregularity were rife as ZANU (PF) faced a growing challenge from Morgan Tsvangirai's Movement for Democratic Change party. Mugabe won the 2002 election amid allegations of vote-rigging, and accused his defeated opponent of treason. Zimbabwe was then suspended from the Commonwealth and its subsidies cut; Mugabe retaliated by withdrawing the country from the organization in 2003. Although he remains a popular figure in wider Africa, opposition to his regime is growing within Zimbabwe. 📖 David Smith and Colin Simpson, *Mugabe* (1981)

Muggeridge, (Thomas) Malcolm 1903–90
English journalist and sage
Born in Croydon, London, he lectured at the Egyptian University in Cairo (1927–30), then joined the *Manchester Guardian* (1930–33), serving as their Moscow correspondent. He was also assistant editor of the *Calcutta Statesman* (1934–35) and on the editorial staff of the *Evening Standard*. Serving with the Intelligence Corps during World War II, he received the French Legion of Honour and the Croix de Guerre with Palm. He worked with *The Daily Telegraph* (1946–52), and was editor of *Punch* (1953–57) and also a television reporter and interviewer, making regular contributions to *Panorama* (1953–60). In his own series *Appointment With...* (1960–61) and *Let Me Speak* (1964–65), he quizzed the great figures of the day and challenged minorities to defend their beliefs. A controversial Rector of Edinburgh University (1967–68), he resigned over student liberalism and promiscuity. In 1982 he became a Roman Catholic. Later television appearances include the autobiographical *Muggeridge Ancient and Modern* (1981). Among his many books are *The Earnest Atheist* (1936), *Tread Softly for You Tread on My Jokes* (1966), *Chronicle of Wasted Time* (1982) and *Conversion: A Spiritual Journey* (1988). 📖 Gregory Wolfe, *Malcolm Muggeridge: A Biography* (1995)

Muggleton, Lodowick 1609–98
English Puritan
Born in London, he founded the sect of Muggletonians (1652) with his cousin, John Reeve (1608–58). They held that the Devil

Muhammad or **Mohammed** c.570–c.632
Arab prophet, and founder of Islam

Muhammad was the son of Abdallâh, a poor merchant of the powerful tribe of Quaraysh, hereditary guardians of the shrine in Mecca. He was orphaned at six, and brought up by his grandfather and uncle, Abu Tâlib, who trained him to be a merchant. At the age of 24 he entered the service of a rich widow, Khadija (c.595–619), whom he eventually married. They had six children, including their daughters FATIMA and Umm Kulthum, who married 'UTHMAN, the third caliph.

While continuing as a trader, Muhammad became increasingly drawn to religious contemplation. Soon after 600 (the traditional date is c.610) he began to receive revelations from the angel Jibra'el (Gabriel) of the word of Allah, the one and only God. This Qur'an (Koran), or 'reading', commanded that the numerous idols of the shrine should be destroyed and that the rich should give to the poor. This simple message attracted some support but provoked a great deal of hostility from those who felt their interests threatened.

When his wife and uncle died, Muhammad was reduced to poverty, but he began making a few converts amongst pilgrims to Mecca from the town of Yathrib, an agricultural community to the north. By 622 Muhammad and his small band of devoted followers could no longer remain in Mecca; they were saved by an invitation from the people of Yathrib, who wanted Muhammad to come and arbitrate in the feuds that racked their community. He migrated there, and this migration, the Hegira, marks the beginning of the Muslim era. The name of the town was changed to Medina, 'the city of the prophet'.

The most important act in the first year of the Hegira was Muhammad's permission to go to war with the enemies of Islam – especially the Meccans – in the name of God. In December 623 his Muslims defeated a Meccan force, but he was severely wounded in a battle at Ohod (January 625). In 627 he repelled a Meccan siege of Medina. By 629 he was able to take control of Mecca, which recognized him as chief and prophet. By 630 he had control over all Arabia. In March 632 he undertook his last pilgrimage to Mecca, and there on Mount Arafat fixed for all time the ceremonies of the pilgrimage.

He fell ill soon after his return and died on 8 June in the home of the favourite of his nine wives, AÏSHAH, the daughter of one of his first followers, ABU BAKR. His tomb in the mosque at Medina is venerated throughout Islam.

📖 M Cook, *Muhammad* (1983).

became incarnate in EVE, and denied the Holy Trinity. He was imprisoned, and later fined for blasphemy, and published a *Spiritual Transcendental Treatise* (1652).

Muhammad *See panel above*

Muhammad, Abu Abdallah *See* BOABDIL

Muhammad, Elijah, *originally* **Elijah Poole** 1897–1975
US religious leader
Born near Sandersville, Georgia, he left home at 16, married in 1919 and four years later took his family to Detroit, where he worked in a car factory and endured hard times, living on relief from 1929 to 1931. Like his father he was for a time a Baptist preacher, but in 1931 he became an assistant to Wali Farad, the founder of the Nation of Islam (known as the Black Muslims), a sect that favoured black separatism and rejected Christianity as a tool of oppressive whites. Abandoning his 'slave name' in favour of the name of the prophet, Elijah Muhammad embraced Farad's militant doctrines, seeking to win converts and to promote the movement's goal of African-American economic self-sufficiency. He founded the second mosque of the Nation of Islam in Chicago (1934) and organized business enterprises and parochial schools sponsored by the Black Muslims. On Farad's disappearance in 1934, Elijah Muhammad became the leader of the movement, which grew rapidly even during his six-year imprisonment for opposing military conscription in World War II. During the late 1950s and 1960s he was critical of the integrationist agenda and non-violent philosophy of the civil rights movement, but he benefited from the raising of African-American consciousness that accompanied it, and by 1962 there were an estimated 250,000 Black Muslims. A schism occurred in the Nation of Islam when his disciple MALCOLM X broke away in 1965, and Malcolm's assassination was allegedly carried out by Black Muslims loyal to Elijah Muhammad. When Muhammad himself died in 1975, he was succeeded by his son Wallace D Muhammad (1933–), who moved the Black Muslims closer to orthodox Islam.

Muhammad Ahmed, *known as* **al-Mahdi ('Divinely Guided One')** 1844–85
Arab ascetic and rebel
Born in Dongola, Sudan, the son of a shipbuilder, he was the creator of an Islamic state and a religious movement (Mahdism). He was educated within a religious order rather than at university, and was for a time in the Egyptian Civil Service and a slave-trader before beginning his relentless and successful campaign against Egyptian rule in eastern Sudan. He was motivated by a conviction that, due to their apparent desertion of the Islamic faith, the ruling class were unfit to govern Muslims. Believing himself to have been selected by God to destroy any government responsible for the defilement of Islam, he declared himself 'al-Mahdi' in 1881 and gathered together a group of virtually unarmed disciples as his *ansar* ('helpers'). By 1883 he had proclaimed El Obeid (now al-Ubayyid) his capital and had united the nation's diverse and discontented citizens into an army strong enough to defeat any army Egypt could muster, including the 8,000-strong force commanded by General WILLIAM HICKS (Hicks Pasha). On 26 January 1885, al-Mahdi took Khartoum in the action in which (against al-Mahdi's orders) General CHARLES GORDON was killed. Following these successes he consolidated his religious empire, establishing a new capital at Omdurman, but was taken ill and died a few months later, probably of typhus. The Mahdists were defeated by British forces led by HORATIO HERBERT KITCHENER at the Battle of Omdurman (1898).

Muhammed, Shams ed-Dín *See* HÁFIZ

Muir, Edwin 1887–1959
Scottish poet
Born in Deerness, Orkney, he migrated with his family to Glasgow at the age of 14, where he suffered the period of drab existence described in *The Story and the Fable* (1940), revised as *An Autobiography* in 1954. He spent much time reading NIETZSCHE, GEORGE BERNARD SHAW, IBSEN, HEINRICH HEINE and Blatchford, and became interested in left-wing politics. When he married the novelist Willa Anderson (WILLA MUIR) in 1919, they settled in London, then travelled on the Continent (1921–24), where they collaborated in translations of FRANZ KAFKA and FEUCHTWANGER and he wrote novels, notably *The Marionette* (1927). He spent most of the 1930s in Sussex and St Andrews. He also worked for the British Institute in Prague and Rome, and was appointed warden of Newbattle Abbey, near Edinburgh, in 1950. After a year as Eliot Norton Professor of Poetry at Harvard (1955–56), he retired near Cambridge. His poems appeared in eight slim volumes, including *First Poems* (1925), *The Voyage* (1946) and *The Labyrinth* (1949), and in *Collected Poems* (1952). Muir's critical work includes a controversial study of JOHN KNOX and *Scott and Scotland* (1936). A new *Collected Poems* was published in 1991. 📖 W Muir, *Belonging* (1968)

Muir, Frank 1920–98
English writer and broadcaster
Born in Ramsgate, Kent, he was educated at Chatham House, Ramsgate, and Leyton County High School. Following service in the RAF during World War II, he began a fruitful professional partnership with DENIS NORDEN in 1947, which lasted until 1964. Together they wrote the radio comedy series *Take It From Here* (1947–58) and *Whack-O!* (1958–60) in which Jimmy Edwards appeared. He was also a well-known television personality, and his appearances include the long-running game show series *Call My Bluff*. His many publications include the bestselling *Oxford Book of Humorous Prose* (1989), which took 17 years to compile and edit.

Muir, Jean Elizabeth 1928–95
English fashion designer
She was born in London and educated at Dame Harper School, Bedford. She started as a salesgirl with Liberty's in London in 1950, then moved to Jaeger in 1956. In 1961 she started on her own as Jane & Jane. In 1966 she established her own company, Jean Muir. Her clothes are noted for their classic shapes and their softness and fluidity.

Muir, John 1810–82
Scottish Sanskrit scholar
He was born in Glasgow. After spending 25 years in the East India Company's Civil Service in Bengal, he settled in Edinburgh, where he founded a chair of Sanskrit. His great work was his *Original Sanskrit Texts* (5 vols, 1858–70). Another of his books is *Metrical Translations from Sanskrit Writers* (1878).

Muir, John 1838–1914
US naturalist
Born in Dunbar, Scotland, he emigrated to the USA in 1849, and studied at Wisconsin University. He concentrated his interest on natural history, exploring the western USA, especially the Yosemite area. He farmed very successfully in California, and also campaigned for a national park there. It needed a decade of Muir's vigorous oratory and article-writing, and President THEODORE ROOSEVELT's support, before the idea of wildlife conservation became widely accepted. Muir wrote a number of books, including *The Mountains of California* (1894), *Our National Parks* (1901), *My First Summer in the Sierra* (1911) and *The Yosemite* (1912). The John Muir Trust to acquire wild land in Great Britain was established in 1984. He is regarded as the father of the modern environmental movement. 🕮 William Frederick Bade, *The Life and Letters of John Muir* (1924)

Muir, Willa, *née* **Anderson**, *pseudonym* **Agnes Neill Scott** 1890–1970
Scottish novelist and translator
Born in Montrose, Angus, she studied at St Andrews University, then taught classics and educational psychology in London until she was forced to resign after marrying the 'atheist' EDWIN MUIR (1919). Travelling often, they lived for short periods in Prague, Rome and the USA. They translated jointly (although often only Edwin was credited), and were influential in popularizing FRANZ KAFKA in the 1930s. Her essay *Women: An Enquiry* (1925) dealt with the demoralizing effects of Scottish small-town life, a subject she returned to in her novel *Imagined Corners* (1931). *Mrs Grundy in Scotland* (1936) examined the role of women in Scottish culture. She also wrote of her partnership with Edwin Muir in *Belonging* (1968), and finished his project *Living With Ballads* (1965) after his death.

Muirhead, (Litellus) Russell 1896–1976
English editor and traveller
Educated at University College School and Christ's College, Cambridge, he became editor (1930) of the 'Blue Guides' to Europe. His other editorial work included scientific journals and the Penguin guides to England and Wales (1938–49). He was also author of numerous travel books and articles.

Mujibur Rahman, *known as* **Sheikh Mujib** 1920–75
Bangladesh statesman
Born in Tungipana, into a landowning family, he was educated in Calcutta and Dacca University, from which he was expelled for political activities. He co-founded (1949) the Awami (People's) League, campaigning for autonomy for East Pakistan (Bangladesh), became its leader in 1953, and led it to electoral victory in 1970. In 1972, after the civil war between East and West Pakistan, he became prime minister of newly independent Bangladesh. He introduced a socialist economic programme but became increasingly intolerant of opposition, establishing a one-party state. In August 1975 he and his wife were assassinated in a military coup.

Mulcaster, Richard c.1530–1611
English educationalist
He was born in Cumberland. A brilliant Greek and Oriental scholar, he was head of Merchant Taylors' School, London, and one of the great Elizabethan schoolmasters, his ideas on education being well in advance of his time. In 1582 he published in *Elementaire* a list of 7,000 words in his proposed reformed spellings (eg 'guest' to be spelled 'gest' and 'guide' to be spelled 'gide'; an accent to show the short 'a' in, eg 'bābble').

Muldoon, Paul Benedict 1951–
Northern Ireland poet
Born in Portadown, County Armagh, he studied at Queen's University, Belfast, and began his career as a radio and television producer (1973–86). His collections of poetry include *New Weather* (1973), *Quoof* (1983), *Meeting the British* (1987), *Hay* (1998) and *Horse Latitudes* (2006). He has taught widely in Britain and the USA and was professor of poetry at Oxford (1999–2004). His many honours and awards include the T S Eliot prize in 1995 for *The Annals of Chile* and the 2003 Pulitzer Prize for *Moy Sand and Gravel*. 🕮 Clair Wills, *Reading Paul Muldoon* (1996)

Muldoon, Sir Robert David 1921–92
New Zealand statesman
Born in Auckland, he served as an infantryman in World War II before becoming an accountant. He was first elected to parliament (as a National Party MP) in 1960, and after five years as Minister of Finance became deputy prime minister. Though the government was defeated in elections later that year, Muldoon (having become party leader and leader of the opposition in 1974) led the National Party to victory in the 1975 elections. He was prime minister from 1974 to 1984, when he gave up leadership of the National Party. He resigned from parliament in 1991. 🕮 *Muldoon* (1978)

Mulgan, Alan E(dward) 1881–1961
New Zealand writer and journalist
Born in Katikati, he was the author of *Maori and Paheka: A History of New Zealand* (1922, with A W Shrimpton), *The City of the Strait: Wellington and its Province: A Centennial History* (1939), *Literature and Authorship in New Zealand* (1943) and *Great Days in New Zealand Writing* (1962). He also published verse, a novel and a collection of plays, travel and history. 🕮 *The Making of a New Zealander* (1958)

Mulgan, John Alan Edward 1911–45
New Zealand writer
The son of the writer ALAN E MULGAN, he wrote only one novel, the sprawling Hemingwayesque *Man Alone* (1939). Through the struggles of his war-veteran hero, Johnson, in the Depression years, he analyses and criticizes the structure of contemporary New Zealand society. The novel is important in New Zealand literature for spawning other books on the theme of the 'isolated man', alone either by virtue of his nature, race or environment. 🕮 *Report on Experience* (1949, posthumous)

Müller, (Karl) Alex(ander) 1927–
Swiss physicist and Nobel Prize winner
Born in Basle, he was educated at the Swiss Federal Institute of Technology, Zurich, where he received his PhD in 1958. After five years at the Battelle Institute in Geneva (1958–63) he joined the IBM Zurich Research Laboratory working in the area of solid-state physics. For the discovery of new low-temperature superconductors, Müller shared the 1987 Nobel Prize in physics with GEORG BEDNORZ.

Müller or **Mueller, Sir Ferdinand Jakob Heinrich von, Freiherr** 1825–96
Australian explorer and botanist
Born in Rostock, Germany, he emigrated to Australia in 1847, was appointed government botanist for the state of Victoria in 1853, and in the next few years built up a valuable collection of native flora. From 1857 to 1873 he was director of Melbourne Botanic Gardens, where a separate library and herbarium was set up for him. He explored Western Australia and Tasmania, promoted expeditions into New Guinea, and was a member of the first Australian Antarctic Exploration committee. He also sponsored a fund organized by Melbourne ladies for an expedition in search of the lost explorer LUDWIG LEICHHARDT, and organized the 1875 trip into the central desert by ERNEST GILES. He was responsible for the introduction of the blue gum tree (*Eucalyptus* species) into Europe, and published many scientific works on the plants of Australia.

Müller, Franz Joseph, Baron von Reichenstein 1740–1825
Austrian chemist and mineralogist
Born in Nagyszeben, Transylvania (now in Romania), he studied law in Vienna and metallurgy at Schemnitz, Hungary. He worked in the state-owned salt works in Transylvania, becoming the director of state mines in the Tirol from 1775 to 1778 and director of all mining in Transylvania from 1778 to 1802. During 1802–18 he headed the committee which controlled minting and mining in the Austro-Hungarian Empire and he was created a baron on his retirement. In 1784 he identified an impurity in a gold-bearing ore as a new element and described its semi-metallic properties. These findings were later confirmed by MARTIN HEINRICH KLAPROTH, who named the element tellurium.

Müller, Gerd 1945–
German footballer
Born in Nördlingen, he played as a striker for Bayern Munich during the club's most successful period, helping the team to four West German league titles and three successive European Cups (1974–76). He was a prolific goal scorer for both club and country, finishing top scorer in West German league football seven times and scoring 68 times in 62 appearances for his

country. His record of 14 goals in World Cup finals stood until 2006 when it was beaten by Brazil's RONALDO.

Müller, Hermann Joseph 1890–1967
US geneticist and Nobel Prize winner
Born in New York City, he studied at Columbia University and spent the 1920s at the University of Texas at Austin, where he was appointed professor of zoology. In 1933 he moved to Leningrad (St Petersburg) to work at the Institute of Genetics there, joined a medical unit in Spain during the Spanish Civil War, and after a period at the Institute of Animal Genetics of the University of Edinburgh, he finally returned to the USA in 1940. From 1945 to 1967 he was professor of zoology at the University of Indiana. His major work was on the use of X-rays to cause genetic mutations, for which he was awarded the Nobel Prize in physiology or medicine in 1946. Concerned about the possible dangers of radiation-induced mutations, he campaigned for safety measures in hospitals and against the nuclear bomb tests.

Müller, Johannes Peter 1801–58
German physiologist
Born in Koblenz, he studied at Bonn University, was appointed to the chair of physiology there in 1826, and in 1833 moved to Berlin University. He won fame for his precocious researches in embryology, and also showed early interest in the eye and vision. His later work was wide-ranging, covering electrophysiology, the glandular system, the human embryo and the nervous system. He worked on zoological classification, dealing especially with marine creatures. In 1840 he proposed the law of specific nerve energies, that is, the claim that each sensory system will respond in the same way to a stimulus whether this is mechanical, chemical, thermal or electrical. Müller's *Handbuch der Physiologie des Menschen* (1833–40) was extremely influential, and he himself was probably the most significant life scientist and medical theorist in Germany in the first half of the 19th century.

Muller, Mary 1820–1902
New Zealand feminist
She was born in Britain, but little is known of her early life. Following the death of her first husband, a man named Griffiths, she went to New Zealand at the age of 30. She soon married S L Muller, whose disapproval of her feminist views led to her secretly publishing these anonymously through a local newspaper. Her feminist tract *An Appeal to the Men of New Zealand* won her international acclaim, and she was instrumental in having a women's property act passed in 1884, and in achieving female suffrage in her adopted homeland ten years later.

Müller, (Friedrich) Max 1823–1900
British philologist and Orientalist
Born in Dessau, Germany, where his father, the poet Wilhelm Müller (1794–1827), was ducal librarian, he studied at Dessau, Leipzig and Berlin, taking the then novel subject of Sanskrit and its kindred sciences of philology and religion. In Paris, under Eugène Burnouf, he began to prepare an edition of the *Rig-Veda*, the sacred hymns of the Hindus. He went to England in 1846 to examine the manuscripts, and the East India Company commissioned him (1847) to edit and publish it at their expense (1849–74). He was appointed Taylorian Professor of Modern Languages at Oxford (1854) and professor of comparative philology (1868 onwards), a study he did more than anyone else to promote in Great Britain. Among his most popular works were *Lectures on the Science of Language* (1861–64), *Auld Lang Syne* (1898), and *My Indian Friends* (1898), and he edited the *Sacred Books of the East* (51 vols, 1879–1910).

Müller, Otto Frederick 1730–84
Danish biologist
Born in Copenhagen, he was the first to describe diatoms (a class of unicellular algae) and bring to notice the animal kingdom of *Infusoria*. He was the inventor of the naturalist's dredge.

Müller, Paul Hermann 1899–1965
Swiss chemist and Nobel Prize winner
He was born in Olten and educated at the University of Basle. From 1925 onwards he worked at the experimental laboratory of the J R Geigy company, where he later became deputy head of pest control. He is known for his work on insecticides, particularly for discovering and developing DDT (dichlorodiphenyltrichloroethane) which was first marketed in 1942. DDT is extremely toxic to a wide variety of disease carriers and plant pests, and was used in tropical areas during World War II and after the war in many parts of the world. However, in the 1960s it became clear that many species quickly became resistant to it, and that its cumulative effects in the food chain are very destructive, so its use was discontinued. For the discovery of DDT, Müller was awarded the 1948 Nobel Prize in physiology or medicine.

Mulligan, Gerry (Gerald Joseph) 1927–96
US jazz saxophonist, bandleader and composer
Born in New York City, he grew up in Philadelphia, and learned piano as a child before specializing in the baritone saxophone. He began his career in jazz as an arranger for big bands. He moved to New York, and became involved in the MILES DAVIS sessions later known as *The Birth of the Cool* (1948–50). Moving to Los Angeles, he led a series of very popular small groups without the customary piano or guitar from 1952, in the cool west-coast style. His Concert Jazz Band transferred his ideas to a larger soundscape from 1960. He played with DAVE BRUBECK for a time (1968–1972), and continued to lead bands of various sizes into the 1990s. 🕮 J Klinkowitz, *Listen: An Aural Narrative in Jazz* (1986)

Mulliken, Robert Sanderson 1896–1986
US chemical physicist and Nobel Prize winner
Born in Newburyport, Massachusetts, he was educated at Massachusetts Institute of Technology and at the University of Chicago, where he took a PhD in chemistry in 1921. After holding a fellowship at Chicago and later at Harvard between 1921 and 1925, he became assistant professor of physics at Washington Square College of New York University (1926–28) and then joined the faculty of the University of Chicago, rising to full professor by 1937. From 1961 he was distinguished professor of physics and chemistry. During World War II he worked on the development of the atomic bomb. His earliest work was on the isotope effect in the band spectra of diatomic molecules, but he is best known for his share in the creation of molecular orbital theory in the 1930s. Mulliken also made important contributions to the development of the concept of hyperconjugation and a scale of electronegativity of the elements, and studied donor–acceptor interactions and charge transfer spectra. He became an Honorary Fellow of the Chemical Society in 1956 and was awarded the Nobel Prize in chemistry in 1966.

Mullis, Kary Banks 1944–
US biochemist and Nobel Prize winner
Born in Lenoir, North Carolina, he was educated at Georgia Institute of Technology and the University of California. In the early 1980s, while working for Cetus Corporation in California, he discovered a technique known as the 'polymerase chain reaction' (PCR), which allows tiny quantities of DNA to be copied millions of times to make analysis practical. It is now used in a multitude of applications, including tests for the HIV virus and the bacteria which cause tuberculosis, forensic science, and evolutionary studies of the genetic material in fossils. For this work Mullis was awarded the 1993 Japan Prize and, with MICHAEL SMITH, the 1993 Nobel Prize in chemistry. In 2003 he began research into the possibility of diverting immune responses from their original targets to fight new viral threats. He has written an eccentric quasi-autobiography, *Dancing Naked in the Mind Field* (1998).

Mulready, William 1786–1863
Irish painter
Born in Ennis, County Clare, he studied at the Royal Academy, painting such subjects as *A Roadside Inn*, *Barber's Shop*, and *Boys Fishing* (1813). He also worked at portrait painting and book illustration, and designed the first penny postage envelope.

Mulroney, (Martin) Brian 1939–
Canadian statesman
Born in Baie Comeau, Quebec province, the son of an Irish immigrant, he attended St Francis Xavier University in Nova Scotia and studied law at Laval University, Quebec City. He practised as a labour lawyer in Montreal while becoming increasingly active in the Progressive Conservative Party. In 1976 he lost a party leadership contest against Joe Clark and returned to business as president of a US-owned iron ore company. In 1983 he replaced Clark and in 1984 became prime minister, with a landslide victory over the Liberals. He initiated a number of radical measures, including the Meech Lake Accords, which aimed at settling disputes between the provinces and the centre, but which later collapsed. He was decisively re-elected in 1988, and his efforts to bring about the free trade agreement with the USA were crowned with success in 1989. In 1993 Mulroney resigned from office, returning to Montreal to practise law. He published *Where I Stand* in 1983. He was made a Companion of the Order of Canada in 1998.

Multatuli *See* DEKKER, EDUARD DOUWES

Mumford, Lewis 1895–1990
US author, editor and critic
Born in Flushing, New York, he grew up in New York City and studied at several universities there, devoting much time to exploring the city and developing the fascination with urban society and architecture that was to characterize much of his work. *The Culture of Cities* (1938) and *The City in History* (1961) are perhaps the best known of his numerous writings, but the earlier *Technics and Civilisation* (1934) was also influential. In studying civilizations, his object was always to determine how they reflected the values of the societies that created them, and he argued eloquently against the domination of modern urban environments by technology. His works include *The Story of Utopias* (1922), *The Human Prospect* (1955), *The Myth of the Machine* (1967) and *The Pentagon of Power* (1971). 🕮 *My Works and Days: A Personal Chronicle* (1979).

Munch, Edvard 1863–1944
Norwegian painter
Born in Löten, he studied in Oslo, travelled in Europe and finally settled in Norway in 1908. In Paris he came under the influence of PAUL GAUGUIN. He began working in a distinctly Expressionist style around the turn of the century and his work was widely disseminated in periodicals. His use of primary colours and tortuously curved designs were a great influence on German Expressionists in particular. He became obsessed by subjects such as death and love, and his mature paintings are really non-representative but evocative of these themes. His most characteristic work is *The Scream* (1893), depicting an anonymous figure on a bridge screaming, the swirling lines of colour contributing to the mood of desperation. Other works include many self-portraits (eg *Between the Clock and the Bed*, Oslo, 1940) and various woodcuts and engravings. Munch's work is represented in most major collections, and there is a Munch museum in Oslo.

Münchhausen, Karl Friedrich Hieronymus, Baron von 1720–97
German soldier
Born in Bodenwerder, he was a member of an ancient Hanoverian house. He was the narrator of ridiculously exaggerated exploits, and served in Russian campaigns against the Turks. A collection of stories attributed to him was first published in English as *Baron Munchausen's Narrative of his Marvellous Travels and Campaigns in Russia* (1785) by Rudolf Erich Raspe. *Munchausen* is based partly on 16th-century German jokes, partly as a satire on JAMES BRUCE and other travellers.

Mundell, Robert A(lexander) 1932–
Canadian economist and Nobel Prize winner
Born in Kingston, Ontario, he was educated at the universities of British Columbia and Washington, at the Massachusetts Institute of Technology, at the London School of Economics and at the University of Chicago. He has been a professor of economics at Columbia University since 1974, becoming University Professor in 2001. He was awarded the 1999 Nobel Prize in economics for his studies of monetary dynamics and optimum currency areas. His publications include *Man and Economics* (1968) and *Monetary Theory: Interest, Inflation and Growth in the World Economy* (1971).

Munefusa, Matsuo *See* BASHO, MATSUO

Mungo, St *See* KENTIGERN, ST

Munk, Kaj, *originally* **Kaj Harald Leininger Petersen** 1898–1944
Danish playwright, priest and patriot
Born in Maribo, Laaland, he studied theology at Copenhagen University, and as priest of a small parish in Jutland wrote heroic and religious plays that led the Danish dramatic revival in the 1930s. His first play was *En Idealist* (1928, Eng trans *Herod the King*, 1953), followed by *Cant* (1931), *Henrik VIII* (1931, 'Henry VIII'), *Ordet* (1932, Eng trans *The Word*, 1955) and *Han sidder ved smeltediglen* (1938, Eng trans *He Sits by the Melting-Pot*, 1944). Though he had initially admired MUSSOLINI and HITLER, their aggressive expansionism and repressive methods changed his views, and during World War II he was one of the spiritual leaders of the Danish Resistance. In 1942 he wrote a patriotic drama, *Niels Ebbeson*. Early in 1944 he was taken from his home by the Gestapo one night and found murdered in a ditch near Silkeborg next morning. 🕮 B N Broust, *Kaj Munk–liv og død* (1984)

Munk, Walter Heinrich 1917–
US physical oceanographer and geophysicist
Born in Vienna, Austria, he travelled to the USA in 1932 and was educated at the California Institute of Technology and the University of California, where he studied oceanography. At Scripps Institution of Oceanography he was appointed assistant professor of geophysics (1947–49), associate professor (1954–59), and professor from 1954. He was also associate director of their Institute of Geophysics and Planetary Physics (1959–82). During World War II his tidal predictions were used in the allied landings in North Africa and in the Pacific, and probably saved many lives. During US nuclear tests at Bikini Atoll, he measured their effects on ocean currents. He determined that a July day is two milliseconds shorter than a January day (1961), which he attributed to seasonal shifts in terrestrial air masses, ocean tides, the distribution of glaciers and changes within the Earth's core. He studied tsunamis, and in 1963 he set up a system of sensors to track the waves generated by winter storms over vast distances across the Pacific. He initiated the 'Mohole' deep drill project, and developed ocean acoustic tomography (three-dimensional modelling of the ocean temperature field), which is currently being applied in tests for global warming. He received the Gold Medals of both the American Meteorological Society (1966) and the Royal Astronomical Society (1968). In 1985 he was awarded the National Medal of Science, and in 1999 the Kyoto Prize.

Munkácsy, Mihály von, *originally* **Leó Lieb** 1846–1900
Hungarian painter
Born in Munkács, he settled in Paris in 1872. His best-known pictures include *Christ before Pilate* (1881) and *Death of Mozart* (1884).

Munnings, Sir Alfred 1878–1959
English painter
Born in Suffolk, a specialist in the painting of horses and sporting pictures, he became president of the Royal Academy (1944–49). His work is in many public galleries and he was well known for his forthright criticism of modern art. 🕮 Jean Goodman, *What a Go! The Life of Alfred Munnings* (1988)

Muñoz, Juan 1953–2001
Spanish artist
Born in Madrid, he attended the Central School of Art and Design, London, and the Croydon College of Design and Technology. His work, loosely definable as installation art, typically concentrates on the human form, often featuring enigmatic groups of figures, or, alternatively, figures set in large and complex spaces with false architectural details, as in *A Place Called Abroad* (1996) and *Double Bind* (2001). He created numerous works for radio, collaborating with, among others, the writer JOHN BERGER and the composer GAVIN BRYARS. 🕮 Neal Benezra et al, *Juan Muñoz* (2001)

Muñoz Marín, Luis 1898–1980
Puerto Rican statesman
Born in San Juan, Puerto Rico, the son of Puerto Rican nationalist LUIS MUÑOZ RIVERA, he spent much of his youth in Washington, DC. After studying at Georgetown University and Georgetown Law School, he went to New York City, where he contributed political commentary to the *Nation* and other journals. At this time he was a socialist and an advocate of Puerto Rican independence, though he later came to believe that complete independence from the USA would be an economic disaster for his homeland. He returned to San Juan in 1926 and became editor of his father's newspaper, *La Democracia*, and from 1932 to 1936 he served in the Puerto Rican senate as a member of the Liberal Party, using his New Deal contacts to get millions of dollars in government aid for the impoverished island. Conflicts with the Liberal Party prompted him to found the Popular Democratic Party in 1938, and he served in the senate again from 1940 to 1948, originating an economic development strategy known as Operation Bootstrap, which was intended to attract US mainland investors and diversify the Puerto Rican economy. Appointed Puerto Rico's first native-born governor by President HARRY S TRUMAN in 1947, he became the island's first elected governor the following year and was re-elected three times before finally stepping down in 1964. His achievements included land redistribution of tens of thousands of acres and the establishment of commonwealth status for Puerto Rico in 1952.

Muñoz Rivera, Luis 1859–1916
Puerto Rican journalist and nationalist
Born in Barranquitas, Puerto Rico, he founded the newspaper *La Democracia* to campaign for Puerto Rican independence,

and he helped win the Spanish charter for home rule (1897). He served as president of the first Puerto Rican cabinet but resigned in 1899, when the USA ended his country's short-lived autonomy. From 1910 to 1916 he was resident commissioner for Puerto Rico in Washington, DC. Considered the father of Puerto Rican nationalism, he was instrumental in gaining US citizenship for Puerto Ricans under the Jones Act, which was passed by Congress a few months after his death.

Munro, Alice, *originally* **Alice Anne Laidlaw** 1931–
Canadian short-story writer and novelist
She was born and brought up in Wingham, Ontario, and attended the University of Western Ontario. She wrote short stories from an early age, waiting until she was ready to write novels. To date, however, she has produced only one novel, *Lives of Girls and Women* (1971), whereas her many stories are recognized as among the finest of their kind. They are often set in rural and semi-rural Ontario, the landscape of her childhood, or feature women who have escaped from such backgrounds. Her many collections of stories include *Dance of the Happy Shades* (1968), *Something I've Been Meaning to Tell You* (1974), *The Progress of Love* (1987), *Selected Stories* (1996), *Hateship, Friendship, Courtship, Loveship, Marriage* (2002) and *Runaway* (2004). 🕮 Robert Thacker, *Alice Munro: Writing Her Lives: A Biography* (2005)

Munro, Hector Hugh, *pseudonym* **Saki** 1870–1916
British novelist and short-story writer
He was born in Burma, the son of a police inspector. Educated in England at Bedford Grammar School, he returned to Burma and joined the police force in 1893, but went to London in 1896 and took up writing for the *Westminster Gazette*. From 1902 he was the Balkans correspondent for the *Morning Post*. He settled in London again in 1908. He is best known for his short stories, humorous and macabre, which are highly individual, and full of eccentric wit and unconventional situations. Collections of his stories are *Reginald* (1904), *The Chronicles of Clovis* (1911) and *Beasts and Superbeasts* (1914). His novels *The Unbearable Bassington* (1912) and *When William Came* (1913) show his gifts as a social satirist of the upper-class Edwardian world. He was killed on the Western Front during World War I.

Munro, Sir Hugh Thomas 1856–1919
Scottish mountaineer
Born in London, he inherited the family estate near Kirriemuir. Although a fanatically keen traveller, he is remembered for his contribution to mountaineering. A founding member of the Scottish Mountaineering Club in 1889, he served as its president from 1894 to 1897. He compiled the first authoritative list of what have come to be known as 'Munros' when he published his *Tables of Heights over 3000 Feet* in the first issue of the *SMC Journal* in 1891. While 'Munro-bagging' has become a commonplace pastime, Munro himself never achieved the distinction of climbing all the peaks he listed, remaining two short at his death.

Munro, Neil 1864–1930
Scottish novelist and journalist
Born in Inveraray, Argyll, he worked in a law office before taking up journalism in Glasgow, where he became editor of the *Glasgow Evening News* (1918–27). He wrote romantic Celtic tales such as *The Lost Pibroch* (1896) and *Gilian the Dreamer* (1899), and historical Highland novels, *John Splendid* (1898), *Doom Castle* (1901) and *The New Road* (1914). However, he is best known for his humorous tales about a Clyde puffer, published as *The Vital Spark* (1906) and collected as *Para Handy and Other Tales* (1931). His memoir, *The Brave Days*, was published posthumously in 1931. 🕮 G Blake, Introduction to *The Brave Days* (1931)

Münter, Gabriele 1877–1962
German Expressionist painter
Born in Berlin, she studied at the Women's Academy in Düsseldorf (1897), before travelling across the USA for three years. On her return, she attended classes under WASSILY KANDINSKY at his Phalanx School in Munich and travelled with him throughout Europe (1903–08). Whilst in France she became influenced by Fauvism and the work of PAUL GAUGUIN. She and Kandinsky settled in Murnau where she worked closely with two Russian artists, Von Werefkin and ALEXEI VON JAWLENSKY. Her relationship with Kandinsky ended in 1916 but she returned to painting in the late 1920s, and from 1945 until her death she promoted the work of the *Blaue Reiter* (Blue Rider) group.

Müntzer or **Münzer, Thomas** c.1488–1525
German religious reformer and Anabaptist
Born in Stolberg, he studied theology, and in 1520 began to preach at Zwickau. As he travelled more widely, his socialism and mystical doctrines led to conflict with the authorities. In 1525 he was elected pastor of the Anabaptists of Mülhausen, where his communistic ideas soon aroused the whole country. He joined the Peasants' Revolt of 1524–25, but was defeated at Frankenhausen, and executed. 🕮 Eric W Gritsch, *Reformer Without a Church: The Life and Thought of Thomas Muentzer, 1488?–1525* (1967)

Muqaddasi 945–88
Arab geographer, and pioneer of fieldwork
Born in Jerusalem, he travelled widely and described Moslem lands in a geographical compendium (985).

Murad IV 1612–40
Ottoman sultan
Born in Constantinople (Istanbul), he succeeded in 1623 on the deposition of his father, Mustafa I, when the state was in political and financial anarchy. A savage disciplinarian, he crushed a serious revolt among the janissaries (1632), and eliminated corruption in administration and justice. In 1638 he led an expedition against Persia (Iran), recapturing Baghdad, which had been taken by ABBAS I, THE GREAT, in 1624.

Murad, Ferid 1936–
US pharmacologist and Nobel Prize winner
Born in Whiting, Indiana, he studied at DePauw University, Indiana, and Western Reserve University, Ohio. He has held professorships at the University of Virginia (1975–81), Stanford University (1981–89), Northwestern University, Illinois (1988–96) and the University of Texas Medical School at Houston (1997–), and has been involved in commercial research and development of pharmaceuticals. He shared the Nobel Prize in physiology or medicine in 1998 (with ROBERT F FURCHGOTT and LOUIS J IGNARRO) for discoveries concerning nitric oxide as a signalling molecule in the cardiovascular system. Furchgott and Murad were awarded the Lasker Prize for the work in 1996.

Murakami Haruki 1949–
Japanese novelist
He was born in Kobe and educated in classics at Waseda University, Tokyo. He started his career by translating the works of modern US writers (RAYMOND CHANDLER and TRUMAN CAPOTE) into Japanese, and his own highly original novels are remarkable for being more influenced by the Americans than by his Japanese predecessors. Wild, surreal, mystical and often extremely funny, he is a bestselling author in Japan. Of his works available in English, *Hitsuji o meguru boken* (1982, Eng trans *A Wild Sheep Chase*, 1989) is a sort of detective novel in which a psychic detective searches for a war criminal, a woman with beautiful ears and a supernatural sheep with a star on its back. Other novels include *Noruwei no mori* (1987, Eng trans *Norwegian Wood*, 1989), which is a love story set in the 1960s, the trilogy *Nejimaki-dori kuronikuru* (1995, Eng trans *Wind-Up Bird Chronicle*, 1998) and *Umibe no Kafuka* (2002, Eng trans *Kafka on the Shore*, 2005).

Muralitharan, Muttiah 1972–
Sri Lankan cricketer
Born in Kandy, he is one of the most successful Test bowlers of all time and Sri Lanka's greatest player. A right-arm slow bowler, able to spin the ball prodigiously both ways, he made his Test debut in 1992 and has taken more ten-wicket hauls in Test matches than any other bowler. His unusual bowling action was the subject of some controversy until its legality was vindicated by extensive testing and technological analysis. In 2002, Wisden named him the greatest bowler of all time.

Murasaki Shikibu c.970–c.1015
Japanese writer
She was a member of the Fujiwara family, one of the most powerful aristocratic dynasties in Japan, but her real name is unknown: 'Shikibu Murasaki' is a later fictive construction. She was responsible for the *Genji Monogatari* (Eng trans *The Tale of Genji*, 1925–35), the first great work in Japanese. Complex, delicate and often sublimely beautiful, it far outclasses anything produced elsewhere in its day. 🕮 I I Morris, *The World of the Shining Prince* (1964)

Murat, Joachim 1767–1815
French soldier and King of Naples
He was born at La Bastide-Murat, Lot, the son of an innkeeper. He enlisted in the cavalry on the eve of the Revolution, and was promoted general during NAPOLEON I's Egyptian campaign (1799). He helped Napoleon become First Consul, married his sister, and replaced his brother, JOSEPH BONAPARTE, as King of Naples (1808). There he dismantled the huge landed estates, suppressed brigandage and encouraged cotton-growing. He

Murdoch, Dame (Jean) Iris 1919–99
Irish novelist, playwright and philosopher

Iris Murdoch was born in Dublin of Anglo-Irish parents. She was educated at Badminton School, Bristol, and Oxford, where she was Fellow and tutor in philosophy at St Anne's College (1948–63). She married the literary critic John Bayley (1925–) in 1956, and was made a DBE in 1987. Her life and relationship with Bayley were portrayed in the film *Iris* (2001).

She published a study of JEAN-PAUL SARTRE (who was, like her, both a novelist and a philosopher) in 1953 and two important but unfashionable philosophical works, much influenced by PLATO, *The Fire and the Sun* (1977) and *The Sovereignty of the Good* (1970). These deal with the relationships between art and philosophy, and between love, freedom, knowledge and morality. A later philosophical work is *Metaphysics as a Guide to Morals* (1992).

Her fiction, which was at first a secondary activity, is mostly concerned with the preoccupations of middle-class intellectuals and deals with the conflict of good and evil in the context of involved personal relationships, often attended by strange situations and incidents. The popularity of her work derives largely from her narrative skill in controlling tangled and shifting patterns of relationships, the ironic or even startling circumstances in which the characters find themselves, and the pervasive blend of realism and symbolism.

📖 Her first novel, *Under the Net*, framed round a male narrator, appeared in 1954, and was followed by a further 26 titles in the next 45 years, including *The Sandcastle* (1957), about a schoolmaster's relationship with a young artist; *The Bell* (1958), about the consecration of a bell by a lay community; *A Severed Head* (1961), a black comedy; *An Unofficial Rose* (1962); *The Red and the Green* (1965); *The Nice and the Good* (1968); *The Black Prince* (1973); *The Sea, The Sea* (1978), about an obsession with a childhood sweetheart, which won the Booker Prize; *Nuns and Soldiers* (1980); *The Good Apprentice* (1985); *The Book and the Brotherhood* (1987), about a group of Oxford intellectuals; *The Message to the Planet* (1989); and *The Green Knight* (1993).

She also wrote several plays, including *A Severed Head* (adapted with J B PRIESTLEY from her novel in 1963); *Servants and the Snow* (1970); *The Two Arrows* (1972); and *Art and Eros* (1980); and a book of poetry, *The Year of the Birds* (1978).

One of the finest writers of her generation, she spent her final years suffering from Alzheimer's disease.

📖 D Johnson, *Iris Murdoch* (1987); A S Byatt, *Degrees of Freedom* (1965).

'All our failures are ultimately failures in love.'

– From *The Bell*.

commanded Napoleon's cavalry during the 1812 invasion of Russia, but resigned his commission (1812) to try and rescue Naples. He supported Napoleon after his defeat (1813) but, defeated by the Austrians at Tolentino (1815), he was eventually captured and executed by the troops of FERDINAND I. 📖 A Hilliard Atteridge, *Joachim Murat, Marshal of France and King of Naples* (1911)

Murchison, Sir Roderick Impey 1792–1871
Scottish geologist
Born in Tarradale, Ross-shire, he devoted himself to geology after leaving the army in 1816. He established the Silurian system (1835) and, with ADAM SEDGWICK, the Devonian system. From 1840 to 1845, with others, he carried out a geological survey of the Russian empire. Struck with the resemblance between the Ural mountains and Australian chains, he foreshadowed the discovery of gold in Australia (1844). Murchison Falls (Uganda) and Murchison River (Western Australia) are named after him. In 1855 he was made director-general of the Geological Survey and director of the Royal School of Mines. His principal works were *The Silurian System* (1839) and *The Geology of Russia in Europe and the Urals* (1845).

Murdoch, Dame Iris *See panel above*

Murdoch, (Keith) Rupert 1931–
US newspaper publisher
He was born in Melbourne, Australia, and educated at Geelong Grammar School and Oxford, where he was active in Labour politics. When his father died in 1952 he inherited the Adelaide *News* and, employing shrewdly the experience gained at the *Daily Express* in London, he soon made it a success. He became in the space of a decade Australia's second largest publisher and began to set his sights on expansion abroad. First he acquired the *News of the World* in London in 1969, which at the height of the PROFUMO scandal had a circulation of six million. Then, at the end of the same year, he bought *The Sun*. Denounced for its puerile taste, including the introduction of daily 'page 3' girls, *The Sun* defied its critics and maintained its lead in the circulation war. In 1981 he struck at the heart of the English Establishment when his British subsidiary company, News International, acquired *The Times* and *The Sunday Times* after a bitter struggle. In 1989 he bought the book publishers Collins and inaugurated Sky Television (now BSkyB), a satellite television network. He moved into the US market in 1976 with the purchase of the New York *Post*, and then acquired numerous other US publications, including the *Village Voice*, *New York* magazine and *TV Guide*, as well as Twentieth Century Fox film studios. He created a successful television network, the Fox Network, and in 1996 bought New World Communications, becoming the owner of television stations that reached up to 40 per cent of US viewership. His company, News Corporation, continues to expand into new markets, notably China. He has been a US citizen since 1985. 📖 J Tucille, *Rupert Murdoch* (1989)

Murdock, George Peter 1897–1985
US cultural anthropologist
Born in Meriden, Connecticut, he studied history at Yale and taught there (1928–60), and was Mellon Professor of Anthropology at Pittsburgh University (1960–71). He initiated the cross-cultural survey, later known as the 'human relations area files', as an instrument of sociological and anthropological generalization. His best-known work is *Social Structure* (1949), which focuses on family and kinship organization, seeking sets of functionally interrelated traits in a wide range of societies.

Murdock, William 1754–1839
Scottish engineer
Born in Lugar, Ayrshire, he worked with his father, a millwright, and then with MATTHEW BOULTON and JAMES WATT of Birmingham, by whom he was sent to Cornwall to erect mining engines. At Redruth he constructed the model of a high-pressure engine to run on wheels (1784), introduced labour-saving machinery, a new method of wheel rotation, an oscillating engine (1785), and a steam-gun. He also improved Watt's engine. He was a pioneer of coal gas for lighting and his distillation of coal gas began at Redruth in 1792, when he illuminated his own home with it. Successful experiments were made at Neath Abbey in 1796, but it was not until 1803 that Boulton's engineering works at Soho were lighted with gas.

Mure, Sir William 1594–1657
Scottish poet
Born in Rowallan, Ayrshire, he was a staunch Protestant and Royalist. He was wounded at Marston Moor (1644), but later led his regiment at Newcastle (1644). He wrote a long religious poem, *The True Crucifixe for True Catholikes* (1629), a version of the Psalms (1639), and some love and courtly poems. *The Cry of Blood and of a Broken Covenant* (1650) is a poem on behalf of the Covenanters' cause. He also translated parts of VIRGIL's *Aeneid*.

Murger, Henri 1822–61
French writer
Born in Paris, he began life as a notary's clerk, and, devoting his time to literature, led the life of privation and adventure described in his first and best novel, *Scènes de la vie de Bohème* (1845, Eng trans *The Bohemians of the Latin Quarter*, 1887), the basis of PUCCINI's opera, *La Bohème*. During his later years he led a dissipated life and wrote slowly and fitfully. His other prose works include *La Vie de jeunesse* (1861, 'The Youthful Life') and *Le Pays Latin* (1861, 'Latin Country'). His poems, *Les Nuits d'hiver* (1862, Eng trans *Winter Nights*, 1923), are graceful and often deeply pathetic, and several were translated by ANDREW LANG in his *Lays of old France*. 📖 R Baldick, *The First Bohemian* (1961)

Murillo, Bartolomé Esteban 1618–82
Spanish painter
He was born in Seville and spent most of his life there. He painted eleven remarkable pictures for the convent of San

Francisco in 1645, which made his name. In 1660 he founded the Academy of Seville, of which he became first president. He frequently chose the Immaculate Conception or the Assumption of the Virgin as a subject, and treated them much alike. In 1681 he fell from a scaffold when painting an altarpiece at Cadiz, and died soon afterwards. His pictures naturally fall into two groups – scenes from low life, such as gypsies and beggar children (mostly executed early in his life), and religious works.

Murnau, F W, *originally* **Friedrich Wilhelm Plumpe** 1888–1931
German film director
Born in Bielefeld, Germany, he studied philology in Berlin, and art history and literature at Heidelberg, and was briefly an actor with MAX REINHARDT's theatre troupe before World War I. A combat pilot, he crash-landed in Switzerland during 1917. Returning to Germany two years later, he founded the Murnau Veidt Filmgesellschaft and made his directorial debut with *Der Knabe in Blau* (1919, 'The Boy in Blue'). Experimenting with the mobility of the camera, his expressive use of light and shade heightened the menace in such macabre works as *Der Januskopf* (1920, *Janus-Faced*, a version of *Dr Jekyll and Mr Hyde*), and *Nosferatu* (1922, a chilling and faithful rendition of the Dracula story). After a successful trio of films with actor EMIL JANNINGS, including *Der Letzte Mann* (1924, *The Last Laugh*), he moved to the USA and made *Sunrise* (1927), a tale of a young rural couple whose love is threatened by the sophistication of the big city, which won three of the first-ever Academy Awards. He had just completed the much-praised South Seas documentary *Tabu* (1931) before his death in a car crash.

Murphy, Arthur 1727–1805
Irish actor and playwright
Born in Clomquin, Roscommon, he was educated at St Omer, and from 1747 to 1751 worked as a clerk in Cork and then London. From 1752 to 1774 he published the weekly *Gray's Inn Journal*, through which he met Dr JOHNSON. Murphy turned to the stage to pay off his debts, and in 1758 produced *The Upholsterer*, a successful farce. The previous year he had entered Lincoln's Inn, and in 1762 he was called to the Bar, but he continued to write farces and adaptations for the stage. His translation of TACITUS (1793) is excellent, unlike his *Essay on Johnson* (1792) and *Life of David Garrick* (2 vols, 1801). 🕮 J P Murphy, *Arthur Murphy* (1946)

Murphy, Dervla 1931–
Irish travel writer
Born in Cappoquin, County Waterford, she left school early to look after her invalid mother. Reading avidly, after her mother's death (1962) she cycled to India to work with Tibetan refugees. Her first two books, *Full Tilt* (1965) and *Tibetan Foothold* (1966), financed further journeys to Nepal and Ethiopia. With her daughter Rachel (1968–) she subsequently made several long journeys in southern India, trekking through the Karakoram Mountains and 1,300 miles along the Andes. Her other books include *A Place Apart* (1978), *Muddling Through in Madagascar* (1985), *South from the Limpopo* (1997) and *Through Siberia by Accident* (2005). She has also written books on subjects closer to home, including Northern Ireland, racial conflict and the nuclear controversy.

Murphy, Eddie (Edward Regan) 1961–
US comedian and film actor
Born in the Bushwick section of Brooklyn, New York City, he became a stand-up nightclub comic in Long Island. He first came to national prominence on the television show *Saturday Night Live* (1980–84). His debut in the film *48 Hrs* (1982) was followed by several box-office hits including *Trading Places* (1983) and *Beverly Hills Cop* (1984). Subsequent films, which have seen him shift from edgy, outspoken roles to family fare, include *Coming to America* (1988), *Harlem Nights* (1989), which he also directed, *Boomerang* (1992), *The Nutty Professor* (1996), *Doctor Doolittle* (1998), and *Nutty Professor II: The Klumps* (2000); he also voiced the part of Donkey in *Shrek* (2001) and its sequels. His popular recordings, both comedy and musical, include *Eddie Murphy Comedian* (1983) and *How Could it Be?* (1985).

Murphy, Emily Gowan, *pseudonym of* **Janey Canuck**, *née* **Ferguson** 1868–1933
Canadian journalist and feminist
Born in Cookstown, Ontario, she was educated at Bishop Strachan School, Toronto. On moving to Edmonton, Alberta, in 1907, she became involved in the women's movement and campaigned with Nellie McClung for legal reform which would entitle a wife to one third of her husband's property (The Dower Act, 1911). In 1916 she became the first woman in the British Empire to be appointed magistrate but this was opposed on the grounds that she was a woman. She was the president of the Canadian Women's Press Club (1913–20) and was literary editor of *The Winnipeg Telegram* and *Edmonton Journal*. She published many books, including *The Impressions of Janey Canuck Abroad* (1902), *Open Trails* (1912) and *Black Candle* (1922).

Murphy, Graeme Lloyd 1950–
Australian dancer, choreographer and ballet director
Born in Melbourne, he trained at the Australian Ballet School, the youngest boy ever to enter, and subsequently joined the company. Dance studies in New York were succeeded by six months as a member of Sadler's Wells Royal Ballet. He worked as a freelance choreographer in 1975 before rejoining Australian Ballet as a dancer and resident choreographer. Appointed artistic director of Sydney Dance Company in 1976, he created dances which feature an eclectic range of subjects and styles, all rooted in the classical idiom. Recognized internationally, he choreographed BENJAMIN BRITTEN's *Death in Venice* for the Canadian Ballet in 1984, created *Vast*, an Australian bicentennial performance featuring Australian Dance Theatre, Queensland Ballet, West Australian Ballet and his own troupe in 1988, and has led the Company on over 20 international tours.

Murphy, Paul Peter 1948–
Welsh Labour politician
Born in Usk, Gwent, he was educated at Oxford University and worked as a lecturer in government and history before entering parliament as MP for Torfaen in 1987. He served as opposition front bench spokesman for Wales (1988–94), on Northern Ireland (1994–95), on Foreign Affairs (1995) and on Defence (1995–97), and then became Minister of State in the Northern Ireland Office (1997–99). He was appointed Secretary of State for Wales in 1999, and remained in this position until 2002, when he returned to Northern Ireland as Secretary of State. In 2005, he became chairman of the Intelligence and Security Committee.

Murphy, William Parry 1892–1987
US physician and Nobel Prize winner
He was born in Stoughton, Wisconsin, and educated at the University of Oregon and Harvard Medical School. Although postgraduate training encouraged his interest in clinical research, Murphy entered private practice, working part-time at Harvard with GEORGE RICHARDS MINOT (from 1925) in their investigation of the effect of raw liver in the diets of patients diagnosed as suffering from pernicious anaemia. He was awarded the 1934 Nobel Prize in physiology or medicine jointly with Minot and GEORGE WHIPPLE, but his research career never flourished. He worked on the standardization of liver extract preparations, but continued in private practice and fell out with Minot over what he interpreted as the latter's lack of support for him.

Murphy-O'Connor, Cormac 1932–
English prelate and cardinal
Born in Reading, Berkshire, he was educated at Prior Park College, Bath, and at the Venerable English College and Gregorian University in Rome. He was ordained a priest in 1956, serving parishes in Portsmouth and Fareham, and became Rector at the Venerable English College in Rome (1971), Bishop of Arundel and Brighton (1977) and ultimately Archbishop of Westminster (2000) in succession to the late BASIL HUME. He was created a cardinal in 2001. In 2000 he stirred up controversy when he opened up the prospect of Roman Catholic priests one day being allowed to marry. His book *The Family of the Church* was published in 1984.

Murrant, Harry Harbord *See* MORANT, HARRY HARBORD

Murray, Andrew 1828–1917
South African religious leader and writer
Born in Graaff-Reinet, and educated in Aberdeen and Utrecht, he was ordained a minister in the Scottish Dutch Reformed Church and posted to a vast frontier parish. Later, prompted by a national religious revival that started in his Worcester, Cape Colony, pastorate in 1860, he became an evangelistic preacher, holding meetings throughout South Africa, Europe, and the USA, from 1879. His emphasis on prayer and personal holiness was expounded in *With Christ in the School of Prayer* (1885), *The Spirit of Christ* (1888), *The Full Blessing of Pentecost* (1907), and numerous other books and pamphlets. He also took a keen interest in the welfare of Africans, opposed both to Afrikaner nationalism and British colonialism.

Murray, Andrew 1987–
Scottish tennis player
Born in Glasgow, he won the US Open boys' title at 17. A year later he made his playing debut for Britain in the Davis Cup, winning a doubles match with David Sherwood to help his team defeat Israel 3–2. In 2006 he won his first ATP Tour event, the SAP Open in San José, defeating Andy Roddick (1982–) and Lleyton Hewitt (1981–) in the process. In the same year he edged past TIM HENMAN to become Britain's number-one ranked singles player, and also earned a place in the world's top 20.

Murray, Lord George c.1700–1760
Scottish Jacobite soldier
Son of the Duke of Atholl, he took part in the Jacobite risings of 1715 and 1719 and fled to France, but was pardoned in 1726. In 1745 he joined the Young Pretender (Prince CHARLES EDWARD STUART), and was one of his generals. He won a victory at Prestonpans (September 1745), and conducted a masterly retreat from Derby. He opposed the decision to fight at Culloden, but commanded the right wing. He resigned the next day, escaped abroad, and died in Holland.

Murray, George Gilbert Aimé 1866–1957
Australian classical scholar and writer
Born in Sydney, he went to England at the age of eleven, and was educated at the Merchant Taylors' School and Oxford. He was professor of Greek at Glasgow (1889–99) and Regius Professor of Greek at Oxford (1908–36). His work as a classical historian and translator of Greek dramatists brought him acclaim as the foremost Greek scholar of his time. His celebrated verse translations of Greek plays, including *The Trojan Women*, *Bacchae*, *Medea* and *Electra*, were performed at London's Court Theatre from 1902. His many works on classics include *History of Ancient Greek Literature* (1897), *The Rise of the Greek Epic* (1907) and *Five Stages of Greek Religion* (1913). He was president of the League of Nations Union (1923–38) and was appointed to the Order of Merit in 1941. His brother, Sir (John) Hubert Plunkett Murray (1861–1940) was lieutenant-governor of Australia from 1908 until his death. He was respected by the Papuans, and wrote *Papua, or British New Guinea* (1912) and *The Papua of Today* (1925). 🕮 F West, *Gilbert Murray* (1984)

Murray, Sir James Augustus Henry 1837–1915
Scottish philologist and lexicographer
Born in Denholm in the Scottish Borders, he was for many years a schoolmaster at Mill Hill school. His *Dialects of the Southern Counties of Scotland* (1873) established his reputation. The great work of his life, the editing of the Philological Society's *New English Dictionary* (later called the *Oxford English Dictionary*), was begun at Mill Hill (1879), and completed (1928) at Oxford. Murray himself edited about half the work, and he created the organization and the inspiration for completing it. 🕮 K M Elisabeth Murray, *Caught in the Web of Words: James A H Murray and the 'Oxford English Dictionary'* (1979)

Murray, Jenni(fer) Susan, *née* **Bailey** 1950–
English journalist
Born and raised in Barnsley, Yorkshire, she studied French and drama at Hull University. She began her career at BBC Bristol (1973), then worked for BBC TV South (1978–82) and for the current affairs programmes *Newsnight* (1982–85) and *Today* (1985–87). In 1987, she became presenter of BBC Radio 4's *Woman's Hour*, where she soon established herself as an incisive and engaging broadcaster. She has also made stand-alone television documentaries including *Women in Politics* (1989) and written for newspapers including the *Daily Mail* and *The Express*. She was awarded the OBE in 1999. Her books include *That's My Boy!* (2003).

Murray, Sir John, *known as* **Murray of Broughton** 1715–77
Scottish Jacobite soldier
He was born in Peeblesshire. Educated at Edinburgh and Leyden, he visited Rome and made contact with the Jacobite court. He was Prince CHARLES EDWARD STUART's secretary during the 1745 Rising, but, captured after Culloden, saved his life by betraying his fellow Jacobites. He succeeded as baronet in 1770.

Murray, John 1741–1815
US theologian
Born in Alton, Hampshire, England, he converted to Universalism in 1759. He went to America in 1770, where he preached the doctrine of universal salvation and became known as the 'father of American Universalism'. In 1779 he became the first pastor of the new Independent Church of Christ in Gloucester, Massachusetts.

Murray, John, *originally* **John McMurray** 1745–93
Scottish publisher
He was born in Edinburgh and in 1768 bought Sandy's bookselling business in London, and published the *English Review*, DISRAELI's *Curiosities of Literature*, and other works. His son, John (1778–1843), carried the business from Fleet Street to Albemarle Street, launched the *Quarterly Review* which first appeared in 1809, and began the 'Family Library' in 1829. His grandson, John Murray the third (1808–92), issued the works of DAVID LIVINGSTONE, GEORGE BORROW, CHARLES DARWIN, SAMUEL SMILES, and *Handbooks for Travellers* (begun 1836). His great-grandson, Sir John Murray (1851–1928), absorbed Smith, Elder & Co in 1917, edited EDWARD GIBBON's *Autobiography* and BYRON's letters, and began the publication of the *Letters of Queen Victoria*, which was completed by his own son, also John (1884–1967).

Murray, Sir John 1841–1914
Canadian marine biologist
Born in Cobourg, Ontario, of Scottish parents, he was educated in Canada and at Edinburgh University. During visits to the Arctic islands on a whaler, he made collections of marine organisms, and was then appointed one of the naturalists to the *Challenger* expedition (1872–76) which explored all of the oceans of the world. He assisted in the editing of the *Challenger Reports*, and was in charge of the important biological collection from the expedition maintained at Edinburgh University. Among his publications are a narrative of the expedition and *The Depths of the Ocean* (1912, with J Hjort). Murray also surveyed the depths of the Scottish freshwater lakes. Knighted in 1898, he is considered one of the founders of oceanography.

Murray, Joseph Edward 1919–
US surgeon and Nobel Prize winner
He was born in Milford, Massachusetts, and educated at Harvard Medical School. He then joined the Peter Bent Brigham Hospital in Boston, where he became chief plastic surgeon (1951–86). In 1954 Murray and his colleagues first successfully transplanted a kidney between identical twins, which greatly stimulated clinical and laboratory studies. He subsequently conducted successful transplants between non-identical twin brothers, and later used an unrelated kidney, testing X-rays and drugs as suppressants of immunological reactions. By 1962 the X-ray and drugs techniques were shown to be successful, and soon kidney transplants became common, with systems established for finding donors. He was also chief plastic surgeon at the Children's Hospital Medical Center in Boston (1972–85) and became professor of surgery at Harvard Medical School in 1970 (now emeritus). He was awarded the 1990 Nobel Prize in physiology or medicine with DONNALL THOMAS and published his autobiography, *Surgeon of the Soul: Reflections on a Curious Career*, in 2001.

Murray (of Epping Forest), Len (Lionel) Murray, Baron 1922–2004
English trade union leader
Born in Shropshire, he studied at London University but his studies were interrupted by World War II and completed at New College, Oxford, in 1947 when he joined the staff of the Trades Union Congress (TUC). He progressed from the economic department to become Assistant General Secretary (1969–73) and then General Secretary (1973–84). He played a major role in the 'social contract' partnership between the TUC and the Labour governments of HAROLD WILSON and JAMES CALLAGHAN (1974–78), but was unable to secure wage restraint from the unions, leading to the 'Winter of Discontent' and the Conservative Party's election victory in 1979. He recognized that the strength of trade unionism was in its ability to represent its affiliated unions and their members, most of whom had supported MARGARET THATCHER, and refused to contravene new labour laws in 1983 by supporting illegal strike action. He stepped down from his TUC position in September 1984, during the miners' strike. He was made a life peer in 1985.

Murray, Les(lie Allan) 1938–
Australian poet, critic and editor
Born in Nabiac, New South Wales, he grew up on a dairy farm, then attended Sydney University, but left without graduating. His poetry, which has made him one of Australia's leading literary figures, is revered for its perceptive evocation of rural life. His verse includes *The Ilex Tree* (1965, with Geoffrey Lehmann), *The Weatherboard Cathedral* (1969), a verse-novel in 140 sonnets called *The Boys Who Stole the Funeral* (1980), *The Vernacular Republic: Poems 1961–1981* (1982), *Translations*

from the Natural World (1992), for which he received his fifth National Book Council poetry prize, *Subhuman Redneck Poems* (1996), which won the T S Eliot prize for poetry in 1997, the verse-novel *Fredy Neptune* (1998), *New Collected Poems* (2003) and *The Biplane Houses* (2006). He was the editor of the *New Oxford Book of Australian Verse* from 1985 to 1997. In 1989 he was made an Officer of the Order of Australia (AO), and in 1999, in spite of his republican views, he was awarded the Queen's Gold Medal for poetry. 🕮 Peter Alexander, *Les Murray: A Life in Progress* (2000)

Murray, Lindley 1745–1826
US grammarian
Born in Swatara Creek, Pennsylvania, he practised law, made a fortune in New York during the American Revolution and then, for health reasons, retired to England in 1784 and bought an estate near York. His *English Grammar* (1795) was for long the standard text, and was followed by *English Exercises*, the *English Reader*, and various religious works.

Murray, Matthew 1765–1826
English inventor and mechanical engineer
Born near Newcastle upon Tyne, he was apprenticed to a blacksmith at the age of 14, and in 1788 moved to Leeds as a qualified mechanic. He devised and patented several improvements in flax-spinning machinery before establishing his own engineering works in 1795, where he manufactured textile machinery and also steam engines of his own design. When JAMES WATT's master patent expired in 1800, Murray was one of the first to make significant improvements to the steam engine, his designs being smaller, lighter, more efficient and easier to assemble. His success and the rapid expansion of his firm led to an intense rivalry with the firm of Boulton & Watt. There is no doubt that he was a more versatile engineer than Watt himself, making use of the new powers of steam in locomotives and ships as well as stationary engines.

Murray, William Staite 1881–1962
English potter
He worked for ten years on a bulb plantation in the Netherlands, but returned to England in 1908. He studied pottery at Camberwell School of Art and began working as a potter at Yeoman's Row, South Kensington, in 1919. He worked at Brockley in Kent and Bray in Berkshire, and then taught at the Royal College of Art, where he became head of the Pottery School in 1926. He taught pottery as a fine art medium, placing on it as much importance as on painting and sculpture. He lived in Rhodesia from 1939.

Murrow, Edward R, *originally* **Egbert Roscoe Murrow** 1908–65
US journalist and broadcaster
Born in Pole Creek, North Carolina, he first visited Europe as assistant director of the Institute of International Education (1932–35). Joining CBS in 1935, he returned to Europe in 1937 to report on cultural items, but he extended his brief to political matters and reported on wartime Great Britain. In post-war USA he became a producer and presenter of current affairs programmes such as *See It Now* (1951–58) and *Person to Person* (1953–60). His courageous questioning of Senator JOSEPH MCCARTHY in 1954 contributed to the latter's fall from grace and he received five Emmy awards between 1953 and 1958. He later became director of the US Information Agency (1961–64). The recipient of numerous international distinctions, he was awarded an honorary KBE in 1964. 🕮 A M Spencer, *Murrow: His Life and Times* (1986)

Murry, John Middleton 1889–1957
British writer and critic
Born in Peckham, London, he was educated at Christ's Hospital and at Brasenose College, Oxford. He wrote some poetry and many volumes of essays and criticism which had a strong influence on the young intellectuals of the 1920s. In 1911 he met KATHERINE MANSFIELD, whom he married in 1918, and introduced her work in *The Adelphi*, of which he was founder and editor from 1923 to 1948. He also produced posthumous selections from her letters and diaries, and a biography in 1932. He edited the *Athenaeum* (1919–21). He became a pacifist and was editor of *Peace News* from 1940 to 1946. Towards the end of his life he became interested in agriculture, and started a community farm in Norfolk. His major works include critical studies on *Keats and Shakespeare* (1925), his friend *D H Lawrence* (1931), *William Blake* (1933) and *Swift* (1954). He also wrote religious works, including *The Life of Jesus* (1926). He published his autobiography, *Between Two Worlds*, in 1935. 🕮 F A Lea, *The Life of John Middleton Murry* (1959)

Musa, Said Wilbert 1944–
Belizean politician
Born in San Ignacio, Belize, he was educated at St John's College, Belize City, and studied law at Manchester University, England. He was called to the Bar in London in 1966 and subsequently worked as a lawyer in both London and, from 1967, in Belize. He was elected president of the Public Service Union in 1969 but was subsequently forced to retire from public service because of his political activities. As a member of the People's United Party (PUP) he was appointed a senator in the National Assembly in 1974 and entered the House of Representatives in 1979, representing Fort George. He served as Attorney-General and Minister for Education, Sports and Culture (1979–84) and as Minister of Foreign Affairs, Economic Development and Education (1989–93), in which capacity he negotiated Guatemalan recognition of Belize's independence. Having led the PUP in opposition (1996–98), he was elected prime minister and Minister of Finance and Foreign Affairs in 1998, and again in 2003.

Musaeus 5th–6th century
Greek epic poet
He was the author of *Hero and Leander*, which has been translated into many languages. 🕮 M H Jellinek, *Die Sage in der Dichtung* (1890)

Musa ibn Nusayr or **Nosair** 640–717
Arab soldier
He conquered northern Africa from 699 to 709 and Spain in 712, fell into disfavour with the caliph of Damascus, and died in poverty in the Hejaz.

Musäus, Johann Karl August 1735–87
German writer
He was born in Jena, studied theology there, and in 1770 became professor at the Weimar gymnasium. His first book, *Der deutsche Grandison* (1760), was a parody of SAMUEL RICHARDSON's *Sir Charles Grandison*, and in 1778–79 he satirized JOHANN LAVATER in *Physiognomische Reisen* (Eng trans *Physiognomical Travels*, 1800). However, his fame rests on his German popular tales (*Volksmärchen der Deutschen*, 1782–86, Eng trans *Popular Tales of the Germans*, 1791), which claimed, falsely, to be a collection made from traditional stories told by old people; although artificially naive, they contain some satirical humour and graceful writing. 🕮 A Richli, *Johann Musäus* (1957)

Museveni, Yoweri Kaguta 1944–
Ugandan soldier and politician
After graduating at Dar es Salaam University he worked for President MILTON OBOTE until his overthrow, in 1971, by IDI AMIN. From exile in Tanzania he formed the Front for National Salvation and, fighting with the Tanzanian army, took part in the defeat and expulsion of Amin in 1979. He became Minister of Defence in the governments of Yusuf Lule and Godfrey Binaisa (1979–80) but was in disagreement with Obote, who returned to the presidency in 1980 but only retained power with the help of Tanzanian troops. When these withdrew in 1982, a virtual civil war ensued and reasonable normalcy did not return until 1986 when Museveni became president, pledging himself to follow a policy of national reconciliation. In 1996 he restored tribal leaders 26 years after they were abolished but denied them their former political power. Later that year he was re-elected president, and was re-elected again in 2001. After constitutional changes were implemented, he won Uganda's first multi-party elections in 2006. Despite a Supreme Court ruling that the elections had been marred by corruption and fraud, the result was upheld.

Musgrave, Thea 1928–
Scottish composer
Born in Edinburgh, she studied at Edinburgh University, the Paris Conservatoire, and with NADIA BOULANGER. Her early work was largely Scottish in inspiration: her *Suite o' Bairnsangs* (1953) and the ballet *A Tale for Thieves* (1953), were followed by *Cantata for a Summer's Day* (1954), a chamber opera, *The Abbot of Drimock* (1955) and her *Scottish Dance Suite* (1959). In the late 1950s her work became more abstract, and she began to use serial and aleatory devices. Her music includes two choral and orchestral works, *The Phoenix and the Turtle* (1962) and *The Five Ages of Man* (1963), a full-length ballet, *Beauty and the Beast* (1968), works for instruments and pre-recorded tapes, the chamber opera *The Voice of Ariadne* (commissioned for the Aldeburgh Festival of 1974), the operas *The Decision* (1964–65), *Mary, Queen of Scots* (1977), *A Christmas Carol* (1979) and *Simón Bolívar* (1993), the radio opera *An Occurrence at Owl Creek Bridge* (1981), and the orchestral works *The Seasons* (1988)

and *Rainbow* (1990). Later works include *On the Underground* (1994), for voice, *Helios* (1995), an oboe concerto, the orchestral work *Phoenix Rising* (1997) and *Lamenting with Ariadne* (2000). She was awarded the CBE in 2002.

Musharraf, Pervez 1943–
Pakistani soldier and politician
Born in New Delhi, India, he moved with his family to Karachi, Pakistan, in 1947. He joined the Pakistani army in 1964 and fought with distinction against India in 1965 and again, as a commando, in 1971. He was appointed commander-in-chief of the army in 1998 and after leading a military coup in 1999 assumed power as president of Pakistan, adopting a relatively moderate, reformist stance. In 2001, after some hesitation, he aligned the country with the West in the campaign against Muslim terrorists based in neighbouring Afghanistan; this angered the domestic opposition, and he became the target of several assassination attempts. He held a landmark meeting with the Indian prime minister ATAL BEHARI VAJPAYEE in 2004 in order to break the deadlock over disputed territory in Kashmir. Although he is generally regarded as progressive and modernizing, recent disclosures relating to nuclear proliferation in Pakistan have raised concerns about his administration.

Mushet, David 1772–1847
Scottish ironmaster
He was born in Dalkeith, near Edinburgh. Like many of his contemporaries he was continually experimenting with new materials and processes in the search for better and cheaper iron and steel. He discovered black band ironstone at Calder ironworks near Glasgow (1801) and maintained against strong opposition that it was suitable for smelting. After the invention of the hot blast process by JAMES BEAUMONT NEILSON in 1828 it became widely used in the Scottish iron industry. He showed that non-phosphoric oxides of iron could be used to make better quality wrought iron, patented a process for making cast steel from wrought iron, and discovered the beneficial effects of adding manganese to iron and steel. He moved from Scotland (1805) to Derbyshire and later to the Forest of Dean.

Mushet, Robert Forester 1811–91
English metallurgist
Born in Coleford, Gloucestershire, he assisted with and continued the researches of his father, DAVID MUSHET, into the manufacture of iron and steel. In 1856 HENRY BESSEMER patented his new steel-making process, but he soon encountered a major problem with the overoxidation or burning of the metal inside the converter, which removed most of the vital carbon. Working in the Forest of Dean, Mushet solved Bessemer's problem by adding his 'triple compound' (a type of high-carbon ferromanganese) and then later spiegeleisen. Only through his discovery (patented in 1856) did the Bessemer process become a commercial success. Ironically, Mushet's patent was allowed to lapse and his vital discovery became common property from which he derived little or no benefit. Bessemer repudiated the validity of Mushet's patent, and only later bestowed upon him a small pension. Mushet was much more successful with his invention of 'R Mushet's Special' steel in 1868, a self-hardening tungsten alloy steel which was later extensively produced in Sheffield, where it spawned a whole family of tool steels.

Musial, Stanley Frank, *known as* **Stan the Man** 1920–
US baseball player
Born in Donora, he was a talented left-handed hitter and played a record number of major league games (3,026) with the St Louis Cardinals (1941–63). He won the batting championship seven times and was voted the Most Valuable Player (MVP) three times. There is a lifesize statue of him in the Busch Stadium, St Louis. 🕮 Bob Broeg, *The Man Stan: Then and Now* (1977)

Musil, Robert 1880–1942
Austrian novelist
He was born in Klagenfurt, and trained as a scientist (he invented a chromatometer) and as a philosopher. During World War I he was an officer, and he drew on this experience for *Die Verwirrungen des Zöglings Törless* (1906, Eng trans *Young Törless*, 1955), a terrifying, sadistic story of life inside a military academy. Memorable though it is, it is eclipsed by *Der Mann ohne Eigenschaften* (1930–43, Eng trans *The Man Without Qualities*, 1953–60), his unfinished tour de force, left as a confusion of final drafts when he died suddenly in Geneva. Portraying a society on the brink, through the eyes of Ulrich, the man who has dispensed with conventional qualities, its multi-layered narrative covers just one year, 1913–14. It is widely acknowledged as one of the great novels of the century. 🕮 K Dinklage, *Robert Musil: Leben, Werk, Wirkung* (1960)

Muskie, Edmund Sixtus 1914–96
US politician and lawyer
Born in Rumford, Maine, he trained as a lawyer at Cornell Law School in Ithaca, New York, and was admitted to the Bar in 1939. A former member of the Maine House of Representatives (1947–51) and governor of Maine (1955–59), he represented his home state in the Senate (1959–80), and was the Democratic vice-presidential nominee in 1968. He served as Secretary of State in 1980–81 under President JIMMY CARTER.

Muspratt, James 1793–1886
British chemist and industrialist
Born in Dublin, Ireland, of British parents, he was apprenticed to a druggist and then fought in the Peninsular War, writing a record of his dramatic experiences. Back in Dublin he began a small chemical manufacturing business, but when the British salt tax was lifted he moved to Liverpool and began manufacturing soda ash by the LEBLANC process. The Liverpool district offered every advantage as both salt and coal were available locally and there were ships and canals to take the soda ash to the expanding industries of 19th-century Great Britain. Muspratt prospered and in 1828 he and Josias Gamble set up a new works at St Helens. In the mid-1800s Muspratt parted with Gamble and founded large new factories employing several thousands of people at Widnes and Flint.

Musschenbroek, Pieter van 1692–1761
Dutch physicist
He was born in Leyden. Professor of Physics at Duisburg, Utrecht, and Leyden (1740–61), he invented the pyrometer and in 1746 discovered the principle of the Leyden jar (an early form of capacitor).

Musset, (Louis Charles) Alfred de 1810–57
French poet and dramatist
Born in Paris, he found, after tentative study of law and medicine, that he had a talent for writing and at 18 published a translation of THOMAS DE QUINCEY's *Confessions of an English Opium Eater* (*L'Anglais mangeur d'opium*, 1828). His first collection of poems, *Contes d'Espagne et d'Italie* (1830, 'Tales of Spain and Italy'), won the approval of VICTOR HUGO. His first play, *La Nuit vénitienne* ('A Night in Venice'), failed at the Odéon in 1830, and from then on he conceived an 'armchair theatre' with plays intended for reading only. When *Un Caprice*, published in 1837, and several of his other 'armchair' plays were staged successfully more than ten years later, he wrote *On ne saurait penser à tout* (1849, 'You Can Never Think of Everything'), *Carmosine* (1850, Eng trans 1865) and *Bettine* (1851) for actual performance. In 1833 Musset had met GEORGE SAND, and there began the stormy love affair (1833–35), which is traced in his four volumes of *Nuits* (1835–37). Other works include the autobiographical poem *Confessions d'un enfant du siècle* (1835, Eng trans *The Confessions of a Child of the Century*, 1892) and *L'Espoir en Dieu* (1838, 'Hoping in God'). 🕮 Margaret Rees, *Alfred de Musset* (1971)

Mussolini, Benito Amilcare Andrea *See panel p1138*

Mussorgsky, Modest Petrovich, *also spelt* **Moussorgsky** or **Musorgsky** 1835–81
Russian composer
Born in Karevo (Pskov), he was educated for the army but resigned his commission in 1858 after the onset of a nervous disorder, and began the serious study of music under MILI BALAKIREV. A member of the GLINKA-inspired nationalist group in St Petersburg, which included ALEKSANDR DARGOMIZHSKY and RIMSKY-KORSAKOV, he first made a name with his songs, among them the well-known setting of GOETHE's satirical 'Song of the Flea' (1879). His most impressive work is the opera *Boris Godunov*, first performed at St Petersburg in 1874, and his piano suite *Pictures at an Exhibition* (1874, *Kartinki s vystavki*) has also maintained its standing in the concert repertoire. Other operas and large-scale works remained uncompleted as the composer sank into the chronic alcoholism which hastened his early death. His friend Rimsky-Korsakov undertook the task of musical executor, arranged or completed many of his unfinished works and rearranged some of the finished ones, sometimes to the detriment of their robust individuality.

Mustafa Kemal Atatürk *See* ATATÜRK, MUSTAPHA KEMAL

Muthesius, Hermann 1861–1927
German architect, writer and propagandist
Born in Gross-Neuhausen, Thuringia, he studied architecture in Berlin, practised in Tokyo, and from 1893 worked as a

Mussolini, Benito Amilcare Andrea 1883–1945
Italian dictator 1925–43

Mussolini was born in Predappio, near Forli, Romagna. He was the son of a blacksmith, and first worked as a teacher and a journalist. In 1902 he travelled to Switzerland, where he developed revolutionary beliefs, and in 1904 he returned to Italy. After a brief period of imprisonment for his political activities, he edited a socialist publication from Trento (which was then in Austria) and in 1912 became editor of the influential nationalist newspaper *Avanti*. He broke with the socialists when he refused to support their neutral stance in World War I, and founded *Il Popolo d'Italia* to publicize his belief that only by supporting the Allies could Italy retrieve the disputed Austrian territories.

Mussolini fought in World War I and was injured. In 1919 he founded the *Fasci di Combattimento* (Fascist Movement), ostensibly to serve the interests of neglected ex-servicemen, but in reality to promote the extreme form of nationalism to which he was now committed. The groups of fascist Blackshirts whose creation he encouraged were turned to his advantage against the Communists, and in 1921 he exploited his growing personal popularity to win election to the Chamber of Deputies; the following year his Blackshirts marched on Rome. He presented himself as the only man capable of restoring order to a country that seemed to be slipping ever more rapidly into political chaos. In October 1922 he was asked by VICTOR EMMANUEL III to form a government.

In 1925 he took the title *Il Duce* ('the leader'). Using a mixture of intimidation, patronage and propaganda, he was able to turn Italy into a totalitarian state by 1929. Despite his early aggression over Corfu and his fierce nationalism, his foreign policy was not marked by overt expansionism or aggression until the mid-1930s. However, in 1935 he launched the Conquest of Abyssinia which was followed by large-scale intervention in the Spanish Civil War on the side of General FRANCO. During this period he moved increasingly towards co-operation with HITLER, which culminated in the 1939 politico-military Pact of Steel (signed by GALEAZZO CIANO and JOACHIM VON RIBBENTROP) and eventually in the invasion of France in 1940. In 1939 Mussolini annexed Albania but the following year he failed to seize Greece. The arrival of German troops to assist in the conquest of Greece signalled the beginning of his dependence on Hitler, and from then on his actions were dictated largely by the needs of Berlin.

Dissatisfaction with this policy and a realization of the likely victory of the Allies persuaded many of his supporters to oppose him. After the allied landings in Sicily in 1942, even Mussolini's own Fascist Council turned on him, and he had to be rescued by German paratroops and taken to northern Italy in a doomed attempt to re-establish his authority. When that failed, he tried to flee the country with his mistress disguised as a German soldier, but was caught and unmasked by a member of the Italian resistance and summarily executed. His corpse was mutilated by the people after it was hung upside down in a public square in Como.

📖 A translation of his *Autobiography* was published in 1928, and memoirs of his wife, Rachele, *My Life with Mussolini*, in 1959. See also D Mack-Smith, *Mussolini* (1981).

> 'If I advance, follow me. If I retreat, kill me. If I die, avenge me.'
>
> – Said to senior officials after an attempt on his life, 6 April 1926.

Prussian government architect and editor of the official architectural journal. Attached to the German embassy in London from 1896 to 1903, he studied the developments taking place in British architecture and design. His reports and articles of that period were followed, on his return, by the three-volume study *Das Englische Haus* (1904–05), which was influential in Germany and remains an invaluable document of that time. With HENRI VAN DE VELDE he was one of the main initiators in 1907 of the Deutscher Werkbund (German Work Foundation), which, like the Bauhaus and its successors, led to the high design standards of contemporary German industry.

Mutola, Maria de Lurdes 1972–
Mozambican athlete
Born in Maputo, she was spotted playing football in a boys' team by the poet and sports enthusiast José Craveirinha (1922–2003), who then introduced her to middle-distance running. She competed in the 1988 Seoul Olympics, but her first major victory was not until the 1993 world championships, where she took gold in the 800m. She won further world gold medals at the same distance in 2001 and 2003, but possibly her greatest victory was at the 2000 Sydney Olympics, where she became her country's first Olympic gold medallist. In 2003 she became a youth ambassador to the United Nations.

Mutsuhito 1852–1912
Emperor of Japan
He was born in Kyoto, the son of the titular emperor, Komei, whom he succeeded in 1867. Within a year he had recovered the full powers of the emperors when, after a brief civil war, he overthrew the last of the shoguns, who had exercised dictatorial authority in Japan for 700 years. He was intelligent and energetic, and his long reign saw the rapid political and military westernization of Japan, under the initiative of the emperor himself. The feudal system was abolished (1871), most restrictions on foreign trade were removed, a constitution providing for an advisory cabinet and an Imperial Diet was promulgated (1889), and a navy was created on the British model and an army on the German. Military success against China (1894–95) was followed by Japan's victories in the Russo-Japanese War (1904–05) and by the economic penetration of Korea and Manchuria. When Mutsuhito died he was succeeded by his only son, Crown Prince YOSHIHITO. Assigned a posthumous title, in accordance with Japanese custom, Mutsuhito was styled Meiji Tenno.

Muybridge, Eadweard, *originally* **Edward James Muggeridge** 1830–1904
US photographer and inventor
Born in Kingston upon Thames, England, he emigrated to California in 1852 and became a professional photographer, and eventually chief photographer to the US government. He invented a shutter which allowed an exposure of 1/500 seconds, and using a battery of between 12 and 24 cameras, was able in 1877 to show that a trotting horse had all of its feet off the ground at times. In 1880 he devised the zoopraxiscope, a precursor of cinematography, in which the photographs were printed on a rotating glass disc. He employed this to demonstrate the trotting horse and after exhibiting it in his Zoopraxographical Hall in Chicago (1893) went on tour in the USA and Europe. In 1884–85 he carried out an extensive survey of the movements of animals and humans for the University of Pennsylvania, publishing the results as *Animal Locomotion* (1887). In 1900 he retired to his birthplace. 📖 Gordon Hendricks, *Eadweard Muybridge: The Father of the Motion Picture* (1975)

Muzorewa, Abel (Tendekayi) 1925–
Zimbabwean cleric and politician
Born in Umtali, Southern Rhodesia (Zimbabwe) and educated in Methodist schools in Southern Rhodesia and at theological college in the USA, he was ordained in 1963 and became a bishop of the United Methodist Church in Southern Rhodesia in 1968. Founder president of the African National Council (ANC) in 1971, he failed to hold together the differing elements of the nationalist movement and chose the path of an 'internal settlement' rather than guerrilla war. After the ANC won the first universal suffrage election in 1979, he was prime minister of 'Zimbabwe–Rhodesia' for a few months before the 1980 election swept ROBERT MUGABE into power. He was detained between 1983 and 1984 then fled to the USA in 1985, returning to Zimbabwe a year later. Since 1994 he has led the United Parties political opposition. His autobiography, *Rise Up and Walk*, was published in 1978.

Mwalimu *See* NYERERE, JULIUS KAMBARAGE

Mwinyi, Ndugu Ali Hassan 1925–
Tanzanian politician
Born in Zanzibar and educated at Mangapwani School and Dole School, and at Zanzibar Teacher Training College and Durham University, England, he worked as a teacher and head teacher. He then joined the Ministry of Education and, after working in a parastatal trading corporation on the mainland, entered the government of JULIUS NYERERE. He was appointed Minister of

State in the presidential office in 1972, and was later Minister for Health (1972–75), Minister for Home Affairs (1975–77), ambassador to Egypt (1977–81), and Minister for Natural Resources and Tourism (1982–83). In 1984 he was appointed president of Zanzibar, but he stepped down in 1985, when he succeeded Nyerere as president of the United Republic of Tanzania. He remained in office until 1995. His administration was characterized by the reversal of Nyerere's socialist policies and the adoption of multiparty elections in 1992; however, corruption and tax evasion remained widespread.

Myaskovsky, Nikolai Yakovlevich 1881–1950
Russian composer
Born in Novogeorgievsk, near Warsaw, he began a career as a military engineer, turning to music in 1907. His teachers included ANATOLI LIADOV and RIMSKY-KORSAKOV. After army service (1914–21) he became an influential professor of composition at the Moscow Conservatory. He composed 27 symphonies and other orchestral works, concertos for violin and cello, 13 string quartets and other chamber music, songs, nine piano sonatas and other works.

Myers, Frederic William Henry 1843–1901
English poet and essayist
The brother of Ernest James Myers, he was a classical scholar, and a school inspector (1872–1900). In 1882 he was one of the founders of the Society for Psychical Research. He wrote poems (collected 1921), essays, *Wordsworth* (1881) and *Human Personality and its Survival of Bodily Death* (1903).

Myerson, Goldie *See* MEIR, GOLDA

Myles, Lynda 1947–
Scottish film and television producer
Born in Arbroath, Angus, she became involved in the running of the Edinburgh International Film Festival whilst studying philosophy at Edinburgh University. She was its director from 1973 to 1980 and raised the event's international reputation through her championing of the New German Cinema, underappreciated Hollywood veterans and the new generation of US directors. She worked as curator of the Pacific Film Archive in California (1980–82), then returned to the UK and worked for Channel 4 and Enigma Films, where she produced the political thriller *Defence of the Realm* (1985). She was senior vice-president of European Production for Columbia Pictures before working for the BBC. Returning to independent film production, she has had success with *The Commitments* (1991, BAFTA Award), *The Snapper* (1993) and *The Van* (1996). In 1981 she received a BFI Special Award for services to the film industry.

Mylne, Robert 1734–1811
Scottish architect
Born in Edinburgh of a notable family of stonemasons, architects and engineers, he studied on the Continent and designed Blackfriars' Bridge (erected in 1769 and pulled down in 1868), and planned the Gloucester and Berkeley Ship Canal and the Eau Brink Cut for fen drainage at King's Lynn. His buildings, for example St Cecilia's Hall, Edinburgh (1763–65), show an elegance typical of the best late 18th-century work. His brother, William, designed the North Bridge in Edinburgh.

Mylne or **Miln, Walter** d.1558
Scottish Protestant reformer
While on a visit to Germany he was greatly influenced by Reformist doctrines, and later as priest of Lunan in Angus was denounced for heresy. Condemned by Cardinal DAVID BEATON to be burnt, he fled the country, but returned after the cardinal's death. Taken prisoner at Dysart, he was tried at St Andrews, and although by this time over 80 years old, he was burned at the stake, the last Scottish Protestant martyr.

Mylonas, George 1898–1988
Greek archaeologist
Born in Smyrna, he taught for many years in the USA and became president of the Archaeological Society of America. He was also secretary-general of the Greek Historical Society. His main excavation was at the Outer Grave Circle at Mycenae, and before that the Neolithic material at Olyathus, and the small Bronze Age site at Ayios Kosmas, near Athens Airport. He was also responsible for the building of a new museum at Mycenae.

Myrdal, Alva, *née* **Reimer** 1902–86
Swedish sociologist, politician and peace reformer, and Nobel Prize winner
Born in Uppsala, she was educated at the universities of Uppsala, Stockholm, and Geneva. In 1924 she married GUNNAR MYRDAL. A proponent of child welfare and equal rights for women, she was director of the United Nations Department of Social Sciences (1950–56). Appointed Swedish ambassador to India, Burma and Ceylon from 1955 to 1961, she was elected to the Swedish parliament in 1962, and was on the UN Disarmament Committee (1962–1973). As Minister for Disarmament and Church Affairs (1966–73) she played a prominent part in the international peace movement. Her works include *The Game of Disarmament: How the United States and Russia Run the Arms Race* (1977). She was awarded the 1980 Albert Einstein Peace prize, and in 1982 received the Nobel Prize in Peace, jointly with ALFONSO GARCÍA ROBLES.

Myrdal, (Karl) Gunnar 1898–1987
Swedish economist and politician, and Nobel Prize winner
He studied law, and then economics, at Stockholm, and taught economics at Stockholm from 1927 to 1950 and from 1960 to 1967. He wrote a classic study of race relations in the USA (*An American Dilemma*, 1944), then was Minister of Trade and Commerce in Sweden (1945–47), and then Executive Secretary of the UN Economic Commission for Europe (1947–57). His later works include *Beyond the Welfare State* (1960) and *The Challenge of Affluence* (1963). He was awarded the Nobel Prize in economics in 1974 (jointly with FRIEDRICH AUGUST VON HAYEK), principally for his work on the critical application of economic theory to Third World countries. 🕮 Walter A Jackson, *Gunnar Myrdal and America's Conscience: Social Engineering and Racial Liberalism, 1938–1987* (1990)

Myron 5th century BC
Greek sculptor
He was born in Eleutherae, and lived in Athens. A contemporary of PHIDIAS, he worked in bronze and is best known for the celebrated *Discobolos* (c.450 BC, Roman marble copy from bronze original, Museo della Terme, Rome) and *Maryas*.

Mytens, Daniel c.1590–1642
Flemish portrait painter
Born in The Hague, he worked for JAMES VI AND I and CHARLES I, who made him King's Painter. He painted portraits of many notable persons of the time.

N

Nabokov, Vladimir 1899–1977
US novelist
Born in St Petersburg, Russia, to aristocratic parents, he was educated at the relatively progressive Tenishev School, where he was accused of 'not conforming' to his surroundings. In 1919, following the Bolshevik Revolution, his family became émigrés, and he and his brother went to England to study, on scholarships to Cambridge. He then rejoined his family in Berlin (1922), where he lived for more than 15 years and published his first novels, among them *Korol', Dama, Valet* (1928, 'King, Queen, Knave') and *Otchayanie* (1936, 'Despair'). All were written in Russian, under the pseudonym V Sirin, the author himself later collaborating on English translations. From 1937 to 1940 he was in Paris, where he met JAMES JOYCE, and he then emigrated to the USA where he took citizenship in 1945. He taught at Wellesley College and Cornell University, and earned distinction as a lepidopterist. He began to write in English and published many short stories and novels, including *Bend Sinister* (1947) and *Pale Fire* (1962). *Lolita* (1955) was a succès de scandale and allowed him to abandon teaching and devote himself to writing full-time. From 1959 he lived in Montreux in Switzerland. Among 20th-century novelists he is regarded for his linguistic ingenuity and dazzling intellect. His other works include *Lectures on Literature* (1980) and a translation of ALEXANDER PUSHKIN's *Eugene Onegin* (1963). 🕮 A Field, *Vladimir Nabokov, the life and art* (1977)

Nabuco (de Araújo), Joaquim Aurélio 1849–1912
Brazilian politician and abolitionist
Born into a major Liberal political dynasty, he was a diplomat, then became a deputy (1878–80, 1885, 1887–89). He founded the Brazilian Society for the Abolition of Slavery and led the campaign to abolish slavery through the legislature and the courts, rather than by extrajudicial means. He triumphed, largely as a result of the slave insurrections in São Paulo in 1887–88, the refusal of the Cabinet to face possible civil war, and the acceptance of abolition as a fait accompli by the Chamber of Deputies in 1888. An admirer of PEDRO II, he left public life after the former's deposition (1889), returning as a special envoy and ambassador to the USA.

Nachtigal, Gustav 1834–85
German traveller
Born in Eichstedt, he studied medicine, served as an army surgeon, and in 1863 went to North Africa. He travelled across the Sahara Desert from Tripoli to Cairo (1869–74) via Tiberti and Lake Chad, which resulted in the first detailed description of the south-eastern Sahara. As German consul in Tunis, he went to annex Togo and Cameroon for Germany in 1884.

Nachtwey, James 1948–
US photojournalist
Born in Syracuse, New York, he taught himself photography and, after a brief stint as a regional press photographer (1976–80), established himself in New York as a freelance photojournalist. Working for *Time* from 1984, he has travelled widely, from Rwanda to Chechnya, Central America to the Middle East, documenting wars, genocide and conflict, and highlighting social inequalities and human tragedies. A member of Magnum Photos (1986–2001), he is one of the world's most respected and most honoured photojournalists. His publications include *Inferno* (2000).

Nadar, *pseudonym of* **Gaspard-Felix Tournachon** 1820–1910
French journalist, artist and photographer
He was born in Paris, where he worked as a left-wing journalist from 1840, after studying medicine in Lupus. In 1852 he published a series of caricatures, some of which were based on his photographs, and soon afterwards opened a studio which became a meeting place for the intelligentsia. For many years he produced lively portraits of distinguished literary and artistic contemporaries, successfully capturing individual personalities in intimate and natural studies. Among other innovations, he proposed the use of aerial photographs for mapmaking and in 1858 took the first photographs from a balloon, of the city of Paris. In 1886 he produced the first 'photo-interview', a series of 21 photographs of the scientist MICHEL CHEVREUL, each captioned with the sitter's replies to Nadar's questions. In his later years he was active as a writer and journalist.

Nadel, Siegfried Frederick 1903–56
British social anthropologist
He was born in Vienna, Austria, and although his early interests were in music, he studied psychology and philosophy at Vienna University. In 1932 he moved to England to study anthropology under BRONISŁAW MALINOWSKI at the London School of Economics. He was Reader at Durham University (1948–50), and professor at Canberra University, Australia (1950–56). He carried out fieldwork among the Nupe in northern Nigeria (1934–36) and the Nuba of the Sudan (1938–40), which resulted in his three major monographs: *A Black Byzantium* (1942), *The Nuba* (1947) and *Nupe Religion* (1954). However, his major contribution to anthropology lay not in ethnography but in theory, in his *The Foundations of Social Anthropology* (1951) and *The Theory of Social Structure* (1957).

Nadelman, Elie 1882–1946
US sculptor
He was born in Warsaw and studied at the Art Academy there, but left Poland to settle in Paris (c.1902). His drawings and sculptures after 1906 reveal a simplification of forms and stylization close to Cubism, as in *Standing Bull* and *Wounded Bull* (both 1915, New York) but also show an affinity with antique sculpture. In 1914 he moved to the USA, took a studio in New York City, and began to produce a number of primitive painted figure sculptures in wood. He became a US citizen in 1927. From the 1930s he worked extensively in ceramics. Many of his sculptures were accidentally destroyed, but a memorial exhibition of his work was held in New York in 1948.

Nader, Ralph 1934–
US lawyer and consumer activist
He was born in Winsted, Connecticut, and educated at Princeton and Harvard Law School. Admitted to the Connecticut Bar in 1959, he campaigned for improved consumer rights and protection, encouraging the establishment of powerful 'civic interest lobbies' of which the US Congress, state legislatures and corporate executives were forced to take note. His bestseller about the automobile industry, *Unsafe at Any Speed* (1965), led to the passage of improved car safety regulations in 1966. He became head of the Public Citizen Foundation in 1980. His other books include *The Menace of Atomic Energy* (1977), *Who's Poisoning America?* (1981), and *Winning the Insurance Game* (1990). In 1996 and 2000 he was nominated by the Green Party as a candidate for US president, and he ran as an independent candidate in 2004.

Nadir Shah 1688–1747
King of Persia
Born in Khurasan, of Turkish origin, he was king from 1736. A brigand leader who expelled the Afghan rulers of Persia (Iran), he forced Russia to hand over her Caspian provinces, defeated the Turks (1731), conquered Bahrain, Oman and Afghanistan, and ravaged the north-west of India, taking Delhi (1739) and capturing the Peacock Throne and Koh-i-noor diamond. His domestic policy led to revolts, especially on religious matters, and he was assassinated at Fathabad. Suspicious and cruel, he imposed harsh taxes that ruined the economy and he had few statesmanlike qualities.

Naevius, Gnaeus c.264–c.201 BC
Roman poet and dramatist
Born probably in Campania, he served in the first Punic War (264–241 BC), and started producing his own plays in 235. A plebeian who for 30 years satirized the Roman nobles in his plays, he was compelled to leave Rome, ultimately retiring to Utica in Africa. Fragments of an epic, *De Bello Punico* ('The Punic Wars'), are extant. 🕮 M Barchiesi, *Nevio epico* (1962)

Nagano, Osami 1880–1947
Japanese naval officer
Educated at the Naval Academy, Etajima, he studied law at Harvard and served as naval attaché in Washington (1920–23). Promoted rear admiral in 1928, he was superintendent of the Naval Academy (1928–29). As head of the Japanese delegation to the second London Naval Conference (1935–36), he advocated the expansion of Japanese naval power. He was Navy Minister (1936–37), commander-in-chief of the combined fleet (1937), and Chief of Naval General Staff (1941–44). He planned and ordered the Japanese attack on Pearl Harbor in December 1941. He died while on trial for war crimes.

Nāgārjuna c.150–c.250 AD
Indian Buddhist monk-philosopher
He was the founder of the Madhyamika or Middle Path school of Buddhism.

Nagel, Ernest 1901–85
US philosopher of science
Born in Nové Město, Bohemia (Czech Republic), he moved to the USA (1911) and became a naturalized US citizen in 1919. He taught philosophy at Columbia University (1931–70) and published widely on the philosophy of science. His best-known works are his *An Introduction to Logic and Scientific Method* (1934, with M R Cohen), *Logic without Metaphysics* (1957) and *The Structure of Science* (1961).

Nägeli, Karl Wilhelm von 1817–91
Swiss botanist
He was born in Kilchberg, near Zurich, became professor at Munich University (from 1858), and was one of the early writers on evolution. He investigated the growth of cells and originated the micellar theory relating to the structure of starch grains and cell walls. He originated the concept of cell organelles, describing the membrane surrounding chloroplasts, and their increase by division. He distinguished between two types of cell formation – vegetative and reproductive – and observed the cell nucleus dividing into two parts before the cell itself divided. He almost certainly made the first observation of chromosomes, but his most significant advance was probably the recognition of phloem as a fundamental tissue.

Nagy, Imre 1895–1958
Hungarian politician
Born in Kaposvar, he was captured while serving in the Austrian army in World War I, and sent to Siberia. At the revolution he escaped, joined the Bolshevik forces, and became a Soviet citizen in 1918. Back in Hungary in 1919, he had a minor post in the KUN revolutionary government, but later fled to Russia where he remained throughout World War II. Returning with the Red Army (1944), he became Minister of Agriculture in the provisional government, enforcing Communist land reforms. In 1947 he became Speaker of the Hungarian parliament, and in 1953 prime minister, introducing a 'new course' of milder political and economic control. In 1955 the regime of MATYAS RAKOSI removed him from office as a 'right deviationist'. He returned to the premiership in 1956 on Rakosi's downfall. When the Hungarian Uprising broke out (October 1956) he promised free elections and a Russian military withdrawal. When, in November, Soviet forces began to suppress the revolution he appealed to the world for help, but was displaced by the Soviet puppet JÁNOS KÁDÁR and later executed. In 1989, following the overthrow of the Communists, he was given a hero's reburial in Budapest. 🕮 Peter Unwin, *Voice in the Wilderness: Imre Nagy and the Hungarian Revolution* (1991)

Nahayan, Sheikh Khalifa bin Zayed al 1948–
Emir of Abu Dhabi
Born in 1948 and educated in the emirate, he is the eldest son of SHEIKH ZAYED BIN SULTAN AL NAHAYAN. He became crown prince in 1969 and minister of defence and finance in 1971, and as the first chairman of the Abu Dhabi Executive Council he oversaw wide-ranging development programmes. Upon his father's death in 2004 he succeeded him as emir of Abu Dhabi and as president of the United Arab Emirates' Federal Council. He is regarded as a broadly pro-Western, modernizing influence in the Middle East.

Nahayan, Sheikh Zayed bin Sultan al 1918–2004
Emir of Abu Dhabi
He was governor of the eastern province of Abu Dhabi, one of seven Trucial States on the southern shores of the Persian Gulf and the Gulf of Oman, which were under British protection, until he deposed his brother, Sheikh Shakhbut (1969), and became emir. When the States decided to federate as the United Arab Emirates (1971) he became president of its supreme council. He was unanimously re-elected in 1986. Under his rule the UAE ceased to be a collection of medieval emirates and emerged as an efficient modern state with one of the highest per capita incomes in the world.

Nahhas, Mustafa al- 1879–1965
Egyptian politician
He was the leader of the Wafd Party in Egypt in 1923 and became premier in 1928, 1930 and 1950. In addition, he acted as regent for King FAROUK I in his early years and, despite their being dismissed by Farouk in 1938, the Wafd were brought back in 1941 at the request of Great Britain. The damage done to the reputation of the Wafd by their co-operation with the British was irreparable. Although al-Nahhas became premier again in 1950 after the Wafd's victory in the elections, and despite his endeavours to regain credibility for the Wafd by giving the party an anti-British bias, they were again dismissed by Farouk in 1952. Al-Nahhas then left the political stage, charged with, but not tried for, corruption. The Wafd Party was dissolved in 1953.

Nahum 7th century BC
Old Testament minor prophet
Born probably either in Israel or Judah, he may have been a captive in Nineveh. He prophesied the destruction of Nineveh by the Medes in 612 BC.

Naidu, Sarojini, *née* **Chattopadhyay**, *known as* **the Nightingale of India** 1879–1949
Indian feminist and poet
Born in Hyderabad, she was educated at Madras, London and Cambridge. She published three volumes of lyric verse: *The Golden Threshold* (1905), *The Bird of Time* (1912) and *The Broken Wing* (1915). She organized flood-relief in Hyderabad (1908), and lectured and campaigned on feminism, in particular the abolition of purdah. Associated with MAHATMA GANDHI, she was the first Indian woman to be president of the Indian National Congress (1925). She was imprisoned several times for civil disobedience incidents, and took part in the negotiations leading to independence. In 1947 she was appointed governor of United Provinces (Uttar Pradesh). 🕮 P Sengupta, *Sarojini Naidu* (1966)

Naipaul, Sir V(idiadhar) S(urajprasad) 1932–
Trinidadian novelist and Nobel Prize winner
Born in Chaguanas, he was educated at Queen's Royal College, Port of Spain, then left the Caribbean for England in 1950 to study at Oxford. The editor of 'Caribbean Voices' for the BBC, he dabbled in journalism before his first novel, *The Mystic Masseur* (1957), was published. *Miguel Street* (1959) collected sketches depicting lower-class life in Trinidad through the eyes of a growing boy. The book which made his name was *A House for Mr Biswas* (1961), a spicy satire spanning three Trinidadian generations but focusing on its eponymous six-fingered sign-writer. Thereafter the Caribbean figured less prominently in his work, which grew steadily darker and more complex. *In a Free State* (1971) won the Booker Prize, and in 1979 he published *A Bend in the River*, a recreation of what it is like to live under an African dictatorship. As well as novels he has written several trenchant 'travel' books, including *An Area of Darkness: An Experience of India* (1964), *Among the Believers: An Islamic Journey* (1981) and *Beyond Belief: Islamic Excursions* (1998). *Finding the Centre* (1984) is autobiographical. Later novels include *The Enigma of Arrival* (1987), based on his experience of England, *A Way in the World* (1994), *Half a Life* (2001) and its sequel *Magic Seeds* (2004). He was knighted in 1990 and awarded the Nobel Prize in literature in 2001. 🕮 S Kamra, *The Novels of V S Naipaul* (1990)

Nairn, Nick 1959–
Scottish chef
He began his working life with seven years' service in the merchant navy. A self-taught chef and cookery teacher, since 1986 he has been the joint owner, with his wife and business partner Fiona, of the Braeval restaurant in Aberfoyle, Scotland, where they also run a popular cookery school. Braeval was awarded a Michelin Star in 1991. In 1992 Nairn became a member of the Masterchefs of Great Britain. On television, he has been a regular participant in *Ready Steady Cook* (1994–) and has presented several other cookery series, publishing books to accompany each.

Nairne, Lady Carolina, *née* **Oliphant** 1766–1845
Scottish songwriter
She was born in Gask, Perthshire, the daughter of a Jacobite laird, and in 1806 married a cousin, Major Nairne (1757–1830),

who became Lord Nairne in 1824. She lived in Edinburgh, but travelled widely in Ireland and Europe after her husband's death. She collected traditional airs and wrote songs to them under the pseudonym 'Mrs Bogan of Bogan', which were published in *The Scottish Minstrel* (1821–24), and posthumously as *Lays from Strathearn*. They include the lament for Prince CHARLES EDWARD STUART, 'Will ye no' come back again', 'The Land o' the Leal', 'Caller Herrin', 'The Laird o' Cockpen', 'The Rowan Tree', and 'The Auld Hoose', as well as the martial setting for 'The Hundred Pipers'.

Naismith, James 1861–1939
Canadian educationalist
Born in Almonte, Ontario, he is regarded as being the originator of basketball in 1891 at the YMCA college in Springfield, Massachusetts, using peach baskets on a gym wall. The game was originally designed merely to bridge the gap between the baseball and American football season, but it soon became popular in its own right. He taught at the YMCA, Denver, Colorado (1895–98), and the University of Kansas (1898–1937). He attended the Berlin Olympics of 1936, at which basketball was elevated to the status of an Olympic sport.

Najibullah, Sayid Mohammad 1947–96
Afghan politician
Born in Paktia province and educated at Habibia Lycée and Kabul University, he became active in the Moscow-inspired People's Democratic Party of Afghanistan (PDPA) in the mid-1960s, and was twice imprisoned for his political activities. After King MOHAMMED ZAHIR SHAH was deposed in a military coup (1973), he rose rapidly in the party hierarchy, and as a member of the PDPA's central committee, played a key role in the negotiations that led to the 1978 treaty of friendship with the USSR. The treaty served as a pretext for the Russian invasion the following year, when he was made Information Minister. He was admitted to the Afghan politburo in 1981, and became president in 1987. Strong guerrilla resistance by the members of the National Islamic Front continued, and insistence by the Russian army, in the wake of continued attacks by Pakistani Mujahadeen guerrillas on the Kabul–Soviet border, that Najibullah's regime should continue to be funded despite the USSR's own economic difficulties was a factor in the resignation of Foreign Minister EDUARD SHEVARDNADZE (1990). In 1991, the United Nations renewed its call for elections in Mujahadeen-controlled territories with a view to replacing Najibullah's regime with a democratically elected government. Najibullah finally resigned, handing over power to a coalition of Mujahadeen leaders in May 1992, and took refuge in a UN compound until his death.

Nakasone, Yasuhiro 1917–
Japanese politician
Born in Takasaki and educated at Tokyo Imperial University, he served in the Japanese navy in World War II, and afterwards entered politics as a member of the conservative Liberal Democratic Party (LDP), holding a number of ministerial posts from 1967 to 1982. He established his own faction within the LDP and was elected secretary-general (1974–76), chairman (1977–80) and, in 1982, LDP president, and thus prime minister. He introduced an innovative programme which combined greater economic liberalism at home with a more assertive posture abroad, and became Japan's most forceful and popular political leader for decades. The first LDP president to be re-elected for a second term since the 1960s, he stepped down as prime minister in 1987, and nominated NOBORU TAKESHITA as his successor. He remained an influential figure in politics, but was forced to resign from the LDP in 1989 after becoming involved in the Recruit scandal, rejoining in 1991. He left the Diet in 2003 at the request of JUNICHIRO KOIZUMI, in an attempt to increase the party's popularity amongst young voters. Since 1988 he has been chairman and president of the Institute for International Policy Studies (formerly the International Institute for Global Peace).

Namath, Joe Willie (Joseph William), *known as* **Broadway Joe** 1943–
US football player
Born in Beaver Halls, Pennsylvania, he was noted for his high living off the field. An outstanding quarterback in Alabama University's unbeaten team of 1964, he turned professional in the American Football League with the New York Jets (1965). In a phenomenally successful career, he played for a total of 23 seasons, passing for a total of 27,663 yards and scoring 173 touchdowns. In 1967 he passed for a record 4,007 yards, and in 1969 inspired the Jets to an upset victory over the Baltimore Colts in the Superbowl. Following his retirement (1978) he remained in the public eye with appearances in films and on television.

Namias, Jerome 1910–97
US meteorologist
Born in Bridgeport, Connecticut, he was educated at the Massachusetts Institute of Technology (MIT), where his enthusiasm for meteorology helped him to become an assistant to CARL-GUSTAV ROSSBY. He realized that the persistence of the Rossby long waves in the upper atmosphere would allow weather forecasting for up to five days ahead. In 1936 Rossby offered him a teaching post at MIT, and he was made chief of the extended forecast division of the Weather Bureau. He held this position until 1971, and during this time forecasting was extended to monthly forecasts of temperature and rainfall for the northern hemisphere, and eventually to seasonal forecasts, although Namias was aware that the atmospheric Rossby waves could be modified by the underlying surface such as snow cover and deserts. His many scientific papers related anomalous sea temperature patterns to atmospheric phenomena, as he realized that ocean–atmosphere interactions were a two-way process. In 1971 he moved to the Scripps Institute of Oceanography at the University of California and continued his research, particularly into methods of seasonal forecasting.

Namier, Sir Lewis Bernstein, *originally surnamed* **Bernstein** 1888–1960
British historian
Born near Warsaw, Poland, of Russian origin, he went to England in 1906 and was educated at Balliol College, Oxford. He became a naturalized citizen in 1913, had a distinguished career in diplomacy and journalism, and was professor of modern history at the University of Manchester (1931–52). His influence created a Namier school of history, which emphasized the analysis of events and institutions, particularly parliament, so as to reveal the motivation of the individuals involved. He compelled a 'rethinking' of history through his *Structure of Politics at the Accession of George III* (1929) and *England in the Age of the American Revolution* (vol 1, 1930). 🕮 Julia Namier, *Lewis Namier: A Biography* (1971)

Nanak, *also known as* **Guru Nanak** 1469–1539
Indian religious leader, and founder of Sikhism
Born near Lahore (now in Pakistan) he was a Hindu by birth and belief. He travelled widely to Hindu and Muslim centres where he taught spiritual truth. He settled in Kartarpur, in the Punjab, where he attracted many followers. His doctrine, set out later in the *Adi-Granth*, sought a fusion of Brahmanism and Islam on the grounds that both were monotheistic, although his own ideas leaned rather towards pantheism. 🕮 W H McLeod, *Guru Nanak and the Sikh Religion* (1968)

Nana Sahib, *properly* **Brahmin Dundhu Panth** c.1820–1859
Indian rebel
The adopted son of the ex-peshwa (head) of the Marathas, he became the leader of the Sepoys in Cawnpore at the outbreak of the Indian Mutiny (1857), and was held responsible for the massacre of the British residents. After the collapse of the rebellion he escaped into Nepal.

Nansen, Fridtjof 1861–1930
Norwegian explorer, biologist and oceanographer, and Nobel Prize winner
Born in Store-Frøen, he studied at Christiana (now Oslo) University and later at Naples. In 1882 he sailed into the Arctic regions in the sealer *Viking*, and in the summer of 1888 made an adventurous journey across Greenland from east to west. However, his great achievement was the partial accomplishment of his scheme for reaching the North Pole by letting his ship get frozen into the ice north of Siberia and drift with a current setting towards Greenland. He started in the *Fram*, built for the purpose, in August 1893, reached the New Siberian islands in September, made fast to an ice floe, and drifted north to 84° 4′ in March 1895. There he left the *Fram* and pushed across the ice, reaching the highest latitude till then attained, 86° 14′ N, on 7 April, and overwintering in Franz Josef Land. Professor of zoology (1897) and of oceanography (1908) at Oslo, he furthered the cause of Norwegian independence from Sweden, and was the first Norwegian ambassador in London (1906–08). In 1922 he was awarded the Nobel Peace Prize for Russian relief work, and he did much for the League of Nations. 🕮 E E Reynolds, *Nansen* (2nd edn, 1949)

Napoleon I, *also called* **Napoleon Bonaparte** 1769–1821
Emperor of France

Napoleon Bonaparte was born in Ajaccio in Corsica, the second son of CHARLES BONAPARTE, a Corsican lawyer. He entered the military schools at Brienne (1779) and Paris (1784), and in 1785 he was commissioned in the regiment of la Fère as second lieutenant of artillery, garrisoned at Valence. At Auxonne he saw the beginnings of the French Revolution, but, more concerned with Corsica than France, he went home on leave to organize a revolution and was temporarily struck off the army list for returning to his regiment late (1792). He was given command of the artillery at the Siege of Toulon (1793), where he served with distinction and was promoted to brigadier general.

On the fall of ROBESPIERRE in 1794, Napoleon was arrested on a charge of conspiracy because of his friendship with the younger Robespierre, but the charges were not proven and he was released. In 1795 he helped to defeat supporters of the counter-revolution in Paris with the celebrated 'whiff of grapeshot' against the mob at the Tuileries, and was then appointed commander of the army of Italy (1796), in which role he was able to demonstrate his great military genius. Two days before his departure for Italy he married JOSÉPHINE, widow of General Vicomte de BEAUHARNAIS, who had been executed during the Reign of Terror.

On arrival in Nice he was appalled by the poverty and indiscipline of the French army. As his army was outnumbered by the combined Piedmontese–Austrian forces he determined to separate them. He finally routed the Piedmontese at Mondovi, after which Sardinia sued for peace, and the Austrians at Lodi, after which he entered Milan. He next broke through the Austrian centre and occupied the line of the Adige, taking Verona and Legnago from the neutral republic of Venice. The Austrians made attempts to recover Lombardy, but were defeated at Arcole and Rivoli.

When Napoleon's position in Italy was secured he advanced on Vienna, and reached Leoben in April 1797. Negotiations for a peace settlement with Austria began, but progressed slowly as Austria hoped to benefit from the political crisis in France, where the moderates and royalists were gaining power on the legislative councils. Napoleon, however, despatched General AUGEREAU to assist the Directory in disposing of their opponents by force. In October 1797 Austria signed the Treaty of Campo Formio, by which France obtained Belgium, the Ionian Islands and Lombardy, while Austria received Istria, Dalmatia and Venetia; the treaty also set out plans for a congress at Rastatt to decide upon the future of Germany, though Austria had already secretly promised the left bank of the Rhine to France. It marked the end of the War of the First Coalition, the first stage of the French Revolutionary Wars.

The Directory, fearing Napoleon's power and ambition, hoped to keep him away from Paris by giving him command of the army of England. But Napoleon realized the impossibility of invading England while her fleet was supreme, and instead set out on an expedition to Egypt in the hope of damaging Britain's trade with India. He set sail in May 1798, captured Malta, managed to escape the British fleet, and arrived with his army at Alexandria on 30 June. He twice defeated the Mamluks and entered Cairo on 24 July, but the French fleet was destroyed by NELSON at the Battle of the Nile, producing an effective stalemate. Napoleon defeated the Turks at Mount Tabor but failed to capture St Jean d'Acre, which was defended by the British squadron under Sir SIDNEY

cont

Naomi
Biblical character in the Old Testament
Naomi's name means 'my delight' in Hebrew. She is described in the stories of the Book of Ruth as the mother-in-law of RUTH and Orpah. After Naomi was widowed, and her two sons had also died, she persuaded Orpah to return to her own people. Ruth, however, made an oath to remain with Naomi and returned with her from Moab to Bethlehem, where Naomi helped to arrange the marriage of Ruth with Boaz, one of the secondary kinsmen of Naomi's deceased husband. Ruth and Boaz had a son called Obed, who was to be the father of Jesse, who in turn was the father of DAVID.

Naoroji, Dadhabai 1825–1917
Indian politician
Born in Bombay, he became professor of mathematics at Elphinstone College there, and a member of the Legislative Council. From 1892 to 1895 he represented Finsbury in the British House of Commons – the first Indian MP – and was also president of the Indian National Congress.

Napier, Sir Charles 1786–1860
Scottish naval commander
Born at Merchiston Hall near Falkirk, he went to sea at the age of 13, received his first command in 1808, then served as a volunteer in the Peninsular army, inflicting great damage on the French in the Mediterranean. In the American War of 1812 he led the ascent of the Potomac River, and took part in the operations against Baltimore. In command of the loyalist Portuguese fleet (1831–33), he defeated the fleet of the pretender, MARIA EVARISTO MIGUEL, and restored Queen Maria II to the throne. Returning to the British navy in 1839, he stormed Sidon in the war between the Porte and MEHEMET 'ALI, defeated Ibrahim Pasha in Lebanon, attacked Acre, blockaded Alexandria, and concluded a convention with 'Ali. He commanded the Baltic fleet in the Crimean War (1854–55). He twice sat in parliament, and worked to reform the naval administration. He was a cousin of Sir CHARLES JAMES NAPIER.

Napier, Sir Charles James 1782–1853
British general and colonial administrator
Born in London, he fought in the Peninsular War from 1808 to 1811 and against the USA in the War of 1812, and in 1842 was sent to India to take command of the war in Sind. He defeated the emirs at Miani (1843), and was made governor of the province. In 1847 he returned to England, but went back to India before the end of the second of the Sikh Wars to command the army. He left India in 1851.

Napier, John 1550–1617
Scottish mathematician, inventor of logarithms
Born at Merchiston Castle, Edinburgh, he went to St Andrews University at the age of 13 but never graduated, travelled on the Continent, then settled down to a life of literary and scientific study. He described his famous invention of logarithms in *Mirifici Logarithmorum Canonis Descriptio* (1614, 'Description of the Marvellous Canon of Logarithms'). Formulated to simplify computation, his system used the natural logarithm base *e*, but was modified soon after by HENRY BRIGGS to use the base 10. Napier also devised a calculating machine, using a set of rods, called 'Napier's bones', which he described in his *Rabdologiae* (1617; Eng trans *Study of Divining Rods*, 1667). A strict Presbyterian, he published religious works, such as the *Plaine Discouery of the whole Reuelation of Saint John* (1593) and believed in astrology and divination. For defence against PHILIP II of Spain, he devised warlike machines (including primitive tanks). 🕮 C G Knott (ed), *Napier Tercentenary Memorial Volume* (1915)

Napier, Robert 1791–1876
Scottish shipbuilder and engineer
Born in Dumbarton, he built the engines for the first four Cunard steamships. He also built some of the earliest iron-clad warships, including the *Black Prince* in 1860, and helped in the development of the Clyde as a great shipbuilding centre. 🕮 Brian D Osborne, *Robert Napier 1791–1876: "The Father of Clyde Shipbuilding"* (1991)

Napier (of Magdala), Robert Cornelis Napier, 1st Baron 1810–90
British field marshal
Born in Colombo, Ceylon (now Sri Lanka), he entered the Bengal Engineers in 1826. He served in campaigns in India, and during the Indian Mutiny (1857) he fought at the Siege of Lucknow. He received the thanks of parliament for his services in the Chinese war of 1860 and for leading the expedition in Abyssinia in 1868. In 1870 he became commander-in-chief in India and a member of the Indian Council; later he was governor of Gibraltar, field marshal, and Constable of the Tower.

Napoleon I *cont*

SMITH, and he was obliged to return to Egypt. There he heard reports of French reverses in Italy and on the Rhine, and secretly embarked for France (22 August 1799).In Paris, Napoleon formed an alliance of convenience with SIEYÈS, one of the Directory, and took part in the revolution of 18th Brumaire (9 November 1799); Sieyès, Roger Ducos and Napoleon drew up a new constitution, by which Napoleon was nominated first consul for ten years. But before embarking on further military campaigns, Napoleon had to improve the poor state of the French Treasury. He drew up plans for a Bank of France, and sought to stabilize the franc and regulate the collection of taxes by employing paid officials. He also endeavoured to reform the system of local government and the judiciary.

Napoleon offered peace terms to England and Austria but these were rejected. He secretly collected an army, reached the plains of Italy, and occupied Milan. Further victories at Marengo and Hohenlinden (1800) led to the signing of the Treaty of Luneville (February 1801), consolidating the French gains of Campo Formio. France's power in Europe was further strengthened by a Concordat with Rome, by which Pope PIUS VII recognized the French Republic, and by the Peace of Amiens with war-weary England (1802). England retained Ceylon and Trinidad but relinquished Egypt, Malta and the Cape of Good Hope. France agreed to evacuate Naples, and the independence of Portugal and the Ionian Islands was recognized.

In 1802 Napoleon was made first consul for life by a plebiscite, and continued his programme of domestic reforms by restoring the Church, improving secondary education and instituting the Legion of Honour. When hostilities were resumed between England and France because of difficulties in implementing the Peace of Amiens, Napoleon made preparations to invade England, at the same time seizing Hanover. England in turn sent support to a royalist plot against Napoleon's life, but Napoleon arrested the conspirators and rid himself of MOREAU, his most dangerous rival.

On 18 May 1804 Napoleon assumed the hereditary title of emperor. In 1805 he had to face a coalition of Russia and Austria, as well as England. England's naval supremacy precluded any idea of invasion, and he suddenly led his armies from Boulogne to the Danube, leaving Admiral VILLENEUVE to face the English fleet. He succeeded in surprising the Austrians under MACK at Ulm and they surrendered (19 October), leaving him free to enter Vienna on 13 November. Meanwhile the French fleet had been destroyed by Nelson off Cape Trafalgar.

On 2 December he inflicted a disastrous defeat on the Russians and Austrians at Austerlitz. The Holy Roman Empire came to an end, the Confederation of the Rhine was formed under French protection, and Napoleon then entered into negotiations for peace with Russia and England. Prussia, afraid that an Anglo-French alliance would mean the loss of Hanover to England, mobilized a Prussian army in August 1806, but Napoleon crushed it at Jena and Auerstadt on 14 October. Russia, who had intervened, was defeated at Friedland (14 June 1807). By the Peace of Tilsit Prussia lost half her territory and Napoleon became the arbiter of Europe.

Napoleon was now master of an empire that extended from France to Italy and from the Pyrenees to the Dalmatian coast. He ruled his territories by installing his brothers as kings, including JOSEPH BONAPARTE in Naples. The principal threat to his power remained the naval supremacy of England. Knowing England's reliance on trade, he tried to cripple her by the

cont

Napoleon II, *originally* **François Charles Joseph Bonaparte** 1811–32
French nobleman and titular King of Rome
Born in Paris, the son of NAPOLEON I and MARIE LOUISE, he was styled King of Rome upon his birth at the Tuileries. From 1814 until his death he lived at the Austrian court and was created Duke of Reichstadt (1818) by his grandfather, FRANCIS I. Loyal Bonapartists proclaimed him Napoleon II in Paris in 1815, but he was formally deposed five days later. He spent the rest of his life in Vienna. 🕮 Jean Tulard, *Napoleon II* (1992)

Napoleon III, *originally* **Charles Louis Napoléon Bonaparte** 1808–73
President of the second French Republic and Emperor of France
Born in Paris, he was the third son of LOUIS BONAPARTE, and a nephew of NAPOLEON I. His mother, HORTENSE DE BEAUHARNAIS, was the daughter of Napoleon's first wife, JOSÉPHINE. Brought up in Switzerland, he assisted the Romagna in Italy in its revolt against pontifical rule in 1831. On the death of the Duke of Reichstadt (NAPOLEON II) in 1832, he considered himself the head of the Napoleonic dynasty. Between 1832 and 1836 he published his *Rêveries politiques, Projet de constitution*, and *Considérations politiques et militaires sur la Suisse*. Following an unsuccessful action against the French at Strasbourg in 1836 he went to the USA, returning to Europe after his mother's death (1837), and at the insistence of the French government he settled in London. In 1838 he published his *Idées napoléoniennes*. In 1840 he made a second and equally abortive attempt on the throne of France at Boulogne, and was imprisoned for life in the fortress of Ham, near Amiens. He continued his Bonapartist propaganda and helped to edit the *Dictionnaire de la conversation*. He escaped to England in 1846. The revolution of February 1848 was a victory for the workers and he hurried back to France as a virtual nominee of the Fourth Estate, or working classes. Elected deputy for Paris and three other departments, he took his seat in the Constituent Assembly on 13 June 1848. Two days later he resigned and left France. His quintuple election recalled him in September, and he won a huge victory over General LOUIS CAVAIGNAC, his genuinely Republican competitor. On 20 December he took the oath of allegiance to the Republic as president, but at the beginning of 1849 a struggle emerged between the president and the majority of the Assembly. He took command of the army and established his supporters in posts of influence. Hampered by the National Assembly in his efforts to make his power perpetual, he threw off the mask of a constitutional president and on 2 December 1851, with the help of the military, he dissolved the Constitution and imprisoned or deported those who rebelled. France appeared to acquiesce, for when the vote was taken in December, he was re-elected for ten years by seven million votes. He assumed the title Emperor of France in 1852, a year after the coup d'état, in accordance with another plebiscite. Political parties were either demoralized or broken, he gagged the press, awed the bourgeoisie, and courted the clergy to win the peasantry. In 1853 he married Eugénie de Montijo (1826–1920), a Spanish countess, born in Granada. The emperor now proclaimed the right of peoples to choose their own masters, helping his own cause with the annexation of Savoy and Nice to France (1860), his Mexican intervention through MAXIMILIAN of Austria, and in his handling of the Italian question. He regulated the price of bread, encouraged public works for the enrichment of the working class and peasantry, and prompted the complete remodelling of Paris under the direction of Baron GEORGES HAUSSMANN. International exhibitions and treaties of commerce were a further inducement to internal peace. His foreign policies flourished with the Crimean War (1854–56), the campaign in Lombardy against Austria (1859), and the expeditions to China (1857–60). He monitored changing public opinion and when his *Vie de César*, written to extol his own methods of government, met with loud protests he reorganized his army, set himself up more proudly as an arbiter in Europe, and took a more conciliatory attitude to liberalism. In 1869 his prime minister Eugène Rouher, an advocate of absolutism, was dismissed, and new men were called into power to liberalize the Constitution. By another plebiscite the new parliamentary scheme was sanctioned by seven million votes (May 1870) but when 50,000 dissentient votes given by the army revealed an unsuspected source of danger he contrived a distraction by declaring war against Prussia (July 1870). By the end of July, Prussia had almost double the number of men in the field as the French had and the campaign ended in defeat for Napoleon, who surrendered on 2 September. On 4 September the Second Empire was ended. Until the conclusion of peace he was confined at Wilhelmshöle. In 1871 he joined the ex-empress at Chislehurst, Kent, and resided there in exile until his death. 🕮 F A Simpson, *The Rise of Louis Napoleon* (3rd edn, 1950)

Narayan, Jaiprakash, *also known as* **JP** 1902–79
Indian freedom fighter and politician
He was educated in a village primary school and abandoned his studies in 1921 to join the Non-Co-operation Movement. He

Napoleon I *cont*

so-called Continental System, by which he ordered the European states under his control to boycott British goods. To enforce the blockade, he sent armies to occupy Spain and Portugal, precipitating the Peninsular War. A British army, under Wellesley (WELLINGTON), landed in Portugal, defeated the French at Vimeiro (1808), and forced them to evacuate Portugal under the terms of the Convention of Cintra. The war was to occupy a large part of the French army until 1813, when Wellington routed the French and forced them out of Spain.

In 1809 Austria took advantage of the French troubles in Spain to declare war on France. Napoleon drove the Austrians out of Ratisbon, entered Vienna (13 May) and was victorious at the Battle of Wagram on 5 and 6 July. By the Treaty of Schönbrunn (20 October 1809), France wrested the Illyrian provinces from Austria and secured a heavy money indemnity. In December Napoleon, who wanted an heir, divorced the childless Joséphine and married the archduchess MARIE LOUISE of Austria. A son (the future NAPOLEON II) was born on 20 March 1811.

Napoleon now turned his attention to Russia, which he suspected of seeking an alliance with England. He invaded Russia, defeated the Russians at Borodino (7 September 1812), and occupied the city of Moscow. But his lines of communication were overstretched, and his army was tired and hungry. When the city was destroyed by fire, he was forced to retreat, encumbered by the sick and wounded and suffering from the harsh effects of the Russian winter which he had greatly underestimated. Only a fraction of the Grand Army that had set out for Russia reached Vilna.

Napoleon, now also defeated in Spain, hurried to Paris to raise a new levy, stem the rising panic and dispel rumours of his death. After initial successes against the allies (later joined by Austria), he was significantly defeated at the Battle of the Nations near Leipzig. The allies invaded France and attacked Paris (1814), which capitulated. Napoleon fell back to Fontainebleau; but his position was desperate and Wellington had now led his army across the Pyrenees into France.

Napoleon was forced to abdicate, first in favour of his son, and then unconditionally (11 April). By the Treaty of Fontainebleau he was given the sovereignty of Elba, allowed to retain the title of emperor, and awarded a revenue from the French government. The Bourbons in the person of LOUIS XVIII were restored to the throne of France, but their return was unpopular, especially with the army. Napoleon hoped to take advantage of the situation and landed on the French coast on 1 March 1815. On 20 March he entered Paris at the start of the 'Hundred Days', with the support of the army.

Europe declared war against him. After an initial success against the Prussians under BLÜCHER, he was defeated by the combined armies of Wellington and Blücher at Waterloo in Belgium. Napoleon fled to Paris, abdicated on 22 June, and surrendered to the British. He was banished by the British government to St Helena, where he died of a stomach illness on 5 May 1821.

📖 F Kafker and J Laux, *Napoleon and his Times* (1988).

C'est un fossé qui sera franchi lorsqu'on aura l'audace de le tenter.

'[The English Channel] is just a ditch, and will be crossed when someone has the nerve to try it.'

–From a letter of November 1803, in *Correspondance de Napoléon Ier* (1858–69), vol 9.

later went to the USA on a scholarship to study at the University of Ohio. Influenced by Marxist ideas, he joined the communist movement, but accepted NEHRU's offer to take charge of the Labour Department in Congress. He joined the civil disobedience movement after the failure of the GANDHI–Irwin talks and was jailed. He was one of the founders of the Congress Socialist Party (1934). The author of a number of books and booklets on social, political and economic problems, he took an active part in the Quit India Movement of 1942, but gave up politics after India gained independence and joined the Bhoodan movement led by VINOBA BHAVE. Later, he was closely involved in the protest movement against the Chinese policy on Tibet and also toured the tribal areas of Nagaland in an attempt to bring about a rapprochement between the rebel Nagas and the government of India. He organized famine relief for the affected people of Bihar in 1967 and persuaded several dacoits of Madhya Pradesh to surrender their arms in 1972. He led the movement for restoration of democracy and liberties after the imposition of the 'emergency' by INDIRA GANDHI (1975), for which he was arrested. Released in 1977, he led the Janata Party to victory in the general election of that year.

Narayan, Rasipuram Krishnaswami 1906–2001
Indian novelist
Born in Madras, south India, he was educated there and at Maharajah's College in Mysore. His first novel, *Swami and Friends* (1935), and its successor *The Bachelor of Arts* (1937), are set in the enchanting fictional territory of 'Malgudi'. Other Malgudi novels are *The Dark Room* (1938), *The English Teacher* (1945) – a thinly veiled account of his own marriage and the event that most matured and shaped his character, the early death of his beloved wife – *Mr Sampath* (1949), *The Financial Expert* (1952), *The Man-Eater of Malgudi* (1961), *The Painter of Signs* (1977), *A Tiger for Malgudi* (1983), *Talkative Man* (1986) and *The World of Nagaraj* (1990). His novel *The Guide* (1958) won him the National Prize of the Indian Literary Academy. He also published stories, travel books, books for children and essays, as well as *My Days: A Memoir* (1974). The best Indian novelist of his generation, he was first published in Great Britain through the influence of GRAHAM GREENE. 📖 C Vander, *R K Narayan* (1986)

Narayanan, Shri Kocheril Raman 1920–2005
Indian politician
Born in Ozhavoor, Kerala, he was educated at Travancore University and at the London School of Economics, and initially took up a career as a lecturer and newspaper correspondent. Having entered India's Foreign Service in 1949, he served in Indian embassies in Rangoon, Tokyo, London, Canberra and Hanoi, worked in the Ministry of External Affairs and was ambassador to Thailand (1967–69), Turkey (1973–75), China (1976–78) and the USA (1980–83). He entered parliament as an MP (1985–92) and held various senior posts before becoming vice-president of India (1992–97) and ultimately president (1997–2002). He was the first Dalit, or 'untouchable', to hold this office, and used his discretionary powers to enlarge the scope of the usually ceremonial position.

Nares, Sir George Strong 1831–1915
Scottish naval commander and explorer
Born in Aberdeen, he was educated at the Royal Naval College, New Cross, and joined the navy in 1846. He served as mate on the *Resolute* during its Arctic expedition of 1852, in the Crimea, and as commander of the cadet sail-training ship *Britannia*, and worked on surveys of north-east Australia and the Mediterranean (1872–74). He commanded the *Challenger* (1872–74) on its oceanographic voyage around the world which resulted in a 50-volume report for its sponsors, the Admiralty and the Royal Society. In 1875 he was transferred to command the *Alert* and the *Discovery* in the Arctic, and later, on the *Alert*, surveyed the Magellan Straits.

Narses c.478–573
Byzantine general
He was born in Armenia, and served JUSTINIAN I in Constantinople (Istanbul). In 552 he succeeded BELISARIUS in Italy, where he defeated the Ostrogoths, took possession of Rome, and completely extinguished the Gothic power in Italy. Justinian appointed him prefect of Italy in 554, and he administered its affairs with vigour and ability. He was charged with greed, and on Justinian's death the Romans complained to JUSTIN II, who deprived him of his office in 567.

Narváez, Ramón María 1800–68
Spanish soldier and senator
Born in Loja, a supporter of ISABELLA II, he defeated the Carlists in 1836, then took part in an unsuccessful insurrection against Espartero in 1840 and fled to France, where he was joined by Maria Cristina. In 1843 he led a Republican insurrection in Madrid that drove Espartero from power, and became virtual dictator. He lost power temporarily in 1851, and was briefly exiled as special ambassador to France, but from 1856 he was premier again several times.

Nash, Heddle 1896–1961
English tenor
He was born in London where he was a chorister at Westminster Abbey. He studied first in London, then in Milan, where in 1924 he made his debut in the Italian opera *Il Barbiere di Siviglia* (*The Barber of Seville*). Returning to England, he sang first at Sadler's Wells, then with the British National Opera Company, and from 1929 to 1948 had a long association with Covent Garden. Nash also built up a strong reputation in oratorio and made celebrated recordings of *The Messiah* and *The Dream of Gerontius*.

Nash, John 1752–1835
English architect
Born in London or Cardigan, Wales, he trained as an architect, but after coming into a legacy retired to Wales. Having lost heavily by speculations in 1792, he resumed practice in London and gained a reputation by his country house designs. He came to the notice of the Prince of Wales (later GEORGE IV), and was engaged (1811–25) to plan the layout of the new Regent's Park and its environs of curved terraces. He laid out Regent Street (1825) to link the Park with Westminster. He built Carlton House Terrace, and laid out Trafalgar Square and St James's Park. He recreated Buckingham Palace from old Buckingham House, designed the Marble Arch which originally stood in front of it (moved to its present site in 1851), and rebuilt Brighton Pavilion in oriental style. On the strength of a patent (1797) for improvements to the arches and piers of bridges, he claimed much of the credit for introducing steel girders. The skilful use of terrain and landscape featured in his layouts marks him as one of the greatest town planners. 🕮 John Summerson, *The Life and Work of John Nash, Architect* (1980)

Nash, John F(orbes), Jnr 1928–
US mathematician and Nobel Prize winner
Born in Bluefield, West Virginia, he was educated at Carnegie Mellon and Princeton universities and subsequently worked in posts at the Massachusetts Institute of Technology and (from 1959) at Princeton. He shared the 1994 Nobel Prize in economics with JOHN C HARSANYI and REINHARD SELTEN for their pioneering work on game theory. His biography by Sylvia Nasar, *A Beautiful Mind* (1998), was made into a film in 2001.

Nash, (Frederic) Ogden 1902–71
US writer of light verse
Born in Rye, New York, he was educated at Harvard, and worked in teaching, editing, selling bonds and copywriting, before devoting himself to verse. He soon became a popular writer and frequently produced witty verse for *The New Yorker*. He used puns, parody, pastiche and alliteration to amuse as well as shock. He published many collections, including *Free Wheeling* (1931), *Hard Lines* (1931), *Parents Keep Out: Elderly Poems for Youngerly Readers* (1951), *The Private Dining Room and Other New Verses* (1953) and *Boy is a Boy* (1960). *I Wouldn't Have Missed It: Selected Poems of Ogden Nash* was published in 1975. 🕮 L B Axford, *An Index to the Poems of Ogden Nash* (1972)

Nash, Paul 1889–1946
English painter
Born in London, he became an official war artist in 1917 (remembered particularly for his poignant *Menin Road*, 1919). Developing a style which reduced form to bare essentials without losing the identity of the subject, he won renown as a landscape painter and also practised scene painting, commercial design and book illustration. For a while he taught at the Royal College of Art. Experiments in a near-abstract manner were followed by a phase of Surrealism until, in 1939, he again filled the role of war artist, this time for the Air Ministry and the Ministry of Information, producing such pictures as *Battle of Britain* and *Totes Meer*. Shortly before his death he turned to a very individual style of flower painting. His autobiography, *Outline*, was posthumously published in 1949.

Nash, Richard, *known as* **Beau Nash** 1674–1762
Welsh dandy
Born in Swansea, he was educated at Carmarthen and Oxford, held a commission in the army, and in 1693 entered the Middle Temple. He then made a shifty living by gambling, but in 1704 became Master of Ceremonies at Bath, where he conducted the public balls with a splendour never before witnessed. His reforms in manners, his influence in improving the streets and buildings, and his leadership in fashion helped to transform Bath into a fashionable holiday resort.

Nash, Sir Walter 1882–1968
New Zealand politician
He was born in Kidderminster, England. He served on the national executive of the New Zealand Labour Party from 1919 to 1960, encouraging the adoption of a moderate reform programme in the Christian Socialist tradition. An MP from 1929, he held numerous ministerial appointments from 1936 onwards and in World War II was deputy prime minister to PETER FRASER, although from 1942 to 1944 he headed a special mission to the USA. He was prime minister from 1957 to 1960, but as his government possessed a majority of only one there were few political innovations.

Nashe, Thomas 1567–1601
English dramatist and satirist
Born in Lowestoft, Suffolk, he studied for seven years at St John's College, Cambridge, travelled in France and Italy, and then went to London. His first work was the *Anatomie of Absurditie* (1589), perhaps written at Cambridge. He plunged into the Marprelate controversy, showing a talent for vituperation which he expressed in such works as *Pierce Penilesse, his Supplication to the Divell* (1592), against Richard Harvey who had criticized Nashe's preface to ROBERT GREENE's *Menaphon*, and *Have with you to Saffron Walden* (1596), against GABRIEL HARVEY, who had by then assailed Greene's memory in *Foure Letters*. In 1599 the controversy was suppressed by the Archbishop of Canterbury. Nashe's satirical masque *Summer's Last Will and Testament* (1592) contains the song 'Spring the sweet Spring is the year's pleasant king'. *The Unfortunate Traveller* (1594) is a picaresque tale, one of the earliest of its kind. After CHRISTOPHER MARLOWE's death, Nashe prepared his unfinished tragedy *Dido* (1596) for the stage. His own play *The Isle of Dogs* (1597), now lost, drew such attention to abuses in the state that it was suppressed, the theatre closed, and the writer himself thrown into the Fleet prison. His last work was *Lenten Stuffe* (1599), a panegyric on the red herring trade at Yarmouth. 🕮 M Schaluch, *Antecedents of the English Novel* (1963)

Nasmyth, Alexander 1758–1840
Scottish painter
Born in Edinburgh, he was a pupil of ALLAN RAMSAY. The inventor Patrick Miller (1731–1815) partly financed his visit to Italy (1782–84), which had a considerable influence on his work. Back in Edinburgh he established a reputation as a portrait painter, his portrait of ROBERT BURNS in the Scottish National Gallery being particularly famous. He later confined himself to landscape painting, and set up a school where his children also taught.

Nasmyth, James 1808–90
Scottish engineer
Born and educated in Edinburgh, the son of the painter ALEXANDER NASMYTH, he established the Bridgewater Foundry at Patricroft in 1836. His steam hammer was devised in 1839 for forging an enormous wrought-iron paddle-shaft. Three years later he came across an identical steam hammer in a works at Le Creusot in France – it had been adapted from his own scheme-book. Nasmyth patented his invention, and it was adopted by the Admiralty in 1843. His other inventions included a steam pile-driver, a planing machine, and a hydraulic punching machine. He published *Remarks on Tools and Machinery* (1858) and *The Moon* (1874). 🕮 J A Cantrell, *James Nasmyth and the Bridgewater Foundry* (1985)

Nasmyth, Patrick 1787–1831
Scottish landscape painter
Born in Edinburgh, the son of ALEXANDER NASMYTH, he settled in England, painted many English scenes and became known as the 'English HOBBEMA'.

Nasser, Gamal Abd al- 1918–70
Egyptian statesman
He was born in Alexandria. As an army officer with bitter experience of the mismanaged Palestine campaign of 1948, he became dissatisfied with the inefficiency and corruption of the FAROUK regime, and founded the military junta which led to its downfall. Chief power behind the coup of 1952, he was mainly responsible for the rise to power of General MOHAMMED NEGUIB. Tension between the two grew, and Nasser assumed the office of prime minister (April 1954) and then president (November 1954) by deposing Neguib. Nasser was officially elected president in 1956, and his nationalization of the Suez Canal in that year led to Israel's invasion of the Sinai. When Anglo-French forces intervened, widespread differences of opinion in Great Britain and elsewhere, coupled with veiled Russian threats, enabled Nasser to turn an abject military debacle into

a political victory. His aim was to build an Arab empire stretching across North Africa, the first step being the creation, by federation with Syria, of the United Arab Republic, of which Nasser was president in February 1958. In March 1958 Yemen and the UAR formed the United Arab States. This was followed by a sustained effort to break up the Baghdad Pact and liquidate the remaining sovereign states in the Middle East, a policy which succeeded in Iraq, but was thwarted in Jordan and Lebanon by the deployment of US and British forces. His plans for unity among the Arab states received a setback when Syria withdrew from the UAR and when the union with the Yemen was dissolved (1961). In 1964, however, the UAR formed joint presidency councils with Iraq and the Yemen. After the six-day Arab–Israeli War (1967), heavy losses on the Arab side led to Nasser's resignation, but he was persuaded to stay on, and he died in office, one year before the completion of one of his greatest projects, the Aswan High Dam. 🕮 Robert St John, *The Boss* (1961)

Nast, Condé Montrose 1873–1942
US magazine publisher
Born in New York City, he grew up in St Louis, Missouri, and studied in Washington, DC, completing a law degree in 1898. He successfully ran his family's printing business, and in 1900 was offered a job as advertising manager at the magazine *Collier's Weekly*. By 1905 he had greatly improved its revenue. He left in 1907 to run a dressmaking pattern company, and in 1909 acquired the ailing *Vogue* magazine, soon boosting its success. He purchased other titles including *Vanity Fair* in 1913–15, and in 1921 established his own printing plant. His business was severely affected by the Depression, and *Vanity Fair* closed in 1936, though he successfully launched *Glamour of Hollywood* in 1939. Famed for his luxurious lifestyle and glamorous parties, he never recovered financially, although his company survives. 🕮 Caroline Seebohm, *The Man Who Was Vogue* (1982)

Nast, Thomas 1840–1902
US cartoonist and illustrator
Born in Landau, Germany, he went to New York City in 1846 and became a staff artist for *Harper's Weekly* during the Civil War. He used his political cartoons to expose the corruption of the Tweed Ring in New York's Tammany Hall (1869–72), and his devastating caricatures of WILLIAM MARCY TWEED, grotesquely swollen with graft but still recognizable, led to Tweed's discovery and arrest in Spain. Nast also originated the donkey and the elephant as symbols of the Democratic and Republican parties, and he helped to create the modern image of Santa Claus.

Nathan, George Jean 1882–1958
US writer, editor and critic
Born in Fort Wayne, Indiana, he was known for his caustic drama reviews and his satirical observations on US life and culture. He was a founder and editor (1924–30) of the *American Mercury* with H L MENCKEN.

Nathan, Isaac 1790–1864
Australian composer and music teacher
Born in Canterbury, Kent, England, he was musical librarian to King GEORGE IV, and a friend of the poet BYRON whose *Hebrew Melodies* (1815) Nathan set to music inspired by Jewish chants. Moving with his family to Australia in 1841, he became choirmaster of St Mary's Cathedral, Sydney. He published *Australia the Wide and Free* in 1842, and the first opera to be composed and performed in Australia, *Don John of Austria* in 1847. He also composed a dramatic scena, *Leichhardt's Grave*, and in 1849 published *The Southern Euphrosyne*, which included the first harmonizations of Aboriginal music.

Nathans, Daniel 1928–99
US microbiologist and Nobel Prize winner
Born in Wilmington, Delaware, of Russian–Jewish extraction, he studied at the University of Delaware and Washington University School of Medicine. From 1955 to 1957 he worked at the National Cancer Institute of the National Institutes of Health. As a guest at the Rockefeller University, New York (1959–62), he researched protein biosynthesis. Professor at Johns Hopkins University from 1962, he pioneered the use of restriction enzymes to fragment DNA molecules, enabling him to make the first genetic map and to identify the location of specific genes on the DNA. For this work he shared the 1978 Nobel Prize in physiology or medicine with HAMILTON SMITH and WERNER ARBER. In 1993 he was awarded a US National Medal of Science.

Nation, Carry Amelia, *née* **Moore** 1846–1911
US temperance crusader
She was born in Garrard County, Kentucky. As the widow of an alcoholic, she was adamantly opposed to the use of liquor, and conducted a series of raids on saloons in Kansas and other states (1899–1909), breaking bottles and destroying furniture with a hatchet. Her frequent arrests focused public attention on the cause of Prohibition, and she often appeared as a temperance lecturer.

Natta, Giulio 1903–79
Italian chemist and Nobel Prize winner
Born in Imperia, near Genoa, he first studied mathematics at the university there, but switched to chemical engineering at Milan Polytechnic Institute, where he later became assistant lecturer in chemistry. In 1933 he was appointed professor of chemistry at the University of Pavia, and two years later became director of the Institute of Physical Chemistry in Rome. He was appointed professor of chemistry in Turin in 1937 and from 1938 held the post of professor and director of the Milan Institute of Industrial Chemistry until his retirement in 1973. His early work concerned heterogeneous catalysts used in a number of industrial processes and in 1938 he initiated a programme for the production of artificial rubber. His most important work used the organo-metallic catalysts developed by KARL ZIEGLER for the polymerization of propene to give polypropylene containing uniformly oriented methyl groups. In 1963 he shared the Nobel Prize in chemistry with Ziegler.

Nattier, Jean Marc 1685–1766
French artist
Born in Paris, he executed historical pictures and portraits, including those of PETER THE GREAT and the empress CATHERINE THE GREAT of Russia, but after losing his money in the JOHN LAW financial crisis he took up the fashionable stereotyped style of court portraiture now labelled 'le portrait Nattier' for the court of LOUIS XV.

Naughtie, (Alexander) James 1951–
Scottish journalist and broadcaster
Born in Aberdeenshire, he studied at the universities of Aberdeen and Syracuse, and worked for *The Scotsman* (1977–84) and *The Guardian* (1984–88), becoming the latter's chief political correspondent. He presented BBC Radio 4's *The World at One* from 1988 to 1994, subsequently joining the *Today* programme (1994–), and also presents Radio 4's *Book Club* (1998–) and the annual Proms concerts (1991–) on radio and television.

Naughton and Gold, *properly* **Charles Naughton** 1887–1976 and **Jimmy Gold**, *originally* **James McGonigal** 1886–1967
Scottish comedians
Born in Glasgow, they first appeared as 'Naughton and Gold' at the Hippodrome, Glasgow, in 1908, and the same year made their London debut at the Brixton Empire. In the early 1930s they joined several other double acts to form the London Palladium Crazy Gang, which raised their prestige from routine comedy to star billing. Their burlesque on British builders gave them the immortal catchphrase, 'Turn it round the other way'. They appeared in many Royal Variety Performances, and from 1947 staged Crazy Gang revival shows at the Victoria Palace, London. Their films include *Okay for Sound* (1937) and *Gasbags* (1940).

Nauman, Bruce 1941–
US artist
Born in Fort Wayne, Indiana, he studied mathematics and art at Wisconsin University. In the 1960s he became a leading exponent of Conceptual Art, using neon lights and holograms in addition to producing minimalist sculptures from more conventional materials, as in *From Hand to Mouth* and *Six Inches of my Knee Extended to Six Feet* (both 1967). From 1970 he worked principally with wood and fibreglass, exploring the relationship between sculpture and the gallery space, producing installations such as *House Divided* (1983), *Room with my Soul Left Out/Room That Does not Care* (1984) and *Dream Passage with Four Corridors* (1984, Pompidou Centre, Paris). More recent works include the video installations *World Peace* (1996) and *Setting a Good Corner* (1999). His sound installation *Raw Materials* was presented in the Turbine Hall of Tate Modern in 2004.

Navier, Claude Louis Marie Henri 1785–1836
French civil engineer
He was born in Dijon. Educated at the École Polytechnique and the École des Ponts et Chaussées, he taught, for much of his life, at one or the other of these schools, being principally occupied

in developing the theoretical basis of structural mechanics and the strength of materials, as well as the work done by machines. Recognizing the importance of being able to predict the limits of elastic behaviour in structural materials, his formulae represented one of the greatest single advances in structural analysis ever made. He was responsible for the construction of a number of elegant bridges over the River Seine, but one of his most ambitious designs, a suspension bridge in Paris, encountered both engineering and political problems, to such an extent that it was dismantled just before completion.

Navratilova, Martina 1956–
US tennis player
Born in Prague, Czechoslovakia (Czech Republic), she played for Czechoslovakia in the Federation Cup for three years. In 1975 she defected to the USA (US citizen 1981) and immediately turned professional. Her rivalry with CHRIS EVERT was one of the great features of the game from 1975. She won a record nine singles titles at Wimbledon (1978–79, 1982–87, 1990) and the US Open four times (1983–84, 1986–87) and recorded over 100 tournament successes. She also won the Grand Slam twice. Her impressive number of wins makes her second only to MARGARET SMITH COURT. In 1994, having reached the final at Wimbledon, she retired from regular competitive singles play. She continued to play in doubles matches, however, winning a further four Grand Slam mixed doubles titles, including victory at the 2006 US Open a few months before her fiftieth birthday.

Nay, Ernst Wilhelm 1902–68
German painter
He was born in Berlin and studied there under KARL HOFER. His works were banned by the Nazis for being degenerate, but EDVARD MUNCH helped him by financing working trips to Norway. His style underwent many changes, but Expressionism (and in particular the works of WASSILY KANDINSKY) is basic to his art. He achieved international recognition in the 1950s with his brightly coloured *Disc Pictures*, which continued his exploration of the relationship between form and colour. He wrote a treatise, *Vom Gestaltwert der Farbe* (1955, 'On the Structural Value of Colour').

Nazarbaev, Nursultan Abishevich 1940–
Kazakhstan politician
Originally a metalworker, he turned to party duties in 1969 and rose steadily in the 1970s and dramatically in the 1980s. He was chairman of the Kazakhstan Council of Ministers by 1984, and was made first secretary of the Kazakh Communist Party in 1989. In 1990 he was chosen for the Soviet politburo and became president of the Kazakh Supreme Soviet. As elected president of Kazakhstan in 1991 he took his republic out of the USSR but kept it in the new Commonwealth of Independent States (CIS). A referendum in 1995 extended his presidential term, and he was re-elected in 1999 and again in 2005, although the elections were criticized by international observers.

Nazianzus, Gregory of *See* GREGORY OF NAZIANZUS, ST

Nazimova, Alla, *originally* **Alla Leventon** 1879–1945
US actress
Born in Yalta, Russia, she studied under STANISLAVSKY in Moscow, made her debut in St Petersburg (1904), and appeared in New York as Hedda Gabler (1905). In 1910 she took over the 39th Street Theatre, rechristening it 'The Nazimova', and became a highly popular dramatic actress, later specializing in the plays of IBSEN, IVAN TURGENEV, CHEKHOV and EUGENE O'NEILL. She had a successful period in films, which included *The Brat*, *Camille*, *A Doll's House*, *The Red Lantern* and her own *Salomé*, based on the BEARDSLEY illustrations to OSCAR WILDE's play.

Nazor, Vladimir 1876–1949
Croatian poet
Born in Postire on the island of Brač, he wrote lyrics and ballads as well as epic poems and dramatic works in a style similar to the Symbolists. His works include *Slav Legends* (1900), *Lirika* (1910, 'Lyrics'), *Carmen Vitae*, an anthology (1922), and a diary of his experiences with the Yugoslav partisans in World War II.

Nazrul Islam, Kazi *See* ISLAM, KAZI NAZRUL

N'Dour, Youssou 1959–
Senegalese singer, musician and composer
Born in Dakar, Senegal, into a musical family of griots, he developed a style based on the traditional music of the Wolof tribe of Senegal, but with added influences from Cuban, jazz, and later rock music. His Étoile de Dakar band became African superstars, and his magnificent singing voice brought him to the attention of PETER GABRIEL and PAUL SIMON. His initial western albums were not a success, and many felt he had left too much of Senegal behind him, but he has gone on to become a major attraction on the concert circuit with a spectacular stage show, and is one of the major artists bringing African music to a wider global audience. 'Seven Seconds', his 1994 duet with Neneh Cherry (1964–), reached number three. In 2005 his album *Egypt* won a Grammy award.

Neagle, Dame Anna, *originally* **Marjorie Robertson** 1904–86
English actress
Born in London, she studied and taught dance and was a chorus girl before graduating to leading roles, making her film debut in 1930. Under the tutelage of director Herbert Wilcox, whom she later married (1943), she emerged as a major star of historical film dramas, offering genteel portraits of inspiring heroines such as *Victoria the Great* (1937) and *The Lady With the Lamp* (1951). A series of musicals made her Great Britain's top box-office attraction but later attempts to tackle contemporary subjects were ill-judged and she retired from the screen in 1958. She retained the affection of British audiences, later stage appearances including *Charlie Girl* (1965–71) and *My Fair Lady* (1978–79). Created DBE in 1969, she wrote two autobiographies, *It's Been Fun* (1949) and *There's Always Tomorrow* (1974).

Neal, John 1793–1876
US editor, poet, novelist and critic
Born in Falmouth, Maine, he went into business but failed, qualified as a lawyer, then became editor of *Portico*, a literary monthly published by the chauvinistic Delphian Club, Baltimore. He sometimes signed himself 'Jehu O'Cataract'. His melodramatic novel *Keep Cool* (1817), about a man's guilt over the death of his opponent in a duel, made him famous. Among his many other novels is *Logan, A Family History* (1822), about an (actual) Englishman who married the queen of a Native American tribe. Soon after its publication Neal went to England, where he acted as secretary to JEREMY BENTHAM. His finest novel, *Rachel Dyer*, about a Salem witch, was published in 1828. His *Wandering Recollections of a Somewhat Busy Life* (1869) is a useful source book.

Neal, Patricia (Patsy Louise) 1926–
US actress
Born in Packard, Virginia, she studied drama at Northwestern University in Evanston, Illinois, and worked as a model before making her Broadway debut in *The Voice Of The Turtle* (1946). Joining the New York Actors Studio, she won a Tony award for *Another Part of the Forest* (1946) and made her film debut in *John Loves Mary* (1949). Hollywood squandered her talents on a succession of conventional roles, though she later proved her worth in films like *A Face In The Crowd* (1957), *Breakfast At Tiffany's* (1961) and *Hud* (1963, Best Actress Academy Award). Her brave fight to regain her health after several massive strokes in 1965 was rewarded with the Heart of the Year award from President LYNDON B JOHNSON and a further Academy Award nomination for *The Subject Was Roses* (1968). She later appeared in a number of television productions (notably *The Homecoming*, 1971, and *Things In Their Season*, 1974) and more recently in the film *Cookie's Fortune* (1999). She was married (1953–83) to the writer ROALD DAHL and has written an autobiography *As I Am* (1988). 🕮 Stephen Michael Shearer, *Patricia Neal: An Unquiet Life* (2006)

Neale, Edward Vansittart 1810–92
English social reformer
Born in Bath and educated at Oxford, he became a barrister, and from 1851 was a pioneer Christian Socialist and an advocate of co-operation. He founded the first co-operative shop in London, and became general secretary of the Central Co-operative Board (1875–91).

Neale, John Mason 1818–66
English hymnologist
Born in London, he studied at Trinity College, Cambridge, and from 1846 was warden of Sackville College, East Grinstead. He wrote many books on church history, but is remembered chiefly for his hymns, and many of his translations are cherished worldwide. Among his best-known pieces are 'Jerusalem the golden' and 'O happy band of pilgrims'. His *Collected Hymns* was published in 1914.

Nearchus 4th century BC
Macedonian general
Born in Crete, he settled in Amphipolis during the reign of PHILIP II of Macedon, and became the companion of the young ALEXANDER THE GREAT. In 330 BC he was governor of Lycia, and in 329 he joined Alexander in Bacria with a body of Greek mercenaries, and took part in the Indian campaigns. Having built a fleet on the

Hydaspes (Jhelum), Alexander gave Nearchus the command. He left the Indus in 325 BC, and, skirting the coast, reached Susa in 324 BC. His narrative is preserved in the *Indica* of ARRIAN.

Neave, Airey 1916–79
British Army intelligence officer and politician
Born in London, he was educated at Eton and Merton College, Oxford. In World War II he was wounded at Calais (1940) and taken prisoner. He escaped from a Polish POW camp but was recaptured and sent to the maximum security prison at Colditz Castle, from which he was the first British officer ever to escape (1942). On his return to London he established new underground movements and trained aircrews in the means of escape in occupied territory. He was awarded many medals for his war service, including the Croix de Guerre. In 1943 he was called to the Bar, and as a lieutenant colonel served charges on many of the war criminals who stood trial at Nuremberg. He entered parliament for the Conservatives at his third attempt, in 1951, held several junior government posts, survived a heart attack in 1959, and became governor of Imperial College, London (1963–71). He was prominent in the group that deposed EDWARD HEATH as party leader (1975) and replaced him with MARGARET THATCHER, who rewarded Neave by appointing him head of her private office and, in 1979, Secretary of State for Northern Ireland. As an opponent of power-sharing and of the withdrawal of British forces from the Province, Neave was killed by an INLA (Irish National Liberation Army) car bomb outside the House of Commons. His writings include *They Have Their Exits* (1953), *Saturday at MI9* (1969), and *The Flames of Calais* (1975), describing his wartime experiences.

Nebuchadnezzar or **Nebuchadrezzar II** d.562 BC
King of Babylon
He succeeded his father Nabopolassar and founded the New Babylonian Empire. He rebuilt Babylon and restored almost every temple in the land. He extended the Babylonian Empire as far as the Mediterranean, defeating the Egyptians at Carchemish (605 BC) and gaining control of Syria. He captured Jerusalem in 597 and 586 BC, when he destroyed the city and deported the Jews into exile in Babylonia. 🕮 D J Wiseman, *Nebuchadrezzar and Babylon* (1985)

Neckam or **Nequam, Alexander** 1157–1217
English scholar
Born in St Albans on the same night as RICHARD I, he was nursed by his mother along with the future king. Educated at St Albans and Paris (where he lectured), he returned to England to be schoolmaster at Dunstable. In 1213 he became abbot of Cirencester. In his *De naturis rerum* ('On the Nature of Things') and *De utensilibus* ('On Instruments') he was the first in Europe to describe the use of a magnetic needle by sailors.

Necker, Anne Louise Germaine *See* STAËL, MADAME DE

Necker, Jacques 1732–1804
French politician and financier
Born in Geneva, he went to Paris as a banker's clerk when he was 15, and in 1762 established the London and Paris bank of Thellusson and Necker. In 1776 he was made the director of the Treasury, and next year director-general of Finance. Some of his remedial measures assisted France, but his most ambitious scheme – the establishment of provincial assemblies, one of whose functions should be the apportionment of taxes – proved a disastrous failure. His retrenchments were hateful to the queen, and his famous *Compte rendu* (1781, 'Financial Report') prompted his dismissal. He retired to Geneva, but was recalled to Paris in 1788, where he won popularity by recommending the summoning of the Estates General. However, his proposals for reform displeased the king and he was dismissed. His dismissal contributed to the public mood which culminated in the storming of the Bastille. The king recalled him in 1789, but he retired the following year. He was the father of Madame de STAËL.

Nedreaas, Torborg 1906–87
Norwegian novelist
Born in Bergen, of Jewish extraction, she turned to writing late in life, after World War II. She was a left-wing feminist, and her books highlight social life and class struggle in Norwegian urban society. Especially powerful are *Musikk fra en blå brønn* (1960, Eng trans *Music from a Blue Well*) and *Ved neste nymåne* (1971, Eng trans *At the Next New Moon*), about a girl called Herdis growing up in Bergen between the wars. Her best stories were collected in *Stoppested* (1953, 'Stopping Place'). 🕮 H Eriksen, *Nedreaas* (1979)

Needham, (Noël) Joseph (Terence Montgomery) 1900–95
English biochemist and historian of Chinese science
Born in London and educated at Cambridge, he was university demonstrator in biochemistry there (1928–33), working mainly to discover the process underlying the development of the fertilized egg into a differentiated and complex organism, which he published in *Chemical Embryology* (1931). He was Reader from 1933 to 1966, and Master of Gonville and Caius College, Cambridge, from 1966 to 1976. His publications at first reflected philosophical problems in science, like *Man a Machine* (1927) and *The Sceptical Biologist* (1929), but these began to give way to historical preoccupations shown in *A History of Embryology* (1934) and *History is on Our Side* (1945). During World War II he became head of the British Scientific Mission in China and Scientific Counsellor at the British Embassy there. Adviser to the Chinese National Resources Commission, the Chinese Army Medical Administration and the Chinese Air Force Research Bureau, he became director of the department of natural sciences at UNESCO (1946–48), which he helped found. He published *Chinese Science* (1946), and *Science and Civilisation in China* (12 vols, 1954–84), a work of the foremost significance concerning the history of science and the Chinese historical achievement. He also published on the history of acupuncture and Korean astronomy and clocks, as well as a vast body of other work. Needham was elected Fellow of the Royal Society (1941) and the British Academy (1971), and in 1992 was made Companion of Honour.

Néel, Louis Eugène Félix 1904–2000
French physicist and Nobel Prize winner
Born in Lyons, he graduated from the École Normale Supérieure, and later became professor of physics at Strasbourg University (1937–40). In 1940 he moved to Grenoble and helped to make it one of the most important scientific centres in France, becoming director of the Centre for Nuclear Studies there in 1956. His research was concerned with magnetism in solids, predicting (1936) the existence of a special type of magnetic ordering called 'antiferromagnetism', which was experimentally confirmed in 1938, with full neutron diffraction confirmation in 1949. His work on ferromagnetic materials saw great application in the coating of magnetic tape, the permanent magnets of motors and the magnetic storage media used by computers. He shared the Nobel Prize in physics in 1970 with HANNES ALFVÉN. He also studied the past history of the Earth's magnetic field.

Neer, Aert van der 1603/4–1677
Dutch painter
Born in Amsterdam, he specialized in moonlit canal and river scenes and, although these paintings are now regarded as major works of the Dutch school, received little recognition in his own time. In 1658 he gave up painting in order to open a wineshop. He was no more successful in this venture and returned to painting in 1662 after being declared bankrupt. Two of his sons, Eglon (1634–1703) and Jan (1638–65), became artists.

Neeson, Liam, *originally* **William John Neeson** 1952–
Northern Irish actor
Born in Ballymena, he was a boxer, architect's clerk and had studied to become a teacher before turning to acting and making his stage debut in *The Risen* (1976). He worked at the Lyric Players Theatre and at the Abbey Theatre in Dublin before making his film debut in *Excalibur* (1981). Tall and physically imposing but capable of great sensitivity, he appeared in such films as *The Bounty* (1984), *Lamb* (1985) and *The Mission* (1986) before moving to Hollywood in 1987. He established his viability as a film star with such diverse roles as the mute Vietnam veteran in *Suspect* (1987), the iconoclastic sculptor in *The Good Mother* (1988) and the gentle editor in *Husbands and Wives* (1992). He received BAFTA and Academy Award nominations for his powerful performance as the philanthropic industrialist in *Schindler's List* (1993). Subsequent films include *Nell* (1994), *Rob Roy* (1995), *Michael Collins* (1996), the *Star Wars* prequel *The Phantom Menace* (1999), *Kinsey* (2004) and *Batman Begins* (2005). He made his Broadway debut in *Anna Christie* (1993) opposite actress Natasha Richardson (1963–), whom he married in 1994. He was awarded an OBE in 2000.

Nefertiti (Neferneferuaten) *See* AKHENATEN

Negri, Ada 1870–1945
Italian poet
Born in Lodi, she became a teacher in a small primary school, and made her literary debut with *Fatalità* (1892, 'Destiny'), a

derivative and idealistic collection of humanitarian poems. Her subsequent works, nine more volumes of verse and a number of prose works, refined the political, feminist and mystical basis of her work. 🕮 M Magni, *L'opera di Ada Negri e la su umanità* (1961)

Neguib, Mohammed 1901–84
Egyptian leader
As general of an army division, he carried out a coup d'état in Cairo (1952) which banished King FAROUK I and initiated the 'Egyptian Revolution'. Taking first the offices of commander-in-chief and prime minister, he abolished the monarchy in 1953 and became president of the republic. He was deposed in 1954 and succeeded by Colonel GAMAL ABD AL-NASSER.

Negus, Arthur George 1903–85
English broadcaster and antiques expert
Born in Reading, Berkshire, the son of a cabinetmaker, he took over the family shop in 1920 and spent 20 years as an antique dealer. The shop was bombed during World War II, and in 1946 he joined the Gloucester firm of fine art auctioneers, Bruton, Knowles & Co, becoming a partner in 1972. Asked to expound on the merits and value of antiques, he became a regular panel member on the television series *Going for a Song* (1966–76), and his wry humour and expertise made him a popular broadcaster in such series as *Arthur Negus Enjoys* (1982) and *The Antiques Roadshow* (1982–83). His books include *Going for a Song: English Furniture* (1969) and *A Life Among Antiques* (1982).

Nehemiah 5th century BC
Old Testament prophet
He was cupbearer to ARTAXERXES I, who in 444 BC made him Governor-Extraordinary of Judea. He had the walls of Jerusalem rebuilt, and repopulated the city by drafts from the surrounding districts. In 432 BC he revisited Jerusalem, and either initiated or renewed and completed certain reforms which were among the most characteristic features of post-exilic Judaism. The canonical book of Nehemiah originally formed the closing chapters of the undivided work, Chronicles-Ezra-Nehemiah.

Neher, (Rudolph Ludwig) Caspar 1897–1962
German stage designer, painter and writer
He was born in Augsburg, where he formed a lasting friendship with his schoolmate BERTOLT BRECHT and developed left-wing political views. His artistic studies in Munich were interrupted by service in World War I, but he maintained contact with Brecht, illustrating and later designing some of the latter's early works. In 1924, both moved to Berlin, where their collaboration continued until Brecht fled the Nazis in 1933. It resumed after World War II, with the establishment in 1949 of the Berliner Ensemble, though Neher's involvement fell away after Brecht's death in 1956. Terming himself a 'stage-builder', Neher took a keen interest in materials and structure. His paintings show the influence of GEORGE GROSZ. 🕮 John Willett, *Caspar Neher – Brecht's Designer* (1986)

Neher, Erwin 1944–
German biophysicist and Nobel Prize winner
Born in Landsberg, he studied physics at the Technical University of Munich and the University of Wisconsin, joining the Max Planck Institute for Psychiatry in Munich (1970–72). He then moved to the Max Planck Institute for Biophysical Chemistry in Göttingen (1972), becoming director of the membrane biophysics department in 1983. In 1976, with BERT SAKMANN, he succeeded in recording the electric currents through single ion channels in biological membranes, which had been predicted by Sir ALAN HODGKIN and Sir ANDREW HUXLEY. They developed the 'patch-clamp' technique, which isolated a small section of cell membrane and permitted precise biophysical measurements to be made over a discrete area, a method that has revolutionized cell physiology. In 1991 Neher and Sakmann shared the Nobel Prize in physiology or medicine for this work.

Nehru, Jawaharlal, *known as* **Pandit ('teacher')** 1889–1964
Indian statesman
Born in Allahabad, the son of MOTILAL NEHRU, he was educated at Harrow and Trinity College, Cambridge. He read for the Bar, returned home and served in the High Court of Allahabad. A persistent vision of himself as an Indian GARIBALDI made him become a member of the Indian Congress Committee in 1918 and brought him, if with scientific reservations, under the spell of GANDHI. He was imprisoned by the British in 1921 and spent 18 of the next 25 years in jail. In 1929 he was elected president of the Indian National Congress, an office he often held afterwards, and was the leader of the movement's socialist wing. Although sympathetic to the Allied Cause in World War II, he, in common with other Congress Party leaders, did not co-operate and turned down the offer, brokered by STAFFORD CRIPPS, of dominion status for India in 1942. When India achieved independence in 1947, Nehru became her first prime minister and Minister of External Affairs. As democratic leader of the first republic within the Commonwealth, he followed a policy of neutralism and peacemaking during the Cold War, often acting as a go-between between the Great Powers, and originated the theory of non-aligment. He committed India to a policy of industrialization, to a reorganization of its states on a linguistic basis and, although championing his people's claim to Kashmir, acted with restraint to bring this outstanding dispute with Pakistan to a peaceful solution. His many works include *Soviet Russia* (1929), *India and the World* (1936), *Independence and After* (1950) and an *Autobiography* (1936). His daughter INDIRA GANDHI was later prime minister.

Nehru, Motilal 1861–1931
Indian nationalist leader, lawyer and journalist
He became a follower of GANDHI in 1919, founded the *Independent* of Allahabad and became the first president of the reconstructed Indian National Congress. In the 1920s he co-headed the Swaraj Party (with CHITTA RANJAN DAS) in which members of the Congress entered the legislatures, and wrote a report as a basis for Indian constitutional development and to solve the political differences between Hindus and Muslims. The report was not, however, acceptable to members of the All-India Muslim League, led by MUHAMMAD ALI JINNAH. He was the father of JAWAHARLAL NEHRU.

Neil, Andrew Ferguson 1949–
Scottish journalist
Born in Paisley, Strathclyde, and educated at Glasgow University, he worked briefly in the Conservative Party's research department before joining *The Economist* magazine (1973–83), becoming UK editor. He was appointed editor of *The Sunday Times* in 1983 without any previous experience of national newspapers. In his position there, with the encouragement of its proprietor, RUPERT MURDOCH, he changed the paper's soft-left bias and strongly supported most of the key policies of MARGARET THATCHER's government. He identified himself publicly with Murdoch's coup against the unions at Wapping in 1986, which led to the introduction of new labour practices in the newspaper industry. Neil left *The Sunday Times* in 1994, becoming a freelance writer and broadcaster, fronting his own discussion television programme *The Midnight Hour*. In 1996 he became editor-in-chief, then publisher in 1999, of Press Holdings, owners of *The Scotsman*, *Scotland on Sunday*, *Edinburgh Evening News*, *The European* and *Sunday Business* (latterly *The Business*). *The European* folded in 1999. In 2005, Press Holdings bought *The Spectator* and sold the *Scotsman* group. He has presented *This Week* and *The Daily Politics* on BBC1 since 2003, and since 2006 *Straight Talk* on BBC News 24. He was Lord Rector of St Andrews University from 1999 to 2002.
🕮 *Full Disclosure*, 1996

Neill, A(lexander) S(utherland) 1883–1973
Scottish educationalist and author
Born in Kingsmuir, Tayside, the son of a village schoolmaster, he became a pupil-teacher there (1899–1903), and assistant master at Kingskettle School, Fife (1903–06) and Newport Public School, Fife (1906–08). After studying English at Edinburgh University and working briefly in publishing he became headmaster of Gretna Public School (1914–17) and after World War I he taught at King Alfred School, Hampstead (1918–20). He was editor of *New Era* (1920–21) and started a community school at Hellerau, near Salzburg, which eventually settled at Leiston, Suffolk, in 1927 as Summerhill School, a progressive co-educational school which 'began as an experiment and became a demonstration'. It was an attempt to provide an education free even of the authoritarian overtones of other progressive schools. He held with SIGMUND FREUD that 'emotions are more important than intellect'. Many pupils were 'difficult' and Neill spent a lot of time in psychotherapy, at first called 'Private Lessons'. He was the most extreme and radical of British progressive schoolmasters and a great publicist, publishing over 20 books from *A Dominie's Log* (1916) to *Neill! Neill! Orange Peel!* (1973).

Neill, Stephen Charles 1900–84
Scottish missionary and theologian
He was born in Edinburgh, and from 1924 worked in south India as an evangelist, theological teacher, and latterly as the Anglican Bishop of Tinnevelly (Tirunelveli). He became deeply concerned with producing Tamil Christian literature and

promoting church union. Returning to Europe in 1944, he maintained his ecumenical interests through working with the World Council of Churches and lecturing in Hamburg, Nairobi, and elsewhere. His *Anglicanism* (1958), *Interpretation of the New Testament* (1962) and *History of Christian Missions* (1964) remain classics in their fields, as does the *History of the Ecumenical Movement* (1954, edited with Ruth Rouse).

Neilson, Donald, *originally* **Donald Nappey** 1936–
English murderer and kidnapper
Born near Bradford, he was convicted of four murders. Because of the black hood he wore as a disguise, he became known as 'the Black Panther'. Three murders were committed during burglaries early in 1974. Soon after, 17-year-old Lesley Whittle was abducted from her home, and a ransom demand of £50,000 was accompanied by a death threat. Lesley's naked body was found at the foot of a ventilation shaft two months later. Neilson evaded the police until late 1975, when a security guard he had shot and wounded was able to provide a description. Disarmed by police in December 1975, he received life sentences for the murders and 21 years for kidnapping.

Neilson, James Beaumont 1792–1865
Scottish engineer
Born in Shettleston, Glasgow, he invented the hot blast, which revolutionized iron manufacture in 1828, and was chief engineer and manager of Glasgow Gasworks from 1817 to 1847.

Neilson, Julia 1868–1957
English actress
She was born in London and after a successful career at the Royal Academy of Music made her debut at the Lyceum in 1888. Her greatest success was as Rosalind in the record-breaking run of *As You like It* (1896–98). She married FRED TERRY, who often appeared with her and who partnered her in management from 1900. Their children Dennis (1895–1932) and Phyllis (1892–1977) Neilson-Terry also became famous for their acting, the latter especially in the title role of *Trilby*, and also for their productions.

Neisser, Ulric Richard Gustav 1928–
US psychologist
Born in Kiel, Germany, he emigrated with his family to the USA in 1933. He gained his PhD at Harvard in 1956 and subsequently taught at Brandeis University (1957–66), Cornell University (1967–80, 1996–), and Emory University (1983–96). The modern growth of cognitive psychology received a major boost from the publication in 1967 of the first and most influential of his books, *Cognitive Psychology*. It synthesized a large body of experimental data on memory, attention, thought and perception in a timely theoretical package, setting the agenda and serving as a framework for much research in the area. However, in his later writings, such as *Cognition and Reality* (1976), he became critical of the methodology of much cognitive psychology, faulting it for being 'ecologically invalid'. His subsequent research examined concepts of memory of events and the sociology of measurements of intelligence, recorded in such books as *The Rising Curve: Long-term Gains in IQ and Related Measures* (1998) and *Affect and Accuracy in Recall* (2006).

Nekola, Karel 1857–1915
Scottish pottery decorator
Originally a carpenter with his father in Bohemia, he was appointed decorator at the Fife Pottery of Robert Heron & Son, in Gallatown (now part of Kirkcaldy) in 1882. Wemyss Ware was one of the products of the pottery, and Nekola was responsible for exerting a great deal of influence throughout its most popular period (1888–1915). Highly decorative and extremely colourful flowers, fruit, animals and birds were his main subject matter, which contrasted strikingly against the white body of each pot. He stayed with the firm for 30 years, painting and teaching others, including his sons Carl and Joseph.

Nekrasov, Nikolai Alekseyevich 1821–78
Russian lyrical poet
Born near Vinitza, Podolia, he worked as a journalist and critic. A poet of the Realistic school, he made his name with poems depicting the social wrongs of the peasantry, such as his unfinished narrative epic, *Komu na Rusi zhit khorosho?* (1879, Eng trans *Who Can Be Happy and Free in Russia?*, 1917). 🕮 M Peppard, *Nikolai Alexeyevich Nekrasov* (1967)

Nelken, Margarita 1896–1968
Spanish politician and feminist
Born in Madrid, the daughter of German Jews, she did not achieve Spanish nationality until 1931. During her early years she was a painter, exhibiting her works in Paris and Vienna as well as Spain, but following a severe eye illness dedicated herself to literary criticism. She was also active on behalf of women's rights, publishing *The Social Condition of Women* (1922), as well as being involved in land reform movements in Extremadura and Andalucía. During the Second Republic (1931–36) she was successful in all three general elections as a deputy for the Socialist Party (PSOE). She agitated for land reform, was active in the national arbitration boards, and formed part of the National Committee of Women against War and Fascism. Her impatience with the parliamentary process led her to become one of the most radical Socialist deputies. During the Spanish Civil War (1936–39) she led various campaigns for the mobilization of women. She joined the Communist Party (PCE) in 1937. After the war, she was exiled in Paris, Moscow and finally Mexico, where she died.

Nelson, (John) Byron, Jnr 1912–2006
US golfer
Born in Fort Worth, Texas, he became one of the USA's most outstanding players, winning the US Open in 1939, the US Masters twice (1937, 1942), and the PGA (Professional Golfers' Association) title twice (1940, 1945). In 1945 he won a remarkable eleven consecutive US Tour events – an all-time record. He played in two Ryder Cup matches, and retired in 1955 to become a broadcaster and coach. Shortly after his death he was awarded a Congressional Gold Medal.

Nelson, George 1907–86
US designer, architect and writer
Born in Hartford, Connecticut, he graduated in architecture and travelled in Europe during the early 1930s, familiarizing himself with the work of the Modern movement. Its influence is evident in his design work, the best known being his range of storage furniture (1946) for the manufacturer Herman Miller, whose design policy he directed. He also commissioned CHARLES EAMES to collaborate with the firm. He was editor of *Architectural Forum* from 1935 to 1944, and wrote widely on design and architectural subjects.

Nelson, Horatio Nelson, Viscount 1758–1805
English admiral
He was born in Burnham Thorpe rectory, Norfolk. He entered the navy in 1770, made a voyage to the West Indies, and served in the Arctic expedition of 1773, and afterwards in the East Indies. As lieutenant of the *Lowestoft* frigate (1777) he went to Jamaica, and in 1779 was posted to the *Hinchingbrook* frigate. In 1780 he commanded the naval force in the expedition against San Juan. In 1781 he commissioned the *Albemarle* and joined the squadron under Samuel, 1st Viscount HOOD in the USA. In 1784 he was appointed to the frigate *Boreas* for service in the West Indies, where he enforced the Navigation Act against the USA. Here he married a widow, Mrs Frances Nisbet (1761–1831), and in 1787 retired with her to Burnham Thorpe for five years. At the outbreak of the French Revolutionary Wars (1792–1802) he commanded the *Agamemnon* and accompanied Lord Hood to the Mediterranean. When Toulon was given up to the Allies Nelson was ordered to Naples, where he first met EMMA HAMILTON, the wife of the British ambassador. In 1794 he commanded the naval brigade at the reduction of Bastia and of Calvi, where he lost his right eye. In 1796 he inflicted a signal defeat with John Jervis (Lord SAINT VINCENT) on the Spanish fleet off Cape St Vincent. Promoted to rear admiral, he was sent with an inadequate squadron to seize a richly laden Spanish ship at Santa Cruz, where he lost his right arm. In 1798, commanding the *Vanguard*, he defeated the French fleet by his victory at the Battle of the Nile, off Aboukir Bay. He returned in triumph to Naples, to a hero's welcome from Emma Hamilton, who became his mistress. Nelson was raised to the peerage as Baron Nelson of the Nile, parliament voted him a pension of £2,000 a year, the East India Company awarded him £10,000 and the King of Naples conferred on him the title of Duke of Bronte, in Sicily. He resigned his command and went back to England with the Hamiltons, where Emma gave birth to a daughter, Horatia, and Nelson separated from his wife. In 1801 he was promoted to vice-admiral, and appointed second in command of the expedition to the Baltic, under Sir Hyde Parker (1739–1807). In the face of Parker's irresolution, Nelson disregarded orders and engaged in the Battle of Copenhagen, which he won decisively. In 1803, on the resumption of the war, he was made commander in the Mediterranean. In 1805 he won his greatest victory against the French and Spanish fleets at Trafalgar. He directed the engagement from the *Victory*, but was mortally wounded. His body was brought home and buried in St Paul's Cathedral. 🕮 Robert Southey, *The Life of Nelson* (1813)

Nelson, Thomas 1780–1861
Scottish publisher
He was born in Edinburgh and the company of the same name was established in 1798. Specializing in tracts, educational books and affordable reprints, the company's authors included JOHN BUCHAN.

Nelson, Willie (Hugh) 1933–
US country singer and songwriter
Born in Abbott, Texas, he began performing at the age of ten, and was a disc jockey for a time, but his initial success came as a songwriter in Nashville in the early 1960s. He continued to write and record throughout the decade, but reached a watershed of personal and professional frustration in 1970, and returned to Texas. His progressive, outlaw country style found a new audience in Austin, and he became a major star with albums like *Red Headed Stranger* (1975) and 1978's *Waylon and Willie* (with Waylon Jennings, 1937–), moving out from country to embrace both rock and jazz standards, but without losing his roots in the music. He launched his annual Farm Aid concerts in 1985, and continued to record and tour prolifically. 🕮 Graeme Thomson, *Willie Nelson: The Outlaw* (2006)

Nemerov, Howard 1920–91
US poet, novelist and playwright
Born in New York City, he was based in England while serving with the Royal Canadian Air Force during World War II. He wrote several novels, including *The Melodramatists* (1949), but won greater acclaim as a poet. His relatively accessible verse, in which, as he said, he wrote 'of history from the point of view of the loser', includes *The Image and the Law* (1947) and *The Next Room of the Dream* (1962). His *Collected Poems* (1977) won the National Book Award.

Nenni, Pietro 1891–1980
Italian socialist politician
Born in Faenza, Romagna, he became an agitator at the age of 17. As editor of the socialist paper *Avanti!* he was exiled by the Fascists in 1926, and served as a political commissar for the International Brigade during the Spanish Civil War. He became Secretary-General of the Italian Socialist Party (PSI) in 1944, vice-premier in the DE GASPERI coalition (1945–46) and Foreign Minister (1946–47). From 1963 to 1968 he once again served as vice-premier in the four-party left-centre coalition headed by ALDO MORO. In 1968 he accepted the post of Foreign Minister but resigned in 1969.

Nennius fl.769
Welsh writer
He is reputedly author of the early Latin compilation known as the *Historia Britonum*, which gives an account of the origins of the Britons, the Roman occupation, the settlement of the Saxons, and King ARTHUR's twelve victories. It contains much material of doubtful historical significance, and its real value lies in its preservation of material needed for the study of early Celtic literature in general, and the Arthurian Legend in particular. 🕮 JF Kenney, *Sources for the Early History of Ireland* (1929)

Nepomuk, St John of *See* JOHN OF NEPOMUK, ST

Nepos, Cornelius c.99–c.24 BC
Roman historian
A native of Pavia or Hostilia, northern Italy, he was the contemporary and close friend of CICERO, and CATULLUS dedicated his poems to him. His *De Viris Illustribus* ('Lives of Famous Men'), of which only some 25 (mainly on Greek warriors and statesmen) survive, are written in a clear, straightforward style. He was the first to adopt the pairing of Greek and Roman soldiers and statesmen, a form later followed by PLUTARCH.

Nequam, Alexander *See* NECKAM, ALEXANDER

Neri, St Philip 1515–95
Italian mystic
Born in Venice, he went to Rome at the age of 18, and spent many years in charitable works, and teaching and praying. In 1551 he became a priest, and later, with his followers, formed the Congregation of the Oratory (1564). The community was finally established at Vallicella, where Philip built a new church (Chiesa Nuova) on the site of Santa Maria. He was canonized with IGNATIUS LOYOLA and others in 1622, and his feast day is 26 May.

Nernst, Walther Hermann 1864–1941
German physical chemist and Nobel Prize winner
Born in Briesen, West Prussia, he studied physics at the universities of Zurich, Berlin, Graz and Würzburg, and in 1887 he became assistant to WILHELM OSTWALD at Leipzig. In 1891 he moved to Göttingen, first as associate professor and from 1894 as professor of physical chemistry. He succeeded Hans Landolt in the chair of physical chemistry at the University of Berlin in 1905. During World War I he engaged in military activities, including gas warfare. From 1922 to 1924 he was president of the Physikalisch Technische Reichsanstalt, but then returned to the chair of physics at the university. He retired in 1933, being out of favour with the Nazi regime. Nernst is regarded as one of the co-founders of physical chemistry, along with Ostwald, JACOBUS HENRICUS VAN'T HOFF and SVANTE AUGUST ARRHENIUS. His earliest research was in electrochemistry and his development of the theory of electrode potential and the concept of solubility product were particularly important. He devised experimental methods for measuring dielectric constant, pH, and other physico-chemical quantities. The electrochemical work led to a special interest in thermodynamics and in 1906 he enunciated his heat theorem, which has come to be regarded as a statement of the third law of thermodynamics. This enables equilibrium constants for chemical reactions to be calculated from heat data. He later became concerned with the quantum theory and in particular with photochemistry. He received the Nobel Prize in chemistry in 1920. He was made an Honorary Fellow of the Chemical Society as early as 1911 and became a Foreign Member of the Royal Society in 1932. 🕮 Kurt A G Mendelssohn, *The World of Walter Nernst* (1973)

Nero *See panel p1153*

Neruda, Jan 1834–91
Czech writer
Born in Prague, he was brought up in poverty, an experience reflected in some of his work, notably *Povídky malostranské* (1878, Eng trans *Tales of the Little Quarter*, 1957), and became a teacher before switching to a career in journalism. He suffered from persistent ill health. He was a disciple of Romanticism but developed into the foremost classical poet in modern Czech literature. He is also known for some prose and drama. 🕮 M Novotný, *Zivot, Jana Nerudý* (4 vols, 1951–56)

Neruda, Pablo, *originally* **Ricardo Eliecer Neftalí Reyes** 1904–73
Chilean poet and Nobel Prize winner
Born in Parral and educated at Santiago, he made his name with *Veinte poemas de amor y una canción desesperada* (1924, Eng trans *Twenty Love Poems and a Song of Despair*, 1969). From 1927 he held diplomatic posts in East Asia and Europe (Spain during the Civil War) and in Mexico from 1940. On his way back to Chile from Mexico (1943) he visited the Inca city of Macchu Picchu, which was the inspiration for one of his best-known poems. Once settled in Chile again he joined the Communist Party and was elected to the senate in 1945. He travelled in Russia and China (1948–52), was awarded the Stalin Prize in 1953, and was later the Chilean ambassador in Paris (1970–72). His works include *Residencia en la tierra I, II and III* (1933, 1935, 1947, 'Residence on Earth'), *Alturas de Macchu Picchu* (1945, Eng trans *The Heights of Macchu Picchu*, 1966), which later became part of *Canto General* (1950, Eng trans in part as *Poems from Canto General*, 1966), and *Odas elementales* (1954, Eng trans *Elementary Odes*, 1961). In 1971 he was awarded the Nobel Prize in literature. 🕮 E Rodríguez Monegal, *El viajero inmovil* (1967)

Nerva, Marcus Cocceius c.32–98 AD
Roman emperor
He was elected (AD 96) by the senate after the assassination of DOMITIAN. He introduced liberal reforms after Domitian's tyranny, but lacked military support, and had to adopt TRAJAN as his successor.

Nerval, Gérard de, *properly* **Gérard Labrunie** 1808–55
French writer
Born in Paris, he was greatly influenced by reading his uncle's collection of occult books as a youth. At the age of 20, he published a translation of GOETHE's *Faust*, expanded as *Faust, et le second Faust* (1840), which HECTOR BERLIOZ drew on in his *La Damnation de Faust* (1846). He wrote in prose and verse, but his travels, criticism, plays and poems are less interesting than his fantastic short tales, the *Contes et facéties* (1852, 'Stories and Jests'), the partly autobiographical series *Filles du feu* (1854, Eng trans *Daughters of Fire*, 1923), and *La Bohème galante* (1855, 'Gallant Bohemian Life'). He is often seen as a precursor of both the Symbolist and Surrealist movements. 🕮 L Cellier, *Gérard de Nerval* (1956)

Nervi, Pier Luigi 1891–1979
Italian architect and engineer
Born in Sondrio, he graduated as an engineer then set up as a building contractor. His many works include the Berta Stadium

Nero AD 37–68
Roman emperor AD 54–68

Nero was born in Antium, son of Cnaeus Domitius Ahenobarbus and of AGRIPPINA, the Younger, daughter of GERMANICUS. His mother became the wife of the Emperor CLAUDIUS, who adopted him in AD 50. After the death of Claudius (54), the Praetorian Guard declared Nero emperor.

His reign began well, but the influence of his mother and his moral weakness and sensuality soon plunged him into debauchery, extravagance and tyranny. He caused BRITANNICUS, the son of Claudius, to be poisoned, and afterwards murdered his mother and his wife Octavia. After this SENECA, the Younger, was the main power behind the throne. In July AD 64 two-thirds of Rome was destroyed by fire. Nero is said to have been responsible, but this is doubtful, as is the story that he admired the spectacle from a distance while reciting his own verses about the sack of Troy. But he needed a scapegoat, and found one in the Christians, many of whom were cruelly put to death.

He rebuilt the city with great magnificence, and built a splendid palace on the Palatine hill; but in order to provide for his expenditure Italy and the provinces were plundered. A conspiracy against Nero in AD 65 failed, and Seneca and the poet LUCAN fell victims to his vengeance. In a fit of passion he murdered his second wife POPPAEA SABINA, by kicking her when she was pregnant. He then offered his hand to Antonia, daughter of Claudius, but was refused; whereupon he had her executed, and married Statilia Messallina, after murdering her husband. He also executed or banished many eminent persons.

Nero sought distinction as poet, philosopher, actor, musician and charioteer; as a poet he seems to have had some talent, and a few fragments survive from his poem on 'The Sack of Troy'. However, his patronage of the arts and promotion of musical and theatrical contests, in which he took part himself, caused much criticism and increased his unpopularity. In AD 68 the Gallic and Spanish legions, and after them the Praetorian Guards, rose against him to make GALBA emperor. Nero fled to the house of a freedman, four miles from Rome, and saved himself from execution by suicide.

📖 M Griffin, *Nero: The End of a Dynasty* (1985); B W Henderson, *The Life and Principate of the Emperor Nero* (1903).

> Nero took this name when he was adopted by Claudius, with whose family it was associated. It is said to be a Sabine word meaning 'courageous and energetic'.
>
> *Qualis artifex pereo!*
>
> 'How great an artist dies in me!'
>
> – Attributed words on the point of taking his life, quoted in Suetonius, *Nero*, 49.1.

in Florence (1930–32) and a complex of exhibition halls in Turin (1948–50). He achieved an international reputation by his designs for the two Olympic stadia in Rome (1960), in which bold and imaginative use is made of concrete for roofing in the large areas. He also designed San Francisco cathedral (1970). He was professor at Rome from 1947 to 1961. 📖 Ada Louise Huxtable, *Pier Luigi Nervi* (1960)

Nesbit, Edith 1858–1924
English writer
Born in London, the daughter of an agricultural chemist who died when she was three, she was educated at a French convent, and began her literary career by writing poetry, having met the ROSSETTIS and their friends. In 1880 she married the Fabian journalist Hubert Bland, and to help with the family finances turned to popular fiction and children's stories about the Bastable family, including *The Story of the Treasure Seekers* (1899), *The Would-be-Goods* (1901), *Five Children and It* (1902), *The New Treasure Seekers* (1904), *The Railway Children* (1906) and *The Enchanted Castle* (1907). She also wrote ghost stories, and a number of other novels, the last of which was *The Lark* (1922). 📖 N Streatfeild, *Magic and the Magician* (1958)

Nesle, Blondel de *See* BLONDEL

Nesselrode, Karl Robert, Count 1780–1862
Russian diplomat
Born in Lisbon, the son of the Russian ambassador, he gained the confidence of ALEXANDER I, and took a principal part in the negotiations which ended in the Peace of Paris and in the Congress of Vienna. He was also one of the most active diplomats of the Holy Alliance. Foreign Minister of Russia for over 30 years, he was partly responsible for bringing about the Crimean War (1853).

Nestorius d.451 AD
Syrian ecclesiastic
Born in Germanicia, he became a priest. Well known for his zeal, ascetic life, and eloquence, he was selected as patriarch of Constantinople (Istanbul) in AD 428. He defended the Presbyter Anastasius in denying that the Virgin MARY could be truly called the Mother of God, and so emphasized the distinction of the divine and human natures that antagonists accused him – falsely – of holding that there were two persons in JESUS CHRIST. A controversy ensued, and Nestorius was deposed by a general council in Ephesus (AD 431). He was confined in a monastery near Constantinople, was banished to Petra in Arabia, and died after imprisonment in the Greater Oasis in Upper Egypt. There are still a few Nestorians in Kurdistan and Iraq, and a small body of Christians in India are nominally Nestorian.

Nestroy, Johann Nepomuk 1801–62
Austrian dramatist
Born in Vienna, he began life as an operatic singer, turned playwright and was director of the Vienna Carl-Theater (1854–60). His 60 or so plays, which include *Der böse Geist Lumpazivagabundus* (1833, 'The Wicked Ghost Lumpazivagabundus'), *Einen Jux will er sich machen* (1842, 'He Wants to Play Pranks') and *Judith und Holofernes* (1849), are mostly elaborate jibes at theatrical sentimentality characterized by deft play on words. His work revolutionized the Viennese theatre and influenced LUDWIG WITTGENSTEIN. 📖 M Preisner, *Johann Nepomuk Nestroy* (1968)

Netanyahu, Binyamin 1949–
Israeli Likud politician
He was born in Israel and educated at the Massachusetts Institute of Technology in the USA. Between 1967 and 1972 he served as a soldier in the Israeli Defence Forces and in 1976 became a director of the Jonathan Institute, a foundation which studies counter-terrorism. In 1982 he was appointed Israel's ambassador to the United Nations and in 1988 was elected to the Knesset as a member of the right-wing Likud Party. Having served as deputy Foreign Minister (1988–91) and deputy prime minister (1991–92), he contested the 1996 general election and was elected prime minister. He was defeated by EHUD BARAK in 1999. In 2002 he was appointed Foreign Minister and in 2003 he became Finance Minister, but he resigned from the government in 2005 in protest over Israel's planned withdrawal from the Gaza Strip. Following ARIEL SHARON's defection and the formation of the Kadima party, Netanyahu retook the Likud leadership. However, his stringent economic policies were in part responsible for Likud's loss at the polls in 2006.

Neto, (Antonio) Agostinho 1922–79
Angolan nationalist and politician
The son of a Methodist missionary, he was educated in a Methodist school in Luanda before studying medicine in Portugal. He returned to Angola to work in the colonial medical service and joined the Popular Movement for the Liberation of Angola (MPLA). He was imprisoned several times (1952–62) but escaped from the Cape Verde Islands to Zaire (now the Democratic Republic of Congo) where he soon became president of the MPLA and its leader in the guerrilla war against Portuguese colonialism. His close ties with FIDEL CASTRO gave him both Cuban and Soviet backing and this assistance enabled him to prevail in the civil war which followed the Portuguese retreat from Angola. He became the first president of Angola in 1974, holding the post until his death.

Neuberger, Julia Babette Sarah Neuberger, Baroness, *née* **Schwab** 1950–
British rabbi, writer and broadcaster
Born in London and educated at Cambridge, she took a Rabbinic Diploma at Leo Baeck College, where she later returned as lecturer in 1979. She became rabbi of the South London Liberal Synagogue (1977–89), becoming the first female rabbi in Britain, and was picked to front *Choices* on BBC1 (1986–87). Noted for her liberal and reasonable

approach, she has often been involved in religious and secular advisory committees on such topics as health and human rights. In 1993 she became Chancellor of the University of Ulster, the second non-Royal female chancellor of a UK university (Dame MARGOT FONTEYN was the first, on becoming Chancellor of the University of Durham in 1982), a post she held until 2000. She was Chief Executive of the King's Fund from 1997 until 2004, and was made a life peer in 2004.

Neugebauer, Gerald 1932–
US astronomer
Born in Göttingen, Germany, he was educated at Cornell University and the California Institute of Technology. After working at Mount Wilson and Palomar observatories, he became professor of physics at the California Institute of Technology (1970) and director of Palomar Observatory in 1981. He produced the first extensive infrared map of the heavens in the 1960s, which had dramatic results. Many new infrared sources were discovered, most of which did not coincide with previously observed visible sources, and new and curious objects were revealed, such as objects thought to be stars in the process of formation. Working with E E Becklin, Neugebauer discovered a strange infrared source radiating intensely in the Orion nebula, which is now known as the 'Becklin–Neugebauer object' and is thought to be a young massive star blowing gases outwards at high speed. He has also played an important role in interplanetary missions such as the *Mariner* and *Viking* programmes, and in the design of new infrared telescopes.

Neumann, (Johann) Balthasar 1687–1753
German architect
Born in Eger, he was at first a military engineer in the service of the Archbishop of Würzburg, but soon found his true métier, and after visiting Paris and absorbing new ideas, he became professor of architecture at Würzburg. Many outstanding examples of the Baroque style were designed by him, the finest being probably Würzburg Palace and Schloss Bruchsal.

Neumann, St John Nepomucene 1811–60
US Roman Catholic bishop and saint
Born in Prachatice, Bohemia, he settled in the USA in 1836, entered the Redemptorist order, and was appointed Bishop of Philadelphia in 1852. He was responsible for building 80 churches and nearly 100 parochial schools, and he founded US branches of several orders of teaching nuns. Miracles were said to have occurred at his tomb, and in 1977 he became the first US male to be canonized.

Neumann, John Von *See* VON NEUMANN, JOHN (JOHANN)

Neumann, Theresa 1898–1962
German mystic and stigmatic
She was born in Konnersreuth, Bavaria. Sickness and accident from 1918 onwards were followed by a string of illnesses up to 1925 that were cured without medical intervention. During Lent in 1926 she had visions of the Passion of Christ accompanied by stigmata on her hands, feet and left side. She is said to have had no food from 1927 onwards, apart from daily Holy Communion. Her life attracted much interest, but claims that miraculous healing and survival proved her a saint have not been accepted as reaching the standards required by Church authority.

Neumeier, John 1942–
US dancer, choreographer and artistic director
Born in Milwaukee, Wisconsin, he danced with the Stuttgart Ballet (1963–69) before assuming directorship of Frankfurt Ballet (1969–73) and Hamburg Ballet (since 1973). He creates acrobatically expressive contemporary ballets to match the grand themes and important composers he favours in his work.

Neurath, Baron Konstantin von 1873–1956
German administrator
He was born in Klein-Glattbach, Württemberg. After consular service, he joined the German Embassy in Istanbul and in 1921 became ambassador to Italy and in 1930 to Great Britain. Foreign Minister from 1932 to 1938, he then became Reich Protector of the Czech territories (1939–43). At the Nuremberg Trial he was sentenced to 15 years' imprisonment for war crimes, but was released in 1954.

Neurath, Otto 1882–1945
Austrian philosopher and social theorist
Born in Vienna, he was a member of the influential Vienna Circle which also included MORITZ SCHLICK, KURT GÖDEL and RUDOLF CARNAP. The group were logical positivists, generally hostile to metaphysics and theology and respectful of empirical science. Neurath is particularly associated with the radical version of positivism called 'physicalism', which aimed to establish an entirely materialist basis of knowledge. His best philosophical work was published in the group's journal *Erkenntnis*, but he also wrote books on sociology, education and social policy, including *International Picture Language* (1936) and *Modern Man in the Making* (1939), and was active in public affairs as an independent Marxist. He was an energetic organizer, and at different stages in his life was involved with bodies as diverse as the Carnegie Endowment for International Peace (1911–13), the Central Planning Office, Munich (1919), the Museum for House and Town Planning (1919–24), the Social and Economic Museum, Vienna (1924–34), the International Foundation for Visual Education (1933–40), and the International Unity of Science movement (1934–40). He was founding editor of the uncompleted *International Encyclopaedia of Unified Science*.

Nevelson, Louise, *née* **Berliawsky** 1900–88
US sculptor and printmaker
Born in Kiev, she emigrated with her family to Portland, Maine, in the USA, in 1905. She studied at the Art Students' League in New York (1929–33) and with the influential theorist HANS HOFMANN in Munich. In 1932 she worked as an assistant to the Mexican mural painter DIEGO RIVERA. She is best known for her 'environmental' sculptures – abstract, wooden box-like shapes stacked up to form walls and painted white or gold, for example in *An American Tribute to the British People (Gold Wall)* (1959). In 1966 she began to use plexiglass and aluminium, as in *Transparent Sculpture VI* (1967, Whitney Museum, New York). In the 1970s she received commissions for public sculptures, such as *Transparent Horizon* (1975, Massachusetts Institute of Technology) and *Bicentennial Dawn* (1976, Philadelphia Courthouse).

Neville, Richard *See* WARWICK, EARL OF

Neville-Jones, Dame (Lilian) Pauline 1939–
English diplomat
Educated in Leeds and at Lady Margaret Hall, Oxford, she entered the Foreign Office in 1963. She worked her way through the diplomatic ranks, including postings in Rhodesia (Zimbabwe) in 1964–65, Singapore (1965–68) and Washington, DC (1971–75). She worked in the Foreign and Commonwealth Office (FCO) in 1968–71 and 1975–77, as Chef de Cabinet for the European Commissioner for Budget (1977–82) and at the Royal Institute for International Affairs (1982–83) before becoming FCO Head of Planning Staff in 1987. She was also deputy in Bonn (1988–91). In 1994 she became the second-highest official in the FCO as political director and deputy Under-Secretary of State – a higher rank than any other woman in the Foreign Office. Her last FCO post was as head of the British delegation during the Bosnian peace talks in Dayton, Ohio (1995). She has served as chairperson of the Audit Commission (1998–2004) as well as being on the BBC Board of Governors (1998–2004), responsible for World Service broadcasts. She was a council member of the International Institute for Strategic Studies (IISS) until 2004, and was non-executive chairperson of QinetiQ (2002–05), the defence consortium formed from the MoD's Defence Evaluation and Research Agency. In 2006, she became the head of the Conservative Party's policy review on international security. She was created CMG in 1987, and raised to DCMG in 1995.

Nevinson, Christopher Richard Wynne 1889–1946
English artist
Born in Hampstead, London, he was the son of the war correspondent Henry Woodd Nevinson (1856–1941). He studied at the Slade School of Art in London, and for a brief period went into journalism before venturing back to painting and etching in Paris. He became a leader of the pre-1914 avant-garde, joining EMILIO MARINETTI as co-signatory of the Futurist Manifesto *Vital English Art* (1914, published in England). He volunteered for the Red Cross, was discharged (1916), but returned the following year as an artist attached to the Bureau of Information. Many of his best and most famous works reflect his experiences of World War I. He later moved away from Futurism to paint New York, Paris and the English landscape. In his etchings he maintained an assured Realist vein. In 1937 he published the autobiographical *Paint and Prejudice*.

Nevison, John, *nicknamed* **Swift Nicks** 1639–84
English highwayman
Born in Pontefract, Yorkshire, he enlisted in the Spanish army and fought in Flanders. Following the Restoration he decided to return to England and become a highwayman. He was renowned for his courteous manner and made it his policy only to rob the rich and to give some of his booty to the poor. He also

ran a protection system for the farmers in his native Yorkshire, levying a charge on local drovers in return for protection from robbers. Escaping several times from capture, he was finally arrested by Captain Hardcastle and hanged in York in 1684. It is probable that it was he and not DICK TURPIN who inspired the legend of the epic ride to York.

Newbery, John 1713–67
English publisher and bookseller
Born in Berkshire, a farmer's son, he settled in London around 1744 as a seller of books and patent medicines. He was the first to publish small books for children, and he was – perhaps with OLIVER GOLDSMITH – part-author of some of the best ones, notably *Goody Two-Shoes*. In 1758 he started the *Universal Chronicle*, or *Weekly Gazette*, in which the *Idler* appeared. Goldsmith's *Citizen of the World* appeared in the *Public Ledger* (1760). Since 1922 the Newbery medal has been awarded annually for the best US children's book.

Newbigin, (James Edward) Lesslie 1909–98
English missionary and theologian
Born in Newcastle, he went to Madras as a Church of Scotland missionary in 1936 and spent most of the next 38 years in south India, being appointed Bishop of Madura and Ramnad (1947–59) and bishop in Madras (1965–74), in the Church of South India. In his retirement he lectured at the Selly Oak Colleges, Birmingham, was appointed moderator of the United Reformed Church (1978–79), and became a parish minister in Birmingham (1980–88). His many writings on the uniqueness of Christianity and on Christian responses to secularism in modern western culture are put in context by his autobiography, *Unfinished Agenda* (1985). Other works include *The Gospel in a Pluralist Society* (1989) and *Truth to Tell* (1991).

Newbolt, Sir Henry John 1862–1938
English poet
Born in Bilston, Staffordshire, he studied at Clifton School and Oxford, and became a barrister. He published a novel, *Taken from the Enemy* (1892), followed by *Mordred: A Tragedy* (1895), but is best known for his sea songs – *Admirals All* (1897), which contained 'Drake's Drum', *The Island Race* (1898), *Songs of the Sea*, and others. In World War I he was controller of telecommunications and an official war historian, and in 1920 he published *The Naval History of the Great War*.

Newby, Eric 1919–2006
English travel writer
Born in London, he worked briefly in advertising before joining a Finnish four-masted barque in 1938, an adventure described in *The Last Grain Race* (1956). For some years he worked in the clothing industry, which he eagerly left to take *A Short Walk in the Hindu Kush* (1958). This has become a classic among travel books, humorously charting the chaotic progress of Newby and a friend through the mountains of north-east Afghanistan. In 1963, after some years as a fashion buyer to a chain of department stores, he made a 1,200-mile (1,931km) descent of the Ganges, described in *Slowly Down the Ganges* (1966). Later he became travel editor of *The Observer* (1964–73). Other significant books are *The Big Red Train Ride* (1978), the story of a journey from Moscow to the Pacific on the Trans-Siberian Railway; his autobiography, *A Traveller's Life* (1982); and *Round Ireland in Low Gear* (1987), about a mountain-bike journey. Later works include *What the Traveller Saw* (1989), *A Small Place in Italy* (1994), *Departures and Arrivals* (1999) and *A Book of Lands and Peoples* (2003). He was awarded a CBE in 1994.

Newby-Fraser, Paula 1962–
South African athlete
She was born in Rhodesia (now Zimbabwe) and brought up in South Africa, and is the most outstanding female triathlete of the present day. She has won the women's event at the gruelling Hawaii Ironman Triathlon a record eight times. A regular challenger of the best male athletes, she achieved the fastest women's time ever for the triathlon, which is also among the top ten times for the event, male or female. In 1990, she was voted athlete of the year by the Women's Sport Foundation.

Newcomb, Simon 1833–1909
US astronomer
Born in Wallace, Nova Scotia, Canada, he had little formal education but developed a talent for mathematics. He worked at performing computations at the American Nautical Almanac Office in Washington in 1857, and earned a degree in science from Harvard in 1858. He became professor of mathematics in the US navy (1861–97) with charge of the naval observatory at Washington. From 1877 he edited the *American Nautical Almanac* and he was additionally professor of mathematics and astronomy at Johns Hopkins University (1884–93, 1898–1900). Newcomb's major work, begun in 1879 and continued throughout his life, was the recalculation of the constants required for the preparation of ephemerides and the drawing up of immense tables of the motions of the planets. He was responsible for the worldwide adoption of a standard system of constants by almanac makers, which served until the middle of the 20th century.

Newcomen, Thomas 1663–1729
English inventor
He was born in Dartmouth, Devon. A blacksmith by trade, in 1698 he teamed up with THOMAS SAVERY, who had just patented an atmospheric steam engine for pumping water from mines, and by 1712 he had constructed a practical working engine that was widely used in collieries.

Newdigate, Sir Roger 1719–1806
English antiquary
Born in Arbury, Warwickshire, he was MP for 36 years for Middlesex (1741–47) and Oxford University (1750–80). He built up a famous collection of antiquities and endowed the Newdigate prize for English verse at Oxford, winners of which have included FREDERICK FABER, JOHN RUSKIN, MATTHEW ARNOLD, LAURENCE BINYON and JOHN BUCHAN.

Ne Win, U, *also known as* **Shu Maung** 1910–2002
Burmese politician
Educated at Rangoon University, he was an active anti-British nationalist in the 1930s. In World War II he became Chief of Staff in the collaborationist army after the Japanese invasion of Burma, but joined the Allied forces later in the war. He held senior military and Cabinet posts after Burma's independence (1948), before becoming caretaker prime minister (1958–60). In 1962, following a military coup, he ruled the country as chairman of the revolutionary council and became state president in 1974. After leaving this office in 1981, he continued to dominate political affairs as chairman of the ruling Burma Socialist Programme Party (BSPP), following an isolationist foreign policy and a unique domestic 'Burmese Way to Socialism' programme, a blend of Marxism, Buddhism and Burmese nationalism. In 1988, with economic conditions rapidly deteriorating and riots in Rangoon, he was forced to step down as BSPP leader. Although he remained a formidably powerful political figure for another decade, his influence with the military junta waned, and he was placed under house arrest in 2002.

Newlands, John Alexander Reina 1837–98
English chemist
Born in London, he spent a year at the Royal College of Chemistry. From 1868 to 1888 he was chief chemist to a sugar refinery at Victoria Docks, London, and later set up as an independent analyst and consultant. By 1863 he had begun to build on earlier observations by JOHANN DÖBEREINER and others that there was a relationship between the chemical properties of elements and their atomic weight. In 1865 he drew up a table of 62 elements arranged in eight groups in ascending order of atomic weight to illustrate what he described as the 'law of octaves'. DMITRI IVANOVICH MENDELEEV made the critical leap forward when he realized that spaces should be left for undiscovered elements, thus allowing the known elements to fall into groups which demonstrated a true periodicity. After Mendeleev published his periodic table, Newlands claimed priority and was eventually awarded the Davy Medal of the Royal Society in 1887.

Newman, Barnett 1905–70
US painter
He was born in New York City. Until c.1948 his art was Biomorphic in style, and he was always interested in the primitive, and in the psychiatrist CARL JUNG's primordial archetypes. In 1948, with WILLIAM BAZIOTES, ROBERT MOTHERWELL and MARK ROTHKO, he founded the 'Subject of the Artist' school, and produced *Onement I*, the first of his stripe paintings, which consist of vertical bands of colour and look forward to his Minimalist works of the 1960s, such as *Vir Heroicus Sublimis* (1950–51) and *Station of the Cross* (1966).

Newman, Ernest 1868–1959
English music critic
Born in Liverpool, he was educated at Liverpool College and Liverpool University. He was successively music critic of the *Manchester Guardian*, the *Birmingham Post* and *The Sunday Times* (from 1920). His writings are noted for their wit and elegance, and for their strict factual accuracy. His works include studies of CHRISTOPH GLUCK and HUGO WOLF, and of opera (for

example *Opera Nights* and *Wagner Nights*), but it is for his far-reaching studies and deep understanding of RICHARD WAGNER that he is best known – his four-volume biography of Wagner (1933–37) is the most complete and authoritative account of the composer in existence. In *A Musical Critic's Holiday* he vindicates music criticism as a valuable study.

Newman, Francis William 1805–97
English scholar
Born in London, he obtained a double first at Worcester College, Oxford in 1826, and was elected to a fellowship at Balliol College. After losing sympathy with Anglicanism, he withdrew from the university in 1830, declining subscription to the Thirty-nine Articles. He went as an unsectarian missionary to Baghdad (1830–33), then returned to England, becoming Classical tutor at Bristol College in 1834, professor at Manchester New College (1840) and professor of Latin at University College London (1846–69). In religion he took a position directly opposite to his brother's, being eager for a belief system including whatever is best in all the historical religions. *Phases of Faith* (1853), the best known of his works, was preceded by *The Soul* (1849). His other works include a *History of the Hebrew Monarchy* (1847), and a small book on his brother, JOHN HENRY NEWMAN (1891).

Newman, Sir George 1870–1948
English medical officer and pioneer in public health
Born in Leominster, Herefordshire, he was educated at Bootham School, King's College London and Edinburgh University. After qualifying as a doctor, he became medical officer for Bedfordshire (1897–1900) and Finsbury (1900–1907), chief medical officer for the Board of Education (1907–19), and worked at the Ministry of Health (1919–35). He was responsible for drafting the 1907 Act which empowered local education authorities to provide medical treatment, and he pioneered school medical inspection, probably as influential in raising educational standards as any other factor between the wars. He advocated open-air schools for the delicate, and new techniques in physical education, and by 1935 Great Britain had a complex and universal school medical service. He was also influential in the establishment of the London School of Hygiene and Tropical Medicine. His annual reports, 15 to the Minister of Health, 26 to the Minister of Education, had a lasting effect on the development of public health and education in Great Britain.

Newman, John Henry 1801–90
English autobiographer, poet and religious writer
Born in London, he was appointed vicar of St Mary's, Oxford. He became celebrated as a preacher and leader of the Tractarian (or Oxford) Movement, but in the early 1840s drew closer to Roman Catholicism. Converted in 1845, he became a Catholic priest and established the Birmingham Oratory. He wrote extensively on the theological questions of the day, but is famous chiefly for the *Apologia pro Vita Sua* (1864), in which he set out the history of his religious views and defended himself forcefully against the charge of untruthfulness levelled against him by CHARLES KINGSLEY. This unusual autobiography established him as one of the great stylists in the history of English prose. His poem 'The Dream of Gerontius' (1865), provided the text of ELGAR's oratorio, and his hymn 'Lead, kindly light' illustrates his gift for a memorable turn of phrase. Made a cardinal in 1879, Newman avoided public display and remained in Birmingham serving his congregation for the remainder of his life. His brother was FRANCIS WILLIAM NEWMAN. 🕮 M Trevor, *Newman's Journey* (1974)

Newman, Paul Leonard 1925–
US film actor
Born in Shaker Heights, Ohio, he turned to acting after a knee injury ended a promising sports career, studying at the Yale School of Drama and the Actors Studio in New York City. Starting in stage repertory and television, he made a disastrous film debut in *The Silver Chalice* (1954) but recovered to become one of the major film actors of his generation, combining blue-eyed masculinity with a rebellious streak in films like *Cat on a Hot Tin Roof* (1958), *The Hustler* (1961), *Hud* (1963) and *Cool Hand Luke* (1967). Later films include *Butch Cassidy and the Sundance Kid* (1969), *The Sting* (1973), *The Verdict* (1982), *The Color of Money* (1986), for which he won an Academy Award, *Mr and Mrs Bridge* (1990, with his wife, JOANNE WOODWARD), *Nobody's Fool* (1994), *Road to Perdition* (2002) and *Cars* (2006). He also directed *Rachel, Rachel* (1968) and *The Glass Menagerie* (1987), among others, and has been active politically in liberal causes. He was given an Honorary Academy Award in 1986 and another in 1994 for his philanthropic donation of the profits from his food products to charity.

Newnes, Sir George 1851–1910
English publisher
He was the son of a Matlock Congregational minister, and was educated at Shireland Hall, Warwickshire, and the City of London School. He founded *Tit-Bits* (1881), *The Strand Magazine* (1891), *The Westminster Gazette* (1893), *Country Life* (1897), *The Wide World Magazine* (1898) and others. He was Liberal MP for Newmarket (1885–95).

Newton, Alfred 1829–1907
English zoologist
Born in Geneva, Switzerland, he was appointed the first professor of zoology and comparative anatomy at Cambridge in 1866. He made visits to Lapland, Spitsbergen, the West Indies and North America on ornithological expeditions, and was instrumental in having the first Acts of parliament passed for the protection of birds. His ornithological writings include *A Dictionary of Birds* (1893–96), and he was editor of *Ibis* (1865–70) and *Zoological Record* (1870–72).

Newton, Helmut, *originally* **Helmut Neustädter** 1920–2004
Australian photographer
Born in Berlin, Germany, he was educated there at the Heinrich von Treitschke Realgymnasium and at the American School but, after serving an apprenticeship with the fashion and theatre photographer Yva (Else Simon), emigrated to Australia in 1940 and set up as a freelance photographer in Melbourne. He moved subsequently to Paris and had fashion photographs published in such magazines as *Elle*, *Nova*, *Marie-Claire* and *Vogue*. He became best known for his highly stylized, fetishistic photographs of nude and semi-nude women, exemplified in publications such as *White Women* (1976) and *Big Nudes* (1982). He published his *Autobiography* in 2003.

Newton, Sir Isaac *See panel p1157*

Newton, John 1725–1807
English clergyman and writer
Born in London, the son of a shipmaster, he sailed with his father for six years, and for ten years engaged in the African slave trade. In 1748 he was converted to Christianity, but still went on slave trading. He became tide surveyor at Liverpool in 1755, but in 1764 he was offered the curacy of Olney in Buckinghamshire and took orders. WILLIAM COWPER went there four years later, and they became close friends. In 1779 Newton became rector of St Mary Woolnoth, London. His prose works are little read, apart from the *Remarkable Particulars in his own Life*, but some of his *Olney Hymns* (1779) are still sung, including 'Approach, my soul, the mercy-seat', 'How sweet the name of Jesus sounds', 'One there is above all others' and, most famous of all, 'Amazing Grace'.

Nexö, Martin Andersen 1869–1954
Danish novelist
Born in Copenhagen, he spent his boyhood in Bornholm, near Nexö (from where he took his surname), and worked as a shoemaker and bricklayer before turning to books and teaching. In 1906 he won European fame with *Pelle Erobreren* (4 vols, 1906–10, Eng trans *Pelle the Conqueror*, 1915–17), describing poor life and the growth of the labour movement. He spent considerable time abroad, an experience that fostered his sympathy for the working class. *Morten hin Røde* (1945–47, 'Morten the Red') is an uncharacteristically dull, three-volume sequence. 🕮 B Houmann, *Martin Andersen Nexö og hans samtid* (1981–82)

Ney, Michel 1769–1815
French general
Born in Saarlouis, he rose to be adjutant-general (1794) and general of brigade (1796). For the capture of Mannheim he was made general of division (1799), and under the Empire he was made marshal. In 1805 he stormed the entrenchments of Elchingen. He fought at Jena and Eylau and Friedland, gaining the Grand Eagle of the Legion of Honour. Serving in Spain, he quarrelled with ANDRÉ MASSÉNA and returned to France. In command of the 3rd Corps (1813) he fought at Smolensk and Borodino, received the title of Prince of the Moskwa, and led the rearguard in the disastrous retreat. In 1813 he was present at Lützen and Bautzen, but was defeated by Count Friedrich Bülow von Dennewitz (1775–1816) at Dennewitz. He fought at Leipzig, but submitted to LOUIS XVIII. Ney was sent against NAPOLEON I on his return from Elba, but went over to his old master's side and led the centre at Waterloo (1815). On Louis XVIII's second restoration he was con-

Newton, Sir Isaac 1642–1727

English scientist and mathematician

Newton was born in Woolsthorpe, Lincolnshire, and educated at Grantham Grammar School and Trinity College, Cambridge. He began his researches at an early date, but his work was interrupted by the outbreak of the Great Plague in 1664, when the university was closed down for several years. In 1665 or 1666 he contemplated the fall of an apple in his garden, which led him to begin formulating the law of gravitation.

He was also concerned with the nature of light and the construction of telescopes. By a variety of experiments upon sunlight refracted through a prism, he concluded that rays of light which differ in colour differ also in refrangibility – a discovery which suggested that the indistinctness of the image formed by the object-glass of telescopes was due to the different coloured rays of light being brought to a focus at different distances. He concluded (correctly for an object-glass consisting of a single lens) that it was impossible to produce a distinct image, and was led to the construction of reflecting telescopes, of a type that was later developed further by WILLIAM HERSCHEL and the Earl of ROSSE.

Newton became a Fellow of Trinity College, Cambridge, in 1667, and was appointed Lucasian Professor of Mathematics in 1669. By 1684 he had demonstrated the whole gravitation theory, which he expounded first in *De Motu Corporum* (1684). Newton showed that the force of gravity between two bodies, such as the Sun and the Earth, is directly proportional to the product of the masses of the bodies and inversely proportional to the square of the distance between them. He described this more completely in *Philosophiae Naturalis Principia Mathematica* (1687, 'The Mathematical Principles of Natural Philosophy'), his greatest work, edited and financed by EDMOND HALLEY, who had encouraged him to develop his theories.

In the *Principia* Newton stated his three laws of motion: (1) that a body in a state of rest or uniform motion will remain in that state until a force acts on it; (2) that an applied force is directly proportional to the acceleration it induces, the constant of proportionality being the body's mass ($F = ma$); and (3) that for every 'action' force which one body exerts on another, there is an equal and opposite 'reaction' force exerted by the second body on the first.

In the political domain, Newton defended the rights of the university against the illegal encroachments of JAMES VII AND II, and thereby won a seat in the Convention parliament (1689–90). In 1696 he was appointed Warden of the Mint, and was Master of the Mint from 1699. He again sat in parliament in 1701 for his university. He solved two celebrated problems proposed in June 1696 by JEAN BERNOULLI, as a challenge to the mathematicians of Europe; and performed a similar feat in 1716, by solving a problem proposed by GOTTFRIED LEIBNIZ.

Newton was involved throughout his life in controversies with other scientists, in particular with JOHN FLAMSTEED, whose *Greenwich Observations* Newton published, and ROBERT HOOKE, who claimed priority of discovery for some of Newton's work on the attraction of lunar bodies. The controversy between Newton and Leibniz over the discovery of the differential calculus and the method of fluxions is still disputed, but the general opinion of science is that the methods were invented independently, with a greater debt owing to Leibniz for the superior facility and completeness of his method.

Newton, who was knighted by Queen ANNE in 1705, is buried in Westminster Abbey. Throughout his life he also devoted much time to the study of alchemy and theology, and he left substantial discourses on transmutation, a remarkable manuscript on the prophecies of DANIEL and on the Apocalypse, a history of creation, and a large number of miscellaneous tracts.

📖 R S Westfall, *Never at Rest: A Biography of Isaac Newton* (1981).

> 'If I have seen further it is by standing on the shoulders of giants.'
>
> – From a letter to Hooke, 1676.
>
> *Corpus omne perseverare in statu suo quiescendi vel movendi uniformiter in directum, nisi quatenus illud a viribus impressis cogitur statum suum mutare.*
>
> 'Every body continues in its state of rest, or of uniform motion in a right line, unless it is compelled to change that state by forces impressed thereon.'
>
> – First Law of Motion (1687). From *Philosophiae Naturalis Principia Mathematica* (translated by Andrew Motte, 1729).

demned for high treason and shot. 📖 John B Morton, *Marshal Ney* (1958)

Ngata, Sir Apirana Turupa 1874–1950

New Zealand Maori lawyer and politician

Born at Te Araroa, East Cape, he was the first Maori graduate – from Canterbury University in 1893 – and was admitted to the Bar in 1897. He was elected to parliament in 1905 and remained for 38 years, becoming Minister for Native Affairs three times. He researched Maori tribal history and wrote a number of books, including a two-volume work on Maori songs and chants.

Ngo Dinh Diem 1901–63

Vietnamese statesman

Born in Annam, the son of a mandarin and himself a Roman Catholic, he worked as a civil servant before becoming Minister of the Interior in 1933. Refusing to support HO CHI MINH and BAO DAI, he was forced into exile in 1950, but returned to South Vietnam as prime minister in 1954, masterminded Bao's fall from power, and succeeded him as president in 1955. Although almost wholly dependent on US support for his country's economic survival and with hostilities with the North mounting, he refused to be counselled by the USA on his handling of the war and after causing further unrest by embarking on a campaign against militant Buddhists, he was murdered by dissident army officers.

Ngoyi, Lilian Masediba 1911–80

South African campaigner

Born near Pretoria, she received little education and worked in a variety of menial jobs, before marrying, bearing three children, and being widowed by the age of 40. Her experience of working conditions in clothing factories led her to campaign for a fair society in South Africa. She agitated against the infamous Pass Laws with such persistence that she was arrested and imprisoned for her beliefs. She was charged with treason in 1956 for further activities. Although acquitted, she was imprisoned again while awaiting trial, and endured 71 days in solitary confinement. A brilliant orator, she did not live to see the dismantling of apartheid, as she died under house arrest.

Nguyen Thi Binh 1927–

Vietnamese politician

She was born in South Vietnam, the granddaughter of a famous nationalist who had been a mentor of HO CHI MINH. She became a member of the Vietnam Communist Party in 1948, and in 1951 she was imprisoned for her political activities. After 1954, when French rule ended, she fought against the Vietnamese dictator NGO DINH DIEM, whose government was supported by the USA. During the Vietnam War she was a member of the National Front for the Liberation of Vietnam. When the provisional government was formed in 1969, she was appointed Foreign Minister. In 1973 she signed the treaty that ended the war. In 1979 she was appointed Minister of Education in the United Government; she was vice-president of Vietnam from 1992 until 2002.

Nguyen Van Linh 1914–98

Vietnamese politician

Born in northern Vietnam, he joined the anti-colonial Thanh Nien, a forerunner of the Communist Party of Vietnam (CPV), in Haiphong in 1929, and spent much of his subsequent party career in the south, gaining a reputation as a pragmatic reformer. A member of CPV's politburo and secretariat (1976–81), his career suffered a temporary setback during the early 1980s when party conservatives gained the ascendancy. He re-entered the politburo in 1985, becoming CPV leader from 1986 to 1991. His leadership brought a new phase of economic liberalization and improved relations with the West, typified by his phased withdrawal of Vietnamese forces from Kampuchea (Cambodia) and Laos.

Nguyen Van Thieu 1923–2001
Vietnamese soldier and political leader
Born in Ninh Thuan, he was educated at a Catholic school and at the National Military Academy in Hue. His military career began in the late 1940s and by 1963 he was Chief of Staff of the Armed Forces of the Republic of Vietnam (South Vietnam). That year he was a leader in the coup against NGO DINH DIEM. He became deputy premier and Minister of Defence in 1964, and head of state in 1965. In 1967, as the war against the Vietcong escalated and US involvement increased, he became president of the Republic of Vietnam, and in early 1973 was a signatory to the peace treaty that formally ended hostilities. However, fighting between North and South continued until the communist victory in 1975 with the fall of Saigon (now Ho Chi Minh City), when Thieu took refuge first in Taiwan, then in England and finally in the USA.

Niarchos, Stavros Spyros 1909–96
Greek shipowner
Born in Athens, he graduated in law from Athens University and became controller of one of the largest independent fleets in the world. He served during World War II in the Royal Hellenic Navy and then pioneered the construction of supertankers, in competition with his brother-in-law ARISTOTLE ONASSIS. He was also a major art collector and racehorse owner.

Niccolò, dell' Abbate *See* ABBATE, NICCOLÒ DELL'

Nicholas, St 4th century AD
Christian prelate and patron saint of Greece and Russia
He was born, according to tradition, in the ancient Lycian seaport city of Patara. Allegedly the Bishop of Myra in Lycia (Turkey), he was imprisoned under DIOCLETIAN and released under CONSTANTINE I, THE GREAT. In legend he gave gifts of gold to three poor girls for their dowries, which gave rise to the custom of giving gifts on his feast day, still followed in the Netherlands and Germany. Elsewhere this has transferred to 25 December (Christmas Day). His identification with Father Christmas began in Europe and spread to the USA, where the name became Santa Claus. He is also the patron saint of children, scholars, merchants, sailors, travellers and thieves. His feast day is 6 December.

Nicholas I, St, *called* **the Great** c.820–867
Italian pope
Born in Rome, he was pope from 858 to 867. He asserted the supremacy of the Church against secular rulers such as Lothair, King of Lorraine (whose divorce he forbade) and church leaders like HINCMAR, Archbishop of Rheims. He had problems with the Eastern Church, however, particularly with PHOTIUS, whom he tried to depose as patriarch of Constantinople, leading to the Photian Schism. His feast day is 13 November.

Nicholas I 1796–1855
Emperor of Russia
The third son of PAUL I, he married the daughter of FREDERICK WILLIAM III of Prussia (1817) and became tsar on the death of his elder brother ALEXANDER I in 1825. He suppressed the Decembrist Rebellion that year, which turned him against reform. He had a great sense of duty, but ruled by the ancient policy of the tsars – absolute despotism, supported by military power. Wars with Persia (now Iran) and Turkey gained Russia territory in Armenia and the Caucasus. He crushed a Polish rising (1830) and strove to extinguish the Polish nationality. He also attempted to Russianize all the inhabitants of the empire, and to convert Roman Catholics and Protestants to the Russian Orthodox Church. During the political storm of 1848–49 he assisted the Emperor of Austria in quelling the Hungarian insurrection, and tightened the alliance with Prussia. The re-establishment of the French Empire confirmed these alliances, but the opposition of Great Britain and France to his plans to dominate Turkey brought on the Crimean War, during which he died. 🕮 W Bruce Lincoln, *Nicholas I* (1978)

Nicholas II 1868–1918
Emperor of Russia
The eldest son of ALEXANDER III, he succeeded his father in 1894. He married ALEXANDRA FYODOROVNA, a princess of Hesse, who dominated him. Diffident and easily swayed by irresponsible favourites, he distrusted his ministers and lacked the strength of will to fulfil his self-appointed autocratic role. His reign was marked by alliance with France, entente with Great Britain, a disastrous war with Japan (1904–05), and the establishment (1906) of the Duma (parliament). He took command of the Russian armies against the Central Powers (1915). Forced to abdicate (1917) at the revolution, he was shot with his entire family at Yekaterinburg by the Red Guards in 1918. 🕮 Robert K Massie, *Nicholas and Alexandra* (1967)

Nicholas, Grand-Duke 1856–1929
Russian soldier
In World War I he was Russian commander-in-chief against Germany and Austria, and commander-in-chief in the Caucasus (1915–17). After 1919 he lived quietly in France. He was the nephew of ALEXANDER II.

Nicholas of Cusa 1401–64
German philosopher, scientist and churchman
Born in Kues, Treves, he studied at Heidelberg (1416) and Padua (1417–23), received a doctorate in canon law, and was ordained about 1430. He was active in 1432 at the Council of Basle, supporting in his *De concordantia catholica* (1433, 'On Catholic Concordance') the 'conciliarists' who advocated the supremacy of Church councils against the pope. He later switched allegiance to the papal party, undertook various papal missions as a diplomat, and was created cardinal in 1448. His best-known philosophical work is *De docta ignorantia* (1440, 'On Learned Ignorance'), which emphasizes the limitations of human knowledge but at the same time argues that faith, science, theology and philosophy all pursue convergent though different paths towards the ultimately unattainable goal of absolute reality. He also wrote on mathematics and cosmology and anticipated COPERNICUS in his non-geocentric theories.

Nicholls, Sir Douglas Ralph 1906–88
Australian clergyman, activist and administrator
Born at Cummeragunja Aboriginal station, southern New South Wales, he grew up on a mission station, and worked on the land until his Australian-rules football skills took him to Melbourne where, in 1935, he became the first Aboriginal to represent his state in football. As pastor, he established an Aboriginals' mission at Fitzroy in 1943 and worked actively for Aboriginal advancement. In 1972 he became the first Aboriginal to be knighted. In December 1976 he was appointed governor of South Australia, but he was forced to relinquish the position four months later due to ill health.

Nichols, John Gough 1806–73
English writer and editor
He was the son of the printer and writer John Bowyer Nichols (1779–1863), and like his father edited the *Gentleman's Magazine*. He also made valuable contributions to English history and genealogy.

Nichols, Mike, *originally* **Michael Igor Peschkowsky** 1931–
US film and theatre director
Born in Berlin, Germany, he emigrated to the USA with his family in 1939 and was naturalized in 1944. He studied acting with LEE STRASBERG before joining the improvisational theatre group, Compass Players, in Chicago (1955–57). He also became popular on radio, records and stage with ELAINE MAY, dissecting the American psyche through offbeat, satirical duologues (1957–61). The partnership culminated in a year-long Broadway engagement, after which he turned to direction, showing a flair for comedy, a liking for literate scripts and an ability in eliciting polished performances from his casts. He has received eight Tony Awards for his theatre work which includes *Barefoot in the Park* (1963), *The Odd Couple* (1965), *The Prisoner of Second Avenue* (1971), *The Real Thing* (1984), *Death and the Maiden* (1992) and *Spamalot* (2005). He also co-produced the hit musical *Annie* (1977). He directed his first film, *Who's Afraid of Virginia Woolf?*, in 1966 and received BAFTA and Academy Awards for *The Graduate* (1967). His films offer sardonic portraits of US life, social mores and sexual politics, and include *Catch 22* (1970), *Silkwood* (1983), *Working Girl* (1988), *Postcards from the Edge* (1990), *Wolf* (1994), *The Birdcage* (1996) and *Primary Colors* (1998).

Nicholson, Ben 1894–1982
English artist
Born in Denham, London, the son of Sir WILLIAM NICHOLSON, he exhibited with the Paris Abstraction-Création group from 1933 to 1934 and at the Venice Biennale in 1954. He designed a mural panel for the Festival of Britain (1951) and in 1952 executed another for the Time-Life building in London. As one of the leading abstract artists he gained an international reputation and won the first Guggenheim award in 1957. Although he produced a number of purely geometrical paintings and reliefs, he generally used conventional still-life objects as a starting point for his finely drawn and subtly balanced variations. His second wife was BARBARA HEPWORTH.

Nicholson, Jack (John Joseph) 1937–
US film actor
Born in New York City and raised by his grandparents in New Jersey, he began his career as an office boy at MGM, and after studying and working with the Players Ring Theater, made his film debut in *Cry Baby Killer* (1958). He spent the next decade in a succession of low-budget exploitation films before his first major success in *Easy Rider* (1969). He won praise for his portrayals of explosive non-conformists in *Five Easy Pieces* (1970) and *The Last Detail* (1973). His charisma and acute sense of humour have illuminated a wide range of characters in such diverse films as *Chinatown* (1974), *The Shining* (1980), *Prizzi's Honor* (1985) and *Ironweed* (1987). He won Academy Awards for *One Flew over the Cuckoo's Nest* (1975), *Terms of Endearment* (1984) and *As Good as it Gets* (1997) and has appeared in *Batman* (1989), *A Few Good Men* (1993), *Wolf* (1994), *About Schmidt* (2002) and *The Departed* (2006). He has also written scripts and occasionally directs.

Nicholson, (Edward) Max 1904–2003
English conservationist
Born in Ringwood, Hampshire, and educated at Oxford, he was a founder of the British Trust for Ornithology in 1932. He chaired the committee for the Festival of Britain in 1950, and was director-general of Nature Conservancy (1952–66), in which role he stimulated and established conservation work in the UK and throughout the world. He received the John C Phillips Medal from the International Union of the Conservation of Nature in 1963. He was president of the Royal Society for the Protection of Birds (1980–85) and has also served on the boards of the Wildfowl Trust, World Wildlife Fund (which he had been involved in establishing), and Common Ground International. He chaired the UK Standing Committee for World Conservation Strategy Programme (1981–83). His publications range from *Birds of England* (1926) to *The New Environmental Age* (1987) via *The System: the Misgovernment of Modern Britain* (1967). He was one of the founding fathers of modern wildlife conservation in Great Britain.

Nicholson, Seth Barnes 1891–1963
US astronomer
Born in Springfield, Illinois, he was on the staff of the Mount Wilson Observatory (1915–57) and discovered the ninth, tenth and eleventh satellites of Jupiter.

Nicholson, William 1753–1815
English physicist and inventor
He was born in London, educated in Yorkshire, and at the age of 16 entered the service of the East India Company. After returning to England in 1776, he settled in London where he opened a school of mathematics and from 1797 to 1815 published the *Journal of Natural Philosophy, Chemistry, and the Arts*. He also worked as a patent agent, and as engineer to several water supply undertakings. Only a few months after the first primitive electric battery had been constructed in 1799 by Count ALESSANDRO VOLTA, he built the first voltaic pile in England, and soon afterwards noticed that when the ends of the leads from the battery were immersed in water, bubbles of gas were produced. The results of his experiments were reported in 1800 in his journal and excited a great deal of interest. Among his many inventions were the hydrometer named after him, and a method for printing on linen and other materials, patented in 1790 but never put into practice.

Nicholson, Sir William Newzam Prior, *also called* **J Beggarstaff** 1872–1949
English artist
Born in Newark, Cambridgeshire, he studied in Paris and was influenced by JAMES MCNEILL WHISTLER and ÉDOUARD MANET. He became a fashionable portrait painter, but is principally remembered for the posters produced (with his brother-in-law, JAMES PRYDE) under the name of J and W Beggarstaff, for his woodcut book illustrations, and for his glowing still-life paintings.

Nicholson, (Rose) Winifred, *née* **Roberts**, *also known as* **Winifred Dacre** 1893–1981
English painter
Born in Oxford, she attended the Byam Shaw School of Art in London, and married the artist BEN NICHOLSON in 1920. She worked in Paris, Lugano, India and the Hebrides in Scotland then moved to Cumbria and became a member of the Seven and Five Society (1925–35). After 1931, the year her husband left her to live with BARBARA HEPWORTH, she changed her style from the figurative to experiment with abstraction. From 1935 to 1945 she exhibited under her mother's surname of Dacre.

Nicias d.413 BC
Athenian soldier and politician
A member of the aristocratic party, he opposed CLEON and ALCIBIADES. In 427–426 BC he defeated the Spartans and the Corinthians. In 424 BC he ravaged Laconia, but in 421 BC made a short-lived peace between Sparta and Athens (the Peace of Nicias). He was appointed commander of the naval expedition against Sicily (418 BC) despite his lack of sympathy with the mission. He laid siege to Syracuse (415 BC), and was at first successful, but subsequently experienced a series of disasters; his troops were forced to surrender, and he was put to death.

Nicklaus, Jack (William), *known as* **the Golden Bear** 1940–
US golfer
Born in Columbus, Ohio, he won the US Amateur championships twice while still a student at Ohio State University and played in the Walker Cup twice before turning professional in 1962. His first professional victory was the US Open (1962), a tournament he won a further three times (1967, 1972, 1980). Of the other Majors, he won the Masters a record six times (1963, 1965–66, 1972, 1975, 1986); the Open championship three times (1966, 1970, 1978); and the US PGA (Professional Golfers' Association) a record-equalling five times (1963, 1971, 1973, 1975, 1980). Along with his rival ARNOLD PALMER, he helped to redefine and popularize the modern game of golf. His total of 20 Major victories (including his two US Amateurs) is also a record. Although retired from tournament play, he is still involved in the game and runs a golf course design company.

Nicks, Swift *See* NEVISON, JOHN

Nicol, William 1768–1851
Scottish geologist and physicist
Born in Edinburgh, he lectured in natural philosophy at the university there. In 1828 he invented the Nicol prism, which utilizes the doubly refracting property of Iceland spar, and which proved invaluable in the investigation of polarized light. It was also of fundamental importance in studies of minerals under the microscope. He devised a new method of preparing thin sections of rocks for the microscope by cementing the specimen to the glass slide and then grinding it until it was possible to view it by transmitted light, thus revealing the mineral's properties and internal structure. The technique was initially developed to examine the minute details of fossil and recent wood, and Nicol himself prepared a large number of thin sections to this end. His reluctance to publish delayed the widespread use of thin sections for some 40 years until HENRY CLIFTON SORBY and others introduced them into petrology.

Nicolai, (Carl) Otto (Ehrenfried) 1810–49
German composer and conductor
Born in Königsberg, Prussia (now Kaliningrad, Russia), he became court conductor in Vienna (1841) and kapellmeister of the Royal Opera in Berlin (1847), where his opera *Die Lustigen Weiber von Windsor* (1846–47, Eng trans *The Merry Wives of Windsor*) was produced just before his death.

Nicolini, Adelina *See* PATTI, ADELINA

Nicolle, Charles Jules Henri 1866–1936
French physician, microbiologist and Nobel Prize winner
Born in Rouen, he was educated there and in Paris. His aptitude for research was stimulated at the Pasteur Institute in Paris by ÉMILE ROUX and ELIE METCHNIKOFF. He became director of the Pasteur Institute in Tunis (1902–32), which he and his colleagues turned into a leading research centre, working on the mode of spread, prevention and treatment of a number of diseases, including leishmaniasis, toxoplasmosis, Malta fever and typhus. His discovery that typhus is spread by lice (1909) had important implications during World War I and led to his award, in 1928, of the Nobel Prize in physiology or medicine. From 1932 he lectured each year at the Collège de France in Paris, but maintained his base in Tunis. He wrote novels, short stories and philosophical works.

Nicolson, Alexander 1827–93
Scottish Gaelic scholar
Born in Usabost in Skye, he was educated for the Free Church at Edinburgh. He became assistant to the philosopher Sir WILLIAM HAMILTON and became an advocate. A prolific writer in both English and Gaelic, he was a member of the Napier Commission that reported on crofting conditions in the Highlands and Islands (1884) and established the Crofters' Commission. He helped to revise the Gaelic Bible, and published *A Collection of Gaelic Proverbs and Familiar Phrases* (1881).

Niepce, (Joseph) Nicéphore 1765–1833
French chemist, one of the pioneers of photography

Nicéphore Niepce was born in Chalon-sur-Saône, Burgundy. He served under NAPOLEON I and in 1795 became administrator of Nice. With enough inherited wealth to support himself, he was able to devote himself to research in chemistry from 1801 on. He experimented with the new technique of lithography, using a camera obscura to project an image onto a wall, then tracing round the image in the time-honoured fashion.

Being a poor draughtsman, he decided to look for ways of fixing the image automatically. In 1822, using silver chloride paper and a camera, he achieved a temporary image of the view outside his workroom window, but could not fix it. In 1826 he succeeded in making a permanent image using a pewter plate coated with bitumen of Judea, an asphalt which hardens on exposure to light. This historic negative, which Niepce termed a 'heliograph', is now preserved at the University of Texas.

From 1829 Niepce collaborated with LOUIS DAGUERRE in the search for materials which would reduce the exposure time but he died, in Saint-Loup-de-Varennes, before any progress was made. Although Niepce is known principally for his photographic work, he was active in other fields; he invented a method to extract sugar from pumpkin and beetroot, and together with his brother Charles, built the Pyreolophore motor.

📖 Victor Fouque, *The Truth Concerning the Invention of Photography: Nicéphore Niepce – His Life, Letters and Works* (1935, trans by Edward Epstean).

Nicolson, Sir Harold George 1886–1968
English diplomat, writer and critic
He was born in Teheran, where his father (later 1st Baron Carnock) was British chargé d'affaires, and educated at Wellington College and Balliol College, Oxford. He had a distinguished career as a diplomat, entering the service in 1909, and holding posts in Madrid, Constantinople (Istanbul), Teheran and Berlin until his resignation in 1929, when he turned to journalism. From 1935 to 1945 he was National Labour MP for West Leicester. He wrote several biographies, for example those of TENNYSON, ALGERNON SWINBURNE and the official one of GEORGE V, as well as books on history, politics and, in *Good Behaviour* (1955), manners. He was highly regarded as a literary critic. He was married to VICTORIA SACKVILLE-WEST.

Nicot, Jean 1530–1600
French diplomat and scholar
Born in Nîmes, he became French ambassador in Lisbon (1559–61), and in 1561 introduced the tobacco plant into France from Portugal, called after him *Nicotiana*. The word 'nicotine' derives from his name. He also compiled one of the first French dictionaries (1606).

Nidetch, Jean 1923–
US entrepreneur
Born in Brooklyn, New York, she embarked on a diet to lose five stone in 1961 and found it to be easier when she had the support of a group of overweight friends with a similar goal. From this simple idea grew an organization, Weight Watchers International, launched in 1963, which foreshadowed a major boom in the diet and fitness industries.

Niebuhr, Helmut Richard 1894–1962
US theologian
Born in Wright City, Missouri, he taught at Yale from 1931, becoming professor of theology and Christian ethics and director of graduate studies. Like his brother, REINHOLD NIEBUHR, he had enormous influence on generations of students. His classic study *The Meaning of Revelation* (1941) was followed by *Christ and Culture* (1951), *Radical Monotheism and Western Culture* (1960) and *The Responsible Self* (1963): a series of books advocating critical reflection on the relation between faith and moral action and a quest for a Christian transformation of society. His concern that ministers be adequately trained for this task was reflected in his direction of a survey of American Protestant theological education (1954–56).

Niebuhr, Reinhold 1892–1971
US theologian
Born in Wright City, Missouri, the son of a clergyman, he was educated at Elmhurst (Illinois) College, Eden Theological Seminary and Yale Divinity School. He became an evangelical pastor in working-class Detroit (1915–28) and was professor of Christian ethics at the Union Theological Seminary, New York (1928–60). His early liberalism and social idealism eventually gave way to a more pessimistic theology known as Christian Realism, which recognized man's sinfulness and propensity to abuse power and asserted that such a recognition was necessary if the struggle for social justice was to have any measure of success. He wrote *Moral Man and Immoral Society* (1932), *The Nature and Destiny of Man* (2 vols, 1941–43), *Faith and History* (1949), *The Irony of American History* (1952), *Structure of Nations and Empires* (1959), and many other books. He was the brother of HELMUT RICHARD NIEBUHR.

Niel, Cornelis Bernardus Kees Van *See* VAN NIEL, CORNELIS BERNARDUS KEES

Nielsen, Carl August 1865–1931
Danish composer
Born in Nörre-Lyndelse, near Odense, he became a bandsman at Odense, and in 1883 entered the Copenhagen Conservatory. His compositions from this period – including the G minor quartet and oboe fantasias – are not revolutionary, but with his 1st Symphony (1894) his progressive tonality and rhythmic boldness become apparent, though still within a classical structure. His 2nd Symphony (1901–02, 'The Four Temperaments') shows the first use in Danish music of polytonality, along with the contrapuntal style which was to become characteristic of him. His other works include four other symphonies (1912, 1916, 1922, 1925), the tragic opera *Saul and David* (1902), the comic opera *Masquerade* (1906), chamber music, concertos for flute, clarinet and violin, and a huge organ work, *Commotio* (1931). In 1915 he was appointed director of Copenhagen Conservatory. He tried through new harmonies, rhythms and melodic ideas of Nordic character to rid Danish music of its prevalent Romanticism. Nielsen was also a distinguished conductor, and exerted a great influence on the musical development of Denmark.

Niemeyer, Oscar 1907–
Brazilian architect
Born in Rio de Janeiro, he studied at the National School of Fine Arts in Brazil and began work in the office of LUCIO COSTA (1935). From 1936 to 1943 he joined Costa and others to design the Ministry of Education and Public Health, Rio (1937–42, with LE CORBUSIER as consultant architect). With Costa he designed the Brazilian Pavilion at the New York World Fair (1939). He became architectural adviser to Nova Cap, serving as its chief architect (1957–59), and co-ordinating the development of Brasilia. His Expressionist powers are well displayed in a group at Pampúlha, including the Church of São Francisco (1942–44), where parabolic sections indicate the organic, antirationalist principles underlying his work. Further major works are the Exhibition Hall, São Paulo (1953), the President's Palace, Law Courts and Cathedrals, Brasilia, and the Niterói Contemporary Art Museum (1996). He has continued to design new works and make adaptations to past projects into his late nineties.

Niemöller, Martin 1892–1984
German theologian and resistance figure
Born in Lippstadt, Westphalia, he served as a U-boat commander in World War I, then entered the Lutheran Church and held various positions, most notably as pastor in Berlin-Dahlem from 1931. He was a prominent member of the anti-Nazi Confessing Church for which he was arrested in 1937 and sent to Sachsenhausen and Dachau concentration camps. Freed in 1945, he resumed his church career and adopted outspoken views on current affairs, most notably on German reunification and nuclear disarmament. In 1961 he became president of the World Council of Churches. He wrote *Vom U-Boot zur Kanzel* (1934, 'From U-Boat to the Pulpit'), and collections of his sermons include *Six Dachau Sermons* (1946, Eng trans 1959).
📖 C Start-Davidson, *God's Man* (1959)

Niepce, Nicéphore *See panel above*

Nietzsche, Friedrich Wilhelm 1844–1900
German philosopher, scholar and writer
Born in Röcken, Saxony, the son of a Lutheran pastor, he proved himself a brilliant classical student at the universities of Bonn

Nightingale, Florence 1820–1910
English nurse and hospital reformer

Florence Nightingale was named after the place of her birth in Italy. She trained as a nurse at Kaiserswerth (1851) and Paris and in 1853 became superintendent of a hospital for invalid women in London. In the Crimean War she volunteered for duty and took 38 nurses to Scutari in 1854. She organized the barracks hospital after the Battle of Inkerman (5 November) and by imposing strict discipline and standards of sanitation reduced the hospital mortality rate drastically. She returned to England in 1856 and a fund of £50,000 was subscribed to enable her to form an institution for the training of nurses at St Thomas's and at King's College Hospital.

She devoted many years to the question of army sanitary reform, to the improvement of nursing and to public health in India. Her main work, *Notes on Nursing* (1859), went through many editions.

📖 S Dengler, *Florence Nightingale* (1988); E Huxley, *Florence Nightingale* (1975).

> 'No *man*, not even a doctor, ever gives any other definition of what a nurse should be than this – "devoted and obedient". This definition would do just as well for a porter. It might even do for a horse. It would not do for a policeman.'
>
> – From *Notes on Nursing*.

and Leipzig. He was appointed professor of classical philology at the University of Basle at the age of 24 and became a Swiss citizen, serving briefly as a medical orderly in 1870 in the Franco-Prussian War but returning to the university in poor health. His first book *Die Geburt der Tragödie* (1872, Eng trans *The Birth of Tragedy*, 1909), with its celebrated comparison between 'Dionysian' and 'Apollonian' values, was dedicated to RICHARD WAGNER, who had become a friend and whose operas he regarded as the true successors to Greek tragedy. However, he broke violently with Wagner in 1876, nominally at least because he thought the Christian convictions expressed in *Parsifal* were 'mere playacting' and political expediency. In 1878 he was forced to resign his university position after worsening bouts of his psychosomatic illnesses and spent most of the next ten years at various resorts in France, Italy and Switzerland writing and trying to recover his health. In 1889 he had a complete mental and physical breakdown, probably syphilitic in origin, and he was nursed for the next twelve years, first by his mother at Naumberg then by his sister Elizabeth at Weimar. He never recovered his sanity. In the 16 years from 1872 he had produced a stream of brilliant, unconventional works, often aphoristic or poetical in form, which have secured him an enormous, if sometimes cultish, influence in modern intellectual history. The best-known writings are: *Unzeitgemässe Betrachtungen* (1873–76, Eng trans *Thoughts Out of Season*, 1909), *Die Fröhliche Wissenschaft* (1882, Eng trans *The Joyful Wisdom*, 1910), *Also sprach Zarathustra* (1883–92, 'Thus Spake Zarathustra'), *Jenseits von Gut und Böse* (1886, Eng trans *Beyond Good and Evil*, 1907), *Zur Genealogie der Moral* (1887, Eng trans *A Genealogy of Morals*, 1897), and *Ecce Homo* (his autobiography, completed in 1888 but withheld by his sister and not published till 1908). One cannot derive systematic 'theories' from these often highly-wrought literary works but the characteristic themes are the vehement repudiation of Christian and liberal ethics, the detestation of democratic ideals, the celebration of the *Übermensch* (superman) who can create and impose his own law, the death of God, and the life-affirming 'will to power'. His reputation suffered when his views were taken up in a simple-minded and perverted form by the German Nazis, but he is now regarded as a major, though very individual, influence on many strands of later thought, including existentialism and psychoanalysis, and on figures as various as KARL JASPERS, MARTIN HEIDEGGER, THOMAS MANN, W B YEATS, KARL MANNHEIM and MICHEL FOUCAULT.
📖 Peter Bergman, *Nietzsche* (1987)

Nieuwland, Julius Arthur 1878–1936
US chemist
He was born in Hansbeke, Belgium, and after his parents emigrated to the USA he was educated at the University of Notre Dame, South Bend, Indiana. He then studied for the priesthood at the Catholic University of America, Washington, DC. He spent his teaching career at Notre Dame, as professor of botany (1904–18) and professor of organic chemistry (1918–36). While studying the reaction between acetylene and arsenic trichloride in the course of his doctoral work, Nieuwland had made a highly toxic gas and discontinued his research because of its deadly nature. It was subsequently developed into a poison gas (lewisite) and used in World War I. In the 1920s Nieuwland carried out further research into the reactions of acetylene, working from 1925 in collaboration with the chemists of Du Pont de Nemours. This research resulted (1929) in the synthesis of neoprene (at first known as Duprene), the first commercially successful synthetic rubber.

Nightingale, Florence *See panel above*

Nijinska, Bronislava *See panel p1162*

Nijinsky, Vaslav *See panel p1163*

Nikisch, Arthur 1855–1922
Hungarian conductor and composer
Born in Lébényi Szentmiklós, he was conductor of the Boston Symphony Orchestra (1889–93), the Gewandhaus Orchestra of Leipzig from 1895, and the Berlin Philharmonic Orchestra from 1897. His compositions include a string quartet and a symphony.

Nikodim, Boris Georgiyevich, *originally surnamed* **Rotov** 1929–78
Russian prelate, and metropolitan of Leningrad
Born in Frolovo, he entered the Russian Orthodox monastery at Ryazan, and assumed the name of Nikodim on being made deacon in 1947. He combined parochial work with studies at Leningrad (now St Petersburg), and was archimandrite in charge of the Russian Orthodox Mission in Jerusalem before being consecrated in 1960 as Bishop of Podolsk. He then became head of foreign relations for the Russian Church, which led into the World Council of Churches amid great acclaim in 1961. Two years later, still only 34, he was appointed metropolitan, and became known at ecumenical meetings all over the world. He collapsed and died during an audience with Pope JOHN PAUL I in the Vatican.

Nikolais, Alwin 1910–93
US dancer, choreographer, teacher and director
Born in Southington, Connecticut, he was, at first, a pianist for silent films and a puppeteer. After seeing MARY WIGMAN perform in 1933 he turned to dance and studied with HANYA HOLM. He moved to New York City in 1948, where he produced children's theatre at the Henry Street Playhouse, out of which he founded his own dance company, Nikolais Dance Theatre. His style was idiosyncratic and uninhibited by conventional artistic boundaries. He designed his own sets with painted slides and tin cans punctured with holes to remarkable effect, and composed scores out of chopped tape. Always an innovator, he became, in 1963, the first artist to use the Moog synthesizer. His work includes *Noumenon* (1953), *Kaleidoscope* (1956), *Imago* (1963), *Sanctum* (1964), *Gallery* (1978) and for the Paris Opéra Ballet, *Schema* (1980) and *Arc-en-Ciel* (1987).

Niland, D'Arcy Francis 1919–67
Australian writer
He was born in Glen Innes, New South Wales. After his early years working in the bush, he went to Sydney and in 1942 married the New Zealand writer RUTH PARK, after which he settled down to writing. Between 1949 and 1952 he won many prizes for short stories and novels, and in 1955 he achieved international fame with his novel *The Shiralee* (filmed 1957). This was followed by *Call Me When the Cross Turns Over* (1957), *Gold in the Streets* (1959) and perhaps his best novel, *Dead Men Running* (1969, later an ABC serial). He also wrote radio and television plays, and hundreds of short stories, some of which were published in four collections between 1961 and 1966. With Ruth Park he wrote the story of their early married life and writing careers in *The Drums Go Bang* (1956).

Niles, Daniel Thambyrajah 1908–70
Tamil Methodist, ecumenical leader and evangelist
Born near Jaffna, a fourth-generation Tamil Christian, he became increasingly involved in the developing ecumenical movement. The youngest delegate at the 1938 International Missionary Council Tambaram Conference, he was appointed a president of the World Council of Churches after Uppsala (1968), and at the time of his death was chairman of the East

Nijinska, Bronislava or **Bronisława** 1891–1972
Russian ballet dancer and choreographer

Nijinska was born in Minsk, the sister of VASLAV NIJINSKY. Her parents were professional dancers, and she, like her brother, studied at the Imperial Ballet School in St Petersburg, graduating in 1908 and going on to become a soloist with the Maryinsky company. She danced with SERGEI DIAGHILEV's Ballets Russes in Paris and London before returning to Russia during World War I, when she started a school in Kiev, but went back to Diaghilev in 1921, following LÉONIDE MASSINE as principal choreographer.

Among the ballets she created for the company were her masterpieces *Les Noces* (1923, 'The Wedding') and *Les Biches* (1924, 'The Does'). After working in Buenos Aires and for Ida Rubinstein's company in Paris she briefly formed her own company in 1932. From 1935 she choreographed for many companies in Europe and the USA, but lived mainly in the USA and started a ballet school in Los Angeles (1938). She was persuaded to stage a revival of *Les Noces* and *Les Biches* at Covent Garden in 1964.

📖 Her *Early Memoirs* were translated into English in 1981. See also Nancy Van Norman Baer, *Nijinska: A Dancer's Legacy* (1986); Richard Buckle, *Nijinska* (1972).

Asian Christian Conference and president of the Methodist Church in Ceylon (now Sri Lanka). He wrote 45 hymns for the *EACC Hymnal* (1963), and these, along with the posthumous *A Testament of Faith* (1972), convey the spirit of his many books.

Nilsen, Dennis 1945–
Scottish convicted murderer
He was born in Fraserburgh, Aberdeenshire, and after a period in the army and a year as a probationary policeman, he became a civil servant in 1974. While living in two rented flats in London, he invited a series of young men home, strangling, or attempting to strangle, several of them. He dissected the dead victims, disposing of some of the remains by flushing them down the toilet. When, in 1983, the drains became blocked he was discovered, and arrested. He has admitted to 15 murders. Throughout the four years of his offending, he had sustained his employment, gained promotion and was an active trade unionist. He was at the centre of controversy in 1993 after he was interviewed on television about his crimes, showing no remorse.

Nilsson, (Märta) Birgit 1918–2005
Swedish soprano
Born near Karup, Kristianstadslaen, she studied at the Stockholm Royal Academy of Music, where her teachers included JOSEPH HISLOP. Following her debut in 1946, she sang with the Stockholm Royal Opera (1947–51), and at the Bayreuth Festival from 1953 to 1970. She was the leading Wagnerian soprano of that period, having a voice of great power, stamina and intense personality. Well known in most of the great houses and festivals of the world, her repertoire included works by VERDI, PUCCINI and RICHARD STRAUSS. She retired from the stage in 1982.

Nilsson, Lennart 1922–
Swedish photographer
Born in Strängnäs, he worked initially as a freelance press photographer, but went on to pioneer microfilm showing the anatomy of plants and animals. He became best known for his microbiological and medical photography. Working in close contact with medical teams, he successfully combined the techniques of photography and endoscopy, and perfected special lenses to film inside the human body which enabled him to produce pictures of the human foetus in the womb from conception to birth. His pictorial record entitled *Ett barn blir till* (1965, 'A Child is Born'), was hugely successful internationally. His other publications include *Life* (2006).

Nimeiri, Gaafar Mohamed el- 1930–
Sudanese soldier and politician
Born in Omdurman, he joined the army and continued his training in Egypt, where he became a disciple of GAMAL ABD AL-NASSER. In 1969, with the rank of colonel, he led the military coup which removed the civilian government and established a Revolutionary Command Council (RCC). In 1971, under a new constitution, he became president. Although he was twice re-elected, by the 1980s his regional policies and his attempts to impose strict Islamic law had made his regime unpopular and in 1985, while visiting the USA, he himself was deposed by an army colleague, General Swar al-Dahab.

Nimitz, Chester William 1885–1966
US naval commander
Born in Fredericksburg, Texas, he graduated from the US Naval Academy, Annapolis, in 1905, served mainly in submarines, and by 1938 was rear admiral. From 1941 to 1945 he commanded the US Pacific fleet and Pacific Ocean areas, contributing largely to the defeat of Japan. Made a fleet admiral in 1944, he signed the Japanese surrender documents for the USA on the USS *Missouri* in Tokyo Bay (1945). He became Chief of Naval Operations from 1945 to 1947 and Special Assistant to the Secretary of the Navy (1947–49), and led the UN mediation commission in the Kashmir dispute in 1949. 📖 E B Potter, *Nimitz* (1976)

Nin, Anaïs 1903–77
US writer
Born in Paris, to parents of mixed Spanish–Cuban descent, she spent her childhood in Europe until, at the age of eleven, she left France to live in the USA. Ten years later, she returned to Paris, where she studied psychoanalysis under OTTO RANK, became acquainted with many well-known writers and artists and began to write herself. Her first novel, *House of Incest*, was published in 1936 and was followed by volumes of criticism, among them *The Novel of the Future* (1968), and a series of novels including *Winter of Artifice* (1939), *A Spy in the House of Love* (1954) and *Collages* (1964). She also published an early collection of short stories, *Under a Glass Bell* (1944). Ultimately, however, her reputation as an artist and seminal figure in the new feminism of the 1970s rests on her seven *Journals* (1966–83). Spanning the years 1931–74 they are an engrossing record of an era and some of its most intriguing and avant-garde players, as well as a passionate, explicit and candid account of one woman's voyage of self-discovery. 📖 N Scholar, *Anaïs Nin* (1984)

Ninagawa, Yukio 1935–
Japanese stage director
He studied at the Seihari Theatre Company, and emerged as a leading light in Japanese avant-garde theatre with his work at Toyko's Small Basement Theatre. He staged *Romeo and Juliet* as his first production for the Toho Company (1974), followed by a series of classical works and numerous Japanese plays. In 1985 he created a sensation at the Edinburgh Festival with a vibrant, colourful, violent, Samurai-influenced production of *Macbeth*, followed by an open-air production in a Georgian courtyard of EURIPIDES' *Medea* in 1986. Both productions were subsequently seen at the National Theatre in London, for which Ninagawa won the 1987 Olivier award for director of the year. In 1992 he produced a Noh-influenced version of *The Tempest* at the Barbican Theatre, London and directed *King Lear* there in 1999. In 2003, he brought his own company to London with a production of *Pericles*. In 2006, he launched a new company, Saitama Gold Theatre, for performers aged over 55. He is regarded as one of Japan's greatest theatre artists, and has also directed or acted in a number of films. He was made an honorary CBE in 2002.

Ninian, St, *also known as* **Nynia** or **Ringan** fl.390 AD
Scottish bishop, the earliest known Christian leader in Scotland
Born Ailred of Rievaulx, near the Solway Firth, according to his 12th-century biographer, he was also alleged to be the son of a Christian king. According to BEDE, writing about 730, he was a bishop of the Old Welsh British, and studied in Rome. He was consecrated bishop by the pope (AD 394) and sent as an apostle to the western parts of Great Britain. On his way home from Rome he visited St MARTIN of Tours, who supplied him with masons and to whom he later dedicated his church. He selected Wigtownshire for the site of a monastery and church, which was built around AD 400 (and named Candida Casa, or 'White House', according to Bede). Successful in converting the southern Picts, he died at Whithorn and was buried there, although other sources suggest he may have withdrawn to Ireland.

Nino *See* BIXIO, GIROLAMO

Ninoy *See* AQUINO, BENIGNO

Nijinsky, Vaslav 1890–1950
Russian dancer and choreographer

Nijinsky was born in Kiev into a family of dancers who had their own dance company. Considered to be the greatest male dancer of the 20th century, he, like his sister BRONISLAVA NIJINSKA, trained at the Imperial Ballet School in St Petersburg, and first appeared in ballet at the Maryinski Theatre. As the leading dancer in SERGEI DIAGHILEV's Ballets Russes, which performed in Paris in 1909, he became enormously popular, and in 1911 he appeared as Petrushka in the first perfomance of IGOR STRAVINSKY's ballet. His choreographic repertoire was small but had two exceptional high points, in CLAUDE DEBUSSY's *L'Après-midi d'un faune* (1912, 'Prelude to the Afternoon of a Faun') and in Stravinsky's *Sacre du printemps* (1913, 'The Rite of Spring').

He married in 1913 and was interned in Hungary during the early part of World War I. He rejoined Diaghilev for a world tour, but was diagnosed a paranoid schizophrenic in 1917. Even before his death Nijinsky had become a legendary figure.

📖 Nijinsky's *Diary* was published in English in 1968. See also biographies by his wife Romola Nijinsky: *Nijinsky* (1933) and *The Last Years of Nijinsky* (1952).

Nipkow, Paul 1860–1940
German engineer
He was born in Lauenburg. One of the pioneers of television, he invented the 'Nipkow disc' in 1884, a mechanical scanning device consisting of a revolving disc with a spiral pattern of apertures. In use until 1932, it was superseded by electronic scanning.

Nirenberg, Marshall Warren 1927–
US biochemist and Nobel Prize winner
Born in New York City, he was educated at the universities of Florida and Michigan, and worked from 1957 at the National Institutes of Health in Bethesda, Maryland. There are different combinations of three nucleotide bases (triplets or 'codons') in nucleic acid chains in DNA and RNA, with each triplet coded for a different amino acid in the biological synthesis of proteins, the fundamental process in the chemical transfer of inherited characteristics. The precise nature of the code remained unknown until Nirenberg attacked the problem of the 'code dictionary' by synthesizing a nucleic acid with a known base sequence, and then finding which amino acid it converted to protein. With his success, HAR GOBIND KHORANA and others soon completed the task of deciphering the full code. In 1968 Nirenberg, Khorana and ROBERT HOLLEY shared the Nobel Prize in physiology or medicine for this work. Later he turned his attention from genetics to neurobiology, with research topics including the effects of morphine and the structure of neural cell receptors. He is the recipient of the National Medal of Science (1966) and the National Medal of Honor (1968) and with Khorana also won the 1968 Lasker Prize for basic medical research.

Niro, Robert De *See* DE NIRO, ROBERT

Nithsdale, William Maxwell, 5th Earl of 1676–1744
Scottish Jacobite
A Catholic, he joined the English Jacobites in the 1715 Rising and was taken prisoner at Preston. He was tried for high treason in London and sentenced to death, but he escaped from the Tower in his wife's clothes on the eve of his execution. They settled in Rome.

Ni Tsan *See* NI ZAN

Nitsch, Hermann 1938–
Austrian performance artist
Born in Vienna, he lives and works in Prinzendorf. After reading ARTHUR SCHOPENHAUER and NIETZSCHE, he decided that 'art was something similar to religion, and the performance of art corresponded to a ritual'. His work consists of 'orgy mystery theatre' in which, for example, slaughtered cattle are hung up before naked men who lie on stretchers, spattered with blood, while music is played. He staged his lengthy 100th performance, *Six-Day Play*, in 1998 at Schloss Prinzendorf, his castle in northern Austria. A shortened version was performed in 2004, lasting a mere two days.

Nivelle, Robert 1857–1924
French soldier
Born in Tulle, he was an artillery colonel, and made his name when in command of the army of Verdun by recapturing Douaumont and other forts (1916). He was briefly commander-in-chief (1916–17), when his Aisne offensive failed and he was superseded by PHILIPPE PÉTAIN.

Niven, David, *originally* **James David Graham Nevins** 1910–83
English actor
Born in London, he was a graduate of the Royal Military College at Sandhurst, and took a variety of jobs before he arrived in Hollywood, where he joined the social set led by ERROL FLYNN and CLARK GABLE, and worked as an extra in *Mutiny on the Bounty* (1935). Signed by SAMUEL GOLDWYN, he developed into a polished light-comedian and gallant hero in films like *Dodsworth*, *The Charge of the Light Brigade* (both 1936), *The Dawn Patrol* (1938) and *Bachelor Mother* (1939). After service as an army officer in World War II he spent 30 years as an urbane English-style leading man, perfectly cast as the gentlemanly voyager Phileas Fogg in *Around the World in 80 Days* (1956), and winning an Academy Award for *Separate Tables* (1958). An inimitable raconteur, he published two volumes of lighthearted autobiography, *The Moon's A Balloon* (1972) and *Bring on the Empty Horses* (1975).

Niven, Frederick John 1878–1944
Scottish novelist
Born in Chile, of Scots parentage, he was educated at Glasgow School of Art, then travelled widely in South America and worked as a journalist (1898–1914). After World War I he emigrated to Canada. He wrote more than 30 novels, mostly set in Glasgow or Canada, including *The Lost Cabin Mine* (1908), *The Justice of the Peace* (1914) and *The Staff at Simsons* (1937). His major work was a trilogy on Canadian settlement, comprising *The Flying Years*, *Mine Inheritance* and *The Transplanted* (1935–44). He also published an autobiography, *Coloured Spectacles* (1938).

Nixon, Richard Milhous *See panel p1164*

Niyazov, Saparmurat Atayevich 1940–2006
Turkmenistan politician
Born in Ashkhabad (now Ashgabat), he was orphaned at an early age. After earning an engineering degree from Leningrad Polytechnic Institute in 1967, he returned to his homeland and became involved in local politics. By 1986 he was a member of the Central Committee of the Communist Party in the USSR, as well as holding key political appointments in Turkmenistan. He became the first president of an independent Turkmenistan in 1990, and from 1993 was known as 'Turkmenbashi' ('leader of all Turkmen'). In 1999 he became president for life. A ruthless and authoritarian dictator, he tolerated no dissent and was notorious for introducing increasingly bizarre and repressive laws during his regime.

Ni Zan or **Ni Tsan** 1301–74
Chinese landscape painter, calligrapher and poet
Born in Wui, Jiangsu (Kiangsu) Province, he may not be the greatest of the Four Great Masters of the Yuan period, but he is certainly the purest. A passionate lover of culture and aesthetics, he nevertheless spent the last 20 years of his life travelling the lakes of the lower Yangtze River with no possessions. His solitary temperament and search for purity, and an absolute spiritual certainty and technical discipline, permeate his work. Instead of showing the typical development from early to mature, his work consists of a rational, austere and disembodied assemblage of expressive forms, almost reduced to signs, which constituted a radical departure from all previous traditions.

Nkomo, Joshua (Mqabuko Nyongolo) 1917–99
Zimbabwean nationalist and politician
He was born in Semokwe, Matabeleland, and educated in Natal and at Fort Hare College, where he joined the African National Congress (ANC). He returned to Bulawayo as a social worker and became general secretary of the Rhodesian Railway African Employees Association in 1951. Elected chairman of the (Southern Rhodesian) African National Congress in 1951, he became its president in 1957, leaving the country for exile in 1959. When the ANC was banned, he became president of its successor, the National Democratic Party, but that, too, was banned. He then helped form the Zimbabwe African People's Union (ZAPU) of which he became president. His non-

Nixon, Richard Milhous 1913–94
37th president of the USA

Richard Nixon was born in Yorba Linda, California, into a lower-middle class Quaker family of Irish descent, and was educated at Whittier College and Duke University. After five years' practice as a lawyer, he served in the US navy (1942–46), then ran for Congress as a Republican in California in 1946, defeating his Democratic opponent by painting him as a Communist sympathizer, a strategy he would use often in his career.

His fearless outspokenness and tactical brilliance allowed him to rise swiftly in political circles, and he was particularly prominent as a member of the House Committee on Un-American Activities, working on the ALGER HISS case. After serving in the Senate (1951–53) he became vice-president under DWIGHT D EISENHOWER in 1953 and was re-elected in 1956. In May 1958 he and his wife were subjected to violent anti-American demonstrations in Peru and Venezuela, during a goodwill tour of Latin America, and in 1959 on a visit to Moscow he achieved notoriety by his outspoken exchanges with NIKITA KHRUSHCHEV. As the Republican presidential candidate in 1960, he lost the election to JOHN F KENNEDY by a tiny margin. Standing for the governorship of California in 1962, he was again defeated.

Despite an emotional declaration that he was retiring from politics, he returned to win the presidential election in 1968 by a small margin, and he was re-elected in 1972 by a large majority. His administration (1969–74) was marked by continuing controversy over the Vietnam War, especially the invasion of Cambodia (1970) and the heavy bombing of North Vietnam, which ended with the eventual signing of a ceasefire in 1973. Other dramatic foreign policy events were Nixon's initiation of a strategic arms limitation treaty with the USSR, his reopening of US relations with the People's Republic of China (1972), and his visit there, the first by a US president.

During an official investigation into a break-in in June 1972 at the Democratic National Committee's headquarters in the Watergate building, Washington, Nixon lost credibility with the US people by at first claiming executive privilege for senior White House officials to prevent them being questioned, and by refusing to hand over tapes of relevant conversations. On 9 August 1974, after several leading members of his government had been found guilty of being involved in the Watergate scandal, he resigned, the first US president to do so, thus averting the threat of impeachment, and in September 1974 he was given a full pardon by President GERALD FORD. In his memoirs (1978) and other works written during his retirement he sought to salvage his damaged reputation and rebuild his image as a statesman.

📖 F Emery, *Watergate, the Corruption and Fall of Richard Nixon* (1994); S Ambrose, *Nixon: The Triumph of a Politician* (1989) and *Nixon: The Education of a Politician* (1987); C L Sulzberger, *The World of Richard Nixon* (1987); T H White, *Breach of Faith* (1975).

> 'So you are lean and mean and resourceful, and you continue to walk on the edge of the precipice because over the years you have become fascinated by how close you can walk without losing your balance.'
>
> – Quoted in the *Washington Post*, 9 August 1979.

confrontationist tactics and tendency to spend time outside Rhodesia led to a more radical group breaking away to form the Zimbabwe African National Union (ZANU). ZANU, led by ROBERT MUGABE, and ZAPU, with different international patrons and separate military wings, competed for the representation of African opinion but were persuaded to unite to form the Patriotic Front in 1976. ZAPU, however, was increasingly an Ndebele party and in the 1980 elections won only 20 seats. Mugabe became prime minister and Nkomo, who still saw himself as the father of Zimbabwean nationalism, was disappointed to be offered only the post of Minister of Home Affairs, from which he was dismissed in 1981. Violence in Matabeleland encouraged him into a period of further exile, but he returned and agreed to integrate his party into ZANU, the two merging to form ZANU-PF in 1988, making Zimbawe effectively a one-party state with Mugabe as president, and Nkomo as vice-president (1990–99). 📖 *Nkomo: The Story of My Life* (1984)

Nkrumah, Kwame 1909–72
Ghanaian politician
He was born in Nakroful, Gold Coast, and educated at Achimota College, Lincoln University, Pennsylvania, and the London School of Economics. He returned to Africa (1947) and in 1949 formed the nationalist Convention People's Party with the slogan 'self-government now'. In 1950 he was imprisoned for his part in calling strikes and was elected to parliament while still in jail. A year later he was released, and became virtual prime minister with the title of Leader of Business in the Assembly. He was confirmed in power at the 1956 election and in 1957 was appointed the first prime minister of the independent Commonwealth State of Ghana. Called the 'GANDHI of Africa', he was a significant leader, first of the movement against white domination, and then of Pan-African feeling. Ghana became a republic in 1960. Nkrumah was the moving spirit behind the Charter of African States (1961). Economic reforms sparked off political opposition and several attempts on his life. Legal imprisonment of political opponents for five years and more without trial, and interference with the judiciary in the treason trial (1963, when he dismissed the Chief Justice), heralded the successful referendum for a one-party state in 1964, in which the secrecy of the ballot was called into question. In 1966 his regime was overthrown by a military coup during his absence in China. He sought refuge in Guinea where he was appointed joint head of state. He died in Bucharest.

Noah
Biblical character
He is depicted as the son of Lamech. A 'righteous man', he was given divine instruction to build an ark in which he, his immediate family, and a selection of animals were saved from a widespread flood over the Earth (Genesis 6–9). In the Table of Nations (Genesis 10), Noah's sons Japheth, HAM and Shem are depicted as the ancestors of all the nations on Earth.

Noailles, Anna Elizabeth de Brancoven, Comtesse Mathieu de 1876–1933
French poet and novelist
She was born in Paris, of Romanian and Greek descent. With her first book, a collection of sensual and musical poems, *Le Cœur innombrable* (1901, 'The Innumerable Heart'), written under the influence of FRANCIS JAMMES, she won the hearts of the French poetry-reading public, and was acclaimed as 'Princesse des lettres'. This verse has now dated, but the best of it is still worthy of attention. However, her last poems show her at her most original. A friend to MAURICE BARRÈS, she was greatly disliked by some French critics, and has hardly had her posthumous due. 📖 C Fournet, *Un Grand poète français moderne: la Comtesse de Noailles* (1950)

Nobel, Alfred Bernhard *See panel p1165*

Nobile, Umberto 1885–1978
Italian aviator
Born in Lauro, he became an aeronautical engineer and built the airships *Norge* and *Italia*. He flew across the North Pole in the *Norge* with ROALD AMUNDSEN and LINCOLN ELLSWORTH in 1926, but in 1928 he was wrecked in the *Italia* when returning from the North Pole, and was adjudged (1929) responsible for the disaster. In the USA from 1936 to 1942, he later returned to Italy and was reinstated in the Italian air service.

Nobili, Leopoldo 1784–1835
Italian physicist
Born in Trassilico, he served in the Italian army as an artillery captain, then was appointed professor of physics at Florence, and engaged in research into electricity. He developed the theory that an electric current is a flow of heat or caloric, an essential step towards the ultimate acceptance of JAMES CLERK MAXWELL's electrodynamic theories. He invented the thermopile, which could be used in the measurement of radiant heat, and to measure very small electric currents more accurately he devised the astatic galvanometer.

Noble, Adrian Keith 1950–
English stage director
He studied at Bristol University and the Drama Centre in London, and worked for two years in community and young people's theatre in Birmingham. He became an associate director of the Bristol Old Vic (1976–79), and joined the Royal

Nobel, Alfred Bernhard 1833–96

Swedish chemist and manufacturer, the inventor of dynamite and the founder of the Nobel prizes

Alfred Nobel was born in Stockholm, the son of an engineer. He moved in his childhood to Russia, where his father was working on an underwater mine he had devised. He studied chemistry in Paris, worked in the USA with the Swedish-born JOHN ERICSSON, and settled in Sweden in 1859. Like his father he was an explosives expert, and in 1866 he invented a safe and manageable form of nitroglycerin, which he called 'dynamite'; later, he invented smokeless gunpowder, and in 1875 gelignite.

On the strength of these inventions, he created an industrial empire which manufactured many of his other inventions, from artificial gutta-percha to mild steel for armour-plating. He amassed a huge fortune, much of which he left to endow annual Nobel prizes (first awarded in 1901) for physics, chemistry, physiology or medicine, literature and peace (a sixth prize, for economics, was instituted in his honour in 1969). The synthetic transuranic element nobelium was named after him.
